This short-lived greatness ended with the last king of Jehu’s line. (d) 715–722 B.C. Military violence, it would seem, broke the hereditary succession after the obscure and probably convulsed reign of Zechariah. An unsuccessful usurper, Shallum, is followed by the cruel Menahem, who, being unable to resist the first attack of Assyria under Pul, became the agent of that monarch for the oppressive taxation of his subjects. The reign of his son Pekahiah was, after one year, cut short by a bold usurper, Pekah. Abandoning the N. and trans-Jordanic regions to the encroaching power of Assyria under Tiglath-pileser, Pekah was very near subjugating Judah, with the help of Damascus, now allied to Israel. The irresolve HOSHEA, the next and last usurper, became tributary to his invader, Shalmaneser, betrayed the Assyrian to the rival monarchy of Egypt, and was punished by the loss of his liberty, and by the capture, after three years’ siege, of his strong capital, SAMARIA. Some remnants of the ten tribes yet remained in the land after so many years of religious decline, moral debasement, national degradation,
anarchy, bloodshed, and deportation. Even these were carried to Assyria, never again, as a distinct people, to occupy their portion of that goodly land which their forefathers under Joshua won from the heathen.

**Israelite.** [Israel; Jew.]

**Issachar** (he brings reward).—1. Jacob’s ninth son and Leah’s fifth child, named from her exclamation at his birth (Gen.30.18). He had four sons at the time of the descent into Egypt (46.13). In the blessing of Jacob (49.14) he is compared to a “bony” (E.V. strong) ass between two burdens, and is said to have been enslaved, with reference (no doubt) to oppression under Sisera (Judg.5.15). In the desert the four classes of Issachar, under Nethaniel, marched with Judah in the van, and the number of the tribe [Palestine] increased by nearly 10,000 men (Num.1.8, 29.2.5.7, 18.10.15; 26.25). It furnished Igal as a spy (13.7), and Paltiel as a surveyor (34.25). It stood on Gerizim to respond to the blessings (Deut 27.12); but its lot lay in the plains, whereas Canaanite chariot forces could act; and it seems to have remained as a nomadic population in tents, as noticed in the blessing of Moses (33.18). It joined Barak in the revolt against Sisera, the battle occurring within the border of Issachar. It furnished also a judge [Tola; Judg.10.1] and a king [Baasha; 1K.15.24] to Israel (cf. Num.26.23-25; 1Chr.7.1-5). The foresight of the leaders of Issachar led them to furnish David with supplies at Hebron (1Chr.12.32-40), and Omri of this tribe was one of his captains (27.18); but in Hezakiah’s time the tribe was blamed for eating the Passover while unclean (2Chr.30.18). It is last mentioned in Ezek.48.25-33; Rev.7.7. *The Tribal Lot* corresponded to Solomon’s tenth district in part, and partly to the fifth (1K.4.12,17). It lay E. of the hills of Manasseh (Jos.17.10,11), but some of its cities were occupied by the latter tribe. It included 16 cities in the plain of Esdraelon, and in the hills and Jordan Valley as far as E. On N. its border coincided with the S. border of Zebulun and Naphtali, from Jokneam to Shihon near Tabor, and E. of the latter to the Jordan, which formed the E. boundary, while on the W. Taanach and Remeth [Ramoth] were on the border, which ran, from the latter, E. by Rabath to the Jordan.—2. A temple-porter, apparently a Levite according to R.C.]

**Issiah.**—1. (1Chr.24.21) = Jeshiah. 2. A Levite of the family of Uziel (24.25).

**Ithrite, the.**—1. In Lev.11.4, “son of Ithrite” is substituted for “and Zabbud” (marg. Zaccur) of the parallel list in Exz.8.14. *Issah*, son of Ithrite (1Chr.7.30).

**Ith.** [Itish].

**Italian Band** (Ac.10.1). [Army.]

**Ithy.** This word is used in N.T. in the usual sense of the period—i.e. in its true geographical sense, as denoting the whole natural peninsula between the Alps and the straits of Messina (Ac.10.1; 18.2; Heb.13.24).

**Ithmal** (1Ch.27.24) = Ithmar.

**Itheam**, youngest son of Aaron (Ex.6.23). After the deaths of Nadab and Abihu (Lev.10.1), Eleazar and Ithamar were appointed to succeed them in the priestly office (Ex.28.1,40,43; Num.3.3,4; 1Chr.24.2). In the distribution of services belonging to the tabernacle, and its various garments, the first of the Ithrite clans of the Israelites, the Gershonites and the Merarites were placed under Ithamar (Ex.38.21; Num.4.21-33). The high-priesthood passed into the family of Ithamar in the person of Eli, but for what reason we are not informed.

**Ithiel.**—1. A Benjamite, ancestor of Sally (Ne.14.7).—2. This son of two persons to whom Agur delivered his discourse (Pr.30.1). [Ucal.]

**Ithmah**, a Moabite, one of the heroes of David’s guard (1Chr.11.46 only).

**Ithanan**, one of the towns in the extreme S. of Judah (Jos.15.23). No trace of its existence has yet been discovered.

**Ithra**, an Israelite (2Sam.17.25) or Ishmaelite (1Chr.2.17), the father of Amasa by Abigail, David’s sister. [Jeth. 3.]

**Ithran.**—1. Son of Dishon, a Horite (Gen.36.26; 1Chr.1.41).—2. A descendant of Asher (1Chr.7.37). [Jeth. 6.]

**Ithream**, son of David by Eglah, the sixth born in Hebron (2Sam.5.13; 1Chr.3).

**Ithrite, The**, the designation of two of the members of David’s guard, Ira and Gareb (2Sam.23.38; 1Chr.11.40); possibly = Jairite [Ira], in which case they may have come from Jattir, in the mountains of Judah.
Ittah-kazin, one of the boundary-marks of Zebulan (Jos.19.11; R.V. Eth Kazin); between Ephraim and Rimmon. [C.R.C.]

Ittai.—1. "Ittai the Gittite," i.e. native of Gath, a warrior in the army of king David mentioned during the revolution of Absalom. On the morning of David's flight he was among, and apparently commanding, the 600 heroes, who had follow David's banner during his wanderings in Judah, and had been with him at Gath (2Sam.15.18,19; cf. 1Sam.23.13,27,22, 30.9,10). The king besought him not to attach himself to a doubtful cause, but to return "with his brethren," and abide with "the king," i.e. either, sarcastically, Absalom, or his own king Achish (2Sam.15.15, and the next verse). Ittai is firm; he is the king's slave, and wherever his master goes he will go. When the army was numbered and organized by David at Mahanaim, Ittai again appears, now in command of a third part of the force (2Sam.18.2,5,12).—2. Son of Ribai, from Gibeah of Benjamin; a hero, David'sguard (23.29).—3. A man of Bashan province on the N. border of Palestine, lying along the s. base of mount Hermon, only mentioned in Liv.3.1. Ituraea, with the adjoining provinces, fell into the hands of a chief called Zenodorus; but about 20 b.c. they were taken from him by the Roman emperor, and given to Herod the Great, who bestowed them on his son Philip. Pliny places Ituraea N. of Bashan and near Damascus (v. 23); apparently the Jedur district [Geshur] N. of Argob. It is a table-land with an undulating surface, and has little conical and cup-shaped hills at intervals. The surface of the ground is covered with jagged rocks. The rock is all bases, and the rock is a large place, which may be explained as the formation similar to that of the Lebanon. [Argob.] The Jedur contains 38 villages, 13 of which are now entirely desolate, and all the rest contain only a few families of poor peasants, living in wretched hovels amid heaps of ruins.

Ivah'—Avva'. The first is the mentioned twice (1K.4.13; 2K.1.12: cf. Is.37.13) with Hena and Sepharvaim, and the second once (2K.17.23) with Babylonia and Cuthah. Its identification with the modern Hit on the Euphrates, between 'Anah and Ramadi, seems improbable. It is also thought to be Emma, the modern 'aimm, between Antioch and Aleppo; but this would presuppose the unusual change between v (= avv) and mm. Perhaps two different places. [T.G.P.]

Ivory (Heb. shēm, in all passages except 1K.10.22 and 2Chr.9.21, where she'n-habbim is so rendered). The word shēm literally signifies a tooth of any animal, but here denotes the tusks of elephants, this being rendered certain by the passage from 1K., where habbim is the equivalent of hab, the Tamil name of the elephant. The Assyrians appear to have carried on a traffic in ivory with India, and called the elephant habba. According to one rendering of the passage, their artists supplied the Tyrians with carvings in ivory from the isles of Chittim (Ezk.27.6); and on the black Obelisk in the British Museum an elephant is represented (c. 840 b.c.). Among the merchandise of Babylonia, enumerated in Rev.18.12, are included "all manner of vessels of ivory." The ivory throne of Solomon was overlaid with gold (1K.10.18; 2 Chr.9.17). This ivory was supplied either by the caravans of Dedan (Is.21.13; Ezk.27.15), or was brought, with apes and peacocks, by the navy of Tarshish (1K.10.22). [Apes.] The Egyptians at an early period made use in decoration of ivory, which was principally brought from Ethiopia (Herod. iii.114). Egyptian merchants traded for ivory and onyx stones to Barygazæ, the port to which was carried the commerce of W. India from Ozen (Peripl. c. 49). In the early ages of Greece ivory was frequently employed for purposes of ornament. The "ivory house" of Abah (1K.22.39) was probably a shrine with the walls panelled with ivory, like the palace of Menelaus described by Homer (Odys. iv.73). Beds inlaid or veneered with ivory were in use among the Hebrews (Am.6.4), as among the Egyptians. It is difficult to determine whether the "tower of ivory" of Can.7.1 is a figure of speech, or whether it is based on an original, such as the ivory throne of Solomon above mentioned (cf. Rev.20.11). By the Phoenicians ivory was employed to ornament the boxwood rowing benches (or "hatches," according to some) of their galleys (Ezk.27.6). Ivory is found, by excavation in ruins, in Assyria, Phoenicia [Phenice], and Palestine, and is represented as brought to Egypt by Phoenicians. [Elephant; Tarshish.]

Ivy, the common Hedera helix. 2Mac.6.7 refers to the familiar classical custom, "to go in the procession of Bacchus with garlands of ivy"—"in solemnities and high feasts of which god, the people of Thracia even at this day are furnished from this tree, and do with ivy set out and garnish the heads of their launes, pikes, and javelins, their morrons also and targetus." (Pliny). [H.C.H.]

Izehar', Izeharites (Num.3.19.27) = Izhar, Izharites, as R.V.

Izhar', son of Kohath, grandson of Levi, uncle of Aaron and Moses, and father of Korah (Ex.6.18.21; Num.16.1; 1Chr.6.2.18), and head of the family of the Izcharites, or Izeharites (Num.3.27; 1 Chr.24.22.26.23.24).

Izraahiah, a man of Issachar, of the family of Uzzit (1 Chr.7.4).

Izrahi', the designation of Shammuth (1 Chr.27.8), probably for Zerahite—that is, of Zerah.

Izri', a Levite leader of the fourth course or ward in the service of the house of God (1 Chr.25.11). In ver. 3 he is called Zeri.
JAASAU

Jaasu' one of the Bene-Bani who put away his foreign wife (Ezr.10.37).

Jaasiel', the Benjamite chief in David's reign, and son of Abner (1Chr.27.21).

Jaazaniah'.—1. (2K.25.23) = Jezaniah. —2. Son of Shaphan (Ezk.8.11). Possibly identical with—3. Son of Azur; one of the princes of the people against whom Ezekiel was directed to prophesy (Ezk.11.1).—4. A Rechabite, son of Jeremiah, whose fidelity to the precepts of Jonadab, the son of Rechab, was tested by the prophet Jeremiah (Je.35.3).

Jaazer' (Num.21.32,33;2Chr.26.31), or Jazer, a place on the border of Gilead (Num.32.1,3;1Chr.26.31) and of Gad (Jos.13.25), given to the Levites (21.39;1Chr.6.81). It was by the "river of Gad" (2Sam.4.5), and had a "sea" or "lake" (Is.16.8,9;Je.48.32), not far from Sibmah, nor from the land of Ammon (1Mac.5.8). In the Onomasticon (4th cent. A.D.) it is placed at Sir, 12 miles W. of Rabbath-ammon; but this seems too far N., as it was apparently near Heshbon. The most likely site is a ruin on a high hill 4 miles N. of Heshbon, which is called Sic'aar. A mile to its N., at 'Ai'm Na'air (the spring of irrigation), there is a fine Rechab stream, forming a large pool, and falling over a precipice 50 ft. high, as it descends a steep gorge to the plain of Shittim, falling into the Jordan finally. This may represent the "river of Gad." [C.R.C.]

Jaaziah', a descendant of Merari the Levite (1Chr.6.6,9).

Jaaziel', a Levite musician of the second order appointed by David for the service before the ark (1Chr.15.18).

Jabal, son of Lamech and Adah (Gen.4.20) and brother of Jubal. He is described as the father of such as dwell in tents and have cattle.

Jabbok' (perhaps "gurgling") but connected with the Gen.32.23.24; Deut.34.4; Josh.24.3; Jer.13.21; Nah.3.9, etc. It is a torrent (nahr) ver. 23 in Gilead, which was the border of the Ammonites (Num.21.24; Deut.2.27,33;15.16; Jos.12.2; Judg.11.13,22). It is now the stream of Wady Zarga, rising at a spring by BABBATH-AMMON, and flowing N., thus separating the land of Ammon from that of Gad.

Jabesh'-gilead', or Jabesh in the territory of Gilead (Judg.12.8-14). Being attacked by Nahash the Ammonite, Saul had an opportunity of displacing his presence by a defense (1Sam.11.9-15). The site of the city is not defined in O.T., but Eusebius places it beyond Jordan. 6 miles from Pella on the mountain-road to Gerasa; where its name is probably preserved in the Wady Yabis, which, flowing from the E., enters the Jordan below Beth-shan.

Jabez.—1. Father of Shallum, the 26th king of Israel (2K.15.10,13,14).—2. The short form of JABESH-GILEAD (1Sam.11.1ff.,31.12,13;1Chr.10.12).

Jabesh-gilead', or Jabesh in the territory of Gilead (Judg.12.8-14). Being attacked by Nahash the Ammonite, Saul had an opportunity of displacing his presence by a defense (1Sam.11.9-15). The site of the city is not defined in O.T., but Eusebius places it beyond Jordan. 6 miles from Pella on the mountain-road to Gerasa; where its name is probably preserved in the Wady Yabis, which, flowing from the E., enters the Jordan below Beth-shan.

Jabez.—1. Apparently a place at which the Kenite families of the serpents resides (Judg.2.55).—2. The name occurs also (4.9,10) in the genealogy of Judah, again connected with Bethlehem (ver. 4), where we read that Jabez was "more honourable than his brethren," though who they were is not ascertainable.

Jabin' (intelligent.).—1. (Jos.11.) King of Hazor. He aspired to what was described by the Northern kingdom as the "federalization with forces like the sand for multitude". Joshua fell on them by Merom, houghed the horses, and burnt the chariots. The fugitives fled E. and W. to Mizpeh and Zidon, leaving Hazor to be burnt with fire.—2. The "king of Canaan that reigned in Hazor" (Judg.4.1-25). Some critics confound him with the king of the Amorites, but he had nothing to do with Josiah, who did not command troops, was not defeated at Merom, and his capital was not burnt. From Jos.11.13,17,12,13,18,3; Judg.1.27,30-33 it is evident that the northern power was broken, but not destroyed. [DEBORAH; SISERA.] [H.M.S.]

Jabneh' ( = God build.).—1. A town on the N. border of Judah, near the sea (Jos.15.11), noticed with Gath and Ashdod (2Chr.26.6) as JABNEH, the walls of which king Uzziah of Judah broke down. It was famous later as the seaport called JAMNIA, the Greeks held it as late as 135 (1Mac.5.20,12). It has been identified by the Jesuits from 70 to 135 A.D. and celebrated for its Rabbis. It is now the village Yehna, on a low
hill 13 miles S. of JOPPA, and immediately S. of the Nahbr Ribih (the lower part of the valley of Sorek). It has an artificial port (Minet Ribih) about 2 m. from the town. The village JABNEH has a church converted into a mosque. — 2. A town of Naphtali, said to have been called later Kaphar Yama (Tel. Jer. Maghila, i. t.), near Jordan (Jos. 19.33). It is now the village Jemnna, on a hill slope 7 miles S. of Tiberias. [c.e.c.]

JABNEH (2 Chr. 28.6). [JABNEEL, I.]

Jachin’, one of seven Gadite chief men (1 Chr. 5.13).

Jachin’—1. Fourth son of Simon (Gen. 46.10; Ex. 6.15); founder of the family of the Jachinites (Num. 26.12). — 2. Head of the 21st course of priests in the time of David (1 Chr. 9.10, 24.17). Possibly it is the course of this priest which is referred to in Ne. 11.10.

Jachin’ (he shall establish), one of two pillars set up “in the porch” (1 K. 7.21) or “before” the temple (2 Chr. 3.17) of Solomon.

JACINTH, a precious stone, forming one of the foundations of the walls of the new Jerusalem, applied in the Prophecy of Ezek. 28.13; and substituted in K.V. for Ligure in Ex. 28.19 and 39.12. The name jacinth or hyacinth is now applied to a reddish variety of zircon (a silicate of zirconia), good examples of which, when cut, make beautiful gems, and are sometimes of other colours. But the hyacinth (a medieval term apparently a different stone, for he speaks of it as less violet in colour than the amethyst. King (Precious Stones, p. 194) maintains that Pliny referred to the sapphire (also included as one variety of his a damus); and as the Historia Naturalis was published c. 77 A.D., the jacinth of the Apocalypse may also be the sapphire. [T.C.N.]

JACOB. The name is derived in Scripture from ḏḏḥḥ, the word for a heel, and is explained by the narrative of his birth, which relates that he caught the heel of Esau as if in an early desire to rob him of his birthright. The corresponding verb is found in the sense of “to work at cunning,” but in the Heb. text is, as usual, founded upon similarity of sound, rather than on modern principles. Attempts are now made to refer the name to an original Jacob-El, and some support may be given to this by the discovery of the name Yaqub-bu in an Assyrian inscription which appears to belong to the third millennium before Christ. Jacob was the younger son of Isaac and Rebekah. He bought Esau’s birthright for a plate of pottage and completed the usurpation by obtaining his father’s blessing by means of a subterfuge suggested by his mother. To avoid his brother’s anger, he was obliged to flee to her kindred in Paddan-aram, though another motive seems to have been his desire to obtain a wife among his relatives. As he passed through Bethel on his journey, the first theophany occurred and he consecrated the place as a sanctuary. The details of his life with Laban, whom he served for 21 years, are very familiar. Vexed with the constant cunning of his uncle, he at length steals away with his two wives and their maids together with his children and possessions. Overtaken by Laban, he comes to an agreement with him and is allowed to proceed unmolested. Being warned of his brother’s approach, he divides his party up into small sections, and himself brings up the rear. On crossing the Jabbok, he spends the night wrestling with an angel (theophany) and as a sign of his persevering struggle his name was changed to Israel. His meeting with Esau was quite peaceable and he settled down in Shechem until a revengeful attack upon the men of the place, made by his sons on account of the violation of their sister Dinah, caused him to remove to Bethel. Subsequently we meet with him at Hebron assisting with Esau in the last rites for their father. The next period of his life is passed in the “land of his fathers” and becomes practically identified with the narrative of Joseph’s career. He passed into Egypt for his last few years, where he blessed all his sons before his death at the age of 146. His body was embalmed and carried with great pomp to Canaan, where it was buried in the tomb of Machpelah. There are constant references to Jacob in N.T. His life is of great importance, as it was from him and not from Abraham or Isaac, that the children of Israel derived their name, and the twelve sons of whom he became the father by his two wives and two concubines were the traditional origin of the tribes of the Hebrews. In addition to this, his nature and temperament seen, in many ways, to reflect the characteristics of his nation. Like the other patriarchs, his life was a pastoral one and he shared in their authority and functions. He stands between Abraham on the one hand, who moves through the narrative rather as a demi-god, and Joseph on the other, who possesses the greatest distinctness of human personality. Theologically he is of great interest as a type of the improvement which the human character is capable of undergoing. While there may be a fair amount of tradition as to tribal origins and relations enshrined in the story, there does not seem any real reason to doubt the existence of the tradition of Jacob. In the light of his character and the naturalism and pathos of the narrative are great evidences of an underlying historicity. The blessing of Jacob is a long poem which clearly describes the position and prospects of the tribes when they were fully established. Any difficulties as to its attribution to Jacob will largely depend upon individual prepossessions as to prophecy and as to God’s special guidance of the chosen people for the instruction of mankind. The struggle of Jacob by the ford Jabbok is of special interest, partly as having given rise to an Israeliite custom, partly as being the traditional origin of the religious name of the people and also because of the mysterious nature of the whole incident. [E.F.S.]

JACOB’S WELL. [Shechem.]

JACOBUS. [Akkub, 4.]

JADAH, son of Onam and father of Jether and Jonathan, in the genealogy of the sons of Jeralemel by his wife Atamah (1 Chr. 2.28, 32).

JADDAU, one of the Bene-Nebo who had taken a foreign wife (Ezr. 10.13). [Jaddua.—1, One of those who sealed the covenant (Ne. 10.21). — 2. Son, and successor in the high-priesthood, of Jonathan or
JADON

Johanah. He is the last high-priest mentioned in O.T., and is, probably, altogether the latest name in the canon (Ne.12.11,22). From ver. 22 we gather that he was priest in the reign of the last Persian king Darius, and that he was still high-priest after the Persian dynasty was overthrown, i.e. in the reign of Alexander the Great (cf. Josephus, Ant. vii. 2, viii. 4, 5, 7).

Jadon', the Meronothite, who assisted in repairing the wall of Jerusalem (Ne.3.7).

Jael' (wild goat'; Judg.4.5) was the wife of Heber the Kenite, who had deserted his people in Arad, was allied with Jabin, and dwelt at Zaanaim, near Barak's home Kedesh. Jael was loyal to her race and to Israel, and had apparently aided Shamgar in the S. (5.6). The defeated Sisera sought her tent (among Semites the tent is the woman's, not her husband's, according to W. R. Smith; see Kinship and Marriage, p. 202). She asked him in, gave him milk, killed him, and showed his corpse to Barak. To many the accounts of the murder seem contradictory. W. R. Smith (O.T. in Jewish Ch. p. 132) translates nash as handle, and treats the first two lines of 5.26 as parallel. This, he thinks, the prose narrator made to suit the poetic context. Jael's handle, it seems, was her hammer; and Jael's hammering a nail into Sisera's forehead. Hence, he argues, Jael did not murder a sleeping man, but by a drastic stratagem delivered a courageous blow. Against this theory is the fact that the two accounts seem independent (Moore). The poem is earlier, the prose narrative later. But he was inconsistent if we regard ver. 27 as poetry, emphasizing the fall of a great man before a woman. In a moral estimate we must remember there could have been no peace while Sisera lived. Jael had to violate hospitality or betray the cause of Israel. She had to lie to Sisera or to his pursuers. She was disinherited, and took the risk herself. We cannot praise her as Deborah did, but then we have not, like Deborah, lived under Sisera's oppression. [H.M.S.]

Jagur', a town of Judah, one of those farthest S., on the Edom frontier (Jos.15.21).

Jah, perhaps an abbreviation of Javv in Hiph. and Jopp in Hiph. (i.e. Jah is the rock of ages) and "In Jah JHVH is my strength and song" (Is.12.2,26,34; cf. Ex.15.2) the name appears to have some special force. It is poetical, except in Ex.17.16: "There is a hand upon the throne of Jah, war for Javlh with Amalek from generation to generation." The LXX., taking kés yâ, "the throne of Jah," as a single word (from root kâd, "cover"), has "with secret hand the Lord doth war with Amalek." Jah occurs 23 times in Hallelujah, frequently in proper names, and 49 times as a separate word in O.T., 6 times in Ps.118. [Jehovah.] [C.N.W.]

Jah'athan. 1. A Gershonite Levite, son of Libni and ancestor of Asaph (1Chr.6.20,43).—2. Head of a later Gershonite family, being the eldest son of Shimei, son of Laadan (1Chr.23.10,11).—3. Son of Reiaiah; a descendant of Judah (1Chr.4.2).—4. A Levite, son of Shelumoth (1Chr.24.22).—5. A Merarite Levite, one of the temple-repairs in the reign of Josiah (2Chr.34.12).

Jâ'âhaz, Num.21.23, Deut.2.32, Judg.11.20, Is.15.4, 48.34; Jâ'âhazah, Jos.13.18; Jâ'âhazah, Jos.21.36 (R.V. Jâhaz in all the preceding), 48.21 (R.V. Jâhazah, see 1Chr.6.78), a town of Moab, where Sihon the Amorite king was defeated by Israel. The onomatose places it between Medeba and Dibon. It was apparently near Baal-meon (Jos.13.18). The site is unknown. [C.R.C.]

Jâhaziah', son of Tikkah, and apparently a priest, who, with Jonathan, 7, judged those who had made mixed marriages (Ezr.10.15).

Jâhâziel'.—1. One of the Benjamite archers who joined David at Zikaq (1Chr.12.4).—2. A priestly trumpeter in the reign of David (1Chr.16.6).—3. A Kohathite Levite, third son of Hebron (1Chr.23.19,24.23).—4. Son of Zechariah, a Levite of the Bene-Asaph, who prophesied the deliverance of Jehovah from the internal dissensions of the army advancing against him (2Chr.20.14).—5. The "son of Jahaziel"—probably Shechechaniah—preceding name having slipped out of the text (cf. 1Esdr.8.32): he led his family back from Babylon with Ezra (Ezr.8.5).

Jâhâdai', a man who appears to be thrust abruptly into the genealogy of Caleb, as the father of six sons (1Chr.2.27).

Jâhdiel', son of Libni, and tribe of Manasseh on E. of Jordan (1Chr.5.21).

Jâhdo', a Gadite (1Chr.5.14), son of Buz and father of Jeshishai.

Jâhleel', the third of the three sons of Zebulun (Gen.46.14; Num.26.26), founder of the family of the Jahleelites.

Jâhmâi', one of Judah's sons, father of one of the heads of the house of Tola (1Chr.7.2).

Jâzhâ'ah (1Chr.6.78). [Jâhâzah.]

Jâzhzeel', the first of the four sons of Naphthali (Gen.46.24), founder of the family of the Jâzhzeelites (Num.26.48).

Jâzzerah', a priest of the house of Immer (1Chr.9.12).

Jâzziel' (1Chr.7.13)—Jâzzeel.

Jâir' (Jah enlightened).—1. A descendant of Judah and Manasseh (1Chr.2.23) who conquered Argob (Deut.3.14) and possessed 23 villages in Gilead—Havoth-jair (Num.32.41).—2. The Gileadite judge (Judg.10.5) who ruled over the Gileadites 40 years. He was buried at Carnon. Critics regard 1 and 2 as identical and Moore argues that Gilead was conquered at a late date by western tribes. Yet Moore himself reckons Num.32.41 to belong to the oldest strata in the Pentateuch, and Jair there fits into the narrative. [Machir.] Judg. 10.5 is an isolated note that may well be out of place. It is not inconceivable, however, that a man and his grandson should have the same name and possess the same property. Note, 1 was a warrior, 2 was only remarkable for wealth and ostentation. —3. A Benjamite, son of Kish and father of Mordecai (Esth.2.5).—4. Father of Elkanan, 1, one of David's heroes (1Chr.20.5).—5. [H.M.S.]

Jâ'irêthe, The. Ira the Jairite was a "priest," R.V. ("chief rffer," A.V.), to David (2Sam.20.26). [Ithrite.]

Jâirûs'.—1. A ruler of a synagogue, probably at Capernaum, or some town near the W. shore of the Sea of Galilee, whose daughter Jesus raised (Mt.9.25; Mk.5.35; Lk.8.41).—2. (Est. Apoc.11.2.) [Jair, 3.]
JAKAN

Ja’kan. [Akan.] Ja’keh. The A.V. of Pr.30.1 represents this as the proper name of the father of Agur, whose sayings are collected in Pr.30, and such is perhaps the true reading. Yet we have no clue to the existence of either Agur or Jakeh. R.V. marg. reads “Ja’keh, of Massa.” For a full discussion see Delitzsch, Comm. [Proverbs.]

Jakim.—1. Head of the 12th course of priests in the reign of David (1Chr.24.2).—2. A Benjamite, one of the Bene-Shunni (1Chr.8.19).

Jalon, a son of Ezra, 2, in the genealogy of Judah (1Chr.4.17).

Jambres [JANES AND JAMBRES.]

Ja’mbri. Soon after the death of Judas (101 B.C.) “the children of Ja’mbri” attacked a Hasmonaean detachment (1Mac.9.36-42). The name Ja’mbri is elsewhere unknown, and the LXX. reading is here uncertain. If the true form is Ja’mbri, the Amorites may be meant. [c.d.]

James (Иакобос, Lat. Jacobus; the Heb. Jacob, with the Gk. termination ας, which is not, however, added to the patriarch’s name). The name has, in various languages, undergone more changes than almost any other. In the East St. James is still St. Jacob. In English the separation between the two names has now become complete, but the calendars to 1662 have “St. Philip and St. Jacob.”—1. St. James, son of Zebedee and Salome, brother of St. John. It is probable that his acquaintance with our Lord began with the incident (Jn.6.53-54) from which we infer that after being a disciple of the Baptist he was brought to our Lord by his younger brother, who (according to his custom) does not name him. At his first call ( Mk.1.19-20) the brethren were in the ship mending their nets, when they left their father and went after Him.” At a second and more definite call (La.5.1-11) “they forsook all and followed Him.” Thirdly, with the eleven, he was chosen to be an apostle ( Mt.10.2; Mk.3.17; La.6.14; Ac.1.13). In all four lists St. James comes second. It is suggested by some of the most eminent scholars that the name was honoured three times, being present at the raising of the daughter of Jairus, the Transfiguration, and the Agony. Our Lord gave the brethren the name Boanerges (sons of thunder). The fiery spirit which evoked this description was shown in the wish to call fire from heaven on the Samaritans (La.9.54). Westcott and others suppose (from a comparison of the names of the holy women present at the Crucifixion) that Salome was the Virgin’s sister. This might account for her ambitious request for her sons ( Mt.20.20; Mk.10.35). The fact that our Lord neither showed anger nor uttered any rebuke, as He did in the case of other ambitious requests, shows that He was looking forward to the future with the knowledge that the two would fulfill their seemingly boastful words. About 14 years after this (A.D.) St. James was killed with the sword by Agrippa I, the most dangerous enemy of the Church in its first years (Ac.12.2). Although this is the only death of an apostle recorded in N.T., St. Luke barely mentions it, because it had no immediate effect on the history of the Church, as the death of St. Stephen had. It is reported that the accuser of St. James asked forgiveness of him, and was executed with him. (For the supposed journey of this apostle to Spain, cf. Dact. of Christian Antiquities, and Mrs. Jameson’s book of St. Paul, p.201, note).—2. James (the son) of Alphaeus, is so called in all four lists of the Twelve and in all four heads the third group. He is probably to be identified with James the little, or “the less,” and was the son of Mary, and possibly brother of St. Matthew, who is also called (son) of Alphaeus (Mt.10.3; Mk.3.18). He is, however, a different person. The question whether he is to be identified with “the Lord’s brother’ is admittedly the hardest question about the Twelve, vide infra. As a rule, the Western Church has so identified him, but not the Eastern. The Byzantine and some other Eastern calendars distinguish between the two; but the gospel for SS. Philip and James’ Day in the English Prayer-Book shows that the compilers (mistakenly, as we think) identified them. We know nothing further of this St. James. Untrustworthy traditions relate that he was crucified in Persia. —3. “James, the Lord’s brother.” It is necessary first to consider who the Lord’s brethren were. There are three possible theories; and we use the names given to them by Bp. Lightfoot in his classic note on “The Brethren of the Lord” (Ep. to Galatians, pp. 247-282): (a) The Epiphanius view that they were the sons of Joseph by an earlier marriage. (2) The Haldrian view, that they were sons of Joseph and the Virgin. (3) The Hieronymian theory, invented by Jerome about 353 A.D., that the brethren were not brothers, but cousins, being sons of the Virgin’s sister, Mary, wife of Clopas. With regard to (3) it must be admitted that those whose sense of reverence is not disturbed by it will not care to pursue the question further. There are, however, two objections: (i) It is against tradition, and has never been held by any one of importance in the Church except Tertullian, a writer who was capable of entertaining many strange opinions. (ii) The Virgin was asked to give her son (Jn.19.26), are inconceivable if at the time the Virgin had four sons and three daughters, capable of caring for her, from whose society she was taken and given to another by Him Who laid such stress on natural affection. It is no argument that the brethren at the time did not believe that our Lord was the Messiah, for in a few days they all did believe in Him, and to St. James a special appearance was granted, and he was chosen to be the first bishop of Jerusalem. Surely he would have reverenced his mother more than any one had he known she was the mother of his Lord. (7) The Hieronymian view demands fuller consideration. It is an invention of a young man who in mature years spoke of it slightly, if he did not discard it. The arguments for Jerome’s theory are specious: (i) The second James in the Twelve, the son of Alphaeus, is identified with James, the Lord’s brother, because St. Paul calls him James the less (Gal.1.19). But St. Paul’s words do not prove that St. James was one of the Twelve, though he had a right to the title apostle, as he was vouchsafed
a special appearance during the 40 days (1 Cor. 15.7), when he was sent forth. The word apostle is used for others besides the Twelve—e.g. Paul, Barnabas, Andronicus, and Junias. (ii) James and Joseph were names of our Lord’s brothers; they were also sons of Mary who was present at the Crucifixion (Mt. 27. 56; Mk. 15. 40), and who was (in Jn. 19. 25) stated to be the Virgin’s sister and the wife of Clopas—therefore, the title brothers must be used in the wider sense of cousins. But the names were too common to find an argument upon, without other evidence; and the words of St. John may equally well refer to four women (the Pes’hta inserts “and their daughters” and do not sufficiently warrant the improbable assumption that two sisters would have the same name “Mary.” Moreover, it is quite unprecedented that in a description of relationship various writers should persistently and exclusively use the term “brother” of those who were not the same—nobody, for instance, would say “neither did His brethren believe in Him” (Jn. 7. 5). This could not have been said of the son of Alphaeus, for he and his brother St. Jude were actually amongst the Twelve, from whom (in fact) the brethren are excluded (Ac. 1. 14), and from whom St. Jude seems to exclude himself (17). The appearance to St. James, described to him by the brethren, was clearly that of his Lord. We, therefore, do not believe that the brethren were sons of Joseph and the Virgin because of the words from the cross, and because (if they had possessed that remarkable relationship) something more than vague hints would have been given. (The passage Mt. 1. 25 no more means that Joseph was a widower—his wife Elpis being dead, and he being now able to marry—than that He was a childless virgin.) Even with the names of Joseph and Mary (Mt. 13. 55) they were never with their supposed mother. No other theory remains but that they were sons of Joseph by an earlier marriage. No one was better suited than St. James to preside over the church at Jerusalem. His tone of thought and his style were very different from those of the other disciples. The fact that Joseph had been of the Lord’s teaching (cf. Ac. 15. 21) made him acceptable to the Jews, who revered his zeal for their religion (cf. Ac. 15. 21). The whole speech has a Judaic tone, even in the Gentile editor’s report. At an unknown date he was made bishop of Jerusalem. Probably our Lord Himself had designated him for that post—a last kindness on His part to His own people. The Twelve were evidently precluded from this office by their mission into all the world. He upheld his official position with that vigour which characterizes his epistle. After he has spoken, even SS. Peter and Paul are silent. The decree of the church at Jerusalem is his sentence (Eus. eccl. hist. Ac. 15. 19, an expression that a bishop nowadays would scarcely use). And even St. Paul put him before SS. Peter and John (Gal. 2. 9). Later writers give him the same pre-eminence. Hegesippus (160 a.d.) gives interesting particulars about him, which Eusebius accepted. He seems to infer that St. James became bishop immediately after the Ascension. His holiness was acknowledged by all. It is said that he was allowed to enter the holy of holies, and that his knees became hard as a camel’s from constant prayer. His influence with the Jews was so great, that had he lived he might have averted the destruction of Jerusalem; but the scribes and Pharisees killed him, and our Lord’s foreknowledge of this may be an explanation of His terrible denunciation of them. They seem to have brought him forth on a critical occasion, and to have set him in a prominent place on the temple, “the pinnacle of the temple.” But his words were not their words, and they threw him down and stoned him there. The charitable fuller ended his sufferings with his workman’s club, as he was praying for his murderers; and they immediately buried him close to the temple, with an inscription declaring his sanctity. Then the cup was full, and the fatal siege of Jerusalem began. See also next article.

James, General Epistle of. I. Its Authenticity. The epistle was accepted as canonical at the Council of Carthage (397 A.D.), and its authenticity was not again questioned until the time of the Reformation. But until the end of the 4th cent. there seems to have been some doubt as to its genuineness. For though there are probable references to it in the works of Clement of Rome, Hermas, and the Didaché, and though it is certainly quoted by Irenaeus, it is omitted in the Muratorian Fragment (180 A.D.), and Eusebius, though he quotes it and speaks of it as being used in most of the churches, adds that it is “considered spurious,” and divides it into classes with the “disputed” books. Its comparatively late acceptance was possibly due to its Jewish and apparently anti-Pauline character.—II. Its Author. The author describes himself simply as “James, a servant of … Jesus Christ,” but the authoritative tone of the letter implies that he was an important position in the Church. He must, therefore, be either James the son of Zebedee, James the son of Alphaeus, or the James who is frequently mentioned in Acts as the leader of the church at Jerusalem, and is identified by St. Paul with James the brother of the Lord.” The first two claims are probably错误的, but it is possible that the author was one of the Twelve who would almost certainly have claimed the title. Moreover, the son of Zebedee was probably put to death before the epistle was written, while the son of Alphaeus was not sufficiently prominent. The author, therefore, must be James “the brother of the Lord.” James concludes his epistle with a description of the general character of the book, which shows it to be the work of a Palestinian Jewish Christian, and agrees with all that we read of James in St. Paul and Acts. The language of the epistle, too, is strikingly similar to that of the speech and letter of James recorded in Ac. 15. III. Its Date. If James was the author, he must have written the epistle earlier than the end before 68 A.D.—i.e. after he became leader of the church at Jerusalem, and before his martyrdom (62 A.D. according to Josephus, 68 A.D. according to another tradition). The internal evidence confirms this view. The theology of the epistle, the belief in the nearness of the
Parousia (5:7,8), the lack of definite church organization, agree with the account of the church at Jerusalem given in Acts, and belong to the period prior to the fall of Jerusalem (70 A.D.)—which would certainly be mentioned if it had already occurred—and the consequent separation of Christianity from Judaism. On the ground that there is no reference to the Council of Jerusalem (49 A.D.), Mayor places it before 50 A.D., and regards it as the earliest book in N.T.; while Sanday, arguing that James would not be likely to write an epistle unless influenced by the example of St. Paul, places it after the earlier Pauline epistles (c. 60 A.D.).—IV. Character and Contents. (1) The epistle deals with Christian life rather than Christian doctrine. It was addressed to Christians belonging to the poorer classes, who were subject to persecution from their wealthy fellow-countrymen, to warn them against the sins into which they were most likely to fall, to console them in their sufferings, and to put before them the true Christian ideal of life. (2) James may have had in view some perversion or misuse of the Pauline doctrine of justification by faith (2:14-26). That he wrote to controvert directly St. Paul's arguments James cannot be said. Nehama also suggests that we suppose direct polemics between the two apostles, then both seem strangely to miss the mark. Each would be arguing against something the other did not hold" (Sanday)—James, against a barren orthodoxy; Paul, against a self-righteous Pharisaism. (3) Luther said James was nothing "worse than the epistle.

Japheth.—1. (Gen.9:18,27;10:1-5.) Son of Noah, and ancestor of one of the three great divisions of mankind. [RACES.] The name (Heb. yepheth) is connected with a root meaning "open" or "enlarge" (Gen.9:27). Possibly, on the analogy of other names, Japheth was originally "Son of the Open." Hebrews, in the name of one of the seven sons of Noah (Gen.9:24 (R.V.) Ham is said to be the youngest son and Japheth is blessed by his father before Shem. In the enumeration of the peoples descended from these three patriarchs, Japheth's sons stand first, and in Gen.10:21, Japheth is said to be the "Father of the Nations." His tannum is said (Gen.10:5) to have "divided the isles [coasts] of the Gentiles." His most important sons were Gomer and Javan (Ionian, or Greek). From Javan sprang Elisaph (Δῆλος, Tarshish, Kittim (Cypriote), and Dodanim (L.X. Πώλος, [1Chr.1:6]; Heb. rothamim, ι? Ρόθαινος). In the poem wherein Noah foretells the future of his sons (Gen.9:25-27), Japheth is to be "enlarged"—a play on his name—is and is (unless the Targum and Bab. Talmud are right in making "God," the subject) to "dwell in the tents of Shem." The name Japheth has been identified with that of the giant Rapetus of Scottish legend as "the founder of the Japhetic family of the Jaminites (Num.26:12.)—2. A man of Judah, second son of Ramin (1Cr 2:27).—3. A Levite who expanded the law (Ex.8:7).

Jamieh, one of the chief men of Simeon (1Ch4:31; [ฟ. 11, 12] in the time of Hezekiah. "Jamin, Idols of (2Mac.12:10; ἅπαξ λειτουργήσας ἲπατος τῶν θεῶν)." The Syriac, which in this and other passages of 2Mac. has many divergences from the Gk., reads "gold of the idols of Jamin" (δι αμαναν). No adequate reason is offered for the use by Judas's men of tokens from Jaminia. It is possible that ἁπάξ λειτουργήσας has its origin in a gloss ἅπαξ λειτουργήσας ἀποκεφαλεῖται in Judges 1:21.]

Jamin, Jaminites, The (1Mac.4:15, 5 § 10.60, 15:10; 2Mac.12:8, 9, 10). [BAR.] Jamēn, son of Joseph, and father of Melchi, in the genealogy of Christ (Lk.3:24).

Janēs and Jamēbris, the names of the two Egyptian magicians who opposed Moses. St. Paul alone of the canonical writers treats of them at length (2Cor.11:30), and more than that they "withstood Moses," and that their folly in doing so became manifest (2Tim.3,8,9). Theodoret believes St. Paul to be merely repeating an oral tradition as to their names; but Origen asserts that in 2Tim.3,8 St. Paul quotes from an apocryphal "Book of Jannes and Manaelder," the latter being a variant on the second name. Though such a book has not yet been rediscovered, there are grounds for accepting this as the more probable. [A.C.D.]

Janos, a place in the N. of Galilee, taken by Tiglath-pileser in 734 B.C. (2K.15:29). Now Yannin, a village 5 miles E. of Tyre. [C.R.C.]

Janosah, a place on the E. boundary of Ephraim (Jos.16:6,7). Eusebius (Onomasticon) places it 12 Roman miles N. of Neapolis. Now Yannin, a village 7 English miles E. of Shechem, and S. of T'ara. [TAANATH-SHILOH.] [C.R.C.]

Janum, a town of Judah in the mountain district, apparently not far from Hebron (Jos.15:43). Probably the village Ben Vitnam, about 3 miles E. of Hebron. [C.R.C.]

Japheth.—1. (Gen.9,18,27;10:1-5.) Son of Noah, and ancestor of one of the three great divisions of mankind. [RACES.] The name (Heb. yepheth) is connected with a root meaning "open" or "enlarge" (Gen.9:27). Possibly, on the analogy of other names, Japheth was originally "Son of the Open." Hebrews, in the name of one of the seven sons of Noah (Gen.9:24 (R.V.) Ham is said to be the youngest son and Japheth is blessed by his father before Shem. In the enumeration of the peoples descended from these three patriarchs, Japheth's sons stand first, and in Gen.10:21, Japheth is said to be the "Father of the Nations." His tannum is said (Gen.10:5) to have "divided the isles [coasts] of the Gentiles." His most important sons were Gomer and Javan (Ionian, or Greek). From Javan sprang Elisaph (Δῆλος, Tarshish, Kittim (Cypriote), and Dodanim (L.X. Πώλος, [1Chr.1:6]; Heb. rothamim, ι? Ρόθαινος). In the poem wherein Noah foretells the future of his sons (Gen.9:25-27), Japheth is to be "enlarged"—a play on his name—is and is (unless the Targum and Bab. Talmud are right in making "God," the subject) to "dwell in the tents of Shem." The name Japheth has been identified with that of the giant Rapetus of Scottish legend as "the founder of the Japhetic family of the Jaminites (Num.26:12.)—2. A man of Judah, second son of Ramin (1Cr 2:27).—3. A Levite who expanded the law (Ex.8:7).

Jamieh, one of the chief men of Simeon (1Cr.4:31; [F. 11, 12] in the time of Hezekiah. "Jamin, Idols of (2Mac.12:10; ἅπαξ λειτουργήσας ἲπατος τῶν θεῶν)." The Syriac, which in this and other passages of 2Mac. has many divergences from the Gk., reads "gold of the idols of Jamin" (δι αμαναν). No adequate reason is offered for the use by Judas's men of tokens from Jaminia. It is possible that ἁπάξ λειτουργήσας has its origin in a gloss ἅπάξ λειτουργήσας ἀποκεφαλεῖται in Judges 1:21.]

Jamin, Jaminites, The (1Mac.4:15, 5 § 10.60, 15:10; 2Mac.12:8, 9, 10). [BAR.] Jamēn, son of Joseph, and father of Melchi, in the genealogy of Christ (Lk.3:24).

Janēs and Jamēbris, the names of the two Egyptian magicians who opposed Moses. St. Paul alone of the canonical writers treats of them at length (2Cor.11:30), and more than that they "withstood Moses," and that their
Jareb' (Ho.5.13,10.6). "King Jareb" has been otherwise rendered "king of Ailae"; but more probably "the hostile king" (of Assyrria) with whom Ephraim sought alliance in 8th cent. B.C. [C.R.C.].

Jared' one of the antediluvian patriarchs, the 6th from Adam; son of Malalelah, and father of Enoch (Gen.5.15ff.; Lu.3.37).

Jaresiah, a Benjamite of the sons of Jehoram (1Chr.8.27).

Jarha', the Egyptian servant of Sheshan, about the time of El, to whom his master gave Anali, his daughter and heir, in marriage (1 Chr.2.35,34,35).

Jarb'—Named in the list of 1Chr.4.24 only, as a son of Simeon. Perhaps the same as Jachin, 1 (Gen.46.10; Ex.6.15; and Num.26.12).—2. One of the "chief men" who accompanied Ezra from Babylon to Jerusalem (Exz.8.16).—3. A priest of the house of Jeshua, who put away his foreign wife at the command of Ezra (10.18).—4. [Jehoiarib.]

Jarlioth' (1Esd.9.28) = Jerusalem, 5.

Jarmuth'—A royal Amorite city (Jos.10.3,5,6) conquered by Joshua (12.11), and lying in the shakedhe's region of Judah (15.35), near Adullam and Socoh. It was inhabited by the Jebusites (1 Chr.11.26). Now the ruin al Yarma, 3 miles N. of Socoh, on N. side of the valley of Elah.—2. A Levitical town in Issachar (Jos.21.29), apparently Remeth, now Râmleh. [Ramat.] [C.R.C.]

Jaroch', a Gadite chief (1Chr.5.14).

Jasael' (1Esd.9.30) = Sheal. (1Chr.5.11).—Occur in the catalogue of David's heroes (2Sam.23.32). In 1 Chr.11.34 they appear as sons of Hashem the Gizonite. In his Notes on Samuel, p. 283, Dr. Driver is of opinion that "sons of " (122) has crept into the text from the ending of "the Shaalbonite" (1272) which precedes; that "the Gizonite" should be "the Gunte" or member of the family of the Gunti (cf. Num.26.48); and that thus "the sons of Jarshen" should be read "Jarshen the Gunte." [H.C.S.]

Jasher' (properly Jashar, as R.V.). Book of. This long-lived book is mentioned twice in O.T., first, as containing a poem on the battle of Hormah in the Ammonites, cited in 2Sam.1.17-27. Possibly there may also be a reference to it in the somewhat strange interpolation in the LXX. of 1 K.8.53—ἐν βίσανογι ἐπχων ἐπιβάνοντας. [Kings, Books of.] The collection in the book was probably one of ancient national poetry. Several forged books under this title have appeared at various times and places. They are of no value whatever. Dr. Donaldson's work bearing this title is also an attempt to restore the book out of portions of the Pentateuch and O.T., an attempt based on no evidence. [Kings, Books of.] [C.H.H.W.]  

Jashobeam'—Possibly one and the same follower of David, bearing this same name, as described as a Hachmonite (1 Chr.11.11), a Korhite (1Chr.12.6), and son of Zabdiel (1Chr.27.2). [Enzite; Tachmonite.] He came to David at Ziklag. He slew 300 (or 800), 2Sam.23.8, see marg. and R.V.) men at one time. He is named first among the mighty men of David (1 Chr.11.11).—Jashub'—First son of Issachar (called job; R.V. Job; Gen.46.13), and founder of the family of the Jashubites (Num.26.24; 1Chr.7.1).—2. A layman of the sons of Bani, who had to put away his foreign wife (Ezr.10.29).

Jashub-ile'hem (1 Chr.4.22). The writer, copying an ancient list of kings, has found this term difficult, and adds the sentence "and ancient things" (or "deeds, or "words"). The LXX. understands the words to mean "and turned them back." Possibly we may believe that the men of the Jozzeba were masters in Moab, and the dwellings of Ham.

Jashub'tites, The. [Jashub, 1].

Jasiel', the Mesorabite, the last named in the list of David's heroes in 1Chr.11.47.

Jason. A form which the name Joshua took under the Hasmonaeans and onward.—1. Son of Eleazer, one of the commissioners sent by Judas Maccabaeus to make treaties with the Romans, 161 b.c. (1Mac.8.17), probably the same as—2. Father of Antipater (12.16, 14.22).—3. A Jewish historian, of Cyrene, therefore probably a Hellenistic Jew who wrote in five books a history of the Jewish war of freedom which supplied most of the materials for 2 Mac. [Maccabees, Books of.]—4. The high-priest, second son of Simon II. and brother of Onias III., who obtained the high-priesthood from Antiochus Epiphanes, to the exclusion of his elder brother, by means of a bribe. He was a great Hellenizer, and by a liberal expenditure of money secured a gymnasium, an ephebeion at the very foot of Mount Zion, and procured the implantation of the Jews among the citizens of Antioch. Greek caps were worn and Greek games practised in the city, and the latter caused many Jews "to make themselves uncircumcised" (1Mac.1.15), which many have interpreted "to endeavour to remove traces of their circumcision" (cf. 1Cor.7.18), though the possibility of such a literal physical interpretation is doubtful. [Circumcision.] After three years he was supplanted, but stimulated by a report of the death of Antiochus, he made an only partially successful attempt to recover his power. He was ultimately forced to retire to his native town Japha, and afterwards to Sparta, where he died (2Mac.4.5). [Hellenist; Maccabees.—5. A Thessalonian who entertained SS. Paul and Silas. When a Jewish mob came to secure Paul and could not find him, they took Jason before the politarchs, who demanded security of him before setting him free. It is not improbable that he is the same as the companion and fellow-tribesman of the apostle mentioned in Ro.16.21. [B.F.S.]  

Jasper (Heb. yashpē; Gr. ιασπίς), a precious stone frequently noticed in Scripture. It was the last of the twelve inserted in the high-priest's breastplate (Ex.28.20,39.13), the twenty-four of the new Jerusalem (Rev.21.19), and was among the treasures of the king of Tyre (Ezk.28.13). He that sat on the throne (Rev.4.3) was to look on "like a Jasper and a sardine stone"; the light of the new Jerusalem (21.11) was "like a stone most precious, even like a jasper crystal," and its wall (21.18) was built of it. These three passages, at any rate, seem
to denote a stone of greater brilliancy and value than the modern jasper, which, though often richly coloured (e.g. red or dark green) and handsome, is rather opaque and not very rare, being one of the less translucent and pure varieties of Chalcedony. But in Mr. King's words, "...greatness and more or less translucency," as we can see from Pliny and other early authors, "...were the two essential characters of the ancient aspis." It is certain, as we learn from the former author, that about the 1st cent. of our era this name covered not one, but one kind of mineral, mostly, however, the more translucent chalcedonies, the green varieties (choice specimens of plasma or prase) being the most esteemed, and in earlier times (as Pliny says) highly valued. A possible parallel (yaspia) for the name has been found in the Amarna tablets (Berlin 26). [T.G.B.]

Jas†ub. (1 Esd.8.30) = Jaišub, 2.

Ja†tal (1 Esd.5.28) = Ater, 1.

Jath†iel, a Korhite Levite, the fourth of the family of Meshelemiah (1Chr.26.2).

Jatt†ir, a town of Judah in the mountain district (Jos.15.18), one of the group containing Socho, Eshtemena, etc. (See also Jos.21.14; 1 Sam.30.27; 1 Chr.6.57.) Robinson identified it with the site of the town of Jetha, west of the Jordan, during the same campaign as the neighboring town of Jaba (Jos.15.18), which he identifies with the Mount of the Assirians of old (Judg.1.5). [C.R.C.]

Javan, a son of Japheth (Gen.10.2.4; 1 Chr.5.57), representing the Gk. race of Ionia, the descendants of which were found in Aecilia, Tarsus, Cyprus, and Rhodes. The Greeks of Cyprus are traced as early as the time of Esarhaddon (670 B.C.), and Sargon of Assyria (c. 702 B.C.) speaks of the Ionians as "fronting the sea, spawning like fishes." [K.A.E.] In Isaiah (66.19) Javan is connected with Tarsus, Lydia, Tubal, and (in LXX) Meschesh, and in Ezekiel (27.13) with Tubal and Meschesh, also with the Danai (Dan.) as trading with Tyre (ver. 19; cf. R.V. margin.). Javan is rendered Greek of Greece in A.V. (Dan.8.21,10.20,11.2; Zech.9.13; 13.6), in consequence of L.X.X. rendering "Hellenes"; but the Asiatic Greeks are usually to be understood. [C.R.C.]

Javelin. [Arms.]

Jazâr, Jazer. [Jazer.] Jazîz, a Hagarite who had charge of the flocks of David (1 Chr.27.41).

Jealousy, Ordeal of. [Ordeal of Jealousy.]

Jealousy, Water of. [Water of Bitterness.]

Jearîm, Mount, a place on the north boundary of Judah (Jos.15.10). The range E. of Nîrîjah-Jearîm (Lotem) and S. of Cheshalon (Kedalah). The valley between runs to Beth-shemesh and formed the border. [C.R.C.]

Jëera†nal, a Gershonite Levite, son of Zerah (1 Chr.6.21).

Jebërecheâ†nah, father of Zechariyah, 28, in the reign of Ahaz (Is.8.2).

Jebu†s, the city of the Jebusites, is only mentioned, under this name, twice in O.T.: Judg.19.16, "Jebus, which is Jerusalem," and 1 Chr.11.4, "Jerusalem, which is Jebus." The origin of this latter name is not known; but (cf. under suggests, with some probability, that "Jebus" (Heb. yebûs) is the Akkadian word ("house of liberty") equivalent to Adonai ("house of safety") or, "of peace.") [I.J.R.]

Jebusit' = Jebusite, the inhabitant being put for the place (Jos.18.16,28; cf. 15.8).

Jebusite. According to the table (Gen.10.16 and 1 Chr.1.14), "Jebusite" is the third son of Canaan. In all lists of the inhabitants of Canaan the Jebusite occupies the last place (Gen.15.21; Ex.38, etc.). In the lists of the spies (Num.13.29) they are distinguished, with the Hittites and Amorites, as dwellers in the mountains; and the fact that they were mountaineers is emphasized in Jos.11.3, where the Jebusites joined the confederacy of Jabin against Israel. They never seem to have been numerous or influential, but owed their importance to the possession of the strong fortress which for a time appears to have borne their name. Jebus was not, however, the original name of Jerusalem, for in the Amarna correspondence, some of which is probably of earlier date than the Israelitish conquest of the land, the city is called Uru-salim. Possibly Adoni-zedek, the leader of the five kings who combined against Joshua (Jos.10.1), perhaps also Adoni-bezek (Judg.1.5), was a Jebusite, though the former is called an Amorite (Jos.10.5). Jerusalem, after the defeat of Adoni-bezek (Judg.1.5), was taken by the tribe of Judah, and the Jebusites were "as if in the country" by David; it is always alluded to as a Jebusite town. The border of Judah went up "to the south side of the Jebusite; the same is Jerusalem" (Jos.15.8); and the Levite would not enter the foreign town of "Jebus, which is Jerusalem" (Judg.19.10). When David and the other non-Israelite peoples in the land, were put to forced labour (1 Kgs.9.21). Zechariah uses the term "Jebusite," apparently as an archaism, to signify an inhabitant of Jerusalem. When the Philistines are incorporated with Judah, Ekron, says the prophet, shall be the Jebusite (18:8). [F.B.P.J.]

Jecâniâh (K.V. Jehkaniâh), a son of king Jeconiah (1 Chr.3.18).

Jechôlîah, wife of Amaziah, king of Judah, and mother of Azariah, or Uzziah, his successor (2 Kgs.15.2).

Jechônîas. — 1. The Gk. form found in Apoc. and N.T. of the name of king Jeho-ni-miah (Est. Apoc.11.14; Bdv.3,9; Mt.21,11,12). — 2. (1 Esd.8.92) = MIKHâniâh, 4.

Jecônîah (2 Chr.36.3) = JECOâNIH.

Jecôni-ah, in 1 Chr.3.16,17; Esth.2:6; Je. 24.1.27,28.28,4, and 29.1 for Jehoiachin.

Jecônîas (1 Esd.1.9) = CONANIAH.

Jedâlaâh (ט"וְ), head of the second course of priests in the time of David (1 Chr.24.7). Some of the family—of or of a second priestly line—bear the same name; in the 12th book of Daniel (cf. 21) returned to Jerusalem after the Captivity (Esdr.2.36; No.7,39.). To one of these families probably belonged the priest in the time of Ezra the high-priest (Zech.6.10,14).

Jedâlaâh (ט"וְ).—1. A Simeonite, son of Shammua (1 Chr.4.17). — 2. Son of Harunah;
Jehoshaphat, one of the two “doorkeepers for the ark” in Jerusalem (1 Chr. 15:24).

Jehiel (Heb. נַחְיָל).—1. One of the Levites appointed by David to assist in the service of the house of God (1 Chr. 15:18, 20, 16:5).

—2. A son of Jehoshaphat, king of Judah, put to death by his brother Jehoram (2 Chr. 21:1, 7).

—3. A ruler of the house of God at the time of the reforms of Josiah (25:8).—4. A Gershonite Levite, head of the Bene-Laadon in the time of David (1 Chr. 23:8), who had charge of the treasures (29:8).—5. Son of Hashmonai, named in the list of David’s officers (27:32) as “with the king’s sons.”—A Levite of the Bene-Heman, who took part in the restorations of king Hezekiah (2 Chr. 29:14).—7. Another Levite at the same period (31:13).—8. Father of Obadiah, of the Bene-Jeob (Ezr. 8:9).

—9. One of the Bene-Elam, father of Shechem, 4 (10:2).—10. A member of the same family (10:20), who, like—11. A priest, one of the Bene-Harim, had to put away his foreign wife (10:21).

Jehiel (Heb. יְחִאל; יְחִיל; יְחִיל).—1. A man described as father of Gibeon; a forefather of king Saul (1 Chr. 9:35).—2. A son of Hotham the Arorite; a member of David’s guard (11:44).

Jehiel (rChr. 28:21, 22) = Jehiel, 4.

Jehizkiah’, son of Shallum, and a leader of Ephraim in the time of Ahaaz (2 Chr. 22:12).

Jehoadah’, a descendant of Saul (rChr. 36); great-grandson to Meribbaal—i.e. Mephibosheth; called Jaraa (B.42).

Jehoaddan’, queen to Joash, and mother of Amaziah of Judah (2 K. 14:2; 2 Chr. 25:1).

Jehoahaz.—1. The son and successor of Jehu, reigned 17 years over Israel in Samaria. His inglorious history is given in 2 K. 13:1-9, 22-29. Throughout his reign he was kept in subjection by Hazael, king of Damascus (cf. ver. 7 with 2 K. 8:12). Jehoahaz maintained the idolatry of his father; but in his extremity he besought Jehovah; and Jehovah gave Israel a deliverer—probably either Jehoash (vv. 23 and 25) or Jeroboam II. (2 K. 14:24, 25).—2. Jehoahaz, otherwise called Shalum, the son and successor of Josiah, king of Judah. He was chosen by the people in preference to his elder brother Jehoatkim (cf. 2 K. 23:31, 36), and reigned three months in Jerusalem. Pharaoh Necho, on his return from Carchemish, perhaps resuming the election of Jehoahaz, sent to Jerusalem to depose him, and to fetch him to Riblah. There he was cast into chains, and from there taken into Egypt, where he died. His character was twofold: he revolted against Assyria, he made a league with the Babylonians (2 K. 21:33, 34).

Jehohanan’.—1. A Korhite Levite, sixth son of Meshelemiah, and one of the doorkeepers to the tabernacle appointed by David (rChr. 26:3).—2. One of the principal men of Judah, under king Jehoshaphat (2 Chr. 17:15). Probably the same as—3. Father of Ishmael,
JEHOIAKIM

one of the “captains of hundreds” who assisted Jehoiada the priest in putting an end to the rebellion of Jehoiakim (2Chr.23.14). A lay Israelite, of the sons of Bebai, who was forced to put away his foreign wife (Ezr.10.28).

-5. A priest (Ne.12.13) representing the house of Amariah when Joiakim was high-priest.

-6. A priest who took part in the dedication of the wall of Jerusalem (Ne.15.42).

-7. Son of Jedaiah, keeper of the doors (Ne.13.40).

-8. Son of Seraiah, chief of the priests (2K.25.26). Called Jeconiah (Je.27.20), Coniah (Je.22.24), Joacim (1Esdr.1.43), Jehonias (Ba.1.3; Mt. 1.11). On Jehoiakim’s accession Jerusalem was unable to offer any resistance to the army which Nebuchadnezzar sent to besiege it in the eighth year of his reign, and which he seems to have joined in person after the siege was commenced. In a very short time, apparently, Jehoiakim surrendered with the queen-mother, the servants, captains, and officers. With these he was sent captive to Babylon, his throne having been given by Nebuchadnezzar to Mattaniah, son of Josiah (Zedekiah) (2K.24.14; Je.22.24). Son of Josiah (2K.24.14-17; Je.22.24; Ezk.17.12.19.9). Jehoiakim remained a prisoner in Babylon for 36 years, viz., until the accession of Evil-merodach, who released him from prison, raised him above the other subject or captive kings, and made him sit at his own throne. (Je.52.7-9; 2K.24.14-30; Je.51.24-34). Notices of Jehoiakim are found in 2Ch.36.1-36, and (if, as some assert, Joacim the husband of Susanna is to be identified with Jehoiakim) in the History of Susanna and the Elders; but the unhistorical character of these notices would seem to be proved by the long imprisonment of Jehoiakim in Babylon. From Je.22.28-30 it has been thought that Jehoiakim had no children; but the sense in which the prophet speaks of him as “childless” (LXX. εἱκεβραστής, “proscribed”) is evident from the words which follow, “for no man of his seed shall prosper.” See also 1Ch.3.17. (b.c.e.)

Jehoiakim.

1. Father of Benaya, David’s warrior (2Sa.23.36; 1Ki.1.31). 2. Father of 2. Father of (1r.18.17, etc.) In 1r.27.5 Benaih’s father is called “a chief priest” in A.V., but in R.V. the words are “the priest, chief,” where “chief” refers to Benaih and “the priest” to Jehoiakim, who is therefore doubtless identical with 2. Leader of the Levites, i.e., the priests who joined David at Hebron (1r.12.27).—3. According to 1r.27.31, son of Benaih. But probably Benaih the son of Jehoiakim is meant, by a confusion similar to that with regard to Ahimelech and Abiathar, 1r.18.16; 2Sam.8.17.—4. High-priest at the time of Athaliah’s usurpation, was the governor of the temple and carried them to the land of Shirar. But he seems to have changed his purpose as regards Jehoiakim, and to have accepted his submission, and reinstated him on the throne, perhaps in remembrance of the fidelity of his father Josiah. What is certain is that Jehoiakim became tributary to Nebuchadnezzar after his invasion of Judah, and continued so for three years, but at the end of that time broke his oath of allegiance and rebelled against him (2K.24.1). Though Nebuchadnezzar was not able at that time to come in person to chastise his rebellions vassal, he sent against him numerous bands of Chaldeans, with Syrants, Moabites, and Ammonites, who were all now subject to Babylon (2K.24.7), and who cruelly harassed the whole country. Either in an engagement with some of these forces, or else by the hand of his own oppressed subjects, who thought to condescend the Babylonians by the murder of their king. Jehoiakim came to a violent end in the 11th year of his reign. His body was cast out ignominiously on the ground, and then, after being left exposed for some time, was dragged away and buried “with the burial of an ass.”

JEHOIAKIM

18th (or, counting Jeochoaz, 19th) king of Judah from David inclusive—25 years old at his accession, and originally called Eliakim. He was the son of Josiah and Zebudah, daughter of Pedaijah of Rumah. The outline of his history is contained in 2K.23.31-24.7; 2Ch.36.5-8; but it is in the writings of Jeremiah that we find the fullest portraiture of him. After deposing Jehoahaz, Pharaoh Necho set Eliakim, his elder brother, upon the throne, and changed his name to Jehoiakim. Egypt played no part in Jewish politics during seven or eight years of Jehoiakim’s reign. After the battle of Carchemish, Jehoiakim was brought into Palestine as one of the Egyptian tributary kingdoms, the capture of which was the natural fruit of his victory over Necho. He found Jehoiakim quite defenseless. After a short siege he entered Jerusalem, took the king prisoner, bound him in fetters to carry him to Babylon, and placed in the temple and carried them to the land of Shinar. But he seems to have changed his purpose as regards Jehoiakim, and to have accepted his submission, and reinstated him on the throne, perhaps in remembrance of the fidelity of his father Josiah. What is certain is that Jehoiakim became tributary to Nebuchadnezzar after his invasion of Judah, and continued so for three years, but at the end of that time broke his oath of allegiance and rebelled against him (2K.24.1). Though Nebuchadnezzar was not able at that time to come in person to chastise his rebellious vassal, he sent against him numerous bands of Chaldeans, with Syrants, Moabites, and Ammonites, who were all now subject to Babylon (2K.24.7), and who cruelly harassed the whole country. Either in an engagement with some of these forces, or else by the hand of his own oppressed subjects, who thought to condescend the Babylonians by the murder of their king. Jehoiakim came to a violent end in the 11th year of his reign. His body was cast out ignominiously on the ground, and then, after being left exposed for some time, was dragged away and buried “with the burial of an ass.”
without pomp or lamentation, “beyond the gates of Jerusalem” (Je.22.18,19,36-39). All the accounts we have of Jehoiakim present his character as vicious and irreligious. In 2K.23.37 we read that “he did that which was evil in the sight of Jehovah,” a statement repeated in 24.9 and 2Chr.36.5. Jeremiah charges him with covetousness, the shedding of innocent blood, oppression, and violence (Je.22.13,15,26.20-23,56). Josephus asserts that “he was of a wicked disposition, and ready to do mischief; nor was he either religious towards God or good natured towards men” (10 Ant. v. 2).

Jehoiarib', head of the first of the 24 courses of priests, as arranged by David (1Chr.24.7). Some of his descendants returned from the Babylonish captivity (1Chr.9.10 = Joiarib; Ne.11.10,12.6,19). They were probably of the house of Eleazar. To the course of Jehoiarib belonged the Hasmonean family (1Mac.12.39,40). One descended from Josephus, as he himself informs us (Life, i. 1).

Jehonadab' or Jonadab', son of Rechab, chief of the Rechabites. His father or ancestor Rechab possibly belonged to a branch of the Kenites (see 1Chr.2:55), who entered Palestine with the Israelites. One settlement of them was in Bashan, and they are mentioned in connection with the Moabites (Je.34.6). Their descendants were not forbidden to drink wine (Je.35.6; 2K.3.2,10). This leader of a semi-nomadic sect was realized by the king to be a fit companion for his present purpose. He was a man of austere character, and his “zeal for Jehovah.” No doubt he acted in concert with Jehu throughout; but he is only expressly mentioned when they went through the temple of Baal to expel any servants of Jezebel, who might be there (10.23). The Rechabites may have been Benjaminites disowned by Jehu, and not Rechab, yet the prophet's friend by the prophetic name, which would account for their being known to Jeremiah, whose home [Anathoth] lay in Benjamin. Rechab was a Hebrew name (Ne.3.14).

Jehonathan'.—1. Son of Uzziah; superintendent of certain of David's storehouses (1Chr.27.25).—2. One of the Levites sent by Jehoshaphat through the cities of Judah, with a book of the law, to teach the people (2Chr.17.8).—3. A priest (Ne.12.18) representing the family of Shemaiah, when Joilakim was high-priest.

Jehoram' (or Joram').—1. The second son of Ahab king of Israel. He succeeded his brother Ahaziah. The alliance between the kingdoms of Israel and Judah, commenced by his father and Jehoshaphat, was very close throughout his reign. We first find him associated with Jehoshaphat and the king of Edom, at that time a tributary of the kingdom of Judah. In a war against the Moabites under Mesha, their king, on the death of Ahab, had revolted from Israel, and refused to pay the customary tribute. Jehoram asked and obtained Jehoshaphat's help to reduce him to his obedience, and accordingly the three kings, of Israel, Judah, and Edom, marched through the wilderness of Edom to attack him (2K.3.3-8). The three armies were in a hurry, the danger of perishing for want of water. Jehoshaphat wished to inquire of some prophet of Jehovah, and Elisha was found with the host (3.11). From him Jehoram received a severe rebuke; nevertheless for Jehoshaphat's sake Elisha inquired of Jehovah, and received the promise of abundant water, and of a great victory over the Moabites—a promise immediately fulfilled. The allies pursued the Moabites with great slaughter into their own land, which they utterly ravaged and destroyed all its cities. Kir-haraseth alone remained, and there the king of Moab made his last stand, and was defeated by Elisha with a return of the calamities from which he had escaped. Refusing to repent, a fresh invasion by the Syrians under Benhadad, and a close siege of Samaria, actually came to pass, probably according to the word of the prophet. Hence when the terrible incident arose, in consequence of the famine, of a woman boiling and eating her own child, the king immediately attributed the evil to Elisha, and determined to take away his life (6.24-31). The providential interposition by which both Elisha's life was saved and the city delivered is narrated 2K.7, and Jehoram appears to have renewed his friendly feelings towards Elisha after the storm. Events Elisha went to Damascus, and predicted the revolt of Hazael, and his accession to the throne of Syria in the room of Benhadad (8.7-13). Jehoram seems to have thought the revolution in Syria, which immediately followed Elisha's prediction, a good opportunity to pursue his father's favourite project of recovering Ramoth-gilead from the Syrians. He accordingly made an alliance with his nephew Ahaziah, who had just succeeded Joram on the throne of Judah, and the two kings proceeded to occupy Ramoth-gilead by force. The expedition was unfortunately unsuccessful. Jehoram was wounded in battle, and obliged to return to Jezreel to be healed of his wounds (8.29,9.14,15), leaving his army under Jehu to hold Ramoth-gilead against Hazael. Jehu, however, and the army under his command, revolted from their allegiance to Jehoram (9), and, hastily marching to Jezreel, surprised the wounded and defenceless Jehoram, who fell pierced by an arrow from Jehu's bow on the
very plot of ground which Ahab had wrested from Naboth, thus fulfilling the prophecy of Elijah (1K.21.21-29). Thus ended the dynasty of Omri.—2. Eldest son of Jehoshaphat, became king of Judah at the age of 32, and reigned 8 years. Jehoshapha's daughter was wife to the high-priest Jehoiada. As soon as he was settled on the throne, he put his six brothers to death, with many of the chief nobles. He then (probably at the instance of his wife Athaliah, the daughter of Ahab) proceeded to establish the worship of Baal. A prophetic writing from the aged prophet Elijah (2Chr.21.12-15) failed to produce any good effect upon him. This was in the first or second year of his reign. The remainder of it was a series of calamities. First the Edomites, who had been tributary to Jehoshaphat, revolted, and established their permanent independence (2K.8.20-22; cf. Gen. 27.40). Next Libnah, one of the strongest fortified cities in Judah (2K.19.8), rebelled against him. Then followed invasions of armed bands of Philistines and of Arameans, who stormed the king's palace, put his wives and all his children (except his youngest son Ahaziah) to death (2Chr.22.1), and carried away all his treasures. He died of a terrible disease (21.19,20) early in the twelfth year of his brother-in-law Jehoram's reign over Israel.

Jehoshabeath' (2Chr.22.11). [Jehoshe'ba.]

Jehoshaphat.—1. The son of Asa and Azubah, succeeded to the throne of Judah when he was 35 years old, and reigned 25 years. His history is to be found in 1K.22.41-50 and among the events recorded in 15.24, 2K.8.16, or in a continuous narrative in 2Chr.17.1-21.3. He was contemporary with Ahab, Athaliah, and Jehoram. At first he strengthened himself against Israel by fortifying and garrisoning the cities of Judah and the Edomite conquests of Asa. But soon afterwards the two Hebrew kings, perhaps appreciating their common danger from Damascus and the tribes on their eastern frontier, formed an alliance. Jehoshaphat's eldest son Jehoram married Athaliah, the daughter of Ahab and Athaliah, and therefore Jehoshaphat was always a zealous follower of the commandments of God: he endeavoured, but with only partial success, to put down the idolatrous high places and groves in his kingdom. In his third year he sent out certain princes, priests, and Levites, to go through the cities of Judah, teaching the people out of the Book of the law. Riches and honours increased around him. He received tribute from the Philistines and Arameans, and kept up a large standing army in Jerusalem. It was probably about the 16th year of his reign that he went to Sochara to visit Ahab, and became his ally in the great battle of Ramoth-gilead. From thence Jehoshaphat returned to Jerusalem in peace, and went himself throughout the land "from Beor-sha to mount Ephraim," reclining the people to obedience to the law of God. Turning his attention to foreign commerce, he built an arsenal at Jezion-geber, with the help of Ahabiah, a navy designed to go to Ophir (2K.22.18); but it was wrecked at Ezion-geber. Two more wars followed before the close of his reign. He was miraculously delivered from a threatened attack of the people of Ammon, Moab, and Seir. After this, perhaps, must be dated the war which Jehoshaphat, together with Jehoram king of Israel and the king of Edom, made against the rebellious king of Moab (zek.3). [Mza'n.]. In his declining years the administration of affairs was placed in the hands of his son Jehoram (8.16).—2. Son of Ahilud. He was the recorder or annalist in the reigns of David (2Sam.8.16, etc.) and Solomon (1K.4.3).—3. One of the priests appointed to blow trumpets before the ark when it was carried from the house of Obed-edom to Jerusalem (1Chr.15.24).—4. Son of Paruah; one of the twelve officers of king Solomon (1K. 4.17). He is said to have ruled in Issachar, but the towns under another officer [Baana] were all of that tribe, and apparently Jehoshaphat ruled in Zebulan with perhaps part of N. Issachar. [Palestine].—5. Son of Ninnim, and father of king Jehu (2K.9.2; 14).

Jehoshaphat, Valley of (Jl.3.2,12), a deep valley (mêmeq) for "Jehovah's judgment" of the gayim or "nations." It is apparently intended to be understood as being near Jerusalem (ver. 16), and is called the "valley of the thick darkness," or "of the Valley of the Valley," or "of the Valley of Fire," or "of the Valley of Ashdod". It was near the head of the Kidron Valley, and may preserve a corrupt form of the name in question. [C.K.C.]

Jehosh'e'ba, daughter of Joram, king of Judah, and wife of Jehoiada the high-priest (2K.11.2). Her name in Chronicles is given Jehoshabeath. As she is called "the daughter of Joram, sister of Ahaziah," it has been conjectured that she was the daughter, not of Athaliah, but of Joram by another wife (cf. Josephus, Ant. vii. 1). She is the only recorded instance of a princess of the royal house marrying a high-priest. It provided a powerful inducement to Jehoram, perhaps inducing, and probably enabling her to rescue the infant Joash from the massacre of his brothers. [Jehoi'ada.]

Jehoshu'a, the full form of the name Joshua given in Num.13.16, on the occasion of its bestowal by Moses; and once more only in A.V. (with a redundant h) as Jehoshu'ah (1Chr.7.27).

Jehovah. (1) The name Jiwv—usually spelt Jeljôvah—was first revealed in its full sense to Israel through Moses (Ex.6.2-3). It appears in the records of a time when the whole earth had one language (Gen.11.1), and has not been traced with certainty to any source beyond Heb. among the divergent languages of mankind. How it sounded on the lips of Eve, or of Lamech the father of Noah (Gen.4.1,5,29), we cannot say. Nor can we tell how names significant in the universal language of mankind, and handed down as such, have been, like Heb., a member of the Semitic family of Babel-tongues. This shows the skill of the author of the early chapters of Genesis, and is the
first notable fact concerning the name JHVH in the Bible. When God revealed Himself (Ex. 3.14, 15) to Moses in Horeb as God of the fathers of Israel, Abraham, Isaac, and Jacob, and Moses asked His name, the answer was, "What I am, I am" ("'echy 'asher 'echy"). Say, I am ['echy] hath sent me unto you; His name is JHVH, the God of your fathers, the God of Abraham, the God of Isaac, and the God of Jacob." The full sense of JHVH and the attributes it conveys were proclaimed in Ex. 34.6, 7: "For His Name's sake" is a plea based on this proclamation. To Israel JHVH was to be His "Name for ever, His memorial to all generations." But it was not to be the Name of God for all His servants. "The Lord JHVH shall slay thee, and call His servants by another Name...the God of Amen, the true God" (Is. 66.15, 16). Our R.V. refers us to 2 Cor. 1.20, Rev. 3.14, where our Lord calls Himself the Amen. The Jew uses the name JHVH. The disuse is revealed in O.T. (2) The disuse of the name JHVH and the use of Lord or God (in capitals) in its stead. So completely has the name JHVH been disused, that its vowels and pronunciation have long been in dispute. The O.T. was written by its authors without vowels, as also the Talmud. Thus, in order to preserve the traditional reading of the Hebr. Scriptures, the Jews (300-700 A.D.) added vowels, or points, as they are called, to every word; and so the Heb. Bible, as we have it, appears. Thus the Scriptures of the O.T. answer the question, "What is written in the law, and in the psalms?" (Luke 24.44), "the Hebr. names bears the nature of a vowel." If we follow our present Heb. Bible, we read according to the tradition of the "wise men and scribes" of the nation to whom "were intrusted the oracles of God." They did not put vowels to those "oracles," to declare how they read them, until after their rejection of Jesus. But when we come to the name JHVH, and ask, "Do we put vowels to the name JHVH?" The Heb. replies "We do not read that name. We cannot tell how it was read by Moses and the prophets. We read Adonai (Eng. Lord) or Elohim (Eng. God) instead of JHVH." The Jews, taking Lev. 24.16 to mean, "He that pointeth or pointedly expresseth the name shall be put to death," have no certain vowels for the name JHVH. It was pronounced on the Day of Atonement in the Holy of Holies by the high-priest; but they have now no high-priest to pronounce the name. In their Bibles they print JHVH with the vowels of Adonai or Elohim, which ever they intend to read. This Hebr. use has affected all translations of O.T. into Gentle tongues. In the LXX.—the oldest published version—Kópôs (="adhônâyâ, Lord") takes the place of JHVH. In Eng. we use Lord or God, in capital letters. In our A.V. JAH is also translated Lord, as though it were JHVH. (R.V. of O.T. where Lord is used for JAH, prints JAH in the margin.) In the Eng. Lord is the usual Eng. for Kopôs or Ïtrôps, which are applied to God or to man in the sense of Master. But when Ps. 110.x is quoted in the gospel, we find Lord in capitals for JHVH (Mt. 22.44, but not in R.V.). (3) The true spelling of JHVH. It has been very generally held of laquo that the name should be Jâhâvêh, or Jâh-
Jehozabad

Canaan. [Chronology.] In order to show Himself to the children of Israel, 215 years after the descent of Jacob their father into Egypt, as the same God, He promised (Ex.6.4) to restore them to the land of their fathers. Thus the story of yesterday both inspired the hopes of to-day, and shaped the forecast of to-morrow. In the word Jehovah we know, as a name, that Jehovah-Rophke (2)JEH0VAH-R0PHEKA (Gen.22.14), we can say, and that the word Jehovah was known to the patriarches. In the days of Enos men began to use (or misuse) the Name JHVH (4.26). Eve, Lamech, Noah, Abraham, Sarah, Lot, Abraham’s servant in Gen.24, Laban and Bethuel, Isaac, Rebekah, Abimelech and his friends, Jacob, Leah and Rachel, and all Israel. But other persons are mentioned as speaking to God as JHVH, and only in five places. We are reminded that it is one thing to be aware that an exalted personage has a certain name, another thing to understand its significance, and a third to address Him by it. It is written that one god spoke of himself to Abraham as JHVH. (See Gen.18.14 for this, and 15–2, 8.24.12,32.9.49.18 for the places where men spoke to Him by that name.) For the supposed distinction in different writers in the use of Jehovah and Elohim, see ELOHIM: EXODUS. The following combinations of the name appear in Gen.1. (1) JEH0VAH-BAAL (or the Lord will see), or Jehovah, Gen.21.14. Thus Abraham named “the place” in the land of Moriah where God did “provide Himself the lamb for burnt-offering.” The sacred writer adds, “In the mount of JHVH it will be provided.” (2) JEH0VAH-R0PHEKA (= [I am] the Lord thy Rock, Ex.15.26), at Nahrab, where the Lord had shown His power in the healing of waters in bitter waters. (3) JEH0VAH-NISSI (= the Lord my banner), Ex.17.15. Thus Moses named the altar which he built in Rephidim after the defeat of Amalek. The true meaning of the “banner” depends on the interpretation given to the word, as follows, for which see JAB. (4) JEH0VAH-MEQAD-DESH (= [I am] the Lord sanctifier), with pronoun “your,” “his,” “their,” in Ex.31.3 and in Lev. and Ezek. in relation to Israel as a whole, and to their priests in particular. (5) JEH0VAH-SHALOM (= the Lord peace), Gedon’s name for his altar in Ophrah, commemorating His promise of life and peace (Judg.6.24; cf. 2Th.3.16). (6) JEH0VAH- TSIDKENU, (a) a prophetic title of the Messiah (Je.33.6), = the Lord our righteousness, or justice. Both senses are clearly in the Heb. word, (b) a title of Jerusalem (Je.33.16). (7) JEH0VAH-MAKKEH (= [I am] the Lord smite), Ezek.7.6, a name of judgment upon the land of Israel. (8) JEH0VAH-SHAMMAH (= the Lord is there), Ezek.38.35, the final name of Jerusalem in her glory. [C.H.W.]

Jehozabad. — 1. A Korahite Levite, second son of Obad-edom, and one of the porters of the sanctuary, the prince of the 3rd course, and the 4th, 6th, 8th, and 9th; storekeeper there in the time of David (1Chr.26.4; cf. 13, 15).—2. A Benjamite, captain of 180,000 armed men, in the days of Jehoshaphat (2Chr. 17.18).—3. Son of Shomer or Shimrith, a Moabitess; one of two servants who conspired against and slew king Joash in his bed (2K.12.21; 2Chr.24.26).

Jehozadak, son of the high-priest Seraiah (1Chr.6.14,15) in the reign of Zedekiah. When his father was slain at Riblah, by order of Nebuchadnezzar, in the 11th year of Zedekiah (2K.25.18,21), Jehozadak was led away captive to Babylon (1Chr.6.15), where he doubtless spent the remainder of his days. He was the father of Jeshaiah, the high-priest—who with Zerubbabel headed the return from captivity—and ancestor of all his successors till the pontificate of Alcimus. His name appears as Joazadak in Ezr.3.2,8,5.2,10.18, Ne.12.26; Josedech in A.V. of Hag.1.1,12.14, 2.2.4, Zech.6.11; and Josedec in 1Es.5.5,48, 56.5.2.9.19, and Ecclus.49.12.

Jehu.—1. Founder of the 5th dynasty of the kings of Israel, son of Jehoshaphat, son of Nimshi (2K.9.2). In his youth he had been one of the guards of Ahab. His first appearance in history is when, with a comrade-in-arms, Bidkar, he rode behind Ahab in the fatal journey from Samaria to Jezreel, and heard the doom pronounced by Elijah against the monarch of Israel (9.3). That he had already been personally known to Elijah may be gathered from the divine commission given to the prophet at Horeb (1K.19.16,17). This injunction, for reasons unknown to us, was not fulfilled by Elijah, but by his successor Elisha. Jehu meantime, in the reigns of Ahaziah and Jehoram, had risen to importance. He was, under Jehoram, captain of the host in the siege of Ramoth-gilead. Whilst in the midst of the officers of the besieging army a youth, one of the sons of the prophets, suddenly entered (2K.9.11), and insisted on a private interview with Jehu. They retired into an inner chamber. The youth there asked the young king of Israel the name of the appointed king of Israel and destroyer of the house of Ahab, rushed out of the house, and disappeared. On Jehu’s return to his companions he was eagerly questioned as to the meaning of the mysterious visit of this mad fellow. On learning the truth they were filled with enthusiasm, spread their mantles on the steps to make a temporary throne, blew the royal salutes on their trumpets, and proclaimed Jehu king. He then cut off all communication between Ramoth-gilead and Jezreel, and set off with a band of horsemen, full speed, to the royal city. From the spot where Jezreel a watchman saw the cloud of dust, and announced his coming (9.17). Messengers were sent, but not allowed to return, and it was not till he had almost reached the city, and was identified by the watchman, that alarm was taken. In answer to Jehoram’s question, “Is it peace? Jehu?” Jehu’s fierce denunciation of village revealed the full danger. Jehu seized his opportunity, and shot Jehoram through the heart (9.24). The body was thrown out on the fatal field, and whilst his soldiers pursued and killed the king of Judah at Beth-haggan (A.V. the garden-house), possibly the gate of Beth-haggan, he pushed on to Jezreel. Jehu himself advanced to the gates of Jezreel and fulfilled the
THE BLACK OBELISK.

On this are recorded the campaigns of Shalmaneser II., with a sculpture of the embassy of Jehu (second from top on left). (Brit. Mus., showing two of the four sides.)
divine threatening on Jezreel also. He then entered on a work of extermination hitherto unparalleled in the history of Israel. All the descendants of Ahab that remained in Jezreel, together with the officers of the court, and hierarchy of Astaroth, were swept away. His next step was to secure Samaria. Every stage of his progress was marked with blood. At the gates of Jezreel he found the heads of seventy princes of the house of Ahab, ranged in two heaps. Next, at "the shearing-house" (or Beth-eked) between Jezreel and Samaria he encountered forty-two sons or nephews (10.12-14) of the late king of Judah. These also were put to the sword at the fatal well. As he drove on he encountered Jehonadab, son of Rechab. He took him into his chariot, and they concocted their scheme as they entered Samaria (2K.10.15,16). The Baal worshipers were collected into the temple at Samaria raised by Ahab (1K.16.32), and there massacred to a man by eighty trusted guards (2K.10.18). Their heads and the heads of survivors who had still a living reign are passed over in a few words from which we see that he did not destroy the calf-worship of Jeroboam, and that the trans-Jordanic tribes suffered much from the ravages of Hazael (10.29-33). He was buried in state in Samaria, and was succeeded by his son Jehoahaz (2K.13.35). He is the first of the Israel-<ref lang="en">ite kings whose name appears in the Assyrian monuments. The obelisk of black marble from Nimrud (see illustration), showing the tribute of various nations, gives an account of the victories of Shalmaneser II. between 859 and 828 B.C. In the second row of designs is the picture which is inscribed "Tribute of Yahua, son of Hamur [Omri; perhaps by a clerical error of one stroke for Nanna-si = Nimsh] of objects of silver, gold, a gold cup, vessels, gold buckets, lead, a staff for the king's hand, and scepters I received."

Jehonadab stands holding a cup, and two attendants behind hold a written tablet. Two men, who are bringing Jehu (or his ambassador) who kisses the ground. He wears a cap like that of later Phrygians. The tribute-bearers have the same cap, and shoes with curled toes (while the Assyrians wear sandals); they bear the objects mentioned in the text. The signs of the most extensive conquests are shown by the kneeling ambassador. This event occurred c. 840 B.C. The monument is also remarkable for its representation of Indian animals—the elephant, rhinoceros, apes, and the Bactrian hound and camel. [Tarshish]. Cuneif. Inscription and Old Test. i. p. 179, 2nd ed.; Rittel, Hist. of Hebrew Dyn. Dr. of O.T.; Stade, Zeitschrift für die A.T. Wissenschaft (1885).—2. Jehu, son of Hanani; a prophet of Judah, but whose ministrations were chiefly directed to Israel. His father was probably the seer who attacked Asa (2Chr.16.7). He denounced Baasha (1K.16.17), and, after an interval of 30 years, Jehoshaphat's alliance with Ahab (2Chr.19.2,3). He survived Jehoshaphat and wrote his life (20.34).—3. A man of Judah of the house of Hezron (1Chr.2.48).—4. A Simeonite, son of Josiah (4.35).—5. One of David's heroes who joined him at Ziklag (12.3). [H.C.B.]

Jehubah, a man of Asher; son of Shamer or Shomer (1Chr.7.34).
JEPHUNNE

[Notes:—His daughter came out with timbrels and dances, "for she was the only child." He allowed her two months to bewail her virginity upon the mountains, and then "did with her according to his vow." The Ephraimites came to assert themselves, and Jephthah, unlike Gideon (8:2), was scarcely conciliating. A battle took place; Ephraim was defeated. Jephthah seized the lords and slew all who could not pronounce Simboletah (cf. Sicilian Vespers). He judged Israel 6 years. 11.12-28 is interpolated, but it can scarcely be a fraud of 6th cent. to establish the claim of Israel to Gad (Je.49.1), as Moore thinks; for this passage presupposes the existence of Num.21, which would make such a fraud unnecessary. The compiler, like Thucydid, in similar cases, knew of the diplomacy, but himself composed the message, or at any rate rewrote it, for ver. 26 implies his chronology. The references are to Moab rather than Ammon, to Chemosh rather than Milcom, but we do not know all the facts (cf. Deut.2.34). It also denies the existence of Jephthah, and treats this passage as an interpolation of very late date. Yet he relies on ver. 24 to prove that the Israelites were not monothestes! This argument would prove Jeremiah (see 48:7) not a monotheste. Ver. 24 is an argumentum ad hominem,—Jephthah's "Seven"—Until the 14th cent. A.D. there was no doubt as to Jephthah's vow and sacrifice. Then Kimchi, followed by other Rabbis, strove to show that the daughter was not sacrificed, but remained unmarried. The latest exponents of this view are, in Germany, König; in England, Edersheim. But Jephthah certainly did not vow that the first person who came out of his house should be a virgin, and what he vowed he performed. In making his vow, he doubtless hoped for some lesser sacrifice. Had human sacrifices to Jehovah been recognized, this story would not have been written, nor a mourning institute to commemorate it (see Cooke's references (Hastings, D.B.) to Is.14.24,45,15.33,32; Sam.21.6-9 are not relevant, for retribution and not worship are implied. His other quotations have no reference to Jehovah worship, and Ex.22.29 is explained 34:20, both texts being from the same source. Ephraim's defeat and the death of Jerahmeel in Jordan account for the weakness of this warlike tribe against Philistine aggression. Davidson, Expositor, 3rd series, vol. 1.; Orr, Problem of O.T.; Robertson, Early Religion of Is.; Hastings, D.B. (3 vols. 1903); Saxe, Early Hist. of Heb.; Wellhausen, Hist. of Is.; and books given under Jer.]

Jephunne (Eccles.46:7). [Jephunneh, 1.]—Jephunneh.—1. Father of Caleb the spy and grandson of Kenaz (Kenezite) (Num.13:6, etc.; Jos.14:6, etc.; 1 Chr.4:15, etc.).—2. A descendant of Asher, and eldest son of Jether (1 Chr.7:38).

Jerahmeel.—1. First-born son of Hezron, the son of Pharez ben-Judah (1 Chr.2:9,25f.).

Jereboam.—1. A Mariotic Levite, son of Adamiah, cousin of the time of David (1 Chr.24:29; cf. 2 Chr.24:3).—2. Son of "Hummelche" (Malchith, S.) Jehoiakim bid him make Jeremiah and Baruch prisoners, "but the Lord hid them." (Je.36:26).

Jerahmeelites, The (1 Sam.27:10), dwelt in the S. of Judah. [Jerahmeel, 1.]—Jereboam (1 Esd.5:22) = Jericho.

Jered.—1. (1 Chr.1:2) = Jared, as R.V.—2. A descendant of Judah; the "father "—i.e. the founder—of Gedor (1 Chr.4:18).

Jeremai', a layman of the Bene-Hashum, who put away his foreign wife (Ezr.10:31). [Jeremiah, 5.]

Jeremah. Seven other men of the same name as the prophet (see next art.) are mentioned in O.T.—1. Jeremiah of Libnah, father of Hamutal, wife of Josiah (2 K.23:31).—2. 3. 4. Three warriors—two of the tribe of Gad—in David's army (1 Chr.12:4,10,13).—5. A "mighty man of valour" of the trans-Jordanic half-tribe of Manasseh (5:24).—6. A priest, head of the temple, 5th reg. (7:23).—7. An apparently enumerated in Ne.10:2,8,12.1,21. This course, or its chief, took part in the dedication of the wall of Jerusalem (12:34).—7. Father of Jaazaniah the Rechabite (Je.35:3).

Jeremiah, Jeremiah was one of those men of whom what Hooker (Ecc. Pol. v. viii. 5) said in his tragic hyperbole of Athanasius is true—"he had no friends but God and death." The only intelligible account of his lifelong persistence in the course he deliberately chose is that friendship with God is possible, and that this is a sufficient compensation for the want of friends in the world. The lesson of his brave opposing of the spirit of his time is a perpetual tonic for the Church. Jeremiah has written his autobiography, as no other prophet, in his book and in the Lamentations. Jeremiah's period of activity extended over five reigns and into the Captivity, covering at least 32 years: (1) the latter part of Josiah's reign, (2) the times of Jehoiakim, the battle of Carieghemish, the Babylonian invasion, Jehoiachin and the first deportation or exile (597 B.C.), (3) the times of Zedekiah (597 B.C.) to the destruction of Jerusalem, the siege of Jerusalem (end of Dec. 589), Jerusalem taken, Abib to July), 587, (4) his after-life in Babylon and the latter (586 B.C.). It is interesting to note that the rise of Greece fairly synchronizes with the decay and extinction of Hebrew prophecy (Solon, 594 B.C.; Herodotus, 478 B.C.). (1) The call to be a prophet came to him in Josiah's reign, and probably in the midst of an apparently complete religious reformation, following the equally great apostasy of Manasseh. He was a native of Anathoth, a priestly town with "suburb," in Benjamin, where the high-priest Abiathar had been banished to his "fields " by Solomon (1 K.2:26). He belonged to the priesthood (Je. 1:1), and had private means. Here, about three-quarters of an hour's journey from Jerusalem on a breezy highland with extensive views of the mountains N. and W. of the Jordan Valley and of the N. end of the Dead Sea, but out of sight of Jerusalem, in the midst of cornfields, fig-trees and olive-trees, traces of which still remain, his voice was spent (Buhl, p. 175; Robinson, Pal. ii. 310; Surin, Pal. iv. 3).
Chosen before birth for his office, he was here prepared for it. It is apparent, from the account of 2 K.22, that at the finding of the temple copy of the law, he was already a priest of experience and notoriety. When with striking words, fitted to encourage him in his weakness and friendlessness, he was called to be a prophet, he was oppressed with a sense of youth and inexperience (Je.1.1-11). His first utterances (3-6) were filled with a warmth of affectionate appeal, but he found the reformation of Josiah skin-deep and his opposition to the flatterers began. He points out that Judah had seen the end of her sister-kingdom of Israel some hundred years before, but turned not with her whole heart (3.1-11). The priests and prophets were going the wrong road. They were covetous and comfortable liars. "They have healed the hurt of the daughters of my people slightly" (i.e. after a light and trivial sort, as a bad physician consulting his own ease rather than the recovery of the patient). "saying, Peace, peace, when there is no peace" (6.13,14). Yet the controversy is not so acute as is usually supposed. Jeremiah has Zephaniah and Habakkuk as fellow-workers. But in the second period, when the corruption of the nation increases, the message grows sterner and the activity of Jeremiah grows greater at the entry of the temple (7.2, 26.2), at the gate (17.19), in the valley of Hinom (23.12), and in the temple of Jerusalem (11.6), at the entry of the palace (22.1,2), often with impressive symbolic action (13.1,19,27.2, 28.12). We see the confused outlines of a terrible conflict for his people. If we attempt to translate into modern conceptions the opposition, the calumny, the indignity and deadly peril, which fell upon the most sensitive of men "without a cause," we have the picture of keen suffering. Himself a priest and prophet, he stands alone without sympathy amongst a numerous school of priests and prophets—as the Germans say, his Fachgenossen. First, at Anathoth, where he spent his first years of cowardly opposition, he is opposed against him (11.21). They bid him, on pain of death, to prophesy no more. He can go there no longer. Then, in Jerusalem, the whole company of the prophets discount his call, oppose his message, and preach a more popular doctrine of peace and prosperity, "strengthening the hands of evil doers" (23.14). The bolder of them resist him face to face. Soon they, with the priests, plot to get rid of him, and publicly arraign him for death for threatening Jerusalem and the temple with a desolation as great as that of Shiloh (7.14, 26.6,8,11). The princes and prominent laity (elders) stand by his friends, quoting Micah's similar threatening in Hezekiah's days (26.16-20). Urijah, a solitary prophet, who dares to say the same things, is brought from Egypt, where he fled, is slain with the sword, and his body cast out with contempt to the graves of the common people (26.33), but at that time Ahikam saved Jeremiah from the people. The priestly prince-prefect of the temple, roused by what was probably Jeremiah's first utterance of unmitigated severity, beat him with rods and set him in the pillory at the N. gate of the temple for a day (20.1,2). He sends his denunciations, written out by his amanuensis Baruch, to king Jehoiakim, who contemptuously cuts the MS. with his pen-knife and throws it into the fire. This action and anon, through all this storm and stress, we hear Jeremiah's bitter outcry to Jehovah against his lot as a prophet of evil (15.10,17), yet the words of Jehovah were "the joy and rejoicing" of his heart (15.16). Still he identifies himself with his people. But later, after he has been publicly mocked as an evil-doer and the tragedy of his position weighs heavier, he says, "Thou didst entice me, and I was enticed" (20.7), and now the word of Jehovah has become "a burning fire shut up in my bones" which must out (20.9). He is become a continual derision; every one is mocking him. He bears nothing but the whispering of many, and fear is on every side. Every familiar friend, "every man of my peace" (see A.V. marg.), is perpetually watching for his stumbling (20.10). And in a momentary heart-break pours out side by side with a strain of praise—"the name of Jehovah is great in judgment" (20.11). He comes to a more sufficient regard—he cure the day of his birth (20.15-17). Yet still there is a flickering ray of hope. (3) But in the days of the feeble and vacillating Zedekiah (in 27.1 read Zedeckah, see ver. 3), all hope is gone. He turns with the same iron resolution to counsel (by the direction of Jehovah) submission to the Chaldeans in order to lessen "the sorrow and ruin of his people. This he does publicly (27.12,13,38.1,2), and is publicly opposed by Hananiah, who prophesies deliverance within 2 years, and by a letter from Shemaiah from the Captivity (29.25); and he continues his warnings from prison and chains, and the bitterness of death itself. The princes first detain him as a defaulter (37.15), and then seek his life as a traitor (38.4). None but a Cushite stranger and the vacillating king take his part (38.39.15+18). In his partial discovery of the truth as to his last historic interview with the king some have seen traces of a second attempt at a confession, and the telling of the truth has been held blameless, when two lives are at stake. The incident of the legal purchase of property at Anathoth shows his tenacious faith (32). And when the destruction falls, in the Lamentations, too important to be included in his prophecies and in general subordinate to the sorrows of his country, the old cry of heart-break dies down into trust. (4) The account of the final period is possibly, as much else may be, from the hand of his tried friend Baruch, or some other (40-44, with its appendix 52). The fall of Jerusalem struck off his chains and set him free to seek a closing peace under the protection of Babylon. But the call of duty stays him. The faithful Gedaliah and his impoverished countrypeople at Mizpeh need him. His fierce countrypeople murder Gedaliah by his side. They dissemble with him, carry him against his will and advice to Egypt, and there openly advocate and practice a return to idolatry. When last we hear of Jeremiah he is still delivering a rejected and unpopular message with undiminished vigour. The death, which tradition (first recorded in Tertullian) assigns to him, is the probable one of stoning
at their hands. Recognition came too late. Possibly about 100 B.C., from a larger work of Jason of Cyrene, in 2 Maccabees are given the legends (found in the registers 21, in the writing 24) which grew up round Jeremiah. He hides the tabernacle, the ark, and the altar in Sinai till the times of the Messiah. "With gray hairs and exceeding glorious" he gives Judas the Maccabees a sword, and is introduced by Onias the high-priest as "the lover of the brethren, who praveth much for the people and the holy city, Jeremiah the prophet of God" (2 Mac. 15:13-16). Philo, an early contemporary of our Lord, apparently alludes to him only of all the prophets, and sets him equal with Moses the Chornb. (8:14). Josephus reconciles him with Ezekiel (10, Ant. vii. 2). And that Jesus of Nazareth was thought by some to be Jeremiah (Mt. 16:14) points the observed likeness, and shows him indeed the prototype and forerunner of the Messiah, which, together with Isaiah, the Jews believed him to be. Köberle, Jeremiah (Stuttgart); Jeremiah, in Litt. 2, 15, 483. Savonarola, Sorrow and Hope (S.P.C.K.), gives a not unworthy parallel.

[For text not displayed]
of Israel and Judah (23.7; Ezek.37.15-28), the "sour grapes" proverb (31.29; Ezek.18), the dry bones (8.1-5; Ezek.37.1-14), the woe of the shepherds (23.1-4; Ezek.34)—and has many verbal and material resemblances (see Redpath, Ezekiel, 147). Ezekiel is, however, profoundly studied the prophecy of the 70 years. These points probably argue close intercourse and rapid transmission of MSS. (Je.29.1, 2, 51; 60-64) between Jerusalem and the Captivity, or they possibly belong to the commonplaces of the prophets. (4) Style. The style of Jeremiah is the highest of the three. Isaiah has been called the "lawyer", Jeremiah the "statesman", and Ezekiel the "prayerful". Renan (Histoire des langues semitiques, p.132); yet it is "not without certain charms of its own, not destitute of noble and liberal ideas" (De Wette, Introduction, §220); "simple, easy, rustic, but most profound in the majesty of his thoughts, and equal in thought to the best." (Jerome, Commentary). He turns from politics to nature and from Jehovah the Creator and Source of all. "How noteworthy is his poetic and inspired sense of nature! The roaring sea, the hot desert wind, the flight of birds of passage; the art of fowler, reaper, ploughman, shepherd; the maid rejoicing in the dance, the bride who cannot forget her adornment; the sound of the mill, the light of the lamp, the children gathering wood, in the streets, fatherless, the Bedouin lurking in the desert, the hind, the lion, the spotted panther, the shy wild ass,—these are for him the picture and parable of eternal things. He gives us poetry, even aesthetically composed, perfect in form and adaptation, but not without certain marks of the period in which he lived and at which he wrote. Jeremiah's language is the language of his time, and is tinged with Aramaic (see list, De Wette, §220, p.424). The Aramaic verse (10.11) is possibly a short, emphatic proclamations to the neighboring nations in a suitable Semitic dialect. Yet it is strange, if so, that the foreign prophecies should be of all, the most vigorous Hebrew. But his book is a work of genius and true pathos, and his symbolic actions are often forcible. From Josephus to Lowth, Ley, Sievers, Cornill, Giesbrecht, and others, the writings of Jeremiah, like Hebrew poetry in general, are employed in the form of pictures, curves, or form, arising from the rising and sinking of the tone. Jeremiah's ginâ-metre (Ley's pentameter of elegy, 3+2) is the most constant (occurring both in Je. and Lam.); and is found in poems of a different kind, e.g. Ps.19.8f. (Baudis- sin). But since, in Jeremiah and elsewhere, the general application of any strict rule involves unwarrantable changes of the text, and since the distinction between poetic prose and poetic metre is difficult to draw, it is perhaps better to regard the metre as arising freely, almost unconsciously, from the differing lengths of the parallelism—longest in epic, shortest in elegy. In Orelli's Jeremiah (pp.ii, 12) there seems to be the best and most recent account of this question. There is a similar fluidity sometimes observable in strict grammatical form. Text: Kittel's Heb. Bible; Scholz, Der Masoratische Text und die LXX. Uebersetzung (Regensburg); Giesbrecht, Jeremiah (2nd ed., etc.); Pechter, Jeremiah (Gottingen). Comm.: Dean Payne Smith in Speaker's Commentary (very capable); The Pulpit Commentary; Spence and Excell, Giesbrecht, Hitzig, Ewald, Orelli in Strack-Zöckler (3rd ed.—good); Duhm in Marti, Freiburg, Driver. [F.E.S.]

Jeremias.—1. The Gk. form of the name of Jeremiah the prophet (Ecclus.49.5).—2. Mt. 15.14, 15; Mt. 16.14.—2. Given in 1 Esd.9.34, as one of the Bene-Maani (= Bani) who put away his foreign wife. Perhaps transferred from ver. 33 (cf. Ezr.10.34), and = Jeremiah.

Jeremiil (Hierennihiel, Jeremiil, God [El] furus; cf. Jeremiah, or perhaps God sets under the sun, of which the meaning is uncertain).—1. In Gk. of Eh. En. xx. 7) only occurs in 2 Esd. 4.30, A.V. margin, R.V. (A.V. text, Urieil). He there answers the questions of the righteous dead. He apparently = Ramiel, Apoc. Bar. Iv. 3, lxxii. 6, who presides over the visions; Remiel, Eh. En. xx. 7 (Gk.); cf. Orac. Sib. ix. 5-417. A.V. = A.T.

Jeremiah (1 Esd.1.28, etc., 21; 2 Esd.2.18; 2 Mac.2.15, 7; Mt.2.17, 27.9) = Jeremiah, the prophet.

Jeremiah, Epistle of. In Gk. MSS. this epistle usually follows Lamentations, but in the Syr., L.t., and A.V. it is reckoned as Ba.6; both being regarded as supplements to Jeremiah, under whose name it is quoted by Tertullian, Cypr., 1.4.9, and Tertullian has no doubt that Gk. was the original language; Hoberg, however, still deems it a translation from Heb. Quite a different line is taken from that of Jeremiah's real letter to the captives (Jo.29), and ver. 3 conflicts with Jo.29.10. It seems rather that an expansion of 10.1-15 is attempted. Jeremiah purports to write to the captives starting for Babylon to warn them against the folly of idolatry they would there see. The weapon of ridicule is freely employed. In repellent colours, with a view of counteracting its enticements, heathen worship is depicted as contemptible. The helplessness and uselessness of the idols, is so set forth, with a certain austerity, that they are not real deities; not even, like ordinary things, serving the purposes for which they are designed (vv. 59-63). After the commencement, the epistolary character of the piece is not very apparent, and it ends rather flatly by stating that the lot of just men with no idols is to be preferred. A tacit contrast to the worship of the God of Israel underlies the whole; but it may be questioned whether the tone is well adapted to those who had already fallen into idolatry before the Exile. The only trace of prophecy is in vv. 50, 51, where an abandonment of idols is foretold. Ver. 22 is interesting as containing the sole Blessing in the Book of Jeremiah. The indications are insufficient to fix a precise date, the reference in 2 Mac.2.2 to vv. 4.5, being very uncertain; but 100 B.C. may be named as approximate. For bibliography see Baruch, Book of.

Jeriah, a Kohathite Levite, chief of the house of Hophin in the time of David (1 Chr. 23.19, 24.23).
Jeribai', son of Elaan; named among the heroes of David's guard in 1 Chr.11.46.

Jericho (Heb. yerihô?, "sweet-smelling"), like the Arab. er Rîba, at the modern site near the Jordan. The word shows an old Canaanite dialect, preserving the nominative case ending. Jericho is noticed in 35 chapters of O.T., 5 of Apocalypse, and 6 of N.T. The name occurs 12 times between Num.22.1 and Deut.34.11; as that of a city near the Jordan. In Deut.34.11 the Hebrew speaks of the "kikkar" of Jericho, "the city of palm-trees" (cf. Judg.1.16,3,14; 2 Chr.28.15). It was a royal Canaanite city (Jos.2.3,12,9) with walls (6,29), and had water near it (16.1); probably it was a trading centre having an inn. Such inns were kept by women, but not regarded as respectable places, e.g. 2100 B.C., as noticed in the laws of Hammurabi (Nos. 188-130). This agrees with the view that Raham (Jos.2.1) was an "inn-keeper," who received the spies as travellers. Though the curse on the man who should rebuild Jericho as a walled city with gates (6.26; 1 K.16.34) is said to have been fulfilled six centuries after Joshua's time, it appears to refer to the building work before David's reign (Judg.3.15; 2 Sam.10.5; 1 Chr.19.5), and by prophets in the reign of Ahaziah after it was rebuilt (2 K.2.5). The water was then bad till healed by Elisha (ver. 19), and came from a spring (ver. 21). Hence the modern site at er Rîba cannot be the old one, but is bound to be near the mound Lāwîh, 3 miles W. of Gilgal, which lies N. of er Rîba, but is described as in the "east border of Jericho" (Jos.4.19). The town lay in the "plains" ("erbethid, ver. 11), but close to the foot of the "mountain" (2.16) to which the spies escaped. It was in the lot of Benjamin (18.21), the N. border ascending to the "slope of Jericho on the north" (ver. 12). At Jericho king Zedekiah was captured by the Babylonians, after escaping from Jerusalem (2 K.25.5; Jer.39.5,52;8) in 589 B.C. It was captured after the Captivity (Ezr.2.34; Ne.3.2). The "city of palms" (Ezr. 1.4) is better known only in the O.T. age, when the city was held by the Greeks (1 Macc.9.50), c. 160 B.C., but afterwards by Simon, the brother of Judas Maccabeus, who was murdered near it at Docet ("Am. et Duk") in 135 B.C. (16.11,14.15). Pompey, in 63 B.C., passed through Jericho, which was then famous for its palm and balsam. The palm gardens were irrigated, and Josephus speaks also of the viverolbanum (the zizyphum tree of the Arabs, from the berries of which oil is still made), and of the limnias in the plains. These gardens were given by Antony to Cleopatra about 32 B.C. (14. Ant. iv. 15 Ant. iv. 22). The city which Herod rebuilt was not on the site of the old city, but was fortified by a citadel called Cyprus—probably at Beit Jibr, a small fort at the foot of the mountains by the Jerusalem road (16 Ant. v. 2, etc.). Jericho stood in the plain, but close to the mountains, while old Jericho was at the summit of the hill (1-1). So also in 333 A.D. (Bordeaux Pilgrim) the later Jericho was 15 miles from the old town at the spring. This Herodian city visited by our Lord—had a palace and a hippodrome (17 Ant. vi. 5, x. 6).

The sycomore fig (Lu.19.1,4) still grows near Jericho, and the date palms are noticed in the Mishna (Pesahim iv. 8). The village er Rîba is the Jericho of the Middle Ages, and between it and Lāwîh er Suleiman there are still gardens and trees by the stream where the song of birds is heard. A single palm remains at the village, and a few stunted palm-trees farther N. [NAARAN], while wheat, barley, maize, millet, and indigo are grown, with tobacco, cucumbers, figs, and vines. There were five aqueducts at various levels, from springs in the Qelt ravine, watering the site of Herodian Jericho, and seven others irrigating the plain to N. These were repaired in the Middle Ages, when sugar-cane was grown by Moslems and Franks; but remains of the older Roman masonry are found in them. One aqueduct led to Cypros, and another to a large tank near the Herodian town (Surw. W. Pal. iii. pp. 172, 173, 184, 190, 205, 222, 224, 227). The climate of Jericho is tropical, and cultivation depends entirely on artificial irrigation. See also Mt.20.29; Mk.10.46; Lu.10.39,18.35.

Jericho in the time of Issachar, one of the six heads of the house of Tola at the census taken by David (1 Chr.7.2).

Jeribai' (1 Chr.28.31) = Jeriah.

Jeremoth'—1. Son or descendant of Bela (1 Chr.7.7). Perhaps the same as—2, who joined David at Ziklag (12.5) =—3, a Benjamite by Bocher (7.8), and husband of another Benjamite house.—4. (21.30) = Jeremoth, 2.—5. (25.4) = Jeremoth, 3.—8. Son of Azriel, "prince" of Naphitai in the reign of David (27.10)—7. Son, probably by a concubine, of David. His daughter Mahalath was one of the wives of Rehoboam (2 Chr.11.18).—9. An overseer of the temple-offerings in Hezekiah's reign (31.13).

Jeremoth', one of the elder Caleb's wives (1 Chr.2.18). The text is defective. [R.M.G.]

Jeroboam (5? may he plead the people's cause).—1. The first king of the divided kingdom of Israel; son of an Ephraimitte named Nebat. When Solomon's son Rehoboam, as his successor, fortified the city of Millo underneath the citadel of Zion, his sagacious eye discovered the strength and activity of the youthful Jeroboam, whom he accordingly appointed superintendent over the compulsory labour exacted from the tribe of Ephraim (1 K.11.28), which was so distressful a burden to the northern section of the kingdom. Jeroboam aspired to royal state, and at last was perceived by Solomon to have such designs, which were probably aided by the growing dissatisfaction of Ephraim, as well as by the alienation of the prophetic order from the house of Solomon. The attempts of Solomon to cut short Jeroboam's suspected designs occasioned the latter's flight. When leaving Jerusalem, he encountered Ahijah, the prophet of Shiloh. The LXX. has two accounts of this period, both evidently based upon Heb. originals, but only one of them agreeing substantially with the Masoretic text. According to the latter account (which, however, is probably, where it stands, an interpolation, as interrupting the narrative of Jeroboam's rebellion), the prophet, who was dressed in a new outer garment, stripped it off and tore it into 12 pieces. He gave 10 of these
to Jeroboam, with the assurance that, on condition of his obedience to God's laws, he would establish a kingdom and dynasty equal to that of David (1 K.11.29-40). According to the other Gk. account the same parable is acted by Shemariah the Enlамиte with 10 pieces of a new, unwashed garment, but at Shechem, not Jerusalem, and in the time of Jeroboam, not Solomon, 

It is at least doubtful whether his name should appear as heading the reminiscents at Shechem (1 K.12.3), for c/. ver. 20. The revolt which ensued ended in his elevation to the throne of the northern kingdom. The political disruption was thus complete. He now proceeded to impair the religious unity, a policy which tarnished his name and fame. He feared that the yearly pilgrimages to Jerusalem would undo all the work which he effected, and accordingly took a bold step: jealousy of the comparatively new sanctuary at Jerusalem—which, moreover, was geographically placed at a disadvantage to Jeroboam's divided kingdom—he provided the venerable holy places, Dan and Bethel, with golden figures of oxen, in imitation doubtless of the sacred figure at Heliopolis in Egypt, and so established a form of worship which continued till the end of the northern kingdom. At the same time he instituted new festivals and a new priesthood. It was while dedicating the altar at Bethel that a 'man of God' from Judah is said to have suddenly appeared who denounced the altar, and foretold its desecration by Josiah and violent overthrow. The king, stretching out his hand to arrest the speaker, felt it wither and paralysed, and only at the prophet's prayer saw it restored, and acknowledged his divine mission. This story, together with the subsequent description of the fate of the man of God (1 K.13), seems to have been inserted in the narrative at a time when his name and that of the 'old prophet' of Bethel had become confused. It is difficult to what exact date the story (1 K.14) of the fatal illness of Jeroboam's infant son belongs. He sends his wife from Tirzah (or Zerudah) with gifts to inquire of Ahijah concerning him. In spite of her disguise, the blind prophet recognized her as she entered, and warned her that there was a doom on the house of Jeroboam not to be averted. The mother returned, and, as she came to the threshold of her door, the child died. Jeroboam does not seem to have been successful in military matters. He was constantly at war with the house of Judah. But the only act distinctly recorded in this connexion is a battle with Abijah (Abijam), son of Rehoboam (2 Chr.13.16ff.), in which the former was defeated. He died in the 22nd year of his reign (2 Chr.13.20), which (according to the chronology of Assyrian inscriptions) corresponds to 915 B.C., and was buried in his ancestral sepulchre (1 K.14.20). The sacred historian rightly sees in him the source of permanent political and religious disaster (1 K.12.30-13.34; 2 K.17.21ff.).—2. Jeroboam II., son of Joash, and the fourth of the dynasty of Jehu, was the most prosperous of the kings of Israel. He repelled the Syrian invaders, took their capital, Damascus (2 K.14.28; Am.1.3-5), and recovered the whole of the ancient dominion from Hamath to the Dead Sea (2 K.14.25; Am.6.14). Ammon and Moab were reconquered (Am.1.13.21ff.), and the trans-Jordanic tribes were restored to their territory (2 K.13.5; 1 Chr.5.17-22). But it was merely an outward restoration. Material prosperity and splendour in the way of religious ritual were combined with the到处 evil corruption. His incapacity, oppression of the poor, self-indulgence, and perversion of justice are denounced by the prophet Amos, who was charged to foretell the destruction of Jeroboam and his house by the sword (Am.7.17). [A.W.S.]

Jeroham'. —1. A Kohathite Levite; a member of the ark of Elihu (1 Chr.24.1).

But the Levites of the city of Jerusalem, being appointed by Uliels son Judah, began to build the altar of Jerusalem, to which the people of the entire land went up to worship there (1 K.8.64; 2 Chr.1.1-6).—2. A Benjamite, and founder of a family of Bene-Jeroham (8.27). Probably the same as—3. Father (or progenitor) of Ibneiah (9.5; cf. 39).—4. A descendant of Aaron, of the house of Immer; son, or descendant, of Pashur and father of Adaiah (9.12); apparently mentioned again in Ne.11.12—5. The Levites who joined David at Ziklag (12.7).—6. A Danite, whose son or descendant Azareel was head of his tribe in the time of David (27.22).—7. Father of Azariah, 13 (2 Chr.23.1).

Jerubbab'al (he that strives with Baal), the surname of Gideon, given him when he had destroyed the altar of Baal (Judg.6.20, 7.1, 8.20, 9.1, etc.; 1 Sam.12.11).

Jerubbes'het (he that strives with shame—i.e. the idol), in 2 Sam.11.21, for Jerubaal.

Jeruel, Wilderness of. Jahaziel the Levite told Jehoshaphat that he should encircle the hordes of Ammon, Moab, and the Moabins (2 Chr.20.16). [BERACHAH.]

Jerusalem. (1) The Name. The conflict of authorities as to the Heb. derivation of the name of Jerusalem has been set at rest by the discovery of the Amarna cuneiform tablets, amongst which have been found letters from Jerusalem of a date posterior to that of the Heb. conquest of Palestine. The letters show that the name of the city in those days was Uru-Salim, "the city of Salim," or "the city of peace." This agrees with the rendering of Gesenius, "the abode of peace." Jerusalem may then be considered as the Heb. equivalent of the original early name, and it may be that in very early times the name was Salim only, as Jewish tradition places the Salim (Shalem) of Medehidekez at Jerusalem (Gen.14.18; Josephus, Ant. x. 2; 6 Wars x. 1). In Ps.78.6 we read "In Salem also was his covert, and his dwelling-place in Zion." The Canaanite inhabitants of Jerusalem, during the period before the Heb. conquest of Palestine, were called Jebusites, but the city itself was called Jerusalem (Judg.1.7-21; Jos. 15.1-12; 2 Sam.5.6). In two instances only is it called Jebus, and then it is also called Jerusalem (Judg.19.19; 1 Chr.4.4). After the Roman occupation, Jerusalem received the name of Aelia Capitolina from Adrian 15 A.D., which name it retained for several hundred years. After the Moslem occupation, about the 10th cent., it was called Bciti el-Mugaddas, "the holy house," and its modern name is el-Quds esh-Sherif, "the holy, the noble," amongst
the Moslems, and Jerusalem amongst the native Christians, the old name in the Arab form.

_The Position._ The Dome of the Rock is in lat. 31° 44' 45" N., long. 35° 13' 23" E. The modern city, though not so extensive, occupies generally the position held by ancient Jerusalem, and many existing remains in various parts of the city can be identified, with certainty, with records of the past. The outer wall of the Haram esh-Sherif ("the noble sanctuary"), except a portion to the N., is identical with the outer wall of the court of the Temples of the temple of Herod, and in the city itself may be found portions of the first wall of the Jewish kings, and part of the third wall built by or after king Agrippa: the position of the city of David, which is Zion, is known. The mountain range of Palestine, on which Jerusalem is situated, runs N. and S., parallel to the Jordan Valley and the Dead Sea, and Jerusalem itself is about 15 miles distant from the Jordan and 50 miles from the Mediterranean Sea. The range is from 2,500 to 3,000 ft. above the sea, at its highest points, and about 3,800 to 4,300 ft. above the Dead Sea. It is (about Jerusalem) composed of cretaceous limestone, with here and there a deposit of red clay on the surface. It is generally cut into by deep valleys and ravines that roads N. and S. are only practicable along the backbone of the country, or along the lower portions of the range on either side. There were no roads, but only tracks, in early days; and we first hear of chariots being used at Jerusalem in the time of king Solomon. Jerusalem stands on the broad crest of the range, on a spur running E., and all the valleys around it run into the Dead Sea; but there are valleys running into the Mediterranean immediately W. of the high land N.W. of the city. The hill country of Judah and Benjamin (the boundary which passes through Jerusalem) has few springs, and is not naturally fertile; but it has been made highly fertile by the hand of men. The red leamy deposit and detritus from the mountain sides has, in past ages, been washed by the rains to the bottom of the deep valleys, and has lain in narrow and deep bands of the richest soil—deeply cultivated by the early Hebrews and Pharaohs, and an account of the violent rush of water from above. By the labour of man this soil has been brought up, time after time, and stacked against the mountain sides in terraces, where it intercepts the annual rainfall and conducts it into the interstices of the mountains—thus increasing the capacity of the springs, and preserving the valley land from sudden denudation by cloud bursts and storm waters and these terraces are capable of the highest cultivation. Thus almost all the hill country of Palestine may be fertile or barren, according to the condition of the people and the form of government. If the people are industrious, and encouraged to improve the land, in peace and security, it becomes at once a land flowing with milk and honey; but if the terraces are allowed to fall into decay, the country relapses again into a condition only fit for nomadic tribes. In early days, when the country was covered with pastoral population, the natural springs were centres where the shepherds met together, with their flocks; and as civilization increased, these centres became the sites of rising townships. If, therefore, we seek for the remains of the earliest cities of the past, we must search for springs of water, near which we may find them. In later days, when the battering-ram had come into perfected use, other considerations affected the sites of cities. Although Jerusalem is spoken of at the time of David as in two parts, there is no information that there was more than one spring of water; and we may look upon the rising ground over the fountain of the Virgin as undoubtedly the site of Zion, the city of David. From the account of the early attacks on Jerusalem by Judah and Benjamin, it would appear to have been inhabited by both tribes (Jos.15.63,18.28; Judg.1.21); but the account of the boundary line (Jos.15.18-16) states that after passing En-rogel ("the Virgin's Fountain") it passed along the valley of the son of Himnom to the S. side of the hill, and then up towards Jerusalem in the border of Benjamin. Jewish traditions, however (Tahnud, Zebakim liii. 2; Yoma xii. 1), place the boundary S. of the inner court of the temple, E. and W., leaving Zion, the city of David, in Judah. This may have been owing to a rectification of the boundary due to the king of Judah or to the Roman Jews, and ravines that roads N. and S. are only practicable along the backbone of the country, or along the lower portions of the range on either side. There were no roads, but only tracks, in early days; and we first hear of chariots being used at Jerusalem in the time of king Solomon. Jerusalem stands on the broad crest of the range, on a spur running E., and all the valleys around it run into the Dead Sea; but there are valleys running into the Mediterranean immediately W. of the high land N.W. of the city. The hill country of Judah and Benjamin (the boundary which passes through Jerusalem) has few springs, and is not naturally fertile; but it has been made highly fertile by the hand of men. The red leamy deposit and detritus from the mountain sides has, in past ages, been washed by the rains to the bottom of the deep valleys, and has lain in narrow and deep bands of the richest soil—deeply cultivated by the early Hebrews and Pharaohs, and an account of the violent rush of water from above. By the labour of man this soil has been brought up, time after time, and stacked against the mountain sides in terraces, where it intercepts the annual rainfall and conducts it into the interstices of the mountains—thus increasing the capacity of the springs, and preserving the valley land from sudden denudation by cloud bursts and storm waters and these terraces are capable of the highest cultivation. Thus almost all the hill country of Palestine may be fertile or barren, according to the condition of the people and the form of government. If the people are industrious, and encouraged to improve the land, in peace and security, it becomes at once a land flowing with milk and honey; but if the terraces are allowed to fall into decay, the country relapses again into a condition only fit for nomadic tribes. In early days, when the country was covered with pastoral population, the natural springs were centres where the shepherds met together, with their flocks; and as civilization increased, these centres became the sites of rising townships. If, therefore, we seek for the remains of the earliest cities of the past, we must search for springs of water, near which we may find them. In later days, when the battering-ram had come into perfected use, other considerations affected the sites of cities. Although Jerusalem is spoken of at the time of David as in two parts, there is no information that there was more than one spring of water; and we may look upon the rising ground over the fountain of the Virgin as undoubtedly the site of Zion, the city of David. From the account of the early attacks on Jerusalem by Judah and Benjamin, it would appear to have been inhabited by both tribes (Jos.15.63,18.28; Judg.1.21); but the account of the boundary line (Jos.15.18-16) states that after passing En-rogel ("the Virgin's Fountain") it passed along the valley of the son of Himnom to the S. side of the hill, and then up towards Jerusalem in the border of Benjamin. Jewish traditions, however (Tahnud, Zebakim liii. 2; Yoma xii. 1), place the boundary S. of the inner court of the temple, E. and W., leaving Zion, the city of David, in Judah. This may have been owing to a rectification of the boundary due to the king of Judah or to the Roman Jews, and
JERUSALEM, FROM THE SLOPE OF OLIVET,

Showing the E. wall of the Temple Enclosure, the Golden Gate, the Dome of the Rock, the Citadel, Cathedral of the Holy Sepulchre, etc.
first siege mentioned in the Bible took place almost immediately after the death of Joshua, when Judah and Simeon fought against it and took it, but could not drive the Jebusites out—and they dwelt together in Jerusalem. They were subdued, and from this time (Judg. 1.8,21). For nearly four hundred years the Jebusites remained masters of the citadel, until David, who had reigned over Judah in Hebron for seven years, came against them, in his consolidation of the kingdom of Israel. The Jebusites (thinking that they were secure in their stronghold) scoffed at the army of Judah around them. Then David offered the post of chiefcaptainship of his army to the man who should get up by the gutter and smite the Jebusite. Joab succeeded in doing so. So David took the stronghold of Zion, which was then called "the city of David"; and he dwelt there, and built round about from Nillo. This citadel, Zion, was probably placed on the eastern hill, near to the spring of water, the Virgin’s Fountain, whence a secret passage cut in the rock leads on to the face of the hill above. David brought the ark into Zion, and (with the assistance of Heman and Jashar, etc.) raised the temple. The site of the Temple was chosen at the threshing-floor of Araunah the Jebusite. David was permitted to make preparations for it, but the building of it was entrusted to his son Solomon. Solomon (who began to reign c. 1017 B.C.) was seven years building the temple, and he also built his palace, and the house of the forest of Lebanon, and Millo, and the walls of Jerusalem, and three fenced cities. For this purpose he raised a levy of 30,000, employed month by month in Lebanon, and he had 150,000 labourers and hewers in the mountains; and the officers over all numbered 3,300. Solomon’s "ascent" to the temple aroused the astonishment of the queen of Sheba (1K.10,5). After the revolt of Israel from Rehoboam, Shishak, king of Egypt, came up against Jerusalem, and took away the treasures from the temple and from the king’s house, and the shields of gold that Solomon had made. And he brought of the golden shields of brass in Jerusalem, and gave them in charge of the guard at the door of the king’s house. In the reign of Asa, the Cushite king Zerah of Ethiopia invaded Palestine with an enormous host, and threatened Jerusalem (c. 943 B.C.). Asa, trusting in God, went boldly out to meet them; and they were smitten and the Ethiopians fled (2Chr.14,13). Then Asa, with Judah and Benjamin and with strangers from Israel, made a covenant to serve the Lord of their fathers, and to put away the idols, and renew the altar of God. But in three years (c. 940 B.C.) Asa put this covenant on one side, and took treasure out of the house of the Lord and the king’s house, to the help of Benhadad, king of Assyria, against Baasha, king of Israel. In the reign of Jehoram (c. 886 B.C.) Edom and Libnah revolted, and separated from Judah. The Philistines and Arabians came up against Jerusalem, sacked the king’s house, and carried off all his sons except Ahaziah. Ahaziah’s mother was Athaliah (c. 869 B.C.), and his mother (queen Athaliah) arose and slew all the seed-royal of the house of Judah, and usurped the throne of Judah. But Joash, the young child of Ahaziah, was saved from among the slain, and hidden in the temple for six years. In the seventh year there was a great ceremony in the temple, and the Levites came up around from Judah and Benjamin, and Joash was proclaimed king, and made a covenant to do right; and queen Athaliah was slain. In the reign of Amaziah (c. 839 B.C.), Jehoash, king of Israel, marched on Jerusalem, and captured Amaziah and all the gold and silver in the temple and in the king’s house, and carried them back to Samaria, and he broke down the wall of Jerusalem from the gate of Ephraim to the inner gate, 400 cubits. Uzziah (c. 810 B.C.) repaired the walls of the city, and built towers at the Corner Gate, Valley Gate, and at the turning of the wall. He made engines, invented by cunning men, to be placed on the towers and bulwarks, to shoot arrows and great stones. He had 300,000 fighting men, and warred successfully against the Philistines and Arabians. Joatham (c. 756 B.C.) built the High Gate of the temple, and on Ophel, the citadel of the temple, he built much. In the reign of Hezekiah (726 B.C.) the advance of the Assyrians made the preparations for the defences of the defence of Judah and Jerusalem. Shalmaneser IV. of Assyria took Samaria (721 B.C.), and carried Israel captive into Assyria, and re-peopled the country with people from Cuth (the Samaritans of after-times). Eight years after (713 B.C.) Sennacherib, king of Assyria, took city after city from Judah, and laid Hezekiah under a heavy tribute of silver and gold, which had to be taken from the temple and the king’s house. Three years after, Sennacherib sent a great host of Assyrians against Jerusalem, with threats of taking Judah into captivity; but Hezekiah humbled himself in the house of the Lord, and asked advice of the prophet Isaiah. At this time occurred the disaster which overtook the Assyrian on the frontiers of Egypt, and Sennacherib and his host retired in haste to Assyria. Manasseh (698 B.C.) began his reign at 12 years of age, and reigned 55 years, and did evil, making altars for Baal, and for Asherah, and for the host of heaven. And the king of Assyria came against Judah, and carried away Manasseh captive to Babylon. But there he humbled himself greatly before the Lord, and was brought to his kingdom at Jerusalem. Then he knew that the Lord was God. On his return he built a wall without the city of David, on the west side of Ophrah, in the valley, even to the entering in at the Fish Gate, and compassed about Ophel, and raised it up a great height. After the death of Amon, Josiah (grandson of Manasseh) succeeded at 8 years of age (641 B.C.), and he reigned well 31 years. At the age of 16 he began to seek after God, and purged Judah and Jerusalem from the high places and groves. During his reign the law was discovered in the temple. And as Necho, king of Egypt, went through Palestine to fight against Charchemish by Euphrates, Josiah went out against him and was slain. The king of Egypt muleted Judah of a heavy fine, and made Gedaliah king (c. 605 B.C.), and his son Nebuchadnezzar, king of Babylon (607 B.C.), and carried him in fetters to Babylon with
the vessels of the Lord's house. Jehoiachin
(his son) reigned a few months, and was
also carried to Babylon, and Zedekiah (his
brother) was made king over Judah by the
king of Assyria (599 B.C.). He rebelled against
Nebuchadnezzar, and the king of the Chaldees
came and slew the people, old and young, and
took all the treasures of the house of God to
Babylon, and burnt the house of God and also
the palaces, and broke down the wall of Jeru-
salem, and the land was left desolate and kept
sabbath to fulfil 70 years. It is related (2
Mac. 2:4) that the prophet Jeremiah carried
away the ark, and the tabernacle, and the altar
of incense, and hid them in a cave in mount
Nebo, E. of Jordan. The 70 years' captivity
are reckoned to commence from 606 B.C., when
Judah became tributary to Babylon, in the
reign of Jehoiakim. In 586 B.C. the remnant
of the Jews about Jerusalem fled to Egypt, and
Jerusalem was left without inhabitants. In 574
B.C. the prophet Ezekiel, at the river Chebar,
Babylonia, in a vision saw the restoration of
the temple of Jerusalem, an account of which
is given in the book of Ezekiel. In 561 B.C.
(2K. 25:27) Evil-merodach, king of Babylon,
lifted up the head of Jehoiachin, king of Ju-
dah, out of prison, and spake kindly to him,
and gave him a daily allowance for the re-
mainder of his life. In the first year of Cyrus,
king of Persia (536 B.C.), who had recently cap-
tured Babylon, the welcome edict was issued
commanding the restoration of the exiled
Hebrews to their native land. The number
which assembled under Zerubbabel, the de-
scentant of their kings, the grandson of the
hereditary high-priest, were 42,360. On their
arrival they restored the worship of God, the
altar was set up, the feasts re-established, and
the first stone of the temple laid amid the joy-
ful acclamations of the multitude, but the tears
of the old men who had seen the first house.
Whilst the temple was being built, unexpected
difficulties were caused by the Samaritans,
who wished to unite in common worship with
the Jews, and used their influence in the
court of Persia to delay the advancement of
the building. It was not till the second
year of Darius (520 B.C.) that the building
of the temple was recommenced, and in 5
years it was completed (515 B.C.). But
there were absent the ark, the prophetic
Urim and Thummim, the Shechinah (or divine
presence), and the celestial fire on the altar.
In the reign of Artaxerxes (457 B.C.) a second
migration of Jews took place from Babylon to
Jerusalem under Ezra, who was invested with

JERUSALEM.
Plan of site and walls of modern city.
from the mixed multitude. After this, Nehemiah governed Judaea till 432 B.C. After the return of Nehemiah to Persia, affairs soon fell into disorder, and this was accentuated (409 B.C.) by the defection of Manasses, son of the high-priest, who married a daughter of Sanballat, and became high-priest of a rival temple on the mountain of Gerizim. During the wars between Greece and Persia the government of Jerusalem fell into the hands of the high-priests, until the time of Alexander the Great (332 B.C.), who (after demolishing Tyre and Gaza) demanded the surrender of Jerusalem. But the anger of Alexander was averted by the timely action of Jaddua, the high-priest, who (with his priests) went forth to meet Alexander, and conferred with him. Alexander entered Jerusalem (it is said) and accorded to the Jews certain privileges. After the death of Alexander (323 B.C.), Palestine was seized by Ptolemy Soter, king of Egypt, and many Jews were carried to Alexandria and settled there. In 314 B.C. Antigonus of Syria seized Palestine, and in 307 B.C. it again reverted to Ptolemy. It was again seized (203 B.C.) by Antiochus of Syria. After many vicissitudes, one of which was the campaign of the Maccabees (Hasmoneans), of priestly descent, from Modin in Palestine, who (by their lofty patriotism, valour, sagacity, and self-devotion for many years) made the name of the Jews famous amongst nations. The battles of the Maccabees were fought on the outskirts of the country, and it was not until the retreat of Lysias, the lieutenant of Antiochus Eupator, that they ventured to Jerusalem, where the temple was reconsecrated, and the worship of the Lord renewed (165 B.C.). The citadel of Jerusalem was still held by the soldiers of Antiochus. Then an army, with the support of the Maccabees (Hasmoneans), of priestly descent, from Modin in Palestine, who (by their lofty patriotism, valour, sagacity, and self-devotion for many years) made the name of the Jews famous amongst nations. The battle of the Maccabees was fought on the outskirts of the country, and it was not until the retreat of Lysias, the lieutenant of Antiochus Eupator, that they ventured to Jerusalem, where the temple was reconsecrated, and the worship of the Lord renewed (165 B.C.).

In 161 B.C. Jonathan succeeded his brother, and in 141 B.C. Simon, another brother, freed the Jews from foreign rule, and the Macedonian garrison evacuated the citadel to the N. of the temple. The rock on which it stood was then reduced in height (13 Ant. vi. 7), so that it did not dominate the temple, and a tower (the Baris) was built alongside the temple wall at the N.W. corner, where Simon and his followers resided (1Mac.13.52). John Hyrcanus succeeded his father Simon, and he took further steps to secure the safety of the city. Then Antiochus Sidetes, king of Syria, besieged Jerusalem, but gave it up again, on obtaining hostages and a tribute. In 107 B.C. Aristobulus succeeded his father (John Hyrcanus), and ruled both as high-priest and king of the Jews. After the death of Alexander Jannaeus (105 B.C.), who succeeded him, was much engaged in wars outside Jerusalem; c. 95 B.C. the Pharisees and Sadducees caused great disturbances with their animosities, and the severity with which Alexander treated them made him so unpopular with both parties that they called in the aid of the king of Syria. After much fighting, Alexander was surprised at Panopolis by the army of Eupator, and was crushed out all further opposition by his extreme severity, until 79 B.C. when he died. His two sons (Hyrcanus and Aristobulus) quarrelled (69 B.C.). The former called in the assistance of Aretas, king of Damascus, and Aristobulus took refuge within the fortifications of the temple. Then Scæurus, the lieutenant of Pompey, interfered, and Pompey himself (65 B.C.) advanced from Damascus by way of Jericho on Jerusalem. Aristobulus went out to greet Pompey, with a large sum of money; but he was thrown into chains, and Hyrcanus opened the city gates to the heir- ers of Aristobulus in the temple resisted, and underwent a siege from the N. After an obstinate resistance for 3 months, Pompey became master of the temple, demolished the walls of the city, and laid a tribute on it, and continued Hyrcanus as high-priest, without the title of king (63 B.C.). Jerusalem was afterwards (or Sanhedrim) of the Jews, 56 B.C. In 54 B.C. the rapacious Crassus pillaged the temple, and took the contributions of the Jews throughout the world (10,000 talents). Herod, the son of Antipater, made his first appearance at Jerusalem, as procurator of Judea, by order of the Senate; but a Parthian army, with Antigonus, son of Aristobulus, suddenly appeared, overpowered Hyrcanus, overpowered Herod, and proclaimed Antigonus king. In 3 months Herod returned from Rome as king of Judea, and (39 B.C.) appeared before Jerusalem with a Roman army, under Silo, pitching his camp to N.W. of the city. The siege was raised, and again renewed with a larger army of over 50,000 men, and the city capitulated 36 B.C. Herod put down the Hasmonean (or Maccabaean) party with a firm hand. Cleopatra visited the city 34 B.C., and there was a serious earthquake 31 B.C. Herod now encouraged foreign practitioners to use their skill in the city, and built a theatre. He built the Antonia, N. of the temple, and greatly strengthened Jerusalem by the three great towers Hippicus, Phasaeus, and Marianne at the western end of the first wall, and there he also built his palace (15.4 Int. viii. 5; 5 Wars iv. 3). At the Passover, 19 B.C., he announced to the people his intention of rebuilding the temple, and completed the work in 3 years. The great courts and cloisters, however, were not completed till 9 B.C. He died 4 B.C., and was succeeded by Archelaus. When Tiberius commenced his reign a new procurator was sent to Jerusalem, Val. Gratus, who held office till 26 A.D., when he was replaced by Pontius Pilate till 35 A.D. In 40 A.D. P. Petronius arrived in Jerusalem, with an order to place a statue of Caligula in the temple; but this was not carried out. With the accession of Claudius (41 A.D.) came an edict of toleration for the Jews. On the death of Herod, began the building of a massive new city wall on the N. side of the city c. 43 A.D., to protect the buildings beyond the old second
Jerusalem; but he was not permitted to complete it, and it was continued subsequently with smaller stones (3 Wars iv. 2). His son (king Agrippa) built a palace in the upper rooms of the Styxus, 56 A.D., and the temple courts were completed 64 A.D. Jewish discontent led to revolt against Rome (after the death of Agrippa), and Cestius Gallus, president of Syria, having retreated in panic from the walls of the city, it only remained for the emperor Vespasian to re-establish Roman power in Palestine. Titus, with his army, arrived before Jerusalem 70 A.D., on the day of the Passover; on account of which festival Jerusalem was densely crowded with visitors, to the number of 600,000, according to Tacitus (Hist. v. 13). The Jewish army consisted of 8,400 Zealots, under John of Giscala and Eleazar, holding the temple courts and Antonia, with 10,000 Jews and 5,000 Idumeans under Simon Bar Giorias, who held the outer and second wall, his headquarters being Herod's palace near Phasaelus—in all about 25,000 men—quite sufficient, if they had been united under one head, to have held the city. The limited extent of the defences of Jerusalem against the Roman force brought against them. The army of Titus consisted of 4 legions and auxiliaries, amounting to about 36,000 infantry and 4,000 cavalry. After making his preliminary arrangements, Titus commenced the siege on April 1, 70, and on the 11th day the various attacks were counted. On the 15th day the outer wall of Agrippa was taken from the W., and on the 20th day the second wall was also taken from the W. Banks were now raised against the Antonia and against the first wall, close to the tower Hippicus. Against this latter point no progress was made, and the advance was made through the Antonia. The banks were raised by the Romans and destroyed by the Jews time after time, until the Antonia was taken by surprise on the 72nd day. In the meantime (on the 44th day) a wall of circumvallation was made round the city to cut off communications from the W. and E., and to prevent the escape of fugitives. The daily sacrifice failed on the 84th day. The attack was now made on the N. wall of the temple courts, and between the 80th and 85th days the Jews and Romans alternately burnt the N. and W. cloister. On the 104th day the engines battered the inner temple courts, and on the 105th day the temple was burnt and the lower city plundered. On the 131st day the upper city was taken and burnt, and the order given for the destruction of the walls of Jerusalem. The captives taken amounted to 95,000 (6 Wars iii. 3), the city was left desolate, and the Roman army moved down to Caesarea. The number of persons killed during this siege is said by Josephus (ibid.) to have amounted to over one million. After the desolation of Jerusalem by Titus it disappears from history for 50 years, and little is known of it until the time of the pretended Messiah, Barcocheba (135 A.D.), who at the head of a large force of Jews revolted against Rome, and occupied the ruins of Jerusalem. It required a strong force of Roman troops to bring the revolt to an end, and it is stated that 80,000 Jews perished by the sword, and that Judea was desolated. Jerusalem emerged out of obscurity (136 A.D.) when the emperor Adrian gave it the name of Aelia Capitolina, and raised up a new city, where temples were found to burn under pain of death. The more peaceful Christians were permitted to establish themselves within the walls, and Aelia became the seat of a flourishing church and bishopric.—Christianity Established. At the beginning of the 4th cent., from motives of state policy, the Christian religion was established in the Roman empire, and Jerusalem became a centre of interest to the head of the Christian Church, the emperor. In the year 326 A.D. the empress Helena, with her son Constantine the Great, visited the Holy City. The shrine of 'Astarte, which occupied the site of the present Holy Sepulchre, was swept away, and history relates that (on excavating below the foundations of the shrine) the sites of the Crucifixion and of the Holy Sepulchre were found, and buildings were erected over them. The Jews were now permitted to visit Jerusalem once a year to lament over the site of the temple. In 362 A.D. the emperor Julianus, who had been assassinated, gave permission to the Jews to rebuild the temple but they failed in doing so. During the 4th and 5th cents., Jerusalem was a centre of attraction for pilgrims, and after the Council of Chalcedon (451–453 A.D.) it became an independent patriarchate. In 529 A.D. the emperor Justinian founded a splendid church on the site of the present Mosque el-Aksa. In 614 A.D. the city was attacked and taken by the Persian monarch Chosroes II., and after a struggle of fourteen years the imperial arms were again victorious, and in 628 A.D. the emperor Heraclius entered Jerusalem.—The Moslems. Mohammed commenced his successful career of conquest 630 A.D., and at first was inclined to consider the Jewish shrine at Jerusalem as the Moslem qiblah (i.e. direction in which to turn for prayer); but owing to some defection of his Jewish followers he suddenly at the Qiblatain (c. 625 A.D.) veered round and made Mecca the point of isiration by which the Moslems were to indicate the direction of their prayer. However, during conflicts between the Arabs and Syrians, Jerusalem has again been chosen as the temporary principal qiblah of the Moslem faith. During the reign of Heraclius, the successors of Mohammed continued to expand the Moslem empire, and the Khalif Omar, with his houng, swept over Syria and Palestine, and in the year 637 A.D. captured Jerusalem from the patriarch Sophronius. Omar visited Jerusalem, and allowed the Christians various privileges and the use of their shrines, and he and his successors built the Qubbat es-Sakhrab ("the Dome of the Rock") over the protruding stone which was judged to be the Holy Place of the Jewish worship. This qubba is in the form of a magnificent waxy, oratory, or tomb, after the Moslem conceptions, and exists to the present day. With the fall of the Abassides of Baghdad (909 A.D.), the city passed into the hands of the Fatimite conqueror Muez, whose capital was Cairo. Under the sway of this dynasty the Christians suffered very great privations and wrongs, which culminated in the reign of the mad Khalif el-Hakim (1010 A.D.), under whose orders the Holy Sepulchre was burnt down. It was, however, soon rebuilt.
THE ENVIRONS OF JERUSALEM

Biblical names: Bethlehem
Modern names: Beit Lahm

P. 402]
In the year 1072 A.D. hordes of Turkomans, Kurds, and Seljuks swept over Palestine and occupied Jerusalem. —The Crusades. The suf- fering of the inhabitants under the factions of the Crusaders attracted the attention of the Sultan Al-Nasir and some of the Seljuks so excited the sympathy of those of Western Europe (1094 A.D.), that Peter the Hermit, when he commenced to preach a crusade after his return from Palestine, had no difficulty in raising a rabble army, which marched through Europe into Asia but did not reach Palestine. Owing to the factions and want of cohesion of the Moslems, subsequent armies of the Crusaders gained possession of the Holy City, and held it with varying success for about 100 years, until the time of Saladin, when they were compelled to withdraw (1187 A.D.). Jerusalem was nominally annexed to the kingdom of Sicily, 1277 A.D. It passed under the sway of the Ottoman sultan Selim I., whose successor Suleiman built the present wall, 1542 A.D. Mohammed 'Ali, pasha of Egypt, took possession in 1834 until the Fellahin rose up and seized it in 1840. After the bombardment of Jerusalem by the Turks in 1860, the city was again governed by the Sultan's representative. —(3) Topography. Waters of Jerusalem. The spur on which the city stands gradually rises to N.W., and narrows until (at a distance of a mile from the city wall) it is only 200 yds. wide; it then broadens out again, and continues as high land in the direction of Kulo- niah and Lifta. This rise is well seen in the approach from the Fountain of Gihon, which has been used for water a great distance as the walls of Jerusalem do not delimit the city; (ii) the water falls down the westerly conduit from Jerusalem, was diverted easterly, and brought into the city to N. of the first wall, and stored in the great pool outside the second wall (Amygdalon of Josephus), the present pool of Hezekiah. Whether there was any overflow from this down into the Tyropoeon Valley we have at present no evidence. (iii) The surface waters of the high ground N.W. of the city, which were brought into the city before the time of Hezekiah by the conduit of the fuller's field, still continued to be brought in after he had concealed the other waters from the Assyrian — the remains of the conduit is to be found at various points in the Russian Hospice; and have not been part of Hezekiah's work. (iii) The gathering of the waters N. of the Damacus Gate and bringing them into the temple by the surface duct now leading into the pool Struthion (at the Convent of the Sisters of Zion), N. of the Antonia, or by a subterranean channel through the royal caverns and under the Antonia. (iv) The stopping of the upper water-course of Gihon, from the upper pool somewhere N.W. of the city, and bringing it down along the Tyropoeon Valley, instead of permitting it to overflow through the midst of the land. This water was probably led down to Siloam along the great rock-cut passage or aqueduct discovered under the street W. of the city wall. Below the level of the Virgin's Fountain there is a far larger area from which waters can be collected about Jerusalem: so that the waters issuing from Bir Eyüb, and lower down the Kidron Valley, may have been voluminous in wet seasons. To carry these waters off undamaged from an enemy outside, secret ducts would be required; and these were discovered and followed for about a mile along the valley below Bir Eyüb in 1869-1870. The exact method by which
the springs to the N. of the city were stopped, and the waters gathered together, must remain a matter of conjecture until the old ducts and tunnels are discovered; but we have certain knowledge that in very early days such work was carried out not only in India and Syria, but also in Jerusalem itself. Witness the rock-cut passages up to Zion, and that leading from the Virgin's Fountain to Siloam. Also the extensive system of water ducts tunnelled through the rock to collect waters for the pools of Solomon, near Ur-\(\text{a}\).—The Citadel. The Akra (अकरा). In considering the topography of Jerusalem, too much stress must not be laid upon the assumption that the term Akra, with the definite article, means one particular spot throughout history. The Akra means nothing more than "the citadel", and the term "the citadel" may mean only the stronghold, or tower, or last resort of one particular portion of a fortress; and in the siege of a large fortified place, several points in succession may become the citadel, or stronghold. There may have been citadels to different sections of Jerusalem in the time of Josephus. At the close of the siege of Jerusalem he speaks of Titus having taken all Jerusalem except the upper city (6 Wars vii. 4), and that on bringing his banks against the walls of the upper city, the seditious retired into "the citadel" (the Akra), by which he clearly means the stronghold about Hippicus and the royal palace, in the upper city. Yet elsewhere he says that the citadel (the Akra) sustains the lower city on the eastern side (5 Wars iv. 1); and again he states that the citadel, or city of David, was the Akra in the time of David (7 Abt. iii. 1). Evidently Josephus spoke of "the Akra" as we should speak of "the citadel" at the present day. The traditional site of the Akra of Josephus, assuming that there was only one, is on the hill immediately N. of the upper city, and W. of and nigh to the temple. This site has been accepted by many writers as the only solution of the topography under the circumstances; but the present writer is now satisfied that the term "the Akra" cannot be confined to one spot only, and that it changed with the times. At Jerusalem the term "the citadel" was first applied to the stronghold of Zion; then, when the temple was built, and the rock N. of it was crowned with towers, that rock became "the citadel"; when this rock was partially removed, the Baris, or tower attached to the N.W. of the temple court, became the citadel (1 Mac. 13.52); then, again, the Antonia; and lastly, when the temple was captured, the great towers about Hippicus in the upper city became the citadel.—The Position of Zion. 2 Sam. 5.7 and 1 Chr. 11.5 fix Zion as the city of David, the castle or stronghold, the Akra captured by king David. Zion was a castle of some capacity, for David's wives lived there, his wives lived there, and part of the place was sacred as the abode of the ark and place of worship of the people, and the royal sepulchres were near. The position of Zion is indicated by the position of the shaft on the hillside, S. of the temple, which leads down to the Virgin's Fountain. After the building of the temple by Solomon, there was a transfer of residences; and Zion was no longer the place of worship, or the house of the king, or of his wives. The rock N. of the temple became the citadel, and it seems probable that the name of Zion and the city of David may gradually have been transferred to this rock. Mount Zion "on the side of the N., the city of the great king" (Ps. 48.2). Certainly in the time of the Maccabees the rock N. of the temple was the city of David (1 Mac. 1.32, 2.31, 7.32, 14.36), and the rock and the temple mount was Mount Zion (1 Mac. 4.37-60, 5.4, 6.18, 62, 7.33, 10.11, 14.27).—The Position of Millo. [Millo.] Whether the word Millo is derived from an archaic Jebusite word or from a Heb. root signifying a "filling," it is evidently used in the Bible to denote some rampart, mound, or citadel in or about Jerusalem, but not necessarily the same work throughout all time. The first description of Millo is the stronghold, or tower, or Millo, as Omri, a tower or tower, but at a different period; and both words may have the signification of the citadel or stronghold. King David built round about Millo and inward (2 Sam. 5.9; 1 Chr. 11.8). Josephus (5 Wars iv.), in speaking of the first wall on the N. extending from the tower Hippicus to the council house in the W. cloisters of the temple, states that it was built very strong, because David and Solomon and the following kings were very zealous about it. So strong it was in the time of the Romans, that Titus failed to make any impression upon it with the battering-ram (5 Wars ix. 22; 6 viii. 1); and when he had captured the temple through the Antonia he preferred to exert his engines on the E. side of the upper city, to attacking any further the N. wall. In the absence of every other clue, this N. wall and filling may have been the Millo of the time of David. The great works of Solomon were his house, the Millo, the walls of Jerusalem, and the walls of three fenced
cities (1 K. 9.15, 24, 11.27), and the temple and its stupendous substructures on E., W., and S., also the walls on the high rock immediately N. of the temple, which had been in connexion with the site of the Antonia, and is now the residence of the Turkish pasha. The Millo of Solomon may have been the great substructures of the temple platform; but it must probably was the fortification of the rock which dominated the temple to the N., and was its chief defence. King Hezekiah repaired Millo in the city of David, and as this was done to resist the battering-ram of Sennacherib, the king of Assyria, the Millo of his time must have been on the N., probably the northern defence of the temple, called "the city of David" because the kings had now made it their official residence. King Josiah was slain in the house of Millo that goeth down to Silla (2 K. 12.20; 2 Chr. 24.25), probably in the citadel N. of the temple; but to the meaning of Silla there is no clue.—Solomon's Palace. By common consent the palace of Solomon is assumed to have been erected to the S.E. of the temple, at the S.E. corner of the mount Moriah. Ophel, or "the Stables." But Solomon built more than one house at Jerusalem, and as no other kings are stated to have built houses, it may be assumed that throughout the history of the kings, the royal palaces used by them were built by king Solomon. There are many inferences in the history of Israel which the historian is given to the residences of the kings, and from them it may be conjectured that in the S.E. angle were located Solomon's own house and the house of Pharaoh's daughter, in a part which was not holy, and which in after-times became the outer court of the Gentiles (2 Chr. 8.1; 1 K. 7.5). Here probably the queen of Sheba visited Solomon, and here queen Athaliah resided during the time of her usurpation of the throne; and here probably the king received strangers and deputations from foreign countries; and it was probably from this palace that king Ahaz took his royal guests when he went in procession to worship through the eastern porch of king Solomon (2 K. 16.18). But we must look to the N. side of the temple for the palace of the king, in connexion with matters of state and for purposes of war. There we shall find the house of the forest of Lebanon, the armoury, the porch of the throne, the king's seat of judgment, the courts of the guard and of the prison, the king's high house, and other places mentioned in the Bible in connexion with the king or governor and head of the army, and as the Lord's anointed (1 K. 8; 2 Chr. 8).—The Position of Ophel, i.e. the Millo of Solomon, the city of David, of the kings and of the Maccabees, the Acre of Jerusalem. The Ophel of the Bible (2 Chr. 27.3, 33.14) has been assumed to be identical with the Ophel of the time of Josephus, and has been located by common consent to the S. of the noble sanctuary, on the eastern hill, near to the fountain of the Virgin. There is no evidence to show that it was to the southward of the Ophel that the temple of Josephus fixes Ophel at the S.E. angle of the outer court of Herod's temple (5 Wars iv. 1); but in other passages (5 Wars vi. 1; 6 vi. 3) he would appear to place it along the E. side of Solomon's porch, as far N. as the temple extends. In the time of Nehemiah it was the place where the Nethinim lived, and is spoken of in connexion with the outer Gate eastward, the tower which lieth out, and the House which, were to the E. of the temple. The meaning of Ophel is "a bulge or swelling," and in later days "a tower," and the only great bulge to be found around the temple is the high rock forming the citadel to N. of the temple—the Millo of Solomon, the city of David, of the kings and of the Maccabees. At the time that the battering-ram was being fast brought to perfection (700 B.C.), the citadel N. of the temple became more and more important, and constant building must have been necessary to keep pace with the improvement in the ram and other war machines. It is probable that the kings of Judah would have devoted their energies to the northern defences of the city where the ram could be brought into use, and not to building towers S. of the temple. When therefore it is stated that Jotham (753 B.C.) built much on Ophel, and that Manasseh (677 B.C.) compassed Ophel with a wall "from the S. gate to the corner gate, and from the corner gate to the N. gate," it may be sure that this great work on Ophel was carried on at the citadel of the temple. Josephus states (9 Wars xi. 2) that these two kings built very great towers in Jerusalem.—The Armoury. The armoury of king David was probably a portion of the city of David S. of the temple. The armoury of the temple was attached to the house of the forest of Lebanon (1 K. 10.16, 17). Here he placed 500 targets of beaten gold. The targets were uncovered when the king entered the temple by the N. gate. Hezekiah showed the house and armoury to the messengers of Merodach-baladan (1 S. 39.4). Nehemiah repaired part of the city wall against the armoury (3.19). The court of the prison and the tower which lieth out were to the king's high house (Ne. 3.25). There were also stocks in the High Gate of Benjamin nigh to it (Jc. 20.2, 37, 31, 32; 38.13, 25; Zech. 14.10).—Topography of the Book of Nehemiah. In this book both the plan of the buildings and of the dedication of the walls, the gates and towers are mentioned in consecutive order, according to locality; so that there are most valuable indications as to their positions (Ne. 3). The outer wall only is mentioned. The first wall on N. is not mentioned, because it did not require repair. Commencing from the extreme N.E. point of the wall, N.E. of the temple, there is the Sheep Gate, close to the Birkeet Israil, the traditional site of the piscina probatica (Jn. 5.2), then the High Gate leading to the king's house, and the Gate of Benjamin at the ascent to the armoury. Here the citadel (Akra, Ophel) projects to N., with the flanking towers of Meah and Hananeel to E. and W. From here the second wall commences with the Fish Gate (2 Chr. 33.14), leading over to Olivet and Jericho at the eastern end. This wall faced to N., and stretched over the deep Tyropoeon Valley. From here the cliff reached the high ground leading to Scopus. Here was the Corner Gate, or old gate with towers, built by Azaziah (2 K. 14.13; 2 Chr. 26.9; Zech. 14.10). At the corner the wall
turned due S., along the high ground, for about 300 yds. or more. This is the wall broken down 400 cubits by Jehoshah, king of Israel (2 Kings ix. 11). The wall now bent due W. for about 300 yds., along the edge of the broad valley behind it. At the inner bend was the gate of Ephraim, leading out of the city to the N. road. The remainder of the wall for about 200 yds. faced due W., and joined the first wall at the gate Gennath (5 Wars iv. 2), about 100 yds. from the tower of the furnaces, where the tower Hippicus afterwards stood. In front of this was the Great Pool, now called the pool of Hezekiah: and it was against this portion of the wall that Titus successfully brought his battering-rams in taking the second wall. This second wall must have been erected after the building of the temple, when the suburbs of the city had increased considerably. Proceeding S. from the tower of the furnaces was the Valley Gate, leading W. and S., perhaps near the Jaffa Gate, the wall then ran nearly due S. for 1,000 cubits (about 600 yds.), when it bent to E., at the Dung Gate, Bethso, or gate of the Essenes (5 Wars iv. 2), and thence it continued to the Fountain Gate near the pool of Siloam, where were the steps leading up to the city of David. The wall bent at the old pool, leaving it outside, and bent again at Siloam, so that here the two faces of the wall were opposite each other, with the pool between; and here was the gate between the two walls (2 Kings 25:1; 1 Chron. 16:1) and the king’s garden. Then the wall bent round the swell of the eastern hill, by the stairs that go down by the city of David and the palace of Monobasus. It then went by the sepulchres of David (Ne. 3:16), and thence by the pool that was made to the house of the mighty. The two places last mentioned are uncertain. The remainder of the description of the wall refers to the E. wall of the temple and the sepulchre of David. The armoury at the turning of the wall was probably on the citadel. The houses of the priests, the tower which lieth out near the court of the prison, Ophel, the residence of the Nethinims, the Horse Gate, Miphkad, were all E. and N.E. of the temple enclosure—The Sepulchre of David. It was on Zion, the city of David—within the walls, because the high-priest Hycanus (when besieged by Antiochus) opened the sepulchre to get treasure. King Herod also opened the sepulchre, and is said to have placed at the mouth a marble monument (7 Ant. xv. 3; 13 viii. 4; 16 vii. 1). "His sepulchre is with us to this day" (Ac. 2:26). It is said to have fallen in ruins at the time of Hadrian (Dion Cassius, lix. 14). The sepulchre is likely to be situated on the eastern slope of the hill, to the S. of the Virgin’s Fountain.—Pools and Conduits. The Birket es-Sultan, situated in the Wād Dāmm, on the W. side of the city between the S. of the Jaffa Gate, is said to have been constructed as late as the 12th cent., and may be left out of account. The Birket Mamilla, the pool of Hezekiah, the pool of Siloam and old pool have already been referred to. The Birket Israel (on the N.E. of the Noble Sanctuary) was, possibly, "the pool that was made" (Ne. 3:16); but it has had extensive filling in all round it since early days. It stands in a deep ravine at the N.E. angle of the temple, and is probably the piscina probatica, near the Sheep Gate. The pool Struthion (5 Wars xi. 4), situated to the N. of the Antonia, is now a double arched tank, under the Convent of the Sisters of Zion. The secret passage, Strato’s tower, leading from the Antonia to the temple, was discovered in 1867. The most ancient rock-cut passage is that leading from the vicarage of Christ Church, leading from David’s Tower eastward, and the various channels bringing water from Etam into Jerusalem.—The Third Wall. This wall is mentioned by king Agrippa the tetrarch in 43 A.D., and was so strong and formidable a defence, that when it was about 15 ft. in height, the work had to be suspended for fear of Claudius Caesar. It was completed at a later date with smaller stones (5 Wars iv. 2). It probably occupied nearly the site of the present N. wall of Jerusalem; but there are indications of a wall some yards further to the N.W. At the N.W. angle stood the octagonal tower Psephinus, where now stands Qalat Jâhūd (Goliath’s Castle), on high ground running up towards Scopus, and just within the wall the site of the camp of the Assyrians. At the Damascus Gate are the remains of an old city gate, and to the E. there is a deep cutting through Bezetha, and the entrance to the royal caverns.—The Royal Caverns. These caverns, or quarries, extend under a great part of the hill Bezetha, and the floor is above the level of the platform of
Noble Sanctuary. It is supposed that the stones for the building of the temple were quarried here, and brought to the temple by a road cut through under the Antonia. The council house stood at the end of the N. wall, adjoining the temple cloisters; and at the same spot, close to the causeway (Wilson's Arch), stands the Mōkhama, or seat of the cadi, at the present day. The Xystus, or gymnasion (Josephus, 2 Wars ix. 3), occupied a position under the cliff E. of the upper city, and between the causeway and Robinson's Arch. The palace of Agrippa II., overlooking the inner temple court, stood at the N.E. angle of the upper city, S. of the causeway and above the Xystus.—The Holy Sepulchre. The traditional site of the Holy Sepulchre can be traced with certainty so far as the 4th cent. All evidence goes to prove that the present site is that which was recovered by the empress Helena and built over by Constantine. Eusebius, bishop of Caesarea, who wrote 311-338 A.D., was living in Palestine at the time of the recovery of the Holy Sepulchre, and was present at the dedicatory act of the temple at the restoration of the Holy Sepulchre. There can be no shadow of a doubt that the present site of the Holy Sepulchre is the same as that recovered in 326 A.D. Beyond there can only be conjecture. The site is, so far as can be judged, outside the second wall of the Roman period. There is reason to suppose that the site of the Christian temple has been designated amongst Christians concerning the true site: but all is conjecture. There is an enormous mass of literature on the subject; but as yet there are no convincing arguments against the existing site, or in favour of the alternative sites which have been proposed N. of the city, and just beyond the third wall. [c.w.]

Jerusha' (xK.15.33). Jerushah' (2 Chr.27.1), daughter of Zadok, and mother of Jotham, king of Judah.

Jesel'ah. 1. Son of Hananiah, and grandson of Zerubbabel (1 Chr.3.21).—2. A Benjamite, ancestor of Sallu (Ne.11.7).

Jesh'ah, a town mentioned with Bethel and Ephraim as taken from Jeroboam (2 Chr.13.19). Now the village Ain Sūnia (Clermont-Ganneau), 3 miles N. of Bethel.

Jesharelah' (1 Chr.25.14). [Asarelah.]

Jeshebeab', head of the 14th course of priests (1 Chr.24.13).

Jesh'or, son of Caleb ben-Hezron (1 Chr.2.18).

Jeshimon' (the waste; Num.21.20, 23.28; rSam.23.19, 24, 26; 1 Chr.23.1), the desert W. of the Dead Sea, visible from Písagah, and from Péor, both E. of that sea.

Jeshimé, an ancestor of the Gadites dwelling in Gilad in the reign of Jotham (1 Chr.5.14).

Jeshohai'ah, a Simeonite chief who took part in the raid of Gedor (1 Chr.4.36).

Jesha'-a, the son of Nun (Ne.8.17).—2. The correct form (R.V.) of the name Jeshua.—3. (2 Chr.31.15, where R.V. also has this reading; 2 Chr.3.36) = Jeshua'. Son of Jehozadak, first high-priest of the third series, viz. of those after the Babylonian captivity, and ancestor of the fourteen high-priests his successors down to Joshua or Jason, and Onias or Menelaus, inclusive. [High-priest.] Jeshua, like his contemporary Zerubbabel, was probably born in Babylon, whither his father Jehozadak had been taken captive while young (1 Chr.6.15, A.V.). He came up from Babylon (in the first year of Cyrus) with Zerubbabel, and took a leading part with him in the rebuilding of the temple, and the restoration of the Jewish commonwealth (Ezr.2.6ff.; Hag. 1.12, 14). Besides the great importance of Jeshua as an historical character, from the critical times in which he lived, and the great work which he accomplished, his name Jesus, his restoration of the temple, his office as high-priest, and especially the two prophecies concerning him in Zech.3 and 6.9-15, point him out as of especial interest. Head of a Levitical house, one of those which returned from the Babylonian Captivity, and took an active part in the restoration. The name is used either for the whole family or successive chiefs of it (Ezr.2.40, 3.9, 33; Ne.3.19, 8.7, 9.5, 12, 8, etc.).—6. A branch of the family of Pahath-moab, one of the chief families, probably, of the tribe of Judah (Ne.10.14, 7, 11, etc.; Ezr.2.6, 10, 30).

Jeshu'a, one of the towns re-inhabited by the people of Judah after the return from captivity (Ne.11.26). Perhaps the ruin S'aweh, E. of Beer-sheba. [c.r.c.]

Jeshu'ah, a priest, head of the 9th course in David's reign (1 Chr.24.11). [Jeshua.]

Jeshurun' (Deut.32.15, 33, 5.26; Is.44.2), used four times as a designation of Israel, all the passages being poetical. The etymology is obscure, but the form of the word seems directly to allude to the first four letters of "Israel," and possibly of the name of the people, "to be upright." It would thus denote the nation under its most righteous aspect, and accordingly Vulg. renders rectissimus. The termination is probably intensive, rather than diminutive, although at least one Gk. version translates Ἰσραήλιος (LXX. Ἰσραήλιον). The name seems to be used when the writer is idealizing Israel, or when he would blame them for their failure to attain the ideal. As Calvin says, "By using the name of the 'Upright' for Israel he censures in an ironic way those who had lapsed from uprightness." [f.s.f.]

Jes'iah.—1. A Kohite, one of the mighty men who joined David at Ziklag (1 Chr.12.6).—2. (1 Chr.23.13) = Je'siah. 2. Jesimel', a Simeonite chief at the raid on the Hamites in Hezekiah's reign (1 Chr.4.36).

Jesse' (yishay), son of Obed (Ru.4.18-22; r1 Chr.2.5-12); commonly, and even by his son David, designated "Jesse the Bethlehemite" (rSam.16.18, 17, 59)—but his full title is "the Ephrathite of Bethlehem's Judah" (17.12). He is an "old man" when we first meet him, with eight sons (16.10, 17.12), his wife having perhaps been first married to Nahash; her daughters Abigail and Zeruiah (rSam.17.25)
are called the sisters of Jesse's sons (1 Chr. 2:16). Jesse's wealth included a flock of sheep, under the care of David (1 Sam. 16:11, 17:34, 35). When David's rupture with Saul had finally driven him from the court to the cave of Adullam, "his brethren and all his father's house" joined him. Anxions for their safety, he took his father and his mother into the country of Moab, and deposited them with the king (22:1-4), and thereafter they appear no more in Scripture. While "son of Jesse" was a contemptuous term for David in his lifetime (1 Sam. 20:27, 22:7, 9, 25:10; 2 Sam. 20:1; 1 K. 12:16), the phrase "root of Jesse" is a Messianic title (Is. 11:1-10), which reflects dignity in later usage into the former term of contempt (Ps. 72:20; 1 Chr. 10:14, 29:26; Ac. 13:22), and is the origin of the "Jesse tree" of ecclesiastical art.

**Jesue** (1 Esd. 5:26), Jesu (1 Esd. 8:63) = **Jesu**a, 5.

Jesu (called Isu, Gen. 46:17; Ishuai, 1 Chr. 7:30; R.V. Ishbu), third son of Asher, whose descendants, the Jesuites, were numbered "in the plains of Moab by Jordan near Jericho" (Num. 26:41; cf. 63).

**Jesurun.** ([Hesurkun].)

**Jesu**, the Gk. form of Joshua, or Jeshua, a Hebrew form of Jesus (Greek Saviour).—1. (1 Esd. 5:5, etc.; 6:2, 9:16; Eccl. 49:12) = **Jesu**a, 4. — 2. (1 Esd. 5:5, 8:9, 4:8) = **Jesu**a, 5. — 3. **JOSUA son of Nun** (2 Esd. 7:37; Eccl. 46:1; 1 Mac. 2:25; Ac. 7:45; Heb. 4:8).

**Jesus, called Justus.** ([Justus, 3].)

**Jesus Christ.** Introduction. Since St. Paul's epistles, which interpret the Person of Christ in terms of Deity, are historically prior to the earliest gospel we possess, it follows that the latter was created within a community already convinced of Christ's divinity, and was read in the light of that presupposition. The Gospel can only be rightly appreciated when approached that way. Accordingly we accept the Pauline interpretation as the key to the narrative. "The value of St. Paul's record is not impaired by the consideration that he never saw Jesus in person" (A. Neumann, Jesus, p. 5). He was intimate with St. Peter. St. Mark gives no biography, no chronology, no account of the conquests of Jesus, no history of Jesus' life; his data are derived from the fragments of the Gospels, traditions, narratives, and sayings. In the Synoptists the sequence is often logical rather than chronologically. (Cf. St. Luke's preface.) St. John's gospel omits the first 31 years and is only concerned with some 40 days. But even in St. Mark (1:1) Jesus is not the Proclaimer but the Centaur of the gospel (Wellhausen, Evangel. Marci, p. 1).—I. The Preparation. (1) Birth. Davidaic origin for the Messiah was the universal Jewish belief. Without compliance with this, Jesus' claim could have been accepted. Whatever difficulties the genealogies present, this is attested in Ro. 1:3; Ac. 2:30; Rev. 5:5 (cf. Bovon, Thed. N.T., 1, 308; In. 7:42). Even in the 2nd cent. the grandchildren of Jude, the Lord's brother, were brought before Domitian as members of the family of David (Hegesippus in Euseb., Hist. Eccl. iii. xx.; cf. also Zöckler, in Hauck, s.v. "Jesus Christ"). The position of the Virgin-born in N.T. is natural, assuming its truth. It could not be utilized for evidential purposes. As Petavius says, Virgin-birth does not necessarily imply divinity; but that a divine Person should so enter history is most suitable (De Trin. vi. p. 590). For Böhmer, see Rammay, Was Christ born at B.? The reserve and sobriety of the canonical narratives are strikingly contrasted with the grotesque and immoral caricatures of the apocryphal legends. (2) At the age of 12. The one incident in the 30 years' preparation. The record relates a development (i) thoroughly human, (ii) apart from error, (iii) apart from sin. The first participation in the sacrificial worship in His Father's house is the natural crisis when thoughts of unique relationship with the Father, hitherto unuttered, found expression. Cf. B. Weiss, Life of Christ i. 180-302; Barth, Hauptprobleme, p. 260. (For Galilean home life and ideals, see Sanday, Research, p. 52.) The unrecorded period from 12 to 30 undoubtedly matured that profound knowledge of Scripture, especially of Psalms and Prophets, comprising the interpretation afterwards of His consciousness. (On the question of the limitations of our Lord's human knowledge, see our art. Kenosis; and Mason, Conditions of our Lord's Life on Earth; Hall, The Kenotic Theory; and Bernard, Mental Characteristics.) During this period Joseph had probably died. Jesus was an only son, the heir of His father's property. He lived a poor life when he married Mary. He had at that time children, sons and daughters, from an earlier marriage. There is no good reason to doubt the earliest traditions that Mary retained her perpetual virginity (Briggs, New Light, 172). (James; Mary the B.V.)

(3) The Baptism. As the Transfiguration recognizes His exemption from the necessity of death, so St. John Baptist recognizes His exemption from the necessity of baptism. Both are experiences of sinners. But if for redemptive purposes He could undergo the one, so also the other. Both were converted to a deeper religious experience, if not for eminently religious purposes, restricted to our Lord alone (Spitta compares a similar contrast in Ac. 9:7 and 22:9; Streiffragen, p. 135). But, as Meix observes, if this criticism makes a psychological explanation easier, it ignores the value of the Word and the Dove to the bystanders (Die Evangelien der Markus und Lukas, 14, quoted in Spitta, p. 135); see St. Mark's account of the Transfiguration (Mk. 9:7), and Jn. 12:30. (Cf. Wellhausen, p. 75.) (4) The Temptation. If the Baptism is the conscious entrance on Messianic office, the Temptation is the deliberate rejection of all methods except the highest by which that office could be discharged. See our art. TEmPTATION OF CHRIST.—II. The Ministry. Located by Synoptists in Galilee (duration, apparently one year, terminating in the winter), and mainly in the city of Jerusalem, three Passovers being recorded. But if the Synoptic narrative is
...timeless" (Bousett, *Jesus*, p. 12), no conclusion can be drawn from its omissions. The Synoptics alone seem to have described Jerusalem ministry; for (a) the Crucifixion is not accounted for, if Christ had not previously taught there; (b) His lamentation over Jerusalem implies a visit; (c) the Pharisees could not be condemned, in the parable of the Wicked Husbandman, for rejecting an offer which was never made (see W. Richmond, *Gospel of the Rejection*, p. 25). The Temptation suggests another visit. The withdrawal northward is estimated at 8 months (Prof. Burkitt, *Gospel Hist. and its Transmission*, p. 93). The duration of St. John Baptist's imprisonment was probably not brief (cf. Sanday, *Research*, p. 98). St. Luke also manifests a preference for Judaea over Galilee (see the remarkable reading in 4:44. Judaea is probably correct. Cj. Westcott and Hort's notes and R.V. marg.; Spitta, *Streitfragen*, p. 15). Christ's ministry begins out of that of St. John Baptist, with the proclamation of the kingdom and the ministry of healing. The Capernaum becomes His home (Mt.1.21-3.12; Jn.2.12). Then follows a Jerusalem episode with the cleansing of the temple (Jn.2.13ff.). "The improbability of two cleansing is not so great," says Garvie, "as at first sight appears (Studies, p. 170)." The intention of the two is not exactly clear. He is presented in a new demonstration (ch. 3) and the return through Samaria (4.1-42) to Galilee (vv. 43ff.).—III. The Teaching of Jesus was progressive. (For the ethical teaching, see *Sermon on Mount*; for general characteristics, see *Parables*.) The progress of ideas does not necessarily coincide with change of place or time. Their development must depend on the hearers' capacity. To identify Christ's utterances with His human knowledge at any special time is a superficial procedure, not necessarily true of any teacher, least of all of Him. The narratives describe One fully enlightened; He is too subtle; never surprised into a contradiction; never surprised into a plausible intimation through immature thought; encircled by affectionate but ignorant adherents, who blunderingly but vainly strive to make Him substitute their ideals for His. There is progressive instruction, but no change of plan. His principal themes are: the kingdom; the Christ; His Death; His relation to the Father. (For characteristics, see Wendt, *Teaching of Jesus*; R. J. Drummond, *Apostolic T. and Christ's T.* (1) The Kingdom. Every Israelite would understand that the Messianic kingdom was intended (cf. Schürer, *Times of J.C. D.* ii. vol. ii. p. 171; Wendt, *T. J.* i. 371). It is described as spiritual, not political, inward, as a disposition of individuals, yet external, as a social community; subjectively realized in character, objectively a precious gift; developing intensively, extensively (cf. parables of Leaven and Mustard Seed), yet possessing outward limitations (as in the net cast into the sea). It is an association into which men press and which they earnestly take by storm. "Undoubtedly," says a most independent critic, "the evangelist is thinking of the visible kingdom of God—i.e. of the Church" (J. Weiss, *Die Predigt J. vom Reiche Gottes*, p. 48). Christ's necessarily self-imposed mission to Israel in no way conflicts with the universality of the kingdom (cf. Mt.15.24, 16, Mk.7.27, Lk.11.20; with Mt. 16.28; Lk.12.17-19; 19.10). [Kingdom of God; Church.] Bozon, *Theol. N.T.* i. 257, Wendt, *T. J.* ii. 197-199, and Knowling, *Testimony*, p. 341, sufficiently answer Harnack's *Expansion*, p. 40. Briefly, then, our Lord's teaching on the kingdom may be summarized as follows: (i) "The idea of a divine dispensation under which God bestows His full salvation upon a society of men, who on their part should fulfill His will in true righteousness" (Wendt, *T. J.* i. 173). (ii) "The kingdom of God is the highest boon bestowed by God, the community founded through His self-revelation in Christ (Kitschel, *Unterricht*, p. 3)." (See further, B. Weiss, *Bibl. Theol. N.T.*; J. Weiss, *Die Predigt J. vom Reiche Gottes* (1900); Wendt, *T. J.* vol. i.; Vincent Rose, *Revue Biblique* (July 1, 1899), and *Studies on the Gospels.* (2) The Claim to be the Christ. This was seriously compromised by prevalent Messianic ideas. Men expected a political emanation of Christ. Histric books describe the Messiah as granting life to the nations who have submitted to Israel, and destroying their oppressors with the sword (Baruch, lxii.). The prevalent ideal was undoubtedly a kingdom of glory in Palestine, with its capital at Jerusalem, over which the Messiah presides (cf. J. C. D. ii. vol. ii. pp. 126-187). The dead were to rise out of their graves and share the Messianic privileges; but the whole conception was terrestrial. It seems that our Lord's contemporaries had no idea of a suffering Messiah (ib. 186-187). Certainly this conception of the Messiah, glowing with the passions of national fanaticism, had little in common with that of our Lord except the name. Yet He could neither refuse the traditional terms nor accept the popular interpretation. Hence His embarrassments in teaching. He could not answer with a simple affirmative a direct inquiry as to His Messiahhood. Although He kept a reserve, that refusal to permit announcements of His Christhood, that preference for retirement over publicity, which so mystified and irritated our Lord's unbelieving relatives, caused His opponents plausibly to charge Him with making them to doubt, and prompted the inquiry of St. John Baptist. Hence His flight in the moment when the people wanted to make Him king. All this, and more, was necessitated by His and their conflicting ideals. When the certainty of His final sufferings refuted the popular expectations we find this reserve disappearing; and then, before the authorities of the nation, is heard the clear assertion of His Messianic claim. Recent liberal critics have expressed themselves profoundly moved by the grandeur of the manner in which this Messianic idea is accepted by our Lord and spiritualized, emptied of all its earthly political national elements, until at last the temporal monarch in the palace at Jerusalem is converted into the tragic figure on the cross (cf. Wernle, *Beginnings of Christianity*, i. 40). In this light must be considered our Lord's self-chosen habitual designation—the Son of Man. Prof. Charles (br.of *Enoch*, App. B, pp. 312-317) says that the title in Daniel (7.13) seems merely...
symbolic of Israel, but in the book of Enoch
denotes a supernatural person. In this book
the Son of Man is represented on the
throne of the divine glory (xiii.1) and exercising
universal judgment over mankind (xiii. 3).
"This title, with its supernatural attributes, of superhuman glory, of universal dominion and
supreme judicial power, was adopted by our
Lord" (cf. Jn.3.13, etc.). But, while retaining
its supernatural associations, it, as employed
by Christ, "assumed a deeper spiritual signifi-
cance of self-emptying and self-renunciation"
(Charles, pp. 315, 316). His supernatural claims
were "vindicated, not after the external Juda-
istic conceptions of the book of Enoch, but in
a revelation of the Father in a sinless and re-
demptive life, death, and resurrection" (ib. p.
316). To this we must add that the O.T. usage
of the term "Son of Man" generally indicates a
member of the human race, with peculiar
emphasis on the lowliness and weakness inherent
in man as such (Job 25.6; Ezek 2.1, 3; Dan.8.
17). This is one reason for its adoption by our
Lord, who henceforth digests and develops the
and human weakness. In many instances we
could not substitute the personal pronoun for
this title without losing an essential element in
the thought (Wendt, T. J. ii. 139-148). Thus
the title paved the way to the conception of a
suffering Messiah. It is probable that these
O.T. members of the term "Son of Man"
Jews reluctant to adopt it as a title of the
Messiah. Thus it seems true to say that
"Christ's claims were for the greater part of
His ministry veiled behind the term "Son of
Man"" (Briggs, New Light, p. 91). But there's
much more than this. No religious mind can
fail to be impressed by the deliberate selection
of term so universal in its character. Whereas
He might have chosen to describe Himself as
David's Son, He passed beyond the highest of
merely Israelite expressions, and selected a
term capable of conveying the vastly loftier
conception of the representative of humanity.
No Christian has ever been able to conceive of
Him as anything but representative of the
universal. (See further, Wendt, T. J.; B. Weiss,
Bibl. Theol. N.T. i. 173 ff.; Ottley, Incarna-
tion, pp. 71-74.)—IV. Our Lord's Relation to
the Law of Israel. His personal recognition of
religious authority may be seen in His entrance
upon His ministry at the Levitical age of 30;
in His attendance at the Jewish festivals; in
His injunction about submission to the direc-
tions of the scribes; in His strong affirmation
that He had not come to destroy, but to
fulfil. On the background of this obedience
and submission stand out all the more strik-
ingly His independence of rabbinical inter-
pretations of the law and His attitude to-
wards the sabbath. Popular criticisms on
this begin very early in St. Mark (see 2.23-28,
3.1-6). A more or less official inquiry fol-
ows in 7.11ff. by "certain of the scribes which
had come from Jerusalem." Arbitrary
human enactments received an attention
which was not bestowed upon the command-
ments of God. Certainly our Lord set moral
law higher than ritual observance, or rather
insisted that brotherly love is a condition essen-
tial to any acceptable worship of God. But
He by no means depreciated its ritual
observance. On the contrary, assuming the
condition of brotherly love fulfilled, He said,
"and then come and offer thy gift."—V. The
Miracles. The discussion on the Ascension in
Nitzsch in De Disciplina Revolutionis, pp. 30-
51.) Christ, says Nitzsch, affirms that His divine
mission can be understood from His miracles
(Jn.5.26, 10.37; Mt.11.4), yet elsewhere Christ
deprecates miracles (Jn.4.48). The con-
tradiction is solved by the principle that
He would confirm faith but not compel it.
Similar narratives are not necessarily double
accounts of one incident. "Who would be
surprised to find two very similar cases in
a physician's diary?" (R. J. Drummond,
Apost. Teaching and Christ's T. 03). Christ's
miracles may be classified in an ascending
scale—over inanimate nature, physical disease,
mental disorders, death in its various stages.
Psychology throws much light, but leaves much
wholly inexplicable, except when the Pauline
interpretation of the Person is accepted. In-
cidents might be differently reported in
the present century and in the apostolic age, but it
is impossible to alter the basic inferences from
the portrait of the Christ without altering
that portrait beyond recognition. Moreover,
word and work correspond. And rejection of
this element ultimately rests, not on historic
criticism, but on theoretical presuppositions,
which include a non-Christian view of God
and the world. The character of Christ (Gottes
Sohn und Geist, pp. 24 ff.)—VI. The Train-
ing of the Twelve. (Cf. Bruce, Training of XII.;
Latham, Pastor Pastorum; Scott-Holland,
Cred and Character; Bp. Gore, Church and
Ministry, pp. 36 ff.) "To deny that Christ did
undertake to found and legislate for a new
theocratic society . . . is indeed possible, but
only to those who altogether deny the credi-
bility of the extant biographies of Christ"
(Ecc Homo). Our Lord did not commit either Himself, or His Revelation in its
integrity, to the miscellaneous throng, but to
the selected few (cf. Jn.2.23-25). The
method of His choosing and training the Twelve is suggested by Christ's self-preparation (a night
in prayer, Lm.6.12); the method (from the
disciples summoned together, ver. 13); the triple
record (Mt.10; Mk.3; Lm.6); the purpose
assigned (Mk.3.14); the number selected (sus-
gest of founding a new Israel); the con-
xon with the Sermon on the Mount (symbolic
consecration of the Twelve); the instructions
devoted to the Twelve; the permanence of
the body so created. Bengel's phrase is most
applicable here, "Primae origines Ecclesiae Christianae. The constituent elements of this
body are profoundly suggestive of variety in
unity. The pessimistic St. Thomas, the reflec-
tive St. John, the sanguine St. Peter, the
conservative tax-gatherer, the radical Zealot,
illustrate the diversity of temperament and
political opinion which the Church was to
contain and combine. These disintegrating
elements Christ drew into a unity, never after-
wards broken, both with Himself and with
one another; with the result that after His
Ascension a consolidated society remained.
The training of the Twelve does not imply the
neglecting of the crowds. Christ is represented
as "having compassion on the multitude,"
giving instructions through all the towns in

410 JESUS CHRIST
JESUS CHRIST

Galilee, answering questions, enlightening individuals, composing parables especially for their edification. Though warning of suffering and death, He confronted Him, there He held minister. These ministrations were the inevitable response of perfect humanity placed in such conditions. Yet they were more or less incidental. But the training of the Twelve was His deliberate purpose with a view to future issues. The opening of the training of the Twelve included the following set instructions, e.g. Sermon on the Mount, intended chiefly for the inner circle; interpretation of parables and of difficult sayings left unexplained among others; the lessons of His miracles; the gradual self-revealing under the changing conditions of the daily life; the practical training in their mission to preach. Meanwhile, among the crowds, the first popularity, caused by His miracles and teaching, and fostered by hope of His compliance with their ideals, passed into dislike, as the incompatibility became more plain. After the feeding of the 5,000 a crisis came, and the inner circle, under the garment, found and tested the few (Jn.6.60-67). As opposition increased, Christ withdrew, with the Twelve, into heathen territory (Mk.7.24ff.) to mature their faith, amid external security. The question at Caesarea Philippi was a crisis in their training (Mk.8.27). But their development was not so much by overcoming opposition, as by the realization of the full metaphysical conception of the Nicene Creed, nor that a brilliant momentary insight into the profoundest truth was not granted him. He manifestly reached a higher stage of utmost significance. Here was an objective truth and a subjective disposition on which our Lord could build. It is a crisis of triumph. Our Lord wins the response for which He had kept the Twelve so long in daily training. His prohibition of the declaration of a truth soon declared by Himself creates no difficulty. The official announcement must come from Himself.—VII. The character of Jesus may be fitly considered here, as part of the self-revelation of the Twelve, and also as the basis of the third main principle of His instructions; viz. those on His redemptive work. Briefly, the portrait drawn by the evangelists is one of human perfection. (1) They sketch a career lived at the confluence of three strongly marked races—the Roman, the Greek, and the Jew—yet exempt from the onesidedness of all. The character is free from national limitations, whether contemporary parties, Sadducean, Pharisaic, Herodian, or national characteristic fanaticism and exclusiveness, from which none of His apostles were exempt. Galilean ideals may have preserved more spiritual types than those of Jerusalem, but the former were none the less humanly ideal, and these ideals ascribed to our Lord. Contrast Christ's Messianic conceptions with those of the Twelve. We scarcely think of Jesus as a Jew, for what He took of Israel was exclusively the good—its ethical monotheism, which in taking the St. Smith, Lectures in Moral History, and the comments on the same in Liddon's Elements of Religion; Robertson, Sermons, 2nd ser. xvii.; Gore, Bampton Lectures; Sanday, Research; Luthardt, Apologetic Lectures; Carson, Reunion Essays; Caird, Fundamental Ideas.—
VIII. His Redemptive Work. The process of instruction was now advanced to (1) predictions of His Passion. Hints had been given before (Mk.8.31; Lk.18.31), but remained an enigma until the Resurrection explained them. The predictions are three. (i) At Caesarea Philippi, on the basis of St. Peter's confession (Mk.8.31), the Passion is affirmed to be a divine necessity (S.T. Lu.9.22), but accompanied by an equally clear announcement of His Resurrection (Mk.8.31; Lk.9.22). The Transfiguration (Mk.9.2-13), which came just in the crisis of depression caused by the prediction of His Death. Here the obvious lesson was the divine approval of the Master's course, and an injunction to hear His teaching. The Disciples saw Christ refuse the painless transition into glory. [TRANSFIGURATION.] They hear the conversation on the decease shortly to be accomplished in Jerusalem. His attitude wins the Father's approval (Lu.9.31). Then came the second announcement of His Death—again associated with the Resurrection (Mk.9.7; cf. 30-32). (iii) As Jerusalem was approached (Mk.10.32; Mt.20.17; Lk.18.31). Here His resolve definitely ceased to remain what it was to become. Thus the Messiahship is steadily unfolded to the apostles as a conception involving death. As Bengal finely says, He was dwelling in His Passion. The disciples met each prediction with resistance: at the first, St. Peter protested with all his power; at the second, he was indignant by his word; and at the third, the idea is still unintelligible. Not because they could not understand the terms, but because the ideas conflicted with their Messianic preconceptions. (Contrast Spitta's crit. in Streiffagen, p. 107.) (2) Next, instructions as to the significance of His Death. They are fragmentary and few, yet definite. On this last journey to Jerusalem He spoke of "giving His life a ransom for many." (Mk.10.45, νέπατα ἀντὶ πάλινμον). Holtzmann (Life of Jesus, p. 387) illustrates from Josephus (14 Ant. vii. 1), where the treasurer Eleazar gave Cassius a massive golden beam from the temple at Jerusalem as a λάτρευ αντὶ παλαιαμον—a ransom to save the rest. Thus Jesus Christ will give His life in order that the many may have eternal life. The term λάτρευ signifies in the LXX. the price paid to redeem a firstborn son from death (Num.3.46), or a captive in war (Is.45.13), or a slave (Lev.25.51). No λάτρευ or satisfaction could be accepted in behalf of a murderer (Num.35.31). Rich men cannot deliver their relatives from death by payment of a ransom (Ps.49.7). The prayer of Eleazar (4 Mac. vi. 23) has, "Make my blood an expiatory offering for them, and take my life as their ransom." And the historian praises the Maccabees because "they became as it were a ransom [or expiation] for the sin of the nation" (xvii. 20). (See Barth, Hauptprobleme, p. 199 ff.) These illustrations show what our Lord's expression would convey to His contemporaries—namely, (Mk.10.45) His Death would secure their deliverance from sin. It is the Death of the Righteous for the unrighteous. The whole narrative of the Passion puts this interpretation upon it—e.g., the prayer from the Cross that the nation may be forgiven. Our Lord lays reiterated emphasis on the fact that His Death is divinely ordained (ὅτι οἱτω θείοια, Mk.28.54,56 and Lu.24.26). Viewed externally, it was the necessary result of Jewish hostility. But inwardly, it was the pre-determined will of God. Jesus was born expressly to die for mankind. In the last week of His earthly life He consummated the purpose for which He came. He went to die that the Scripture might be fulfilled that thus it must be. In other words, He affirmed that only through His Death could the eternal counsel of the Father be achieved (cf. Weber, Zum Zorn Gottes, pp. 242 ff.).—X. The Jerusalem Ministry. (1) The journey thither (cf. Lk.9.51-19.28—not, however, chronologically arranged; B. Weiss, L.C. iii. 162), probably through Samaria (cf. Lk.9.51-56; 10.25-37, 17.11-19). Definitely resolute to enter Jerusalem, and to die elsewhere (Lk.13.31,32). (2) The Feast of Tabernacles (Jn.7-10) gives this episode with wonderful insight into what must have been the popular feeling after the rejection in Galilee (7.12, 13-52). Here, at the centre of Israel's religious life, He declared His divine foreknowledge. This led to an attempt to kill Him. But His time was not yet. (3) The Festival of the Dedication (10.22-41) continued the self-revealing under circumstances of widening hostility. The irritated challenge of 10.24 was answered with a claim to unity with God (ver. 30) which provoked another attempt to stone Him. This was the second "Thou being a man, makest Thyself God" (ver. 33). J.H. Newman's admirable exposition of the passage follows, in which our Lord temporarily asserts a minor claim, not to retract the former, but to find a common basis, should be carefully studied (Parochial Sermons). Augustine's dictum remains profoundly true: "Intellectus est Judaei qui non intelligit Ariani." Probably to this period belongs the dilemma concerning the Christ as David's Son and David's Lord (Mk.12.35-37). (4) The brief withdrawal from Jerusalem (Jn.10.40, 41) into the territory beyond Jordan, "where John was baptizing" was designed "as a test" but "in the two months in Perea were the last time of refreshment. He would enjoy before being involved in struggle and death" (B. Weiss, L.C. iii. 202). (5) The entry into Jerusalem is described by Wellhausen as a popular movement, rather than designed by Christ (Mark, p. 94). Yet while the popular aspect was distinctly Messianic (Zech.9.9 and Jn.12.12f). Certainly the entry signified one thing to the people, another to Christ— as St. Luke's record of His tears over Jerusalem suggests (L.n.19.41-44). Then followed the day of questionings. Herodian, Sadducee, Pharisee, are successively answered. The denunciations of unrighteousness, begun in indignation, are closed in tears (Mt.23.13-39). The indesirably tender wistfulness of the final passage reveals the spirit underlying the whole. After this, the temple was left for ever. Then came the eschatological predictions from the mount of Olives (Mt.24, 25). It has been repeatedly urged (by the Bp. of Gloucester, Warburton Lectures for 1903-1907, O.T. in the New) that our Lord's discourse on the mount of Olives refers wholly to the Fall of Jerusalem and contemporary incidents. Anything which our Lord describes in these verses was taken
by Him straight from the prophetical books of O.T., and "as in those books the language is not to be held to predict literal portents to be looked for in the physical heaven, but should be symbolically understood as figurative imagery applied to the destruction of cities and empires of the world, so here also it should be taken in the same way and be given no other meaning." [OLD TESTAMENT.] Further references to His Death ensued. Christ associated the anointing at Bethany with His Burial (Mt. 26:12); spoke of the beloved son cast out and killed and of the wheat which must die (Jn. 12:24). Meanwhile, events moved with rapidity. Shortly after the Lazarus-raising, the Sanhedrin followed Caiphas' advice, and determined that Christ's Death would secure the nation. That made the Death, humanly, a question of opportunity, which Judas provided (cf. Briggs, New Light, p. 92). (For the Betrayal, see JUDAS ISCARIOT; for the Trial, see PONTIUS PILATE; HEROD.)—X. The Redemption. (1) With the institution of the Eucharist came further instruction about His Death. Passover, Eucharist, and Death are all drawn closely together. The phrase in Mk. 14:24, "This is My Blood of the Covenant, which is shed for many for the remission of sins," was symbolically applied to the hearers, considering their antecedents, the inauguration of a new covenant between God and man contrasted with the old (cf. 1Cor.11:25). Mt. 26:28 adds "for the remission of sins," showing that he understood the covenant to be a covenant between God and the many, by which remission of sins is to be had (Allen on St. Matt. p. 276). The Blood was no mere sign of this remission, but (as Meyer says) reconciling, sacrificial Blood. The Blood is instrumental in effecting the covenant. We may agree with Weiss (L.C. iii, 231) that Christ's words must at the least have conveyed that "as the blood of the Paschal Lamb once protected the children of Israel from the avenging angel, His atoning Blood was to be the means for averting God's judgment from the guilt-laden people." The Synoptists suggest that the institution of the Eucharist and the Passover coincided; St. John that the institution of the Passover were the extremity of the Crucifixion and the Passover coincided (Jn. 13:1-29). The exact chronological relationship, which is uncertain, is insignificant compared with the doctrinal relationship of the ancient Passover and the New, which our Lord distinctly affirmed. [EUCHARIIST.] (2) No part of the narrative is so consecutive and elaborate as the Passion history. The evangelists rivet attention on Christ's Death. In awful relief is set Gethsemane. (For primitive interpolations in St. Luke [22:43,44], cf. Westcott and Hort's Select Readings, pp. 64-67: "These verses and the first sentence of 23:34 may be safely called the most precious among the remains of this evangelical tradition which were rescued from oblivion by the scribes of the second century.") No explanation is given by the evangelists while recording the fact. They describe the scene and report the words which He was heard to utter. The terrible mental distress is described by St. Mark, ἀμφιβαίνειν (St. Matthew; cf. Lightfoot, Phil. ii. 26), and by the whole description in Lu.22:43,44. The interpretation given by the primitive Christian consciousness is Heb.5:7-10, where the writer "had doubtless chiefly in view the scene in Gethsemane" (Delitzsch, Hebrews i. 243). Plainly in Gethsemane is the beginning of the Passion. He prayed to be saved from death. But for what reason? All interpretation must depend on personal convictions as to His work and personality. Was this a purely physical recoil from death? If so, our Lord has been surpassed by hundreds of His martyrs, whose cross has been preceded by no Gethsemane (contrast, e.g., St. Ignatius). It will ever be incredible to the believer that Christ here merely illustrates the maxim that the spirit is willing but the flesh is weak. No interpretation can, on apostolic principles, be adequate, unless it takes into account the moral significance of His Death as redemptive, the sinlessness of the Sufferer, and the awful association with human sinfulness—His most abhorrent and terrible—which His character as Redeemer would involve. "It was the whole abyss of death itself into which the Lord looked down when He offered this supplication" (Delitzsch, Heb. vol. i. p. 248). Newman's wonderful description of the Agony, as caused by sin, will be more convincing. Sinless with the sinful, is the kind of interpretation which the apostolic principles require. It is a moral and spiritual revulsion, rather than a merely physical recoil, which caused Gethsemane. (See Delitzsch on Heb. [5-7], vol. ii. p. 248; Meyer on St. Matt. p. 562; Barth, T. j. J. 277). Denney, Death of Christ, is less satisfactory here. For a most attenuated account, see Wendt, T. J. ii. 248. On the omission of the incident from St. John, see Bovon, Theol. N.T. i. 142; and note especially Jn.18:11 and 5:30. Garvie, Studies, pp. 363 ff.) (3) Christ's Death. "To expect from Jesus Himself a theory of the Atonement and to reject the subsequent apostolic doctrine of the Cross wherever it goes beyond the words of Jesus is to ignore the necessary condition for such a sacrifice of vicarious love" (Garvie, Studies, p. 421). The description of the Crucifixion was written in order that men should know the significance of the Death. The cry of dereliction becomes intelligible if, in perfect sacrificial homage to righteousness, Christ's sympathetic self-identity with sinful mankind became so complete that He seemed to experience the isolation from the Father which is, in the sinner, self-inflicted. If Jesus shared Israel's belief in the relation between death and sin, His experience of the one while consciously exempt from the other must, for Him, have invested death with a unique significance. All exposition by sinners of a sinless redemptive experience must of necessity fall miserable beneath the reality; but no exposition can be so futile as that which forgets that it is interpreting a sacrifice of love. (For our Lord's words spoken from the Cross, see SEVEN WORDS, THE.) (4) Resurrection and Ascension. That Jesus did not remain in death, among the dead, but rose, and after His Resurrection was seen by a number of His disciples, is the common conviction of primitive apostolic Christendom. Here SS. Peter and Paul perfectly concur.
perverse to infer from the discrepancies of the accounts in the gospels the unhistoric character of the event. Rather we see that a fact can stand perfectly secure even when all the narrations include conflicting elements (see Oskar Holtzmann, Jesus Christus, p. 115). Resemblance—Ascension—XI. Christ's Relation to the Father. This is best considered last, when the process of self-revelation is complete, and we contemplate a finished career. If, as we have seen, the instruction of the Twelve was progressive, the greatest problem, that of Christ's personality, could only be fully declared as the consummation of all else. (For the supernatural claims in the Sermon on the Mount, see Lyttelton and our art. s.c.). Our Lord's theoogy began with the Jewish conception of God as the Father, filled with a depth of meaning to which the O.T. offers no real parallel. Synoptic testimony yields the following on Christ's personal relation to that Fatherhood: Jesus does not regard Himself as one of the numerous sons of God; He is conscious of Himself as the Son, in a sense which is absolute. When He says, "So also shall My Father make you up to you a kingdom, as My Father hath appointed unto Me"
(Mt.18,29) the implication is that because of this decision from mankind and unshared proximity to the Father. (L. J. p. 281). We should rather agree with Bovon that the text is "un passage... dont le caractere et la conception sont striecrément Johanne" (Thol. de N.T. 1, 167). This full, unique, mutual knowledge on the part of the Father and the Son contains the most profound implications. It is hopeless inadequacy to say that such a Sonship differs in degree but not in kind from that possible to the generality of men. He feels, " says Bovon (Jesus, p. 179), "that He stood in such close communion with the God the Father as belonged to none before or after Him." "Jesus is convinced," says Harnack, "that He knew God in a way in which no one ever knew Him before... In this consciousness He knows Himself to be the Son called and instituted of God, to be the Son of God, and hence He can say, My God and My Father, and into this invocation He puts something which belongs to none but Himself. How He came to this consciousness of the unique character of His relation to God as a Son... is His secret, and no psychology will ever fathom it" (What is Christianity? p. 128). Harnack adds the curious sentences, "Here all research must stop... No one could fathom this mystery who had not had a parallel experience" (p. 120). Certainly Incarnation does not admit a parallel experience, and we must agree that no one could fathom the mystery. But this "consciousness of the Father's love" is not the same as "Christ's secret," and which "no psychology will ever fathom," may well suggest that nothing but Incarnation can really account for it. Moreover, it is not possible to believe a fact where one cannot fathom a mystery? Indeed, unless the possibility of Incarnation be denied on a priori grounds, the greatest weight may well be conceded to the primitive Christian consciousness which believed itself forced to that conclusion. For we have seen, as Harnack elsewhere says, that "we must not be content to exhibit the mere image of Jesus Christ and the main features of His Gospel. We must not be content to stop there, because every great and powerful personality reveals a part of what it is only when seen in those whom it influences... We must look at the reflection and the effects which He produced in those whose leader and master He became" (op. cit. p. 10). Now, the effect which Christ produced on the apostolic community is assuredly belief in His literal equality with the Father. It is of course quite true that the Christology of the Marcion narrative is vastly simpler in form than that of the Fourth Gospel; and that the individual estimate of the evidence will be modified by the value attached to the latter document; true also that the expression, "Son of God," is capable, like the term "Fatherhood," of being filled with deeper or shallower contents. It is difficult to prove that the deeper contents were absent from the earlier forms of apostolic thought, and still more from the Intention which created Christianity, if at any rate God in any real sense was in Christ. Three stages of meaning are readily traceable in the expression: "Son of God," "certainly, which signifies a real and therefore none need dispute; official or Messianic, belonging to the selected Head of the chosen race; personal or essential, denoting literal equality, which is the only sense which will do justice to the Gospel facts and claims, as it certainly is that affirmed by St. Paul and the Fourth Evangelist, and accepted by the consciousness of the primitive Christian community. It is incontestable that in St. John the expression "Son of God" is filled with the profoundest contents conceivable. The Christian community was founded on belief in Jesus as the Christ and as the divine Son of God. The teaching of the latter is that "not only His being," says Harnack, is His most, but also His consciousness. And that theoogy alone is really Christian which acknowledges these two truths. (Litigert, Gottes Sohn und Geist, p. 4.)—XII. It is impossible to appreciate the Biblical data on the life of Jesus without considering the relation between the teaching of Christ and the teaching of the apostles. Christ's teaching was involved in various limitations. (1) The recipient's capacity. (2) The circumstances, since He spoke in anticipation and not in retrospect. (3) His mission, which was, not so much to preach the Gospel as so to live that there might be a Gospel to preach. (4) Psychological: self-revealing is not confined to words, but is achieved in a thousand subtle, indefinable ways. A personality can only be fully known by his self-impression upon his contemporaries. Now, Christ wrote nothing. His method of self-revealing to a chosen circle manifests a fearless self-revelation, and the ultimate testimony to His Person and work. Christ evidently anticipated that His teaching would reach the vast mass of mankind through other lips than His own. Therefore, to accept
JESUS THE FATHER OF SIRACH

the apostolic interpretation of His worth is only to obey the intentions of Christ Himself as declared in the method of His procedure. No severance of the Master's teaching from that of the apostles is in accordance with the Master's word, and is in the apostolic sense as fash-

ioned by the influence of Christ that the full exposition of His own teaching and principles is really to be found (In.16.12,13; cf. B. Weiss, Bibl. Theol. i. 47; R. J. Drummond, Apostolic Teaching and Christ's Teaching). (God; Incarnation; Mediator; Saviour; Sacrifice; Conspicuous; Second; etc.) [W. J. S.]

Jesus the son of Sirach, and grandfather of the following (Ecclus. prol.).

Jesus the son of Sirach is described in Ecclus.50.27 (cf. prol.) as the author of that book, which in the LXX., and generally, is called by his name the Wisdom of Jesus the son of Sirach, or simply the Wisdom of Sirach. The same passage speaks of him as a native of Jerusalem; and the internal character of the book confirms its Palestinian origin.

Jethro—1. Jethro, the father-in-law of Moses (Ex.4.18).—2. The firstborn of Gideon's seventy sons (Judg.8.20).—3. The father of Amasa, captain-general of Absalom (2 Sam.17.23). Jethro is more "another", and probably more correct, form of Ithra (2 Sam.17.23). He is described in 1 Chr.2.17 as an Ishmaelite, which again is more probably correct than the "Israelite" of the Heb. in 2 Sam.17, or the "Jezerite" of the LXX. and Vulg. in the same passage. The son of Jada, descendent of Hezon, of the tribe of Judah (1 Chr.2.32).—5. The son of Ezra, whose name occurs in a dislocated passage in the genealogy of Judah (4.17).—6. Chief of an Asherite family of warriors, and father of Jephunneh (7.38). Probably = Ithran (ver. 37).

Jethro (Gen.36.10), a descendant of Esau, and a "duke" or "leader" W. Edom. [C. R. C.]

Jethlah (R.V. Illibah), a city of Dan (Jos.19.42). The site is doubtful. [C. R. C.]

Jethro (Heb. yithro'; or yethre in Ex.4.18), the father-in-law of Moses, otherwise Reuel, 2. Reuel being the mother name of Moses (Ex.6.15). [Kenites, Jethro (Ex.3.1.18). 18.1-13) gave his daughter Zipporah (2.21) to Moses, and she was sent back to him (18.2) with her two sons (vs. 3.4). He met Moses again at Rephidim (17.8,18.1), and acknowledged Jehovah as the greatest of Elohim (18.10-12) to whom he offered sacrifices. He advised a definite organization of the congregation (ex. 14.26), and then returned to his home (ver. 27).

The old difficulty as to his being called both Reuel and Jethro (and not Hobab) would be easily explained if the original records were written in cuneiform [Writing], for the difference between ḫra and ḫ'e-ḫl in that script is a mere short stroke which would easily be omitted, or otherwise obliterated.

The fact that the Heb. scribes preserved this discrepancy, which was early noticed by the Rabbis, is one of the cases which prove their scrupulous preservation of the text. [C. R. C.]

Jetur (Gen.25.15; 1 Chr.1.31,5.19) = Ith-

rafa.

Jew/el.—1. A man of Judah, of the Bene-

Zerah (1 Chr.9.6).—2. (1 Esd.8.39) = Jeiel, 7.

Jew/ah.—1. An Edomite "duke"; son of Esau, by Aholibamah the daughter of ANAH (Gen.36.5,14,18; 1 Chr.1.35).—2. A Benjamite, son of Bilhan (7.10,11).—3. A Gershonite Levite, of the house of Shimei (23.10,11).—4. Son of Reuel, descendant of Jethro (Ex.4.18).

Jew/zh, a Benjamite in an obscure genealogy (1 Chr.8.10), apparently son of Shaharaim and Hodesh his third wife, and born in Moab.

Jew. The use of this term, which applies properly to persons belonging to Judah, appears to be entirely subsequent to the destruct-

tion of the Northern Kingdom of Israel, and is owing to this circumstance that we do not find it used in contrast with the northern tribes, but only in opposition to the Gentile peoples (Je. 34.9). After the return from the Captivity it is still used by writers at Jerusalem in its original sense (Ne.4.12; Zech.8.23). But at a later period it has been variously interpreted in an extended meaning of the term, and it occurs as the common title of all who belonged to the Heb. family, the predominant surviving element thus giving its name to the whole (Esth.3.13). In the N.T. in general the title has the same meaning. With St. Paul, however, as has a religious and ethical association. It stands in connection with the observance of the Mosaic Law, and is used of those Jewish Christians who insisted upon its obligation. These are referred to without qualification as "the Jews" (Gal.2.13), and the observance by Gentiles of the ceremonial of the law is described as judaizing (Gal.5.14). But from another point of view. St. Paul uses the term as a title of honour for those whose religion is spiritual, and not merely the performance of external ceremonies (Rom.2.28). The same idea occurs in Rev.2.9. A quite different use again is found in the Fourth Gospel, where "the Jews" are those of the chosen people who have regarded themselves in innermost opposition and sense, as true and faithful to the Hebrew nation and not in the modern sense as meaning all Israel. [Jew.; Judea.]

Jew/ys/lan/gue, in the (lit. "Jew-

ishly"; for the Heb. must be taken adverbially). It was applied to the Heb. language before the Captivity (2 K.18.26,29; 1 Chr.32.18; Is.36.11, 13) as well as after that, and as it is used (Neo.18.24), which latter was Aramaic. [Semitic Languages.]
JEZANIAH

Jezeniah, the son of Hosheaiah, the Maachatithite, and one of the captains of the forces, who after the fall of Jerusalem joined Gedaliah at Mizpah. In the events which followed the assassination of that officer Jezeniah escaped to Egypt (Jer.40.8,42.1). The Axazar of Je.43.2 is apparently to be identified with Jezeniah, who is called Jazaaniah in 2K.25.23.

Jezebel, daughter of Ethbaal, wife of Ahab. Her marriage with Ahab marks a turning-point for evil in the history of Israel, and indirectly in Judaea, for Athaliah was Jezebel's daughter. She combined wickedness and sensuality with the sternest and fiercest qualities inherent in the Phoenician people. In her hands her husband became a mere puppet (1K.21.25). The first effect of her influence was the establishment of the Phoenician worship of Baal and Ashtaroth (16.31,32,18.19) and the destruction of the prophets of Jehovah (18.13; 2K.9.7). When at last the people, at the instigation of Elijah, rose against her prophets, and slaughtered them at the foot of Carmel, and Ahab was terrified into submission, she alone retained her presence of mind, and her answer was a message of defiance to Elijah, "I will set the gods of thy father in the wood, and more than of these also, if I make not thy life as one of them by to-morrow at this time" (1K.19.1,2). The next instance of her power and unscrupulousness is found in the story of Naboth. She wrote a warrant in Ahab's name and sealed it with his signet: 'To hear, and not to Ahab, was the announcement of death, "Naboth is stoned and is dead," and she bade her husband take possession of the vineyard; and on her accordingly fell the prophet's curse, as well as on her husband (21.1-24). She survived Ahab 14 years, and still, as queen-mother, was a great personage in the court of her sons, and, as such, became the special mark for the vengeance of Jehu. With undaunted spirit she determined to meet the destroyer of her family. As he neared Jezreel she stood at the window over the city gate, arrayed in royal robes, and, looking down upon him, flung out the taunt, "Is it well with thy servant? Why didst thou murder (2K.9.31, R.V. marg.). At Jehu's command the eunuchs hurled her from the window, and she fell in front of the usurper's chariot. Her blood was sprinkled on the palace wall and on the horses of Jehu. The merciless destroyer passed on, and the last remains of life were trampled out by the horses' hoofs. During the banquet held to celebrate his success, Jehu remembered the fallen queen and commanded that she should be buried. But only "the skull, and the feet, and the palms of her hands" remained (9.30-37). Her name became a title of reproach for any who indulged in idolatrous practices (Rev.2.20). [Nicolaitanes.] [B.C.H.]

Joab.—1. (1Esdr.8.32) = Jaza'ziel, 5.—
2. (1Esdr.8.35) = Jih'iel, 8.

Jo'zer, third son of Naphtali (Gen.46.24; Num.26.49; 1Chr.7.13), and ancestor of the Jezervites, who were numbered in the plains of Moab.

Jo'zeth, a descendant of Parosh, who had married a foreign wife (Est.10.25).

Jo'zef, a Benjamite archer who joined David at Ziklag (1Chr.12.25).

Jez'liah, a Benjamite chief of the sons of Elpaal (1Chr.8.18).

Jez'ooar, son of Ashur by Helah (1Chr.4.7).

Jez'rah'lah, the Levite choir-leader at the dedication of the wall of Jerusalem (Ne.12.42).

Jez'ra'el, a town near the border of Issachar (Jos.19.18); now Zer'in, a village on the N.W. slope of Gilboa. Here Saul was killed by the Philistines (1Sam.29.1,11), and here Ishbosheth succeeded him (2Sam.2.9). The "fountain [Heb. ‘ayin] by Jezreel, where Saul camped, was no doubt the fine spring X. of the village. Jezreel was included in Solomon's fifth district (1K.4.12), answering to Issachar. It was the home of Naboth, whose vineyard adjoined Ahab's palace (18.45,21.1,23). Rock-hewn wine-presses still remain on the hill E. of the village. The site commands a view of the valley of Jezreel, up which the watchman on the tower saw Jehu advancing. The chariots of the two kings met him probably in the flat ground N. of the city; and Ahab's son was afterwards cast into the field of Naboth (2K.9.17-37) with Jezreel, while Ahaziah escaped N. [GUR.] Elijah doomed Jezreel to be eaten by dogs by destroy the wall (1K.21.23), but Ahab's dog was returned (vv.24,25) dying on his son, though his own blood was lapped by dogs at Samaria (1K.22.38). Hosea (1.11) refers to Jehu's cruelty, and promises an "answer" to the prayers of Jezreel (2.22). The Valley of Jezreel (’emeq yer’el) is the broad vale running NE. to Jericho (Jos.17.16; Judg.6.1; 15.4).—2. A town in the mountains S. of Hebron (Jos.15.56; cf. 1 Chr.4.4), the home of David's wife Ahinoam (1Sam.25.13, etc.). The site is unknown.—3. The eldest son of the prophet Hosea (1.4). [C.R.C.]

Jez'reelite, applied to Naboth only (1K.21.19; 2K.9.25). [Jezreel, 1.]

Jezreel'ites, applied only to David's wife, Ahinoam (1Sam.27.3,30.5; 2Sam.2.2,3.2; 1Chr.3.1). [Jezreel, 2.]

Jib'sam', son of Tola, the son of Issachar (1Chr.7.2).

Jida'lah, son of Nabor (Gen.22.22).

Jimm'nah, a son of Jabeel of the tribe of Judah (Gen.46.14). [B.C.H.]

Jib'nah, a son of Abinadab, who was born of Asher, called Jinnah in 1Chr.7.30; ancestor of the Jimnites.

Jiph'tah, a city of Judah in the Shephelah (Jos.15.43). The site is unknown. [C.R.C.]

Jiph'tath-ell, Valley of (Jos.19.27). [Habbasheth.]

Joab.—1. Son of Zeruiah, David's sister (1Chr.2.16), and brother of Abishai and Asahel. Nothing is known of his father except that his sepulchre was at Bethelhem (2Sam.2.32). We first hear of Joab on the occasion of the strife at Gibeon between David's and Ishbosheth's men (2.12ff.). Abner, who commanded the latter, was defeated, and on his retreat reluctantly killed Asahel. Joab voluntarily gave up the pursuit and returned to Hebron, but his vengeance was only postponed. Some time afterwards Joab heard that Abner, who had quarrelled with Ishbosheth, had in his absence paid a visit to David, and been received into favour there. He immediately returned to the king, and then, unknown to David, immediately sent messengers after Abner, who was overtaken by them at the well of Sirah. Not
suspecting treachery, Abner returned at once to Hebron, and as he entered the gate, Joab tore off the robe from the king's loins. [ABNER.] There was now no rival left in the way of Joab's advancement, and at the siege of Jerusalem he was appointed for his prowess chief captain of the host r(1Chr.11.6; 2Sam.8.16). In this post he served the king with undaunting fidelity. He had a chief armour-bearer of his own, Naharai, beside whom Samson's men (r1Chr.11.39), and ten attendants to carry his equipment and baggage (2Sam.18.15). He had the charge of giving the signal by trumpet for advance or retreat (18.16). He was called by the almost regal title of "lord" (11.11), "the prince of the king's army" (1Chr.27.34). His usual residence was Jerusalem, but he had a house and property in the country (2Sam.13.23), in the "wilderness" (r2K.3.34), probably on the N.E. of Jerusalem (cf. rSam.13.18; Jos.8.15-20), near an ancient sanctuary, called from its nomadic village Baal-hazor (2Sam.18.23; cf. with 14.30), where there were extensive sheepwalks. (1) His growth to a position of almost Ammonian sway, which he conducted in person in three campaigns. (a) Against the allied forces of Syria and Ammon. (b) Against Edom. The decisive victory was gained by David himself in the "valley of salt," and celebrated by a triumphal marching (8.13). To Joab fell the task of completing the work, and he remained in the country for 6 months, exterminating the male population, whom he then buried (1K.11.15-16). (c) Against the Ammonites. They were again left to Joab (2Sam.10.7-19). At the siege of Rabbah, the ark was sent with him, and the whole army was encamped in booths or huts round the beleaguered city (11.1-11). After a sortie of the inhabitants, Joab assumed sole command to his army. Joab took the lower city on the river, and then, in a magnanimous spirit of loyalty, sent to urge David to come and take the cittadel, so that the king himself might have the honour of the victory (12.26-29). (2) In the entangled relations which grew up in David's domestic life, Joab is one of the prominent figures. His unscrupulous conduct in connexion with Uriah is related in 11.1-25. (b) His success in reinstating Absalom in David's favour after the murder of Amnon in 14.1-20. (c) At Absalom's rebellion he remained loyal. He accompanied the king beyond the Jordan, and in the final battle of Ephraim assumed the responsibility of taking the rebel's life, in spite of David's injunction to spare him. For this politic act David transferred the captaincy of the troops to Amasa, who had been Absalom's commander-in-chief (18.2,11-15,19.13). (d) At Sheba's revolt, Amasa proved himself incapable, and David appointed Abishai to take the command of the army. Joab went with his brother, and in the heat of the pursuit encountered Amasa, whom he treacherously slew at the "great stone" in Gibeon (20.1.4-15). (e) Having removed his rival, Joab took the lead, and speedily brought the campaign to a successful close (20.18). (20.19.) Before David's determination to number his people, Joab's strenuous remonstrance was in vain (24.2-4). (3) Joab's end was mournful. At the close of his long life, his loyalty, so long unshaken, at last wavered. "Though he had not turned after Absalom he turned after Adonijah." (r1K.2.28). This probably filled up the measure of God's grace to the king's loyal vassal. (4) The king's death was sufficient to awaken the suspicions of Solomon. Joab fled to the shelter of the altar at Gibeon, and was there slain by Benaiiah. (5.) Son of Seraiah, and descendant of Kenaz (r1Chr.4.14).—(b) Head of a family, appointed by Levitical rank, whose descendants, with those of Jeshua, were the most numerous of all who returned with Zerubbabel (Ezr.2.6,8,9; Ne.7.11; rEsd.8.35). [H.C.B.]

Jo'achaz (rEsd.1.34) = Je'hoahaz, 2.

Jo'achim.—(1.) (Ba.1.3) = Je'hoiakim.—2.

A high-priest at Jerusalem; "the son of Chelias"—rBa.l.3.

Jo'acim (Jo'abim, R.V.)—1. (rEsd.1.37) = Je'hoiakim.—2. (1.43) = Je'hoiachin.—3.

A high-priest, the son of Zorobabel = Je'akim (5.5).—(d) The high-priest "who was in Jerusalem" (Jeh.4.4,14,15.8).—(e) The husband of Susanna (Sus.11ff.).—(f) The father of the B.V.M. in apocryphal literature (4Macc.4.15).—(g) Jo'adanus, son of Jeshua (rEsd.9.19); apparently called Gedaliah in Ezr.10.18.

Jo'ash, 1. Son of Asaph, and chronicler, or keeper of the records, to Hezekiah (Is.36.3,11,22).—2. Son of Zimnah, a Gershonite (r1Chr.6.21).—(b) Third son of Obed-edom (r1Chr.26.4), a Korahite appointed by David. (4.) A Gershonite, the son of Zimmah, in the time of Hezekiah (2Chr.29.12).—(c) The son of Joahaz, and keeper of the records, or annalist, to Josiah (2Chr.34.8).

Jo'ahaz, father of Jo'ah, 5 (2Chr.34.8).

Jo'anan (rEsd.9.1) = Jo'hanan, 8.

Jo'anna, son of Rhesa (Lu.3.27)—i.e. son of Zerubbabel and the HANANIAH of rChr.3.19.

Joanna, "wife of Chuzas, steward of Herod" (Lu.8.3), a lady of the court of Antipas; one of the group of women who accompanied Jesus on His circuit in Galilee between Nain and Capernaum, and, later, visited His tomb only to find it empty (Lu.24.10-11). Chuzas, who was the steward of Herod whose son Jesus healed, in which case Joanna's gratitude is explained. Dr. Sanday suggests that she may have been the channel through which the story of the Virgin Birth was communicated from Mary, the mother of Jesus, to St. Luke. [C.R.O.B.]

Jo'anan, surnamed Caddis, eldest brother of Judas Maccabaeus (r1Mac.2.2); called John (rMac.9.36ff.) and Joseph (r2Mac.8.22,10.19). He was slain by those of the children of Jambri. [JEHORIB.]—Jo'ash ("Jn") son of Becher (r1Chr.7.73).

Jo'ash ("Jn"), a contraction of Jehoash, —(d) Son of Ahaziah king of Judah, and the only one of his children who escaped the murderous hand of Athaliah. His history is contained in 2K.11.12, 2Chr.22.10-24. After his father's sister Jehosheba, the wife of Jehoiada, had stolen him from among the king's sons, he was hid for six years in the chambers of the temple. In the 7th year of his age a successful revolution placed him on the throne, and freed the country from the tyranny and idolatries of Athaliah. For at least 23 years, while Jehoiada lived, this reign was very prosperous. Except-
ing that the high places were still restored to
for insecence and sacrifice, pure religion was re-
stored, and contributions were collected and the
temple repaired; and the country seems to have
been free from foreign invasion and domestic
disturbance. But, after the death of Jehoiada,
Joash fell into the hands of bad advisers, at
whose suggestion he revived the worship of
Baal and Ashtaroth. Rebuked for this by Zechariah, the son of Jehoiada, Joash caused
him to be stoned to death in the very court of
the Lord’s house (Mt. 23.35). The vengeance
imprecated by the murdered high-priest was
not long delayed. That very year, Hazael king
of Syria came up against Jerusalem, and car-
ried off a vast booty as the price of his depar-
ture. Joash had scarcely escaped this danger;
when he fell into another and fatal one. Two
of his servants, taking advantage of his severe
illness, probably in consequence of wounds re-
ceived in battle, conspired against him, and
slain him in his bed in the fortress of Millo.
Joash’s reign lasted nearly forty years. King
Ahab of Israel, son of Jehoahaz, and for two full years
contemporary with the preceding (2 K. 14.1; cf.
with 12.1, 13.10). On his accession the king-
dom was in a deplorable state from the devas-
tations of Hazael and Benhadad, kings of Syria. When Joash visited Elisha on his death-
bed, the prophet promised him deliverance
from the Syrian yoke in Aphek (2 K. 13.17ff.). He
then bid him smite upon the ground, and the king smote thrice and then stayed. The
prophet rebuked him for staying, and limited to three his victories over Syria. (Elisha.)
In accordance with this prophecy Joash defeated Benhadad three times, and re-
covered from him the cities which Hazael had
taken from Jehoahaz. The other great mili-
tary event of Joash’s reign was his successful
war with Amaziah king of Judah. The grounds
of this war are given fully in 2 Chr. 25. The
two armies met at Beth-shemesh, that of Joash
was victorious, put the army of Amaziah to
the rout, took him prisoner, brought him to
Jerusalem, broke down the wall of Jerusalem,
and plundered the city. He died in the 15th
year of Amaziah king of Judah, and was suc-
sceeded by his son Jeroboam 11.—3. The father
of the king was a wealthy man among the
4. Apparently a younger son of Ahab, who
held a subordinate jurisdiction in the lifetime
of his father, or was appointed viceroy during
his absence in the attack on Ramoth-gilead
(1 K. 22.26; 2 Chr. 18.25). Or he may have been
merely a prince of the blood-royal or, as
Rawlinson suggests, a state officer. [Mac-
chias, 8.—5. A descendant of Shelah the son
of Judah, but whether his son or the son of
Jokim, is not clear (1 Chr. 4.22).—6. A Ben-
jaminite, son of Shemaah of Gibeah (12.3), who
joined David at Ziklag.—7. An officer in
David’s household (27.28).

Joatham (Mt. 1.9) = Joatham, 2.
Jouzab dus (1 Telg. 9.8) = Jozabad, 7.
Jeb (Gen. 46.13). [Jashub, 2.]
Job. The book of Job is one of those sacred
books the literature of which will never be
completed as long as the world endures. It is
most probably a work which though not of itself
(properly speaking) historical—clearly rests
upon an historical substratum of fact. The his-
tory, however, is of little importance compared
with its theology, and with the marvellous facts
of nature which are here and there adduced
to explain partially that theology. The book
falls naturally into five parts: (1) The pro-
logue, containing the story of the great patri-
arch and his fall from high estate. (2) The dis-
cussion between his three friends, who came
to comfort him in his sorrow, but who gave him
to drink no "cup of consolation," but bade
him, after draught of exceeding bitterness. They
longed to discover why the patriarch was so
terribly afflicted, and with that desire proved
his friends as adversaries at a season when he
would naturally have preferred to meditate by himself upon the sorrows which had
devastated his home, destroyed his family circle, made his friends (or his friends’ pain)
an object of horror and disgust to those
who ventured near him. The three friends
were evidently worsted in the controversy with Job.
(3) The discussion was, however, continued in
a different strain by Elihu, whose speech,
though inferior in diction to those of the dis-
putants who preceded him, is more probably
referred from a theological standpoint. Whether
Ilihu’s speech be regarded as an integral part
of the book or not, the book of Job without it
would be far inferior in theological importance.
The subject of the book is manifestly the
mystery of affliction bestriding the people of
God. The ingrate belief of Job’s friends was
that all afflictions were more or less the result
of sin: and as Job’s were of an unprece-
dented character, they maintained that he
must have been guilty of some terrible sin.
As, however, the patriarch insisted on his per-
sonal integrity, and (driven almost to madness
by the distress of his soul) deputed his case
in question the justice of the Most High, the
friends went much further than they had at
first intended, and openly charged him with
hypocrisy and deceit, and represented him as
one who, although he had borne a high charac-
ter before a nation, was (despite God’s dealing)
unmasked as a shameless transgressor. Job’s
friends were under the influence of a narrow
theology which was unable to give the right ex-
planation of such an experience as that of Job.
The history recorded in the latter part of the
prologue (concerning the challenge of Satan,
the great adversary and the accuser of the
people of God) was unknown to them. Their
sole explanation of all such sufferings was that
they must be punitive. This was a solution
which Job could not admit, although in his de-
fence he was entangled in the sin of speaking
bitter things against God. Elihu’s merit con-
sisted in the earnestness with which he commended
the one hand his friends anti the oth-
er that afflictions were often permitted, not
as purely punitive, but as necessary in their
character. (4) The next portion of the book
relates that Jehovah intervened in the de-
bate, although He did not explain to Job that
what was to be the cause of his sorrow. The All-
mighty pointed out man’s ignorance, even with
respect to matters placed under his eye. This was a practical demonstration that if man could be so ignorant as to matters which naturally fell under his own observation, it was but folly to expect him to be able to comprehend communications from the unseen (Ps. 73.15). And, but for the providence (God) were shut out from his knowledge. In the speech of Jehovah the problem of suffering is not, indeed, solved, nor even clearly stated. But the appearance of the Almighty in the thunder-storm was enough to convince Job of the sin and presumption of which he had been guilty. Hence the patriarch at once acknowledges his sin. He abhors himself, and repents in dust and ashes. (5) The last portion of the book then relates that the friends, who had blindly striven to uphold the Almighty's justice, were condemned for their unjudicious attacks on the person of Job, who interceded for them; while the patriarch was compensated for the trials, to which he had been subjected in order to prove the disinterestedness of true faith in God before the great adversary and before men. There are many points in this history of the unseen conflict waged between the tempter and the tempted which are of very great and practical value. Of the three great speeches, those of Job, the Lord's, and of Elisha, which were presented themselves on certain days before Jehovah, ought not to be regarded as angels [Sons or God], although such an interpretation is not impossible. But if Scripture be explained by Scripture, the long line of passages beginning with Gen.6.1-4, and embracing Deut.32.26-43, Ps.89.35, 38, Job.38.1-41, Pr.14.26, etc., justifies that phrase being interpreted the "professors of religion on earth." It should be borne in mind that there is an "accuser of the brethren" often spoken of as present on such occasions, keenly observant of any halting or transgression on the part of the professed people of Jehovah (as in Zech.3.1-3; Rev.12.7-11). He is sometimes significantly referred to as "the lying spirit" (the Heb. has the article in 1 K.22.22), in reference to his well-known character. Cf. Rev.20.3, 8; and our Lord's description of him as a liar and a murderer from the beginning (Jn.8.44). A. B. Davidson in his comm. in regard to Satan in the prologue to the book of Job as presenting himself before God to report to God, or to receive commissions from God. Satan is everywhere in Scripture represented as an evil power, as an accuser or an adversary—an opponent both of God and man; and, "strong" as he is in some respects, there is a "stronger" than he, without whose permission Satan is unable to "hurt" the people of God. For, notwithstanding all his efforts, he is compelled (malicious though he be) to act in subordination to a higher power; and can only bring to pass such afflictions as God's hand and counsel and fore-ordained (Ac.4.28). The theory that Satan was an evil power introduced into Jewish theology after the Exile, has led modern scholars to err widely in interpreting many passages of the O.T. The O.T. books more or less distinctly reveal the great facts of sin and salvation. They contain a light which shines out into the perfect day. Hence we refuse to ignore the passages which, until comparatively recent years, have been regarded as pointing out Him through Whom salvation has been wrought—the great Messiah—the testimony of Whom is the spirit of prophecy. Consequently, we coincide with those interpreters who see a reference to that Redeemer in Job 19.21, 33-26, although, we admit, it is most probable that the Book was written before the appearance of the Messiah. A life after death is referred to, and that is all that could have been expected in such early days.—_The date_ of the book of Job is a matter never likely to be satisfactorily cleared up. The deportations of peoples from one country to another, which was so characteristic a feature of the Assyrian rule, and which seem to be referred to in 12.14-23, may fairly lead to the conclusion that the book was written in that period. There are quotations from it in Ps.8-5. Similarities may be traced in Ps.72.12, 13 (cf. Job 29.12). Of course the reverse may be true, and the writer may have imitated the Psalmist, or both may have drawn from a common source. Passages closely like have been pointed out in Jeremiah. There is no reference in the book to tabernacle, temple, or Levitical law. The scenes with which the writer was best acquainted were those of the desert; but the writer may have been accustomed to the idea that it was written before Moses rests upon foundations which have long since been shown to be more than doubtful. Job, as an historical personage noted for his piety, is mentioned in Ezek.14.14, 20. He and his three friends do not seem to have been Israelites. Would he not have been more closely connected with the family of Abraham, though it is quite possible that the name Ram may be an abbreviation of Aram. The critical questions, apart from those connected with the prologue and epilogue, have mainly to do with the speeches of Elisha, the authenticity of which has been much discussed by scholars in all ages. The subject is so complex, that it is impossible to treat it fully in a short compass. Able and orthodox scholars have written on both sides. The pendulum is beginning to swing back again, in favour of Elisha's speeches forming an integral part of the book, when a critic of such a high position as Tholuck can speak of himself in favour of the genuineness of that portion.—_The literature_ of the book is most extensive. Apart from casual notices of the work, e.g. under Jas.5.11, the exposition of Gregory the Great (d. 604) is of not a little importance; Spanheim (1672) has much of interest; Schultens' _Liber Jobi_ (1737), in 2 vols., was a masterly work for that date; Prof. S. Lee, of Cambridge, in 1837 and Schlottmann in 1851 contributed valuable commentaries: E. Renan in 1865 wrote on the book; Heiligstedt contributed to Maurer's comm. the portion on Job in 1847; C. P. Carey wrote a large comm., but one which requires to be read with care, as its scholarship cannot be always depended on. A. B. Davidson wrote in 1862 an excellent work, which he left unfinished. In the Camb. Bible (1884) Prof. Davidson wrote a complete comm., but on a somewhat different standpoint. Of the German commentaries of G. Ewald (1818) and J. H. Williams & Norgate in 1882. Bernard's _Book of Job_, edited by Chance, is a bulky volume, and not very dependable. _Commentaries of_
Hengstenberg (1873); Ad. Merx (1871), F. Delitzsch (1876), Voelk (1889), G. I. B. Wright (1883), S. Cox (1885), etc. [c.f. J.I.L.W.]

**Jobab.**—1. Youngest son of Joktan (Gen. 10:29; c.r. 1:23), preceded by Havilah and Ophir.—2. The second king of Edom (Gen. 36:33; c.r. 1:44). He was the son of Zerah; and in a postscript to the LXX. of Job declares to be the same person as his patriarch.—3. King of Madon, routed by Joshua at Jerom (Jos. 11:1).—4, 5. Two Benjamites (rchr. 8:9, 18).

**Jochebed,** wife and aunt of Aaron, and mother of Moses (Ex. 6:20; Num. 28:59).

**Joda** = Judah the Levite (1 Esd. 5:58; sardonic in Ps. 60:9; von einviari, 3.)

**Joed,** a Benjamite, son of Pediah and ancestor of Sallu (Ne. 11:7).

**Joel** (yq'dh, Jehovah is God; 'Iow'h.l).—1. The writer of the book which stands second in order of the Minor Prophets. The only evidence as to Joel's date is the position thus assigned him; and it is clear that he must belong to some very early period, if he is the Joel referred to in Ex. 4:1, 24. This applies to Eliphaz and Zophah. There is no mention of the Assyrians or Babylonians, or, indeed, of any foe of Israel, save the Phoenicians and Philistines (3:4, 4), and Egypt and Edom (3:19, 4:19); but in no case does the allusion give us any clue to the date. There is much to be said for the view that Jehoshaphat's victory over Moab, Ammon, and Edom (2 Chr. 20) is referred to in Jl.3 (4, Heb.); and if this be so, we obtain our anterior limit. On the other hand, the first point of contact of Assyria with Israel was the invasion of Pul in the reign of Menahem; Pul being, doubtless, the same as Tiglath-pileser, who invaded the region of Pekah. The earliest connexion with Judah was Sennacherib's invasion. We thus fix a date between the reigns of Jehoshaphat (873-848 B.C.) and of Menahem (c. 748-710 B.C.). A probable date is the early part of Joash's reign, while the strong-handed rule of Jehoiada gradually took effect. We thus explain the absence of any allusion to a king. The real ruler was the priestly power behind the throne. The author was one to whom the temple and its services were dear. There is no reference to any idolatrous practice; but this also is intelligible under the rule of Jehoiada. The only national sin spoken of is drunkenness, and that only incidentally (1:5). Some scholars, while accepting the two above limits, suggest the reign of Uzziah for the period of Joel, with (we think) less likelihood. Uzziah reigned (c. 702-740 B.C.) much nearer to the time of the Assyrian invasion, and his contemporary, Amos, refers to the Assyrians by name. Again, one can hardly fancy that in the reign of so strong-handed a king, a prophecy would be altogether without some kind of reference to the reigning monarch. Of course, these negative arguments would allow of a post-Exilic date; but to this it may be replied, that in that case the author must have lived long before the time of the editors of the Minor Prophets, who must have had some definite knowledge about him. Again, we should thus have Joel a contemporary of Haggai and Malachi, though in beauty of diction his Heb. stands much higher than theirs. Some of the arguments urged for the late date do not seem to us to carry much weight. The z'ginim (2:1, 2:16, 2:25 [S. 1]) simply be old men, and not officials. The absence of allusion to idolatry is explained by the thoroughness of Jehoiada's reforms (2 Chr. 23). Again, Joel's message is to Judah. But that of Amos was to Israel, and that of Elijah and Elisha almost entirely so (except 21:12). The reference to Greeks (Jl.3:6) is urged as a mark of late date; yet not only are they certainly mentioned in an inscription of Sargon (c. 710 B.C.), but (long before) a Greek is said to be named in the Amarna letters (Sayce, Higher Crit. and Mon., p. 128). One argument can only be called ridiculous—viz. that the reference to the walls (2:9) points to a date after Ezra and Nehemiah. Presumably, all ancient cities had walls at all times; otherwise they would have had small chance of survival. The prophecy pictures for us the ravages wrought by locusts (1:1-7), from which and from drought the land suffers (8-20), and he bids them fast and cry, 'For God is my Saviour.' In chapter 4, he either another invasion of locusts, or an attack by human foes under the imagery of locusts—probably the latter. In vv. 18-27 we have the promise of abundant blessing on the repentance of the people, and 2:28-3:1 tells of the Messiah and of God's judgments of all nations. Joel is twice cited in N.T., once in Ac. 2:17, and 2:32 in Ro. 10:13. Credner, Joel (1831): Ewald, Prophets of O.T. (Eng. trans.); Pusey, in Minor Prophets; Meyrick, in Speaker's Comm.; G. A. Smith, in Twelve Prophets, vol. 1.; Driver, in Camb. Bible for Schools and Colleges.—2. Elders son of Samuel (2 Sam. 8:2; 1 Chr. 6:13, 15, 17).—3. A Kohathite (6:36), called Shilah in ver. 24.—4. A Simeonite prince (4:35).—5. A Reubenite (5:4).—6. A Gadite chief (5:12).—7. A chief of the tribe of Issachar (7:3).—8. (11:38) [Igal, 2].—9. A Gersomite chief in the reign of David (15:7, 11); perhaps the same as the descendant of Jehoiada mentioned in 23:8, 26:24.—10. A chief of the half-tribe of Manasseh, of Jordan, in the reign of David (27:10).—12. A Kohathite Levite in the reign of Hezekiah (2 Chr. 29:12).—13. One of the sons of Nebo who had married foreign wives (Ezr. 10:4, 13).—14. The son of Zichri, a Benjamite (Ne. 11:9).—[k.s.].

**Jofra** = Jo'kaham, son of Zorobabel (Zerubbabel) (Ezr. 2:2).—2. Zedekiah, son of Zerubbabel and grandson of Jorokia, and head of the sacerdotal race (2 Chr. 36:17).—3. A Korhite, one of David's captains at Ziklag (1 Chr. 12:7).

**Jozbe'zer,** a Korhite, one of David's captains at Ziklag (1 Chr. 12:6).

**Jogabeh,** a city fortified by the tribe of Gad (Num. 32:35) on the mountains (Judg. 8:11). Now the ruin Jubabeh, 7 miles N.W. of Amman (Sura E. Pal. p. 117).

**Jogil,** last king of Buuki, 2 (Num. 34:27).—2. A Gadite (Num. 1:55).—3. A Nethinim, a member of the Hanunite tribe (2 Chr. 26:8, 11).—4. A man of Pekah (2 Chr. 21:11).—5. A Levite, son of Zelah (1 Chr. 9:36).—6. A Levite (1 Chr. 9:35).

**Johana** = Jehohanan = 'Jehovah has been gracious;' In N.T. "Johann."—1. Son of Azariah, the son and father of Azariah, 6, and descendant of Zakok (1 Chr. 6:9, 10). His pontificate probably fell in the reign of Rehoobom.—2. Son of Elioenai, in the line of Zerubbabel's heirs (1 Chr. 3:4).—3. Son of Kereah, and one of the captains of the scattered remnant of the army of Judah who escaped in the final attack upon Jerusalem
JOHANNES

by the Chaldeans. He vainly warned Gedaliah against the plot of Ishmael, and after his murder was one of the foremost in the pursuit of his assassin, and rescued the captives carried off from Mizpah (41.11-16). Despite this, he and the captains feared the vengeance of the Chaldeans, and (notwithstanding the warnings of Jeremiah) retired into Egypt. — 4. The firstborn son of Josiah, king of Judah (1 Chr. 3.15), who probably predeceased his father or died with him at Megiddo. — 5. A Benjamite who joined David at Ziklag (12.4). — 6. A Gadite warrior, who followed David (12.12). — 7. The father of Azariah, an Ephraimite (2 Chr. 28.12). — 8. Son of Hakkatan, and chief of the Bene-Azgad who returned from Babylon with Ezra (Ezr. 8.12). The "son" of Eliaishib, one of the chief Levites (Ezr. 10.6; Ne. 12.23); some identify him with Jonathan, 11, who was grandson of Eliaishib. — 10. Son of Tobiah the Ammonite, and husband of the daughter of Meshullam (Ne. 6.18).

JOHANNES (1 Esd. 9.29) = JEHOHANAN, 4.

John. — 1. One of the high-priest's family, who, with Annas and Caiaphas, sat in judgment upon the apostles Peter and John (Ac. 4.6). — 2. A kinsman of one of them. — 3. The Heb. name of the evangelist Mark (Ac. 12.12, 25.13, 15.37). — 3. The father of Simon Peter (R.V., Jn. 1.42, 21.15.17). A variant of the name Jonas; the latter is undoubtedly the reading in Mt. 16.17. [A.C.D.]

John the Apostle. Of St. John's early life we know only that it was passed in fairly easy circumstances. His father Zebedee had hired servants (Mk. 1.20), and must have been a well-to-do fisherman on the sea of Galilee; and John was known to the high-priest, and had a house in Jerusalem (Jn. 18.15, 19.25). His mother Salome (Mt. 27.56; cf. Mk. 15.40, 16.1) may have been the opening of him, and his older brother James (Mt. 26.7), asked for her sons James and John to sit at either hand of Him in His kingdom (Mt. 20.21), and stood by the cross. If four women are meant in Jn. 19.25, Salome may well have been the Virgin's sister. St. John's age is nowhere given; but everything seems to show that he was young—perhaps a little over 20—during our Lord's ministry. He seems to have followed the Baptist first, for there can be little doubt that Andrew and John were the two disciples to whom the Baptist pointed out the Lamb of God (1.37-40). They abode that day with Jesus, went with Him to the marriage at Cana, thence to Capernaum, and so to Jerusalem (2.2, 12, 22), and back through Samaria (4.8) to Galilee. The formal call to follow Jesus was given after this at the miraculous draught of fishes (Mk. 1.20), and the choice as an apostle came later still (3.17). Henceforth St. John is one of the three chief apes who alone are allowed to witness the raising of Lazarus (john. 11.57). The Transfiguration (9.2), the prophecy on the mount of Olives (13.3; Andrew a fourth this time), and the agony in the garden. St. Peter is always foremost; but St. John is "the disciple whom Jesus loved," and reclining on Jesus' breast was able to throw back his head (Jn. 13.25) and ask the question which St. Peter could not. After the Resurrection St. John seems to have followed with St. Peter, and obtained admission to the council hall by his acquaintance with Caiaphas. He must, indeed, have seen nearly the whole of the Passion, for he was standing by the cross when the Lord committed His mother to his charge; and must have returned at once, for he witnessed the blood and water coming out at the thrust of the spear (19.26, 27, 34, 35). After the Resurrection Mary Magdalene runs to Peter and John with the news that the stone is removed, and they go together to examine the empty sepulchre (20.2-6). St. John was also present at the second miraculous draught of fishes; and when St. Peter asks, "What of this man?" the answer is, "If I will that he stay till I come, what is that to thee?" St. John did outstay the Lord's coming to judge Jerusalem. After the Ascension and the descent of the Holy Spirit, Peter and John go to the temple, and sit (15.10) at the extreme right of the lambs, just as the apostles in the N.T. can be said to sit (Acts 2.42). Simon Peter and John are next sent down to receive the converts in Samaria (8.14). Long afterwards James (the Lord's brother) and Peter and John were the three 'pillars' at the time of the Apostolic Conference, 50 years after the death of St. John. But there is no direct mention of him in the N.T. He must, however, have left Jerusalem some time before the outbreak of the Roman war in 66, though he cannot have reached Ephesus when the Pastoral Epistles were written (c. 63-66 A.D.). The next thing certain is that he was exiled to Patmos, and saw there the Revelation. This may have been under Domitian (81-96 A.D.), but Nero's persecution (from 64 A.D.) is more likely. His gospel, however, must certainly be placed in Domitian's time. To this we may add, on the authority of Irenaeus, that he lived to see the opening of the great persecution (96-98 A.D.). Traditions are many; and some of them seem true, e.g. that of the robber, told by Clement of Alexandria; and the story that he jumped out of the bath when he heard that Cerinthus was in the house is quite in character. Again, the account of the origin of his Gospel given in the Muratorian Fragment—that St. John was to write and all the rest to certify—exactly agrees with Jn. 21.24. But many traditions are doubtful, or worse than doubtful, e.g. that he came to Rome and was put into boiling oil at the Latin Gate in Domitian's time. St. John was not the mild character he is often considered to be, but eminently impetuous and stern. Not for nothing did the Lord call the sons of Zebedee sons of Thunder. James and John wish to call down fire on the Samaritans, and to forbid one "who followeth not with us" (Lk. 9.49, 54). Later on, he is everywhere at Peter's side. No other writer in the N.T. speaks so sternly of offences, and no more forcibly warns against the tremendous defiance of the Roman Empire.
JOHN THE BAPTIST

than we find in the Revelation. St. John was a born mystic, feeding on the mystic sides of our Lord's teaching, and shaping himself by it till his own style resembles the Master's. But on the other hand, he was endowed with a priestly race by both parents, for his father Zacharias was a priest of the course of Abia, or Abijah (1 Chr. 24:16), offering incense at the very time when a son was promised to him; and Elisabeth was of the daughters of Aaron (Luk.1:5). The divine mission, John had been the subject of prophecy. His birth—a birth not according to the ordinary laws of nature, but through miraculous interposition—was foretold by an angel sent from God, who proclaimed John's character and office. These revelations shook the faith of the aged Zacharias, who was punished by temporary dumbness. Elisabeth, for greater privacy, retired into the hill-country, whether she was soon followed by her kinswoman Mary. Three months later, and while Mary still remained with her, Elisabeth was delivered of a son, six months before our Lord's birth. On the eighth day the child of promise, in conformity to the law (Lev.12:3), was brought to the priest for circumcision, and the friends of the family proposed to call him Zacharias, after his father. The mother, however, required that he should be called John—a decision which Zacharias, still speechless, confirmed by writing on a tablet "his name shall be John." The judgment of his lack of faith was then at once withdrawn. A single verse contains all that we know of St. John's history for the thirty years between his birth and the commencement of his public ministry: "The child grew and waxed strong in spirit, and was in the deserts till the day of his showing into Israel" (Luk.1:80). He was ordained to be a Nazirite from his birth (1:15). Dwelling by himself in the wild and thinly peopled region W. of the Dead Sea, he prepared himself by self-discipline, and by constant communion with God, for the office to which he had been divinely called. He had as his companion; his dress was that of the old prophets—a garment woven of camel's hair (cf. 2K.1:8), attached to the body by a leathern girdle. His food was such as the desert afforded—locusts and wild honey. His supernatural birth, ascetic life, reputation for extraordinary sanctity, and the generally prevailing expectation that some great one was about to appear, sufficed, without the aid of miraculous power, for "John did no miracle" (Jn.10:41), to attract a great multitude from "every quarter" (Mt.3:5; Luk.3:7). Brief and startling was his first exhortation to them: "Repent ye, for the kingdom of heaven is at hand." Some score of verses contain all that is recorded of St. John's preaching, and the sum of it all is repentance; not mere legal ablation or expiation, but a change of heart and life. Many of every class pressed forward to confess their sins and to be baptized. The waters of the Jordan were the sign to the people that renunciation of sin and amendment of life were necessary for admission into the kingdom of heaven, which the Baptist proclaimed to be at hand. But the fundamental distinction between the baptism of John and that accompanied with the gift of the Holy Spirit which our Lord afterwards ordained is clearly marked by St. John himself (Mt.3:11,12). As a preacher, he was endowed with a priestly task, a priestly office. His mission—an extraordinary one for an extraordinary purpose—was not limited to those who had openly forsaken the covenant of God, and so forfeited its principles. It was to the whole people alike. Jesus Himself came from Galilee, Jordan, the land of John. "Henceforth the Baptist's especial office ceased. But from incidental notices in Scripture we learn that he and his disciples continued to baptize for some time after our Lord entered upon His ministry (see Jn.3.23,41; Acts.19), and that St. John instructed his disciples as regards fasting (Mt.9:14; Luk.5:33) and prayer (Luk.11:1). But shortly after he had given his testimony to the Messiah, St. John's public ministry was brought to a close. In daring disregard of the divine laws, Herod Antipas had taken to himself the wife of his brother Philip; and when St. John reproved him for this, he cast him into prison. The place of his confinement was the castle of Machaerus—a fortress on the E. side of the Dead Sea. Here reports reached him of the miracles of our Lord in Judaea. With a view perhaps of overcoming the scruples of his disciples, St. John sent two of them to Jesus to ask, "Is this the One that should come?" They were answered by a series of miracles wrought before their eyes; and while Jesus bade the two messengers carry back to St. John as His only answer the report of what they had seen and heard, He took occasion, by a direct appeal to their own knowledge of His life and character, to guard the multitude against supposing that the Baptist himself was shaken in mind. Jesus further declared that St. John was, according to the true meaning of the prophecy, the Elijah of the new covenant, foretold by Malachi (3:1). John was indeed to Herod what Elijah had been to Ahab. Elijah foretold that a prophet after his manner would satisfy the resentment of Herodias. A court festival was kept at Machaerus in honour of the king's birthday. After supper, the daughter of Herodias came in and danced before the company, and so charmed the king that he promised with an oath to give her whatever she should ask. Salome, prompted by her abandoned mother, demanded the head of John the Baptist. Herod gave instructions to an officer of his guard, who executed St. John in the prison. H. Reynolds, John the Baptist; Hort, Judæo-Christianity; Ebersheim, Life and Times of the Messiah; Darwell Stone, Holy Baptism.

JOHN, GOSPEL ACC. TO ST.
traces of the gospel in the scanty remains of his writings, and almost certainly included passages from it in his commentary. Justin Martyr (c. 150-163) uses 3.4 and other passages, and base his whole system on the thoughts of the Fourth Gospel. His disciple Tatian (c. 170) made a harmony of our Four Gospels, and quotes the Fourth, while Theophilus of Antioch (c. 182) expressly names John as its author. The earliest quotations which have come down to us are by the Gnostics. Basilides, and his disciples, made great use of it; also Valentinus (c. 140), and Heracleon, a Valentinian teacher (before 180), wrote a commentary on it. With the insignificant exception of the Alogi, no heretics appear to have disputed its authorship; and of the rest, only Marcion rejected its authority. Later in the century Apollinaris of Hierapolis, Athenagoras, and the letter of the churches of Lyons and Vienne, accept it; and the remarkable account of its origin given in the Muratorian Fragment on the Canon seems based on a true tradition. The weightiest evidence of all remains. Irenaeus (c. 130-200) was a disciple of Polycarp, by whom he was told the tradition of St. John. There is no room for mistake in his distinct statement that St. John wrote the Fourth Gospel. But his evidence implies much more than his own belief. He is so convinced that there are four gospels (confessedly, our four) that he actually argues that the Gospels of the Twelve, if only because no others were present in the supper-chamber; and if he was one of the Twelve, we can hardly fix on another than John. The only difficulty is the statement that "John the Divine was killed by Jews," which is not ascribed to Papias. Irenaeus tells us that John lived to the reign of Trajan; and as the truth must have been familiar both to him and to Papias, they cannot have contradicted each other. But we have the words of Irenaeus in a Latin translation of his own time, whereas those ascribed to Papias are only quoted by two late Byzantines, who seem to have got them from Philip of Side—a notorious blunderer.—II. PLACE AND TIME OF WRITING. It is generally agreed that the Fourth Gospel was written after the other three, not so much to supplement them, as to present the Person of the Lord from another point of view. So the writer passes over many well-known stories, like the Miracles of the Galilean ministry, assuming them or alluding to them, but preferring first to develop the meaning of seven selected "signs," then to relate the discourses in the supper-chamber. All the evidence confirms the statement of Irenaeus, that St. John wrote it in his old age in Asia, when we may roughly date it 85-95.—III. CONTENTS AND PLAN. The Fourth Gospel is essentially a prophecy: not in the sense of prediction, but as showing the eternal significance of the events of time. It is the epic of the contest of light and darkness. In the beginning the Word is already thrown face to face with God; and the eternal counsel was that things created should in Him be life. He was immanent in the world, and the world knew Him not. He came incarnate to His own people, and His own people received Him not. The Incarnation was the full and final manifestation of God; and the glory of the incarnate was so great that all the light of the world was dark by reason of the brightness of the love of His disciples grew more and more firm, the hatred of the renegade "Jews" more and more bitter, till the revela-
tion reached its highest glory in the Crucifixion, Resurrection, and Ascension—for St. John links these three together as one process of "glorification" (1.35-31), the first "sign" (at Cana) (2.1-11). Nicodemus (2.1-3.36), the woman of Samaria (4.1-12), the second sign (the nobleman's son) (4.3.45.54). (b) The Contest (5.1-12.50), including the third sign (5) (impotent man) and discourse of the Son and the Father; fourth and fifth signs (6) (the five thousand, the walking on the water (e.g. Paulus, Justin, Irenaeus, Tert, and Clem. Alex.) have recognized it as his. It is by implication included as "received in the Catholic (Church)" by the Muratorian Fragment (2nd cent.), and both Euseb., and Jerome place it among the acknowledged books of the Bible. The internal evidence of its style, subject, and treatment serves to identify the author with the writer of the Fourth Gospel. [JOHN, GOSPEL ACC. TO.] The two writings must therefore stand or fall together, though the natural signs of independence between them should not be overlooked (see Dr. Salmond's art. in Hastings, D.B. [5 vol. 1904]). In form it is an epistle of Life, the feast of tabernacles (7.8) and discourses thereon; the sixth sign (the man born blind), the investigation by the Sanhedrin and discourse thereon (9.10); the seventh sign (Lazarus) and its issues, and close of the public ministry (11.12). (b) The Word revealed to His disciples (13.26) (at Supper) (13.1-30), the last discourses (13.31-16.33), the prayer of consecration (17). (b) The Victory (18.1-20.31), including the betrayal (18.1-11), trials (18.12-19.16), crucifixion (19.17-42), and resurrection (20). (3) The Epilogue (21), including the additional sign (draught of fishes), the final word of love (21.15-24), the seal of the Holy Spirit addressed "to (an or the) elect lady," or "to lady Electa," or "to the elect Kyria"—if the definite article should be supplied, possibly we have here a cryptic appellation of some Christian community or church (cf. 1 Pe. 5.13) and the third to "the beloved Gaius." The writer in both cases calls himself the elder (Gk. παπατιτερός: Vulg. senior), and it has been doubted, without much reason, whether the apostle would thus designate himself. The title seems to be one especially in use in the Asiatic churches, and not in itself unnatural in a private, unofficial letter. These two epistles have not been so hesitatingly accepted as those of Paul. [CANNON OF N.T.] The Muratorian Fragment, Clem. Alex., Dion. Alex., and the old Lat. version are among the earliest authorities for them. On the other hand, the Peshitta-Syracian does not contain them, and the Syrian Church itself rejected them. Origen and Eusebius both acknowledge their epistolary fulness. The internal evidence, however, corroborates the general judgment of the Church. The style and treatment are distinctly Johannine, though here again some of the words and phrases are not found elsewhere in St. John's writings. Both epistles were probably written from Ephesus soon after the first. In the former the "elect lady" and those associated with her—the pronouns are "vou, not "than," in 1 v. 6-10, but apparently persons different from her "children" mentioned in ver. 4 are addressed—are warned against false teachers and the Lord's incarnation, who would imperil their walking in love towards the brethren. In the latter the apostle (1) expresses his pleasure at the good report which reaches him of Gaius—especially of his hospitality; (2) contrasts the love of inter-
ferring and dictating displayed by Diotrephees —probably in opposition to Gaius—with the more reasonable conduct of Demetrius, which has gained the approval of “all and of the Truth Itself” (viz. Christ). An extensive bibliography will be found in Dr. Salmon's article, in Hastings' *D.B.* (5 vols. 1904); but for most purposes Westcott's Commentary throughout remains sufficient. [C.L.F.]

**Joiada.** high-priest after his father Elia-

shib (Ne.12.10.11,22.13.28).

**Jolakkim,** a high-priest, son of Jeshua
(Ne.12.10.12).

**Jolahnab.** 1. A “man of understanding” who assisted Ezra in the arrangements for the return (Ezr.8.16).—2. [Hehioiabir.].—3. An ancestor of Mæsaëfah, 9 (Ne.11.5).

**Jokdeam,** a city of Judah, in the moun-
tains (Jos.15.6), apparently S. of Hebron. The site is unknown. [C.R.C.].

**Jokshan,** a son of Shelah, son of Judah (1 Chr.4.22).

**Jokmeam,** a city of Ephraim, given with its suburbs to the Kohathite Levites (1 Chr.6.68). In Jos.21.22 Kirazim occupies the place of Jokmeam. The R.V. reads Jokmek for Jok-

meam in 1 K.4.12, but this is topographically impossible as applying to the Kirazim (C.R.C.).

**Jokneam,** a city of the tribe of Zebulun, allotted with its suburbs to the Merarite Levites (Jos.21.34). It was a royal city near Carmel (12.22) by a river (the Kishon), and thus at the S.W. angle of the tribal lot. Now the ruin Tell Qimīn, at the foot of Carmel, W. of the Kishon where it passes from the plain of Esdraelon to the Sea of Galilee. (See 1 K.4.12, where R.V. reads Jokmekam.) [C.R.C.]

**Jokshan,** a son of Abraham and Keturah (Gen.25.2.3; 1 Chr.1.32), whose sons were Shema and Dedan.

**Joktan,** in the genealogies in Gen.10 and 1 Chr.1, the second son of Eber, the elder brother of Peleg, the ancestor of Abraham. Joktan is said to have had 13 sons, whose “dwelling was from Mesha as thou goest unto Sephar, a mount of the east” (Gen.10.30). Several of these have not yet been identified; but the family of Joktan has generally been located in S. Arabia. Among the sons of Joktan are Haran, Melzar, Matred, Eliakim, and Garmash; with whom the author of Genesis identified Joktan with Qaṭṭān, a people in the S. of the peninsula; but this seems only due to an assumed similarity of name, and rests on no tradition earlier than the time when the Arabs became acquainted with Genesis. A Targum on 1 Chr. derives Joktan from the Heb. root qtn, “to be little,” signifying that he was inferior to Peleg, the ancestor of Abraham. There is a district in Arabia called Qaṭṭān, which may be connected with this name, and the Katanites are mentioned by Ptolemy. [R.J.F.-J.]

**Joktheel.**—1. A city in the low country of Judah (Jos.15.38), named next to Lachish. —2. “God subdues,” the title given by Amaziah to the eiliff (A.V. Selah)—the strong-

hold of the Edomites—after he had captured it (2 K.14.7; see 2 Chr.25.11.12). This “rock” was probably Petra (L.X.X.). [Sela.] [C.R.C.]

**Jona,** father of St. Peter (Jn.1.42) who is hence called Simon Bar-Jona in Mt.16.17.

**Jonadab.**—1. Son of Shim'eah, and nephew of David. He was “very subtil,” and his age naturally made him the friend of his cousin Amnon, heir to the throne (2 Sam.13.3). He gave him the fatal advice for ensnaring his sister Tamar (5). Later, when Amnon was murdered by Absalom, and the exaggerated report reached David, “all the land was wreaked,” Jonadab was already aware of the real state of the case (32,33).—2. (J.e.35. passim.) [Jehonadab].

**Jonah.** The writer of the fifth book of the minor prophets (sixth in L.X.X.) is identical with the prophet named in 2 K.14.25 f., the son of Amittai of Gath-haφer in Zebulun, who predicted to Jeroboam II. the reconquest of the kingdom of Israel from the Syrians (according to Kautzsch, 783-743 B.C.). His grave was shown in later times at his birth-

place, Gath-hepher, the present El Meshed-bed; and a modern tradition which places it at Nebi Yānūs, opposite Mosul (Layard's *Nineveh*, p. 151), also too remote, has been disproved. It is proved by its incompleteness as a biography and by its position in the prophetic canon not to be a biography by some other hand) is intended to show (cf. Jon.4.2.101) that God is merciful even towards the heathen nations on their repentance—a fact which the prophet is forced to prove himself by the finishing of his struggling against it. The universalism which other prophets only stated in words, the experiences of Jonah in Nineveh manifested as a fact, and this, moreover, just at a time when serious complications with Assyria were arising for Israel (see Menahem's enforced tribute; 2 K.15.10ff.), the whole tendency and the weight of the book and of the prophet's position in the Bible are directed towards a broad interpretation of the general subject of the book finds increasing acceptance. It is held by Kautzsch, Nowack, Marti, Baudissin, König, Kuenen, Strack, Keil, Schlatter, Riehm, and Driver, amongst others. The allegorical interpreta-

tion that Jonah means Israel with its mission-

carrying and the fish the world—poetry which does not accord with the text, and is supported by only a few, e.g. Kleinert, Cheyne, and C. H. H. Wright. The dismemberment into sources, which Böhme (Zeitschrif für die A. T. Wissens-

chaft, vii. 224 ff.) elaborates, has found no acceptance, as it appears too artificial and with too little reason. The opinion of Budde (zb. xii. 40 ff.) that the book is originally an extract from the Midrasch of the “Kings,” and stood after 2 K.14.25 f., is very improbable. Even Kuenen refuses to believe that the history had its origin from Babylonian, Greek, Buddhist, or Egyptian myths. Modern critical opinions as to the date of its composition fluctuate between 550 and 300; yet at least
some critics recognize a greater or less historical nucleus. It is held to follow necessarily from Jon.3.3 that the book was written long after the destruction of Nineveh (605 B.C.). But can a prophecy, of which the main point is the preservation of Nineveh, have arisen after its destruction? 3.3 must therefore be taken as a synchronistic perfect, like Gen.1.2. When Jonah came to Nineveh, it "was a great city." (For another view, see Nineveh.) The Aramaic inscription of the Book of Nineveh (605 B.C.) has Gilion's name—e.g. the "c." for "G." occurs also in the northern poem of Deborah. Only by the assumption of its gennineness can the position of the book amongst the "prophets" (strictly so understood) be satisfactorily explained. The notice in 2K.14.25f. is not properly intelligible unless the author of the Elijah and Elisha records knew him to be a prophetical writer. The authenticity of Jon.2, which is related to so many places in the Books, involves questions of priority and of the criticism of the Psalms. If the psalm was first composed in its present form after Jonah's actual deliverance, the thoughts correspond to the situation. Thankfulness was assuredly not out of place, when Jonah has just escaped. And how otherwise could The thoughts have been suggested, and why did the supposed interpolator insert them in a place unsuitable to them? The idea of a haphazard throwing together of fragments of unrelated poetry is excluded by 2.2.9, which indicate an occasion and a purpose. Fredericksen, K. Ueber Sicht d. Verschieden Au- sicht auf Jon. (187 and ed.); [Jonas].

Jo'nan, son of Eliakim, in the genealogy of Christ (Lk.3.30).

Jo'nas.—1. A Levite who put away his foreign wife (1Esdr.9.23). Perhaps he is the same as the Eleazar of Ezr.10.23.—2. The prophet Jonah (2Esdr.1.39; Tob.14.1,8; Mt.12. 39-41,16.4;—3. (Lk.21.3-17; [Jonas].

Jonathan.—1. Eldest son of king Saul. The name ( ='the gift of Jehovah) seems to have been common at that period. He first appears some time after his father's accession (1Sam.13.2). If his younger brother Ish-bosheth was 40 at the time of Saul's death (2Sam.2.8), then Jonathan was at least 30 when first mentioned. Of his own family we only know of the birth of one son, 5 years before his death (2Sam.4.1). He was re- garded in his father's lifetime as heir to the throne. Like Saul, he was a man of great strength and activity (2Sam.1.23), of which the exploit at Michmash was a proof. He was also famous for the martial exercises in which his tribe excelled—archery and sling- ing (1Chr.12.2). His bow was to him what the sword was to his father (2Sam.1.22). It was always with him (1Sam.18.4,20,35f.). He is chiefly known through his relations with David, probably as related by his descendants at David's court. But there is a background, not so clearly given, of his relations with his father. From the time he first appears he is Saul's constant companion, always present at his meals. The whole story implies the deep affection which their union of mind and affection was indeed interrupted by the growth of Saul's insanity. But Jonathan cast his lot with his father's decline, not with his friend's rise, and "in death they were not divided" (2Sam.1.23; 1Sam.23.16-18). The story of his life may be divided into two main parts, derived, according to some critics, from an older and a later source. At first death appears as a warrior, the second reveals his friendship with David. The campaign against the Philistines, in which Jonathan stands out as the hero, is commonly called, from its locality, "the war of Michmash" (1Sam.13.14). In the previous war with the Ammonites (11.4-15) there is no mention of him, but he is already of great importance in the state. Of the 300 men of Saul's standing army (13.2, 24, 26.1-2), 1000 were under the command of Jonathan at Gibeah. The Philistines still occupied most of the country; an officer was stationed at Gibecah. In a sudden act of youthful daring Jonathan slew this officer, and thus gave the signal for revolt. Saul took advantage of it, and the Philistines, having under the command of Jonathan at Gibeah, the wild retreat: he now joined in the pursuit. Jonathan had not heard of the rash curse (14.21) which Saul in- volved on any one who ate before the evening. In the dizziness and darkness (see 1Sam.14.27, Heb.) that came on after his desperate exer- tions, he put forth the staff which had been with his (sling and bow) been his chief weapon, and tasted the honeycomb which had been snatched by (see Forest). Jephthah's dreadful sacrifice would have had a parallel: but the people interposed, and Jonathan was saved (14.21-46). The chief interest of his career lies in his friendship with David, which began on the day of David's return from the victory over Gath, and continued till death (18.1-4,19.1-7,20.23,11-18). Their last meeting was in the forest of Ziph, during Saul's pursuit of David (23.16-18). From this time forth we hear no more till the battle of Gilboa. In that battle he fell, with his two brothers and his father, and his corpse shared the fate of theirs (31.2.8-10). His remains were buried first at Jabesh-gilead (13), but afterwards re- moved with those of his father to Zelah in Ben- jamin (2Sam.21.12). The news of his death occasioned the celebrated elegy of David.— 2. Son of Shimmeah, brother of Jonathan and nephew of David (2Sam.21.21; 1Chr.29.7). Like his brother, their union of mind and affection was interrupted by the growth of Saul's insanity. He probably is the same as Jonathan in 1Chr.27.32, who is described as David's
JONATHAS

brother's son (R.V. Marg.), a counsellor, a wise man, and an or-ator. 8. The son of Abshai, the high priest. He is the last
descendant of Eli, of whom we hear. He appears twice: (1) on the day of David's flight from Absalom (2Sam.15.36-17.15-21); 
(2) on the day of Solomon's inauguration (1K.4.22-43).—4. One of David's heroes; son of
Shage the Hararite (1Chr.11.34), or
Hashem the Gizonite (= Jashen; cf. 2Sam.23.32, where Shammah represents Shage and is himself one of the guard).—5. The son, or 
descendant, of Gershom, the son of Moses (Judg. 18.30, "Manasseh," A.V., being a corrupt reading for Moses, cf. R.V.; perhaps here inserted by Jews out of respect for the name of Moses). [Manasseh, 4.] Wandering through
the country in search of a home, the young Levite of Bethlehem-judah came to the
house of Micah, the rich Ephraimite, and was by him appointed to be a kind of private
chaplain. When the Danites went north-
wards to found a city, Jonathan went with them through the country of Micah, and
became priest of the Danites at Laish or
Dan (Judg.18).—3. One of the Bene-Adin
(Ezr.8.6; 1Esdr.8.32).—7. A priest. son of
Asahel; one of two who judged those who
had made mixed marriages (Ezr.10.15).—8. A
priest of the family of Melicu, in the days of
Jesus son of Hososan, about the 6th cen-
tury B.C. ; in whose house Jeremiah was impris-
ioned (Je.37.15,20,38.26).—10. Son of
Kareah, and brother of Johanan (40.8); 
one of the captains of the army who had es-
caped from Jerusalem in the final assault by
the Chaldeans, and with his brother Johanan
resorted to Gedaliah at Mizpah.—11. Son of
Jolada, and his successor in the high-priest-
hood. Scripture records that the genealogies
of the priests and Levites were preserved in
his day, and that the chronicles of the state
were continued to his time (Ne.12.12,22,23).
Josephus (Ant. vi. 1) states that he murdered
his own brother because, he says, "Jesus was endeavouring to get the high-
priesthood from him through the influence of Bagose, the
Persian general."—12. Father of Zechariah,
a priest who blew the trumpet at the dedication
of the wall (12.33).—13. A son of Mattathias,
and brother of Judas Maccabaeus (1Mac.9.19 ff.).—14. A son of Absalom (12.11), sent by
Simon with a force to occupy Joppa, which was already in the hands of the Jews (ch. 12).
[SPARTA.] Jonathan was probably a brother of
Mattathias, 3 (11.70).—15. A priest who
offered up a solemn prayer on the occasion of
the sacrifice made by Nehemiah after the
recovery of the sacred fire (2Mac.1.23ff.).
Jonathas (R.V. Jathath), son of "the
great Samaias" (Tab.5.13).
Jonath - elim - rechokim. [PSALMS, 
TITLES OF.]
Joppa, Japho' (Jos.19.46), Joppe (in
Apoc.), the nearest sea-port to Jerusalem.
The name means "fair," probably from its
gardens and fruits, which are said to be
enormous even in the 1st cent. B.C. The
town was not taken by Joshua, and the border of Dan apparently excluded it
(Jos.19.46); but Joppa was Solomon's port
(2Chr.2.16; cf. 1K.5.9; Ezr.3.7). From Joppa
Jonah took ship for Tarshish (Jon.1.3). The
city was captured by Jonathan the Has-
monaean in 147 B.C. (1Mac.10.75,76.11.6), after
the cruel massacre of the Jews by Greeks or
natives in 164 B.C. (2Mac.4.21.12.3-7); and it was
fortified by Simon as a haven, though still
claimed by the Greeks in 135 B.C. (1Mac.14.5, 34.15.28,35). Though often besieged later,
and destroyed by Vespasian as the home of
pirates, the city has always maintained its
importance as a trading port, with a natural
harbour formed by a dangerous reef, and with
an artificial port (now called the "moon-pool," and
silted up). S. of the town which stands on
a low hill by the shore. The modern Yafa
(Jaffa) is still a prosperous city of 8,000 in-
habitants, with line orange gardens in the
sandy plain to E. The mediaeval walls still
enclose it. The ancient Jewish cemetery,
explored by M. Clermont-Ganneau, E. of the
town, has yielded texts of Rabbis living in the
pp. 254-258, 275-278]. A Phoenician text has
also been found, but its genuine character is
disputed. It contains the so-called "letters of
Jeremiah," and letters of 15th cent. B.C., two of them being
written thence (Brit. Mus. 57. 71). It was
defended for Egypt by its ruler. The
Egyptian Mohar who reached it a century
later speaks of its date palms and gardenis, of
thieves who stole his armour and frightened
his horses, and of the smiths and carpenters who repaired it
Joppé, often in Apoc.—e.g. 1Esdr.5.55; 
1Mac.10.75, etc.: 2Mac.4.21,12.3,7, for JOPPA.
Jorah', the ancestor of a family which re-
turned from Babylon with Ezra (Ezr.2.18). 
In Ne.7.24 the same family are represented as
the sons of Hariph. The variation of name

to indistinct writing in a MS.
Jorai', a Gadite dwelling in Gilead in
Bashan, when Jotham was king (1Chr.5.13).
Joram — 1. (2K.8. 16,25-29,3.14,etc.) = Je-
horam, 1. (1K.15.29-31).—2. (1K.4.31; 
22.5.7; Mt.1.8) = JEHORAM, 2.—3. A Levite,
ancestor of Shelomith, 4 (1Chr.26.25).—4. A priest in
Jehoshaphat's reign (2Chr.17.8).—5. 
[HADORAM, 2.]—8. (1Esdr.1.9) = Jozabah, 4.
— Jordan, River. The name is usually
rendered the descender ; but the old
translation—"river of Dan"—was perhaps
not far wrong, if we remember the Assyrian
danu, "great." For yor-dan might simply
mean "the great river." In two passages
( Gen.50.10,11; Job 40.23), where a great
river is intended, Jordan does not seem to be
meant. [ABEL 4.] The Jordan is noticed
in 76 chapters of O.T. and in 11 of the N.T. Its
valley is called the kikkar of Jordan (Gen.13.
10; Jos.22.11; 1K.7.46; 2Chr.4.17). [RE-
GION.] The famous stoppage of the river
(Jos.3.16) probably occurred 25 miles from its
mouth. [ADAM, CITY.] The fords of Jordan
are often noticed ( Jos.2.7; Judg.3.28,12.5,6), and
a raft was used to carry over David's
household (2Sam.19.18). The river is said to
overflow its banks about the time of Pass-
over, in the first month (Jos.3.15; 1Chr.12.
15). The "swelling" (Je.12.5,49.19,50.44),
or "pride" (A.V. Zech.11.3), of Jordan then
drove the lions from the coverts of the lower
channel. Jordan in March, when the Hermon snows begin to melt, often fills the Zör, or channel (a mile wide), in which the river winds amidst bushes of tamarisk and cane brakes. The lion no longer haunts Jordan along these, but its bones have been found in the gravel beds on the banks. The Jordan is said to have been again dried, that Elijah and Elisha might pass (2K.2.7.13), and was the scene of another of Elisha’s miracles (6.27). In it Naaman the Syrian bathed to cure his leprosy, though preferring the brighter river of Damascus (5.10,12.14). In Jordan our Lord also was baptized (Mt.3.13; Mk.1.9; Lu.3.21; Jn.1.29).

Geographical Description. The sources and course, the alliments, fords, and bridges, and the valley (kikkar) itself, are now known by accurate survey.—The geographical Source is a rock near the town of Ḥāṣebiyah, high up on the W. slope of Hermon; but the historical source is at Bānīās. [Caesarea Philippi.] The Bānīās stream is the largest of seven, which unite to form the river about 6 miles S.W. of this source; the Lellān is fed by the fine spring at Tell ed Qādy [Dan] and by another in the W. of the Hashmūn (Ḥāṣebiya River) streams flow S.E. and E. from the slopes of Upper Galilee, the three chief springs being ‘Ain Barbir (of murmurations), ‘Ain edh Dhāheb (of gold), and ‘Ain Derdīrah (of the cub), which last is the farthest N. These streams flow down rapidly, the fall in the 6 miles from Bānīās being about 100 ft. per mile. In its total course the Jordan falls from 1,080 ft. above sea-level, at the historic source, to 1,202 ft. below sea-level at the Dead Sea.—The Course of the united streams, for the next 12 miles after the junction, leads S. partly through the papyrus marshes which extend 4 miles N. of the Hûleh Lake [Mekaw], and the fall is here only about 1 ft. per mile. The lake is 4 miles long, and on leaving it the river again runs rapidly to the sea of Galilee. The lake S. the fall being 70 ft. per mile. On leaving this lake, 682 ft. below the Mediterranean [Gennesaret], the Jordan enters the great valley, 10 miles wide, and winds in its midst in a dark channel (the Zör), which is sometimes quite narrow, sometimes a mile wide, with steep mud banks 50 ft. high. The stream is about 30 yrs. across, the water turbid and full of coarse species of fish, the Zör being full of tamarisk bushes and canes. The fall here being 6 ft. to the mile, is a shallow gravelly bed, and small rapid in the N. part of the Ḥâr, or Jordan Valley. The river runs 100 miles between the two lower lakes, and forms a small muddy delta where it enters the Dead Sea.—The Affluents on the E. include several streams from Gilead, especially the Yermāq (Hieromax), near the sea of Galilee, and the Zabouns and other W. two perennial streams (the Hindāj and the Waggās) flow into the Hûleh Lake, while S. of the sea of Galilee the chief streams come down the valley of Jezerel, that of Aenon, and from ‘Ain ‘Auyēh [Naaran] and ‘Ain Qell [Achor]. The waters of Nimrim, and of the river of Gad [Jazer], also flow, even in the autumn, into the Lower Jordan.—The Bridges are not older than the Middle Ages, including that of ‘Jacob’s Daughters,’ S. of the Hûleh Lake; that of the “dam” (Ṣidd), immediately S. of the sea of Galilee; that of the “gathering” (Mujāmla), N.E. of Belšân; and the Dāmīeh bridge [Adam, City]. They are all in ruins, but an iron bridge has recently been erected E. of Jericho, at the Greek Place of Baptism.—The Fords of Jordan are most numerous between the sea of Galilee and the Dāmīeh bridge, in which distance of 75 miles there are 15 well-known crossing places. There are also two S. of the Hûleh Lake, and six below the Dāmīeh bridge, the last but one being the ford E. of Jericho—the place where Israel crossed when the waters were cut off, and the traditional site of the Baptism of our Lord. [Bethabara.] The Jordan can be crossed at many other points when the water is low in autumn. The Jericho ford is then some 2 or 3 ft. deep. Like the Amāna, the Jordan springs from subterranean caverns in the limestone, fed by the snows of Hermon. Its waters are sweet till below the plain of Beth-shean, and the valley contains hot springs at Hammath and at Gadara. It becomes narrower below Abel-meholah and there is a salt spring in the hills to W. at ‘Ain Maḥeṣ. Below this point the valley again widens, and the soil is strongly impregnated with the salt of the old lake bed, which (in the Pluvial age) extended from N. of Petra, for about 200 miles, to the vicinity of the present junction of the seven sources. The salt is carried down by the river into the present Dead Sea. [C.R.C.]

Jo‘ritical (1Es.8.44) = Jarib, 2.
Jo‘irbal (1Es.9.19) = Jarib, 3.
Jo‘irim, son of Matthat, in the genealogy of Christ (Lk.3.29).

Jorkoam, either a descendant of Caleb, the son of Hezron, or the name of a place in the tribe of Judah (1Ch.2.44).

Josabad.—1. Properly Josabad (as R.V.) the Gederathite, a warrior of Benjamin who
JOSEPH

Joseph, the 11th son of Jacob, was the elder of Rachel’s long-delayed offspring. Born in Haran, he returned with the family to Canaan, and there incurred the enmity of his brothers. The occasion seems to have been (a) his father’s indulgence to the son of a favourite wife and of his old age, represented outwardly by the gift of a princely garment (k’thōneth pa’sīḥin; used of Tamar’s dress in 2Sam.13.18); (b) an evil report of the brothers which Joseph had borne to Jacob; and (c) two dreams, predicting his future elevation, which the boy did not scruple to narrate to the family. The brothers, accordingly, sought a suitable opportunity to remove him, and found it when, as a lad of 17, he was sent to Dothan to enquire of the vineyard. But the first-born, Reuben, intending to rescue him, persuaded them to lower Joseph into an underground cistern, rather than commit violent murder. On the instigation of Judah, he was drawn up, and sold for 20 pieces of silver to a passing caravan of Ishmeelites bound for Egypt. The chief of Reuben, on discovering what had been done in his absence, was far exceeded by that of Jacob, when the sons brought him Joseph’s tunic stained with the blood of a kid, suggesting that some evil beast had devoured the lad. His subsequent reluctance to entrust Benjamin to their protection shows how strong a shock the father sustained on this occasion. The Midianite caravan sold Joseph to Potiphar, a high Egyptian officer, and apparently the head of a squadron of soldier-police. Jehovah’s presence, manifested in Joseph’s diligence and resultant prosperity, procured his successive advancement, and vouchsafed to him in due course the capacity he had complete control of all the affairs of his master’s house. But success entailed downfall, for Potiphar’s wife became enamoured of the Hebrew steward; and when he refused her repeated solicitations, she accused him of attempted violence, displaying as evidence the coat which Joseph had left in her hands as he fled from her forcible invitation. As a consequence of his master’s natural anger, he was put in the state prison, where his diligence once more procured his advancement, and the prison-keeper appointed him as deputy. While in this position he came into contact with the royal cupbearer (maskēq) and baker (ṭōphē), who had been imprisoned by Pharaoh. Eliciting from them on one occasion that their sadness was due to significant dreams, he reminded them that interpretations belonged to God, and (acting as Jehovah’s oracle) explained that the three vine branches seen by the cupbearer would bear fruit in a year, and that three ears of corn would be reaped in three years, the year of the ear. The interpretation of Pharaoh’s dream (properly = Lu.3.29). The history of Joseph is a continuation of the patriarchal story, so conspicuous in the case of Abraham and
Joseph disappears, except in the matter of the interpretation of dreams. This fact, and the more detailed incidents, give a decided and human personality to Joseph, perhaps less felt in the other cases. There is also a consistency in the temperament of the hero, a decided character, a magnanimity and generosity, a perseverance triumphing through the help of God over all difficulties, which add much to the appealing force of the narrative. Chronological and Critical. Unfortunately, the historian has supplied no chronological data. Therefore, while we are able to trace parallels and illustrations in Egyptian history and literature, we have no guide as to where to seek confirmatory evidence — famines were not sufficiently scarce there to fix a period. The general opinion is that the date of the story is at the end of the Hyksos dynasty — i.e. c. 1634 B.C. Extreme critics have, in consequence of this lack of data, and because of the inclusion of tribe names, regarded it as a picturesque description of a tribal migration to Egypt, on the analogy of the Gk. tradition of the return of the Heraclidæ. It is, however, admitted (Dillmann, etc.) that the whole setting of the narrative is truly Egyptian, the attitude Hebraic, and the promotion of a Hebrew to the post of vizier well within the bounds of probability and attested by external evidence. The story of Joseph, by its very naturalness, is difficult to dispose of; and even if a double- and interwoven narrative is discernible, there appears to be little divergence between the two traditions. The sojourn of Israel in Egypt is so constant and firm a belief, and such a postulate of all subsequent Judaism, that the original migration there deserves special attention. The local colouring of the story is consequently of more importance. The following points may be noted. (a) The reed-grass (zahhah) growing beside the river (y'ôr); the many-cared variety of corn grown in the Nile Delta is dedicated to the monarch's birthday; the shaving before entering his presence; the gold collar and cotton garment bestowed at Joseph's elevation; the use of horses on state occasions only; the trade with Midian for spices; the wine purchased from the king; the use of these beverages shows accurate knowledge of Egyptian habit and natural history. (b) There is a record of a vizier who was also supervisor of the Egyptian granaries, and who had made an official visitation of the whole land (cf. Gen. 42, 46). (c) The Amarna tablets contain the names of two Semitic officials in lofty position in Egypt. (d) The narrative of Potiphar's wife has a remarkable parallel in the Story of the Two Brothers, written for Seti II. (19th dynasty). Here the part of Joseph is taken by one brother, and his sister-in-law plays the part of Potiphar's wife. While it is possible that this story is based on the history of Joseph, the resemblance may be lateral or even accidental, and the mythical additions of the former form an instructive contrast to the soberness of the history of Joseph. (e) It seems certain that at the end of this dynasty, the ownership of the land passed from the old aristocracy into the hands of public officials, and a system of tenure based on a rental of 20% was adopted. It is, further, an historic fact that the priests were exempted from this arrangement. There is, on the other hand, as yet no evidence that the alteration was due to any cause other than the expulsion of the old aristocracy. Linguistic. The local colour is enhanced by the use of certain words of Egyptian formation. (a) Abeerch (Abbrèchh). E.V. derives from berekh, and reads "Bow the knee." But the etymology is uncertain, and some derive it from an Egyptian, others from an Assyrian source = a title of honour. Luther has "Landesvater." Cf. Sayce, Higher Crit., and Mon., p. 214. (b) Zaphnath-paaneah: LXX. Ζωφηναθ-πανανή = Onkh, the interpreter of secrets. The Heb. consonants are now taken as equivalent to an Egyptian form, "Said God, He liveth"; but see Zaphnath-paanath. (c) Asemath and Potlibhar are genuine Egyptian names. (d) Further to Pharaoh. The expression is borne out by analogous titles in the inscriptions. See Tomkens, Life and Times of Joseph. For the story of the two brothers, see Sayce, Fresh Light, p. 52. There are also some interesting and useful notes in Foakes-Jackson's Bibl. Hist. of the Hebrews (2nd ed. 1904).—2. (Num.13, 7.) Father of Igal, 1, of the tribe of Issachar.—3. (Ezr. 10, 42.) One of those who put away their foreign wives in accordance with the reform of Ezra.—4. (Ne.12, 14.) Mentioned in the list of the priestly families resident in Jerusalem at the time of Nehemiah's reforms.—5. (1Mar.5, 8, 56, 66.) A Jewish officer defeated by Gorgias, c. 164 B.C.—6.
JOSEPH OF ARIMATHAEA

(2Mac.8.22) = JOANNA.—7. (Jth.8.1.) An ancestor of Judith.—8. 9. 10. Ancestors of Christ, mentioned in St. Luke’s genealogy.—
11. Son of Heli, and husband of the Blessed Virgin; a descendant of David, of evident uprightness. He figures in the Infancy narrative—the espousal, the birth of Christ, visit of the shepherds and Magi, flight into Egypt, return to Nazareth, and the journey to the temple when Christ was 12 years old. After this last incident, Joseph disappears from the Bible record. It has been naturally conjectured that he was considerably older than Mary, and died before our Lord commenced His public ministry. This is borne out by the fact that Christ entrusted His mother to the care of an apostle. Acting as foster-father to Christ, he shared with Mary the knowledge of His divine origin, and also the inability fully to understand His mission.
In the genealogies of both St. Matthew and St. Luke our Lord’s descent is traced through him.

[GENEALOGY OF JESUS CHRIST.] [B.F.S.]

Joseph of Arimathaea is introduced in all four narratives of Christ’s burial. St. Mark (15.42-46) describes him as a counsellor of honourable position, a believer in the advent of the Messiah, who having had from Pilate requesting permission to bury Jesus’ body, is prompted by the nearness of the sabbath, and is termed courageous. The request was granted after the fact of death was officially certified. The tomb is rock-hewn, but neither its ownership nor position are indicated by St. Mark. St. Luke (23.50-53) shows that Joseph was rich, and also a disciple; thus the tomb was his own, and new, he having had it constructed. St. Luke (23.50-53) adds his spiritual qualities; that he was “a good man and a righteous”; that Arimathaea was a Jewish city; that “he had not consented to their counsel and deed”; that in this tomb “never man before was laid.” St. John (19.38,41,42) adds that the grave was in a garden, and the garden in the place where He was crucified; but, like St. Mark, says nothing of ownership, but gives proximity as the reason for the grave’s selection. These various details are supplementary. Proximity and ownership are of much importance to us, if we are to understand the facts. Arimathaea probably = Ramah of Ephraim, Samuel’s city (1Sam.1.1). Joseph’s tomb would probably show that he resided in Jerusalem. The moral value of Joseph’s act has been variably estimated. It was courageous alike in reference to Roman and to Jew. It could be difficult to feel safe in Pilate’s hands. A similar request of another magistrate cost the interceder his life (Keim, v1. 260). Still, such requests were often granted. But Jewish fanaticism might easily turn on a Sanhedrist who sided with the crucified. Nevertheless this course was certainly benevolent. A secret discipleship, unrevealed until after the death, was not ideal. And the burial was the only opportunity remaining to demonstrate discipleship, or even reverence. Joseph is not mentioned among the disciples who saw Christ risen. Nor does he appear again in the Acts. So little is known of him that his name is a mystery for us. Cf. B. Weiss, Life of Christ, iii. 378; Edersheim, Jesus the Messiah, ii. 615-617; Godet, Luke, ii. 342. For an advanced critical view, Loisy, Quatrième Évangile, p. 896. [W.S.B.]

Joseph, called Bar-sabas (better, as R.V., Bar-saba), and surnamed Justus; one of two persons chosen by the Church (Ac.1.23) as worthy to fill the place from which Judas Iscariot had fallen. Eusebius states that he was one of the Seventy, and relates, on the authority of Papias, that having drunk poison, he was miraculously preserved from hurt (Ecc. Hist. iii. 39).

Josephus (1ESd.9.34) = Joseph, 3.

Joses.—1. (Mt.13.55; Mk.6.3) One of our Lord’s “brethren.” [JAMES]—2. (Ac.4.36) Surnamed Barnabas.

Joshah, a Simeonite, chief, son of Amaziah, in the days of Hezekiah (1Chr.4.34).

Joshaphat, the Mithnite, one of David’s guards (1Chr.11.43).

Joshiah died, son of Elmaam, and one of David’s guards (1Chr.11.46).

Joshbebekashah, “son” of Heman, head of the 17th course of musicians (1Chr.25.4,24).

Joshua (Jehoshua, Joshua, Jesus).—1. The first judge, son of Nun of the tribe of Ephraim (1Chr.7.27), who took over the leadership of Moses when the latter had sought Israel into the Promised Land. He is first mentioned (Ex. 17.9) in connexion with the war with Amalek at Rephidim, and thenceforward occurs constantly in the narrative. He accompanied Moses for part of his journey up mount Sinai; he was among the number of the twelve spies who were sent forward to inspect Canaan, and one of the two spies who brought back the first report (Num.13.17,14.6). Just before the close of the wanderings, he was invested by Moses with the leadership, assumed command on the death of Moses (Jos.1.1), led the people across the Jordan, and renewed the practice of circumcision at his camp at Gilgal. Here he was visited by a mysterious “Captain of the Lord’s host.” Jericho was miraculously given into his hands, Ai was taken after a first repulse, and Joshua pushed on his military expeditions, first against the Amorites and then against the Canaanites and the peoples of the land generally. He is reported to have completed the division of the land, receiving as his portion Timnath-serah as his own portion; he also appointed three cities of refuge, and dismissed the trans-Jordanic tribes to their home. At the close of his life he delivered two solemn addresses to the people, and caused them to renew their covenant with Jehovah at Shechem. He died a mystery of 110. For the Ajalon song and other difficulties of the book of Joshua, see art. JOSHUA, Book of. Another important question is the nature of the Heb. immigration into Canaan. In the story of Joshua it appears to be represented as a combined movement under one head, which had the effect of subduing the inhabitants of the country in a generation, with the exception of some races (13.1ff.), which are variously described as being left by Jehovah as a punishment to the Hebrews, a means of testing their fidelity, and as an occasion for teaching them the art of war. In the subsequent period of the Judges, however, we are introduced in old documents (e.g. the
last five chapters) to a collection of people with very little cohesion, and no ruler over them; and the whole result is that the people, after the conquest, and they are evidently scarcely able to maintain themselves in their new territory. Even when a judge is raised up to deliver the people, he has usually to rely upon his own tribe, and sometimes to fight against the others. The very ancient song of Deborah gives authentic evidence of the period. Judging from this, it would seem either that the preceding epoch of the entry into Canaan has been idealized or that there was a rapid degeneration on the death of Joshua. It may be that the movement spread over generations, during which the individual tribes wrested, each for itself, a home from the natives of the land. We are, however, justified in giving Joshua, without doing violence to historical principles, a very prominent place in the settlement of the new home. Judg. 1 seems to indicate the essentially tribal nature of the transaction. As the people are still engaged in wrestling the land from its occupants at the opening of the period, it is clear that the allocation of the land did not necessarily imply that the subjugation was already completed (see the accounts of the "tribal lots" in the articles on each tribe).

Joshua, Book of. This book has always been regarded by the Jews themselves as a part of their Canonical Scripture. The Talmud declares it to have been written by Joshua himself; save that Eleazar wrote the account of Joshua's death, and Pinnahas that of Eleazar. The early date of Josh. is consequently no surprise by the context of the book. There is (1) no allusion whatever in it to the later history of Israel, though undoubtedly early portions of Judges refer to kingly government. (2) In 15:63 we read that the Jebusites dwelt among the children of Judah "unto this day," which dates the place as before David's re-capture of Jerusalem. (3) In 9:27 it is evident that the temple was as yet unbuilt. (4) The survey of Palestine which is found in 14-19 is extraordinarily accurate, as is proved by a careful comparison with the results of recent exploration. No such complete survey could have been made after the reign of Solomon. (5) 16:9 suggests that it must have been written at a very early date. The contents of the book strongly suggest (1) that the author was a priest; (2) that he dwelt in the tribe of Judah, and very probably in the priestly city of Hebron (see the details in 14:0-15, 13:20-21, 11:13); (3) that it was written shortly after the events described; and (4) the minuteness of some of the details, in 19:17 and 22 throughout, suggest that it is the work of an eye-witness. This eye-witness was probably Phinehas, the son of Eleazar, who (cf. Judg. 17-21) was alive when these events took place. The form of analytic criticism now generally adopted by the critical school in this country will be found in Prof. Driver's "Introduction to the Old Testament." It is based on the usual "main narrative," disguised, transformed, and supplemented by various other writers and "redactors." But as the criticism is entirely subjective, and rests on the assumption that satisfactory conclusions of such a kind can be drawn from internal evidence alone—an assumption which has not only never been demonstrated, but is contrary to our usual experience—we may safely recur to tradition, on the point. [HISTORY.—Difficulties. Objections have been raised (1) to the command to Joshua, to exterminate the Canaanites, as indefensibly cruel and as impossible to have come from God. But the extermination of wicked and depraved, or even feeble and incapable, nations by stronger, manlier, and more self-controlled ones unquestionably forms a part of the divine government of the world, as is shown by the decline and fall of the Roman empire and by the subsequent work of the Scriptures. Scripture tells us that before the coming of Christ no distinction was made between the sinner and his sin, and that the punishment of sin was held to involve the destruction of the sinner. Men may take exception to God's moral education of the world, but it would be difficult to substitute a better. (2) Too miraculous details, such as the passage of the Jordan, and the standing still of the sun and moon at the battle of Gibeon. The former event contravened no natural laws (see Prof. G. F. Wright's "Scientific Confirmations of O.T. Hist. pp. 130 ff.); while the second is possibly a poetical extract, adopted without explanation, from the book of Jasher. For (1) such insertions are not uncommon in both O.T. and N.T.—witness the well-known passage in the Codex Bezae. They probably found their way from the margin into the text. And (ii) as Hengstenberg (whose orthodoxy will not be contested) contended his father the author—i.e. to c. 200 B.C. On the other hand, it must be remembered (a) that the passage is found in the LXX, and (b) that the mightiest miracle is as easy to the Creator of heaven and earth as the slightest modifications of His natural laws.
JOSIAS
towards Egypt, along the sea-coast of Syria (Herod. i. 104-106). Contrary to expectation, Jerusalem was spared, and the deliverance from so great a peril stimulated, it is thought, the zeal of the reforming party in Jerusalem. A commission was appointed for the restoration of the temple (2 K. 25.1-31.), and in the course of the repairs Hilkiah the priest found that "Book of the Law" which quickened so remarkably the zeal of the king and his counsellors. [DEUTERONOMY; HULDAH.]

The great day of Josiah's life was that of the Passover in the 18th year of his reign. After this, his endeavours to abolish all crime of idolatry and superstition were still carried on. But the time of his death (which had been foretold by Huldah) drew near (2 K. 22.20). When Pharaoh Necho went from Egypt to Carchemish to carry on his war against Assyria (cf. Herod. ii. 159), Josiah, possibly in a spirit of loyalty to the Assyrian king, to whom he may have been bound, opposed his march along the Euphrates, and was killed. He gave him battle in the valley of Megiddo. Josiah was mortally wounded, and died before he could reach Jerusalem. He was buried with great mourning, and his name was long remembered in the laments of the people (2 Chr. 25.24-25).—2. The son of Zephaniah, at whose house the prophet Zechariah was commanded to assemble the chief men of the Captivity, to witness the solemn and symbolical crowning of Joshua the high-priest (Zech. 6.9ff).

Josias.—1. In Apoc. and Mt. 1.10,11 for king Josiah.—2. (tEsd. 8.33) = Jeshaijah, 3. Josibiah, a Simeonite chief (1 Chr. 4.35).

Josphiah, the father or ancestor of Shelomith, who returned with Ezra (Ezr. 8.10). A word is evidently omitted in the first part of the verse. It should probably read, "of the sons of Bani, Shelomith, the son of Josphiah"; (see tEsd. 8.36).

Jot. [Writing.]

Jotham.—1. The youngest son of Gideon (Judg. 8.5). He escaped from the massacre of his brethren. His parable of the reign of the bramble is the earliest example of the kind. After uttering it he fled from Abimelech to Beer-sheba. The son of king Uzziah or Azariah and Jerusalem. After his reign the kingdom for some years during his father's leprosy, he succeeded c. 737 B.C., when he was 25 years old. He is said to have reigned 16 years in Jerusalem, but in this must be included the years of his regency. For another explanation of the chronological difficulty, see Conybeare. He was contemporary with Pekah and the prophet Isaiah. He did right in the sight of the Lord, though the high places were not removed. He built the high gate of the temple, and overcame the Ammonites in war (2 K. 15.32-35 and 2 Chr. 27.).—3. A descendant of Judah, son of Japhah (1 Chr. 2.47).

Jozabad.—1. Two captains of the thousands of Manasseh, who deserted to David before the battle on Gilboa (1 Chr. 12.20).—2. A Levite in the reign of Hezekiah (2 Chr. 31.13).—4. A chief Levite in the reign of Josiah (2 Chr. 35.9).—5. A Levite, son of Jeshua, in the days of Ezra (Ezr. 8.33). Probably identical with 7.—6. A priest of the sons of Pashur, who had married a foreign wife (Ezr. 10.22).—7. A Levite among those who returned with Ezra, and had married foreign wives. Probably identical with the Jozabad of Ne. 8.7, and with the Jozabad who presided over the outer work of the temple (11.16).—8. Jozachak, one of the Ammonites, and one of the murderers of Joash, king of Judah (2 K. 12.21). Called, by a clerical error, Zabad in 2 Chr. 24.26.

Jozadack. [Jehozadak.]

Jubal, a son of Lamech by Adah, and the first inventor of stringed and wind instruments of music (Gen. 4.21).

Jubilee, Year of, or the yôbêl-year, the 50th year following the succession of 7 sabbatical years, in which all land that had been alienated returned to its original possessor, and all Hebrew slaves were liberated (Lev. 25.8-16, 23-34, 39-55), even before the expiration of the regular term of 60 years established by another law (Ex. 21.2). During the jubilee year, as during the 7th year or sabbatical, the land was to lie fallow and enjoy a complete rest from cultivation. The owner was not permitted to gather the product of his field or vineyard into his storehouse, as all such product became common property, or the use of all men and beasts. The Ammonites, and other nations and tribes of the land, were to work in the Jubilee year, as in the year of the jubilee, for free wages. "Jubilee" is a corruption of the Heb. yôbêl (Aram. yôbâhî; Arab. wâblât), and is also applied to the ram's horn (Heb. shôphâr, sometimes mistranslated "trumpet"; cf. yôbêl = trumpet, Ex. 19.13; shôphârîth hayyôbêlîm = trumpets of rams' horns, Jos. 6.4), which was blown on the day the jubilee laws were proclaimed or in the 10th of the 7th month (Tishri), the Day of Atonement. The jubilee law covered village buildings, which properly belong to the field, but excluded the (walled) city houses, which were not considered land property, except those originally given to the Levites, who possessed not one-fifth of the products, but who operated even in the case of a man who offered his field for the benefit of the sanctuary, who had the right to redeem it, for the accrued value of its crops and one-fifth additional, at any time before the jubilee (Lev. 27.22-24). In fact, all sales of property were made subject to the value of the crops due under the jubilee. The jubilee year, however, did not remit any debts. There was no necessity for such provision, as the jubilee followed closely the sabbatical year, at the "end" of the 7th year when all debts were already wiped out (Deut. 15.1). The jubilee year was intercalated between 2 cycles of 7 sabbatical years, making the cycle of 49 years. This is in accordance with the plain words of Lev. 25.10, and coincides with the opinion of the rabbis, except Rabbi Judah ha-Nasi (the prince) who said that the jubilee was counted as the first year of the subsequent sabbatical cycle, consequently only 49 years constituted a jubilee.
cycle (Talmud, Rosh ha-Shanah, folio 8b, 9a: Arakin 12b, 13b). The first jubilee was inaugurated after 7 septennates following the possession and settlement of the Promised Land (Lev.25:11). The dates, according to the Jewish era, are as follows: the crossing of the Jordan occurred in the year 2459 of the Creation (1271 b.c.); allowing 7 years for the conquest and another 7 years for the settlement (by allotment among the tribes), the first septennate was observed in the year 2570 (1250 b.c.), and the first jubilee year was 2553 (1227 b.c.). The 16th jubilee was celebrated (according to the Talmud) in the 18th year of Josiah, who reigned 31 years; the remaining 13 years of his reign, together with the 11 years reign of Jehoiakim and Je-hezechiel, and the 11 years of Zedekiah (2Chr.34:1-36:5,11), making 35 years, fix the 17th jubilee on the 14th year from the destruction of the Holy City on the 10th day of the month Tishri (10 Day of Ab). This is clearly shown by the argument raised with reference to the daughters of Zelophehad: if they married outside their tribe, the jubilee would revert their hereditary property to the tribe into which they married. Hence the injunction that they shall marry "only to the family of the tribe of their father" (Num.36:4-9). But after the invasion of Shalmaneser and his conquest of Samaria, when the northern tribes were assimilated into the Syriac world, the classical view of the jubilee (i.e., the year of remission of debts) was extended to the southern tribes as well. The jubilee was at first observed in the 50th year, and 50 years appeared to be the ideal period of theocracy, that "the land shall not be sold for ever: for the land is Mine" (Lev.25:32).

Juda—1. The patriarch Judah (Sub.56; Lu.1:39,33; Heb.7:14; Rev.5:5,7-5).—2. (Mc.6:3) [JUDAS THE LORD'S BROTHER].—3. (Lu.3:26) Son of Joanna. [HANANIAH, 8].—4. He has been identified with Ammi (Mt.1:13).—5. Son of Joseph ben Jair of the lineage of Christ (Lu.3:30).

Judah (Heb. יְבִנֵי, "praised").—1. The fourth son of Jacob, and of Leah (Gen.29,35), and the ancestor of the royal house of David. He is recorded, with his own brother Reuben, to have saved Joseph's life (37:21,24), and to have failed to save Benjamin (43:3,8); and was therefore sent ahead by Jacob (46:28) to Joseph, who had already heard the touching appeal of Judah which brought about the reconciliation of the brothers (44:16-45:1). In the blessing of Jacob (49:9-12) he is represented as the leader "until he come to Shiloh," and there is allusion to the vines and pastures of his lot. In the blessing of Moses (Deut.33:7) there is an early allusion to the separation of the tribes, whose jealousy dated back to the time of Saul. In the wilderness Judah led the van (Num.2:9), being the strongest of the tribes. The story of Judah and his daughter-in-law Tamar (Gen.38:1-30), so repugnant to our code of ethics, is natural to early Eastern ideas, and was not regarded as a disgrace (see Ruth 4:12). The duty of marrying a childless widow (the Levirate) was held sacred, and Judah's tribe sprang, not from his half-Canaanite sons (Gen.38:2-5), but probably from a Hebrew mother. The privileges of the qedeshah (A.V., incorrectly, harlot, cv. 21,22), or "holy woman" (consecrated), in any tribe, were allowed to Judah in the time of Abraham (see Hammurabi's laws), as they still are in India, in Japan, and even among Moslems; though such "saints"—male and female alike—were forbidden later by the law among Hebrews (Deut.23:17).

The house of David sprang from Tamar's son Pharoah (cf.1Chr.2:24), and from Rachel's brother Moabites (3:1-4,5). Our Lord's descent was thus not purely Hebrew, though the idea that his ancestress Rachab (Mt.1:5) was the Canaanite inn-keeper Rahab (Jos.6:25) is a mistake, since the latter must have lived three centuries before the mother of Boaz.—The Tribe Lot included about 1,500 sq. m. of country, of which however about 1,000, in the "plain" (sâdhe) of Philistia, was unconquered till the time of Solomon, and precariously held by the stronger kings of Judah, such as Hezekiah. Another 500 sq. m. was desert (midbbir), W. of the Dead Sea and Jordan Valley. The remaining 100 sq. m. included "mountains" (bâr) which were well watered, and produced corn, wine, oil, and fruits; with the "lowlands" (sh'râb) or foot-hills between mountain and plain, also rich in cornfields and olive yards, and with the "dry" district (negebh; A.V. south), which was a pastoral region S. of Hebron valley. They resembles the idea of the Bekk-sheba torrent-bed, and at the foot of the hills to its E., though some cities of Samnon lay N. of this valley. The N. border (Jos.15:5-12) ran from the Jordan to the Mediterranean, following the valley of Aenon from its confluence with the Jordan, N. of Beth-hoglah, and leaving Gilgal outside Benjamin. By Autumm and En-shemesh it reached En-rogel, S. of the temple hill; and, following the Hinnom gorge, it left Jerusalem in Benjamin. It then turned S. past the head of the Kephalm valley, by Rachel's tomb (1Sam.10:2), running to the water of Nephtoam, or S.W. of Bethlehem. Following the ridge of Mt. Erekon it reached Kirjath-jeearim, on S. side of the Valley of Soarek, leaving Chesalon in Benjamin; and following the valley W. to Beth-shemesh, and Timnah, it entered the Philistine plain, and passed along the low ridge of Erekos, to Larnaac to Phannathirion; his brother's border as far S. as Gaza and Gekar. The position of all these sites is now known, as
described under their names, and the boundary throughout is formed by important natural features—high ridges and deep gorges. [2] An ancestor of Kadmiel (Ezn.3.9); perhaps = Hodaviah. [3] A Levite who had taken a foreign wife (10.23); perhaps the same Judah as in Ne.12.8,36. [4] A Benjamite, son of Sennah, Ne.11.9. [5] "Judah upon [R.V. at] Jordan" (Jos.19.34), on E. of Naphtali.

Judah, Kingdom of. When the disruption of Solomon's kingdom took place at Shechem, only the tribe of Judah followed the house of David. But almost immediately afterwards, the tribe of Benjamin is recorded as contributing its warriors to make up his army.

The former territory of Simeon (1Sam.27.6; 1K.19.3; cf. Jos.19.1,2) and part of Dan (2Chr.11.10; cf. Jos.19.41,42) were recognized as belonging to the southern kingdom, which in the reigns of Abijah and Asa was enlarged by some additions taken out of the territory of Ephraim (2Chr.13.19,15.8,17.2); and the growth of the kingdom of Judah is witnessed, so far at least as the numbers can be relied upon [Number], by the progressive increase of the army under successive kings. Unless Judah had some means besides pasture and tillage of acquiring wealth—as by maritime commerce from the Red Sea ports, or (less probably) from Joppa, or by keeping up the old trade (1K.10.28) with Egypt—it seems difficult to account for the wealth of the temple treasury, which was so great as frequently to invite the hand of the spoiler. The treasury was emptied by Shishak (14.26), again by Asa (15.18), by Jehoash of Israel. (b) Hanani's remonstrance (2Chr.16.7) prepares us for the reversal by Jehoshaphat of Asa's policy towards Israel and Damascus. A close alliance sprang up between Judah and Israel. Jehoshaphat, active and prosperous, repelled nomad invaders from the desert, curbed the aggressive spirit of his nearer neighbours, and made his influence felt even among the Philistines and Arabians. (c) Amaziah, flushed with the recovery of Edom, provoked a war with his more powerful contemporary Jehoash, the conqueror of the Syrians; and Jerusalem was entered and plundered by the Israelites. (d) Under Uzziah and Jotham, Judah long enjoyed political and religious prosperity, but Ahaz became the tributary vassal of Tiglath-pileser. (e) Though already in the fatal grasp of Assyria, Judah had a chequered existence of more than another century after the downfall of the kingdom of
Israel. Then the consummation of its ruin came in the destruction of the temple by Nebuzaradan, amid the wailings of prophets, and the taunts of heathen tribes released at length from the yoke of David. The history which centred upon the capital is related at length in our art. JERUSALEM.

Judas, the Gk. form of the Heb. name JUDAH. I. (1 Esd. 9:23) = JUDAS, § 2. Sur- named Maccabaeus. [MACCABEES, —3. Son of Calphi, and one of the two captains of Jonathan's army who remained firm at the battle of Kadesh. (1 Mac. 4:70).]—2. Macc. 1.10.—a. Josephus (13 Ant. xi. 2, 1 Wars iii. 5).—b. Simon of Simon and brother of John Hyrcanus, murdered by the latter (1 Mac.16). or (cf. esp. v. 216, 19) shortly afterwards, as Josephus (13 Ant. viii. 1) suggests.—b. The patriarch Judah (Mt. 1:23, 7). A man residing at Damascus, in "the street which is called Straight" [DAMASCUS], with whom Saul of Tarsus lodged after his conversion (Acts 9:10).—2. JUDAS, Juda, or Jude, the Lord's Brother. So mentioned in their lists of the four brethren by St. Mt. (13:55), who places them last, and by St. Mk. (6:3), who places them third, before Simon. As to his exact relationship to the Lord, see JAMES. In default of statements to the contrary, it may be assumed that he was brought up as a Nazarath, that he shared in the brethren's unbelief as to Jesus (Jn. 7:5), and their subsequent conversion (Acts 1:14). The attempt to identify him with "JUDAS OF JAMES" depends upon the uncertain rendering of τέκνος Ιακώβου (Jn. 6:66), by "brother of" (cf. Jn. 1) instead of "son of." There is no suffi- cient reason for doubting that his Jude, the "Lord's brother," is the author of Ep. Jude. He is not otherwise mentioned in N.T., but Hegesippus (Euseb. H.E. iii. 19, 20, 32) says that his grandsons were brought before Domitian and survived till the reign of Trajan. [E.H.P.].

Judas (of James), or Thaddeus, or Thaddæus, or Thaddæus. According to Mk. 6:16; Acts 1:13, one of the Twelve was called Τέκνος Ιακώβου, which usage requires us to render "Judas, son of James." In Mk. 3:18 he is called, according to the best MSS., Thaddæus. In Mt. 10:3 the best reading (X b) is also Thad- daeus alone, the words underlying A.V. (αὐτοῦ δὲ συνήθεις Θαδδαίος) being due to Western texts (Matthew, and Matt. and Hoft). "Lebbaeus" is, perhaps, due either to an attempt to identify him with Levi, or to an etymological connexion between Heb. לְבָב (heart) and Aram. ladh = Heb. šâdâh (breast, mamma). Dalmain connects Thad- daeus with Theudas. Nothing is recorded about his later life. "James" does not mean Jewish apostle, but James of Judæa, as in James 14:14 and Rom. 15:1. There are many instances from this as to his temperament are uncertain. His selection was with know- ledge of the issue (6:64). There is no more moral difficulty in this, than in any ordinary providential assignment to individuals of positions in which they fail. It is incredible that Christ was deceived in any case; Christ dismissed him from the "upper room" knowing what he would do if dismissed. His character was avaricious and dishonest (12:4). His ability is suggested by his appointment as treasurer; by the dexterity with which he played a double part unsuspected by the disci- ples; and by the power of nature manifested in his fall. When selected he probably pos- sessed undeveloped capacities which might mature in either way. Like the others, he was entrusted with a mission in Galilee. They were sent out two and two. We are not told who his companion was. He also shared our Lord's exclusion from Galilee, and all His wanderings. As time revealed the Master's plan, the apostle's trial came. Christ's re- jection of the popular Messianic ideals, con- sequent loss of popularity and influence, and prediction of His death brought Judas to the crisis. If he originally joined our Lord from Jewish-seeing (Mt. 16:1). Among Messianic conceptions, he would now be re- quired (a) either to exchange those conceptions for His Master's spiritual ideals, and so to sup- press self-interest; or (b) openly to abandon Him; or (c) to remain, and force the Master's hand, by compelling Him publicly to assert his Messianic claims. He chose the first alternative, nor did he select the second. If the third alternative moved him, then his intention was not to ruin Christ's cause, but to accelerate His triumph. The first hint of betrayal is placed by St. John precisely where Christ's popularity decreased (6:4, 70, 71). Thenceforward develops the tragic struggle between Judas and his Lord, culminating in the final Jerusalem period. The withering of the barren tree, if universally applicable as a warning on the vanity of profession without practice, was peculiarly significant for him. The lavish expenditure of the spikelet of wheat left for him under the eye of the Master (12:5, 6), only love could understand. St. Mark sharply contrasts the overtake of betrayal with this (Mk. 14:10, 11). Bitterly dis- appointed, moved by impatience, the plan of betrayal is consummated. The sum accepted shows that avarice was not exclusively his motive (Ex. 21:12). The crisis in the upper room forms a series of final appeals: (1) the appeal of service, in washing Judas' feet; the proviso, "ye are clean, but not all," with the evangelist's comment (Jn. 13:10, 11); (2) the definite announcement that one of the Twelve would betray Him (Mk. 14:18); (3) the solemn statement that non-existence were preferable to such a sin (21); (4) the appeal of friendship, in treating Judas as the honoured guest (Jn. 13:20); (5) the dismissal, understood by none at the time, was a last appeal (13:27, 29). Every appeal frustrated, Judas went out, not merely from the upper room, but from the Christ Himself. [Origen] said, "ος λόγος ἀπεκδῆ καὶ τῆς γενεάς τής ἐγερθεὶς ἐκ τῆς χείλος Ισραήλ (Origen). Though it has been questionet, there seems very strong moral proba-
bility that the institution of the Eucharist was postponed until Judas had withdrawn. Christ's words at the actual betrayal (omitted in St. Mark), as given in St. Matthew, are either a question: "Wherefore art thou come," A.V. (44. 18); Vulg. (44. 18): "What for which thou art come," R.V.; though neither seems completely satisfying. In St. Luke Christ draws a contrast between the sign of love and the treacherous purpose. Judas "had neither expected nor intimated that Jesus should be condemned to death" (B. Weiss, Life of Christ, ili. 344). "Judas now, seeing that this matter went further than he intended it, repented of his fall" (Bp. J. Taylor, Life of Christ, iii. xv. 6, vol. ii. p. 673). If, knowing his Master's power, he believed that the arrest would be followed by some majestic manifestation; then on Christ's refusal to exert such power, Judas realized that he had forced his Master into a crisis which meant destruction. Origen thinks that, if his repentance had been complete, he would have appealed for Christ's forgiveness. Yet, if he had entirely abandoned the thought of good, he would not have repented on hearing that Christ was condemned for the murder of the par excellence, nor have parted with his thirty silver pieces: nor have made such confession, before such an audience (Origen on Jn.13.22). If Judas knew that he had betrayed the innocent blood, did he also know that he had rejected divine revelation, and abandoned the Son of God? Is he represented as coming to the Lord with a thing expected of him, for they know not what they do? "Mediaeval and modern thought would probably answer these questions differently. If the only unpardonable sin is final impenitence, then this betrayal of Christ is not intrinsically unpardonable. If he had lived and laboured for reparation, the judgment of conscience would not be difficult. It is the suicide which clouds the issue. For Patristic exposition see St. Jerome on Mt. 26; St. Cyril Alex. on St. John and on St. Luke, Migne, vol. v. p. 912; Origen, I.e.; B. Weiss, op. cit.; Schmid, N.T. Theol. 62; Lichtenberger, Encyclopédie des Sciences Religieuses, vol. vii. p. 446; Bonvan, Theol. N.T. i. 181; Garvie, Studies, pp. 261, 278, 387, 323; Cox, in Interpreter, July 1907; ref. by Otto Zöckler s.v. in Hauck, ix. 31.

**Judas of Galilee,** the leader of a popular revolt "in the days of the taxing" (i.e. the census, under the prefecture of Quirinus, 6 or 7 A.D.), referred to by Gamaliel in his speech before the Sanhedrin (Ac.5:37). According to Josephus (18 Ant. i. 1), Judas was a Gaulonite of the city of Gamala, probably taking his name of Galilæan from his insurrection having had its rise in Galilee. His revolt had a theocratic character, its watchword being, "We have no Lord or master but God." That Judas himself perished, and his followers were dispersed, we learn from Gamaliel's speech alone. With his fellow-insurgent Sadduce, a Pharisee, Judas is represented by Josephus as the founder of a fourth sect, in addition to the Pharisees, Sadducees, and Essenes. The sons of Judas also became the leaders of fanatical movements.

**Judas,** surnamed Barsab'bas (R.V., Barsab'bas), a leading member of the Church at Jerusalem (Ac. 15.22), endued with the gift of prophecy (32), chosen with Silas to accompany SS. Paul and Barnabas as delegates to the Church at Antioch, to make known the decree concerning the Gentile converts (27). After employing their prophetic gifts for the confirmation of the Syrian Christians in the faith, Judas and Silas went back to Jerusalem. Nothing further is recorded of the former. It is possible that he was a brother of Joseph Barsab'bas.

**Jude, General Epistle of.** (1) Authentically. Proceeding backwards from end of 4th cent., we find the epistle acknowledged by 3rd Council of Carthage, 397 A.D., and by Jerome, who, however, admits that it was rejected by many (de vir. ill. 4) on account of its reference to the book of Enoch. Eusebius places it among the books "spoken against and yet recognized by most" (H.E. iii. 25; cf. ii. 23). Origen quotes from it, but admits there were doubts (in Matt. xvii. 30). Clem. Alex. commented on it. Tertullian (de cult. fem. i. 3) mentions its reference to the book of Enoch. The Muratorian Canon includes it, but implies the existence of đề e o p o ’802, which is no longer current in its existence from end of 2nd cent. onwards, even though it is omitted in the Pesher. Earlier testimonies must be accepted with caution, but those who hold by the priority of Jude to 2 Peter (for which see Peter, Second Ep. of), point to the latter as the earliest reference to Jude (B. Weiss, Jude an Apocryphon Paulus). Any hesitation on the part of the early Church is easily explained by Jude's angelology and use of apocryphal writings. (2) Authorship. There is no sufficient reason for questioning the early tradition that the epistle was written by Jude, the Lord's brother. In ver. 17 the writer implies that he was not one of the Twelve, and he states as his claim to attention, that he was "a slave of Jesus Christ, and brother of James" (ver. 1). For some points of resemblance between the epistles of the two brothers, cf. Mayor, Ibid. p. cxlix f. The comparative obscurity of St. Jude makes it unnecessary, as the authorship of Jude is not claimed; or that it has been chosen for the purpose. (3) Date and Circumstances. There are no definite indications either, but it is implied (ver. 17) that his readers can no longer listen to the apostles, and the period is regarded (ver. 18) as the "last time." There is no mention of persecution, and the destruction of Jerusalem, if it had already happened, would have been a more decisive instance of punishment than Sodom and Gomorrah (ver. 7). As the heretics attacked are still in the Church, the date must be anterior to the development of discipline. Accepting Jude as the author, we have to consider whether one who was probably born c. 8 B.C. could be writing an epistle much later than, say, 62 A.D. There is no evidence as to the place of writing or the locality of his readers. But the immediate cause of writing is given in vv. 3, 4—the intrusion of lawless men into the Christian society. An attempt has been made to identify these false teachers with the Carthusians, who flourished in the 2nd cent., but Jude says nothing that is inconsistent with the elementary antiarianism of
apocalyptic times. He was evidently familiar with some of St. Paul's epistles. (1) Contents. After a somewhat explicit statement of some of his reasons for writing (vv. 3, 4), he devotes the main portion of the letter to a denunciation of the Antinomians (vv. 5-16). In vv. 17-23 he first warns and then exhorts his Christian readers, closing with a splendid doxology (vv. 24, 25). (5) Style and Characteristics. For a correct view of the great style of the epistle, see Mayor, Jude and 2 Peter, ch. ii. The writer has a remarkable fondness for arranging his thoughts in groups of three—e.g. in vv. 20, 21, he urges "building up," "praying in," "looking for"—"the Holy Spirit," "the love of God," "the mercy of our Lord Jesus Christ." He finds his warnings chiefly in Gen. incidents, but is also remarkable among N.T. writers for his use of apocryphal documents. Thus: (a) For a number of resemblances in Jude, both in diction and in matter, to the Book of Enoch, see Chase, Hastings, D.B. ii. 801, and the edition of Enoch by R. H. Charles (1893), who traces the use of the same writing by Jude to an earlier writer than himself, from which it is in Ju.6, on the fall of the angels. (b) In ver. 9, which deals with the contest of Michael with Satan for the body of Moses, there is possibly a reference to the writing called the Assumption of Moses (cf. edition by R. H. Charles, 1897). See, besides writers quoted above: Zahn, Entstehung. "Gog, St. Peter and St. Jude; A. Plummer, St. James and St. Jude (in Expositor's Bible); E. H. Plumptre (Camb. Bible for Schools). [E.H.P.]

Judea, or Judaea. Originally the tribal lot of Judah, and thence extended to include Benjamin as belonging to the kingdom of Judah; while, in the Gk. and Roman ages, the border was yet further N., including parts of Dan and of Ephraim. The Romans used the term loosely of all S. Palestine, so that the "Jews" came to include all Hebrews [Jewry]. In 146 B.C. three districts (or "toparchies") were added to Judaea (1Mac.11.34) on the Samarian border, and another district (Tayyibah) on the Lydda (Judda), and Ramathem (or Roman). Josephus and Pliny (see 3 Wars. 3 and Hist. Nat. v. 14) mention 11 Judæa districts in all, including (with the above-named Lydda) Akrabata (Armen), on N.E.; Gophnah (Jumah), N. of Bethel; Thamna (Tibneh), farther W.; Joppa (Yeha), with Janaim (Yehon); Emmaus (Amoud); Jericho (or Jribah); Herodium (Jebel Furidis), S. of Bethlehem; Engedi (Ain Jayd); Idumea (the Hebron mountains); and Bethlephetha (apparently Beit Netfi, now near Idumea (see 4 Wars viii. 1). Judaea also included natural districts called Daroma (dry, the older neghebeh; see Jude); Saronia (Sharon); Geraritane (Gerar), shphelat (Sephera), and Gebalene (the older har or "mountain region"). The N. border of Judaea was important (since Samaria was not reckoned as being in the Holy Land), and the notices in Josephus, and in the Mishna, allow of the border being very accurately determined. Josephus places the district of Akrabene in Judaea (1 Wars iii. 4), its capital being 'Agrabeh, 8 miles N.E. of Shechem. He also (sect. 5) makes the S. Samaritan border to be defined by Anauh (the spring 'Ainah), belonging to Beroea (Bergit, farther W.), these sites being on the Jordan 34 miles from Bashan, and 15 miles S. of the latter. [Asher.] He moreover speaks of Korea (1 Wars vi. 5) as on the Judæan boundary, on the road from Beth-shan. This perhaps refers to the ruin Kerawa, in the Fârâb Valley [Aenon], where it enters the Jordan Vale. These indications agree with the head—"From the Mishna, the most northern beacon station of Sartabah (Rosh hash-sha'anah ii. 4), which was in Judaea, on the Samaritan border, is evidently the peak of Kurn Sartabah, immediately S. of the Fârâb Valley. The villages of Beth Kima (Bet Kima), Beth Labin (Lubon), and Kerethim (Qurtîd) in Judaea, since the wine theme was lawful for use (Menahoth ix. 6), which indicates the great valley Wady Deir Ballâth as the boundary. It rises far E., and passes just N. of Beroea, reaching the plain at Antipatris, the border city of Judaea (Tal. Bab. Gittin 76a), Patris (Budrus, 6 miles S. of the boundary valley) being in Judaea (Josipha, Æneas 1). On the Tâliban, the road to Petra, the capital of the Holy Land from Petra to the gardens of Ascalon (see Neuanhe, Ægôg. du Tal. p. 11), the exact border being at Yagur (p. 60), evidently ëfarah, the village immediately N. of Ascalon. [Tamar: Palestine.] [C.R.C.]

Judea beyond Jordan (Mt. 19). This passage may be divided into two parts, corresponding to the coats of Judea by the region beyond Jordan" (see Mk.10.1, "by the farther side of Jordan"). Josephus (12 Ant. iv. 11) uses a similar expression as to the palace of the priest Hyrcanus (now 'Arda el Emir) in Gilead, "between Arabia and Judea, beyond Jordan." As Samaria reached to the sea and to the Jordan, it was necessary for Galilean pilgrims, who would not enter a region considered to be outside the Holy Land, to cross Jordan N. of Beth-shan, and travel E. of the river till opposite Jericho. In Joshua (19.34) we find mention of the "Judeah upon Jordan" towards the west of the Pisgah or north of the mountains of Naphtali. But yhidâh hay-yardân may be a clerical error for yhirâh—"the rise [or, source] of Jordan"; and the LXX. simply reads "to Jordan on the east." [C.R.C.]

Judge. (1) Originally the head of the patriarchal family judged his dependents (Gen. 38.24). Disputes between members of two families probably led to private war (Gen. 38.30). To avoid this, recourse was sometimes had to arbitration (Gen.31.32). Gradually the Elders (probably at first the heads of the various families) came to have jurisdiction in most cases, including even offences by a son against his father. (2) Mosaic age. (a) After the Exodus, Moses acted as judge. At the suggestion of Jethro he appointed "rulers of thousands, rulers of hundreds, rulers of fifties, and rulers of tens" to deal with the easier cases, reserving the harder for himself (Ex.18.13-26; Dnt.16.18-27). From the phrase "heads of your tribes" (Ex.18.14-15) it appears that these were elders. (b) While Moses sojourned in the mount his judicial work was transacted by Aaron and Hur, perhaps assisted by 70 elders (Ex.24.11). (c) Subsequently 70 elders were appointed to assist Moses (Num.11). Their
duties are not specified. (d) Cases of Homicide were judged by the congregation—i.e. the local elders (Num. 35.24 ff.; Deut. 19.12; Josh. 20). This at once raises a presumption that the whole body of judgments in which the first law of homicide (Ex. 21) occurs, was intended primarily for cases confirmed by the frequent references of Deut. to elders as the ordinary judges (21.19, 20, 22.17-18, 25.8) and the subsequent history. (e) Deut. 17.8-13 contemplates a supreme court for the decision of hard cases consisting of "the priests, the Levites, and the judge that shall be in those days"—i.e. apparently the successors of Moses, Aaron, and the seventy. Contempt of this court was punishable with death. (f) In two classes of cases the priests performed quasi-judicial functions: (i) **Ordal of Jealousy**, (ii) where certain offenders repented (Lev. 5-6, 7, 26 ff.; Num. 5.5-8). Deut. 16.18 commands the appointment of judges in all the cities of Israel, but he rewrites the Deut. 17.8-13 to refer to appointment or their duties. According to 1 Chr. 23.4, 26.29, they were Levites in the days of the monarchy. Thus, apart from matters reserved for the priests, we see that ordinary justice was administered substantially by the local elders, while hard cases were to be reserved for the court of priests and elders, or for a supreme tribunal, which during his lifetime was dominated by him. (3) Later the elders are seen at work (Ru. 4; 1 K. 21.8-14). Judicial work was done by the Judges—at any rate in some cases (1 Sam. 12.3, etc.). Under the monarchy the law of the land was set forth by the king, and the local courts under the presidency of a layman (2 Chr. 19.5-11). In the time of Jeremiah a priest, who was "chief officer in the house of the Lord," had jurisdiction over certain acts committed in the temple (2 K 20.11, 29.26). Justice was usually administered in the gate. (d') Laws is sometimes used of judges (1 Sam. 2.23, etc.). [Fürst, *Bible Lexicon*; Hamburger, *Bths*-**Encyklopädie**, i. 437-444. [H.M.W.]]

**Judges, Book of**, covers the period from the death of Joshua to the triumph of Samuel. For the Samson episodes probably synchronized with the oppression after the death of Elie. —**Analysis**. There are three divisions: A, 1-2: B, 2.6-16; C, 17-21. B is the source as Josh. 12-24, but is concerned rather with the failure than the success of the Israelites. It is a later addition to B, which has its own introduction, 2.6-3.8. B consists of stories from many sources, fitted into a framework by a compiler who wished to teach how sin brings punishment and repentance leads to deliverance (2.16-19 and passim). C is an appendix, added by another compiler, who wished to show how ill were the days before the monarchy (18.1, 18.1, 21.25). He has preserved two stories of the earliest times, both (like Ruth) connected with Bethel—*Date and Sources*. C appears to have been compiled when the monarchy had justified itself, and the old days were beginning to be forgotten. But B was influenced by Deut., and must therefore be subsequent to that book. A was compiled from the same source as Josh. 12-24 and must be dated before Joshua superseded that source. The whole is probably pre-Exile, if we allow for subsequent modifications and corruptions of the text. The sources are very ancient, and the compilers were scrupulous in their use of documents, e.g. B in the stories of Abimelech and Samson might have utilized these stories to enforce his moral, but did not. He was contented to transcribe them. C did not attempt to give a narrative of the time. For reasons of style, though its confusion is probably due to a very primitive attempt to combine two narratives in one. Even advanced critics admit the antiquity of the documents *side Moore* (Comm. on the song of Deborah, Kautzsch (Lit. of O.T.) on the parable of Jotham, Day (Lexicon alphabet., intro.) on Jotham, Wellhausen (Hist.) on Jephthah's sacrifice, Budde (Richter und Sam.) on Samson, Driver (Intro.) on the Benjamite War). Speaking of the stories as a whole, Moore writes that they "are manifestly drawn from a living tradition, not from antiquarian lore; they reproduce the popular conceptions of the early time of the settlement of Palestine with a convincing reality which is of nature, not of art" (Comm. p. xvii). It is hard to reconcile this admission with the author's theory as to the exceedingly composite character of the text, or with a long succession of redactors working for five centuries. —**Chronology**. The time notices in the book are the work of the compiler B. They are not complete, but (if merely added) imply a period of some 350 years. It is, however, at present impossible to harmonize this period with other parts of the Bible, or with views accepted by many Egyptologists. [Ritter (Sp.); Hervé (Spec.); Hamburger, *Bths*-**Encyklopädie**, i. 437-444. [H.M.W.]]

**Judges, Book of**, the history of Israel from the death of Joshua to the rise of Samuel. For the Samson episodes probably synchronized with the oppression after the death of Eli. —**Analysis**. There are three divisions: A, 1-2: B, 2.6-16: C, 17-21. B is the source as Josh. 12-24, but is concerned rather with the failure than the success of the Israelites. It is a later addition to B, which has its own introduction, 2.6-3.8. [Ritter (Sp.); Hervé (Spec.); Hamburger, *Bths*-**Encyklopädie**, i. 437-444. [H.M.W.]]
Deborah and Barak broke its power for ever. As long as Israel remained aggressive it was united—Judah helped Simeon, Ephraim Dan, Ehud blew his trumpet in mount Ephraim—but as they settled in districts, geographically distinct, disintegration began. The common tie of race was not so strong as the more immediate claims of family, clan, and tribe. The tie of common faith was neutralized by the growth of local superstitions and reverence for local Baalim. The common sanctuary at Shiloh continued to exist (21.19 and 1Sam.1.3); but there was apparently no great priest between Phinehas and Eli. In consequence, after every interval of peace we find the people less united. All the people were at Bochim, all the tribes took part in the Benjaminite War. Deborah rallied some of the northern and central tribes, Gideon alone the northern tribes and Manasseh, Jephthah had to depend on Gilead, and Samson fought for his own hand. The only opposition of the Philistines was responsible for welding the people together, and made the careers of Samuel, Saul, and David possible.—Institutions. The twelve tribes were divided into clans, the clans into families. Law was ordinarily administered by the heads of the clan. By sitting in the gate (Ru.4), the people acting as assessors or witnesses. The people were free. They call on Joash, through their chief, to bring out his son Gideon for judgment (Judg.6.30). In the endless debate of Reuben (5.16) we have indications of a communal assembly. The position of the judges was not institutional or regular—it depended on personal prestige. Barak, Gideon, and Jephthah were military dictators; Deborah, Eli, and Samuel were religious leaders; Ehud, Shamgar, and Samson owed their influence to personal prowess. Othniel to birth and marriage, Jair to wealth and local consideration.—The Family and Social Life. The family was the unit, and the rights of the individual scarcely existed. Joash is held responsible (6.30 ff.) for his grown-up son, who is married, has children, owns property and servants (6.27,7.10,8.20). Samson applies to his father and mother to arrange his marriage. Jephthah excludes absorbed tribes from rights over his daughter (11.30). The old man at Gibeah would rather sacrifice his daughter than offend against the law of hospitality (19.24). Polygamy was recognized; but was apparently rare. Manoah had obviously but one wife. Jephthah was presumably a monogamist; and this may be assumed of Othniel and the Levite. The wives of Gideon and the family of Jair are thought worthy of remark. Several forms of marriage are referred to. (1) Marriage proper, implying an alliance between families and the payment of a dowry—Achshah (1.12-15); (2) Concubinage—Gideon (8.31), the Levite (19.1); (3) Sadiqa marriage, where the woman remained in her own home—Samson (14). The position of woman was undoubtedly high. Deborah, a prophetess, judged Israel before her victory (4.1). Manoah's wife is assumed to have coordinate authority with her husband (14.2). A woman could inherit—Achshah (1.17); Ruth (Ru.4.11). She had the right of private property—Micah's mother (Judg.17.2). She was not secluded, even when a virgin—Jephthah's daughter (11.34) and the daughters of Shiloh (21.21). She travelled the country alone—the Levite's concubine (19.2). A woman's dishonour was thought little of compared with a man's (19.23,16.1). [Harlot.] The greatest disgrace was to die (as Sisera and Abimelech) when a woman's hand (Gen.37.9,53.51; cf. 2Sam.11.21). By the law of inheritance, property was ordinarily divided among all the sons. The 30 sons of Jair had each a town. Abimelech asked, "Will you have the 70 sons of Jerubbaal to reign over you?" (Judg.9.3). The constant subdivision resulted in nobody being very rich, and none were above manual labour (6.11); nor were any very poor, except the Levites (18.7,19.19). Joshua had apparently allotted them 48 towns, scattered throughout the land; and presumably nobody felt that it was their business to subdue them (Jos.21).—Occupations of the People. In the E. and in the S. the people were pastoral, in mount Ephraim and in the Swiss agricultural. Mention is made of barley, wheat, olives, and vines. The agricultural districts were more settled and civilized. There was probably some truth in the Ephraimitic taunt of Jephthah (Judg.12.4). Besides agriculture, there must have been a considerable trade. There were the rug-taunt and marketplaces; Dan had ships and Asher landing-places. There are also incidental notices of parlours, lattices, doors, locks, chairs, tables, looms, embroidery, linen vestments, costly robes, pottery, and bowls; also mill-stones, ox-goads, cords, ropes, money; also molten images, images, mirrors, trumpets, swords, daggers, spears, shields, trumpets, razors. These things imply industry and traffic.—Culture of the Period. One of the first towns taken by the tribe of Judah was Kirjathsepher—the "book town" (1.12,13). The lad captured outside Succoth was able to write down the names of the elders (8.14). The song of Deborah and the parable of Jotham undoubtedly belong to the period, and evince a high literary character. Then we have the riddle and puns of Samson; and lastly, we have the sources from which the book is ultimately derived.—Religion and Morality. Whether the religion of Israel at this time (in the strict sense) monotheistic, is more than a dispute. There is but little evidence either way. The Israelites certainly worshipped the Jehovah Who appeared to them at Sinai (5.4,5). They believed in the ministry of angels, and attributed to God's direct agency whatever occurred (see esp. 21.15). They worshipped a jealous God, Who forbade any association with other people. Moore writes (Comm. p. 83), "The religious exclusiveness of the ancient world was possible only on terms of complete non-intercourse." The history is a commentary on this. Israel did not root out the nations, and could not refrain from Baal worship and festivals like Baal-berith. They knew God's command, and disobeyed Him—were punished, and repented. Their heroes achieved great victories "by faith." The people were courageous and industrious. Hospitality was of obligation. They were ready to lend aid to any distress. God's Justice required the law of Gog. A vow had to be literally fulfilled, though it involved a
human sacrifice. They condemned cruelty, treachery, and duplicity. Their God was righteous, but their conception of righteousness was low. The ark was at Shiloh; there were priests, and Levites had religious functions. There was at least one festival at Shiloh. Sacrifices were also offered where there was a theophany. The Nazirite vow was known; prophetic gifts recognized. They prayed to God and praised Him. They appealed to Him to answer by lot; they regarded Him as the witness and guardian of oaths. There were also superstitions, represented as such—Gideon's ephod, Micah's ephod and teraphim. They were devoted to tree worship and for the sanctity of wells is not conclusive. Extreme criticism: Budde in Kurzer, Handcomm. (1807); Moore, Internat. Crit. Comm. (1805); Poly-chrome Bible (1808). Moderate criticism: Driver, Introdt. to Lit. of O.T.; König in Hastings, D.B. (5 vols. 1904). Conservative: Bachmann, Comm., 1865 (ch. i-v); Keil, Comm. (Eng. tr., 1869) p. 186. For a revision of the previous recensions. But Comm.; Watson (Expositor's Bible). For teachers: Paterson-Smyth (Bible for Young), Walpole (Rivington's Handbooks). [H.M.S.]

Judgment Hall is the A.V. (Palace, R.V.) translation of Praetorium, the headquarters of the Roman military governor, wherever he happened to be as embodying the title of the Antonia, to the N.W. of the temple (Jn. 18. 28, 33, 19. 9; see Jerusalem). At Caesarea it was probably part of king Herod's palace (Ac. 23. 35). At Rome the position of the Praetorium alluded to in Ph. 1.13 is uncertain. [C.W.]

Judgment Seat. [Garbatha].—1. Daughter of Beeri the Hitite, and wife of Esau (Gen. 36. 34; LXX. Ιουδι).—2. The heroine of the apocryphal book which bears her name, a wealthy and self-sacrificing widow, who appears as a marked example of piety (Jth. 8. 6), courage, and chastity (16. 22f.). The commencing of her prayer by an approving reference to her forefather Simeon (cf. 16. 12ff.) shows, with the last verse of her song (16. 17), that she possessed a certain severity of character, though she is not without more feminine qualities (5, 8, 16. 23, 24). [W.H.D.]

Judith, Book of. This is a historical (perhaps symbolic) romance, containing, probably, some basis of fact. If the story be regarded as having no fictitious element, the geographical, historical, and chronological difficulties are so great as to require many unsupported suppositions. The design is evidently to strengthen faithful patriots, who punctually observe the law, in fighting against their foes. The prayer of Judith to revive hope by a narrative of wonderful deliverance, showing how God is never at a loss for means to protect His people. It exemplifies the keeping up of religious observances, as well as zeal and trust, in hours of great peril. "Surely trusting in God's defence, Judith did "not fear the power of any adversaries." But although her aim was high, some of the means and expressions which she used to achieve it (e.g. 9. 10, 13) are hardly defensible even in time of war (cf. J. H. Blunt's unsatisfactory note). Yet she was regarded as a heroine, taking vengeance on the invader Holophernes.

Judith's song (18) is a fine composition of its kind; and the whole story is well put together, except that the lengthy introduction, before Judith appears in 8. 1, is somewhat out of proportion. The collect for the 7th Sunday after Trinity is indebted to Judith's prayer (9. 14) for its opening phrase.—Language. A lost Heb. original, though non-existent even in Origen's time (cf. Apocryphal Bible), is generally thought likely. From this the LXX. bears strong marks of translation, e.g. 2. 2, 3, 9.—Text and Versions. The various recensions (though differing less widely than those of Tobit) are signs of extensive circulation; but at the same time they do not tell in favour of canonicity. The LXX. authorities. (2) The text we now possess, was the basis of the old Latin. Of this, Jerome, guided by an Aram. codex, made a free and hasty revision for the Vulg. (Prac. in lib. Jud.), which consequently deviates not a little from the Gk. Heb. forms exist of a similar story, much more briefly told, and, in old Jewish MSS. The exact point at which Judith entering into the narrative. Author. That he was a Jew can hardly be doubted; that he was of Palestine is likely from his topographical knowledge, though παραν τον Ἰοδαναν in 1.9 is written from Nebuchadnezzar's point of view. If we may take Judith as representing the author's ideals, he was a man of resolute faith warmly patriotic and religious, almost to the verge of Pharisaism. But ritual uncleanness seems overlooked in 13. 10 (cf. Num. 19. 11-14).—Date. Most of the conjectures may be grouped under three periods: (1) the age of Manasseh, favoured by Dean Prideaux (at least as far as the events are concerned) and the LXX. authorities. (2) the close of the Maccabean age, the latter half of 2nd cent. B.C. This is favoured by many recent writers. Ball postpones it to Alexander's reign, 79-70 B.C. (3) The age of Trajan. The reference to Judith and Holophernes by Clem. Rom. (§ 55) disposes of this notion of Hitzig, and Volkmar, etc. (1883). The narrative involves some chronological difficulties, but those affecting (2) are less than the others. This is, therefore, the most likely period in which to place the composition. Jth. 11. 19 shows a remembrance of the LXX. of Ex. 11. 7. Scholz, Judith und Bel und der Drache (Wurzburg, 1866); Speaker's, S.P.C.K., and Bissell's Comm.; arts. in Hastings' (5 vols. 1904) and Vigouroux's D.B.; Streane, Age of the Maccabees (1898); André, Les Apocryphes (Florence, 1903). [W.H.D.]

Julla, a Christian woman at Rome, possibly wife or sister of Philologus, with whom she is saluted by St. Paul (Ro. 16. 15).

Julius, the kindly centurion of "Augustus'" band," who took St. Paul as a prisoner to Rome (Ac. 27. 1, 3).

Junia (R.V. Junius), a Christian at Rome, mentioned by St. Paul as one of his kinsfolk and fellow-prisoners, "of note among the apostles," and "in Christ" before him (Ro. 16. 7).

Juniper (Lk. 19. 4, 5; Job 50. 4; Ps. 120. 4). The "juniper" of A.V. is a sort of broom, Genista monosperma, G. radam of Forskål, the Arab. ratam (Heb. ᴿʳʰᵉḥᵉᵐ), which is also
JUPITER

found abundantly in the desert of Sinai. The
root is a leguminous plant, bearing a white
flower: found also in Spain, Portugal, and
Palestine. [CEDAR: HEALTH.]

Jupiter (the Latin equivalent of the Gk.
Zeus). In 2Mac.6 it is related that Antiochus
Epiphanes caused the temple at Jerusalem to
be destroyed, later Olympius, and another in
Gerizim to Zeus Xenis—titles which associate
the deity with mountain worship and social
life. He is named once in N.T. (Ac.14.12,13),
on the occasion of St. Paul's visit to Lystra.
The expression "Jupiter, which was before
their city, signifies the extra-mural temple.
Zeus, the supreme ruler of the world according
to Hel. Ideas, is the complete antithesis
to the God of the Bible. [MERCURIUS.] [AP.]

Jushab-he'sed (loving-kindness is re-
turned), son of Zerubbabel, perhaps born after
the Return (1Chr.3.20).

Justification. The doctrine of justifica-
tion by faith is Pauline, and is coloured by St.
Paul's experience of his own life, the outstanding
fact was the revolutionary change
known as his conversion. Before that
event his spiritual history is the record of a
struggle and failure to live the righteous life,
as prescribed by a strict, Pharisaic interpreta-
tion of the law. To his stern sincerity, the
life of Christ's teachings was more and more clearly
impossible, as well as inadequate. On the
one hand, it was impossible to live up to the stan-
dard prescribed; on the other, the fulfilment
of observance remained external, it did not
affect the inner character and brought no in-
ward peace. After the conversion all this was
reversed. Personal surrender brought the
peace that was lacking, for, though complete
attainment was not yet, the decisive step had
been taken and progress was now a fact.
[PAUL.] In preaching justification by faith
instead of works, St. Paul is generalizing from
his own experience. He is seeking to substi-
tute of the concept of δικαιοσύνη, which in the end, in -δο
naturally have the force of "to make," e.g.
περιστάσεως, "to make blind." But this is never
the case when the meaning is moral, not phy-
sical. Hence δικαιοσύνη either means "to vindicate"
or, as here, "to acquit." Its associations are
forensic. It does not signify the making
righteous, which is essential to salvation, but
only the forgiveness of the burden of past guilt,
which is no longer reckoned against the sinner,
who has a fresh start. So far as justification
alone is concerned, it is not the man himself
who is changed, but God's relation to him. (2)
St. Paul does not ignore the other stages. Thus
in the epistle to the Romans it may be said
roughly that the first five chapters are occupied
with justification, the next three with the life
of the believer after justification. St. Paul's
name for this, when he does give it a name, is
sanctification, ἁγιάζειν. This meant origin-
ally consecration, a ritual separation for the
service of God; and with the deepening con-
ception of God acquired gradually a more
ethical meaning. Now, sanctification, which
is a gradual process extending throughout life,
and which is markedly personal and ethical,
must intervene between justification and
clarification. Thus the preliminary judicial
acquittal, signified by justification, is only pro-
visional. In itself it only demands of the in-
dividual a moment's whole-hearted surrender;
it, if it is to be permanent and to have its
proper effect, it needs all the effort of a lifetime
of gradual growth in holiness. The condi-
tions, however, have changed. The impossible
has become possible. The believer is no longer
overweighed by past guilt. But these con-
siderations are not by themselves sufficient to
invert the relationship of a fundamental kind.
The language of a fiction is certainly alien to St. Paul.
Indeed, the early verses of Ro.3 consist largely
of a vindication of God's truth in the matter
of justification. The following points should
therefore be added. (a) Though it is true that
the change of relation takes place while the be-
liever is still mortal, the "redeemed" person,
in which forgiveness consists, is not wholly
independent of fact. "It is dealing with us
not as we are nor exactly as we are not,
but as we are becoming" (Gore). What to a
consciousness bound by time-limitations are
only latent possibilities, may be in God's sight
the deepest truth of a man.
All I could never be.
All men ignored in me.
This I was worth to God, Whose wheel the pitcher
shaped.

(b) The limitations of the -δο form in verbs
of moral meaning, which are necessary in the case
of human agents, would not be necessary when
applied to God. Indeed, the nature of the case whether they are pos-
able. God's thought cannot be separated from
His will, nor is a man's relation to God some-
thing that leaves his inmost being untouched.
He is what he is in virtue of that relation, and,
if God declares him righteous, he will become
so, not merely because God is truthfu1, but
also because He is all-powerful. "The response
of the Gospel to the human sense of actual sin
and unattainable holiness is not the half-grace
of forgiveness, but the whole-grace of redemp-
tion and deliverance. . . . It does not require an
exercise of divine power to extend pardon; it
does require it to endow and enable us with
all the qualities, energies, and activities that make
for, and that make, holiness and life" (Du Bosse).
The difficulty in this view is the fact that, in some cases, the sequence seems to
be broken, and the life of holiness not to follow
on the preliminary acceptance. But the pro-
blem of evil is a difficulty to any theory; and,
in any case, it is the normal and intended
development by which the whole process is to
be understood. The question has been raised
by Ritschl whether the society is not the proper
object of justification, rather than the indivi-
dual, as commonly supposed (cf. Sanday and Headlam. Romans, pp. 122 ff.). A number of texts can be cited in support of either view—e.g. (a) Ro.8.32; Eph.5.25f.; Tit.2.14; (b) Ro. 3.26,4.5,10.4. The corporate aspect is more marked in the later epistles; but it cannot be excluded even from the earlier. Justification would normally be associated with baptism into the Christian community, and the life of sanctification is life in that community, being a common term for the congregation of the faithful. Justification then is, primarily, one stage in the process of redemption. But, though it is separable in thought as in time, it cannot be understood when viewed as an integral element in the whole. "Justification and sanctification may be distinguished by the student, as are the arterial and the nervous systems in the human body; but in the living soul they are coincident and inseparable" (Liddon).

**K**

Kabzeel, a city of Judah, near Edom (Jos.15.21), the native place of Benahia (2 Sam.23.20; 1 Chr.11.22). After the Captivity it appears as JKABZEEL. The site is unknown.

Kades (Jth.1.9). [KEDESH, 1.]

Kades, Kades-barnea. This place, the scene of Miriam's death, was the farthest point which the Israelites reached in their divine guidance. When they reached it, their spies were sent, and there, on their return, the people broke out into murmuring, upon which their strictly penal term of wandering began (Num.13.3,26,14.29-33,20.1; Deut.2.14). In Gen.14.7, the older name Kades (the sanctuary) is stated to have been En-mishpat (the fountain of judgment), which is connected with Tamar or Hazezon-tamar, as is also Kades-barnea (cf. Ezk.47.19,48.28; Num.34.4; Jos.15.3). The site of Kades was discovered by Dr. John Rowlands in 1844 at 'Ain Qadis, due E. of the Wady el-Arish, and its identity with Kades-barnea was demonstrated by Dr. Clay Trumbull in 1884 (Kades-barnea, New York). The spring is still a gathering-place of the neighbouring tribes. But for the opposite view, see Kedes, 1. Here some part of the Mosaic legislation was enacted, and the Israelites were disciplined to undertake the conquest of Canaan. Their residence in Kades lasted from the 2nd year after the Exodus (Num. 9.11,13,26) to the 8th year (Num.20.1,33,37,8). [EXODUS, THE.] [A.H.S.]

Kadmiel, a Levite who (with his family) is prominent in the return from Babylon with Zerubbabel (Ezr.2.40,3.9; Ne.7.43,9.4,5,10.9).

Kadmonites. In the promise to Abraham (Gen.15.18-21) ten nations are enumerated as inhabiting the land which his descendants are to possess. All occur elsewhere in the Bible except the Kadmonites. The name means "easterns," and may be equivalent to the "sons of the east" (brnq-qedhem, Judg.6.3, 33: Job 1.3). In Ezk.47.18 the Dead Sea is called the East Sea, and the Kadmonites may have inhabited its shores. [R.C.]

Kallai, a priest who represented the family of Sallai when Joiaikim was high-priest (Ne.12. 20).

Kanan, one of the landmarks of the boundary of Asher (Jos.19.28 only) in the N. Now Qdina, a village 7 miles S.E. of Tyre, with which it is identified. [C.R.C.]

Kannah, River, a torrent dividing the territories of Ephraim and Manasseh on the S.W. The border "on the W., went N. to Michmethah" (Jos.16.6); "on the W. was the torrent Kanah, and that was the W. border " (16.8); "and the border went down the torrent Kanah, S. of the torrent" (17.9). This applies to Walls Q'dena running W. from the Mukhnah plain S. of Shechem. [C.R.C.]

Karea'h, father of Johanan, 3, and Jonathan, to (Ez.40.8, etc.).

Karka'a, one of the landmarks on the S. boundary of the tribe of Judah (Jos.15.3). Its site is unknown.

Karkor, the place in which Zebah and Zalmunna were again routed by Gideon (Judg. 8.10). Apparently E. of Jogbeah (ver. 11). The word means "soft level ground"—the region of those "that dwell in tents," or the desert E. of the Gilgal hills. [C.R.C.]

Kartah, a town of Zebulun, allotted to the Merarite Levites (Jos.21.34). The site is unknown. [C.R.C.]

Kartan, a city of Naphtali, allotted to the Gershonite Levites (Jos.21.32). Otherwise Kirjatthaim (R.V. Kirjathaim), "the two towns" (rCh.6.76). The site is unknown. [C.R.C.]

Kattath, a city of the tribe of Zebulun (Jos.19.15). [C.R.C.]

Kedar, the 2nd of the sons of Ishmael (Gen. 25.13; rCh.1.29), and the name of a tribe of Arabs, settled on the N.W. of the peninsula and on the confines of Palestine. The "glory of Kedar" is recorded by Isaiah (21.13-17) in the burden upon Arabia; the princes of Kedar and Kedar are mentioned by Ezekiel (27.22). They are probably traders, also as "archers" and "mighty men" (Is.21.17) and dwellers in tents (Ps.120.5). They also settled in villages or towns (Is.42.11). They are probably the people called Cedreil by Pliny, on the confines of Arabia Petraea to the S. The Assyrian notices place Qedaru on the borders of Ethiopia (Tib. A.). [C.R.C.]

Kedemoth, one of the towns allotted to Reuben (Jos.13.18); given to the Merarite Levites (Jos.21.37; rCh.6.79). The word means "eastern places," and the "wilderness of Kedemoth" was apparently just S. of the Arnon, on the border of the Amorites (Num. 21.23; Deut.2.26,27, etc.). [C.R.C.]

Kedesh (holy).—1. A town in the extreme S. of the land of Israel, which included the N. part of the Tith plateau (Jos.15. 23). It was probably the Kades, on the way to Shur, where Hagar found the Deer-

Kedes (KEDESH) 443
KEHELATHAH

Lahai-roi (Gen.16:7,14; see 20:1). This was discovered by F. Rosenthal at ‘Abu Qudais, 3 miles S.W. of Beersheba (cf. Gen. 21:14). The direction, on the way to Shur and Egypt, is suitable. The legend of Hagar, which figures at the spot, was due perhaps to Christian hermits, whose caves exist near (Palmer, in Surv. II. Pal. Special Papers, p. 19). Robinson (Bib. Rev. ii. p. 194) remarks that this site does not suit the requirements of Kadesh-barnea (the holy place of the desert of wandering), which is distinguished in the same chapter of Joshua (15.3), and lay at S.E. angle of the land of Israel, being a city on the border of Edom (Num.20:16); but see the opposite view under Kadesh.

Miles LAHAi-KOi [E.xoDus, 4; Lev.4, 28]. The temple, A.D., 207, now the temple, A.D., 444 (incorrectly), Kedesh, by the British, to 207, 4 B.C. was razed by Tiglath-pileser III. in 734-732 B.C. (2K.15-29). Here the Greeks assembed at Cades (Mac.11.63-73), to meet Jonathan the Hasmonean (116 B.C.), in the plain of Hazor (incorrectly Nasor), in Lower Galilee, or perhaps nearer Kadesh, at Jebel Hadirch, 4 miles S.W. of Qedes. There are remains of a Roman and Jewish buildings, of 2nd cent. A.D., near the spring, one supposed to be a temple, with an eagle carved over a doorway. It is 580 feet above the Hulch Lake, lying to the S.E. of the village. The latter is probably “the plain of swamps” (Zaanaim) by Kadesh (Judg.4:6,9,10,11). This town was raided by Tiglath-pileser III. in 734-732 B.C. (2K.15-29). The S. end of the Promised Land (Gen.15:19) is called a “city” (Judg.1:6,10,11), to be kept by the Hebrews; Joshua (19:33), to have his entrance into Canaan, son of Caleb, is called the grandson of Kenezaz. The Heb. now reads qnizzi; cf. Kenizite.

Kehelathah, a desert encampment of the Israelites (Num.33:32), not identified.

Keilah, a city of the Shephelah of Judah (Jos.15:54), rescued by David from an attack of the Philistines, who had fallen upon the town at the beginning of the harvest. It was then a fortified place, with walls, gates, and bars (1Sam.23:1,2,4,5,6,7). The inhabitants soon plotted David's betrayal to Saul, then on his road to besiege the place. Of this intention David was warned by divining by intimation. He therefore left (ver. 7-13). Now the ruin of Kila, 6 miles W. of Halhul, on the E. side of the valley of Elah, not far from Adullam (see 22:1). In 19th cent. B.C. it is noticed in the Amarna letters (Berlin 100, 106, 107, 109) as attacked by the Abiri. (c.r.c.)

Kehelathah, apparently a descendant of Caleb (1Chr.4:10). Perhaps meaning “the Garmite founder of Keilah.” [c.r.c.]

Kelah, the Garmite, apparently a descendent of Caleb (1 Chr.4:10). Perhaps meaning “the Garmite founder of Keilah.” [c.r.c.]

Keilah, 1. = Keilah, a Levite who had married a foreign wife (Ex.10:23 = Calitias in 1854.9.23). Possibly the same as—2. A Levite who assisted in expounding the law (No.8-7, = Calitas in 1Esdr.9.49), and signed the covenant with Nehemiah (Ne.10:16).

Kemuel.—1. Son of Nahor, by Milcah, and father of Aram (Gen.22.21).—2. Son of Shiphtan, and prince of Ephraim; one of twelve men appointed by Moses to divide the land of Canaan (Num.34.24).—3. A Levite, father of Hanieliah, 5 (1 Chr.27.17).

Kanan (1 Chr.2:12), the more correct form of the name of Canaan, son of Enos.

Kenath, one of the cities on the E. of Jordan, with its “daughter-towns” (A.V. villages) taken possession of by a certain Nobah, who then called it by his own name (Num.32.12; 1 Chr.23.23). Now Qananaw, a ruined town at the southern extremity of the Lea, about 20 miles N. of Bosra. Among numerous Gk. and Lat. texts (one by Agrippa) is an inscription of the people “of the city of Kanatha” in honour of Commodus. [c.r.c.]

Kenaz.—1. A duke of Edom; son of Eliphaz, son of Esau (Gen.36.15,42; 1 Chr.1.53).—2. The father of Otniel and brother of Caleb, and grandson of Hezron (1 Chr.4.13). If “Caleb's younger brother” be taken to apply to Otniel instead, then Kenaz would be the “father” of Caleb, who is, however, elsewhere (Jos.15.13, etc.) described as “the son of Jephunneh.” The interpretation first given (which is, moreover, that of the LXX.) also avoids placing Caleb in the tribe of Judah having married his niece; but both interpretations involve difficulties (see 14.6 and art. Kenezite; and for another view see Caleb).—3. A grandson of Caleb, according to 1 Chr.4:15, where, however, the meaning is doubtful.

Kenizite (Num.32:12; Jos.14.6,14), a title of Caleb, as the grandson of Kenaz. The Heb. now reads qnizzi; cf. Kenizitte.

Kenites, The, mentioned in the patriarchal history as one of the tribes inheriting the Promised Land (Gen.15:19). As Jethro, priest of Midian, Moses’ father-in-law (Ex.18.1) is called a Kenite (Judg.1:6,14,11), we may conclude that Jethro, though closely connected with the Midianites: and they are also mentioned as dwelling among the Amalekites. They seem to have been a nomad tribe, preserving a purer faith than the surrounding tribes, for Jethro joins with Moses and Aaron in the worship of Jebowah (Ex.18.9-12); and, at the entrance into Canaan, some of them “went up out of the city of palm-trees with the children of Judah into the wilderness of Judah . . . and dwelt with the people” (Judg.1.6; cf. Num.10.29-32), while a portion of the tribe separated themselves, and went as far N. as Kedesh (Judg.4.11). The bulk of the tribe, however, remained in the S. Saul showed kindness to them for old friendship’s sake (1 Sam.15.6), and they seem finally to have become absorbed in the tribe of Judah. The Rabbis, who till a late time led the nominal life (Ibn.35.6-10), are called Kenites in 1 Chr.2.55. [J.e.]

Kenizzite (Gen.15:19): Heb. qnizzi, a Canaanite tribe. Gesenius renders the word as “hunters,” like the Arab. Qanas.

Kenosis: Pleroma. (1) Kenosis is a substantive not found in N.T.—a term used by theologians to sum up Ph.2.7: Incarne exousia. Lat. sanctissimum assumiutum, A.V. “He made
himself of no reputation,” R.V. “He emptied himself.” The verb means “to empty” or “make void.” It occurs Ro.4:14; 1Cor.1:17, 9. It is used in latter semi-Gnostic Pleroma, as a substantive, περίθαλε, supplementum; A.V. and R.V. “fulness.” Πληρωμα has two meanings: (i) “that which is filled”; (ii) “that which makes up the fulness,” E.g. a full ship, or the men and tackle of a ship. In N.T. the word means “that which is filled” or “the thing in its fulness.” In Mt.9:16 and Mk.2:21, it means either the completeness of the patched cloth, which is afterwards destroyed by the patch, or “the patch” viewed as abstract completeness in opposition to the hole requiring a patch. In Mk.6:13 and 8:20 it means “full measure.” St. Paul uses the word in this sense in Ro.11:12, 13, 15,10,15,29; 1Cor.10:26; Gal. 4:4; Eph. 1:19,20. In order that mankind might use of God or Christ in six places: (i) Jn.1:16; (ii) Col.1:19, 2:9; (iii) Eph. 1:23, 3:19, 4:13. In these passages it is used of (i) the fulness of the grace and power brought to men from God by Christ and communicated to them in Him; (ii) the fulness of the divine powers or the divine essence, that is not possessed by the Incarnate Son; and (iii) the fulness of the attributes, powers, and characteristics of the Christ which are to be exhibited in the ideal Church. St. Paul is thought to have reclaimed this term from wrong usage by Colossian heretics, who spoke of Christ as a man sharer, to some small extent, of the pleroma of divine power. Later heretics of the Gnostic type regarded the pleroma not only as the fulness of the divine power, but as an actual place in which that power is localized. (3) The Pleroma of Godhead in the Incarnate Son. The Christ is the Revelation of God to man. In Him dwells the fulness of Godhead bodily (Col.1:19, 2:9), in their ultimate essence, men may receive divine life or grace, and know the divine Being in truth (Jn.1:16, 17). Godhead cannot be contained in manhood, but all that manhood can ever receive and know of Godhead is in the Christ—the Eternal Son. Thus, in union with the true Son of Man, who is also Son of God, the holy mystery of the divine life, shares the divine life, and is guided by divine knowledge. God became incarnate, taking our manhood in order that our manhood might be made perfect through His divine grace and truth. All divine powers and prerogatives were in some measure exercised by, and in their ultimate essence, possessed by, Jesus the Son of Mary. The Christ was not a mere man to Whom was communicated divine power: He is the eternal Son, very God of very God, possessing the fulness of the divine power, and exercising it according to the capacity of His perfect, God-assumed manhood. (4) The Kenosis of the Eternal Son. The difference between possession and exercise is the measure of the Kenosis, or self-emptying of the eternal Son. This Kenosis has been very variously estimated. (i) St. Paul merely asserted the fact of self-emptying as a ground of Christian humility. He does not tell us of what the Son emptied Himself. Rather, he speaks of the Kenosis as of Kenosis to consist in the assumption by the Son of a state of slavery (Ph.2:5-9). Slavery is a negative state, implying the disability to exercise prerogatives and powers of which no man can divest himself. So the eternal Son “emptied Himself” by accepting manhood as a sphere of limitation, a realm of slavery. By the very nature of things, a truly divine will He be upon himself a law of perpetual self-restraint in regard to new relations which He was to take upon Himself towards creation, with a view to its redemption—all which relationships spring from and find their existence in His assumption of manhood. This fact of self-restraint binds the Son also in His relation to His Father within the sphere of His activity as High-priest and King of the redeemed universe. (ii) Patristic writers shrank from emphasizing the Kenosis, lest they should fail to do justice to the glory and power of the Incarnate. St. Irenaeus taught that the Word was sometimes quiescent, in order that His manhood might have its tree and natural exercise, and His teaching was followed more or less by Athanasius, Gregory Naz., and Basil. The pressure of heretical teaching led to the view that these human actions were due not to quiescence, but to the supreme power of the divine Son, in whom men saw no human weakness or limitation. It was held that the Son was in all respects compatible with divine freedom and power. So taught Gregory of Nyssa, Hilary, Ambrose, Augustine, Cyril, and Leo. (iii) In reaction against this view there arose after the Reformation the school of Kenotists: men who emphasize the reality of the manhood in the Christ, predating the heavenly kingdom, the abdication of divine powers and prerogatives. Some hold that the Son ceased to exercise His cosmic functions, having no share in the ruling of the universe during the years of His incarnate life. Of such are Gers and Godet. Others who will not accept this extreme view, yet agree that the Son surrendered His physical attributes of omnipotence, omnipresence, and omniscience, while retaining the moral, internal attributes of Godhead. Of such are Thomasius and Fairbairn. Martensen taught a less extreme view, which lies to some extent behind that of Bishop Gore. The matter is one of the greatest mysteries of the Christian religion, and is appropriated, which will guide men towards the truth. (i) No explanation of the Kenosis is satisfactory that is not applicable to our Lord’s present state of glorious manhood. The Incarnate Life never ceases, and therefore no theory of actual abandonment of attributes is acceptable. (ii) The sphere of the Incarnation may not be completely separated in thought from the sphere of the Logos-Life: for, in fact, both spheres, or states, are merely sums of relationships founded in one Person as subject. (iii) The distinction between physical and moral attributes must not be over-emphasized, lest it be said that God’s love came into existence at the Incarnation. Omniscience, for example, may be shown to lie in eternal Love. (iv) The Incarnate has no relations Godward or manward except in and through manhood; and within these relations His Godhead is limited by and conditioned in His manhood. (5) The Church the Pleroma of Christ (Eph.1:23, 4:13). The fulness of Godhead in the Christ is not under conditions of manhood; and in His manhood is the centre of the redeemed race.
That race, as called and sanctified, is named His mystical body, the Church. It manifests His power through the Sacraments, His truth in the Word, and His moral beauty in the lives of saints. In the last day it will exhibit before God the fulfillment of His ideal for man, and the completion of the offering of obedient wills that was begun on Calvary. Without the Church, the Christ cannot see His victory. Without the Christ, the Church is not.

**Ke'ren-happuch**, youngest of the three daughters of Job, born during his restored prosperity (Job 42.14). [Paint.]

**Kerioth**.—I. *(Je.48:24,41.)* [Kirjathaim.]

—II. *(Jos.15:25.)* properly *Kerioth-hevron,* as in R.V. [Hazer, 100.]* This has been considered to be the birthplace of Judas Iscariot, whence his second name; but many regard *Qurrat* (the *Corea* of Josephus), a place not mentioned in O.T. and situated 10 miles S.E. of Shechem, as the possible birthplace; and for another suggestion for the origin of *Iscariot,* see Sychar.

**Ke'ros.** Sons of Kerem were Nethinim who returned with Zerubbabel (Ezr.2:44; Ne.7:47).

**Kettle** *(dahil)*, a vessel for culinary or sacrificial purposes (1Sam.2:14). Rendered "basket" *(Ge.24:2, "caldron"* in 2Chr.35.13, and "pot" in Job 41.20.

**Keturah** *(incease; Gen.25:1)*, the second wife whom Abraham took after the death of Sarah, but referred to in 1Chr.1.32 as his concubine. She is related to have borne him six sons, and whereas the birth of Isaac was regarded as wonderful, that of these six sons, when Abraham was much older, is passed over quietly. For this reason it has been suggested that Keturah was a concubine really contemporary with Sarah; while some modern critics would see in this story a reason for suggesting a different document (E), in which an attempt is made to show the relation between Heb. and Arabian people. There is evidence of an Arabian tribe bearing the name Keturah. [R.E.S.]

**Key.** The key of a native Oriental lock is a piece of wood, from 7 in. to 2 ft. in length, fitted with wires, wooden pegs, or short nails, which, being inserted laterally into corresponding holes in the hollow bolt which serves as a lock, raise other pins within the staple so as to allow the bolt to be drawn back. But it is not difficult to open a lock of this kind even without a key, viz. with the finger dipped in paste or other adhesive substance. The passage can.5.4,5 is thus probably explained. [Lock.]

**Keys, Power of the.** [Excommunication; Peter.]

**KING**

**Ke'zia**, second of the three daughters of Job, born after his recovery (Job 42.14).

**Ke'zi', Valley of**, one of the "cities" of Benjamin (Jos.18.21) and the E. border of the tribe.

**Kibroth-hattaavah** *(graves of lust;* the 2nd station after leaving Sinai (Num.11.19, 34). This name (10:33) ending with a longer stay at Hazeroth (11:35). But in Num.33.16 Taberah, the 1st station, is unnoticed. [Hazeroth.]

**Kibzaim**, a city of Ephraim, given with its "suburbs" to the Kohathite Levites (Jos. 21.22; site unknown. [Kokedm.]

**Kidron** *(the black torrent; Heb. nâhal;* crossed by David on the way to the desert from Jerusalem (2Sam.15.23). It was a centre of idolatry from the time of Solomon (1K.3.7,15.13; 2K.23.4,6,12; 2 Chr.15-16,29-16,30,14; Je.31.30), and is the cedron (Kedemoth) of N.T. (Jn.18.1), between Jerusalem and the mount of Olives, on the slopes of which Solomon's temples to Ash-teroth, Chemosh, and Molech were built (1K.11.5,7). It is also called simply "the torrent," (A.V. valley), or nâhal (2Chr.33.14). Josephus calls it Cedron, and states that it divided Jerusalem from the mount of Olives (5 Wars ii. 3, iv. 2, vi. 1, xii. 2, etc.). The ravine is narrow and rocky, with cliffs on the E. The bed (300 ft. below the temple) is now raised 40 ft. by the rubbish of the temple and city. Before 728 B.C. a stream may have flowed on this rocky bed (Ginosos); as described (32.4) c. 703 n.c.,* the nâhal which flowed through the midst of the land (or. earth)"; even now much water flows down it in winter underground, and rises suddenly in the Bir Eyâb, at the junction with the Hinnom gorge, forming a surface brook, which runs E. to the Dead Sea. On the E. slope, opposite the temple, there are remarkable Greco-Jewish rock-cut tombs. The cedron or Kedron Valley is possibly the tomb of Alexander Janneaus (Josephus, 5 Wars vii. 2), and that called the "groto of St. James" bears a square Heb. text (perhaps c. 50 n.c. or later), stating that it belonged to the Bene-Hezir priests (1Chr.24.15). The others are of the same age, but clearly Jewish. At the village South of the site on the E. cliff, M. Clermont-Ganneau found a much-worn Phoenician text, on which the name Baal is readable—perhaps a relic of the idolatrous shrines on Olivet. [Jehoshaphat, Valley of.]

**Kinah**, a city of Judah, on the extreme S. of the territory towards Edom (Jos.15.22). The site is unknown. [C.R.C.]

**Kindred.** [Family.]

**Kine.** [Cattle.]

**King.** The office of king in Israel must be considered in connexion with the special relation in which the people stood to God. We should note that kingship is predicated of God Himself (Ps.74.12). This idea was, indeed, held by Israel in common with other nations, as is illustrated by the frequency with which the name of the tribal god is compounded with the title "king." Thus Molech, the god of Ammon, is simply "the king." Etymologically the word appears
to mean “one who gives counsel.” Hence the root idea is one of whose superior wisdom gives him a right to direct the nation. Primarily this quality is ascribed to the tribal god, and thus arises the analogy between the god and the temporal ruler. In the particular case of Israel, the divine king is the kingdom of Jehovah; and we find two lines of thought, which are very difficult to reconcile with one another, as to the relation that should subsist between this divine kingship and the earthly ruler of the people. The book of Deuteronomy regards the king as having a proper place. In the other, Regulations and restrictions are laid down for his guidance, and his observance of these is to be rewarded by long life in his kingdom (17.14-20). On the other hand, Samuel regards the demand for a king as a repudiation of the divine sovereignty (1Sam.8.7). We may perhaps interpret (1Sam.8.14), which refers to the particular circumstances under which the demand was made. There was a desire to emulate the surrounding nations in worldly ambition; and so far the demand showed a falling away from the theocratic ideal. Certainly the Eastern despot whom Samuel depicts (8.15-17) was such a ruler as would help the people to fulfill the purpose of their election. The religious aspect of kingship is prominent in the mode of appointment. In the case of Saul (10.24) the choice is that of God Himself; Samuel calls the people together, but only in order to ratify the choice already made. So, too, in the case of David (16.11-12), who are designated by God for the office. Afterwards this principle disappears, and the succession becomes dynastic, except that in the northern kingdom it was constantly interrupted by military conspiracies. Jeph, however, claimed divine sanction for his seizure of the throne (1Sam.11.17), which symbol of his appointment to office, had a religious significance (1Sam.16.13). [ANONITING.] In accordance with this, we find that definite religious duties were attached to his office. He was required to take a leading part in the national religion, and to make special provision for the support of the high priest (Deut.18.1-2). In some degree there belonged to him the right of actually offering the sacrifice himself. Saul certainly regarded this right as inherent in his office, though in the particular circumstances in which he exercised it he incurred Samuel’s displeasure (1Sam.13.9). David wore a linen ephod (2Sam.6.14), which was a garment distinctive of priesthood (1Sam.22.18), and he, too, appears to have offered sacrifices in person (2Sam.6.13.17). At a time when there was as yet little advance in civilization, it was natural that a prominent part of the king’s duties should be leadership in war. It was in part the need for a recognized leader into the field of the king’s viceroyalty (Ex.3.17), Zep.2.8) which is full of the hope of a kingdom in which David would be for ever represented by a royal descendent ruling in God’s name. In Dan.7 this hope takes the form of a vision. Dan. represents the four empires hostile to Israel as successively losing their power before the appearance of God. Everlasting dominion is then given to
"one like unto a son of man" who represents the faithful remnant of Israelites. In the apocryphal books there is further teaching about the kingdom. In the Ps. of Sol. (xvii. 3-5) it is connected with the advent of the Messiah. Sometimes the whole idea is strongly nationalistic and political, sometimes far more spiritual. The tone of Wis.10 may be compared with that of Ps.145.9f. The ordinary Jewish conception of the kingdom of God made it practically that of Jewish domination.—The Kingdom is Spiritual. Our Lord's teaching about the kingdom makes it essentially spiritual. It is a force directed against the power of Satan, who has an organized kingdom of his own (Mt.2.26-28; Lu.11.18). Christ repelled all temptation to become a secular king (Mt. 4.8; Ju.6.15.18.36). His statecraft is truth and justice. It was part of the cunning of His adversaries that they persuaded Pilate to condemn Him on the ground that His kingdom was of this world, when the Jews had really rejected Him because it was not. He had made no attempt to deprive Caesar of what was Caesar's, but asserted the paramount claim of God on man's allegiance. God's kingdom was not to be confused with anything else; it was of a different order. It is free to all. Further, God's rule over man inaugurated by His Son is itself God's gift and the security of man's freedom. The kingdom is said to "come," "be at hand," "draw near." It is "prepared" by God and "inherited." It is "given" (Lu.12.32), and "arrived" (Mt.10.15) by those who have the spirit of a little child. Like every gift of God, it demands a moral effort on man's side. It must be "sought" with trouble; for it everything else must be "sold" (Mt.13.31). God's purpose for us is fulfilled by our own co-operation. St. Paul exactly represents the place of human effort when he writes, "Work out your own salvation, . . . for it is God which worketh in you" (Ph.2.12f.).—The Kingdom both Present and Future. The kingdom was present in the world when Christ taught and worked. It was not a rule to be inaugurated first at His second coming. Its full realisation is in the future. It begins with the Kingdom of God (the Messiah). Some Jews believed that the reign of the Messiah would not begin until after the judgment; others believed that He could conquer His enemies and begin His reign before the judgment. The latter conception is nearer to the teaching of our Lord, though He spiritually transformed it. The kingdom came into the world as a hope for the future, but where Jesus went the hope became in some measure an actual reality. The kingdom is present, for with the preaching of Christ a new era begins (Mk.1.15). Satan, "the strong man," is already being bound a prisoner (Mt.12.28 = Lu.11.20). God's kingdom and His righteousness are to be sought now; one is accessible like the other (Mt.6.33). It is now being taken by force and occupied (11.31f.). Further, the parables of the Sower, the Tares, the Mustard Seed and the Leaven all imply that the kingdom has begun. The kingdom belongs to the near future. Some who hear Jesus will live "to see the kingdom of God come with power" (Mk.9.1). St. Matthew, in the parallel passage (16.28), says, "Till they see the Son of Man coming in His kingdom." It is not necessary to suppose that St. Matthew meant by this something different from St. Mark. The disciples saw the Son of Man come in the Person of the Spirit (Jn.14.19; cf. Mk.14.62, Mt.28.6f., and Dan.7). Therefore the development of the "blade" into the "ear" (Mk.4.28). The kingdom belongs to a more distant future. It is to be consummated at Christ's second coming. He will then call the blessed to "inherit the kingdom prepared for you from the foundation of the world" (Mt.25.34). In this sense the kingdom is strictly eschatological. It is remarkable that St. Paul uses the phrase both in the sense of a present reign of God and in that of a kingdom at the end of the world (Ro.14.17; Gal.5.21).—The Kingdom both Inward and Outward. It is uncertain whether the Gk. in Lu.17.20f. means that the kingdom is "within you" or "among you." But it is evident that in its essence the kingdom is unseen. This is shown by, e.g., Lu.12.23ff., Mt.5.3. It is also outward. All spiritual social forces must have an outward form to be the instrument of their inward power. The kingdom that begins as the reign of God in the heart must become visible, manifested in the life of the individual and of a whole world. St. Paul (Rm.14.7) shows the development of this idea. The parable of the Tares illustrates this. The kingdom is here that part of the world where the good seed has been sown by the Son of Man, where good and evil grow together until the end (Mt.13.11). So, too, the kingdom is a dragnet, gathering both good and evil (Mt.13.47). Much recorded in Mt. implies the idea of a society of persons visibly connected in a supernatural bond. The kingdom of heaven of which St. Peter received the keys must necessarily be a society with a visible form, a society to which men can be admitted and from which they can be excluded. Our Lord calls it "My Church" (16.18f.). Thus the kingdom of God is also the kingdom of His Son (cf. Eph.5.3). He definitely calls His own the kingdom where He has sown the good seed. He is Himself the King. Who shall judge all nations? St. Paul (Mt.25.31, 33) tells us, and shall "eat and drink at My table in My kingdom" (Lu.22.30). The kingdom of the Son as a redemptive power will then be ended. When His redeeming work is complete, "He shall deliver up the kingdom to God, even the Father" (1Cor.15.24).—Definition. The kingdom of God is the reign of God in the hearts and conduct of His children; a reign which was embodied in the whole character of Jesus Christ, has expanded in the life of the Church, and will be perfected at the second coming of our Lord. [Jesus + Christ, III. (1)] [L.P.]

Kings, Books of. Language, Text, and Sources. The two books of "Kings" form part of a continuous history, of which the former part is closely related to Samuel, the last part to Jeremiah. The Talmudic tradition that Jeremiah was the final editor, possible, though the last chapter leaves us somewhat abruptly in Babylon, and not in Egypt. The Gk. translation of the "Kings" is of "royal transactions," which correspond to our 1 and 2Samuel and 1 and 2Kings, but the division into books is more ancient; that between the 1st and 2nd "Kings" is unhappy.
For the weighty judgment of Ewald as to the language of "Kings," see Samuel, Books of. The Heb. is of the golden age, but clearly later than the Pentateuch. The vivid personal touches of Samuel reappear in the first part, and in the anecdotes of the prophets. In the Elijah and Elisha episodes historical writing takes a new lease of life in the freer air of the N. and under the impulse of great events (see Benzing ad loc.). For vigour and beauty it is unsurpassed. We are certainly right in looking to the schools or colleges of the prophets for those who selected from contemporaneous tradition, writing, and annals what lent them to them, the Chronicles, which select and modernize out of the same ancient material from a priestly and post-Exilic standpoint. The traditional text, though sometimes corrupt, holds the field. We should experience more than Nöldeke's "slight philological shudder" (Löhr, S., xci.), for a text more accurate than the present one we should not have told. An instance will illustrate its merits and demerits. In 1 K. 8.12, but out of its place at ver. 53, the LXX. inserts before "The Lord said," "He made the sun to be known (or, to appear) in heaven." And they follow with "is not this written in the book of the song?" (cf. 2 Chr. 7.1). The LXX. is accepted as original by many. But it is a confused reminiscence from 2 Sam. 23.4. It misses the point of the noble abruptness of Solomon, and confuses the meaning. "The Lord said He would dwell in the thick darkness and the cloud and the fire. He will dwell here." (At ver. 12 MS. B of the LXX. omits Solomon's words, MS. A inserts them as the Heb. does: both add the insertion given above at ver. 53.) Yet "the book of the song" (i.e. book of odes) is probably the only remaining trace of a primitive corruption in 2 Sam. 1.18, where Jashar (the just), which is inappropriate, supplies, "the song," or in the use of "cry" (2 K. 21.8) for "the song" by a transposition of letters. The fabulous addition of the LXX. to the story of Jeroboam at 1 K. 12.24, rightly rejected by Keil and Rawlinson, is the first of those stories, added sometimes to canonical books, which gives its reflected meaning (legendary) to the word "apocryphal." The sources of these stories may be approximately indicated. Besides the annals of Solomon, and the annals of the kings of Israel and Judah, we have: (1) the Samuel source, c. 978-975 B.C. (cf. 1 Chr. 27.24). In its graphic personal style the story of Samuel is continued, and completed. (2) The Solomon source, c. 975-938 B.C. It is distinguished by character-
KINGS, BOOKS OF

artificer added. The “tent of meeting” in Exodus is implied by what is omitted, for there is no description of the chief and most significant parts of the temple furniture. The old sanctuary ornamentation (“cherubs”) is mentioned because made in carving and overlaid in gold, with gourds and palm-trees and outspread garlands of flowers added (2K.18.29ff.). The “lilies” introduced by Hiram (7.19.22.26) into his new work were possibly favourite flowers with David and Solomon (see Pss. titles). Cherubim are mentioned because Solomon added two large cherubim of olive wood (6.23), covered with gold, detached, and to overshadow the ark and its cherubim. There is a break at 7.47, observed by the LXX., which translates the first verb wrongly, “he took or gave.” The pattern and ornament of the furniture, which follows, is not given. It is not Hiram’s; it is the “tent of meeting” pattern. The mention of it is because Solomon increased the number of tables and lights in his larger building. Such points as that, e.g., the top flanking rooms are larger than the lower by increasing rebates in the walls, show the building real and not imaginary (Rawlinson ad loc.). Comparison with other ancient Eastern buildings is the key to an accurate understanding (Fergusson, History of Architecture, p. 203). Solomon does not seem so near to us as do the heroes of Samuel. His public utterance gives a noble idea of his “wisdom.” But his character is to be sought in his writings, some of them extant (see 4.32-33). (iii) 1K.1.2 to 2K.10 and end 13. The temple is regarded by the prophets as a sin, though providentially brought about by Solomon’s forced labour, as well as by his luxury and foreign affinities—and the resulting decline of the kingdom. The scene shifts for years to the N., for here the battle for true religion chiefly raged. Judah is only briefly mentioned. The reforms of Jehoshaphat are left out, though implied (2K.22.43). The destruction of his Elath fleet (possibly alluded to 1S.48.7) is mentioned because of his failure to restore Solomon’s commercial status. (iv) 2K.11.12 and end 22. Correlation of Jehoash, successor of Jehoshaphat to Judah by alliance and by the intermarriage with Athaliah, Jezebel’s daughter, who introduces Baal and the Asherah, and through Ahaz, “who walked in the way of the kings of Israel” (16.3), and introduced foreign fashions from Damascus, and the Sungod and the host of heaven from Assyria. In the weakening and ultimate extinction of Israel, whose last kings were short-lived murderers, Judah is left open to Aram and Assyria. The reforms of Josiah, Uzziah or Azariah, Hezekiah, and the most thorough one of Josiah, stayed the rum; but they were to an extent forged on a half-hearted people, and were followed by reaction. Manasseh’s repentance is not mentioned, because it did not materially affect the story. Judah, left alone, is first oppressed by Aram and then by Assyria, and in the end destroyed or led into captivity by Babylon. The last vestiges (24.13-18) of the wisdom and greatness of Solomon:

**Historical Implications.** In the earlier books, the pre-existence of the Mosaic literature emerges in hint and allusion. The disturbed state of the times prevents its full operation. But in the time of peace and progress with which Kings opens, the pre-existence of the books of Moses is certain, if the history is trustworthy. The action and words of Solomon presuppose it, and have otherwise no sufficient cause. His seven prayers at the dedication are based upon Deut. and Lev. The history of Judah is ever in its reforms recurring to a type directly declared as set once for all. Deut. is quoted (K.14.10.11.15; cf. Deut.32.36, 28.29.29.37), and the law said to be written (K.2.3; 2K.17.35-59; cf. Ho.8.12, Heb.), before the book of the covenant was found in Josiah’s time. The “testimony” in the coronation ceremony (2K.11.12) would probably be the king’s copy of the law (Deut. 17.18). The proportions and description of the temple imply the “tent of meeting,” and in the ark are still the two tables of the ten words” (K.8.9). The Mosaic institution was an ideal—variously approximated. Perhaps, in the prophet’s judgment, it was most nearly reached by Josiah. The northern prophets devised means for keeping together the godly in the spirit of the Law, and as far as possible to its form (18.29 and 31; 2K.4.23). The northern solutions, however, especially the Deuteronomic redaction really grants all this, and is itself critically violent, for the traces of the law are imbedded in the record. The sober historian will hesitate to allow the spirit of direct falsehood, which such a redaction unavoidably involves, to be the spirit of the Law. No writer who wrote would pretend to destroy the evidence. But it is a two-edged sword. It is far more likely that the history alludes to a foregoing literature, which has come down to us, than that it should be systematically falsified to agree with something that never existed. It would never enter the mind of any one simply desiring to explain what he finds, that the law book discovered in the temple was Deuteronomy only. Its description is too precise (2K.22.8.11.20.2.3). Deuteronomy only is not “the book of the law,” “the book of the covenant,” the words of this covenant which the king was to read from day to day, but something which gives the ancient opinion that Deuteronomy is a repetition and an exhortation. From Deuteronomy only, Josiah’s great passover would not have resulted. Even De Wette allows, in reference to 2K.22, that by Deuteronomy “the existence of the other books is presupposed” (Introduction, § 162 a). But, further, the consistent habit of the Heb. writers of mentioning things only when they come directly in their way indefinately increases the strength of the evidence. Only one great national festival, the Feast of Tabernacles, used as the dedication feast, is mentioned in the reign of Solomon. That, however, national assemblies at the feasts (K.9.25) were the use of Solomon’s time and that they involved the godly of the N. to a notable degree, is quite clear from Jeroboam’s invention, at Dan and Bethel, of calves and of gods “after his own heart,” and priests “from all the people” to perform the Levitical, when we are told they are gone out to the Lord (12.26-31). The half-shekel poll-tax for the temple service and the various priestly dues of Levitites were always in operation as far as possible,
KINGS, BOOKS OF

but they are only mentioned when Joash un-
successfully attempted to divert some of them
to the repair of the temple dilapidations (2 K. 12:
4f.). The various kinds of snake were always
going on, in accordance with Leviticus, but are
only mentioned when Ahaz interfered with
them by introducing his foreign altar from
Damascus (16.13-16). The brazen serpent
"which Moses made." (18.4) was in all
probability in Jerusalem from the first, not
withstanding other theories; but it is never
mentioned anywhere, till Hezekiah destroyed
it, to prevent its further superstitious use.—
The Miraculous Element. This is not the place
to discuss the possibility of Miracles, or the
unique nature of the Heb. idea of it. It is
only in place to point out the strength of the
evidence, and the worthiness of the "signs"
occurring in these books. The kingdom of
Israel was weakened by perpetual violence,
deserted by its teachers (2 Chr. 11:14 and 13:9)
and the means of true worship, and left a prey
to idolatry and persecution. The prophets
raised up to the crisis, and furnished a link
among men of piety. It is impossible to explain
their influence without the sufficient cause
alleged for it. Jehovah, as at the Exodus "a
man of war," contends at the frontier for the
safety of the faithful remnant and for the con-
tinued existence of Jerusalem, where He set
His name. The Old Testament is the mirror
of Israel's disasters, and its justification of
God (Gotet). The towering form of Elijah, the mediator of a new revelation
of God's secret counsel, is not the form of an
impostor. His taking up was seen only by
Elisha, but it was verified by the search of
50 men. The wonders of Elisha were related
from lip to lip (2 K. 3:14f.), much as the wonders
of Jesus Christ were in the same country.
His method resembles his Master's. Even smaller
miracles are part of a story characterized
by a unique and fearless truthfulness, and
manifestly near to the events. The total
effect is to relieve the oppressed remnant with
a sense of unseen protection into a balance, to
chastise insouciance and negligence, to stay for a
while the torrent of impiety. The superb
drama is, at any rate, a writing of genius. The
apocryphal stories of the LXX., Josephus, the
Talmud, and the Koran show what legend is,
and what are its marks (see Keil, p. 57). The
power of the prophets was exercised according
to their own mind in stern times, and conse-
quentially breathes the spirit of the O.T. rather
than that of the New. The destruction of
Sennacherib, in answer to Hezekiah's prayer in
an agonizing crisis, was in the public records,
and was known in Egypt; for Herodotus appar-
tently makes a confused allusion to it (ii. 144). —
Contact with the Monuments. Within the last
70 years a great resurrection of ancient times
has come from the decapitation of ancient
monuments. Work is going on. It is well
neither to ignore, nor to exaggerate. The
book of Kings is as good and honest a record
as any ancient monument. The nearest
approach to a continuous history is provided
by the Assyrian Eponym Canon, which George
Smith refused to consider infallible (Eponym
Canon, p. 182). The progress of discovery,
however, restores vividness to the old, for-
gotten past, and largely reinforces the opinion
that in such a work as Kings we have not
legends, but reality. The external contact,
small in Solomon, increases in Kings, and with it
contact with the monuments of other nations.
Points of contact which confirm the lesser
statements in Kings should add to our con-
fidence in the whole. (a) According to
Deutsch, Tyrian mason marks have been
discovered upon the big stones of Solomon's
temple foundation, with other Tyrian remains
of interest. The royal quarry, whence the
stones were hewn, has been found. (b) The
allusion to "the kings of the Hittites," once
derided, is found to be accurate. (c) An in-
teresting sidelight on Solomon's fleet at Elath
comes from an inscription of Sennacherib
(Sankerib III. R. 12), in which he relates
that he made certain captive Hatti (dwellers
perhaps in Cyprus or on the Mediterranean
cost) build lofty ships in Nineveh, such as
they made in their own country; that he
employed them with sailors from Tyre, Sidon,
and Yawan, and finally, with a complement of
Assyrian ships, he formed a fleet, and
set them in the Persian Gulf. Neither Hebrews
nor Assyrians could build or handle big ships
without the Phoenicians (Delitzsch, Wo lag das
of Mesha on the Moabite Stone "agrees
tfully with the Bible" (Winckler, Keilschriften,
p. 253), which strengthens the view that
statements like 2 K. 3:4f. are well ground.
(e) German explorers have discovered, N. of
Antioch, Aramaic inscriptions which spell Tig-
lath-pileser as in Kings, and not as in Assyrian,
"Tukulti-Pal-eshar." So that probably pecu-
liarities in spelling in Kings "go back to the
period of the events recorded" (Sayce, Higher
Criticism and the Monuments, p. 12; Winck-
ler, p. 38, note 3). (f) The Siloam inscription,
in ancient Heb. script, was probably put there
by Hezekiah's workmen when he made his "con-
duit" (Sayce, Fresh Light, p. 82). (g) In the
British Museum (K. 1620) is a letter of Senna-
cherib, assigning large gifts to Esar-haddon his
son, whose name was wished to be regarded as
the "birthright of the Past," ser. i. vol. i. p. 136).
The tenor of the letter, which is known, perhaps
without sufficient reason, as "the will of Sennacherib",
seems to indicate that he was a favourite son.
This, taken together with the fact that Sen-
acherib appointed Esar-haddon, though his
fourth son (Lenormant, Hist. p. 491), to the
important position of king of Babylon during
his lifetime, may throw an interesting sidelight
upon the motive of jealousy which induced two
other of his sons to murder him (2K. 19:37).—
Unity. Kings is the expression of a prophetic
mind. Persistent through so many generations
of varying voices, it speaks with one voice.
The prophets were not antagonists of the
priests, as is sometimes stated. All along they
stand for thoroughness in religion and purity
in worship, and they are conspicuous in Josiah's
renewal of the covenant (23.2, the reading is
right). The writings of Amos, Hosea, Isaiah,
Ezra, Malachi, Jeremia, and Ezekiel are all
properly understood, and their influence only suffi-
ciently accounted for, in the historic atmos-
phere of Kings. One mind bespeaks one spirit,
"the spirit of Jehovah," by whom they all
profess to have been moved. It is a situation
unique in history. We cannot even strike out the name "Josiah" from 1K.15.2 without attributing to the writer of 2K.23.16,17 a spirit of deliberate lying seen from the evidence of the Book of Kings is a great book, often characterized by an inimitable literary pathos and power. It tells the story of a splendid fight of the faithful few, in which the prophets were worthy leaders.—Literature. Benzinger in Marti (1899), distinguished by a thorough-going scepticism and an arrogance in criticism, but useful; Keil in Keil and Delitzsch (on the whole a masterly commentary); Rawlinson in The Speaker's Commentary, still valuable; Farrar in The Expositor's Bible; Barnes in The Cambridge Bible; Tholuck, old but useful; Klostermann in Strack-Zöllner, preposterous in text alteration, but suggestive. For text: Burrow's Notes and Kittel's Hebrew Bible, with critical apparatus. For parallel texts: Girdlestone's Deuterographs (Clarendon Press), and Wood's Hebrew Monarchy (Eyre & Spottiswoode). For archaeology: The Records of the Past (Bagster); the works of Sayce, Pinches, Hommel, and of others in recent publications of the Palestine Exploration Fund, including Harper's Bible and Modern Discoveries. Winckler in Schrader's Keilinschriften (Berlin, 1905) might be supposed to give an expert's résumé; but his extreme scepticism succeeds in so involving a clear subject, as to detract from its value. In preparing a Life Test, the Alte Test, ou Bible das alten Orient, 1900 is better, but still quite unreasonably. A very useful, short summary (1892) is Nicol's Explorations. [f.e.s.]

KIR is mentioned by Amos (9.7) as the land from which the Syrians (Arameans) were "brought up"—i.e. where they had dwelt before migrating to the region N. of Palestine. It was also the land to which the captive Syrians of Damascus were removed by Tiglath-pileser (2K.16.9; cf. Am.1.5). Isaiah joins it with Elam (22.6). The LXX. (Vat. MS.) does not give it as a proper name in any passage. The position of Kir is unknown. [c.r.c.]

Kir is a chief stronghold of Moab, the other being Ar of Moab. This name occurs only in Is.15.1. [KIR-HARESET, etc.] A clue to its identification is perhaps given by the Targum on Isaiah, which for the above names has Kerakka or Kerak, the great castle s.e. of the Dead Sea, not far from the W. edge of the plateau. It lies about 6 miles S. of the modern Kaba. It is built upon the top of a steep hill, surrounded by deep and narrow valleys, completely inclosed by mountains rising higher than the town. The elevation of the town is 3,323 feet above sea-level.

Kir-haram seth (2K.3.25), Kir-hareset (Is.16.7), Kir-hares (1K.18.14), Kir-hares (1K.20.25), apparently all slight variations of the same name and probably all applied to Kir of Moab. [c.r.c.]

Kipah ("town"; Arab. Quriah), rendered "city" by A.V. The word occurs in 35 passages of O.T. and refers to Heshbon (Num.21.28) and Zion (Is.33.20), instead of the usual word "city", found in hundreds of passages. [c.r.c.]

Kiriath ("towns").—1. (1Chr.6.76) A town of Naphtali given to the Levites, otherwise Karta (Jos.21.32). The site is unknown. It is perhaps the Kerettenau of the list of Thothmes III. (No. 11).—2. [KIRJATH-JEARIAM]

Kiriatha'im. [KIRJATH-JEARIAM]

Kiriath (R.V. Keriath, as in Je.48.24,41), "the high buildings" of which are to be burned (Am.2.2). The Heb. has the def. article, and the LXX. reads "the foundations of its cities." If a city of Moab is intended, it is probably Kiriathaim, which may be KIRJATHAIM, now the ruin Qureidyah. [c.r.c.]

Kiriath (Jos.18.28), a town of Benjamin, noticed with Gibeath. It is apparently the present village el Quriah (otherwise called Quriet el 'Anab, "town of grapes"), 7 miles W. of Jerusalem, and close to Jeboa. It is not Kirjath-jearim, which is mentioned in the same chapter (18.4).

Kiriath-im, or Kirlathim (Je.48.24,23; Ezk.25.9), probably Shaveh KIRKATHAIM (Gen.14.5), otherwise Kirjathaim (R.V. KIRJATHAIM), in A.V., Num.32.37; Jos.13.19. A town in Moab, apparently S. of Heshbon, and Kiriathaim, was destroyed by Edomites, and in it was a Christian village called Kariatha (Onomasticon), 10 miles from Medeba, apparently the present ruin Qureidyah, about 10 miles S. of Midda. It is probably not the same as KIRIOTH (R.V. Keriath), in A.V. Am.2.2, or Keriath, in A.V. Je.48.24,41. On the Moabite Stone, in 9th cent. B.C., king Mesha records his building (or fortifying) of Qariath, which was evidently the same town—a place of importance in Moab. [c.r.c.]

Kiriath-arba, an early name of Hebron, named from Arba, one of the Anakim (Jos.14.15; Judg.1.10). See also Gen.23.2,35; 27.1 Jos.15.24,20,7,21,41.

Kiriath-arim, an abbreviated form (Ezr. 2.25 only) of KIRJATH-JEARIAM.

Kiriath-baal, an alternative name of KIRJATH-JEARIAM (Jos.15.60,18.14) = Baalah, Baale-of-Judah. [BAAL, geogr.]

Kiriath-huzoth, a place to which Balaam journeyed from Pethor and returned immediately after his arrival in Moab (Num.22.39). It appears to have lain between the Arnon and Bamoth-baal (cf. rv. 36 and 41). The LXX. understands merely "a town of dwellings." Perhaps better "a town of the borders." [c.r.c.]

Kiriath-jearim (town of woods), otherwise KIRJATH-JEARIAM (Ezr.2.25), Kiriathirius (Esd.5.19), Baalah (Jos.15.9), Kiriath-baal (Jos.15.60), or Baale of Judah (2Sam.6.2; 1Chr.13.6,6: 2Chr.1.4). A place on the N. border of Judah (Jos.15.60,10), which was one of the Hivite cities (9.17), probably remained to avoid the old name connected with Baal. Its position, with the Mahaneh-Dan— or open plain near Beth-shemesh—to the W. (A.V. BEHIND. Judg.18.12), agrees with that of the ruined town 'Erma, on the hill S. of the valley of Sorek, 12 miles W. of Jerusalem (Juda., as first suggested by Rev. A. Henderson, Kiriath-jearim was higher up than Beth-shemesh (1Sam.14.41) and the view from 'Erma to W. includes the plain near Beth-shemesh (4 miles off), visible through the gorge. Here the ark, recovered from the Philistines, remained for 20 years during the rule of Samuel (1Sam.7.2); and, though ac-
KIRJATH-SANNAH

compounding Saul in his wars (according to the usual text of 1Sam.14.18), it was apparently brought back, and was there found by David, after Saul's death (2Sam.6.2), in the Gibeah, or "hill." (See 1Chr.2:50,52,53,18,56; No.7.29; Je.28.20.) The site was wrongly placed, in 4th cent. A.D., at Kirjath of Benjamin (Onomasticon). The ruins are those of an ancient town, with rock-cut wine-presses, and a scarped platform for a tower (Suret. W. Pal. III. pp. 43-52). In one of the Amarna letters, the king of Jerusalem speaks of Beth-baalah.

KITE

VIEW WEST FROM KIRJATH-JEARIM. [Showing the Mahaneh Dan.]

(From an original sketch by Col. Conder.)

as a town revolting from him in 15th cent. B.C. (Berlin 106). This may represent the submission of Kirjath-jearim, with the other Hivite towns, to the Hebrews. [c.r.c.]

Kirjath-sannah (Jos.15.49), a name for Debir. Probably "town of the height"; Debir (the back) being now edh Dhibriyeh (the place of the back, or ridge). [c.r.c.]

Kirjath-sepher, the early name of the city Debir, in Jos.15.15,16; Judg.1.11,12. The LXX. understands "town of letters." Possibly "town of the road," being on the main Hebron-Beersheba road. [c.r.c.]

Kish. — 1. The father of Saul; a Benjamite of the family of Matri, according to 1Sam.10.21, though descended from Becher according to 1Chr.7.8, compared with 1Sam.9.1. [NER.] — 2. Son of Jehiel, and uncle to the preceding (1Chr.23.24, 22, 24, 25, 29), apparently about the time of Saul, or early in the reign of David.

Kishi, a Merarite, and father or ancestor of Ethan the minstrel (1Chr.6.41).

Kishon, a town on the boundary of Issachar (Jos.19.20), allotted to the Gershonite Levites (21.28, R.V., but A.V. Kishon). In treacherous boggy stream. When Junot and the French defeated the Turks (in 1799) near Tabor, many of the latter perished in its swamps. The source is W. of Tabor; and Sisera's army, defeated at Kishon, perished near En-dor (Ps.83.9). Thence it winds W. under the hills of Zebulun, to the pass near Jokneam, under mount Carmel (1K.18.40), and runs N.W. by Harosheth, to the sea in the bay of Acco. The lower course is fringed with date palms. The river, even in winter, does not reach the shore when the wind is in the W., but is only fordable at the bar when it is in the E. It receives a considerable affluent from S. near Jokneam, which is fed from springs on the slopes W. of the plain of Esdraelon, the whole of which is drained by the Kishon. The soldiers of Sisera, in their retreat to Harosheth, perished apparently in the swamps (Judg.5.21), while he fled alone some 30 miles N.E. (Zaanaim); chariots, however, were easily driven in the plain between Harosheth and Tabor. [Merom.] [c.r.c.]

Kison (Ps.83.9 only); R.V. Kishon.

Kiss. [Salutation; Idolatry.]

Kite. The Heb. word (la'aw) thus rendered occurs in Lev.11.14, Deut.14.13, and Job 28.7; in the two former it is translated "kite" in the A.V., in the latter "vulture" (q.v.). The
word occurs among the 20 names of birds mentioned in Deut. 14 (belonging for the most part to the diurnal birds of prey, or Accipitres), considered unclean by the Mosaic Law, and forbidden as food to the Israelites. The allusion in Job alone affords a clue to the probable identification of the bird. The mines in the mountains are there described as "a track which the bird of prey hath not known, nor hath the eye of the vulture ['āyyā] looked upon it." Among all birds of prey, the kite is said to be distinguished by peculiar keenness of vision. Robertson derives 'āyyā from an obsolet root, connected with an Arab word, the primary meaning of which is "to turn." If this derivation be correct, the evidence in favour of kite as the proper translation is strengthened. Possibly 'āyyāh may signify the black kite (Milvus ater), and 'āyyā the true or red kite (M. regalis); but this is little, if at all, more than a conjecture. [Vulture.][K.R.]

Kithlish, one of the towns of Judah, in the Shephelah or lowland (Jos. 15.10).

Knitron, a town from which Zebulun did not expelled the Canaanites (Judg. 1.30), identified by some (Tal. Bab. Megillah 6, a) with "Cipport" (Sepphoris), now Seffuriah. [C.R.C.]

Kiltim (Gen. 10.1; 1 Chr. 1.7) — Chittim. Kneading-troughs. [Bread.]

Knife. The knives of the Egyptians, and of other nations in early times, were of hard stone. Iron knives have been found of a very early date at Tell Loh in Chaldea, but the flint or stone knife was retained for sacred purposes after the introduction of iron and steel (see Jos. 5.2). Herodotus (ii. 86) mentions knives both of iron and of stone in different stages of the same process of embalming. In their meals the Jews, like other Orientals, did not eat with knives, but required them for slaughtering animals either for food or sacrifice, and for cutting up the carcass (Lev. 7.15; 13.11; 15.19; 18.29.1.5; 25.9.11; Num. 18.18; 1 Sam. 9.23, etc.). Smaller knives were in use for paring fruit (Josephus, 1 Wars, xxxvii. 2) and for sharpening pens (Lev. 26.2). The lancets of the priests of Baal were doubtless pointed knives (1 K. 18.28). [Hooks; Razor.]

Kocht, a town from which Zebulun did not expelled the Canaanites (Judg. 1.30), identified by some (Tal. Bab. Megillah 6, a) with "Cipport" (Sepphoris), now Seffuriah. [C.R.C.]

Kohath, second of the three sons of Levi (Gen. 46:11; Ex. 6:16; Num. 3:17; 1 Chr. 6:11). He was the father of Amram, Izhar, Hebron, and Uzziel (Ex. 6:18-22; Num. 3:19; 1 Chr. 6:2, 18, 23, 12); his sister was Jochebed (Ex. 6:20; Num. 25:29) the wife of Amram and mother of Aaron and Moses. He lived 133 years (Ex. 6:18). The number of Kohathites between the ages of 30 and 50, at the time of the first census in the wilderness, was 2,750, and the whole number of males of the family from a month old was 8,600 (Num. 4:31-36; 3:27, 28). Their position in the camp was S. of the tabernacle (Num. 3:26). During the wanderings they had charge of the sanctuary and its furniture, after it had been prepared for travel by the priests, the sons of Aaron (3:11, 4:1-15, 7:9, 10, 21). It will thus be seen that the Kohathites, the family of Aaron, took precedence of the descendants of Gershon, the elder brother. The wealth and prominence of the Kohathites, and the important offices filled by them as musicians (see

[Diagram of Egyptian flint knives in museum at Berlin, and Egyptian knife represented in hieroglyphics.]
KOLAIAH

Heman), as keepers of the dedicated treasures, as judges, officers, and rulers, both secular and sacred, appear in such passages as 1 Chr. 6:31-47, 25:12-20, 25:1-7, 26:23-32; 2 Chr. 20:19, 29:12, 14.

Kolah‘—1. A Benjamite, ancestor of Sallu (Ne. 11:17).—2. The father of Ahab the false prophet (Je. 29:21).

Korah.—1. One of the “dukes” of Edom; third son of Esau by Aholibamah (Gen. 36:5,18; 1 Chr. 1:35), born in Canaan before Esau migrated against Seoraphatha, the Edomite duc, sprung from Eliphaz, Esau’s son by Adah (Gen. 36:16).—3. One of the “sons of Heron” in 1 Chr. 2:43.—4. The leader, in conjunction with Dathan and Abiram, of the rebellion against Moses and Aaron related in Num. 16:17. Korah was the cousin of Aaron, as shown in the following table.

Dr. Driver and others believe that in the story of the rebellion of Korah, Dathan, and Abiram three narratives are combined. (1) The first is concerned alone with the rebellion of Iayven, headed by the Reubenites Dathan and Abiram, against the civil authority of Moses. The narrative is attributed to J. E. and found in Num. 16:1-12, 15-25, 26, 27-34. (2) The second relates to the protest of Korah, at the head of 250 princes (not all of the tribe of Levi), against ecclesiastical authority being limited to the tribe of Levi. It is assigned to P, and found in 16:14-29, 18-24, 27a, 32b, 35:4-19, 39:17. (3) The third represents the rebellion of Korah in a somewhat different aspect, and is attributed to a writer of the priestly school (P∗). In his view, Korah, at the head of 250 Levites, opposes, in the interests of the tribe of Levi, the exclusive right to the priesthood claimed by the sons of Aaron (16:9-11, 16:17, 30-40). A study of this statement is instructive, as showing the division and subdivision of verses necessary for the ascription to separate “sources” upon which the theory depends. [PENTATEUCH.] Whether this be accepted or no, it may well be that the rebellion of Korah, though possibly coincident in time and place with that of Dathan and Abiram, differed from it in respect of its motive, its sin, and its punishment. The motive in each case is evident from the above: the sin in one instance is schism, in the other treason; Korah and his company sought heavenly power [cf. the association of his name with the Levites in Num. 16:10], and were consumed by fire from heaven; Dathan and Abiram, earthly power, and were swallowed up by the earth. [KORAHITES] [H.C.B.]

Korahites, Korhites, or Korathites. Korah was the great-grandson of Levi, and a member of the Kohathite branch of the tribe. He was the brother of Amram, and first cousin to Moses, Aaron, and Miriam. He was, consequently, very closely connected with the priestly race, and it was only to be expected that he should be the representative of his tribe when the claims of Aaron and his sons were disputed (Num. 16). Though in the account of the rebellion itself it implied that all the family of Korah perished, it is specially asserted in 26:11 that “the sons of Korah died not.” In the Psalter the sons of Korah were evidently considered among the leaders of the musical services of the temple with the sons of Asaph (Ne. 7:44), who, however, are here called Levites, as they are in Chronicles. No less than 11 (if we reckon Ps. 42 and 43 as distinct) psalms are inscribed “to the sons of Korah” — viz. 42:49 and 84:85,87,88. [PSALMS, TITLES OF.] The Korahites are mentioned (1 Chr. 26:4) as the door-keepers of the temple, and as the leading Levites in the reign of Jehoshaphat (2 Chr. 20:19). In 1 Chr. 12:6 the Korhites were among the warriors who helped David when he was at Ziklag; and in 2 Chr. 42,43 a Korah is mentioned among the sons of Caleb, the brother of Jerahmeel, his father being Hebron. [F.J.-F.-J.]

Kore‘.—1. A Korahite whose descendants were chief gate-keepers of the tabernacle in the reign of David (1 Chr. 9:19, 26:1).—2. Son of Innah, a Levite in charge of the oblations in the reign of Hezekiah (2 Chr. 31:4).—3. In 1 Chr. 26:19, “sons of Kore” should be, as in R.V., “sons of the Korahites.”

Koz (Ex. 2:26; Ne. 5:4, 21, 7, 63) = Acooz; 1 Esd. 5:38, marg. Icir = Hkkoz.

Kushai‘ah (1 Chr. 15:17) = Kish.

LABAN

L

Laada‘h, son of Shelah, son of Judah, and “father” or founder of Mareshe (1 Chr. 4:21).

Laada‘n.—1. An Ephraimite, ancestor of Joshua, son of Nun (1 Chr. 7:26).—2. A Gershonite Levite in the time of David (23:7-9, 26:21), or, if the name is that of the family, perhaps is Linni, as seems to be suggested by the first occurrence of the thrice-repeated name in 26:21.

Laban’, son of Bethuel (Gen. 28:5), grandson of Nahor, Abraham’s brother (22:29, 24:24), brother of Rebekah (24:29, 25:20), and father of Leah and Rachel. The elder branch of the family remained at Haran, the city of Nahor (24:10; cf. 29:4), when Abraham removed to the land of Canaan; and there we first meet with Laban, as taking the leading part in the betrothal of Rebekah to her cousin Isaac (24:10, 29-60; cf. 27:43, 29:4). Laban next appears as the host of his nephew Jacob at Haran (29:1, 3, 14). There followed the transactions by which he secured the services of his nephew for forty years, in return for his two daughters, and for six years at the price of his cattle (31:41), together with the artifice by which he palmed off his elder daughter on Jacob (Gen. 29:31-30). Laban was absent, shearing his sheep, when Jacob started (with his wives, children, and all his possessions) for his native land; and we hear of nothing more of him till the third day that Laban heard of their departure. In hot haste he set off in pursuit. Jacob and his family had
crossed the Euphrates, and were already some days' march in advance; but so large a caravan would travel but slowly (cf. Gen.33.13), and Laban and his kinsmen came up with them on the E. side of Jordan, among the mountains of Gilead. After mutual recrimination, and an unsatisfactory truce, the当事人, which neither had written, a covenant of peace was entered into and a cairn raised about a pillar-stone set up by Jacob, both as a memorial of the covenant, and a boundary which the contracting parties pledged themselves not to pass with hostile intentions. After this, "Laban rose up and kissed all his sons and his daughters, and blessed them, and departed, and returned to his place"; and we hear no more of him.

Laban, one of the landmarks named in Deut.1.11. The mention of Hazeroth points to Libnah (Num.33.20). These names suggest a white chalk region. [C.R.C.]

Labana (the Laban of 1 Sam.5.9) = LEBANON.

Lacedemonians, the inhabitants of Sparta = Laedaeomen, with whom the Jews claimed kindred (1 Mac.12.2, etc., 14.20, 23; 15.23; 2 Mac.5.9).

Lachish (difficult), a royal Amorite city in S.W. lowlands of Judah (Jos.10.3, 5; 23.37, 12.11, 15.59), which resisted Joshua's attack for two days, and was evidently a strong site. It was fortified by Rehoboam (2 Chron.11.9), and Amaziah of Judah fled to it for refuge, but was there murdered (2 Kings 14.19; 2 Chron.25.27). In 702 B.C. it was besieged, and submitted to Shalmaneser (2 Kings 18.14, 17; 18.5; 15.6, 17, 38), who made Micah appears to foretell (Mic.1.13). It lay out 60 m. N.E., as a city of Judah, by Nebuchadnezzar (J.34.7), and was reinhabited by men of Judah after the Captivity (Ne.11.30). In 4th cent. A.D. Eusebius (Onomasticon) speaks of it as a village, 7 miles S. of Eleutheropolis (or Beit Jibrin); and the present writer was so led to suggest the identity with Tell el Hesy, a strong site with springs 10 miles S. of Beit Jibrin, which suggestion was verified by the discovery, twelve years later by Mr. Bliss, of a cuneiform tablet referring to Zimrida, the governor of Lachish, about 1450 B.C., which was unearthed in the lower part of excavated city of Tell el Hesy. The name Tell el Hesy was known by its present name in the 12th cent. (Bela-ed-Din), and is the most important ruin in the district. The Amarna tablets include two from Lachish, one from a certain Yahhihu, the other from Zimrida (Berlin, 123, 123), both promising obedience to the Pharaoh. The cuneiform tablet found in the ruins refers to Zimrida as the nominee of Egypt, but as opposed by the people (of Lachish); and this agrees with another Amarna letter, in which the king of Jerusalem mentions a revolt against Zimrida of Lachish (Berlin, No. 103). The siege of Lachish by Shalmaneser is attested by an Assyrian bas-relief from Nineveh (see Frontispiece), the inscription stating that it represents "Shalmaneser...on his throne before the city of Laksis," receiving the submission of the inhabitants. The city is shown as near mountains, and surrounded with palms and vineyards—which suits the situation at Tell el Hesy, near the foot of the hills W. of Hebron, the mound being 340 ft. above sea-level. Lachish is shown as an oval city, with 24 battlemented towers, and a central street; some of the houses are of stone, some are mud huts; cattle and horses have been driven within the walls, and priests (probably Assyrian) are worshipping a sacred cone at an altar, by which stands an unhorsed chariot bearing ensigns, inside the town. The excavation of the citadel of Lachish, commenced by Prof. Flinders Petrie in 1896, was mainly conducted by Mr. F. J. Bliss in 1891-1893 (see his Mound of Many Cities, 1894). The results were of high importance, and Lachish was the first city (except Jerusalem), excavated in Palestine. The oldest town was found to lie 65 ft. below the present top of the Tell, or about 60 ft. above the surrounding valleys, which contain water from springs (Surv. W. Pal. iii. pp. 261, 291). The whole site perhaps covered 100 acres, but only a few acres on N.E. were uncovered, representing the citadel. Even the oldest city had a wall with towers; and successive layers of at least eight towns were traced, with an accumulation of rubbish at the average rate of 2 ft. per century. The first city was probably as old as about 2000 B.C., or the age approximately of Abraham. In this the pottery (ressembling equally ancient pottery in Cappadocia) was marked by emblems of the Assyrian syllabary [Warling], used by Hittites and others from Cappadocia to Egypt. The bronze axe, spear heads, and adzes here found, proved, when analysed, to have only about 5 per cent. of tin with 95 of copper—an indication of the quality of the ore. Above this town other buildings of about 1600 to 1400 B.C. were found; and, with the Zimrida tablet, there were scarabs of the 18th Egyptian dynasty (including one of queen Thui), and another possibly with Hittite emblems. The painted pottery resembled that of Asia Minor and of the Aegean shores, dating from about the same age. These remains were from 30 to 40 ft. below the surface, and the city appears to have remained for several centuries at least standing on a bed of ashes from the burning of the older town. In the upper strata of the Amorite town were found a pilaster like those representing bulls, and scarabs of about 1200 B.C. a bronze idol with a gold collar; and a female figure in pottery (5 in. high), like those found in Hittite and Babylonian ruins; with cylinders—probably Canaanite—also similar to Babylonian and Phoenician seal-cylinders in design and execution. A yet later city, at a depth of about 20 ft. from the surface, contained remains of Heb. times, the proportion of tin to copper, in the bronze objects, being here nearly 20 per cent. A fragment, from a vase had an early 11th b.c. text ("TEN"), supposed by Renan to mean "for drink," or "libation." In this city also a Gk. text (probably reading Approie), and a Gk. winged figure, on a fragment of black ware, supposed to be as early as 400 B.C., were discovered. Iron was now in common use, but flint instruments still continued to be made. This city also was burnt; and, though remains of rough buildings extend nearly to the surface, the mound near the foot of the tell Lachish seems to have gradually sunk, to become a mere village in the 4th cent. A.D., and
was finally abandoned, the Tell being now covered with corn. Though the city is not often mentioned in O.T., it was evidently an important place; and the succession of the Amorites, Egyptians, and Canaanites, with the populations being the same as found at Gath, Gezer, Taanach, and in other excavated sites, the Canaanite idols occurring in the lower strata only, before the time of the reforming kings of Judah—Hezekiah and Josiah. [C.R.C.]

Lac'v'us, one of the sons of Addi, who had married a forewoman (1Chr.19.15). He was among the Canaanites that were not cast out by their descendants. [C.R.C.]

La'dan (1Esd.5.37) = DELAYAH, 2. 

Ladder of Tyrus, The, the N. extremity of the district over which Simon the Hasmonean was made captain by Antiochus Theos (1Mac.11.59; R.V. Tyre). The pass between Archo and Tyre with a road cut in the cliff, now called Ras el Khawr, is 12 miles N. of 'Akra. [PHEINE.]

Laelf, father of ELIASAPH, 2 (Num.3.24).

La'had, son of Jahath, a descendant of Judah (1Chr.4.2).

La'han-Or the well (A.V. Gen.24.62, 25: 19; BEEK-LAHAI-ROL.)

Laham'm, a town in the lowland district of Judah (Jos.15.10), mentioned with LACHISH. Probably the ruined village of Alim, 10 miles E. of Tell el Hesy, or Lachish. [C.R.C.]

Lah'mi, the brother of Goliath the Gittite, slain by ELIHANAN the son of Jair, according to 1Chr.20.5. (cf. 2Sam.21.29). Lahmi proves to be the middle part of the word Beth-lehem-ite. [R.B.G.]

La'ish, a native of Gallim; and father of Phalti (1Sam.25.14; 2Sam.3.15).

La'ish (or Leshein, Jos.19.47), the city which was taken by the Danites, and under its new name of DAN became famous as the northern limit of the nation, and as the depository first of the grave image of Micah (Judg.18.7,14,27,29), and subsequently of one of the calves of Jeroboam. Now Tell el Qadi, about 2 miles W. of Banias. It is probably called Luit in the list of Thothmes III. (No.41) in 16th cent. B.C. In Is.10.30 the LXX. rendering —the daughter of Bashan—is heard in Laish. “The Heb. probably means ‘listen as far as Laish to the miseries of Anathoth.” [C.R.C.]

Lak'um. (R.V. Lakkum), one of the places on the boundary of Naphtali (Jos.19.33), near Jabneel (Yemma) and the Jordan. The site is unknown.

Lamb. (1) immnr is the Aram. equivalent of the Heb. kebhes. See below, No. 3 (Ezk. 6.9, 17, 7.17). (2) ἴτλε (1Sam.7:1; Is.65.25), a young sucking lamb; originally the young of any animal. (3) kebhes, kesbeh, and the feminine kibhsa, or kibhsa, and kibsh, respectively denote a male and female lamb from the first to the third year. The former perhaps more nearly coincides with the provincial term hog, or hogget—i.e. a young ram before he is shorn. Young rams of this age formed an important part of almost every sacrifice. (4) kār, a fat ram, or more probably “wether,” as the word is generally used. “a ewe, who, without the strict designation of a ‘ram’ ” (Deut.32.14; 2K.3.4; Is.34.6). The Tyrians obtained their supply from Arabia and Kedar (Ezk.27.21) and the pastures of Bashan were famous grazing-grounds (39.18). (5) σε, rendered “lamb” in Ex.12.21, is properly a collective term denoting the flock of small cattle, sheep, and goats, as distinct from the shepherds and the image (Ezk.34.15), while (6) se denotes the individuals of a flock, whether sheep or goats (Gen.22.7,8; Ex.12.3,22.1, etc.). [SHEEP.] For Paschal Lamb, see PASSOVER.

Lamb of God, a significant title applied by St. John Baptist to our Lord in Jn.1.29,36. Abramah has shown that the Hebrew term that God Himself provided the lamb for sacrifice (Gen.22.8). A lamb was both the daily burnt-offering in tabernacle and temple and the annual commemorative sacrifice of Israel’s deliverance in the Passover. Isaiah describes the suffering servant of “the Lord” and his atonement for Israel twice before the deliverance (Cf. Is.53:4,5). Isaiah 53:5 describes the suffering servant of Israel’s deliverance in the Passover. Isaiah describes the suffering servant of “the Lord” and his atonement for Israel twice before the deliverance (Cf. Is.53:4,5). Thus the title implied the Passion of Christ, its patience, its vicarious character, and the age-long purpose of redemption which lay behind it. See also Rev.5.6. Westcott, Gospel acc. to St. John. (1881). [A.R.W.]

La'me'ch. —1. The fifth lineal descendant from Cain (Gen.5.18-24). He married Adah and Zillah, and was the father of JABAL, JUBAL, and TUBAL-CAIN. The remarkable utterance ascribed to Lamech, and preserved in poetical form in vv. 23,24, may be rendered:

Adah and Zillah! hear my voice, Ye wives of Lamech I give ear unto my speech; For I have slain a man to avenge me, And a young man for bruising me.

If Cain shall be avenged sevenfold, Truly Lamech seventy and sevenfold.

Jerome relates as a tradition of his predecessors and of the Jews that Cain was accidentally slain by Lamech in the 7th generation from Adam. Luther considered the occasion of the poem to be the deliberate murder of Cain by Lamech. Most modern scholars regard it as Lamech’s song of exultation on the invention of the name of Tubal-cain, which would enable him to defend himself and his family against all enemies, and render him independent of God’s protection.—2. The father of NOAH (5.28,29).

Lamentations of Jeremiah. The Heb. title is from the first word, “How,” or “Alas how,” LXX. “Lamentations.” Tradition assigns them to Jeremiah. Budde would divide the book between two or three unknown authors, one c. 300 B.C. But his facts are weak. 2Ch.35.25 probably alludes to a lost poem: “And Jeremiah composed a lamentation over Josiah: and all the men singers and women singers recited it in their lamentations to this day; and they appointed them for a custom in Israel: and beheld them written amongst the lamentations.” All that can be wrested from this is that Jeremiah wrote a “Kinah” (qinah), that it was in current public use, and was found among the others. Chronicles gives us literary notices, certainly not invented, of one genealogical, and many biographical and historical works by prophets which survived the Captivity, but have not come down to us. “This elegy is only attributed prophecy and elegy. We shall not go far wrong, if we attribute to Lamentations reminiscences of this youthful work—Jeremiah’s
first great sorrow. That "the national guilt is not emphasized, and the priests and prophets are spoken of with grief" (not altogether true; see, e.g., 2:14, 4:13, 5:16) arises from the weight of the event and the poet's feeling that the principle of the Kinah is "de mortuus nil nisi bonum" is nobly shown in David's, in which nothing ill is said of Saul. That Jeremiah, being in prison, saw nothing of the sack of the city, is an absurd objection. A poet's imagination is not so restrained. We might almost as easily argue that Jeremiah could not have written of Waterloo. That Jeremiah's later life was too troubled to give opportunity for poetry is not reasonable. History posits many a quiet day on the slopes of Mizpah, when poetry may have been his solace. Changes of style and manner, nuances of varying sentiment, are simply the characteristics of genuine poetry. A similar scepticism with regard to literary traditions would find many authors divergent in wording and opinion—e.g. Tennyson's "In Memoriam." Tradition (which, though not an absolute proof, is always of the first importance) is unanimous (Baba Bathra 14b, Pesahim 96b, 251b. I.e. Exp. and Davidsohn, which, are specially valuable, Itala, Vulgate). Even Wildenboer finds in the book itself traces consonant with the old tradition (Literatur, p. 298). Though the Heb. text makes no ascription of authorship, Jeremiah's has been held by the older critics, including De Wette (strongly § 274), Bickell, and some of the Smiths and Davidsbys (very strongly, Hi. 135); by Strack, Orelli, Cornill and other more modern writers many points of contact with Jeremiah are given. Lamentations stands next to Jeremiah in LXX.; the book of Baruch alone intervening.—Contents. In 1,2 the sorrows of Jerusalem are portrayed with exquisite feeling and beauty; in 3 the sorrows of the poet, with Jeremiah's special characteristic, probably derived from Job, e.g. a vivid picturing of Jehovah as his personal enemy and yet an absolute trust. There are poetic traces of Jeremiah's known experience—e.g. vs. 53-59. Characteristic of the prayer of quite unapproachable pathos. The first four chapters are alphabetical, like some of the Psalms. All are very close, as Strack well observes, to the troubles of Jerusalem's destruction; and delineate Jeremiah's own later experience—e.g. 5.5-9. The metre or form is that peculiar to the Kinah. It is fairly constant. The parallelism consists in a longer first half of the verse and a shorter second. The first seems to die away in the second with plaintive cadence (Driver). It well conveys the spirit of the elegy, like the metre of "In Memoriam." Commentaries. Payne Smith; Plumptre; Budde in Marti; Ewald; Oettl in Strack-Zieckler; Thenius; Keil. K. Budde in Das Hebräische Klugbild (1882) pointed out the metre; called by Ley (before him; see Grundzüge, p. 52) "elegiac pentameter," and towards which De Wette and Keil had been feeling their way. The metre is well shown in Driver's Bible[iv].

Lamp, the rendering of two Heb. words, ἱάππηλα and κήρ. The former only twice in K.-V. is 621; Dan. 10.6; in five passages lamp in A.V. and torch in R.-V.—Gen. 15.17; Judg. 7.16, 20; Job 41.10[11]; Ezek. 1.13. Both versions have torch in Na.2.4[4]; Zech. 12.6; lightnings, Ex.20.18; firebrands. Judg.15.45. κήρ is rendered lamp, candle, light in A.V., but usually light, lamp or spout in R.-V. and Zeph.1.12 (candles). (i) The movable oil-vessels, probably having an aperture or spout for the wick, placed on each branch of the golden lamp-stands (Candlestick) in the tabernacle and temple (Ex.25.37-39). Made of gold in Solomon's temple (1 K.7.49). Lamps were lighted in the evening and trimmed in the morning (Ex.30.7, 8). Jewish tradition says that the one on the central shaft, called the western lamp, was always alight (Lev.24.2); hence the custom of having a "perpetual light" in the synagogue. Cf. Josephus, Cont. Ap. P. 1.22. According to Josephus (3.4, viii. 3), three lamps were always burning; the others only by night. In the shrine at Shiloh was a lamp, which apparently burned at night only. iSam.3.3. No lamp-stand is mentioned. Pure olive oil was to be used (Ex.27.20). (ii) A reed-shaped earthenware vessel, with a receptacle at the top, in which were burned rags or Rese, which were burnt out and thrown away. Most commonly used a kind of torch which may illustrate Judg. 7.16, 19. "It burns without a flame, except when waved through the air, which causes it at once to burst into a blaze. Its burning end is covered with a small earthen jar or 'pitcher,' and it thus answers the purpose of a lantern. (iii) The lamp-stands are made of gold, one of them 150 cubits high, p. 480. (iv) Figuratively, of prosperity (2Sam. 21.17; 1K.11.36; Job 18.6; Ps. 24.20, etc.). Symbolically, of the Spirit (Zech. 4.1; Rev. 4.5). [h.h.]

Lancet. [Arms.]

Landmarks. [Law in O.T.; Field.]

Language. [Tongues, Confusion of; Hellenistic Greek; Semitic Languages.]

Lantern (Jn.18.3 only). According to Jewish authorities, the φανός was a perforated earthen vessel, in which the κήρ (lamp) was placed (Mishna, Kedîm II. 4, and Barthenia's comm.). [Lamp.]

LAODICEA. a town of some consequence in the Roman province of Syria. It is situated on the river Lycus, with Colossae and Hierapolis a few miles to the W. Rebuilt by one of the Seleucid monarchs, and named in honour of his wife, Laodicea became under the Roman Government a place of some importance. Its trade was considerable; it lay on the line of a great road; and it was the seat of a conventus. From Rev.3.17 we should gather it was a place of great wealth. It was soon after its rebuilding that Christianity was introduced into Laodicea, not however, as it would seem, through the direct agency of St. Paul. We have good reason for believing that when, in writing from Rome to the Christians of Colossae, he sent a greeting to those of Laodicea, he had not personally visited either place. But the preaching of the Gospel at Ephesus (Ac.18.19-19.41) must inevitably have resulted in the formation of churches in the neighbouring cities, especially where there were Jews (cf. 3.1-5) and there was Laodicea. In subsequent times it became a Christian city of eminence, the see of a bishop, and a meeting-place of councils. The Mohammedan invaders destroyed it, and it is
now a scene of utter desolation; but the extensive ruins near Denizli justify all that we read of Laodicea in Gk. and Lat. writers.

Laodicea, Epistle to. St. Paul’s direction to the Colossians (4.16) to read also τῆς ἐκ Λαοδικίας has had two results: (1) A desire to find this letter, either by postulating one which has disappeared, or by identifying it with one of St. Paul’s surviving letters. The former is unnecessary, if the latter affords a reasonable solution. Among the epistles suggested are Hebrews, which is now generally recognized as being distinctly non-Pauline in matter, and is, in fact, anonymous; Philemon, which is a personal letter to a single individual; and Ephesians. The reasons pointing to the probability of Ephesians are (a) the absence of ἔν Ἐφέσῳ (1.1) from the best MSS. (N. B. etc.), and from Origens text (cf. Armitage Robinson, Ephes. p. 293); (b) the fact, reported by Tertullian (adv. Marc. v. 17), that Marcion knew Ephesians as ad Laodi- censes; (c) the absence of greetings and personal allusions, implying a single destination or local needs. Possibly a gap was left after τοῖς ἄγοντοι τοῖς οἴνοις (1.1), for the insertion of each destination by Tychicus, who carried the letter, and whose name is the only personal touch in it, except St. Paul’s. (2) An early effort to supply the presumed letter referred to in Col. 4.16 by invention ad hoc. Hence the so-called Epistola ad Laodi- censes. “The oldest copy known is of about the year 354, in the Vulg. MS., written for Victor the bishop of Capua, and now for centuries at Fulda in Germany.” (C. R. Gregory, Canon and Text of N.T., 1907, p. 254; cf. Lightfoot, Colossians, ed. 5, pp. 282-286; Westcott, Canon of N.T., ed. 5, pp. 580-584). There is a mention of it in the Muratorian Canon (c. 175 A.D.); Jerome knew of it, and denounced it (ab omnibus exploditur); Gregory the Great seems to have accepted it as a 15th extra-canonical epistle of St. Paul; and it “bade a host of the doors of the sacred Canon” till the Reformation. It consists of twenty verses, a “miserable cento” of Pauline phrases. Lightfoot, who believed that it had a Gk. original, suggested the form in which this may have run. Besides authorities quoted see Horte, Prolegomena, 1895, pp. 75 ff.; and Anger, Uber den Laodicienbrief (Leipzig, 1843). [E.H.P.]

Laodiceans, the inhabitants of Laodicea (Col. 4.16; Rev. 3.14).

Lapidoth’, the husband of Deborah the prophetess (Judg. 4.4 only).

Lapwing (Heb. dukkitjah) occurs in Lev.11.19, and in the parallel passage of Deut.14.18, in the list of birds forbidden by Moses to be eaten. Commentators generally agree with the LXX. and Vulg. that the hoopoe (Upupa epops) is the bird intended, although the Sadducees believed it to refer to domesticated poultry, which they therefore refused to eat. That the hoopoe (Arab. dukfah) is meant is supported by the fact that its Coptic and Syr. names are very similar to the Heb. word. Marshy ground, ploughed land, and wooded districts near water are favourite haunts of the hoopoe, which is a summer visitor to Palestine. [R.L.]

Lase’a (Lasaia, Ac. 27.8), a town in Crete. The name is still given to some ruins a few miles E. of Fair Havens. This, being S.E. of Gortyna, appears to be the Lysis of the “Peutinger Tables” (5th cent. A.D.), placed 16 miles S. of the latter. [C.C.C.]

La’sha, a place mentioned Gen.10.19 only, as marking the limit of the country of the Canaanites, with the cities of the kikkar of Jordan. Jerome, commenting on the passage, places it at Callirhoe, a spot famous for hot springs near the E. shore of the Dead Sea.

Lasharon’ (R.V. Lasharon), one of the royal Canaanite towns (Jos.12.18), noticed with Madon. Probably Sarōña, a village S. of Madin, and about 6 miles W. of the S. end of the sea of Galilee. It is the Sarana of the list of Thothmes III. (No. 21), noticed next to Madna (Madon). [C.C.C.]

Las’thenes was a Cretan, who supplied Demetrius II. (Nicator) with a force of mercenaries (Josephus, 13 Ant. iv. 3), with which to wrest the Syrian throne from Alexander Balas, 147 B.C. (1Mac.10.67ff.). He stood high in favour with Demetrius, who (when making terms with Jonathan) wrote on the subject to Lashamon, his confidant and “friend” (1 M. 31, 32), titles here denoting honour and confidence, rather than kinship. [C.D.]

Latchet, the thong or fastening by which the sandal was attached to the foot (Is.6.27). It is used in Gen.14.23 to denote something trivial or worthless. In Mk.1.7, Lk.3.16, to bear or unfasten the shoes of another is an act typical of the deepest respect and humility.

Latin (Lu.23.38, Ποιμένας; Jn.19.20, Ποιμένη), the language spoken by the Romans, mentioned only as one of the languages in which the title on the Cross was inscribed.

Lattice. The windows of houses in the East are filled by a wooden ornamental lattice, called shubhak, which admits light and air, but secures privacy (Lane, Modern Egyp. i. p. 11). The A.V. renders three Heb. words by lattice. (1) ‘esnhāb, a “refresher,” or window to admit air (Judg.5.28; Pr.7.6), rendered “casement” in the second passage. (2) ḫarakkim (Can.2.9), “nets, or lattices, to windows (LXX. ψευδα). In Aram. the word ḫarāk means a “window.” (3) shubhāh, a “fret,” or lattice, like the Arab. shebakāh,
Laver.

In the tabernacle, a vessel of brass containing water for the priests to wash their hands and feet before offering sacrifice. It stood in the court between the altar and the door of the tabernacle, and, according to Jewish usage, a little to the S. (Ex. 30:18-20; Rendell, Ant. Hebr. pt. i. ch. iv. 9). It rested on a foot, though by some explained to be a cover, of copper or bronze, which (as well as the laver itself) was made from the mirrors of the women assembled at the door of the tabernacle court (Ex. 38:8). The form of the laver is not specified, but may be assumed to have been circular. Like the other vessels belonging to the tabernacle, it was, together with its foot, consecrated with oil (Lev. 8:10, 11). As no mention is made of any vessel for washing the flesh of the sacrificial victims, it is possible that the laver may have been used for this purpose also (Rendell, Ant. Hebr. pt. iv. 9). (2) In Solomon's temple, besides the great molten laver, there were ten lavers of brass, raised on bases (1 K. 7:27, 30), five on the N. and S. sides respectively of the court of the priests. Each laver contained 40 baths. They were used for washing the animals to be offered in burnt-offerings (2 Chr. 4:11). The dimensions of the basin, with the lavers, as given in the Heb. text, are 4 cubits in length and breadth, and 3 in height. The LXX. gives 4½ x 6 in. height. Josephus, who appears to have followed a var. reading of the LXX., makes them 5 in length, 4 in width, and 6 in height (1 K. 7:28; Thoenius, Antiq. Josephus, 8, Ant. iii. 5, 5). There were to each four wheels of 1½ cubits in diameter, with spokes, etc., all cast in one piece. The principal parts may be thus enumerated: (a) "Borders," probably panels. Gesenius (Thes. 193) supposes these to have been ornaments like square shields, with engraved work. (b) "Ledges," inscribed with inscriptions of the types covering joints. (c) "Additions," probably festoons: Lightfoot translates, "margines oblique descendentes." (d) "Plates," probably axles, cast in the same piece as the wheels. (e) "Underseters," either the axes of the wheels, or a sort of handle for moving the whole machine; Lightfoot renders "brackets to support the column." Naves. (g) Spokes. (h) "Folkes." (i) Chapter, perhaps the rim of the circular opening ("mouth," ver. 31) in the convex top. (k) A round compass, perhaps the convex roof of the base. To these parts Josephus adds chains, which may be the festoons above mentioned (Ant. iii. 5, 5). [S. MULFAN.]

Law, usually lādār, LXX. and N.T. ἱθαρ; properly any authoritative direction or instruction, e.g. of one's father (Pr. 3:1, 4; 1 Thess. 4:6). [S. MULFAN.]

LAW IN O.T.

..."net," a wooden one no doubt, according to which (2 K. 1.12) Ahaziah fell from an upper chamber. [H. F. W.] [C. R. C.]

Like the laver, the LXX. and N.T. ἱθαρ; properly any authoritative direction or instruction, e.g. of one's father (Pr. 3:1, 4); of one's mother (1 K. 18.6), of the wise (13:14), of the priest in ceremonial matters (Hag. 2:11; cf. Deut. 24.8), of the prophet in religious matters in a wider sense (Is. 1:10, 5:21; 8:16, 20; 30:9, etc.); hence, more technically (lit. misbāh), a judicial decision, whether ecclesiastical, civil, or criminal (Ex. 18:16, 20; Deut. 17:11); hence, since judicial precedents, when collected, form a code, it comes to mean a code of law, especially the Law of Moses. The last is the predominant sense in later books of O.T., but the word also denotes the law and will of God in a wider sense. It is revealed in prophecy, in conscience, and in the providence provided for the world. In Ps. 119 both meanings are combined. In N.T., ἱθαρ with the article means the law of Moses; and, without the article, law in general, the Mosaic law being included, but not exclusively meant (Ro. 2:12, 14, 5:15). Yet this distinction does not always hold (see, e.g., Rom. 2:25). Occasionally "the law" stands for the whole O.T. (Jn. 10:34, 15:2; 1 Cor. 14:21). Then the precepts of Christ are called a "law" (the perfect law of liberty, Jas. 1:25), and there are also metaphorical uses of the term (Ro. 3:27, 7:21, 23; 5:2). Other words for law are mishkāh, properly judicial decision, but often used for that eternal law of righteousness which is the norm and archetype of all earthly law (e.g. Gen. 18:25; Deut. 32:1; Job 8:32, 34, 37:23; Ps. 33:5, 37:28, 89:14, 97:2, 99:4, 111:7; Is. 30:18; Ho. 2:19); hag, or ἑηγήσασθαι, "statute," literally "something engraven," occasionally used for a law or uniformity. (Jn. 1:17, 15:13, 15:24, 1 Cor. 4:12; lit. "something to be kept"); μίσχυ, lit. "something commanded"; ἁρμανία, lit. "testimonies," chiefly used of the Decalogue; πιγγινήθη, "precepts," chiefly in Ps. 119; and, in the Pers. period only (for in Deut. 33:2 the Massoretic text is corrupt), dāth, perhaps a "sacred" or "divine" meaning (as in Ezek. 36:10, 18; Esth. 1.8, etc.).[TESTAMENT.] [C. H.]

Law in O.T. A. Pre-Mosaic. (1) Customary. (a) Sacrificial, ritual, etc. We meet with sacrifice, including both vegetable offerings and animals, as early as the time of Cain and Abel (Gen. 4:4). Altars were frequently erected in patriarchal times (Gen. 12:7, etc.), sometimes also pillars (35:14), subsequently forbidden, Lev. 26:1; Deut. 16:22, and perhaps trees (Gen. 21:33). Purification for sacrificial purposes and the idea of contagious holiness occur in Jacob's time (35:2). Continuous reference is made to relationships, e.g. to clan, the form of worship (28:18). Perhaps, too, the idea that shoes must not be worn in a holy place was pre-Mosaic (see Ex. 3:5). Burnt-offerings (Gen. 22), drink-offerings (35:14), and probably peace-offerings (Ex. 10:25, etc.), were already in use and distinct. As vegetable offerings were, it must also have been the case with meal-offerings [SACRIFICE]. Some (not all) firstlings were brought by Abel (Gen. 4:4), and Jacob vowed a Tithi of everything to God. A distinction between clean and unclean animals was known to Noah. From Jacob's time the sinew of the thigh was not eaten (Gen. 32:33). Graus (14:22, etc.), vows, and covenants (paralles in Churchman, Jan. 1908, 17f.) were in use. (b) Jural. Besides law of Homicide and other Crimes, we find customs covering a large field. (i) Family and Inheritance. The Hebrew had one or more principal wives and also concubines. Marriage by purchase appears to have been the rule, and we meet with its invariable concomitant, marriage by service (29). A wife could give her maid to her husband, and the children were for some purposes regarded as the wife's in certain cases (Family) (16:30). For other customs, see also Marriage. A form of levirate marriage was in use (38),
and we often find the strong desire to maintain families in existence. The head of the family apparently had the power of life and death over all its members (22, 31.32, 38.24, 42.37; cf. Post, Grundriss, i. 176 ff., ii. 341; and the Roman patria potestas [Moyle, on Justinian, Institutes, i. 9]). Among children, the eldest son of the principal wife was normally entitled to a Betroth; but this could be varied by agreement (25.31-34) or by the father (1 Chr.5.1, etc.). The father could also give a blessing (not = birthright, Gen.27.36), varying the relative positions of the children. He clearly had power to distribute his property (inovables only) as he chose, at any time. The Hammurabi code is considered the law altered Deut.21.15-17. Apparently adoption was possible in some cases (Gen.48.5). In default of children, a slave might be heir (15.2-4). (ii) Slaves formed a regular part of the patriarchal household, and were religiously members of the community (17.12-14). They differ from I. 5 to the extent (Gen.6, 10, 14). (iii) Contract law is very undeveloped. Sale occurs, but is apparently usually contemporaneous with conveyance or delivery. Where something is bought which cannot be handed over at the time, an oath is used (25.31-34). Similarly a promise of payment is secured by Deut.19.12-13. (iv) Organisation. In Egypt we find that the family system has developed Elders and officers, who appear as the leaders and judges, and to some extent the rulers of the community. (v) The question of the relation of the law of the the Decalogue (29.15), but the wages sometimes consist of animals (30.28ff., 31.38ff.; cf. 38.16ff.). (iv) Organisation. In Egypt we find that the family system has developed Elders and officers, who appear as the leaders and judges, and to some extent the rulers of the community. (v) The question of the relation of the law of the (infra B, (io), (i), (a). (2) Legislation, etc. God gave commands to Noah (9.1-7) permitting the consumption of all animals, but forbidding the use of blood in food [Unclean Meats] and forbidding human bloodshed [Crimes; Homicide]. As the custom of a great part of the civilized world, the belief was that every male on the eighth day was commanded (17). It appears from 18.19 that the way of God was known to include judgment, but it cannot be said with certainty that this implies other legislation (cf. however, 26.5). B. The Mosaic Legislation. (1) Its Deity. The legislation contained in Ex.-Deut. was given to the children of Israel by God. The Decalogue was spoken by God at mount Sinai [Ten Commandments]; the rest of the legislation was given mediatively—i.e. through Moses or Aaron, or both. The laws were scattered over a period of 40 years, beginning immediately before the Exodus. Passover legislation (Ex.12), and ending with the provisions for the septennial reading of Deuteronomy (Deut.31.9ff.). (2) Its Form. (i) The covenants constitute the first outstanding feature of the form. Alone among known legislations, large portions of the Law are found as terms of sworn agreements made between God and the Heb. tribes. Other peoples have had laws to which they attributed a divine origin, but the covenant form is unique. There appear to be three principal covenants: (a) The Sinaic covenant (see Ex.19.3-8, 24.3-11). God proposes to enter into special relations with the Heb. tribes, and the people consent. The terms are contained in 20.1-17, 20.22-23.33, and a covenant is concluded on this basis (24.8). This covenant was subsequently broken by the worship of the golden calf (32), but renewed by God in Ex.34. (b) The covenant with the patriarchs, promising the land (Gen.17, etc.; Lev.26.42, etc.). Land laws and laws relating to certain kinds of property are found in Lev.25f. The language used throughout Lev.26 proves that these laws are made in virtue of a covenant between God and the children of Israel, dating from the days of Abraham. (c) Deut. contains the words of a third covenant which God commanded Moses to make with the children of Israel (29.1[28.69]). The terms are found in 5-26. In the case of each of these covenants a homiletic address is found at the end of the terms, where in a covenant between men the jurat (invocation of God) would occur (Ex.23.20-33; Lev.26.3-45; Deut.28). For the jurat of Deut. and the address of the priests (see Lev.10.11, 14, 51-57, 15.31-33, etc.; Deut.24.8, 33.10), and much was internal to the priestly tribe, and intended primarily for them (Lev.21.1, 22; Num.18.1, etc.). In no case is such law included in either of the three covenants, and the style is everywhere appropriate to the purpose. (iv) Style. The laws take various forms. "Thou shalt not," "If a man slay a man," is a frequent type, but clauses beginning with, e.g., "wherefore," or couched in the 2nd person singular or plural, are also common. In this diversity the legislation resembles the Roman XII. Tables, which also employed different types, including the 2nd singular (not the 2nd plural), e.g., "the plaintiff shall present his case to the defendant (i.e., to the priest) in the priestly Assembly, the Samaria, the Greek-Sato, etc., where the "if" type is invariable. In other respects the style varies. Thus the legislation of Deuteronomy is not merely in the form of a covenant, but also of a speech, and is characterized by the appropriate oratorial and rhythm. The laws in the Sinaic covenant and the judgments in some of the decided cases are extraordinarily terse, like other ancient codes destined for memorizing; and this, combined with the nature of the contents, makes it probable that they were intended to be committed to memory by the elders. [JUDG.] The priestly teaching was interpreted and adapted neither for rhetorical effect nor memorizing, and accordingly presents yet a third style. Parallelism is not uncommon in the legislation. [POETRY, HEBREW.] (v) The arrangement is largely determined by the contents and purpose. Thus matters destined to influence public opinion and mould the future naturally find a place in Deuteronomy—the book that was to be periodically read to the people; the bulk of the "dooms" to be applied by the courts of elders are contained in the Sinaic covenant; laws relating to agriculture, land tenure, relief of poor peasants, etc., are in
Lev. 25; and sacrificial miniatiae to be observed at the religious capital, regulations internal to the priestly tribe, etc. (again) laws given in the tent of meeting (1.1) and laws given on mount Sinai (7.38) are found grouped together in 1-7 indechance of chronology, but with obvious convenience. The order is generally due to sequence of thought, not to scientific arrangement. (vi) Repetitions are not infrequent, and are due to numerous causes, three of which must be named: (a) Sometimes a very terse summary of the law is given in the Sinaitic covenant, and expanded at length in passages that would reach the people only through the teaching of the priests (infra, 3.11); (b) the same rule or institution is frequently dealt with from different points of view (e.g. Lev. 25). The Tetragrammaton is employed in the Ten Commandments and in rules that cannot be enforced by the courts. Illustration: the three pilgrimage festivals are given in summary in Ex. 23; then, when the covenant is renewed in Ex. 34, these and other religious rules (but no jural laws) are repeated. Again, they find their places in the complete details of priestly teaching (Lev. 23), and in Deut. 16 they occur once more, but from a different point of view—in special connexion with the laws of the religious capital. (3) Provisions for perpetuating, (i) Deuteronomy was to be publicly read to the people every seven years. (ii) The tribe of Levi was set apart for priestly purposes, and commanded (amongst other things) to teach law. [Priest; Levites.] (iii) The duty of teaching children is repeatedly enjoined (Deut. 6.9-6.11, etc.), especially about Passover (Ex. 13.11-14). (iv) Probably portions of the law were intended to be memorized [infra, (2), (iv)]. (v) Various profane and priestly garments (tassels) (Num. 15.38-41; Deut. 22.12), binding on hand and between eyes (Ex. 13.9-16; Deut. 6.8, etc.). [Hem or Garment; Frontlets, writing on door-posts, etc. (6.9, etc.).] (vi) On the writing of the Law see Exodus, Deuteronomy. (4) Conditions, (i) Historical. The past affected the work of Moses in several ways. (a) Twelve tribes of common origin, historical and religious experiences, but of distinct tribal consciousness, were to be fused into a single nation. The tribal consciousness is seen at work in many provisions—e.g. the arrangements for the division of the land, the restriction on the marriage of heiresses (Num. 36), while (probably partly to counteract the centrifugal forces) centralizing laws were enacted which had a unifying effect (cf. 1.12. 20.). (b) The stay in Egypt appears to have brought home to the people the special needs of strangers. [Strangers.] Probably, too, the influence of Egyptian experiences is to be seen in the law laws (7.11), and perhaps also in some customs—e.g. the provisions for writing on the gates, etc., though these are not exclusively Egyptian. (c) The miraculous deliverance from Egypt impressed itself on the national consciousness, and was made the basis of many special laws and many appeals for fidelity (see, e.g., Deut. 25.1-11). (d) The historical continuation, with the leading figures (particularly of the patriarchs is strongly marked—e.g. Deut. 25.f. are largely founded on the covenant with Abraham. (ii) Political. The circumstances of the time are clearly mirrored in many portions of the legislation. Thus the desert conditions imprinted on many laws, the numerous references to, and provisions for, the impending entry into Canaan, the fact that a complete new system of land law was necessary or even possible must be referred to the political circumstances. So, too, some minor laws—e.g. "Remember Amalek" (Deut. 25.17-19). Perhaps also the failure to create a sufficiently strong central executive should be attributed to tribal jealousy and the historical factors. (iii) Religious. It is clear that the Israelites had frequently been unfaithful to the God of their fathers, and continued so to a great extent in the Mosaic age (Lev. 17.7; Num. 25.1-3; Deut. 12.8, etc.). Moreover, the Egyptians and Canaanites were remnants of Pharaoh's power, and the Israelites were to make their lives a "manifestation" of God's power. These two facts are manifestly responsible for many provisions aimed at particular abuses—e.g. Deut. 22.21f. (iv) Social. Society was based on the patriarchal family, which included slaves. The families were grouped in clans, and the clans in tribes. Distinctions between the rich and poor existed, and the "mixed multitude" involved the presence of many strangers. Princes and elders also appear. [Princes.] The paternal power was still very great (21.8-21), and the right to sell children remained untouched. Purchase was a common form of marriage. Divorce was in use (24.1-4). The feeling of family unity was very strong, as is proved by the communal land laws, etc. [Family.] (v) Economic. There was hardly any trade; all contracts were extremely primitive and undeveloped. The moral conceptions on which they rest are unknown. Thus, the protection afforded to the hired laborer and the subserior by law, the "redemption of debts," the "acquisition of precious metals were in use, and working in wood and metals had attained some proficiency, probably as the result of the stay in Egypt. The pre-Egyptian experiences had included agriculture (Gen. 26.12), and the tribes were rich in animal wealth and pastoral experience. The laws reflect these conditions. (vi) Intellectual. The laws clearly prove that the intellectual condition of the tribes was very primitive. Such elementary distinctions as those between murder and manslaughter (Homicide), or compulsion and intentional wrong-doing (Deut. 22.20), are only expressed in the most cumbersome and elementary way. Num. 15.22-31, with its inadequate distinction between unwitting and high-handed sins, tells the same tale. Again, the whole of the " physiological psychology," that finds expression in regulations about clean and unclean, etc., testifies most clearly to the low level of reflection attained by the people. The scarcity of writing for legal purposes is also significant. [Witness.] (vii) Legal. Here the machinery is of the rudest. A few forms of the death penalty and stripes are almost the only punishments (other than pecuniary) that could be inflicted by a legal tribunal. In imprisonment
as a penalty is never found. Hence the only possible punishment for contempt of court and many other offences was death; and the character of the legislation is largely due to the inevitable defectsiveness of archaic legal procedure. See further General Notes, etc. Object and Scope. The objects are clearly stated: "What doth the LORD thy God require of thee but to fear the LORD thy God, to walk in all His ways, and to love Him, and to serve the LORD thy God with all thy heart and with all thy soul, to keep the commandments of the LORD and His statutes and His judgments which I command thee this day for thy good?" (Deut.10:12f.). Because of the idea expressed in the last words, the Law (unlike, e.g., the Indian law-books) envisions the good of every member of the nation equally, without preference for any individual, class, or caste. Because of the idea expressed in the Law, life, wealth, and standards of conduct are in close sympathy with human life, and is not limited to juridical and sacrificial law. The Lord is to be Israel's God: therefore all worship of other gods, and numerous practices associated with such worship are prohibited, and intense fidelity is enjoined. The methods of serving God externally are manifold. To worship God in spirit and in truth, in the form of social intercourse, in secret actions, and in the innermost thoughts are defined and commanded. He is holy; therefore the Israelites must be holy—holy in their relations to parents, superiors, dependants, neighbours, acquaintances, customers, suitors; holy in public and private hygiene; holy in land, city and home; holy in the preservation of the land, the society, and the individual from sin. Hence, too, many characteristic institutions and rules—e.g. the law of pilgrimage was partly introduced "that thou mayest learn to fear the LORD thy God always" (Deut.14:23). Like the Indian law-books, the Law takes a clear view of the unity of life. In its six faith and standards—conduct in matters juridical, sacrificial, ethical, moral, social, individual—form an indissoluble whole.

(ii) The power of the courts is relied on, but is insufficient for three reasons: (a) As the scope of the legislation extends to the whole of life, it far exceeds the possible jurisdiction of courts in the undeveloped condition of the society, the machinery of the courts was defective, as judged by modern standards, and their efficiency was consequently restricted [supra, (4)(vii)]; (c) the necessity for proof restricts the jurisdiction of courts over acts with which they might otherwise deal. Thus, secret idolatry and cursing a dead man (who could not hear, and therefore could not prove the offence) would in many cases be impossible to prove. Hence we find also (ii) sacrificial law, much of which could be enforced by the priests controlling the religious capital; (iii) various religious methods, (a) Oaths and Ordeal as means of trial; (b) threats of divine punishment of the individual (e.g. Ex.22:24[23]); (c) promises of divine blessing of the individual (e.g. Deut.15:18); (d) curses of individual malefactors (27:15ff.) [Curse]; (e) discourses, especially at the end of the three great covenants [supra, (2), (i), promising national blessings, peace, and national salvation; disasters for disobedience; (f) appeals to individual fear of God, no punishment being specified—e.g. Lev.19:14; (iv) appeals to public opinion (e.g. "in thy sight," 25:53); (v) appeals to the historical consciousness of individuals and the nation, especially the deliverance from Egypt are emphasized. Example of law sort being attached—e.g. 20:16. Unlike some other ancient law-books, the Pentateuch never relies on any eschatological motive. (7) Ideas and Principles. Many of these are included in the conception of holiness, but must be separately noticed. No classification is feasible. (i) Holiness is conceived of as a state for the Lord and holy, and has separated you from the peoples that ye should be Mine" (Lev.20:26). This separation in turn involves many other ideas. [Vow; Unclean Meats; and infra.] (ii) God's dwelling is in the midst of Israel. It is defined by ritual uncleanness (Lev.15.31, etc.; Num.19.13,20), giving sedan, see Family, § 5) with the presence of lepers in the camp (Num.5:1-3), pollution of blood (35.34). (iii) The land is God's (Lev.25.23), as the land of the Egyptians had been Pharaoh's (Gen.47.19ff.). Hence it may not be sold in perpetuity. This does not apply to the cities, subject to certain exceptions as to Lev. (rural cities), or to the land of Israel (iii) The principle is strongly marked. (a) National and communal: (a) national righteousness is violated by sexual and other offences, which are abominations before the Lord, and defile the land (Lev.18:22ff.; Deut.24:3; Lev.19:29). (b) In the case of certain offences the death of the transgressor or his nearest relative is necessary to innocent blood or evil from Israel or the city (Deut.19:13,20,21,8,22:11,24,24.7). (b) Family: (a) Crimes, wrongs, and sins. (a) The iniquity of the fathers might be visited on the children by God (Ex.20,5,34,7; Num.14,18,16,32; Deut.5,9); but (b) never by man. Contrast Lev.20,9, against that man and against his family; (vii) (c) as a penal code, see Family, § 5) with 20.2. The law here is based on the sole responsibility of each individual for his own actions, so far as wrongdoing is concerned, combined with a nascent sense of the responsibility of the community for the repression of crime. [Homicide, (4).] The only trace of the collective principle is in the punishment of a clan, see Family, § 5) with 20.2, which is probably due to the unique provisions of Hamburû, §§ 116, etc., to which (so far as is known) no legislative parallel can be found. (b) Land laws. Here the collective principle appears very strongly in the rights of redemption and the jubilee legislation. (v) A most remarkable feature is the constant and unquestioning reliance on miraculous divine intervention for the enforcement and smooth working of the law. (See especially Lev.25:20 ff. and Ex.22:4 [23,27,26]; Lev.20:29, etc.) (vi) In the legal sphere all freemen are equal. Poor and rich are to be treated with even justice. Those who are under a disability (by reason of age, sex, or foreign birth) must not be wronged. For the redemption of souls the price is the same for every adult freeman (Ex.30,15). Unlike many ancient codes, the Law treats slaying or wronging any freeman (whatever his rank) in the same way. (vii) An elaborate legislation provides for the punishment of all unnatural sex. This rule is applicable to stranger as to native (Lev.24.10-23). This rule also applies to unwitting
sins (Num.15.30). (iv) In the moral sphere, humanity is an urgent duty. (a) "Thou shalt love thy neighbour as thyself" (Lev.19.18). (b) Thou shalt love him [the stranger] as thyself. (c) Special provisions protect those under any incapacity—the deaf, the blind, the fatherless, the widow. (d) Humanity to animals is commanded (Ex.23.5, etc.). (x) The treatment of other races varies according to national policy, founded on sentiment and past history, not expediency. Thus Egyptians, Canaanites and Amalekites are to be destroyed, and their males exterminated. (xi) Commercial honesty and truthfulness are earnestly enjoined. (xii) A group of ideas are connected with blood. We have seen that as early as Noah’s time it was regarded as the life. Hence it may not be eaten (Lev.17.12,14); hence, too, it can make atonement on the altar (17.11). It pollutes the land when shed, so that expiation is necessary (Num.35.33). [HOMICIDE.] (xiii) The ideas of sin and atonement which pervade much of the legislation are discussed elsewhere. [SIN; ATONEMENT.] Here we need only notice that sin may be incurred, not merely intentionally, but in ignorance (Lev.5.17-18), through acts of omission (Num.15.22-23), etc., outside the case of a congregation, even through the act of some unknown person (Num.15.24; Deut.21.8), and that the offerings provided in no case atone for presumptuous sin (Num.15.30), though they can procure forgiveness in the case of certain worthy offences when accompanied by confession (Lev.16.2; Num.15.8-10). Clean and unclean. These ideas also are discussed elsewhere [UNCLEANNESS]; but for a general view the following must be quoted: “The origin of all these notions is in certain physical instincts, in physiological psychology, which is the reason why they are found among peoples far very removed from one another by race or religion” (Darmesteter. Zed-Aneuta, pt. ii. 2nd ed. [Sacred Books of the East, vol. iv.] LXXIX). (xv) A feature of some importance is the joyful character of the religion, “rejoice before the Lord” being a constant and significant phrase. (xvi) See further Casual Analysis. Analysis. Full or complete analysis is possible within reasonable limits. The following table, however, gives a rough idea of the order of the principal subjects, and will enable the reader to obtain information on any topic by reference to the special articles. Occasional commands are usually omitted, but references are given to the construction of the tabernacle, and some other similar topics, because some permanent laws are embedded in these sections. EX 12.1-27,43-19, PASSOVER; 13.1-16, Firstborn and Firstlings; 16.1-34, MANNA; 18.13-26, appointment of judicial officials at Jethro’s advice [JUDG]; 20.1-17, TEN COMMANDMENTS; 20.22-23, other terms of the Smite covenant (Altars, Slavery, CRIMES, DESHOT, HOMICIDE, LOG, STRANGER, WIDOW, FATHERLESS, PRODIGAL); 21.1-9, Firstlings, Unclean Meats, Poor, CATTLE, Calendar, Sabbath Year, Sabbath Feasts, Sacrifice); 25-29.37, commands relating to TABERNACLE, its furniture and PRIESTS [CRIMES]; 29.38-12, daily public Sacrifices; 30.31.11, tabernacle continued [INCENSE, ALTAR, CRIMES]; 31.12-17, 35-13, SABBATH [CRIMES]; 34.10-6, renewal of Smite covenant, which had been broken by worship of the golden calf. Some earlier ritual commands brieﬂy recapitulated, with little new matter; 35.4-40, tabernacle completed; Lev.17, sacrifice procedure at religious camp [SACRIFICE], dealing with burnt-offerings, meal-offerings, sin-offerings, etc.; 18.4-10, adjacent laws deﬁned; 19.10-6, of mourning for priests; 10.8-5, law of priests; 11. clean and unclean meats; 12, PURIFICATION after childbirth [FAMILY]; 13.14, LEPROSY; 15, other OFFENCES, DAY OF ATONEMENT, Day of Atonement, and slaughter; 18, forbidden degrees of MARRIAGE, etc.; 19, miscellaneous commands; 20, incest and other offences [CRIMES]; 21-22.6, law of priests; 22.17-33, law of Levites; 23.1-16, perpetual light in tabernacle, and SHEWBREAD; 24.1-23, BLASPHEMY and law as to strangers; 25,26, land covenant [SABBATICAL YEAR, JUBILEE]; 27, recompense of VOWS and duties of Levites; 5.1-4, purity of camp; 5.5-8, repentant wrongdoers [CRIMES]; 5.9, contributions to priests; 5.15-31, OBLIGATION TO JEALOUSY; 6.1-21, NAVARITES; 8.1-52, capital crimes, 10.1-10, trumpets; 11, consecration of seventy ELDERs; 15.1-31, sacrifice (miscellaneous laws); 15.5-2, law of leprosy-breaker; 16, PRIESTS and Levites; 19, Water of Separation; 27.1-11.36, daughters of Zopheriah, inheritance of land [FAMILY]; 28,39.30.1, national offerings [SACRIFICE, etc.]; 29,30, Atonement, and Vows; 30, Lev.26, Deut.5-26, Deuteronomic Covenant. The principal legal portions are as follows: Deut.5.5-21, TEN COMMANDMENTS; 5.22-11.32 forms part of a speech as Moses gives the Mosaic law to the Israelites not to cut themselves, to eat unleavened bread, etc. Dietary laws [UNCLEAN MEATS]; 14.22-29, TITHES; 15.1-11, release [LOAN]; 15.12-18, manumission of bondslaves; 16,15-29, firstfruits, and PECULIAR PROVISIONS; 16.1-17, three Feasts to be celebrated at the temple; 16.18-20, administration of justice [JUDG]; 16.17-17.1, law of lay altars and sacrifices; 17.2-7, recompense of VOWS [CRIMES, etc.]; 17.14-33, supreme court for difficult cases [JUDG]; 17.14-20, KING; 18.1-8, priests and Levites; 18.9-22, miscellaneous CRIMES of indelicacy to God, including the law of false prophets; 19.1-16, list of contraband; 19.15-21, law of false WITNESS [CRIMES]; 20, laws of WAR; 21.1-9, person found dead [HOMICIDE]; 21, 6.10, law of female captive [SLAVE, MARRIAGE, FAMILY]; 21.7-8, disposition of males and females of different wives [FAMILY, CRIMES, etc.]; 21.23, hanging [CRIMES, etc.]; 22.1-12, miscellaneous; 22.13-21, construction of houses, sow’s blood dress; 22.13-21, husband keeping wife’s prenuptial chastity; 22.23-30, sundry sexual offences [FAMILY, MARRIAGE, CRIMES]; 23.1-9.20, laws relating to concerning or withholding full Israelite status [PROSLEYTE, STRANGER, FOREIGNER]; 23.9, 14.10-15, camp wars [LAW]; 23.15 (16f.), runaway slaves [SLAVE]; 23.17(18), Israelites to refrain from certain immoral pursuits; 23.18 (16), 23.21-24.24, VOWS; 23.10 (20f.), prohibition of usury [LOAN]; 23.14 (23f.), permission to pluck neighbour’s grapes of new-won with his hand; 24.1-14, law relating to divorce [MARRIAGE, DIVORCE]; 24.5, of marriage; 24.10-15, camp wars [LAW]; 24.11, hiring servants [CRIMES, etc.]; 24.11, holy and unholy; 24.13, trespass-offences; 25.4, not to be muzzled in threshing [CATTLE]; 25.5-10, Levirate LAW [CRIMES, etc.]; 25.11, incelestrian acts, etc. of woman [CRIMES]; 25.1-16, just Weights and Measures; 26.1-12,出す, MEDIATION]; 26.1-11, FIRSTFRUITS; 26.12-15, Tithes.

This is followed some chapters later by Deut. 31.10-13, providing for the septennial reading of "this law" (i.e. Deuteronomy). (g) How far
LAW IN O.T.

new. The legislation is not a consolidating code. Some old rules are contained, but probably only where some new application is given (e.g. certain branches of law to be extended to strangers as well as Israelites (Lev. 24: 13-22), or some peculiarity of old rule is applied. Proofs of this view: (i) Everywhere existing practice is assumed—e.g. no rule is originally given for the most usual cases of assault, but only the somewhat exceptional instance of a pregnant female bystander being hurt. (ii) The decided cases are due to the necessity of deciding some new or doubtful point. (iii) Much of the law deals with matters that could not have arisen in the earlier history—e.g. tenure of and succession to land. (iv) Some rules conflict with the previous customary law—e.g. in lieu of unlimited paternal power (cf. A, i, b, i, supra) we find cursing and smiting a parent, and rebelliousness, dealt with by courts (other instances in A, 1, supra; Homerice; Crimes). (v) A very large portion of the law is dependent on the creation of a priestly tribe with ceremonial, ritual, sacrificial, hygienic, and teaching functions, and of a tabernacle or house of God. (vi) The difficulty of definition where a mental element enters into the law (e.g. contrasts of murder and manslaughter, voluntary and involuntary duress, Deut. 22:26) testifies to the novelty of the concepts. The human mind in such matters advances from concrete cases to general principles (cf. Dareste, Etudes, 22-24). (10) How far original. (i) The jural laws. The Hammurabi question. In 1902 a copy of the code of Hammurabi was discovered, and the question arises how far Heb. law was influenced by it. (a) Patriarchal age. In certain departments the law contained in Genesis is fundamentally different from that of Hammurabi, and springs from different ideas. The wide paternal power, the law of Homocide, the absence of regular law courts, the primitive nature of the conveyance of the cave of Machpelah stand in the most marked contrast to the Babylonian system. Further, the later Israelitish law sometimes introduces a rule, substantially identical with a passage of Hammurabi, in terms which make it plain that a new conception is put forward—e.g. cf. Deut. 22:25 with Hammurabi, § 130. Indeed, generally, cases of similarity between the later Mosaic law and the code tend to show that these rules had not hitherto been practised in Israel. In the third place, there are some resemblances in the marriage customs, though even here Hammurabi sometimes appears to be dealing with a different case (e.g. cf. § 144 [a votary's maid] with Gen. 16: rff., Sarah's maid; 30: rff., Jacob's wives' maids). However, as the §§ following contrast with the law of Genesis, it may be that the common law relating to ordinary wives, who were not votaries, was the same in both cases. But the custom here contemplated is by no means distinctive or uncommon (Post, Grundsätze, i. 143, 144), so that much cannot be inferred. The scanty information we have as to the law of theft and inheritance presents some resemblances and some differences (e.g. Gen. 31:32 perhaps resembles § 6, though not in the tribunals to apply it, but the story of Joseph is unlike Hammurabi's rules). Lastly, in many cases, owing to silence on one side or the other, no comparison is possible. On the whole, therefore, it is certain that the patriarchs did not live under the code of Hammurabi, though in some departments their customary law was similar to Babylonian law. In such matters the rules are not sufficiently distinctive to warrant any hypothesis of influence, but the possibility is not excluded. (b) The Mosaic age. Hammurabi deals with jural law only. He legislates for a society that is entirely different in historical, geographical, political, social, and economic conditions from the Israel of Moses. Hence the departments in which influence is possible are very narrow. Again, many matters that are common to both systems are universal in societies in certain stages of development—e.g. Oath of purgation, ordeals, etc. On the form of the two legislations, see supra, 2, iv. Further, the main ideas and institutions of the two systems are different. On Homicide, land laws [Jubilee], inheritance, slavery, the position of women [Marriage], offences against parents [Family: Crimes, etc.] the rules and ideas differ toto caelo, and the ethical principles are of course different. In some subjects—e.g. talion, manifold restitution for theft, etc.—both law is based on ideas that are universal; but here Hammurabi often exhibits variations from the normal types, which types, on the other hand, are readily paralleled from the Mosaic legislation. This points to independent development, especially in view of the fact that the earlier law of theft appears to have been invented in different branches of law. The minor Pentateuchal rules are practically identical with those of Hammurabi; but they are not in the least distinctive. Many find parallels all over the world—e.g. § 14 resembles Ex. 21: 15; but see Dillmann, ad loc., and Post, Grundriss, ii. 335. In truth, the laws are often such that any able man, if confronted with the problems they are designed to meet, must have invented substantially the same rules. One illustration must suffice. There is considerable resemblance between Ex. 22: 5-4 (damage done by cattle) and Hammurabi, § 57 (damage done by sheep under charge of a shepherd); but see Dillmann, 11. 155, resembles both laws. More than they seem to suggest is the fact that in all three cases the principle of the law is compensation, but different procedure is adopted in each to attain this end. There is thus no reason for supposing that the code influenced the Mosaic legislation. At most it can only have affected a few minor departments of the law. Deut. 24: 16 is perhaps aimed at the principle that at present is evidenced by Hammurabi alone: though later ages interpreted it otherwise (2K. 14:6). (ii) Sacrificial. Evidence is accumulating that some ideas and institutions, and a few terms of the sacrificial law, can be paralleled from Babylonian, Minean, and Phoenician sources—e.g. shewbread. See P. Haupt, "Babylonian Influence in the Levitical Ritual," Journal of Biblical Literature, xix. (1900), 55-81, and the Marseilles Tariff (Renan, Corpus Inscription. Semit. i. 8; Rawlinson, Phoenicia, p. 387; a translation by S. R. Driver may be found in D. G. Hogarth's Authority and Archaeology, pp. 77 f.). The principles of such universal thought are current in the ancient world, and
corresponded to sentiments that were entertained everywhere. Some of the resemblances so far as paralleled the conduct of the priests—are apparently the outcome of ideas that were widely prevalent, and would naturally spring up independently. In others (e.g., philological resemblances) the origin of the people accounts for likenesses; but in yet others it may ultimately appear that the needs and ideals of the Hebrews led to the enactment of some institutions which differed from the practices of surrounding peoples in the fundamentals of worship rather than in external details. The influence of Babylonian and other cults on some externals of worship may yet prove to have been considerable; but in this department it must be reserved until the evidence is more nearly complete. (11) How far unique. The special articles in this volume and their bibliographies attest the fact that there exist numberless parallels to almost every institution and idea contained in the law. Tithon and blood-feud, the clause ascribed to the Priest's prayer, the priestly order, sacrifice and ritual, all may be paralleled from other races. Nor is it different if we turn to individual rules. With certain striking exceptions (e.g., the law as to strangers) it is possible to parallel most of the laws, even such a detail as the permission to pluck grapes, etc., Deut. 23.24f. [25f.]; Post. Grim. III. 4. 26; Mark, vi. 34f. (with characteristic differences), etc. Nor again is this the only legislation that claims a divine origin, or that seeks to regulate extra-jural matters. The Hindu law-books, for example, deal with faith, penances, purifications, dress, death, etc., as well as jural law. Every code must be the creation of its age; and as the objects of legislators are everywhere similar, and laws are everywhere directed to moulding human conduct, it follows that every archaic legislation belongs to a family group, and differs from other systems belonging to a similar stage of development only in the wider or narrower limits. Naturally, the law of Moses bears the impress of the history, the mind, and the character of the nation for which it was designed; but so does every other known system. And withal it is unique. (i) No other legislation is comparable in literary form and beauty. (ii) While many of the rules can be paralleled, there is no parallel to such a collection of humane rules: hence the spirit and general effect of the whole are different from those of all other legislations. (iii) Perhaps no similar legislation has ever been so free from rules designed to benefit some privileged person or caste. Special consideration is shown only to the helpless. But the true differentia is in none of these things, though it embraces and accounts for all. It lies in the attitude towards the divine. Everywhere the peculiar relation between the One God and the separated people—with all it involved in duty to God and duty to man—is stamped on institutions designed for a race; and its general ideas and primitive civilization differed very little from many other races in similar stages of development. This law centres in and leads to God. Its ultimate problem is not legal or literary or economic or social: it is theological. (12) How far practical. If the test be actual working when put into operation, the innumerable parallels prove that the parts of the rules were essentially practical. Others again are known to have worked satisfactorily—e.g. the pilgrimage law (see especially 1K.12.26f.). But some of the rules are contrary to powerful human sentiments, and appear either not to have been executed at all or to have failed, or else to have been abrogated. Example: It is clear from 1Je.34 that the law for manumitting purchased Heb. slaves after six years' service was long a dead letter, and that even when it had for once been put into execution, it was again speedily nullified. There is in truth an ideal element in the Pentateuchal legislation: its provisions are sometimes in the nature of counsels of perfection. In estimating this, it must be remembered that the legislation sought to teach the people religious perfection, not merely to provide rules for settling inevitable disputes; and even in the most unpractical institutions, the failure has not been absolute: they have had some helpful influence. Moreover, the history of this law suggests yet another test, viz. adaptation to the national character. Here it stands unique. No other legislation has been guarded and practised so tenaciously in the face of every conceivable obstacle. None other has evoked so much loyalty and affection, nor has the national spirit, as it were, outlived its creator, and become in very modern form [Witness], and Zech.11.12 was obviously written in a society that was economically and legally much more advanced than that to which the Mosaic ordinances respecting the hired servant were given. The practice of selling or pledging children long continued. [Poore.] Jehovah is said to have introduced a festival one month later than Tabernacles (1K.16.10-16), at the time of his apostasy. [Alas] made changes in the national sacrifces (2K.12.3f.). For other developments see Temple, Priest, Levites, Judge, Homicide, Crimes, Family, Slave. The most important events in the later legal history are the finding of the book of the law in the 18th year of king Josiah, and the subsequent reform (2K.22f., etc.), and the covenant to observe the law under Ezra and Nehemiah (Ne.9f.). [Pentateuch: Exodus; Leviticus; Numbers; Deuteronomy: Isaiah; Law in N.T.], R. Daroste, Etudes d'histoire de l'ancien droit, vol. iv, 68. M. Wiener, Studies in Biblical Law (1904); articles in Princeton Theol. Review, April 1907, 188-209, Oct. 1907, 605-630, Bibliotheca Sacra, Jan. 1908, 97-131. The current commentaries, Bible Dictionaries, Archaeologies, etc., can only be
used with the utmost reserve for legal purposes. The writings of Sir H. S. Maine, A. H. Post's Grundriss der ethnologischen Jurisprudenz (2 vols. 1864, 1865); the volumes of the Zeitschrift für vergleichende Rechtswissenschaft, and other old law-books and especially the legal volumes of the Sacred Books of the East, and other works on ancient law, together with the materials collected in J. G. Frazer's Golden Bough (2nd ed. 1900) and similar works, form the best aids for the study of O.T. law. The Babylonian and Minean material is conveniently given in A. Jeremias' Das alte Testament im Lichte der alten Religion (2nd ed. 1906). Translations of Hammurabi's code, e.g. Johns, The Oldest Code of Laws; R. F. Harper Code of H.; Hastings, D.B. (5 vols. 1904), s.v. "Code of H.", etc. The legal work hitherto published on it is superficial, and cannot be recommended. For the subsequent development of the law, see the Jewish Encyclopedia (Funk & Wagnalls).

[H.M.W.]

Law of Moses in N.T. (1) Our Lord's Attitude. Our Lord assumed, or at least did not call in question, the Mosaic authorship of the Pentateuch (Mt. 8.4, 19, etc.), and affirmed its divine authority, both as a whole and in its several parts. He so interpreted it in the Gentile and Pauline (Lu.16.17) as in the Jewish gospel (Mt.5.17,18,15.6). He observed not only the moral, but the ceremonial law (Gal.5.4; Lu.7.21ff.,4.16,31,5.14; Jn.5.1, 7.10; Mt.17.24ff.,26.18), severely condemned the "making void" of the least of the commandments (Mt.19.15,16), regarded the keeping of the sabbath as "the first day" of the new covenant (and under the old covenant) of eternal life (Mt.19.17, Lk.10.28, 16.29), and even acknowledged the official position of the scribes and Pharisees as interpreters of the law (Mt.23.2). On the other hand, (a) He entirely rejected the mass of rabbinical tradition, which, professing to be a perfecting of and explanation of the direct word of God, had for long been the foundation of Jewish national existence, and had annulled it both in letter and in spirit (Mt.7.1ff. = Mt.15.1ff., etc.). (b) Within the law, He distinguished between its weighty precepts (e.g. judgment and mercy and faith) and its less important ones (e.g. the tithing of mint and anise and cummin) (Mt.23.23; Lk.11.42). (c) Some ordinances He regarded as burdensome to human infirmity rather than as positively good. Thus He regarded the original ideal of marriage (Gen.2.23,24) as of higher authority than the permission to repudiate a wife granted by Moses to his hard-hearted contemporaries (Deut.24.1; Mt.19.3ff.5.31). (d) He considered the spiritual and especially the legal ideas of the law to be its real essence. Hence Deut. 6.5 and Lev.19.18 were to Him the true text of the law, and all else commentary (Mt.22.35ff., cf. 7.12). (e) He gives the law the widest and most spiritual interpretation possible. E.g., He understands commandment v. to forbid anger and hatred, and commandment vii. just (ch. 5). (f) The ceremonial law is only acceptable when observed in a spirit of love and charity (5.23): it was made for man, and not man for it; and works of piety and mercy take precedence of it (Mt.2.27, etc.). As Son of God, our Lord claimed authority to revise the law, even the decree spoken by God Himself (Mt.5.21ff., R.V.). Accordingly He definitely abrogated the lex talionis (5.38), and revoked the permission to hate one's enemy (5.43), and to swear by Jehovah (5.33). He clearly contemplated the ultimate abandonment of the Mosaic law by His Church. Thus He regarded His death as a new covenant, superseding the old one made by Moses (Mt.26.28), and said definitely, "The law and the prophets were until John; from that time the Gospel of the kingdom of God is preached" (Lu.16.16, cf. Mt.11.12,13). As to His abrogation of the ceremonial law we have the evidence of the commentaries of the Church.

To (st. Peter) on the discourse in Mk.7, "This He said, making all meats clean" (ver. 19, R.V.). The passages which seem to affirm the permanence of every jot and tittle of the Mosaic law (Mt.5.17-19; Lu.16.17) refer to it, not in its imperfect O.T. form, but as revised and "fulfilled" by Christ. The text as a law is nothing but the Gospel. (2) Attitude of St. Paul. See Paul (Theology of). (3) Attitude of St. Peter. See Peter; Acts. (4) Attitude of St. James. See James, Ep. op. [C.H.]

Lawyer (μαχαγός). See Scribe (B). Zenas "the lawyer" (Tit.3.13) was possibly not a scribe, but a legal advocate. [C.H.]

Laying on of Hands. (1) Among the Jews, the ceremony was used for very various purposes. (a) As a sign and means of personal blessing, or appointment to a position or office. The object of Israel placing his hands on the heads of Manasseh and Ephraim before his death is explained in connexion with the bestowing which was intended, as in the blessing of Bezalel (Ex.31.1-18); and though the Heb. words used are different from those usually found for the laying on of hands, it is obvious that the action was of the same character. The object of the lifting up of the hands of the high-priest in the high-priestly blessing (Lev.9.22) was the same; and this may rightly be regarded as parallel to the connection with the act of Israel towards individuals, although here the ceremonial action is different. The children of Israel laid their hands on the members of the tribe of Levi at the time of the dedication of that tribe in place of all the firstborn (Num.8.10). Moses laid his hands on Joshua in appointing him to be his successor, and to communicate to him the spirit of wisdom which he himself had possessed (Num.27.18, 23; Deut.34.9). In all these cases there was the idea of bestowing divine blessing; in the case of the tribe of Levi there was also the notion of substituting those on whom hands were laid for the firstborn. (2) As a ceremony used for atonement and sacrifice. Here also were the ideas of assigning to a work in the service of God, and of substitution—that of substitution possibly being the link between the laying of hands on the Levites and this use of the ceremony. Instances are:—the offering of the bullock and the rams at the consecration of Aaron and his sons (Ex.29.10,15,19; Lev.8.14,18,22); animals offered in sacrifices by individuals (e.g. Lev.1.4); the goat for Azazel on the Day of Atonement (Lev.16.21); and the sin-offering to make atonement for all Israel at the passover of Hezekiah (2Chr.29.23). (c) The witnesses of blasphemy were directed to lay their hands on the head of the offender in Lev.
LAYSING ON OF HANDS

24.14; and the two elders laid their hands on the head of Susanna when they accused her before the people (St. Jai. 34). Apparently the idea in this case was that of handing over the offender for conviction and punishment. (2) In the Ministry of Christ. The use of the ceremony by our Lord carried on the idea of blessing and gift. When He blessed little children, He laid His hands on them (Lu. 18.15-16, where the laying on of hands is not explicitly mentioned, but is apparently implied in the statement, "They brought unto Him also their babes, that He should touch them," compared with Mt. 19.13,15 and Mk. 10.13,16). In His work of healing He laid His hands on the sick or otherwise touched them (Mt. 9.18,25; Mk. 5.34,41, "Come and lay Thy hands on her," "He took the damsel by the hand"; Mk. 6.5, 7,32,33; "They beseech Him to lay His hand upon him," "He put His fingers into his ears, and He spat, and touched his tongue"; 8.33,25; "He took hold of the blind man by the hand," "And when He had spit on his eyes, and laid His hands upon him," etc. Again He laid His hands on the lame (Lu. 13.13 cf. Mt. 8.3,15,9,20,34; Mk. 1.43,7,33; Lu. 5.13, 22,51). As the blessing of the Jewish congregation by means of the uplifted hands of the high-priest is compared above with the blessing of individuals by means of laying hands on their heads, so the blessing of the apostles by our Lord with uplifted hands at the time of His ascension may be compared with His acts of blessing by means of touch (Lu. 24.50). (3) In the Apostolic Period. In the last 12 yr. of St. Mark’s gospel our Lord is recorded to have said of Christians, "They shall lay hands on the sick, and they shall recover" (Mk. 16.18). The laying of the hands of Ananias on Saul of Tarsus seems to have been a means of bodily recovery of sight parallel to that thus spoken of by our Lord rather than a means of spiritual gift, since in the account it is closely connected with the reception of baptism, before which baptism. At the same time, it is in many cases difficult to draw a sharp line between acts for the body and acts for the soul, and the reference to being filled with the Holy Ghost immediately follows that to the reception of sight. "The Lord ... hath sent me, that thou mayest receive thy sight, and be filled with the Holy Ghost" (Ac. 9.12,17). The ceremony was used by the apostles for a specifically spiritual purpose in the laying of hands on the baptized, accompanied with prayer. The converts at Samaria had been baptized, but St. Philip was apparently without the power of administering the further rites now known as Confirmation (8.14-17). Similarly, at Ephesus St. Paul laid his hands on those who had by his instructions been baptized; and "the Holy Ghost came on them, and they spake with tongues, and prophesied" (19.6). [Baptism.] It is probably this use of the ceremony as a means of administering confirmation that is referred to in Heb. 6.2, where the teaching of laying on of hands is placed between the teaching of baptism and of resurrection of the dead. A further use was in connection with ordination. The apostles laid their hands on the "seven men of good report" (Ac. 6.6). When St. Timothy was ordained, the presbyters and St. Paul laid their hands on him (1 Tim. 4.14; 2 Tim. 1.6). St. Paul’s unerring sense of "laying hands hastily on the man" (1 Tim. 5.22), probably refers to ordination, though some have explained it of the reconciliation of penitents. The laying of hands on SS. Barnabas and Paul at Antioch (Ac. 13.3) may have been in connexion with a formal appointment to the apostolate, but is much more likely to have been simply an act of blessing on their special mission, since, while "Separate Me Barnabas and Saul for the work wherewith I have called them" (13.2) might in itself refer either to the general work of the apostolate or to their immediate mission, it is distinctly said at the end of their journey that they had "fulfilled" the work for which "they had been committed to the grace of God" (14.26, K.V.). In 14.23 τετελεσθης is more likely to refer to the use of the hand in appointment, as derived from the showing of hands in an election, than to the laying on of hands in ordination. [Cf. Acts 6.1-7; Hastings, D.B., 5 vols.; Hall, Confirmation; Lightfoot, Galatians, p. 98; Rackham, Acts, pp. 192, 193; Ramsay, St. Paul the Traveller, pp. 64-68; works mentioned in arts. Baptism and Church. [D.S.] Lazarus. This is the Hellenized form of the Heb. Hebrew. The two names by the name in N.T.—1. The beggar in our Lord’s parable (Lu. 16.19f.), who "was cast at the rich man's portal, full of sores." As this is the only instance where a proper name occurs in a gospel-parable, it has been suggested that it was inserted later in order to connect the teaching of the parable (ver. 31) with the historical account of one whose return to life failed to convince the main body of the nation. But Tertullian (De Animâ vili) attempted to show that the parable itself is founded on fact. Both views are purely conjectural. It is worth noticing, however, that the name of Lazarus (Lat. Lazareus) seems to refer to a person of actual life (for which see Dr. Plummer's art. in Hastings, D.B., vols. 1904, s.v.); and also that the name has always had a special association in the Christian Church with lepers and work among them—2. The brother of Martha and Mary of Bethany. The fact that he is thus described in Jn. 11.1, and placed last of the three mentioned in ver. 5, and altogether left without mention in Lu. 10.38ff., suggests that he was the youngest and least important of the family which "Jesus loved." When our Lord received the sisters' message that Lazarus was sick, He first waited two whole days, and then simply proposed to the disciples that they should take the journey to Judea again. When they demonstrated with Him because of the dangers He would encounter in the neighbourhood of Jerusalem, He at length announced plainly that Lazarus was by this time dead, and that He had wanted of set purpose to give their faith a great opportunity of triumphing; and so the solemn journey was undertaken. By the time of Christ's arrival, Lazarus had been in the grave four days; but a large number of Jews from the city was still with the sisters to comfort them in their mourning. First Martha and then Mary slipped away to converse with their beloved Friend.
whilst He was still outside the village. The Jews too followed, weeping. At sight of so much sorrow, in which He too shared profoundly, the Saviour wept; nevertheless He bade them take Him to the grave itself. On arrival there, in spite of Martha's scruples, the stone that closed the entrance was removed; and Jesus, after giving thanks to the Father, with a loud voice commanded Lazarus to come forth, and the dead obeyed His voice, bound though he was hand and foot with graveclothes. The effect of this wondrous act of power was to win or confirm the faith of many, but to repel others and increase their opposition. These latter being mainly from among the leaders of the nation, the event contributed not inconsiderably, in the Divine providence, to the subsequent arrest and trial of our Lord (see Jn.11.45ff.). St. John tells us that Lazarus was at Bethany during the last week of Christ's earthly life (12.1), and we hear of him no more (except twice in later Jewish legend: see MARTHA). As to the silence of the Synoptists on this miracle, it should be remembered, inter alia, (1) that St. John's definite purpose was to supplement their narratives, which do record two other raisings from the dead, and (2) that quite possibly Lazarus himself imposed restrictions till after his final decease on the wonder that had happened to him. [C.L.F.]

Lead, a common metal, is found generally in veins of rocks, very rarely in a metallic state, and most commonly combined with sulphur. It was early known to the ancients, and the Hebrews evidently were well acquainted with its uses. It was one of the materials employed, its usage for such a purpose being of great antiquity. The ancient Egyptians used it for fastening stones together in the rough parts of a building, and it was found by Mr. Layard among the ruins at Nimrud. In Job 19.24 the allusion is supposed to be to the practice of carving inscriptions upon stone, and pouring molten lead into (or perhaps painting with red lead; see WARRING) the cavities of the letters, to render them legible, and at the same time preserve them from the action of the air. Lead is also employed now for the purpose of purifying silver from other mineral products. The alloy is more readily worked with lead than upon an earthen vessel, and submitted to a blast of air. By this means the dross is consumed. This process is called the cupellation operation, with which the description in Ezk.22.18-22, in the opinion of Mr. Napier, accurately coincides.

Leaf, Leaves. The word (sing. or pl.) occurs in A.V. in three different senses: (1) LEAF of a tree (‘îlî, [reph. ‘ôphi]). The olive-leaf is mentioned in Gen.8.11. Fig-leaves formed the first covering of our parents in Eden. The barren fig-tree (Mt.21.19; Mk.11.13), on the road between Bethany and Jerusalem, "had on it nothing but leaves." [Fig.] The oak-leaf is mentioned in Is.1.30 and 8.7. The righteous are often compared to green leaves (e.g. Je.17.8). The ungodly are as "an oak whose fadeth" (Is.1.30). In Ezk.47.12, Rev.22.1, there is an allusion to some tree whose leaves were used by the Jews as a medicine or ointment. (2) LEAVES of doors (‘ôdî’em, deleth). The first Heb. word, which occurs very many times, and which in R.V. is "leaves" or "doors" in division, signifies beams, ribs, sides, etc. In Ezk.41.24, deleth represents both door and leaf. (3) LEAVES (d’lthôth) of a book or roll (Je.35.23) only: meaning columns. [Writing.]

Leah (perhaps from Assyr. li‘at, "mistress," or Arab. lawiya, "ugly"), the elder of Laban's daughters (Gen.30.16). "No woman was so fair and Rachel the younger and more beautiful of the two, but Leah seems also to have suffered from weak eyes (vakkhôth). Having served seven years for the former, Jacob received the elder sister in marriage, through fraud on the part of Laban, and, when at the end of a week he was to receive Rachel, he had already defined his affection to the latter. The historian regards Rachel's barrenness and Leah's fertility as a divine compensation for this state of affairs. By the elder sister Jacob became the father of Reuben, Simeon, Levi, Judah, Issachar, Zebulun, and Danah. She was buried at Machpelah. The descent of the tribe is divided into two distinct classes, arising from the double marriage of Jacob, was a constant traditional factor in the history of Israel. [B.F.S.]

Leasing, falsehood, Ps.4.2, 5.6; elsewhere in A.V., almost uniformly, "lies" (Ps.40,4), etc.

Leather. [Handicrafts, 7.]

Leaven (s’ôr). The Heb. root means "to be agitated." The fermentation which sets in when flour, mixed with water, is left to stand, is due to the presence of the microscopic yeast plant, which has the property of growing in solutions of sugar or of gluten. The "bubbles" or "gas" which result from the gluten being split up into alcohol and carbonic acid and gas "lighten" the substance, which thus becomes leaven. When a piece of this fermented dough is mixed with fresh flour and water, and baked, ordinary leavened bread results. The use of leaven was forbidden in every case in which bread was used in connexion with worship (Ex.23.18; Lev.26.19), with the one exception of the case of the two loaves referred to in Lev.23.17; but these were for the priests, and did not come upon the altar (see ver. 20). The shewbread was unleavened (cf. Josephus, 3 Ant. iii. 6), as were also the Passover cakes. Originally, all cereal offerings, as well as bread for ordinary use,
attains a height of 10,000 ft. at Jebel Samin, and is covered with snow on the upper ridges for the greater part of the year. It is bounded on the S. by the Litany River, flowing into the sea N. of Tyre; and on the N. by the Eleutherian, which springs from a basaltic basin dividing the Lebanon from Mount Barylus—and this broad valley is the "entering in to Hamath" (Num.34.8). The geological formation consists of sandstone, with hard limestone above; the former being only visible on the lower slopes to W. These are open to the sea breeze, and are covered with vineyards and pines. The E. slope, shut out from the moisture of the W. breezes, is very bare and rugged. The glory of Lebanon (Is.35.5), throughout history, has been its cedar forests; and these remain, not only in the well-known group S.E. of Tripoli, but in many other parts of the upper ridges rarely visited by travellers. Parallel with Lebanon proper, E. of the valley, of the crest is about 7,000 ft. above the Mediterranean, while the Anti-Lebanon averages only about 5,000 ft. The two Lebanons are noticed in 49 chapters of O.T., and in 30 of these in connexion with the Cedar. The passages referring to the Anti-Lebanon and to the valley of Lebanon are in Joshua (11.17,12.7,13.5) and in the Song of Songs (7.4), where the "tower of Lebanon" overtops Damascus. Lebanon was to be included in the land of Israel (Deut.1.7,3.29,11.24; Jos.14.4), but remained unconquered (13.5) till the victory of David over Damascus. Solomon possessed towns in Lebanon (1K.9.10; 2Chr.8.6). It had an Amorite and Hivite population (Judg. 3.5), but Zechariah includes it in the land of Israel (10.10) after the Captivity. The "smell of Lebanon" was that of its cedars (Can.4.11), and of its gardens of spice. Its streams (4.15) and its snow (Is.18.11) are mentioned, as also its wine (Hos.14.7), which is still very heady.
LEBAOTH

The Babylonians, and the Assyrians after 1400 B.C., raided the Lebanon [AMANA], and took its cedars to roof their temples, as did Nebuchadnezzar. These invaders followed the shore route [PHENICE] at the foot of Lebanon, but Nebuchadnezzar has left inscriptions not only at the Dog River, but also at Wady Brissa, on the E. side of the mountain W. of Riblah. [C.R.C.]

Lebaoth (Jos.15.32). [BETH-LEBAOTH.]

Lebbaeus. [JUDAS OF JAMES.]

Lebonah, a place named in Judg.21.19 only. It was N. of Shiloh. Now el Libban, a village immediately W. of the "high way that goeth up from Bethel to Shechem," 3 miles N.W. of Seilun. [C.R.C.]

Lechah', mentioned in the genealogies of Judah (1Chr.4.21) only as a descendant of Shelah. Perhaps it is a place-name.

Leeks. The Heb. hádrir, translated leeks in Num.11.5, occurs twenty times in the Heb. text. It properly denotes grass, and is derived from a root signifying "to be green"; and may therefore stand here for any green food, lettuce, endive, etc., as Ludolf and Maillet have conjectured. It would thus be equivalent to our use of the term "greens"; yet as the hádrir here is mentioned with onions and garlic, the rendering of A.V., agreeing, as it does, with the most ancient versions, is probably correct. Another very ingenious interpretation, however, of hádrir, first proposed by Hengstenberg, and accepted by Dr. Kitto (Pictor. Bible, Num.11.5), adopts a more literal translation for, says Dr. Kitto, "it is mentioned by travellers [in Egypt] that the common people there eat with special relish a kind of grass similar to clover." This is the Trigonella foenum graecum, belonging to the natural order Leguminosae, a plant similar to clover, but with more pointed leaves (Mayer). The botanical name of the leek is Allium porrum, order Liliaceae. With regard to Egyptian leeks (Num.11.5), Pliny says: "The principal leekes be in Aegypt: the next are those of Orta and Arcicia" (xix. 6, Holland's trans.).

Lees. The Heb. word (sh'márim) is used only seven times in the Bible, of "tawny-coloured." It was applied to "lees" from the custom of allowing the wine to stand on the lees, that its colour and body might be better preserved. Hence the expression "wine on the lees," as meaning a generous full-bodied liquor (Is.25.6). Before the wine was consumed, it was necessary to strain it, and such wine was then termed "well refined" (Is.25.6). To drink the lees, or "dregs," was an expression for the endurance of extreme punishment (Ps.75.5).

Legion, the great unit of a Roman army, nominally of 6,000 men—our "brigade." In N.T. only figuratively of vast and irresistible numbers (Mark 5:8; Rev. 17:14).

Lehabim, son of Mizraim (Gen.10.13), the Libu of the Egyptian inscriptions, the Libyans of classical geography. They were a fair-skinned people with light hair and blue eyes who inhabited the N. coast of Africa W. of Egypt. [LUBIM.]

Lehi (= jaw, Judg.15.9,14,19). [RAMATH-LEHIL.]

Lemuel', the name of an unknown king to whom his mother addressed the prudential maxims contained in Pr.31.2-9. Rabbinical commentators identify Lemuel with Solomon; most modern writers (see 30.1, R.V. marg.) regard him as 'king of Massa,' in Arabia, and refer to Gen.25.14. [AUR.]

Lentiles (Heb. 'adháshim; Gen.25.34; 2Sam.17.28,23.11; and Ezek.4.9). There are three or four kinds of lentils grown in the S. of Europe, Asia, and N. Africa. The red lentil is still a favourite food in the E. It is a small kind, the seeds of which, after being decorticated, are commonly sold in the bazaars of India. The modern Arab. name is identical with the Heb. It is known also in Egypt.

LEOPARD

Syria, etc., by the name 'Adas. Lentil bread is still eaten by the poor of Egypt. Pliny mentions pottage of lentils, as in Gen.25.34. He says, "They that have but weak and bad stomaches, use verily to put lentiles to thicken their pottage and gruels, instead of barley groats, and find thereby much ease." (xxii. 25). Lentils were cultivated in very ancient times, but their original home is unknown, as are also the meanings of the Gk. and Lat. names phacol and lens. [SHAMMAH, 3]. [H.C.B.]

Leopard is the A.V. translation of the Heb ná'mér, which occurs in Can.4.5; Is.11.6; Je 5.6,13.23; Dan.7.6; Ho.13.7; Hab.1.8. Leopard occurs also in Ecliss.23.23 and in Rev.13.2. That ná'mér, which (like the Indian word chita) means spotted, is identical with the Arab. nimir (cheetah) can scarcely be doubted. The leopard is still to be met with in the Lebanon, Gilead, and the Jordan Valley, and ranges from Africa through Asia Minor and Persia to India and Central Asia; the Persian, and probably Syrian, race being a rather long-haired variety known as Felis pardus panthera. It is probable, however, that that ná'mér, like the Indian chita, includes the hunting-leopard (Cynotardus) which is a distinct species, with nearly as wide a range as the leopard. It is still used by Arabs in Syria for gazelle-hunting.
Its black spots are solid, instead of forming rosettes, like those of the leopard. [R.L.]

**LEPROSY** (*Elephantiasis graecorum, Lepra arabanum*). The Heb. word *civ'ath*, translated by the Gk. *μυρων* and in A.V. by *leprosy*, refers in every instance, except where it is applied to garments and habitations, to one or other of the various types of the disease called in medieaval and modern times leprosy. The erroneous use of the Latin *lepra* by some ancient writers, who included under that term not only the disease now known as true leprosy but also some other skin diseases having no relationship to true leprosy, has led to some confusion and misconception. There is no attempt in Holy Scripture to give a minute or exhaustive description of the disease, but in Lev 13:14 there are set down for the guidance of the priests and the people a number of easily observed signs by which leprosy in its early stages can be distinguished from other diseases more or less like it in appearance. The fact that disease is not uncommon and the horrible and repugnant lesions commonly associated with leprosy has led to the erroneous belief that the disease here spoken of as leprosy is not the same as is now known under that name. It must be remembered that the aim was to segregate the leper in the earliest stages, long before the grosser lesions had developed. There was then, and still is, some difficulty in diagnosing early leprosy, but scarcely any when the disease has become advanced; so that it was quite unnecessary to give signs by which the leper in an advanced stage of the disease could be recognized, and so throughout the Levitical description only the early signs are referred to, and these are placed in contrast with the signs of other diseases prevalent amongst the Israelites, but which, being of a non-contagious character, did not require the segregation or isolation of the victim. There is not yet unanimity of opinion as to how the disease is spread. In modern times this has been attributed to direct contact, inoculation, bad food, heredity, bad sanitation and hygienic surroundings, and to the action of such body-parasites as bugs, fleas, orlice carrying the germs of the disease from the sick to the sound. Probably a combination of several of these may be necessary for an effective transmission of the disease.

In this connexion it is interesting to note the lamentable state of misery to which the Israelites were reduced during their period of bondage to the Egyptians. This is fully portrayed in the early chapters of Exodus. So profline had they been that in number they exceeded the Egyptians themselves (1:7-9). That they were badly fed and their habitations overcrowded and unsanitary may be taken as certain, and the flies and lice (R.V. *fleas*) spoken of as amongst the plagues are significant in the light of modern theories. Nothing is revealed as to whether the disease prevailed amongst the Israelites while they were in Egypt, but the fact that they had been so profline would tend to the belief that it was not very prevalent, as it is generally believed that lepers do not propagate the species. It seems more probable that they became infected by the leprous germs while still in Egypt, and the incubation being notably long, the disease became prevalent amongst them during their wilderness journey, when the powers of resistance of their bodies had become still further weakened by the hardships endured. That the disease became prevalent amongst them is proved by the importance given to leprosy in the ritual as given in Lev 13, 14. The chief signs by which the priest was to suspect or recognize leprosy were: a bright spot or rising in the skin, the *macula* of modern terminology; the hair on this spot turned white, the lesion being deeper than the skin, that is to say, not merely superficial. The spot might have a scaly or roughened appearance, and tended to spread. These signs are all in keeping with what is observed in the earlier stages of the disease at the present time. At a later stage, though still early, stage, the bright spot becomes paler, and is described as a white rising (13:10) and in reality it becomes paler than the surrounding skin. This whiteness is still more apparent from the fact that leprosy is enigmatic to the naked eye; for when the skin does, so dust and dirt do not adhere to it. In tropical countries people, like muleteers, who are accustomed to travel over dusty roads with the naked skin exposed to the heat and dust, frequently observe these white spots on their bodies as the first sign of leprosy. At a later stage, still the skin over the white rising breaks down and an ulcer is formed. This was strong evidence for the priest as to the true leprous nature of the disease. There was no need for isolation for observation (ver. 11); he was to be put away at once as unclean. As the disease progresses fresh bright spots appear, the older ones passing on to the whitened and ulcerating stages. So that it is not usual to find a leper covered all over with the whitened spots alone. A condition of the skin known as vitiligo or leucoderma is that which most simulates the whitened spots in leprosy. This condition is much feared in countries where leprosy is endemic, and is often considered a form of that disease. It is, however, entirely distinct from it. In vitiligo the white patches which are at first discrete, coalesce and frequently become so extensive as to involve by far the greater part of the skin. The newest and the oldest patches have lesions which are almost identical, and are no swelling, ulceration, or scabbing. The skin remains, in appearance and functionally, normal except for the disappearance of the pigment. When the priest satisfied himself that the whiteness was becoming generalized over the whole body, he pronounced the man clean, and no isolation or ceremonial cleansing was required (ver. 13). Though leprosy is rightly considered an almost incurable disease, yet it does, though very rarely, become completely cured. The sores heal up and remain soundly healed, the person ultimately dying from some other cause. This is what is referred to in Lev 16 and 17. Amongst the causes of the spread of leprosy inoculation was mentioned. That the germ of leprosy can be inoculated is generally believed, and cases have been recorded where a simple sore or ulcer was most probably the portal of entrance. The sore heals up, but at a later stage, that is, when the leprous being usually very prolonged, even to months or years) signs of leprosy appear in the old
LEPROSY

scar. This is what is referred to in vv. 18-23. In certain forms of acute leprous infection the early local manifestations are of a more intense nature as regards the redness, sense of burning pain, rapidity of spreading, and of breaking down into ulcers. In ver. 24 we have this condition referred to and the signs by which it is to be distinguished from such conditions as acute erythema or erysipelas. Baldness, either general or in patches, or that produced, as we now know, by parasitic diseases, was to be distinguished from the loss of hair that is one of the characteristics of true leprosy. The indications for this are given in vv. 29-37. From the remainder of ch. 13 and the latter part of ch. 14, where the leprous of garments and habitations is referred to, it is evident that the Heb. word translated 'leprous' had a wider signification than it has now. There is no evidence to show conclusively what was the nature of the leprous of garments and habitations, but it seems certain that either a fungus or other parasite attacked these things and led to their destruction in a manner somewhat analogous to the destruction wrought by true leprosy in man. The "dry rot" may be something akin to this, as it also requires to be dealt with in a very radical way to prevent spreading and destroy its effectual extirpation. From what has been said there can be no doubt that a careful study of these chapters must lead to the conclusion that the leprous of the time of Moses was essentially the same disease as the leprosy of to-day, and the fact that reference is made only to the earlier signs of the disease means that we have to prove that leprosy in its earlier forms did not exist. Perhaps the most significant sign of early leprosy that is not clearly referred to is the loss of sensation in the skin of the affected area. It is difficult to account for this, but it is to be remembered that, amongst the class of people most prone to leprous infection, the loss of sensation in consequence is not observable in the early stages until their attention is called to it. Objective signs are much more easily observed and given greater significance than those that are subjective. In the case of Uzziah (2Chr.26.19-21) we have a clear reference to a well-known type of leprosy in one of his favourite seats, namely, the forehead. Just above the eyebrows a number of reddish nodules appear, and proclaim to others the secret which the leper may have kept for a long time by the help of his garments which covered the affected parts. As in the case of Uzziah, any great excitement or violent exertion intensifies the redness and makes the nodules more apparent. In none of the other cases of leprosy mentioned in O. or N.T. is there a sign or symptom characteristic of leprosy mentioned. In the miraculous sign given by the Lord to Moses (Ex.4.6,7) it is not distinctly stated whether true leprosy is referred to or whether it was a condition simulating in an exaggerated degree—"white as snow"—the whitened patches of true leprosy. To those who have seen the terrible mutilations and disfigurements wrought by leprosy and the horrible conditions in which lepers mostly exist, there is a peculiar aptness in the use commonly made of leprosy as a type of sin. The ceremonial cleansing of the leper (Lev.14) was in no sense part of the treatment of the leper. It was when the leper thought himself healed that he showed himself to the priest. The priest, guided by the rules laid down in ch. 13, pronounced him healed or not as the case might be. If he was found to have been healed, then the prescribed ceremonial had to be gone through before he could be received back into the camp. In this ceremonial cleansing, the shedding of blood plays the important part, thus typifying the shedding of the blood of Christ for the cleansing of the sinner (Heb.9.22ff.). [MEDICINE; UNCLEANNESS.] [W.L.S.]

Le'shem, a variation of the name Laish, afterwards Elishah (19.17 only).

Letter. [Writing; Epistle.]

Let'tus (1Esdr.8.29) = Hattush, i.

Letu'shim, the name of the second of the sons of Dedan, Gen.25.3 (and 1Chr.1.32, Vulg.). Fresnel identifies it with Tasm, one of the ancient and extinct tribes of Arabia.

Leum'mim', (plur. form) descendants of Abraham and Keturah through Dedan, son of Jokshan (Gen.25.3). A similar name has been found in a Sabean inscription. In Heb. the word would mean peoples, and not be necessarily a proper name at all. [F.J.F.-J.]

Levi, explained in Gen.29.31 as if fromライブ, "to be burdened," "a burden."—1.

The third son of Jacob by Leah. The newborn child was to be a fresh link between his parents. Levi appears prominently only in 34, as avenging, with Simeon, the wrong done by Shechem to their own sister Dinah. It is noteworthy that Simeon, Levi's partner in this, as in Jacob's blessing (48.5), is a prominent agent in the plots against Joseph. Levi goes down to Egypt (46.8,11), with his sons Gershon, Kohath, and Merari. [Levites. —2, 3. Two ancestors of Christ(Lu.3.24,29).—4. Mk.2.14; Lu.5.27,29. [MATTHEW.]

[1, A.D.]

Levi'athan ( levyâthân) occurs in four passages of A.V. (Job 41.1; Ps.74.14,104.26; Is. 27.1), and only once (Job 11.3) in the margin of the O.T. The text has "mournings." In Job 3.8 the crocodile is clearly denoted, while the detailed description in Job 41 indisputably belongs to the tinsa, or Egyptian crocodile (Crocodilus niloticus), which is found in the Crocodile

River S.W. of Carmel, as well as in Egypt, and is the animal denoted by Leviathan in Ps.74.14. On the other hand, the context of Ps.104.26 seems to show that here the name represents a member of the whale tribe [Whale]
LEVIATE, THE

474

LEVIRATE LAW

but there has been some uncertainty with regard to the leviathan of Is.27.1, and it has been suggested that it is one of the African rock-snakes, or pythons, such as Python sebae, which, although now restricted to Central and South Africa, is represented on the Egyptian monuments. Certainly such a creature suits the expression "crooked" or "piercing serpent" much better than does the crocodile; but the fact that no python is found in Syria may be urged against this. Possibly pythons may have inhabited the Tigris and Euphrates in Biblical times; and the word tannin, translated in A.V. "dragon," certainly seems to refer in some cases to these reptiles, especially as typifying the power of Egypt. [DRAGON.] [R.L.]

Levirate law (Lat. Levir, "brother-in-law"). Under this name is commonly known the regulation of Deut.25.5. If brethren dwell together, and one of them die, and have no child, the surviving brother shall not marry without unto a stranger: her husband's brother shall go in unto her, and take her to wife, and perform the duty of a husband's brother unto her. Under any other circumstances the marriage of a man with his brother's wife was strictly barred: "The brother's wife shall not uncover the nakedness of her brother's wife: it is thy brother's nakedness" (Lev.18.16). The bar is thus stated to be the natural bar of near affinity. A definite penalty is assigned or foretold in the event of disobedience—"they shall be childless" (20.21). It appears therefore that the leviirate law sanctions the union of a brother's wife to his brother in law, but with the restriction that is based upon the law of nature, and is ordinarily protected by penalty. It further appears that the custom was not introduced by the legislation of Deuteronomy. In the case of Tamar (Gen.38), the wife of Er, the custom required Onan, as the next brother, to raise up seed to Er, although he was not to marry his brother's widow. Hence, it is clear that the seed should not be his. After the death of Onan, which is stated to have been the result of the divine displeasure, Judah told Tamar to remain a widow at her father's house till Shelah, his next son, should be grown. The narrative then states that the levirate union was not observed, as the dead man's brother's sons all died, and apparently as more binding at the earlier than at the later period. The law of Deuteronomy permits the brother or next-of-kin to decline the union in the presence of judges if he is prepared to go through the ordeal (1) of being spit upon, (2) of having his shoes loosened by the widower, and also (3) of being named in Israel the "unshod" (Deut. 25.5,16). Grave as the resulting disgrace would be, it was still not so grave but that a person who was strongly indisposed to effect the union would dare to encounter it. In the case of Tamar it does not appear that Onan had any right at all to decline the union, and it seems to be implied that when Onan was dead, Judah was bound to raise up seed to Er, not by Shelah, then in his own person. It appears then that the law of Deuteronomy modifies and relaxes an obligation which had been stricter at all to decline the union, and it seems to be implied that when Onan was dead, Judah was bound to raise up seed to Er, not by Shelah, then in his own person. It appears then that the law of Deuteronomy modifies and relaxes an obligation which had been stricter at all to decline the union, and it seems to be implied that when Onan was dead, Judah was bound to raise up seed to Er, not by Shelah, then in his own person. The proper understanding of the levirate law it is necessary to notice that the custom has prevailed widely outside the Hebrew limits. In the laws of Manu, the great legal code of ancient India, we find the custom at much the same stage as in the Pentateuch. The obligation of taking the widow of a deceased brother is laid down; but, as among the Hebrews, only where the deceased has left no son. The object is stated to be the raising up of issue to the deceased brother. The custom of the levirate is said to exist in the present day amongst the South African tribes, amongst the Arabs, amongst the Druses, and amongst the tribes of the Caucasus. So widespread a custom points to some cause of general application. That cause may not necessarily be the raising up of issue to the deceased. Some writers find the origin of the custom in the practice of polyandry, once widely spread. In the more limited form of polyandry as practised, e.g., in Ladak, the brothers of a family have one wife among them; Onan, who had no son, married the widow of his brother, and his property, authority, and widow devolve upon his next brother. Here there is not yet any purpose of raising issue to the deceased. Mr. Herbert Spencer, denying the polyandry theory, regarded the custom as a form of the inheritance of chattels. What are the circumstances under which the custom, certain things are clear. (1) The custom involves a union of near kin, which under other circumstances is regarded as inherently sinful; (2) it was not originated by the legislation of Deuteronomy, but was in force centuries before that legislation; (3) it was not confined to the tribes of Judah; it was practised in various other countries, often under circumstances pointing to great moral laxity; (4) it was at no time permitted to the Hebrews, except for the continuance of families; (5) its compulsory character is taken away by the code of Deuteronomy, which simply visits non-compliance with the penalty of a marked discredit. It is reasonable to infer that the levirate custom, like polygamy and divorce, was a custom not devoid of a sinful character, but suffered awhile in a fallen race for the hardness of men's hearts, and that the legislation of Deuteronomy was in the direct interest of excluding a threat of social and moral corruption. [FAMILY; GOEL.] Redloh, Die Leviratleche bei den Hebräern (1836); J. F. McLennan, Primitive Marriage, also art. "The Levirate and Polyandry" in Forbinn. Rev. Soc., 1877, p. 604; H. Spencer, Principles of Sociology (1885). §302; Watkins, Holy Matrimony (1895).

Levis', a corruption of "the Levite" (see Ezr.10.15), given as a proper name in 1 Esd.9.14.

Levites, The, appear first as one of the twelve tribes, and then as a special priestly tribe in Israel; and it is not very clear how the transition from a merely tribal to an official status took place. It would appear from Gen.34 that, in conjunction with the kindred tribe or family of Simeon (for ver. 28f., 30, show that we have here to deal not with mere individuals), they committed an act of treachery and cruelty on the people of Shechem, in which the other tribes did not participate (but which was by no means universally reproved). In consequence of this they were so seriously diminished in numbers that they failed to obtain a territorial possession,
like the other tribes, Simeon alone receiving a portion in the tribe of Judah, while Levi was dispersed throughout the land (Gen. 49.5-7). At the early occupation of Canaan, neither Simeon nor Levi is mentioned among the fighting tribes in the song of Deborah (Judg. 5), and we find the Levites already regarded as a priestly class (Judg.17.18); so that we naturally look to the time of the sojourn in Egypt (see 1Sam.2.27f.) or the wilderness period for the transition to this dignity. It is to be noted that Moses himself was of the tribe of Levi, and Aaron his brother is in Ex. 4.14 called "the Levite," showing the beginning of an official name. It is reasonable to suppose that in the struggle with Egypt which preceded the Exodus his own tribe would rally round the national leader, and that in arranging for the worship of the people, Moses should select his own tribe for the performance of religious duties. On the occasion of the sin of the golden calf, when Moses said, "Who is on the Lord's side?" we read that "all the sons of Levi gathered themselves together unto him. And he said unto them,. . . Put every man his sword upon his thigh and go to and fro from gate to gate through all the camp throughout the camp, every man his brother, and every man his companion, and every man his neighbour. And the sons of Levi did according to the word of Moses" (Ex.32.26-28). To this very probably reference is made in the blessing of Moses on the tribe who said of his father and of his mother, I have not seen thee face to face (Deut.33.9), acknowledging his brethren nor knew he his own children" (Deut.33:9). The separation of Levi to be a priestly tribe is thus ascribed to Moses, and the duties of the tribe are briefly stated in the passage last quoted—to consult the Lord by Urim and Thummim, to teach the people the law, and to offer incense and burnt-offering on the Lord's altar. The picture which is presented of the Levites immediately after the occupation of Canaan is characteristic of that rude and unsettled age. They seem to have no fixed territory (Judg. 17.9), though probably many of them were sojourners in Judah (17.19); and although the instructions to the tribes include the duties of the Levites (17.10-13, 18.18-20) and to take charge of a local sanctuary (17.18, 18.10-13, 18.18-20) and to consult the deity by means of the lot (18.5). Although, according to the old patriarchal practice, the head of a family or other layman might offer sacrifice as occasion required, where there was a sanctuary it was considered desirable to have a Levite for a priest (17.13), and no doubt many of the Levites became priests of those places which the Israelites adopted on their possession of the land. Yet we are not to forgot that at the sanctuary of Shiloh there was a hereditary priesthood and the observance of a formal ritual (1Sam.1.1-3 etc.). But, however, till the erection of the temple would there be full opportunity for the Levites to exercise their functions in an organized and systematic manner. What these functions were we learn from the priestly legislation of the Pentateuch, in which their ideal position and appointment are described at length. In connection to enter into matters of ritual—they are not inconsistent with such service; nor leave room for supposing it to exist. Deuteronomy, which contemplates the worship of a
LEVITES, THE

central sanctuary. “is far from giving a complete picture of the existing priestly relations or of those to be established” (Baudissin), and we cannot with certainty fill up the gaps left in its arrangements. It seems to make no distinction between priests and Levites, in speaking constantly of “the priests the Levites,” a natural enough expression in a code which is not a priestly handbook, but though every priest is a Levite, it does not follow that every Levite is a priest. And it is not correct to say that Deuteronomy knows no priests but those officiating at the central sanctuary; for it provides (Deut. 21.5) that priests are to take part in the atoning ceremony for a member committed in any of the cities of Israel, and the treatment of leprosy is put into their hands (24.8). So “a priest” or “the priest” is mentioned (10.6, 17, 12, 26, 28) in such a way as to imply special distinction. On the other hand, the Levite is repeatedly mentioned as an object of special charity (12,12, 18, 14, 27, 29, 16, 14, 26, 11, 12). And so on it is evident that the Levites came from any part of the country and desire to take his share of the service of the sanctuary, he is to be treated like his brethren, this does not necessarily mean that every Levite is a priest; it may simply mean that he is to take the status, whether of priest or Levite, that befits the man better. This, the account of Josiah’s reformation given in 2K. 22.23, there is no mention of Levites, though the idiosyncratic priests (κρανίμαν, 23.5) and the priests of the high-places are mentioned (23.5, 9, 20). On the other hand, Ezekiel, living in the exile, when he sets himself to draw out a scheme for the worship of the future temple shows, as might be expected from a priest-prophet, a familiarity with the various details of the ritual of the pre-Exilian temple (Ezk. 42.13, 44.29-31, 45.17, 46.20), and knows also the distinction of priests and Levites (40.10, 44.10-16, 45.4, 5). Although Ezekiel strictly confines the priest- hierarchy of the family of the priests proper, i.e. the line of the high-priesthood had been vested since the time of Solomon, and degrades the “Levotes that are gone away from Me, when Israel went astray... after their idols” (44.16), i.e. those who had acted as priests at the high-places, making them for the future “keepers of the charge of the house” (44.14), “his language,” says Baudissin, “by no means excludes or even renders improbable the supposition that in the pre-Exilian temple there were other Levites besides these, or that there were besides the foreign temple-servants, other temple-servants, not called Levites, or priests of the second rank set by the side with the priests proper, i.e. the Zadokites.” Ezekiel’s whole manner of treatment of the ritual service suggests, not that he is exegogitating something entirely new, but that he is intent on reorganizing and improving what had already existed. And we require, in fact, to postulate a very considerable development and organization in the Levitical tribe before the Exile, in order to account for the condition of things which confronts us at the Return. For, when Ezra and Nehemiah set about the arrangement of the new temple service, we find not only Levites sharply distinguished from priests (Ezr. 8.2, 15-18; Ne. 7. 29, 14, 11, 10, 15), but other grades of temple-officials (Ezr. 10.23, 24; cf. Ne. 7. 53) exercising functions which they do not elsewhere learn for the first time in the Exile, and suggesting a considerable activity and development in the pre-Exilian period. It is very remarkable that in the Pentateuch there is no prescription or mention of musical service, which is so conspicuous a part of the ritual of the second temple (Ezr. 7.7; Ne. 7.44). On the other hand, the “keepers of the thresholds,” officials of the pre-Exilian time (2K. 12.9, 22.4), are not mentioned in the second temple. It is noticeable that, though the books of Ezra and Nehemiah show that the distinction between priests and Levites was well known, the book of Malachi, which belongs to the period of the Return, makes no such distinction (Mal. 2.1.4, 8) although by that time the distinction was well marked. From all this it is reasonable to conclude that a distinction and gradation had existed all along. The whole Levitical tribe would rise or fall in estimation and importance according as they were observed to greater or less purity under the different kings. The specific distinctions between priests and Levites were of greater concern to these officials themselves than to the ordinary state historians or to the mass of the people; and we learn incidentally (Ne. 7.64) how punctilious they were as to the performance of their genealogies. But after the Restoration, when the glory of the monarchy had departed, the temple, round which gathered the national hopes, obtained, even for the mass of the people, an interest and pre-eminence it had not possessed before. Accordingly the Chronicler, writing at a time when the organized worship of the second temple was in operation, and living in an atmosphere of priestly tradition, in his account of the pre-Exilian times gives to the inner ritual arrangements of the temple a prominence which they do not obtain in the other historians of those times. He proceeds on the assumption that everyone who was able to go, in whom the high-priesthood had been vested since the time of David (1Chr. 15.28ff.); he states the details of their duties (1Chr. 23.24-32), and mentions with honour their services in the interest of the religion at various periods under the reforming or better-minded kings (2Chr. 10.19, 12.19, 8.10-12; 23.4ff; 29.12-15; 30.22ff). There is no doubt in so doing he unconsciously and unavoidably allowed his accounts of past time to be coloured by his familiarity with things as they existed in his own day; but this is a very different thing from inventing or re-creating past conditions which never existed, and we have sufficient indication that the author of these books had access to sources of information which the other historical writers either did not possess or did not think it within their province to employ. So long as the temple stood, the Levites would exercise their functions. They are only incidentally mentioned in N. T. (1Th. 5.12; Jud. 1.19; Rev. 4.36). And there is a sad interest in the fact recorded by Josephus (20 Ant. ix. 6) that when the temple had received its final completion under Agrippa II., the Levitical singers applied for and received the privilege of wearing the same linen dress as the priests (cf. 3Chr. 5.12). For, very soon after, the war with the Romans broke

LEVITES, THE
out, and with the destruction of the temple the special standing of the Levites came to an end, they became merged in the scattered tribes, and as a class disappear from history. [DEUTERONOMY; CRIMES; FIRSTBORN; JUDGE; POOK; PRIEST IN O.T.] A. Van Hoonacker, *Le Sacerdoce Levitique dans la loi et dans l'Histoire des Hébreux* (1899); Graf v. Baudissin, art. "Priests and Levites," in Hastings, D.B. (5 vols. 1904).

**Leviticus**, the third book of the law. In the Heb. Bible it bears the name *wayyiqra*. "And he called," from its opening word. Its Gk. name, "Leviticus," suitably describes its character, as being throughout a collection of sacrificial and ritual laws. On the critical theory [PENATEUCH] the book belongs wholly to the document P, though a special section of it (17-25) presents features of its own. It is thought to have originally subsisted as a code by itself. This is known in critical nomenclature as the Law of Holiness." The contents of the book are divided as follows: (1) laws relating to persons and things, Ch. 1-7 lay down the fundamental laws of sacrifices and offerings. The animal sacrifices are the burnt-offering, the peace-offering, the sin-offering, and the trespass-offering (a species of sin-offering, accompanied by a money compensation for wrong done, 5.15). Of a bloodless (or offering) character are the meal-offerings (Lev. 2). The laws for the sacrifices and offerings are addressed partly to the people (1-6, 7, 22-38), and partly to the priests (6, 8-7.21).

(2) Ch. 8-10 narrate the consecration of Aaron and his sons, in accordance with the directions in Ex. 28, 29, and (in connexion therewith) the punishment of Nadab and Abihu for offering strange fire before the Lord. This leads to a law forbidding priests to drink wine while officiating (Lev. 10.8, 9), and to other regulations. (3) Ch. 11-15 are a series of important laws relating to uncleanness and purification. Ch. 11 gives the laws of clean and unclean in animal food [cf. Deut. 1.1-20], and respecting pollution contracted from contact with lepers; Lev. 12 has to do with purification after childbirth; 13, 14 are concerned with leprosy; and 15 relates to natural secretions. (4) Ch. 16 deserves a place by itself, as detailing the solemn ritual of the annual day of atonement. (5) Ch. 17-26 form, as indicated above, the collection of laws known as "the Law of Holiness" — a code of great importance, summarizing fundamental laws. Its key-note is the demand for holiness (19.2, 20.7-8, 26.21-6, 815, 13, 22-9, 16, 32), and it is further marked by its recurring formula, I am Jehovah your God." (nearly 50 times), and its references to deliverance by the blood of the covenant (22.13, 23.43, 25.3, 55.26.45). The closing ch. (26) is hortatory, with a certain Deuteronomic elevation in style. This remarkable portion of Leviticus emphasizes in ch. 17 the offering of sacrifices only at the door of the tabernacle, and prohibits the eating of blood; deals in 18 with unlawful marriages and unchastity; in 19 brings together miscellaneous precepts bearing on moral and religious life; in 20 recites the penalties for serious offences (giving children to Moloch, resorting to wizards, cursing father and mother, adultery, etc.); in 21, 22 gives laws to priests; in 23 regulates the feasts; in 24 deals with the lamps and shewbread of the tabernacle, and with blasphemy (incident of the blasphemer, vv. 10-14); in 25 legislates for the sabbatical year and year of jubilee; in 26 concludes with an eloquent exhortation; 27 being an appendix on vows. This code, in fact, may justly be called the quintessence of the Levitical law. We find in it the Aaronic priesthood, the high-priest, sin- and trespass-offerings, the day of atonement, the three historical feasts, the sabbatical year, the year of jubilee, the Levitical cities, etc. As it is undoubtedly of high antiquity (see below), the importance of its testimony to the above laws and institutions cannot be over-estimated. [LAW TO O.T.]

It is claimed to be one of the "settled results" of the modern critical school that the Levitical legislation—at least in its written and codified form, and largely also in substance—is of post-Exilian date. Leviticus, therefore, is brought down to this period. This is opposed (i) by the explicit testimony of the book itself, which uniformly attributes its authorship to Moses (Deut. 31.9, 25, 28.46, 27.34). (ii) To the character of the legislation, which bears on it, from its first page to its last, the stamp of the wilderness, and contains not a single glance at post-Exilic conditions. Bleek justly said long ago: "When we meet with laws which refer in their whole purport to sacrifices, and are unknown in the period subsequent to Moses, and to circumstances existing in the Mosaic age (and in that only), it is in the highest degree likely that these laws, not only in their essential purport proceeded from Moses, but also that they were written down by Moses, or at least in the Mosaic age." (iii) To the circumstances of the post-Exilian community, which, as shown elsewhere [PENATEUCH], made the palming off of such a body of laws upon the returned exiles a moral and historical impossibility. The argument for the post-Exilian origin of the law, based on the silence of preceding history, is now generally coupled with the admission that a large part of the latter was de facto previously in operation, though it was not written, and a divine character was not ascribed to it. There was practice, but not law. It needs little perspicacity to see that this line of argument is essentially inconsistent. Where is the evidence that the practice ever existed of things utterly unknown? And if the silence is compatible with practice, which is the thing that obstructs itself in history, it necessarily must be compatible with the law regulating the practice. In fact, however, the silence is neither so great as is alleged nor is the evidence of law wanting. Of weighty import here is the admission of the "Law of Holiness" as above sketched. That code was unquestionably prior to Ezekiel (the subfuge of an "imitation" of Ezekiel may be dismissed), whose chapters are saturated with allusions to it. It has been seen that it covers a large part of the Levitical legislation, and many of the most distinctive Mosaic institutions. Many of its laws are very old, and it is (on the face of it) itself an abstract—an epitome of laws which presumably existed in a fuller form. It claims for itself Mosaic origin and authority. The same is true of the book of Deuteronomy. This is a work of prophetic spirit, but embodies allusions to
many priestly ordinances. Such is the repetition of the law of clean and unclean animals in Deut. 14:1-20 (cf. Lev. 11). Such are the allusions in Deuteronomy to laws of ceremonial impurity (23:10, 11), to laws of leprosy (24:8), to eating of blood (12:16; 23:25), to laws of incest (22:30), to provision for Levites (18:1, 2; cf. Num. 18:20 ff.), etc. The consensus of scholars, till the rise of the Grai school, was that the Levitical legislation was indubitably implied in Deuteronomy. A peculiarly striking instance of an ancient law is that in Lev. 17:14, ordaining that all sacrifices were to be offered at the door of the tabernacle—this from the motive of preventing sacrifice being offered to "devils" in "the open field" (19:5, 7). This law was obviously inapplicable after the settlement in Canaan, and Deuteronomy (accordingly) provides for a modification of it (12:15, 20). Generally, Deuteronomy presupposes the older Levitical laws, while Leviticus cannot be shown in any degree to presuppose Deuteronomy. One point sometimes adduced to prove the opposite is the less differentiated state of the priestly class in Deuteronomy as compared with the Levitical. In Deuteronomy, it is said, lays stress on the distinction of "priests and Levites," Deuteronomy speaks broadly of "the priests the Levites," and apparently knows no separate order of Levites. This is examined elsewhere [Deuteronomy]. Meanwhile it should be noted as an indication that in Leviticus, as in Deuteronomy, the priestly book par excellence—there is, with the solitary exception of 25:32, 33, no mention of the Levites. It has already been stated that in Leviticus, the whole book is ascribed by the critics to P, though (in their analysis) a P' (Law of Holiness) and a P", sometimes even a P" and P"', are distinguished. No occasion arises for introducing a J, or E, or D. All the more singular and instructive is the fact that, in ch. 26, this admitted priestly writer is found rising to something like a Deuteronomistic elevation of hortatory and admonitory eloquence (cf. Deut. 28). Is the moral of this that the Deuteronomic elevation in Leviticus is Deuteronomistic? Or is it that various styles can be used by the same writer? That the "Habovistic-Deuteronomistic" style which Delitzsch attributes to Moses can become, on occasion, priestly? And that the priestly style can become, on occasion, Deuteronomistic? If so, then the difficulty is less great of seeing even the direct hand of Moses in the drafting of the priestly laws. Undue stress, however, need not be laid on this, for the Mosaic origin is essentially affected whether Moses wrote out the laws with his own pen, or others did it for, or after, him. The place of Levitizens in the economy of redemption is one not to be slightly regarded. Its value, indeed, to most right-thinking people, would disappear, if it could be proved to be, as some regard it, a post-Exilian fabrication passed off on Ezra's generation in the name of Moses, and representing a legalistic decadence from the spiritual teaching of the prophets. As belonging to an earlier and more elementary stage of religious thought, it has a very different significance. Its symbolical and typical value, as depicted in the epistle to the Hebrews, is restored. It resumes its character as a system of divine appointment in which great spiritual ideas, and "good things" of a future and better dispensation, are adumbrated. The main design of the laws is to impress on the mind of the worshiper of holiness how deep within him the consciousness of sin; to provide a means by which, after his sin, his fellowship with God can be restored; to familiarize him with the thought and need of atonement, while yet reminding him, by the very nature of the system under which he is placed, that the way into the holiest of all is not yet manifest (Heb. 9:8). This is the lesson drawn by the writer to the Hebrews. The law was "a shadow of good things to come," but not "the very image of the things" (10:1). The sacrifices were a reminder that without shedding of blood there was no remission (9:22); yet their very multiplicity and repetition, the manifest inadequacy of the blood of bulls and goats to take away sin, the sinfulness of the priestly offerers, and the fact that there was only the most limited access to the holiest place (once a year, by the high-priest only, even then after sacrifice offered for himself), showed that the ancient order of worship, with its symbolic sacrifices, is not the last word of the worshippers perfect (9:10). Jesus, perfect Priest and perfect Sacrifice, brings that something in His once offering of Himself, and His passing into the heavens as our ever-living Intercessor. The law has no longer any glory by reason of the glory that excelleth (2 Cor. 3:10). Leviticus, in Scripture, is the "Plan of Israel," or "Sacrifice," Typology of Scripture. See also PENTATEUCH. [J.O.]

Libanus, Gk. form of APOC. OF LEBANON.

Libation. [SACRIFICE.]

Libertines. These are mentioned (Ac. 6:10) as members of a synagogue at Jerusalem, and opponents of St. Stephen, with men of "Cyrene and Alexandria, and Cilicia and Asia." It is uncertain from St. Luke's language how many synagogues are referred to, one (Hort), two (Sanday, Wendt, etc.), three (Page), or five (Schurer). The Gk., if pressed to its exact meaning, would naturally be taken as implying two groups of Jews, "of Cyrene and Alexandria, the other of Cilicians and men of Asia. The word differs from those with which it is associated (and this may be marked by St. Luke's use of Αγγέλων) in not being a place-name, for it is impossible to connect it with a supposed town—Libertium—in N. Africa. There is no definite evidence for the existence of such a place, and it is unlikely that there would have been Jews from it in sufficient numbers to be mentioned. The name no doubt refers to descendants of Jews who had been taken captive to Rome by Pompey in 63 B.C. Some of these Jews must have there received their freedom, and their descendants subsequently returned to Jerusalem, where, as possessing rights of Roman citizenship, they would be likely to be of sufficient importance as a class to receive the special mention which St. Luke makes. See further Schurer, Hist. of Jewish People, and Comm. ad loc. [1:13, p. 16].

Libnah. —1. A town of the Shephelah at which the [Israelites encamped between the wilderness of Sin] and Kadesh (Num. 33:20, 21). [LABAN.]—2. A royal Canaanite city (Jos. 12:15), captured after Makkedah and before Lachish (10:29; 32,39), in the S.W. region of the lot of
Judah (15.42). It was given to the priests (21.13; 1 Chr. 6.57). It revolted against the king of Judah early in 9th cent. B.C. (2 K. 8.22; 2 Chr. 21.10), and it was attacked by Sennacherib in 702 B.C., after the submission of Lachish (2 K. 19.8; Is. 37.8). Hamutal, mother of King Josiah, apparently came from this city (2 K. 23.31-24.18; J. 32.1). The site is uncertain. It may possibly be the large ruin el-Benásey, 6 miles S.E. of Lachish, a place with rock-cut cisterns, caves, and other traces of an ancient town (Surw. W. Pal. iii. p. 280). The vicinity is a region of "white" chalky hills. [C.R.C.]

Libni, eldest son of Geresh, son of Levi (Ex. 6.17; Num. 3.18; 1 Chr. 6.17,20, and probably [see Malhî, 1]; 6.29), and ancestor of the Libnites (Num. 3.31, 26.58).

Libya occurs only in Ac. 2.10, in the phrase "the parts of Libya about Cyrene," which obviously means the Cyrenaica. The name Libya is applied by Gk. and Lat. writers to the African continent, generally excluding Egypt.

Lice (Heb. kînnîm, kînnâm). This word occurs in A.V. in Ex. 8.16-18 and in Ps. 105.31; both passages bearing reference to the 3rd great plague of Egypt. It is derived from a root signifying to establish or fix; and all the various explanations of it imply that it indicates gnats or mosquitoes (probably included under the general term for flies), the A.V. translation is most likely correct. Among the Bedouin and other Arabs lies abound, but they would be utterly repugnant to the ancient Egyptians, who were noted for their personal cleanliness. [See also A.R.C.]

Lieutenants (Ezr. 8.36; Esth. 3.12,8,9,3.13). The same Heb. and Aram. word is rendered "princes" in A.V. of Dan. 3.2,3,27,6.2,4,3,6; LXX. σατράπαι, σατράπηδος, διόκηται; R.V. satraps everywhere, rightly. The Heb. and Aram. word, in sing. 'ayashdarîn, is the Akkaen. Pers. khshatrapâvan (Avestic, shkatrapa, an epithet of the prophetic prince) (cf. kohen, "priest, espirí, especial", in Gk. inscriptions, ἱεράςπας, ἵεράθρας: from khshatram, "province" (Skt. katzram), from the root ḫā, "to protect," Herodotus, born four years before Xerxes' expedition against Greece, says that Darius divided the empire into 20 satrapies, the 9th of which was that of Persa (or Phrae), Palestine, and Cyprus (Herod. iii. 86, 90). In Dan. 6.1, "Darius the Mede" (probably Gobryas) appoints 120 "satraps" over the "whole kingdom of the Chaldeans" (Dan. 9.1). Evidently, therefore, the title was then of less importance than it afterwards became. Cyrus' Annalistic Table, mentioned by Herodotus, that Gubriu (cf. Gobryas) "appointed governors in Babylonia." Darius mentions 23 provinces (? satrapies, ἰδαχ-ων) in his Behistûn Inscr. I., vi., and 29 later (Persepolis Inscr. Nakhsh-i-Rustam, lines 22-30). Spiegel, Altpers. Keilschrift; Beiträge zur Assyriologie, ii. 1894. [W.S.T.c.c.t.]

Light. The alleged difficulty of the existence of light from the creation of the firmament now existing in the universe is purely imaginary. [Creation.] Unless the theories of astronomers in regard to the gradual formation from nebulous matter of the countless worlds which we call stars are altogether incorrect, the existence of light must have preceded that of the bodies which now give off light from the continual combustion of their inflammable material. The generally accepted nebular hypothesis represents illimitable space as originally occupied by diffused atoms or molecules (or, as perhaps recent discoveries may indicate, by universally diffused ether, of which the component particles are indefinitely small), which were organized by the Primal Force, through the action of forces as yet by no means sufficiently known, into bodies such as now present themselves to our gaze. The Spirit of God communicated, we are told (Gen. 1.4), a vibratory motion to the particles of matter, or of the diffused ether (as the case may be) in various ways; one of which was the light-producing vibrations, which seem at first to have diffused a faint light through the nebulous matter then in process of organization. But by degrees, just as dry land and water were separated by one form of activity on the part of the Primal Force, so light diffused through the darkness, which (Gen. 1.2) by another—i.e. there were portions of matter in which light-vibrations were operative, and portions in which they were not; i.e. substances which reflect and substances which absorb these vibrations. Thus, ultimately, the divine Creator, by His innate power, brought about the physical conditions leading to the world of light which as we now know them. [Cosmogony.] [J.J.L.]

Lign aloes. [Aloes.]

Ligurie (Heb. lešhem), a precious stone mentioned in Ex. 28.19,39,12 (R.V. jacinth) as the first in the third row of the high-priest's breastplate. The LXX. version, the Vulg., and Josephus translated it "Lycium" or "Lyciumrium"; but it is difficult to identify the ligurium of the ancients. The subject is very fully discussed by Mr. King (Precious Stones, s.v. "Lyciumrium"). Theophrastus (giving an absurd story about its origin, which perhaps caused Pliny to dismiss it in few words) states that it is hard, but can be engraved, transparent, cold to the touch, and "attracts in the same manner as amber." It is evident that lycurium and ligurium are the same stone. For this (putting aside improbabilities) some have suggested rubellite, a red and clear variety of journahine. But it is highly probable that the true ligurium is not ligurium at all, but the same substance under a different name. Theophrastus, and in later times (600 A.D.) by Isidorus, was our jacinth, the yellow jargon (zircon), which was much used by the ancients for intagli, and afterwards by the Romans for camei. It "resembles amber in colour, refraction, electricity, and levity," but is very much harder. Thus it is highly probable that the gem which the ancients identified with lešhem was the jargon. [T.G.B.]

Likhi', a Manassite, son of Shemidah (1 Chr. 7.19).

Lily (Heb. šušhān, šušhannā), rendered "rose" in the Chaldee Targum, and by Maimonides and other rabbinical writers, except Kimchi and Ben Aderelah, who in Ez. 17.10 translate it "violet." But ἑρών, or "lily," is the uniform rendering of the LXX., and probably the true one, as it is supported by the analogoy of the Assy. susan, and Arab. susan, which still means "lily," and by the existence of this word in Syr. and Coptic. But it is uncertain what individual of the lily species it especially desig-
LILY

LILUM CHALCEDONICUM.

LILY

nates. Father Soulier argued that it was the "crown-imperial," but there is no proof that this was at any time common in Palestine. Dioscorides (i.62) speaks of the beauty of the lilies of Syria and Pisidia, from which the best perfume was made. If, as seems to be the case, the šəšān or šəšānā of O.T. and the kūrōv of the Sermon on the Mount be identical, the plant was conspicuous on the shores of the lake of Gennesaret (Mt.6.28; Lu.12.27); it flourished in the deep broad valleys of Palestine (Can.2.1), among the thorny shrubs (2.2) and pastures of the desert (2.16,4.5.6.3), and was remarkable for rapid and luxuriant growth (Ho.14.5; Ecclus.39.14). A brilliant colour for its flowers seems to be indicated by the comparison with the gorgeous robes of Solomon in Mt.6.28,29; and that this colour was scarlet or purple is implied in Can.5.13. The species of lily which best answers all these requirements is the Lilium chalcedonicum, or scarlet martagon, which grows in profusion in the Levant. But as a native plant, despite Prof. Henslow, it can never have been anything more than a very rare species. Col. Conder says he has never seen it in Palestine; and Canon Tristram can only say of it, "non vidi," and suggests the tulip (Nat. Hist. of B. p. 464). Other identifications include the white lily, since Gesenius derives the word from a root signifying "to be white." Dr. Royle identified the "lily" of Canticles with the lotus of Egypt, in spite of the many allusions to "feeding among the lilies." The purple flowers of the kharsaf, or wild arthichoke, which abounds in the plain N. of Tabor and in the valley of Esdraelon, have been suggested as the "lilies of the field" (Mt.6.28), and a plant, with lilac flowers like the hyaeth, and called by the Arabs maṣēth, has been considered to be of the species required. Dr. Stanley suggested that the term might "include the numerous flowers of the tulip or amaryllis kind, which appear in the early summer, or the autumn of Palestine." The Phoenician architects of Solomon's temple decorated the capitals of the columns with "lily-work," i.e. leaves and flowers of the lily (K.7.19), corresponding to the lotus-headed capitals of Egyptian architecture. The rim of the brazen sea was possibly wrought in the form of the recurved purple lily flower (K.7.26). Canon Tristram must be quoted finally, as the most acceptable of all experienced commentators. He says in his Land of Israel, "There have been many claimants for the distinctive honour of the 'lilies of the field'; but while it seems most natural to view the term as a generic expression, yet if one special flower was more likely than another to catch the eye of the Lord as He spoke, no one familiar with the flora of Palestine in springtime can hesitate in assigning the place to the annemone (A. coronaria)."

LINEN

Linen. Noticed only thrice in the Bible (1Chr.27.2,4; E.V. 'planter'; Is.33.12; Am.2.4). Five different Heb. words are thus rendered, and it is difficult to assign to each its precise significance. In the Gk. words so translated in N.T. there is little ambiguity. (1) It is in connexion with Egypt, the great centre of linen manufacture of antiquity, that we find the first allusion to it in the Bible. Joseph argued when "ruler" of Egypt, was arrayed "in vestures of fine linen" (šēš, marg. "silk," Gen.41.42), and among the offerings for the tabernacle of articles brought out of Egypt were "blue, and purple, and scarlet, and fine linen" (Ex.25.4,35.6). (2) In Ex.28.12 and Lev.6.10 the dressings of the priests and their various robes are said to be of "linen (bāḏh); and the tunic of the high-priest, his girdle and mitre, which he wore on the day of atonement, were of the same material (Lev.16.4). The making of linen was one of the occupations of women, of whose dress it formed a conspicuous part (Pr.31.22, A.V. "silk"; Ezk.16.10,13; cf. Rev.18.13). In Ezk.27.7 šēš is enumerated among the products of Egypt, which the Tyrians imported and used for the sails of their ships. In no case is bāḏh used for other than a dress worn in religious ceremonies, though the other terms rendered "linen" are applied to the ordinary dress of men and women, and for the material (bāḏh) bāḏh, always translated "fine linen," except in 2Chr.5.12, is apparently a late word, and probably = the Gk. πλέον, as in the LXX. It was used for the dresses of the Levite choir in the temple (2Chr.5.12), for the loose upper garment worn by kings over the close-fitting gown (1Chr.15.27), and for the veil of the temple, embroidered by the skill of the Tyrian artificers (2Chr.3.14; cf. Esth.8.14; Lu.16.19). (3) čēpē occurs but once (Pr.7.16), and there in connexion with Egypt. It was probably a kind of thread, made of fine Egyptian flax, and used for ornamenting the coverings of beds with tapestry-work. Schultens (ad loc.) suggests that the Gk. ἀργαῖ is derived from the Heb. ṣāḏāh, used of the thirty linen garments which Samson promised to his companions (Judg.14.12,13). It was made by women (Pr.31.24), and used for girdles and under-garments (Is.3.23; cf. Mk.14.51). Linen was used for the vestments of the high priest (Ex.28.4,40). The word is also ascribed by Greeks (Mt.27.61; Mk.15.40; Lu.23.53; Hom. II. xviii. 353, xxiii. 254; cf. Eur. Bacch. 810). Towels were made of it (Jn.13.4,5), and
napkins (11.44), like the coarse linen of the Egyptians. The dress of the poor (Ecclus.40.4) was probably unleached flax, such as was used for bards (Job 13.19, 18; 19.15). Flax included all those already mentioned was pishtō, used—like our "cotton"—not only for the flax (Judg.15.14) or raw material from which the linen was made, but also for the plant itself (Job 2.6), and the manufacture from it. It is generally opposed to wool, as a vegetable instead of an animal material, though in Egypt it was used in a material sense. (2) Flax was used for the coarser sort of girdle (prase as in Jer.37.25; Deut.22.11; Ps.31.13; Ho.2.5, 9), and was used for nets (Is.19.9), girdles (Je.13.1), and measuring-lines (Ezek.40.3), and for the dress of the priests (44.17,18). Comparing the last-quoted passages with Ex.28.42 and Lev.6.10, 16.4, 23, it is evident that badh and pishtō differentiated the dress of Israel from the more general term. Similarly ἱρήμ and βόσσωξ are essentially the same (cf. Rev.15.6 with 19.8,14). (6) The Heb. migdāq, which A.V., following Junius and Tremellius, has translated "linen yarn" (1K.10.28; 2Chr.1.16), brought out of Egypt by Solomon's merchants, is explained by some as the name of a piece of dress, and by others (e.g. Calmet) of a "lion"; but Egypt was celebrated for its linen (Ezek.27.2). It was the dress of the Egyptian priests (Her. ii. 37, 81). Panopolis or Chemmis (the modern Akhmim) was anciently inhabited by linen- weavers (Strabo, xvii. 41, p. 813). According to Herodotus (ii. 86), the mummy-cloths were of byssus; in which case microscopic examination shows that byssus was linen, and not cotton. [SILK; WOOLEN.]

**Lintel.** A flat stone, or beam over a doorway. [GATE.] The A.V. so renders three Heb. words. (1) ayil, "strong" (1K.6.31), rendered "posts" in plnr. in 17 cases (Ezek.40.9-41.3). (2) kaphēr (see KNOR; A.M.S.; Zeph.3.14). As meaning a "boss" or "ball" it appears rather to refer to the capital of a pillar (A.V. margin, R.V. CHAPITRE). (3) mashqoph, "laid over" (Ex.12.22,23), rendered "upper door post" by A.V. in ver. 7. There is no doubt that a lintel is intended by this word, whereas "mashqoph" may refer to either of the beams forming the door frame. [C.R.C.]

**Lī'nus, a Christian at Rome, known to SS. Paul and Timothy (2Tim.4.21). An early bishop of Rome was named Linus, and the testimony of Irenaeus, confirmed by that of Eusebius and Theodoret, are sufficient to prove his identity with St. Paul's friend. But many points connected with his episcopate, though much discussed, are still in doubt. Its date has been variously assigned to periods ranging from 55-67 to 68-80 a.D. Harnack dates it 64-76. Again, the questions have been raised whether or no Linus held his episcopal before St. Peter's death, and whether his jurisdiction may have extended over the Gentile Christians only, while another bishop—perhaps Clement—had the oversight of the Jewish Christians in Rome. At present it is impossible to give to these questions a definite answer. [A.C.D.]

**Lion.** By the Rabbinical writers 7 Heb. words are used in the O.T. have been regarded as indicating the lion, and have been accounted for by seeing one in the animal at 7 periods of its life. (1) ge'or, or ge'ar, a cub (Gen.49.9; Deut.33.22; Je.51.38; Na.2.12). (2) kaphēr, a young lion (Judg.14.5; Job 4.10; Ezek.19.2, etc.). (3) ἄρθ, or ἄρυζ, a fullgrown lion (Gen.49.9; Judg.14.5,8, etc.). (4) ἱσαὴλ, a lion more advanced in age and strength (Job 4.16), the literal rendering of a lion in full vigour (Job 28.8). (6) labbēth, or bēbiyyd, an old lion (Gen.49.9; Job 4.11, etc.). (7) layish, a lion decrepit with age (Job 4.11; Is.30.6, etc.). gūr is, however, applied to the young of other animals besides the lion; for instance, the sea-monsters in Lam.4.3; kaphēr differs from it as ἱσαὴλ from ἄρθ. From the general term, applied to all lions without regard to age; the meaning of ἱσαὴλ is uncertain; and shahu'ēr does not denote a lion at all. labbēth is properly a "lioness," being connected with the Coptic labai, which has the same signification, when it is an epithet of a "lady," or a "woman," the from being applied to a lion weak with age, denotes one in full vigour (Job 4.11; Pr.30.30). Lions have long since been exterminated in Palestine, though they still abound on the banks of the Euphrates between Bussorah and Bagdad, and in the marshes and jungles near the rivers of Babylonia. Their only seat in Asia Minor belong to the Indian race (Felis leo gur-ratensis), in which the mane is tawny, and not very profuse. In ancient times lions were probably numerous in Palestine; the names Lebaoth (Jos.15.32), Beth-lebaoth (Jos.19.6), Arieh (2K.15.25), and Laish (Judg.18.7; 1Sam.25.14), referring to these animals. Some of their lairs in forests which, like those, have vanished (Je.6.12.8; Am.3.4), in tangled brushwood (Je.4.7.25.38; Job 38.40), and in caves of the mountains (Can.4.8; Ezek.19.9; Na.2.12). The canine-brake on the banks of the Jordan was a favourite haunt (Je.49.19.50.44; Zech.11.3). In old days it would seem that lions, like their lairs in forests which, like those, have vanished (Je.6.12.8; Am.3.4), in tangled brushwood (Je.4.7.25.38; Job 38.40), and in caves of the mountains (Can.4.8; Ezek.19.9; Na.2.12). The canine-brake on the banks of the Jordan was a favourite haunt (Je.6.12.8; Am.3.4), in tangled brushwood (Je.4.7.25.38; Job 38.40), and in caves of the mountains (Can.4.8; Ezek.19.9; Na.2.12). The canine-brake on the banks of the Jordan was a favourite haunt (Je.6.12.8; Am.3.4), in tangled brushwood (Je.4.7.25.38; Job 38.40), and in caves of the mountains (Can.4.8; Ezek.19.9; Na.2.12). The canine-brake on the banks of the Jordan was a favourite haunt (Je.6.12.8; Am.3.4), in tangled brushwood (Je.4.7.25.38; Job 38.40), and in caves of the mountains (Can.4.8; Ezek.19.9; Na.2.12). The canine-brake on the banks of the Jordan was a favourite haunt (Je.6.12.8; Am.3.4), in tangled brushwood (Je.4.7.25.38; Job 38.40), and in caves of the mountains (Can.4.8; Ezek.19.9; Na.2.12).
LITTER

enemy (Ps.7.2, 22.21, 57.4; 2 Tim.4.17); hence for the arch-fiend himself (1 Pe.5.8). [k.r.]

Litter. [CHARIOT]

Lizard (Heb. פַּעַד). This occurs only in Lev.11.30, and appears to be correctly translated. There are a great number of species of lizards (inclusive of geckos) inhabiting Egypt, Palestine, and Arabia; and it is highly probable that the Heb. word is employed in a wide and general sense rather than as denoting one particular species. [TORTOISE; FERRET. [k.e.]

Lo-ammi, i.e. "not my people," the name given by the prophet Hosea to his second son by Gomer, the daughter of Diblaim (Hö.1.9), to denote the rejection of the kingdom of Israel by Jehovah. Cf. ver. 10. [Amun.]

Loan. (1) Of something for use and return, e.g., an ox or plough; (a) gratuitous, Roman commodatum: the borrower had to make restitution for death or injury occurring in the owner's absence, but not in his presence (Ex. 22.14f., 15f.); (b) for hire, Roman locatio conductio rei: here the risk was the owner's (Ex. 22.15[14]). (2) Of things for consumption, the borrower returning a like amount, e.g., money, food: Roman mutuum: (a) interest was forbidden in loans to Israelites, but permitted in other cases (Ex. 22.25f.; Lev. 25.36f.; Deut. 23.10f., 12f.). The prohibition was frequently violated (Ne.5.7; Ex. 18.13; Pr.28.8, etc.). One per cent. (probably monthly) was some times exacted (Ne.5.11). Nehemiah procured the observance of the law (5.1-13). (b) There was to be a septennial release of money debts for Israelites (not foreigners). The duty of lending to the poor Israelite, even if this year was approaching, was earnestly enjoined (Deut. 15.1-11). This release entirely extinguished the debts. (c) A loan was frequently secured by PLEDGE and HAND-CLASP. (d) We meet with mortgage of immovables to secure loans (Ne.5.3f.) and (e) personal execution. [Poor, 1.1] Parallels in Post, Grundrisse, i. 678 ff.; Driver, Deut. 216, 267; [M.M.W.]

In connexion with this subject cf. the wide application of the law of love given by Christ (Le.6.34, 15). [i.e.]

Lock. Eastern locks are usually of wood, and consist of a partly hollow bolt from 1 in. to 2 ft. long for external doors or gates, or from 7 to 9 in. for interior doors. The bolt passes through a groove in a piece attached to the door into a socket in the door post. In the groove-piece are from 1 to 9 small iron or wooden sliding-pins or wires, which drop into corresponding holes in the bolt, and fix it in its place. [Key.] The gates of Jerusalem set up under Nehemiah's direction had both bolts and locks (Ne.3.3; cf. Judg.3.23, 25, Can.5.5, etc.).

Locust. In the Bible there are frequent allusions to locusts; and there are nine or ten Heb. words supposed to denote different species of the group, or different developmental stages of such species. In Lev.11.21, 22 we have the Heb. names of four different kinds of locusts and grasshoppers: "These may ye eat of every creeping thing that goeth upon all four, which have legs above their feet to leap withal upon the earth; even those of them ye may eat, the 'arbe after his kind, and the solam after his kind, and the bargaδ wrongly translated beetle by A.V. (see below) after his kind, and the ḳikāb hafter his kind." Besides these four names there occur five others—viz. göbb, gāüm, ḳisil, yileq, and 'elqāḏi, which have been regarded as representing as many species or developmental phases of these insects. (1) The word 'arbe, which is the most common name for locust, occurring about 20 times in the Heb. Bible, is derived from a root signifying 'to run,' and is probably sometimes used in a wide sense to express any of the larger devastating species. In almost every passage where the 'arbe is mentioned reference is made to its terribly destructive powers. The A.V. has grasshopper in Judg.6.5, 7.12, Job39.26, and Le.46.23, in all the other places locust. Both the migratory locust (Pachytylus cinereascens) and the N. African locust (Acridium peregrinum) occur in Palestine, but the latter appears to be the locust of the Egyptian plagues. Of this species, M. Olivier (l'Oiseau dans l'Empire Othoman, ii. 424) writes as follows: "With the burning S. winds [of Syria] there come from the interior of Arabia and from the most southern parts of Persia clouds of locusts (Acridium peregrinum), whose ravages to these countries are as grievous and nearly as sudden as those of the heaviest hail in Europe. We witnessed them twice. It is difficult to express the effect produced on us by the sight of the whole atmosphere filled on all sides and to a great height by an innumerable quantity of these insects, whose flight was slow and uniform, and whose noise resembled that of
LOCUST

rain: the sky was darkened, and the light of the sun considerably weakened. In a moment the terraces of the houses, the streets, and all the fields were covered by these insects, and in two days they had nearly devoured all the leaves of the plants. Happily they lived but a short time, and seemed to have migrated only to reproduce themselves and die; in fact, nearly all those we saw the next day had paired, and the day following the fields were covered with their dead bodies.” This species is found in Arabia, Egypt, Mesopotamia, Persia, and India. (2) ḥāḡāḥāḥ in 2Chr.7.13 of A.V. is translated “locust,” in other passages “grasshopper.” In the Talmud ḥāḡāḥāḥ is a collective name for members of the locust tribe, no less than 800 kinds of ḥāḡāḥāḥ being supposed to exist! (3) As to ḥārgol, A.V. is in error in translating it “beetle”; it occurs only in Lev.11.22, where it clearly denotes some kind of winged locust or grasshopper which the Israelites were not to eat. What this insect is, which would not be the case with the “beetle.” No attempts at a more exact identification have, however, sufficient evidence. (4) sol‘ām (A.V. bald locust) occurs only in Lev.11.22, as one of the four edible kinds of leaping insects. In the Talmud it is stated to have a smooth head (whence the English translation); and this suggests that it is one of the species of Truxalis, such as T. nasuta, shown in the figure, which abounds in Palestine. (5) For ḡāḏām, see PALMER-WORM. (6) ḡōḇ (A.V. in Na.3.17; great grasshoppers; grasshoppers, marg. green worms, in Am.7.1) is found only in Is.33.4 and in the other two passages cited, but there is nothing that will help to identify the species mentioned, or whether it refers to adult insects, larvae, or pupae (which are active among locusts and grasshoppers). By some writers it has been supposed that ḡāḏāmāl (A.V. frost), which occurs only in Ps.78.47, denotes some kind of locust; but the concurrent testimony of all the old versions, which interpret the word as hail or frost, forbids the conjecture. (7) yeqēq is rendered by the A.V. cankerworm in Ps.105.34, Na.3.15,16, Jl.1.4,2.25, and caterpillar in Je.51.14,27. The name means “that which licks up,” and from its association with the epithet “rough,” some have thought that with this description the conchifers are indicated, while others, who regard the epithet as equivalent to spiny, have suggested cockchafers and certain other insects. Tristram suggested that it more probably indicates the larvae and pupae of locusts, which follow the adult insects and consume what they have left; but against this is the fact that the “hoppers” of *Aeridium peregrinum* do not collect in swarms. (8) For ḥāsil, see CATERPILLAR. (9) The name ṣālāʾil (lit. tinkler; Deut.28.42) apparently refers to the stridulating sounds emitted by locusts. In the other passages where the word occurs, it represents some tinkling musical instrument, and is generally translated *cymbals* in A.V. Locusts occur in great numbers, and sometimes obscure the sky (Ex.10.15; Judg.6.5,7.12; Je.46.23; Jl.2.10; Na.3.15). Their voracity is alluded to in Ex.10.12,15; Deut.28.38; Ps.78.46,105.34; Is.33.4; Jl.1.4,7,12,2.3. They are compared to horses (Jl.2.4; Rev.9.7). They make a fearful noise in their flight (Jl.2.5; Rev.9.9). They have no king (Pr.30.27). Their irresistible progress is referred to in Jl.2.8,9. They enter dwellings, and devour even the woodwork of houses (Ex.10.6; Jl.2.9,10). They do not fly in the night (Na.3.17). The sea destroys the greater number (Ex.10.19; Jl.2.20). Their scales are used in making javelins (Jl.4.18); they are thus commonly used as food (Lev.11.21,22, and perhaps Mt.3.4, Mk.1.6). There are different ways of preparing locusts for food: sometimes they are gathered and pounded, and then mixed with flour and water and made into cakes, or they are salted and then eaten; sometimes smoked; boiled or roasted; stuffed with honey or fried in fat. These preparations are thus commonly used as food in the E.; the suggestion that a diet of locusts and wild honey indicates locust-beans and honey is unnecessary. It may be added that locusts are merely large grasshoppers characterized by the habit of collecting, either regularly or occasionally, in immense migratory swarms. [FAN.]

**Lod**, a town of Dan, but stated to have been founded by Shamed or Shamer (1Chr.8.12; Ezr.2.33; Ne.7.37,11.35). It is called Luten in the list of Thothmes III. (No.64). [L. B. D.] [C. R. C.]

**Lo-debar**, a place named with Mahaim, Rogelim, and Rabbath-ammon (2Sa.17.17). It was the native place of Machir ben-Amnuel (9.4,5). The name means “without pasture.” The site is unknown. [C. R. C.]

**Lodge. [CUCUMBERS.]**

**Log. [WEIGHTS AND MEASURES.]**

**Logos. [JHN, GOSPEL OF; PHILOSOPHY.]**

**Lois, the mother of Timothy’s mother Eunice (2Tim.1.5).** It seems likely that Lois had resided long at Lystra; and that from her, as well as from Eunice, Timothy had obtained his intimate knowledge of the Jewish Scriptures (2Tim.3.15).

**Looking-glass. [MIRRORS.]**

**Lord (Adon, Adonai).** Lord, as distinct from Lord which represents JEHOV, stands in E.V. for Adon (master), when that word is used as a name of the Divine Being, and also for a special form of it, Adonai—which the Jews have called sacred (qāḏāḥōsh), and distinguished from šāḵō, my master, which may be common (ḥōl). Without the vowel points this distinction would not be discernible. Adopting it, we find Adonai by itself three times for the Lord in O.T. narrative (1K.3.10; ZK.7.16; Dan.1.2). As a title of God in the vocative case, Adonai is used from Abraham to Davi-
sometimes with JHVH, sometimes alone. Afterwards it becomes general, more so in the prophets than elsewhere, and is most frequent in combination with JHVH in Ezekiel. The special use of this term is very interesting, but not easily followed, because it partly depends on the Heb. pointing, which is not of equal authority with the original text. For the application of the title "Lord" to Jesus Christ, see Paul, II. (3). [c.i.w.]

Lord's day, The (ἡ κυριακὴ ημέρα). The observance of the first day of the week as the holy day of the Church is one of those matters where most clearly may be observed the fulfilment of our Lord's promise that the Holy Spirit would guide that Church into all truth. The closed shops on Sunday are a silent proof of the truth of our religion more eloquent than many elaborate arguments—a proof made more convincing by the fact that there is no direct command to this effect in the New Testament. The observance of the Lord's Day only occurs once in the Bible (Rev.1.10). The observance of the Jewish sabbath faded out imperceptibly from the life of the Church (Sanctus) and that of the first day of the week, appropriately called the day of the sun, as imperceptibly dawned. We may piously believe that its observance was one of the things pertaining to the kingdom of God (Ac.1.3) about which the apostles received definite instruction during the 40 days, though there is only presumptive evidence for that belief. We have, however, sufficient evidence in N.T. that the first day was from the beginning recognized as our Lord's day. One of the implications of the good news is that our Lord rose from the dead, and on it He was seen five times. On the following first day he appeared to the eleven (there is no mention of any appearance between). On the 7th hebdomadal recurrence the Holy Spirit came upon the Church (the mystic number is to be noticed). We have evidence that the day was observed in N.T. St. Paul speaks of the oblation on that day (1 Cor.16.2). It is mentioned as the day when the disciples come together to break bread (Ac.20.7) and St. John (Rev.1.10) calls it the Lord's day. Directly we leave Bible times evidence of the fixed and regular observance of the Lord's day. Papias, who in his celebrated letter to Trajan (112 A.D.), informs the emperor that the Christians were accustomed to meet before dawn for the sacrament ("quod essent soliti staio die ante lucem convenire," etc., Ep. x. 96). Justin Martyr (148 A.D.) writes on the day called Sunday, etc. (Ep. l. 67). In the Didache (100—150 A.D.) we read: "On the Lord's day the Lord come together and break bread and give thanks," etc. (xiv. 1). Ignatius (Mag. ix.) directs the Lord's day to be kept, and not the sabbath. Clement of Alexandria repeatedly asserts the higher sanctity of the Lord's day (Strom. IV. xvi. 109; V. vi. 36, etc.). Other references to writers of the first 5 centuries are quoted by Hessey (Bamp. Lect., 1866). It is evident that the Sunday was not looked upon as the continuation of the sabbath, either in the Bible (St. Paul, Col.2.16, mentions the sabbath amongst those ordinances not a shadow of things to come) nor in early Christian writings. The reason is in those writings a tendency to disconnect the days more widely than St. Paul did in the above passage, which was only natural as the cleavage between the Jews and the Holy Catholic Church became deeper. Had the Jewish sabbath really been the day that pass away, our Lord would not have explained the Fourth Commandment so frequently. Indeed we must go to Him, and not to those who immediately followed Him, influenced as they could not help being by the growing hostility between Christian and Jew, to find the true connexion between sabbath and Sunday—which is clearly stated in His emphatic declaration that He is the Lord of the sabbath day—a statement which was quite as conscious of the future attitude of His Church to the Fourth Commandment as of the past attitude of the Jews. The whole subject is one which shows most clearly the abiding Presence in the Church of the old religion that is the passing of years, hardly has found no warrant for the assimilation of the two days, which began at the Reformation when the O.T. was much more considered than the N.T. and which thenceforward became the popular theory. We may conclude that the observance of one day in seven is of divine institution, and that the binding power of the law that the Christian Sunday is a day of greater sanctity than the Jewish sabbath, and that a nation will suffer morally and spiritually which does not acknowledge the divine claim to its observance; but there is no authority for calling Sunday the sabbath, or for the idea that no day is of the same nature as the holy day. The present writer who here revises the article written by his own teacher (Dr. Hessey), for whom he has a filial veneration, would prefer to conclude with that teacher's own words: Sunday "was not an institution of severe sabbatical character, but a day of joy and cheerfulness, rather encouraging than forbidding relaxation. Religiously regarded, it was a day of solemn meeting for the Holy Eucharist, for united prayer, for instruction, for alms-giving; and though, being an institution under the law of liberty, work does not appear to have been formally interdicted, or rest formally enjoined, Tertullian seems to think that the practice of the day was opposed to worldly business. Finally, whatever analogy may be supposed to exist between the Lord's day and the sabbath, in no passage that has come down to us is the Fourth Commandment appealed to as the ground of the obligation to observe the Lord's day. But on whatever occasion 'the Lord's day' may be supposed to rest, it is a great and indisputable fact that, four years before the Occumenical Council of Nicæa, it was recognized by Constantine, in his celebrated edict, as 'the venerable day of the sun.' The terms of the document are these: Ommes judices urbanorumque plebes et cucururum artium officia venerabili Diœ Solis quiescunt. Huius tempus positi agrorum cultus liberi licentisque servavit, quos iam frequentior exercit ut non quaupl alio die fructum sulcis aut vicinæ scrupulis mandantur, nec occasione momenti percat commoditas ecclesiæ provisioe curavit. Dat. Non. Mart. Cran. 1 (April 27, 313, 321). Emperor Constantinus Aug. Helpidio.

Some have endeavoured to explain away this
document by alleging: (1) that ‘Solis Dies’ is not the Christian name of the Lord’s day and that Constantine did not therefore intend to acknowledge it as a Christian institution. (2) That, before his conversion, Constantine had professed himself to be especially under the guardianship of the sun, and that, at the very best, he intended to make a religious compromise between sun-worshippers, properly so called, and the worshippers of the Sun of Righteousness,’ i.e. Christians. (3) That Constantine’s edict was purely a calendrical one, and intended to reduce the number of public sacrifices. (4) That Constantine himself, on being asked by an apostle how he intended to observe the ancient sacrifices, did not answer, ‘by the sun’, as was commonly said by the pagans, but called for the abatement of sacrifices as being contrary to the Saviour’s own teaching. (5) That the rules of Constantine’s edict required such sacrifices to be performed at the moment when the sun was rising, which was the same instant as the rising of the cross. (6) That Constantine’s edict was passed for the first time on a religious fast day for Christians. The fourth of these statements is absolutely refuted, both by the writers of the 2nd and 3rd cents., and by the terms of the edict itself. The three other statements concern themselves rather with what Constantine did than with what he did. But with such considerations we have little or nothing to do. It is a fact that in the year 321 A.D., in a public edict, which was to apply to Christians as well as to pagans, he put especial honour upon a day already honoured by the former—judiciously calling it by a name (Sabbath) belonging to the Jews, and among emeiplees without scruple, and to which, as it was in ordinary use, the pagans could scarcely object. What he did for it was to insist that worldly business, whether by the functionaries of the law or by private citizens, should be intermitted during its continuance. Were any other testimony wanting to the existence of Sunday as a day of holydays? That Constantine, if he might be supplied by the Council of Nicaea, 325 A.D. The Fathers there and then assembled assume it as an existing fact, and only notice it incidentally in order to regulate an indifferent matter—the posture of Christian worshippers upon it.”

**LOT**

**Lo-aruhamah** (not having obtained mercy), the name given to the daughter of Hosea the prophet to denote how utterly ruined and hopeless the kingdom of Israel was without the mercy of Jehovah (Ho.1:6).

Abraham and Sarah were the offspring of the Abrahamic covenant (Gen.11:27,31). His sisters were Milcah, wife of Nahor, and Iscah. Haran died before the emigration of Terah and his family from Ur of the Chaldees (11:28), and Lot was therefore born there. He removed with his kindred to the land of Haran, and subsequently with Abraham and Sarah to Canaan (12.4,5). With Abraham he took part in the partition of Lot's part in the lots of Sodom and Gomorrah and the way to Egypt (13:7-28), and stayed there permanently. Lot went immediately on its E.—the two Hebrews looked over the land towards Sodom, Gomorrah, and Zoar (13:10). Lot lifted up his eyes towards the East, and beheld the well-watered and fertile plain of Jordan (Sinai and Palestine, 218; Hist. Geog. of Holy Land, 483 f., 487, 489), and chose all the precinct of the Jordan, and journeyed cast” (11,12). [Cities of the PLAIN.] The next notice of Lot is his capture by the four kings of the East, and his rescue by Abram (Gen.14). Later, he is still living in Sodom (ch.19), but in the midst of its licentious corruption he preserves some of the delightful characteristics of his wandering life, his fervent and chivalrous hospitality (19:2,3), the unleavened bread of the tent of the wilderness (ver.3), the water for the feet of the wayfarers (ver. 2), affording his guests a reception identical with that which they had experienced that very morning in Abraham’s house (ver. 1). That Constantine from the incestuous intercourse between Lot and his two daughters, with which his history abruptly concludes, has been considered by some as a Heb. legend which owed its origin partly to the popular meaning attached to the names Moab and Ammon (see 19:36), and partly to the antagonism of character that existed between the “Children of Lot” and the Children of Israel. Modern critics, however, do not point out any marks of later date in the language, and the writer undoubtedly records it as an historical fact. Lot’s character, in striking contrast to Abraham’s, is essentially weak. He is the type of kindliness, eagerness, gentleness, lack of severity. He loved comfort, wealth, and worldly possessions, and though “his righteous soul” was “ vexed from day to day with the lawless deeds” of those around him, he was willing to dwell in Sodom for the sake of ease and worldly prosperity; and his story is an illustration of the extreme difference of character of the Almighty in dealing with His weak and irresolute servant. [H.C.M.]

**LOT**

The custom of deciding doubtful questions by lot is one of wide extent and high antiquity, as well as of great variety of method. [USIM; DIVINATION.] It was deemed an appeal to the Almighty, without passion or bias, an expression of the divine will by chance. (See, for example, Is.18.33), and prevailed extensively among the Jews; but after the election of Matthias was not used by Christians in N.T. times, because at Pentecost the Holy Spirit had been given to “guide into all truth” (Jn.16:13). Instances of it are for the (1) choice of men for an invading force (Judg.1.19-20); (2) partition of the spoils by the Israelites (Josh.2.18-28); (3) partition of the land (Josh.18.20, 21); (4) deciding of tithe (Lev.27.30); (5) settlement of doubtful questions (Pr.18.18), such as (a) detection of criminals (Jos.7.14-18); (b) appointment to duties: Saul (1Sam.10.20), Matthias (Ac.1.24), Zacharias (Lk.1:5); (c) selection of scapegoat on the Day of Atonement (Lev.16:3-10). From the use of lot for such a purpose as dividing the land comes the use of the word and its cognates in both Bible languages to express inheritance (Deut.9:29; cf. Jos.18.7 (“The priesthood of the Lord is their inheritance”)), Ps.16.5,6. The Scriptures themselves were used in the Sorous Bibleae to obtain guidance,
by opening a Bible at random and drawing inference from the first passage noticed in it. This was prohibited by early Councils of the Church, and is altogether different from such a reasonable application of a proper passage as led to St. Augustine’s conversion. [C.R.B.D.]

Lotan, an Edomite “dude”; eldest son of Seir the Horite (Gen.36.29; 22, 29.; 1 Chr.1.38f.).

Lothasbus (1 Esd.9.14), a corruption of Hashum, 2, in Nc.3.84.

Lots, Feast of. [Purim.]

Love. [Charity.]

Lo’zon (1 Esd.5.33) = Darkon.

Lubim, a nation which contributed, together with Cushites and Sukkimi, to Shishak’s attack on Babylonia (1 Kgs.20.17, 23-29; 2 Chr.12, 24; 27-29). It is poetically used with Cushites the bulk of Zerah’s army (18.3). They are spoken of by Nahum (3.9) with Pot or Phut, as helping No-Amon (Thebes), of which Cush and Egypt were the strength; and by Daniel (11.43) as paying court with the Cushites to a conqueror of Egypt. They are the Lub, or under the name of the “Babylonians,” one of the Egyptian monuments, with whom Meneptah and Ramses III., in the 13th cent. B.C., waged successful wars. The sculptures of the great temple raised by Ramses III. at Thebes, now called that of Medinet Habu, have us representations of the Ldbu, showing that they were under the protection of the Egyptians and the Assyrians; and that the Kabyltes and the Kabyles, who are their descendants. [A.H.S.]

Lucas (Ph.24). The same as Luke.

Lucifer (R.V. daystar; Heb. הֶבֶר [lit. shining one]; LXX. ὑψώτατον) is a name applied to the planet Venus, when, rising before the sun, it shines conspicuously as the morning star (Heb. יַיִשׁ דָּוִד). In the great prophecy of Balaam (Num.24.17), it is poetically used as a title of the king of Babylon, then at the height of his power (14.2). In the pride of his heart he aspired to become a god (14.13), but the prophet declares that he will be miserably slain, his body deprived of burial (14.19), his empire destroyed by the Medes (15.17), and his name blotted out in the dust (15.20). He is identified by the Targum with Sheol, or Hades (14.9, 18). St. Jerome wrongly identified Lucifer with Satan (cf. Job 38:7; Rev.12, 1), and regarded 14:14 as a description of his fall from heaven. [C.R.]

Lucius, a Roman consul, said to have written the letter to Tolemy (Euergetes), which assured Simon I. of the protection of Rome (c. 139-138 B.C.; 1 Mac.15.10, 15-21). The whole form of the letter—the mention of one consul only, the description of the consul by the praenomen, the omission of the senate and of the date—shows that it cannot be an exact copy of the original document; but there is nothing in the matter of the letter which is open to just suspicion. The imperfect transcription of the name has led to the varying identification of Lucius with (1) Lucius Furius Philus, who was not consul till 136 B.C., and is therefore ineligible; (2) Lucius Caecilius Metellus Calvus, consul in 112 B.C. (3) Lucius Calvinus, consul in 89 B.C., is most probably the correct identification.

Lucius is known to us from Rom.16.21, where he joins St. Paul in sending greetings to the Christians of Rome. Together with Jason and Sosipater, he is referred to by St. Paul as his “kinsman” (συγγενής). St. Paul is writing from Corinth, and implies that Lucius was known to the Christians at Rome, whom he addresses. He is so identified with Lucius of Cyrene (q.v.). [J.A.N.]

Lucius of Cyrene is one of the “prophets and teachers” of the Church in Antioch, who laid their hands upon Barnabas and Saul and set them apart for the mission to the Gentiles (Acts 13.1-3). He comes third on the list, and is supposed to have been one of the prophets. [J.A.N.]

Lud, the fourth name in the list of the children of Shem (Gen.10.22; cf. 1 Chr.1.17), generally identified with the Lydians (Josephus, 1 Ant. vi. 4). Some scholars, however, hold that he is an early name of the Libyans, and suggests the probability that the evangelist's father was a Roman and his mother a Greek. He was not born a Jew, as in Col. 4.11, 14 he is distinguished from “those of the circumcision.” He is there called “the beloved physician” by St. Paul. That the writer of our third Gospel and Acts was really a physician, who contributed to the development of Arab medicine, is absolutely proved. Both books abound in medical terms, and in descriptions of cures, accurate according to the standard of the 1st cent. of the Christian era. Not only does the author use technical medical terms, as in describing the sleep of Eutychus (Ac.20.9) and the viper at Meda (28.33), but he actually injects medical words into his description of undergirding the ship in 27.17. In the miracles of cures which he borrows from St. Mark, St. Luke repeatedly gives St. Mark’s phrases a more scientific medical turn (e.g. Lu.4:35, 38; 5:12, 18, 27, 44). In 8:13 he simply leaves out St. Mark’s rather sarcastic allusion to physicians. An ancient Latin biography says that St. Luke belonged to Antioch. Acts corroborates this. It is remarkable that in the choice of the Seven, the native place of one only is mentioned, St. Stephen leading an assortment of the planting of the Church at Antioch, and the details of this are of first-rate value and interest (11.19ff.). Note, too, how the five prophets and teachers at Antioch are mentioned in ch.13, and the question as to circumcision comes to a head at Antioch (15.2). St. Luke’s books show
LUKE, GOSPEL ACC. TO ST.

that he is not a native of Palestine, of which he knows part of the coast, or Jerusalem. He knows Asia well. St. Luke met St. Paul at Troas in 50 A.D., during St. Paul's first missionary journey (Ac.16.10,17). He went with him to Philippi, where he remained after St. Paul had gone. About six years later they met again at Philippi, and went together to Jeru-
salem (20.5-21.18). He was with the apostle on his voyage to Rome, was shipwrecked with him at Malta (ch. 27). He was with him in Rome, and was his beloved friend (Col.4.14; Ph. 24).

And as the great apostle waits for death he writes, "Only Luke is with me" (2Tim.4.11). This gives the apostle's geography says that St. Luke died in Bithynia at the age of 74. This also is probable. It is plain that he was in possession of special knowledge obtained from St. Philip, with whom he stayed at Caesarea (Ac.9,30,21, 6). And it is probable that he visited St. Philip and his daughters after they had re-

moved to Bithynia. His knowledge of Palestine was very extensive, and his travels were (Euseb. Hist. Eccl. iii. 31). From them he may have derived some of the facts peculiar to his gospel.

[LP]

LUKE, GOSPEL ACC. TO ST. We are left to gather the name of the author from tradition. The Muratorian Fragment, c. 180 A.D. and Irenaeus, c. 185 A.D. (Adv. Haer. iii. 1), first call St. Luke the author. But the gospel is quoted earlier. Justin Martyr (c. 140 A.D.) records several facts found in this gospel only—e.g. the coming of the angel to the B.V. Mary, and the cry on the cross, "Father, into Thy hands I commend My spirit." Celsus, a celebrated pagan philosopher (c. 180 A.D.), refers to the gospel which says that Jesus was descended from the first man. The Letter of the churches of Lyons and Vienne (177 A.D.) quotes Lu. Marcion, a famous teacher who mixed a pagan Gnosticism with Christianity (144 A.D.), is an important witness. He held that St. Paul was the only apostle who was free from the taint of Jews and he kept a Latin text, which was Lu., because he held that it agreed with St. Paul. The contents of Marcion's gospel can be largely discovered quoted in the book written against Marcion by Tertullian. They prove that Marcion used our present third gospel, simply cutting out what did not agree with his own views. Tertullian says that Jesus was descended from the human race. He says that St. Luke's account of our Lord's birth and infancy, because he did not believe that His human nature was strictly real. Tertullian and his contemporary, Clement of Alexandria (c. 200 A.D.), definitely ascribe the gospel to Lu. The internal evidence of genuineness is of unique character, and strong connexion between the gospel and Acts in style, in the dedication of the two books to Theophilus, and the reference in Ac. 1.1 to a "former treatise," which can only be the gospel. The two books fit together, both in spirit and form. It is well known that Acts contains certain passages, 97 verses, which are commonly called the "we sections," because the writer uses the first person plural, implying that he was personally present on the occasions described. It has long been debated whether the rest of the book is by the same writer, or by a later author who inserted these sections into a less trustworthy and much later book. The question may be regarded as no longer a question. Acts is a literary unity. There are about 67 words or phrases which are common to the "we sections" and the rest of Ac., while they are absent in all four gospels. There are also 44 words and phrases in the "we sections" which are also in the rest of Ac. and in Lu., but not in Mt., Mk., Jn. There are about 130 words or phrases in the 97 verses found in the rest of Ac., or Lu., or both, but not in Mt., Mk., Jn. These facts, which might be added to, lead irresistibly to the conclusion that the gospel and all Acts are by one writer, the author of the "we sections"—St. Luke, the companion of St. Paul. [Acts.—The date is previous to that of Ac. It is later than Mk., Lu. and Ac. cannot be confidently dated after 70 A.D., and are probably earlier than St. Paul's death in 65 A.D. Few arguments can be found for a date later than 70 A.D., other than the somewhat sceptical objection that the prophecies about the destruction of Jerusalem are too clear to have been written until after the event had taken place, or the more sceptical objection that the story of the risen Christ and the Ascension is necessarily a late legend. Ac., which is plainly later than Lu., contains no hint of St. Paul's death or of St. Peter's. It betrays no use of St. Paul's epp., which would be almost inconceivable if it were later than 70 A.D. The historian who in Ac.11.28 speaks of the fulfilment of a Christian prophecy, never mentions the fulfilment of Christ's prophecies with regard to Jerusalem and the temple. The Jews are represented as in a privileged position in the empire, a position which they did not hold after c. 68 A.D., and our Lord is called "the Christ," or Messiah, the word having not yet become a proper name. The gospel is, therefore, an early work, probably c. 63 A.D.—Style and Character. Lu. is the most literary of the gospels. The author's name and profession imply that he was a man of education and he was versed in Greek, the polite language of the Roman empire. His gospel corroborates this. We have already noted his repeated use of medical terms. The very opening verses of the gospel not only recall a "prologue" in Galen (Theriac. ad Pis. 1. xiv. 210), but at once arrest attention by their classical character. In almost every part of the gospel he is in common with Mt. and Mk., we find that there is a slight tendency to reject nonclassical words and to write in a purer style. No less than 310 words are peculiar to him in N.T. The number of words which occur here and not in Mt. and Mk. is large; St. Luke uses the optative, a word which is rare in N.T., and is fond of ρε and καλ. Though able to write pure Gk., he uses numerous Hebraisms. This is partly due to the fact that he was imbued with both the style and the vocabulary of the LXX. The Hebraisms cannot always be derived from the sources which he used, for they recur in the sentences which he has himself composed, and link him more closely together, but they are intentional. The effect is unique. It is archaic, hieratic, like that of early Gk. or mediaeval Italian sculpture. With a true Gk. sense of form, St. Luke, without artificiality or exaggeration, introduced a Heb. element into a gospel for the Gentiles.
It is a prophecy of the catholic character of the Church; and the Magnificent (Luk. 1, 14-55), the Benedictus (1, 68-70), the Gloria in Excelsis (2, 14) and the Nunc Dimittis (2, 29-32), have become for ever part of the praises offered to the Church to God. Sympathy is one of the great marks of St. Luke. As a friend of St. Paul, he believes that the Gospel is free to all; it is universal. As St. Paul believed that even himself, the chief of sinners, and even the unclean heathens of Corinth, had been given the offer of a full salvation, so St. Luke has room for every outcast. He alone (3, 6) quotes in full 15.52.10—"all flesh shall see the salvation of God." Christ's first recorded teaching (Luk.4,24ff) tells of the admission of Gentiles to privileges at the hands of Elijah and Elisha. The exquisite narrative of the visit to Emmaus tells of forgiveness to be preached "to all nations" (24, 47). It is in Lu. that we read of the publican who was justified (18, 13), of the good Samaritan who showed a pity which the Jewish priest and Levite withheld (10, 30ff), of the prodigal welcomed home by his father (15, 11ff), of the woman in the city who had been a sinner (7, 37-38). There is no parable more admirably adapted to us, our Lord on the cross (23, 39ff). Jesus, in this gospel, is especially the Refuge of sinners and the Consoler of the afflicted, the "Saviour" and Healer of the sick (4, 40ff, 6, 18ff, 7, 21, 13, 32). Jesus is also the Father of the poor. The poverty of the holy family (2, 17, 24), the likeness between the poor (21, 1ff) and the corresponding woes pronounced on the rich (6, 24ff), the parable of Dives and Lazarus (16, 19), the invitation of the poor to the supper of the king, show this sympathy. St. Luke has been accused of holding the Ebionite heresy, held by some semi-Christian Jews in the 2nd cent. A.D., because he strongly condemns the rich. The accusation implies an anachronism. The Ebionites denied both the divinity and virgin birth of our Lord, and insisted on the necessity of circumcision. Such notions would have gained scant respect from St. Luke. There is also no reason for doubting that his several works which bear his name preserve our Lord's teaching. Christ's words were often incisive, and in outward form paradoxical. His strongest words against wealth are in Mk.10, 25, and are followed by symbolic words which suggest that His teaching is not always to be interpreted literally (10, 29-30). It by no means follows from this that we interpret our Lord's severe sayings correctly when we explain them away. Women are represented in Lu. with a new dignity and grace. St. Luke was here relying on some special sources of great value. Here Mary is seen as "highly favoured," and her place in the plan of redemption is demonstrated. The feminine touch about the story of our Lord's infancy can most reasonably be traced to her or to some of the circle of holy women around her. St. Luke probably met them when staying in Jerusalem in 56 A.D. No the prophetess Anna, the widow of Naam and the daughter of Phanuel of the tribe of Zebulun (1, 21, 2), the daughters of Jerusalem weeping on the way of the cross (23, 28), Elisabeth rejoicing both to bear a son in her old age and to be visited by the mother of her Lord, breathe with womanly life. Women of Galilee were by the cross (23, 49), and women first tell of the Resurrection (24, 10). St. Luke reminds us perceptually that the Gospel is "good news of great joy" (2, 10), and tells of joy from the birth of the Baptist (1, 14) to the bewildered joy of the apostles at the Resurrection (24, 41), and of their return with great joy after the Ascension (24, 52). There is the joy of the 70 disciples (10, 17), of the people over the works done by the Lord (13, 17), of Zacchaeus (19, 6), and others. Lu. is the imperishable proof that Christianity did not destroy, but fulfilled, the joy of the Greek mind. The stress laid upon prayer is also remarkable. There are seven instances in which St. Luke alone tells us that Jesus prayed: at His baptism (3, 21); before His first encounter with the Pharisees (5, 16); before choosing the Twelve (6, 12); before the first prediction of the Passion (9, 18); at His Transfiguration (9, 29); before teaching the Lord's Prayer (11, 1); and on the cross (23, 44, 46). Prayer is one of the truest marks of a real human nature, and in this gospel, where holy men pray to the Father and address God as "the divine Lord," prayer is one of His great characteristics. The duty of prayer is inculcated in two parables found in Lu. only (11, 5-8, 18, 9-8). St. Luke alone tells us that Jesus said that He had made supplication for St. Peter, and records His charge to the Twelve "be watchful, and pray always, for the temptation will come upon you as a snare" (22, 31-32). St. Luke also manifests a deep interest in the work of the Holy Spirit. The whole incarnate life of Christ is dominated by the Spirit. It not only begins with the direct action of the Spirit in Mary (1, 35), but is accompanied by other manifestations, as in Elisabeth (1, 44) and Simeon (2, 25-27), and the birth of the Baptist (1, 15). By the Spirit He was baptized (3, 22), led to the wilderness (4, 1), returned to Galilee (4, 1). With the Spirit upon Him He began His preaching (4, 18), in the Spirit He rejoiced (10, 21). It is for the Holy Spirit that Jesus prays. "As the Father gave Me this world the Father will give Me this world (11, 13). At the end of the gospel the risen Saviour describes this gift of the Spirit as "the promise of My Father," and as "power from on high" (24, 49). Perhaps it is the tenderness of St. Luke that causes his account of the Twelve to differ considerably from that of St. Mark. Their dullness and their weakness are set in a subdued light. He does not tell us that Christ once called St. Peter "Satan," or that St. Peter cursed when he denied Christ. He omits the rebuke administered to the disciples in the conversation concerning the leaven (Mk.8, 12), and the ambitious request of the two sons of Zebedee. And when he speaks of the slumber of the apostles in Gethsemane, he says that they were "sleeping for sorrow" (22, 45). The gospel of the physician is a gospel of pity as of poetry.”

**Luz,** J. [Luzon]—1. The old name of the town afterwards called Burun (Gen. 28, 19, 35, 48, 3; Jos. 16, 2, 18, 11; Judg. 1, 2). Lying W. of Abraham's altar at Bethel.—2. A town in the "land of the Hittites" (Judg. 1, 26).
LYCIA

named after the preceding. The situation is uncertain. It may be the ruin Luweiziyah, and perhaps similar to the ruins called the earthly city of Jordan; since the land of the Hittites, in early times, extended far S. in Syria. [C.R.C.]

Lyco'nia (Ac.14.6,11), the bare plateau W. of Cappadocia, with salt lakes—a region mainly pastoral. The "speech of Lyco'nia" may have been a Semitic dialect, since a Semitic element existed, and the early state in S.E. part of Asia Minor, and since Paul and Barnabas seem to have been able to make themselves understood (ver. 10,18). There were Pers., Gk., and perhaps even Hittite, elements in the population, as well as Jews and Phoenicians. The gods adored (ver. 12) are given Gk. names; and the rude peasantry who desired to sacrifice to the apostles, after Paul had healed the cripple, thought that Barnabas was a "son of Nebo," and Paul himself an incarnation of Bêl—a Semitic deity whose name occurs in Palmyrene texts. If so, the population would have been Semitic.

Lycia is the S.W. region of the peninsula of Asia Minor opposite the island of Rhodes (Ac.27.5). It is a remarkable district, both physically and historically. The range of Taurus here descends in majestic masses to the sea, forming the heights of Cragus and Anticragus, with the river Xanthus washing between them, and ending in the series of promontories called by modern sailors the "seven capes," among which are deep inlets favourable to seafaring and piracy. The Lycians were incorporated in the Persian empire, and their ships were conspicuous in the great war against the Greeks (Herod. vii. 92). After the death of Antiochus the Great, Lycia was included in the Gk. Seleucid kingdom, and was a part of the territory which the Romans forced Antiochus to cede. It was not till the reign of Claudius that Lycia became part of the Roman provincial system. At first it was combined with Cilicia, and only later, when the Roman empire it was a separate province, with Myra as its capital. [The language of the Lycian inscriptions of the 5th cent. B.C. at Xanthus, etc., is a dialect akin to ancient Persian. Some texts are in Lycian and Gk. C.R.C.]

Lydd'a, the Gk. form of the Heb. Lod, near Joppa (Ac.9.12,35,38). Now the town Ludd at the foot of the hills 101 miles S.E. of Joppa. Lydda, with Gophna, Emmaus, and Thamna, became the prey of the insatiable Cassius (c. 45 B.C.). It was burnt by Cestius Gallus (66 A.D.) on his way from Caesarea to Jerusalem. In 68 A.D. it was again taken by Vespasian. In the time of Hadrian it received the name of Diospolis. When Eusebius wrote (320-330 A.D.), Diospolis was a well-known and much-frequented town. In Jerome's time (404 A.D.) it was an episcopal see. The town has now a population of about 7,000. It includes the ruins of the churches of St. George and St. James, built about 1150 A.D. to the former a minaret was added before 1494 A.D. (Surv. W. Pal. ii. pp. 252, 267, 268). [C.R.C.]

Ly'dia, the first European convert of St. Paul, and afterwards his hostess during his first stay at Philippi (Ac.16.14,15, also 40). She was a Jewish proselyte, and at the Jewish sabbath-worship by the side of a stream (ver. 3) the preaching of the Gospel met her heart. Her native place was Thyatira (ver. 14; Rev.2.18), a city famous for dyeing, and Lydia was connected with this trade. She was probably a person of position and wealth.

Ly'dia, a maritime province in the W. of Asia Minor, bounded by Mysia on the N., Phrygia on the E., and Cappadocia on the S. The name occurs only in Mac.8.8 (the rendering of A.V. in Ezk.30.5 being for Ludim); it is there enumerated among the districts which the Romans took away from Antiochus the Great after the battle of Magnesia in 190 B.C., and transferred to Eumenes II., king of Pergamus. For the connexion between Lydia and the Lud and Ludim of O.T., see Ludm. Lydia is included in the "Asia" of N.T.

Lysai'ans, mentioned in Lu.3.1 only, where he is said to have been tetrarch of Abilene (in Syria) in the fifteenth year of Tiberius, i.e. (probably) 29 A.D. Josephus (15.4.4, 15.6.3) says that one of these named Lysai'ans, son of Ptolemy, who ruled over a territory in the neighbourhood of Lebanon in the time of Antony and Cleopatra, and was killed by Antony at the instigation of Cleopatra in 36 B.C., or more than sixty years before the Lysaians mentioned by St. Luke. Several scholars have identified the Lysaians of St. Luke with Lysaians the son of Ptolemy, thus attributing to St. Luke the gross blunder of supposing that the latter was still reigning sixty years after his death. But it may be urged that (1) St. Luke (loc. cit.) is engaged in elaborately fixing the date of a great event—viz. the beginning of the Baptist's ministry. It seems rash to assume that so careful an historian has, while thus engaged, committed an error involving some sixty years. (2) Lysaians son of Ptolemy is styled king (by Dio Cassius). The Lysaians of St. Luke is merely tetrarch. (3) An inscription (Corp. Inscrip. Grec. 4523), restored with probability by Re夫人, shows that four Lysaians are of the family of the Ptolemies, children bearing his own name. (4) In 37 A.D. (Josephus, 2 Wars xi. 5) the emperor Claudius bestowed on Agrippa a kingdom called that of Lysaians ("Abila of Lysaians") in 19 Ant. v. 1), and in 20 Ant. vii. 1 mention is made of a tetrarch of Lysaians; see also Corp. Inscript. Grec. 4521. As Lysaians son of Ptolemy reigned for only five or six years, it seems probable that these expressions point to a ruler named Lysaians less distant from the time of Claudius than the earlier Lysaians. Hence we identify the tetrarch Lysaians of St. Luke with this later Lysaians. [Plummer on Lu.3.1 (Internat. Crit. Comm.)]. C. H. Pritchard in Hastings, D.B. iii. 178; P. W. Schmiedel in Encycl. Bib. iii. 2810. [J.A.N.]

Lysai'as, a nobleman of the blood-royal (Mac.3.32; 2Mac.11.1), who was entrusted by Antiochus Epiphanes (c. 166 B.C.) with the government of southern Syria, and the guardianship of his son Antiochus Epiphanes (Mac. 3.32; 2Mac.10.11). As governor, Lysias armed a very considerable force against Judas Maccabeus. Two detachments of this army under Nicanor (2Mac.8) and Gorgias were defeated by the Jews at Emmaus (2Mac.4); and
in the following year Lysias himself met with a serious reverse at Beth-sura (165 B.C.). After the death of Antiochus Epiphanes (164 B.C.), Lysias assumed the government as guardian of his son, who was then a child (1 Macc. 3:17). On the war against the Jews was renewed; and Lysias was besieging Jerusalem when he received tidings of the approach of Philip, to whom Antiochus had transferred the guardianship of the prince. He defeated Philip (163 B.C.) and was supported at Rome; but in the next year, together with his son, he was displaced by the hands of Demetrius Soter, who put them both to death (1 Macc. 7:2-4; 2 Macc. 14:2). [Antiochus V.]

Lysias, Claudius, "chief captain of the band," i.e. tribune of the Roman cohort, who rescued St. Paul from the infuriated mob at Jerusalem (Ac. 23:26, 24:7).

Lysitra has two points of extreme interest in connexion respectively with St. Paul's 1st and 2nd missionary journeys: (1) as the place where divine honours were offered to him, and where he was presently stoned (Ac. 14); (2) as the home of his chosen companion and fellow-missionary (Ac. 16:1). The first settlement of Jews in Lysitra, including possibly ancestors of Timotheus, may perhaps be traced to the establishment of Babylonian Jews in Phrygia by Antiochus III centuries before. Still it is evident that there was no influential Jewish population at Lysitra; no mention is made of any synagogue; and the scene described by St. Luke (Ac. 14) is thoroughly heathen. Lysitra was undoubtedly in the E. of the great plain of Lycaonia: and there are very strong reasons for identifying its site with the ruins called Bin-bir-Kilisheh, at the base of a conical volcanic mountain, named the Quna Diğ. Phiny places this town in Galatia, and Eusebius in Isauria; but the statements are quite consistent with its being placed in Lycaonia by St. Luke, as it is by Hierocles.

Maacah. — 1. (2 Sam. 3:3) = Maachah, 5. — 2. A region near Geshur (Deut. 14:19) and Bashan (Jos. 12:5). The king of Maacah assisted the Bene-Ammon against Joash (2 Sam. 10:6-8; ch. 19:7, R.V.). The name of Abiel the Bene-Maacah (1 K. 4:19), in the N.E. corner of the land of Israel, indicates that the small kingdom of Maacah lay near Binius and the Jefir district. [c.r.c.]

Maachah (Maacah, R.V.). — 1. Son (or daughter) of Nahor by his concubine Reumah (Gen. 22:21). — 2. [Machah.— 3. The daughter of Abiel the Bene-Maacah (1 K. 4:19), named after his mother; favourite wife of Rehoboam and mother of Abijah (2 Chr. 11:20-22). In 2 Sam. 14:27 Absalom's daughter is called Tamar, and she became, according to the LXX. and Josephus (7 Ant. x. 3), the wife of Rehoobam. But the mother of Abijah is elsewhere called "Michalah, the daughter of the king mother" (cf. 1 Chr. 3:15).— 4. Father of the king's "mother" (cf. 1 K. 2:19), which has been compared with Uriah the Hittite in Turkey. It may be that at Abijah's death, after a short reign of three years, Absalom was left a minor, and Maacah acted as regent. If this conjecture be correct, it would serve to explain the influence by which she promoted the practice of idolatrous worship (1 K. 15:13; 2 Chr. 15:10). — 5. The father of Talmai, and a son of Absalom (2 Sam. 16:2); also called Maacah in A.V. of 2 Sam. 3:3.— 6. The wife of Machir the Manassehite (1 Chr. 7:16).— 7. The wife of Jehiel, father or founder of Gibea (8:29, 9:35).— 8. The father of Hanan, one of the princes of David's dynasty (1 Chr. 3:9, 13).— 9. A Simeonite, father of Shephatiah, prince of the tribe in the reign of David (27:16).— 10. (19:7) = Maacah, 2.

Maachathî, or Machathites, The, the inhabitants of the small kingdom of Maachah (Deut. 3:14; Jos. 12:5, 15:11, 13). In Judges the tribes in the east were called "Bene-Maachathites" (cf. Judges 3:3). The first settlement of Israelites in this region may have been in the days of Caleb the son of Hezron (1 Chr. 2:11). — 11. One of the sons of Bani who had married a foreign wife (Ezr. 10:34).

Maadiah, one of the priests, or families of priests, who returned with Zerubbabel (Ne. 12:5); called Moadiah in ver. 17.

Maal, a musician of the Bene-Asaph who took part in the dedication of the wall of Jerusalem after its rebuilding (Ne. 12:36).

Maalheh-acrabbin (Jos. 15:3), elsewhere in A.V., as here in R.V., rendered "the ascent, or of the going up to, Akkrabbin."

Maani (1 Esd. 9:34; cf. Ezr. 10:34) = Bani, 4.

Maarah, one of the towns of Judah, in the Hebron mountains (15:50), about three miles S. of the present village Bait Umra; 6 miles N. of Hebron. [c.r.c.]

Maaseelah. — 1. A descendant of Jeshua the priest (Ezr. 10:18).— 2. A priest, of the sons of Harim (10:21).— 3. A priest, of the sons of Pashur (10:22).— 4. A Levite, of the sons of Pahath-moab (10:30). All the four preceding had married foreign wives.— 5. Father of Azariah, of (Ne. 3:23).— 6. One of those who stood on the right hand of Ezra when he read the law to the people (Ne. 8:4).— 7. A Levite who assisted on the same occasion (ib.).— 8. A chief laman who, or whose descendants, signed the covenant with Nehemiah (12:29).— 9. Father of Zedeckah, the fourth king of Judah (2 Chr. 33:21).— 10. A Benjamite, ancestor of Salih (11:7).— 11. Two priests of this name are mentioned (12:31, 41) as taking part in the musical service at the dedication of the rebuilt wall of Jerusalem. One of them is probably the same as 6.— 12. A priest, in the reign of Zedekiah (1 K. 15:11).— 13. Father of Zedekiah the false prophet (1 K. 29:2, 37).— 14. One of the Levites of the second rank, appointed by David to sound "with psalteries on Athanath."
MAASIAI

MACCABEES, THE — 491

(1 Chr. 15:18-20). — 15. Son of Adaih, 5, and one of the captains of hundreds who assisted Jebo-land in placing Joash upon the throne of Judah (2 Chr. 23:3). He was probably a Levite (cf. 1 Chr. 23:4), and engaged in a semi-military capacity. — 17. The “king’s son” (perhaps vicerey; cf. 1 K. 22:26; 2 Chr. 18:25; and Malchiah, 8) killed by Zichri the Ephraimite hero in the invasion of Judah by Pekah, king of Israel. — 20. Governor of Jerusalem appointed by Josiah as one of the supernin- dents of the temple-temples (2 Chr. 24:24). — 20. A priest; ancestor of Baruch and Seraiah, the sons of Neriah (2 Chr. 26:7). — 20. Of the sons of Zabad, 1, one of the chief captains appointed (2 Chr. 28:7). — 20. The son of Shallum, 8; a Levite of high rank in the reign of Jehoiakim (Je. 35:4; cf. 1 Chr. 9:19). — 20. A priest who after the return from Babylon dwelt in Jerusalem (1 Chr. 9:12).

Maaia, son of Mattathias in the genealogy of Jesus Christ (Lu. 3:26).

Maa'az, son of Mattathias in the genealogy of Caleb (1 Chr. 2).

Maaaziah, head of the 24th course (1 Chr. 24:18). The name in Ne. 10:8, given as that of one who signed the covenant, is probably that of this family, rather than of an individual.

Mabai = Benaiam, 8, of the sons of Bani = Maani (1 Esd. 9:34; cf. Ez. 10:34, 35).

Macca'bee, The. I. The name Maccabaeus (Mäka-bä'ee, מַכָּבָאֵו, מַכָּבָא) is primarily the distinctive designation of the third son of Mattathias, though afterwards extended first to the rest of his family, and then to the whole body of his adherents, who maintained their heroic struggle against Syria during the latter half of the 2nd cent. n.c. The title has been variously explained as meaning “hammerer,” “extinguisher” (sc. of his enemies), or as being formed from the initial letters of the sentence אָמֵנוּ הַכַּבֵּּא אֵלֵי יְהֹוָה (“Who is like unto Thee, among the gods, O Jehovah?”), a devise supposed to have been borne upon their banners. Mattathias was the grandson of one Hashmon, and hence the more accurate family name is Hashmonae or Asmonae (Hasmo- naean); moreover, it is possible that the “sur- names” of Addi!, Thassi, etc., were the original names of the five sons of Mattathias, and that John, Simon, Judas, Eleazar, and Jonathan were added when they became princes or leaders of the Jewish people. — II. The events which culminated in the Maccabaean revolt may be briefly summarized as follows: At Banias in 168 B.C. Antiochus the Great succeeded in all but one thing. He had prepared a year, the领袖 者 of the Seleucids — i.e., in, the revolt of the Ptolemies. After an eventful reign, his successor, Seleucus IV., was followed in 175 B.C. by Antiochus Epiphanes (1 Macc. 1:10 ff.), a man whose curious character offers an interesting field for study. Brought up within the borders of the Seleucid empire, he was steeped in the spirit of Hellenism of the day, and developed a superficial taste for Gk. culture and religion, so that by the time of his return to Antioch he had conceived the idea of enforcing throughout his dominions a uniformity of manners, customs, and religion upon a Hellenistic basis, and his purpose was to accomplish it by proceeding to execute, by such means as opportunity justified, his receiving the title “Epiphanes” as a paradox on Epiphanes. Unfortunately, there were no renegade Jews willing to abet him. The high-priesthood was sold to Jason, an unscrupulous individual who purchased it by compliance with the Hellenistic tendencies of the king, and the promise of a large tribute; but Jason's renegades offered Epiphanes the adherence of an even more enthusiastic Hellenism and the payment of a still higher tribute. Jason was promptly ejected to make room for this enterprising person who, like his predecessor, had unfortunately no small following of sympathizers among the Jews themselves (2 Macc. 7:50). In 176, during one of Antiochus' campaigns in Egypt (1 Macc. 1:16-28), a rumour spread abroad that the king was dead, which not only led to Jason making an assault upon the citadel of Jerusalem, but by the time it reached the king's ears was coupled with the report that the Jews were rejoicing because of it. Antiochus returned to Jerusalem, gave his soldiers a free hand to massacre and pillage in the city, and plundered the temple, polluting the holy place by offering swine upon the altar. Again in 168, his Egyptian campaigns being brought to an abrupt and undignified conclusion by the intervention of Rome, Epiphanes turned against his subjects upon the hapless Jews. This time he was determined absolutely to eradicate Jewish customs and religion with the Mosaic law, or exterminate the race itself. The streets of Jeru- salem ran with blood, and all kinds of barbarous punishments and tortures were inflicted upon men and women to induce them to profane the sabbath, to eat swine's flesh, abandon circumcision, or deliver up copies of the law to be burned or defaced with pagan pictures. The climax was reached at last when, on De- cember 25, 168, Jehovah was identified with Zeus Olympios, and a heathen altar superim- posed upon the altar of the Lord. A 25-foot high altar was set up in the holy place in place of the altar of sacrifice, and the “abomination of desolation” of Dan. 11:31 (יָרָה יַעֲבֹד, 7 intentional disfigurement of יָרָה יַעֲבֹד, Nestle; 1 Macc. 1:29-64). At length passive endurance gave way to active resistance. At the little town of Modion an aged priest named Mattathias, when called upon to offer sacrifice to the pagan deities, refused to do so, slew another Jew who was about to comply, struck down the Syrian officer, levelled the altar with the ground, and fled with five of his sons to the mountains (1 Macc. 2). Here he was joined by the haksakhim (הָקְשָחִים, “the pious”), those who till now had endured in silence and unmindfulness, and seeing the rash man's death, when 1,000 Jews refused to handle weapons on the sabbath, the little band of patriots determined to defend themselves even on that day (2:38). Mattathias soon died, and his place was taken by his third son, Judas the Maccabaeus, and the success which attended the guerrilla tactics of this leader, the great influence of the numbers under his standard, and enabled him to take the field against his enemies in the open. In 166 Judas defeated and slew Apollonius,
and the same year routed a second army under Seron, governor of Coele-Syria, at Beth-horon (3.1-26). These disasters determined the wrathful king to send a huge army under Ptolemy, Nicanaor, and Gorgias to crush the Jewish revolt once for all. But again, by brilliant strategy and valiant courage, Judas emerged victorious at Emmaus in 166; and on the glorious field of Bethzur in the following year he defeated the viceroy Lyssias himself, and so gained a short respite in which to re-establish the worship of Jehovah on Zion (3.27-4.35). On Chislev 25—exactly three years after its profanation by Antiochus—the sanctuary was cleansed, the heathen altar thrown down, and the stones of the polluted altar of sacrifice set aside "till a prophet should arise to direct what was to be done with them, and new ones dedicated with festivities extending over eight days (4.36-61). Judas now occupied himself with repulsing the envious attacks of surrounding nations, and in rescuing the bands of Jews who had settled among them (ch. 5). In 164 Epiphanies died suddenly, and Judas considered the disorders which followed in Syria a favourable opportunity to attack the citadel of Jerusalem, which had not been taken by reason of the garrison, now appealed to Syria for help, and Judas had to face an army of 120,000 men under Lyssias. Against such odds even his valour was futile; at Batsbychos he was defeated and his brother Eleazar slain, while the Syrians marched on Jerusalem. Just as all seemed lost, Simon and his party, who called Lyssias to Antioch, and he was content to make terms with the Jews, who were granted religious liberty, but were to remain politically subject (6.17-63). From this point the aspect of the contest changes. No longer is the struggle religious, but political—it developed into an interminable Jewish war, in which the Hellenizing party, led by the renegade Alcimus (Ja-kim), a worthy successor of Menelaus, had the support of the Syrians. Moreover (a most significant fact) the haisidhim now fell away from Judas: they had gained all they wanted—religious freedom—and they refused to follow him in his political career. Alcimus appealed to Syria, Judas appealed to Rome. In two battles, at Caphar-salama and at Adasa, Nicanaor, the Syrian general, was defeated, and in the latter he fell (ch. 7). At length Rome interfered, but the message reached Antioch too late, for immediately the news of Adasa was received, Bacchides was sent with a great army into Judaea, and Judas Maccabaenus and 800 devoted adherents were annihilated near Eleasa, the Jewish Thermopylae, in 161 (8.1-9.22). This sudden blow absolutely staggered the Maccabean party—it became wholly disorganized, and only under the pressure of the greatest persecution by Alcimus did they resolve themselves to elect Jonathan to fill the place of his brother (9.23-31). The eldest of the five sons of Mattathias, John, had fallen a prey to robber bands while endeavouring to deposit the baggage for safety among the friendly Nabathaens, and Jonathan's first step was to devote himself to the task. In 160 Alcimus died, Bacchides returned to Antioch, and "the land had rest two years" (9.57). During this interval of peace the Maccabean party regained its strength to such an extent as to arouse the fears of the Syrian faction and lead them once more to invoke the aid of Bacchides. The Syrian general again marched into Judaea, but the strength of Jonathan's entertainments and his cunning strategy now made him heartily weary of the whole business, so, eagerly closing with Jonathan's adroitly timid proposals of peace, he finally took his departure (9.58-73). Jonathan's opportunity, however, was afforded by the constant disputes for the Syrian crown, for in 153 Demetrius had to face a claimant for his throne in the person of one Alexander Balas, a pretended son of Antiochus IV. (Epiphanes) (10.1). Both parties endeavoured to secure the support of Jonathan, since by this time the Maccabees again had the nation at their back. Demetrius offered to evacuate all the fortresses of Judaea except Bethzur and the Akra, and to give the high-priesthood in authority to raise an army (10.3-6). Jonathan accepted. But the knowledge that Rome, to say nothing of other allies, was behind Alexander soon induced him to transfer his support to the latter, who not only sent him the crown and purple, but also conferred the high-priesthood upon himself (10.7-10). This was a momentous event to the Hellenistic Jew, who soon perceived that the whole scheme was based upon fraudulent offers, too good indeed to be true (10.22-45), and Jonathan wisely adhered to Alexander, who overthrew his rival soon after; and not until Demetrius II. finally crushed Balas in 146 did Jonathan abandon him for the victor, who confirmed him in the high-priesthood and gave him more amends than which his father had previously offered in vain. But even the wily Jonathan was entrapped at last. Relying upon Demetrius' promise to put the Akra into his possession, he furnished him with troops to assist in quelling a revolt at Antioch; but when Demetrius refused to keep his promise, he transferred his services to Tryphon, who was endeavouring to place the son of Alexander Balas upon the Syrian throne. He served him loyally and well. Tryphon, however, came to the conclusion that the rising power of the Maccabaeans was becoming dangerously great, and Jonathan, having been induced to sign a treaty. Alexander was also killed. 1,000 men, speedily found his bodyguard cut down and himself a prisoner (10.46-12.48). Simon, the last and in some respects the greatest, of the brothers, immediately stepped forward to take the vacant leadership in 143. Under him the Maccabees reached the acme of both their aspirations and their attainments. Judas had striven for religious freedom, and when that was gained, fought on to make the patriotic party politically supreme in Judaea. This last was the great objective of Jonathan; but having gained it, he proceeded to take the first steps towards that complete emancipation from the Syrian suzerainty which was ultimately reached under Simon, in 143-142 (2:114-140). After his treachery at Ptolemiais, Tryphon invaded Judaea, but was checkmated at every move, and, taking a mean revenge by murdering his prisoner Jonathan, retired (12.44-13.21). After establishing a friendship with Hinduus, Simon adopted the latter's policy of holding aloof from Syrian internal politics altogether, having received from the king
the acknowledgment of Jewish independence, which the high-priest transformed into something beyond a mere name by capturing the Akra, and gaining possession of Gazara and Joppa. Simon now devoted himself to the internal affairs of Judea. A council was assembled, law and order became established, while commerce and agriculture began to flourish as never before since the Exile. In spiritual and material prosperity "every man sat under his vine and his fig-tree, and there was none to fray them." The high-priesthood, by popular consent, was continued upon Simon and his house for ever, "till a faithful prophet should arise" (13:14). But nevertheless, like his brothers, Simon was destined to end his days amid stormy violence and intrigue. About 142 Tryphon assassinated his protégé Antiochus VI., and had himself proclaimed king; and since Demetrius II. was a prisoner among the Parthians, his brother Antiochus VII. took up the struggle and at length succeeded in overthrowing Tryphon. Immediately his attitude towards the Jews radically changed: instead of courting them by lavish promises and professions of amity, he now haughtily returned the presents which Simon sent him, and demanded tribute to the extent of 1,000 talents. Simon offered him 100 for Gazara and Joppa, and thereupon the king sent a huge army against Judea. It was, however, routed near Modin by Judas and John, the sons of Simon, who was once more left in peace by Antiochus. But his own son-in-law Ptolemy determined to seize the suppliant Simon's considerable and with this object invited Simon to a banquet, where he treacherously slew him, together with his sons Mattathias and Judas. Simon's other son, John Hycanbas, who was at Gazara, fortunately received warning in time to make good his escape and establish himself as head of the Hasmonaean house, and maintain its position (15:16). So perished the last of the five heroic sons of Mattathias. Something has been said above as to the gradual development of the objects for which they fought; there remains to be noticed what effect the events of the time had upon the moral and religious sentiment of the Jews.

The Maccabean period was one of fierce trial and sitting, which forced men to take one side or the other in the struggle. Those who remained faithful to the law, the haššāḥîm, bound themselves by a solemn oath to preserve their ancient religious rights and customs (1 Mac. 1:62), and in the time of their oppression they found comfort in writing and reading the literature of which the book of Daniel is a conspicuous example—writings, that is, which in veiled language dwell upon the evil of the present time, the glorious future which awaits Israel, and the fearful retribution which shall befall its enemies. Many modern scholars have found in the book of Daniel a connotation of outbursts of righteous indignation against the persecutors, or of exultation at the victories of Judas (e.g. Ps. 44:74, 79:83). One conspicuous result of Jewish experiences under Syrian rule must not be passed over—viz. the dawn of a realization in the individuals to everlasting life or to contempt and shame of the Israelites who had been pre-eminent as martyrs or apostates respectively (Dan. 12:2). Schürer, Hist. of Jews in N.T. Times (Eng. tr.), div. i. vol. i.; Bevan, Jerusalem under the High-priests and House of Seleucids. [D.C.S.]

**Maccabees, Books of.**—A. MACCABEES. (1) Versions. The Greek, the LXX. (including A. and V.) contain the book. But B. includes none of the Maccabees. (b) Latin. There are two Latin versions, one in the Vulg. and the other (ch. 1-13 only) in the Sangermanensis MS. (c) Syriac. There are also two Syriac versions. (2) Title. Makkabeis (Heb.), Makabees (Aramaic), Origen (Eus. H.E. vi. 25) gives Syr. Μακαβαίας, which is a transliteration of an original Semitic title—at present not satisfactorily identified. (3) Original Language. The book is almost certainly a translation, and from a Hebrew archetype. For this we have the witness of Origen and the explicit testimony of Jerome, who says he found 1 Mac. in Hebrew, and external evidence also is conclusive. (4) Contents. The period covered is the forty years between the accession of Antiochus III. to the throne of Seleucus, and the death of Simon Maccabaeus in 135. Summary: (a) Retrospect of Gk. history, bringing it into relation with Judeaean (1:1-9). (b) Campaign of Epiphanes and the Hellenists (1:16-64). (c) Mattathias, and the commencement of revolt (2). (d) Mattathias dies (2:60). Under the successive leadership of Jews (3:1-9-22), Jonathan (9:23-12:53), and Simon (13:1-16:18), Israel acquires religious and political freedom. (e) Death of Simon and escape of his son Hycanbas (16:19-24). (5) Unity. This seems to be guaranteed by: (a) The systematic chronology, the Seleucid era (1:12 b.c.) being followed throughout. (b) The uniformity of style and the consistent omission of the Divine Name (in the true text). But some scholars (e.g. Destinon and Wellhausen) regard 14-16 as no part of the original work, arguing that they were not known to Josephus (whom Destinon considers to have used a Heb. 1 Mac.). (6) Author. The minute topographical knowledge, and insertion of picturesque details which could have no interest for an outsider (e.g. 7:19), suggest irresistibly that he was a Palestinian, while the whole spirit of the book proves that it was written by a pious and patriotic Jew. To his mind religious and political freedom were indissolubly connected—Judas was the saviour of Israel (cf. 9:21). An ardent supporter of the Hasmonean house and the priesthood, he passes over in silence the apostate priests Jason and Menelaus. He may have been a Sadducee (Geiger). (7) Date. (a) From the attitude directed towards Rome it is universally admitted that it cannot have been written after 63 b.c. (when...
Pompey entered Jerusalem. (b) 16.23 might seem to suggest a date subsequent to the death of Hyrcanus in 105 B.C. (c) But this is not necessary, since 16.18-22 may refer to the early part of his reign. Otherwise it is difficult to explain the fragmentary character of the reception. (d) The vividness of the narrative points to a date not long subsequent to the events recorded, and the prosperous reign of Simon would give an impulse to literary activity. It is possible, therefore, that 1 Mac. was commenced in the reign of Simon and finished during the early years of his successor (i.e. from 110-10 B.C.). (e) Sources. The book itself makes only two references to sources (9.22, 16.24), and in each case no certain inference can be drawn. If it was written during the early years of the 1st cent. B.C., one must postulate documentary sources to account for the peculiar freshness of its style. But assuming an earlier date, the style, when compared with the documents of its background, shows a fragmentary character. The writer would draw largely on his personal recollections and the witness of his contemporaries. Some scholars have regarded the incorporated official documents as later interpolations. But a later hand would probably have handled them more artistically, and could hardly have avoided discrepancies in style and context. Certain documents the author calls ἀπεῖροι ἡματά ("copies," 8.12, 15.14). These were probably translations he made from the original into Heb., or paraphrastic renderings made from memory. 15.16a has been identified with the Roman edict in ii Macc. 5, but Mommsen rejects it. (g) Characteristics. In contrast to most O.T. historians, the writer represents the success of his heroes as primarily due to diplomatic skill rather than to divine intervention. His religious restraint is remarkable. 4 Macc. always takes the place of 4 Macc. and has acquired an almost personal character. Beyond the vague reference to the "prophet of the future" (14.41), there is no hint of the Messianic hope. The doctrine of the resurrection also is conspicuously absent (contrast 2 Mac.). The trustworthy character of the book is attested by: (a) its careful chronology, in substantial agreement with ii Macc. (b) the writer's reticence toward the intertestamental literature. (c) The faithful record of defeat. But the author shows a tendency to statistical exaggeration (6.30 ff.), and makes occasional misstatements in detail when dealing with general history (1.6; 8.15; 12.6)—a feature which, however, does not invalidate the historical character of the work as a whole. (d) 2 Maccabees. (1) Text. The same as for 1 Mac., except that 8 contains the latter only. (2) Contents. (a) Two letters of invitation to Egyptian Jews, urging them to join in the Feast of Dedication (1.1-2.18). (b) The writer's preface (2.19-22). (c) Hordobus is miraculously prevented from robbing the temple; the wickedness of Simon (3.1-4.6). (d) Persecution under Epiphanes (4.7-7.12). (e) Progress of Maccabean revolt; defeat of Nicanor by Judas (8-15). (f) Epiphanes (15.37-19). (g) Author. A current tradition with 1 Mac. seems to indicate that he was not a Palestinian. He is a master of the best Greek style. The prefixed letters and the fact that the earliest reference to 2 Mac. is in Philo may suggest that he was an Alexandrian. If so, it is strange that his work shows no influence of Alexandrine philosophy. His religious sympathies were distinctly Pharisaic (vide his depreciation of the priesthood). (4) Date. As the work was known to Philo and the author of Hebrews, it must have been written before 70 A.D. This is confirmed by the character of the work, its acceptance by the Church, and the fact that it formed the basis of 4 Mac. (a book written previous to 70 A.D.), and especially by the pre-supposition that Jerusalem and the temple worship are still in existence. Arguing from 16.37, it has been alleged that 2 Mac. must have been written prior to 133 B.C. (when Jerusalem was captured by Antiochus Sidetes). The general tone suggests that the author was far removed from the scene he records. His strong antipathy to the priests and his hatred of the Romans might suggest a date not later than 162 B.C. as a probable date. (5) Sources. The author says his work is an abridgment (ἐποίησα) of a history written by Jason of Cyrene in five books. There is no evidence that he drew upon any other authority. Jason apparently was not acquainted with 1 Mac. This is clear from the disagreements between the latter and the ἐποίησα of Jason, in subject-matter as well as in style. The author's morphological—phenomena which are equally fatal to the suppression of a common documentary authority. The source of Jason's information was probably oral tradition. It should be added that some have thought to distinguish 5 divisions in 2 Mac., corresponding to the 5 books of Jason. (6) Prefixed Letters. (a) They are almost certainly of diverse authorship. (b) The style and phraseology suggest they were not written by Jason, or by his epitomist. (c) That the latter inserted them is unlikely. (d) 5, the connecting particle (2.19), need not necessarily imply any previous narrative. (7) If we attach 1.10a to 9b, thus: "We wrote unto you. In the extremity," etc. (8) 4 Mac. refers to preparing the letter for a previous epistle, 14.4 (see reference to a previous epistle, 14.4), which relate that since 160 B.C. "Jerusalem had been in the hands of the Hebrews." (c) But joining 1.10a to 10b and punctuating 1.7, "We wrote unto you. In the extremity," etc., 4 Mac. (9) θεοποιήσας being epigraphal perfect), we might assume that the letter was written in 144 B.C. "In the extremity" then describes trouble now past. (d) This being the case, the first letter may have been added by the author. But the contradiction between 1.15,16 (manner of Epiphanius' death) and ch. 9 is conclusive against the second, and the second having been subtracted, it seems improbable that the author would have added a letter so insignificant in contents as the first. This result, however, must be regarded as tentative. For opposing view, see Enecy. Bibl. vol. iii. col. 2875ff. (7) Language and Style. 2 Mac. was certainly written after the second (162 B.C.) and before (70 B.C.). There is a striking absence of Hebrewism. (Jerusalem is always 1 ιεροσόλυμα, never 1 ιεροσολύμα.) The style is generally fluent and easy.
though sometimes overloaded; as a whole, the work bears a strong resemblance to contemporary Gk. literature. (8) Historicity, Purpose, and Religious Character. The comparatively later date of 2Mac., the general character of its contents and treatment, its absence from the canon of rMac., and the heightening of the miraculous (3.24,10.29,12.22), are highly prejudicial to its historical value. In fact, the author himself disclaims the responsibility of an historian (2.28). He is primarily concerned with edification, desiring to inspire the Jews of the diaspora with reverence for their religion and devotion towards the central sanctuary (3.2–9). Here some scholars (e.g. Rawlinson) have discerned a latent deprecation of the temple at Leontopolis. In contrast to rMac. observe: (a) The strong theocratic feeling. (b) The emphasis laid on divine assistance (cf. 11.6,15.21). (c) Continuous use of the sacred name and the doctrine of resurrection and prayers for the dead (12.43–45). The body of the work contains no explicit reference to the Messianic hope (but its resurrection doctrine is the same class of ideas). In 2.18 the writer looks forward to the reunion of Israel with the Jewish sanctuary and temple in the future chronological System of 1 and 2Macabees. Both books fix their dates in terms of the Seleucid era, which was usually reckoned from the autumn of 312 B.C. But the question arises, Do the books of Maccabees adopt this more usual standard, or do they reckon from the spring, and if from the spring, from what spring, 312 B.C.? Arguing from the fact that rMac. numbers the months from the spring, and from the evidence of rMac.7.1,10.1, and 6.20, most critics decide that the Maccabean Seleucid era begins in the spring. Wernsdorff and Clinton, however, hold the opposite view. And 312 is the usually accepted year. Since the dates in 2Mac. are reconcilable with rMac. only if we assume different starting-points for the Seleucid era in the two books. One must therefore suppose either that these dates are another instance of the chronological inaccuracy of 2Mac., or that the latter used a different chronology to rMac.—that is, the Seleucid era prevailing in the rest of Syria. For a full discussion of the problem, vide Schürer, Hist. of Jewish People in Time of J. C. div. i. vol. i.—C. 3MACABEES. (1) Text and Title. 3Mac. is found in most MSS. of the LXX. and in the two uncials A and V. As it was not received in the Western Church, there is no official Latin version. (The first one made was specially prepared for the Comitataian Polyglot, 1517 A.D.) There is an ancient, but very free, Syriac translation. The title, Μακκαβαίων τρια, seems to be due to the subject-matter of the book, which relates the persecution of the Jews by a foreign king: it is a peculiarly unfortunate one, for any work professes to describe events which occurred during the reign of Ptolemy IV. (Philopator) (222–204 B.C.). (2) Contents. (a) Ptolemy IV. conquers Antiochus the Great at Raphia (217 B.C.). (b) He visits Jerusalem and desires to enter the temple, but is struck with reverence. (c) Ptolemy subjects the Alexandrine Jews to civil disabilities. (d) Enraged at the Jews' devotion, the king orders a universal slaughter. After the scribes had worked forty days to enrol the victims, writing materials failed and the massacre was deferred (2.30–4.21). (e) Ptolemy now orders elephants to be made drunk with wine and incense, and the Jews to be thrown at their feet. (f) But on the morning appointed the king avert; the next day he miraculously forgets his design. (g) On the third day, at the Jews' prayer, angels descend from heaven. All is confusion, and Ptolemy's soldiers are trampled down (5.6–31). (h) The Jews then return to the temple, and the king is sent in the elephant. (i) Ptolemy per- mits them to slay the apostates; they ever after commemorate the deliverance. (3) Integrity and Historical Character. The abrupt beginning of the book with δοδεκαπότερων, the reference to "the" plot (την σπαθικήν), although none has yet been mentioned, and the expression "the before-mentioned companions" in 2.25, shows that an original opening has been lost. Grimm thinks that simply an introductory chapter is needed; but Ewald and others regard 3Mac. as a mere fragment of a large historical work. The evidence is usually regarded as insufficient to warrant this last hypothesis. From a review of the context it seems highly probable that 3Mac. is not an historical record. But whether it has any basis of fact it is impossible to determine. Josephus (Cont. Ap. i. 5) relates an occurrence similar to the elephant story in the reign of Ptolemy VII., in which the miraculous element is prominent, but not so exaggerated as in 3Mac. Doubtless both represent two different settings of a common tradition. Ewald and others regard this as originating in Caligula's attempted sacrilege and the painful consequences of the Jews' resistance. But the fact that in 3Mac. Ptolemy does not claim divine honour is against this. (4) Date, Author, and Style. The date is uncertain. Whether or not the author asserted any connection with 2Mac. cannot be accurately determined (but see Grimm, 214–220). He knows, however, the Gk. version of Daniel (6.6). It is therefore improbable that he wrote before 1st cent. B.C. His style, phraseology, and knowledge of Egyptian affairs would suggest that he was an Alexandrian. He has a large vocabulary, and uses the marked preference for ἡμέρας and "rhetorical word-painting." His work is too rich. It is not a pleasing production, as the style is "bombastic and involved." Hebraisms are rare. In conclusion, observe the author's use of μεγάστος (1.4.10) and ἔψιστος (6.2,7,4), suggesting the influence of Neoplatonism.—D. 4MACABEES. (1) Text and Title. 4Mac. occurs in 8, A, and V, and also in the works of Josephus (see infra). There is an old Syriac version. Another "4Mac.,” still extant in 1566, may have been a Gk. translation of the "Chronicles" of John Hyrcanus referred to in rMac.16.24. The earliest title, Μακκαβαίων δ', is really a misnomer, arising from the fact that the principal part of the work deals with the subject-matter of 2Mac.6 and 7. As the book partakes of the nature of a treatise, it has been referred to as ἔρωμα αὐτοκράτορος λόγιον—i.e. On the Supreme Power of Reason (Eusebius and
Maccabees, Books of

Jerome). (a) Contents. (i) The author desires to show the supremacy of pious reason over the passions (1:1-12). (ii) His conception of reason is moral as well as intellectual (1:17). Wisdom is attained by study of the Torah (1:17). It manifests itself in four cardinal virtues, ὑστερότης, δυναστεία, ἀρετή, σωφροσύνη (1:18). Then follows a series of illustrations to 3:18. (iii) Tyranny of Syrian kings over the Jews (3:19-4:26). (iv) Power of reason illustrated by the Jewish martyrs (5:16-25). (v) Concluding reflections (17-18.2). Most modern scholars regard 18.3-23 (or 18.6-19, Freundenthal) as an appendix added by a later hand, for these reasons: (a) 18.3-5 is apparently inconsistent with 17.20-24. (b) Lack of connexion between 18.1-5 and 18.6-14. But the evidence for this is far from conclusive. (3) Author and Date. Early Christian tradition assigns this book to Josephus (Eusebius and Jerome). Hence 4Mac. is often appended to the historian's works. The erroneous character of the tradition is obvious. (i) From the contents of the book, taken in connexion with genuine works of Josephus and the unhistorical character of 4.15,26.5.1,17.22ff. (ii) The fact that the greater part of 4Mac. is based on 2Mac.—a work unknown to Josephus. Ewald accounts for the tradition by assuming that 4Mac. was originally ascribed to Josephus, which was subsequently confused with the historian. The question of date is largely dependent on that of 2Mac. That Onias is stated to have held the high-priesthood for life (4.1) suggests a period subsequent to the fall of the house of Hasmonean, when the life-tenure was abolished (Grimm). 14.9 seems to imply that the Jews in Alexandria were themselves exempt from persecution, and this would point to a date before their experiences under Caligula in 40 A.D. If there is nothing definitely Alexandrian in the book, yet the general tone and spirit of the writing would suggest Alexandria as its place of origin. (4) Portraits. Though the book is too vapid as history, its literary character is far superior to 2 or 3Mac. Classical constructions are frequent; Hebrewisms very rare. The LXX. is seldom referred to (2.5,19,17.11). Frendenthal suggests that 4Mac. is a specimen of synagogue preaching. This is unlikely; the work presupposes the support of a learned audience whose familiarity with denical lecture would be more apposite. (5) Character and Purpose. 4Mac. was addressed to Jews (18.1), but its affinities are with Gk. rather than with Heb. literature. Its aim is primarily religious rather than philosophical. The author is particularly partial to St. Paul's idea of the one, four cardinal virtues (1.18 vide supra). But he shows himself throughout a devoted patriot and champion of the Jewish faith, and he is so because it is a reasonable faith. We may, however, discern an encroachment of Gk. philosophy in his substitution of the immortality of the soul for the doctrine of the resurrection of the body (9.8-17.18). He seems to have believed in everlasting torment as the necessary correlative of eternal life (cf. 9.9-12.12), and it is noteworthy that he regards the suffering martyr as a vicarious sacrifice for the nation's sin (cf. 6.21-17.22).

4Mac. is an interesting example of the eclectic character of the Philonic school. E. 5Macce-

REES. A compilation of 1 and 2Mac. and Josephus, except ch. 14, where the author is peculiarly inaccurate on Roman history. Probably originally written in Gk. (but possibly in a Semitic tongue), the work only exists in an Arabic translation to be found in the London and Paris polyglots. There is a Latin rendering at the side. It is of no intrinsic value; probably it was written after 70 A.D.—F. Relation of the Books of the Maccabees to the Canon. Until the Council of Trent (1546) 1 and 2 Mac. ranked as "ecclesiastical" (so Jerome), subsequently as "canonical." The Reformed Churches retained the old classification and in Europe received the less recognition from the Church. For the Gk. text of 1-4 Mac. see Swete, Cambridge LXX. (vol. iii). An English version of 1 and 2Mac. is published by the revisers in their edition of the Apocrypha. For books iii.-v. see The Five Books of Macc. in English, by Cotton (Oxford, 1832); New translation of 1 and 2 Mac. in the Latin Text of the Westminster Polyglot, and commentary on 1Mac. in the Cambridge Bible for Schools (1897). For general introduction see Schürer, Hist. of Jewish People in Time of Jesus Christ. [d.c.s.]

Macedonia, the first part of Europe to receive the Gospel directly from St. Paul, and an important scene of the subsequent missionary labours of himself and his companions. It is enough to say here that Macedonia is the region bounded inland by the range of Haemus or the Balkan northwards, and the chain of Pindus westwards, by which the streams flow respectively to the Danube and the Adriatic; that it is separated from Thessaly on the S. by the Thermaic Gulf, receiving its water from Pindus to Olympus and the Aegean; and that it is divided on the E. from Thrace by a less definite mountain-boundary running S. from Haemus. Of the space thus enclosed, the most remarkable physical features are 2 great plains, one watered by the Axios, which runs into the Thermaic Gulf; and the other from Thessalonica; the other by the Strymon, which, after passing near Philippi, flows out below Amphipolis. Between the mouths of these two rivers a remarkable peninsula projects, dividing itself into three points, on the farthest of which mount Athos rises nearly 3000 feet above the level of the sea. A promontory of this peninsula St. Paul travelled more than once with his companions. This general sketch sufficiently describes the Macedonia which was ruled over by Philip and Alexander, and which the Romans conquered from Perseus. The conquered country was divided by Aemilius Paulius into four districts, the Thermaic division was only temporary. The whole of Macedonia, along with Thessaly and a large tract along the Adriatic, were made one province and centralized under the jurisdiction of a proconsul, who resided at Thessalonica. This corresponds with the usage of the term in N.T. (Ac.16.5,10,12, etc.). Three Roman provinces, all very familiar to us in the writings of St. Paul, divided the whole space between the basin of the Danube and cape Matapan. The border-town of Illyricum was Lissus on the Adriatic. The boundary-line of Achaea nearly coincided, except in the W. portion, with that of the kingdom of modern Greece, and ran in

MADON

MADON, one of the royal Canaanite cities. Its king joined Jabin and his confederates in their attempt against Joshua at the waters of Merom (Jos.11:2,10). Probably the ruin Madin, close to Hazin, W. of the sea of Galilee. It is the Madna of the list of Thothmes III. (No. 20), in 16th cent. B.C. [c.r.c.]

Maelus (1 Esd.9.26) = Miamin, 1.

Magbush, a proper name in Ezr.2.30, apparently, like others (vv. 21-35), the name of a place. Noticed with Nahum and Elam in Judah. The site is unknown. [c.r.c.]

Magdala. In the received Gk. text of Mt.15.30 only; but the Sinai and Vat. MSS. read "Magadan." Into the limits of Magdala Christ came by boat, over the lake of Gennesaret, after His miracle of feeding three thousand on the mountain of the N.E. side. This Magdala, which concerned her name on "Mary the Magdalene," was probably the place mentioned in the Jerusalem Talmud (Erubin v. 1) as near Tiberias, and is the modern el Mejdel, a small village, 3 miles N. of Tiberiach, lying at the water's edge at the south end of the plain of Gennesaret. In Mk.8.10 Dalmatultha stands for Magdala. This is probably the Aramaic De Almanutha (place of high buildings), equivalent to the Heb. migdal or "tower," which here barred the shore road at a point where the hills are close to the lake. [c.r.e.]

Magdul, one of the "dukes" of Edom, descended from Esau (Gen.36.43; 1 Chron.1:54).

Maged (Mace.5.36). [MAKED.]

Magi. 1. (a) The name Magi originally belonged, according to Herodotus (i. 107; cf. Aeschylus, Persae, 310), to one of the Median tribes. The Magi were evidently, from the first, famous for their divinations, and members of the tribe were attached to the Persian court as soothsayers (Her. i. 107, 128). In fact, the word magus comes to be used simply = "soothsayer" (vii. 10, etc.), and this is its normal meaning in classical Gk. (cf. Soph. O. T. 387). The divinations of the Magi were especially connected with astrology (Her. vii. 137; cf. Soph. O. T. 387). In O.T. the divinations of the Magi are associated with them. In Jer.33.13 the title Rab-Mag (formed on the analogy of "Kabarsis," "Rabshakeh") seems to: "chief of the Magi." Probably this is the same office as that alluded to in Dan. 5.11 (βασιλεύῃ τοις θηρίοις μαγοί) but for another view see RAB-MAG. Other allusions are Dan. 2.22-21,37. In N.T., besides the γαργαζ. of Mt.2, we have the verb γαροζεῖν in Ac.8.9 (used in a bad sense).—II. (a) The Magi of Mt.2 probably came from Yemen in S. Arabia. The inhabitants of that region were brought much into contact with the Jews by trade, and were considerably influenced by Judaism. They were, in fact, to have ultimately abandoned their own country and religion; for, while Yemen inscriptions of 270 A.D. speak of the heathendom of the land, those of 458 and 467 A.D. speak of the heathen deities, but of one Rahim-dan—as a name which seems to be connected with the Heb. "Rahman"—the context shows that this ear art. "Yemen" in Eusebius of Caesarea, etc. (b) The following facts also illustrate the narrative in Mt. 2:—(a) The old heathen religion of Yemen, which was at this time, in spite of Jewish influence, the national religion, included the worship of the sun and moon. Such a worship might very well be connected with astrology (cf. Mt.2.2;6,9,10). (b) The district in which the framers of this legend search (16 Strabo iv. 1; ib. vii. 22; B.L. 60), and an inscription of Tiglath-pileser II. (733 B.C.) mentions Saba (which was part of Yemen) as paying tribute in gold, silver, and incense, and in Annals of Sargon (715 B.C. Saba is mentioned as paying gold and spices (1 K.10.2,10). (3) Moreover, in support of the credibility of the whole story in Mt.2, the following facts are worth noting: (a) An expectation about this time, the coming of the Messiah (cf. Mk.1:7; Jn.1:9ff.). (b) A widening sympathy which showed signs of extending the Messianic hope to the Gentiles (cf. Tob.14.6,7). (c) A widespread feeling outside Judaea that the time was ripe for the coming of a Deliverer Who should rule the world in peace. This feeling was moulded partly by Jewish influence. It finds expression in Virgil's Fourth Eclogue, which seems similarly to show some Jewish influence. See a recent volume of essays by Prof. Mayor, Mr. Warde Fowler, and Prof. Conway on "Virgil's Messianic Eclogues" [St. Ann's Widens.] [c.e.r.]

MAGIC, MAGICIANS. The conception of magic is found in every people and in every stage of a people's development—in its simplest form in those whose social evolution has made the least advance, while its most luxuriant overgrowth has been attained in places and ages in the past where civilization has been most highly developed. It originates (a) An expectation about this time the coming of the Messiah (cf. Mk.1:7; Jn.1:9ff.). (b) A widening sympathy which showed signs of extending the Messianic hope to the Gentiles (cf. Tob.14.6,7). (c) A widespread feeling outside Judaea that the time was ripe for the coming of a Deliverer Who should rule the world in peace. This feeling was moulded partly by Jewish influence. It finds expression in Virgil's Fourth Eclogue, which seems similarly to show some Jewish influence. See a recent volume of essays by Prof. Mayor, Mr. Warde Fowler, and Prof. Conway on "Virgil's Messianic Eclogues" [St. Ann's Widens.] [c.e.r.]

stand how any person thus suspected comes to believe that he possesses this power, or how he continues to exercise it when he is convinced that he does possess it. In the former there is little difficulty: most of our beliefs are " suggested" to us, and, when the suggestion is that one is an extraordinary person, to be respected, feared, flattered, and courted for the sake of powers genuinely believed to be possessed, it is not in human nature, as a rule, to resist the flattering imputation. The magician finds, however, at times, events attributed to him of which he is totally unconscious; and while he is thus sometimes a magician malgré lui, on the other hand he finds that when he wants to exercise his powers he cannot always accomplish his end. To infer from this, as his magician's power is established or confirmed. That this early form of magic is symbolic seems indicated by the way in which illnesses believed to be thus caused are also cured by a magician. He symbolically takes a bone, sharpens it, points it in the direction of the person to be injured, and sings the name of the victim, mentioning the death which he is to die. He may not die, for the magician's power is not completely at his own command; but if he does, and sometimes he does, the magician's power is established or confirmed. That this early form of magic is symbolic seems indicated by the way in which illnesses believed to be thus caused are also cured by a magician. He symbolically takes a bone of this kind as it were from the body of the invalid, and the illness is removed.

We have now to look at magic objectively. From the point of view of the sick person and his friends, the magician who caused the illness or death was a malefactor, and as such was not infrequently killed by the relatives of the deceased—not, however, because he was a magician, but because he was a murderer. The proof of this is the fact that while the victim is ill, but not yet dead, his relatives call in the assistance of another magician to cure him by defeating the magic which is producing the illness. The community as a community has no feeling against magic as magic, but only against murder, whether committed by a magician or by any other one else. This is because the idea that he shall not suffer a witch to live is one which did not, and could not, arise at this time and under these circumstances; the idea can only arise when magic or witchcraft is condemned by religion as a deadly offence against religion.

When so condemned—as it is in O.T.—it is because magic has come to imply dealings with supernatural beings other than God. This introduces us to a fresh stage in the evolution of magic. The magician is conceived as no longer producing his results directly, but as using his power to control or coerce spirits to do his will. Such spirits must be those that are essentially our contemporaries. They themselves possess capable of such treatment, i.e. others than those whom the community worships. Magic thus comes to be in avowed opposition to religion; it can only grow at the cost of religion, and religion demands its suppression, or, rather, should demand it, in its own interests and those of the community—a fundamental condition, without which religion cannot continue to exist, is that with the Lord magic is assumed both by those who practise it and by those who condemn it. Where, on the other hand, witchcraft is no longer a capital offence, and where it is only as obtaining money under false pretences that the witch comes within the grasp of the law, it is evident that the community as a whole does not believe in magic. In either case, whether the belief in magic is impious or an absurdity, it is offensive to and condemned by religion. At first magic is believed—rightly or wrongly—to be real and eventually it becomes a pure delusion; and the method of combating it is necessarily different in the two cases. Where its reality is believed in, religious minds must and do believe that it cannot stand against the power of God and His chosen agents. Amongst the Jews it was believed in, and from the times depicted in the Exodus to those portrayed in the Acts. When Aaron cast down his rod and it became a serpent, the Egyptian sorcerers and magicians " did in like manner with their enchantments [or, secret arts]"; but Aaron's rod swallowed up theirs. Daniel, when put to the test with the magicians, succeeded where they utterly failed. Where S. Barnabas and Paul were at Paphos, Elymas, a Jewish sorcerer, withstood them, but he was struck blind for a time at the word of St. Paul (Ac.13.6-12). At Ephesus, certain Jewish exorcists signal failing, both Jews and Greeks were afraid, and abandoned their practice of magical arts. Whether magic be a real or a mischievous delusion, it cannot stand against the power of God; nor can it be tolerated by religion, for it sets itself up as a rival to religion, and is incompatible with whole-hearted service, or service of any real kind, to God. If we do
not recognize this fact, we can find no justification for the sternness of O.T. towards witchcraft; if we do recognize it, we shall pause before we venture to think that its severity was the result of superstitious need. The idea of magic and its condemnation by the law illustrate the growth of magic and all stages of its evolution, as set forth above. Thus a magician is naturally called "a worker of hidden arts" (m'ro'šèn, one who acts covertly). Again, the person who produces illness and death must, ipso facto, know how to do so (yiz'qāḏ;—a word used especially of "a wizard" and of false prophets), because he knows how to do these things which are secret and hidden from ordinary people. Further, as we have seen, the person who has the knowledge and the power to work these secret arts, when he comes to work them by sending forth his power, says that he does so; he says that he becomes a wolf, or that his victim is to die such and such a death. His words are thus a spell or enchantment, and he is condemned by the law as an "enchanter" (mrkhash'āḇēh, one who uses incantations). In these, the earliest, forms of magic, we have power to produce disease, sickness, and death. The magic of hidden arts operates directly on the victim. It marks, however, a later stage in the evolution of magic when the wizard, instead of operating directly, confers upon some object the power of causing or averting death or illness or other misfortune. In such cases he becomes "a fabricator of charms," (ḥāḇēr 'ēḇār) or is accused of using material charms or amulets. In the time of Ezekiel (13.17ff.) such amulets seem to have been made and sold by women for a low price. A late stage in the evolution of magic has also been reached when the magician prefers to foretell future events rather than to bring them about or avert them. This is shown by the description of Joseph's cup (Gen.44.5) as that "in which my lord drinketh and whereby indeed he divineth." This method of divination, which was in use in the Egypt of Joseph's time, is still practised in the Egypt of to-day; in the liquid, now generally ink, which the vessel contains, those who have the power to do so descry scenes which are taking place at a distance, or events which will take place in the future. "Scribing" nowadays, whether done by means of a bowl or of a crystal-ball, may be, as it is, generally considered futile and absurd, but it is not at the present time generally realized to be and is, evidently, that which has been felt to be so in Joseph's time. But it came to be offensive to the Hebrew religious consciousness; and amongst those condemned by the law we find the "practiser of divinations" (gōšēm q'sāmim). This transference of divination from the class of things permitted to the class of things forbidden to the Jews is a point of great significance for the history of religion; for the religious doctrine was not at first felt to be forbidden by religion, so amongst other peoples the forms of magic just enumerated—the knowledge and the power to produce wonderful effects, either directly by means of spells or indirectly through amulets or charms—are not felt to be in themselves, however, religiously wrong, amongst the Australians, the medicine-man is supposed, in some cases, to have received his magical power from such supernatural beings as Baiame, Daramulun, or Bunjil. But when the medicine-man is supposed to obtain his wonderful power from the god of the community, then, as the community is under the protection of its god, the power obtained from this source cannot be used against the welfare of the community and its members, but only for its protection and its promotion. It is thus used in many places for procuring rain. Or it may be used to counteract the magic of evil-doers, or to dispose of disease. A popular form of magic is the "sorcerer." But when its use is thus sanctioned by religion and practised by priests, the tendency is to run to such extremes that, e.g. amongst the Hindoos, to procure sickness: thus in Babylonia the exorcist says that it is by the command of the god Marduk that he, by magic, undoes the magic of the sorcerer. But when its use is thus sanctioned by religion and practised by priests, the tendency is to run to such extremes that, e.g. amongst the Hindoos, to procure sickness: thus in Babylonia the exorcist says that it is by the command of the god Marduk that he, by magic, undoes the magic of the sorcerer. But when its use is thus sanctioned by religion and practised by priests, the tendency is to run to such extremes that, e.g. amongst the Hindoos, to procure sickness: thus in Babylonia the exorcist says that it is by the command of the god Marduk that he, by magic, undoes the magic of the sorcerer.
dead (dorosh el-hammitthim) is a necromancer in the literal sense of the term. With regard to his functions, we find (a) amongst other peoples, ghosts appear as having a knowledge of the future beyond that possessed by the living; (b) that the power of consulting and communicating with the dead is, like divination by means of the cup, forbidden as a real, and not as an unreal, possibility. When Saul commanded the witch of Endor to call up the shade of Samuel, he had no doubt of her power, or that the exercise of that power was forbidden. The Heb. m'nahesh, translated “an augurer,” is from nābash, lit. “he or it hissed or whispered.” Evidently, therefore, such an augurer is one of those of whom Isâkâ 9.7. refers to the Hebr. shōl' ébh which chipp and that mudder.” Such hissing and chirping, muttering and whispering, indicate that the augurer or wizard was the instrument through which a ghost whispered or muttered its message, for it is a widespread belief that ghosts gibber. Spirits, other than ghosts, might also take the form of a bird. The Heb. 16:19—’shēl ‘ebh means “divining by a charm,” and this class of persons must belong to the “practisers of divination” mentioned above. But if the traditional interpretation of ‘ébh as “a bottle” be adhered to, then the bottle was, of course, made of skin, and belongs to the class of pouches, medicine-bags, etc., which the medicine-man, among some of the Hebr. peoples, uses as the receptacle for the small objects which he employs in the discharge of his functions. These small objects may be pebbles, bones, etc., and are believed to be the abode of, or to be animated by, a spirit, who may be consulted by an aid and assist the man who possesses them. Only the owner has access to the spirit, and because he is the only person who becomes familiar with the spirit, the spirit becomes his “familiar spirit.”

The mental attitude of the person thus brought into relation with a spirit whom he consults and to whom he defers bears a certain analogy to that of a priest or worshipper to his god: offerings may be made and requests preferred to it. Amongst many peoples it is probable that such spirits, when, or if, they come to be accessible to other persons as well as to their owner, come to have a congregation of worshippers, and so may become first family gods and then perhaps tribal gods. The possibilities of such a development amongst the Hebrews was Effectually stopped by the prohibition of the law above quoted, and by the fundamental principle, “The Lord thy God is a jealous God”:

 Thou shalt have none other god but Me.”

The fundamental fact in magic is that the magician combines within his power to impinge on the will on nature and even on the gods. That is the reason of the conflict of magic both with religion and with science. The truth is that it is only by co-operating with nature and by doing God’s will that man can realise his function. The attempt of man to impose his own will in either case simply impedes and obstructs the progress of the world. Religion and its war with magic was fighting the cause of science; and religion declared war upon magic long before science did. Indeed, until comparatively recent times (as, for instance, in the case of alchemy) science and magic have scarcely been conscious of their fundamental antagonism to each other: while even at the present day, outside Christianity, magic has intertwined itself with religion even more closely than it did with chemistry. Magic, then, has always been essentially a parasitical growth; it clings to science and religion, and as it tightens its hold upon them it chokes them. The fact that it is found from the earliest times growing up with them has misled some investigators into the fallacy of imagining that the parasite springs from the same seed as the tree to which it clings. In fact, however, they grow from different roots—magic from an overweening confidence in human power, religion from a feeling of possibilities; religion and science from the humility of spirit with which man feels that he is in the presence of God and of the works of God. We may indeed avail ourselves of the laws of nature and of the grace of God; but first we must seek them, and seek them for the purpose of demonstrating their truth. On the other hand, seeks to impose the human will on nature and even on the gods. The fact that the distinction between magic and science is not clearly present in the consciousness of the astrologer or the chemist constitutes no proof that magic is the same thing as science. By their fruits they are known; if the thorn does not bear grapes, it is because the thorn is not a vine. So, too, the fact that in low religions, or in the lower forms of high religions, magic flourishes in the guise of religion, constitutes no presumption that magic is the same thing as religion, or that religion is but a variation of magic. What is required for the ultimate destruction of magic is a recognition of the fact that the magician simply has not the power which he is believed both by himself and by others to possess. But the discovery and establishment of that fact is retarded for ages by what we may term the “protective colouring” of magic, by the aid of which magic passes itself off as science or religion. It was by simulating science that magic survived in alchemy and astrology; the really valuable, the truly scientific, elements in alchemy and astrology were truths of nature which were not dependent on any magical power. In the same way magic found its way into many forms of religion, and was thus erected into in some cases never—expelled. But even into the lower forms or stages of religion it could only find its way by divesting itself of some of its characteristics—e.g. its anti-social character. The beneficent magician might be accepted, where the evil one was banned. When, however, magic thus accepted was only a stage in religion, it might come to dominate religion or it might slowly be ejected from the religious system. In the case of the anti-social magician, the magical rites used are supposed to constrain the gods to do the will of man, or to enable the
person using them to become a god, as in ancient Egypt and amongst some African tribes at the present day. In the case of the beneficent magician, the power of the exorcist or rainmaker actually passed to him. It came to be regarded as exercised by the sanction and under the authority of the god whose name he invoked, e.g. the Babylonian exorcist quoted above. Elsewhere, rites for producing rain, for instance, are still performed as a matter of tradition, but probably clearly derived from the part of those who perform them, that they once were magical when accompanied by the utterance of a prayer to the god who is to send the rain. Where such is the nature of the case, it is manifest that we have a parallel to the process by which magic was purged out of alchemy and the religions of Mesopotamia. The notion of Magog both of religion and of science, the idea of magical power is discarded; it is by, and in, obedience to the laws of nature and the will of God that man must act.

As in the case of science, so in the case of religion; it is a fallacy to identify magic with religion merely because the magic which in ancient times succeeded the incantations of Egypt is slowly expelled from it. [F.B.L.

Magiddo (1Esdr.1:29). [Megiddo.]

Ma-gog (Heb. магог) is applied to a land or people. In Gen.10:2 Magog appears as the 2nd son of Japheth in connexion with Gomer (the Cimmerians) and Madai (the Medes): in Ezk.38:2;39:1,6 Magog is a concomitant of people, noticed with Meshech (the Moschi), Tubal (the Tibarini), and Rosh. There is evidently implied an etymological connexion between Gog and Ma-gog, the Ma being regarded by Ezekiel as a prefix significant of a country. In the Akkadian language Ma meant "land" or "people", and it is possible Magog would lead us to fix a N. locality; not only did all the tribes mentioned in connexion with it belong to that quarter, but it is expressly stated by Ezekiel that Gog was to come up from "the sides of the N." (39:2), from a country adjacent to that of Togarmah or Armenia (38:6), and it is above all the land of the marauding nations of Asia Minor (39:6). The people of Magog further appear as having a force of cavalry (38:15), and as armed with the bow (39:3). From the above data, combined with the consideration of the time at which Ezekiel lived, the conclusion has been drawn that Magog represents the Scythians, who invaded Palestine about 620 B.C. Gog has, however, also been connected with Gug (Gyes), king of Lydia, who fought against Assur-bani-pal about 660 B.C., and was subsequently slain by the Scythians; in which case Magog was in Asia Minor. [C.R.C.

Magor-missabib (lit. terror on every side), the name given by Jeremiah to Pashur the priest, when the latter smote him and put him in the stocks for prophesying against the idolatry of Jerusalem (Jer.20:3; cf. 1). It is a common phrase in 1Cr. (6:25; 29:10; 46:5; 49:29), and only found besides in Lam. 2:22 and Ez.3:13.

Magpiash, one of the heads of the people who sealed the covenant (Neh.10:28).

Mahalah, a child (prob. daughter) of Hamannoketh, Gilead's sister (1Chr.7:18).

Mahalaleel, gen. 4. In the line of Seth, and son of Cainan (Gen.5:12ff.; 1Chr.1:2).—2. A descendant of Perez, or Herez, the son of Judah (Ne.11:4).

Mahana'im, two camps. It is said that this place was so named when Jacob, camping there, saw "the camp of Elohim" (Gen.32:3); and, if Seccoth was N. of the Jabok stream (32:22;33:17), Mahanaim must have been S. of the brook: which agrees with its being the capital of S. Gilead in the time of Solomon (1K.4:14). It was on the border between GAD, holding the W. of Gilead, and MANASSEH, holding the E., as far S. as this city (Jos.13:26;30). It was given to the Levites (21:38), and became the capital of Saul's son Ishboseth (2Sam.2:12;29). David fled to Mahanaim, and it was then a city with walls and a garrison, and good pasturage (1Sam.4:13;19:32;22:3). It was a region called kikkairs (perhaps the Jordan valley) on the way to the town (18:23), but in which direction is not clear. The most probable site is Mukimah, a large ruin N.E. of Es Sall, and on W. side of a remarkable plain or basin in S. Gilead. The term mahâne in Heb. and Aram. is used for camp or encampment. It went for camp or encampment in the wilderness (2K.2:7), and was the usual term for the camping-places for pastoral tribes. It is sometimes thought that there is an allusion to Mahanaim in Canticles (6:13), where the LXX. reads, "What would ye see in the Shunamite" (for Shulammite) coming as the dancers of the camps": but this may be only a sarcastic allusion to camp-followers, when the "prince's daughter" was asked to turn round, that her face might be seen. [C.R.C.

Mahaneh'-dan' (camping place of Dan; Judg.13:25;18:12). This was a flat open valley, near Zorah and Eshtaol, and close to Kirjath-jearah on the W. It was the open valley of the Shebna, in which Zedekiah escaped by a gorge by which it leaves the mountains near Jerum. The gorge in question is perhaps the "jaw" of Lehi. [Ramath-lehli]. [C.R.C.

Maharai' (2Sam.23:28; 1Chr.11:30,27:13), an inhabitant of Netophah in Judah; of the family of Zerah; one of David's captains.

Mahath, 1. A Kohathite; ancestor of Heman (Est.6:35). [Ammorim, 2. Also a Kohathite, son of Amasiel; who assisted in the purification of the temple under Hezekiah (2Chr.29:12). He was apparently the same as the overseer of the tithe (2Chr.31:13).

Mahavite, The, the designation of Eliel, 5. in 1K.11:46. The meaning is uncertain.

Mahazioth', son of Heman, and head of the 23rd course of temple-musicians (1Chr.25:4).30.

Mah'er-shalal'-hash -bazz' (prob. the spoil speedeth, the prey hasteth), son of Isaiah, whose name was given by divine direction to indicate that Damascus and Samaria were soon to be subdued by the king of Assyria (2K.17:4).

Mahelah, the eldest of five daughters of Zephophehad (Num.26:33,37;1.36,1; Jos.17:3).

Mahli, 1. The son of Meri, the son of Levi (Num.3:20; 1Chr.6:19,29;24:26; Ezr.
MAHON

8.18), and ancestor of the Mahlites (Num.3.33,26,58). In 1 Chr.6.29 there is apparently a gap in the text, Libni and Shimei belonging to the family of Gershom (cf. vv.20,42), and Eleazar and Kish being afterwards described as the sons of Mahli (23.21,24,28).—2. Son of Mushli, and grandson of Meir (66.33,24,10). Mahlon, the first husband of Ruth. And Chilion were sons of Elimelech and Naomi, and are described as “Ephrathites of Bethlehem-judah” (Rv.1.2,5,4,9,10; cf. 1 Sam.17.12).

Mahoi, the father of Ethan the Ezrathite, and of Heman, Chaleol, and Darda, the four men most famous for wisdom next to Solomon himself (1 K 4.31). Who in 1 Chr.2.24 these sons and the immediate descendants of Zerah. “Sons of song” or “of the dance” has been suggested as an alternative translation for Mahol.

Malaneas (1 Esd.9.48) = Maasseiah, 7.

Makaz, a place named only once (1 K 4.9) in the specification of the jurisdiction of Solomon (2 Chr.8.10). It is mentioned in Scripture as Makkedah’s place, which may have been discovered, but the district was in the hills of Dan, N.W. of Jerusalem. [C.R.C.]

Maked, or Maเกd, was one of the “strong and great” cities of Gilead into which the Jews were driven by the Ammonites under Timotheus (1 Mac.5.26,36). Apparently in the head, not far from Ashhtaroth. But it may be the ruin el Mejid, N. of Rabbath-ammon. [C.R.C.]

Makheleth (Num.33.25 only), a desert encampment of the Israelites; named second after Shapher, and thus probably some 20 miles N.E. of Tell Asfar, before reaching Tahath (looting) the descent to the Arabah. [C.R.C.]

Makkedah, a royal Canaanite city (Jos.12.16) to which Israel pursued the Amorites from Ajalon, and where the five Amorite kings, hiding in a cave, were captured (10.10,16ff.). It appears to have been near the N. border of Judah, since it is mentioned with Beth-dagon (15.41); and the other town of the same name, Makkedah, has not again noticed. It is probably the town called Makida in the Amarna letters (Berlin 72, 113-115), which was defended by Biridia, and is noticed in connexion with Gezer, and with a fleet on the sea: for Makkedah is near the sea, and Megiddo seems too far N. and too far inland to be meant. This applies also to the Makkedah of the list of Sharon (No. 27) in the 10th cent. B.C., since it is noticed (as Maspero remarks) with places in the Sharon plain. (See Surv. W. Pal. ii. pp. 414-413, 427.) [C.R.C.]

Makteh, a place, evidently in Jerusalem, the inhabitants of which are denounced by Zephaniah (1.11). The meaning of “Maktesh” is probably a deep hollow, literally a “mortar.” Perhaps the deep, wide valley separating the upper city, on the S.W. hill, from Akra on its N. [C.R.C.]

Malachi. A Title. The name “Malachi” does not occur elsewhere, and as it is identical in form with the Heb. for “my messenger,” it has been doubted whether it is a proper name at all. If it is, it may mean: (1) “My [i.e. Jehovah’s] messenger”; (2) “Messenger of Jah” (a contraction, that is, of Malachiah; but again, on the analogy of such names as Abijah, this might mean rather Jah is messenger). The LXX. interprets both of Jehovah’s having Malachies in the head title, but δυνατοι αναγον in 1.1. The Targum has “By the hand of my messenger whose name is called Ezra the scribe,” a tradition which Jerome accepts. Ewald, Wellhausen, Stade, and others consider the title is due to the compiler of the book of the Twelve Prophets, who soloook the name in the Heb. for “messenger,” and has chosen for its interpretation one of Jehovah’s having worthy of their spiritual ancestry by bringing blemished offerings to the altar of Jehovah and neglecting the temple service. (3) 2.10-4.3, a series of oracles: (a) 2.10-16, against foreign marriages (some interpret this metaphorically: Judah has abandoned the religion of his youth). (b) 2.17-9.20, a declaration of Jehovah’s justice. (c) 3.7-12, a digression to censure the people for not paying their tithes. (d) 3.13-4.3, similar to (b), an announcement of coming judgment. (4) 4.4-6, conclusion: let them obey the Mosaic law, and Eljah shall come to heal dissension and so avert the threatened doom. Quotations in N.T. 1.2.1; 2.1.1; 2.3.1, 9.13; 3.1 in Mt.11.10 = Mk.1.2 = Lu.7.27.—C. Date. The book most undoubtedly belongs to the age of Ezra and Nehemiah. The temple has been completed (1.10,3.1.10). The Persian governor is alluded to (1.8). The problems referred to are those Ezra and Nehemiah had to face—neglect of temple service, foreign marriages, non-payment of tithes. It seems impossible to indicate the date more precisely. Did the prophet “prepare the way for Ezra’s reform of 458, or for the covenant to which Ezra and Nehemiah jointly bound the people in 444, or for the reforms instituted by Nehemiah at his second visit?”—Chadwick. Characteristics. (1) The most distinctive point of contrast between Malachi and the other prophets is his insistence upon the importance of ritual. He desires correct ritual observance, however, not for its own sake, but as an expression of the proper attitude toward spiritual realities, and as the support of a moral life. (2) The literary style of the book is also peculiar. It assumes a dialectic form—the prophet states his proposition, and then follows a supposed objection to it, which he proceeds to refute, adding an elaboration of his original statement. (3) As contrasted with Haggai and Zechariah, Malachi is more severe upon
his own countrymen, and regards the impending judgment as limited to Israel. (For bibliography, see Halakah) [D.C.S.]

Malachy, the prophet Malach (2 Esd. 1. 40).

Malcham', A.V., more correctly Malcam, R.V.—1. A variant of Milcom, god of Ammon. [Molech].—2. One of the sons of Shaharaim, the Benjamite, and his (Moabitic) wife Hodesh. The name should probably be some compound of Milcom, and is given in a shortened form (1 Chr. 8.9). [W.S.T.C.]

Malchiah,—1. A Gershomite Levite, ancestor of Asaph the minstrel (1 Chr. 6.40).—2. One of the sons of Parosh, who had married a foreign wife (Ezr. 10.25), as had also—3. A "son" of Harim (10.31). [Malchijah, 4.—4. Son of Rechab, and ruler of Beth-haccerem, who repaired the Dung Gate of Jerusalem (Ne. 3.14).—5. "The goldsmith's son" (1 K. 21.1).—6. A priest of the fifth of the twenty-four courses appointed by David (1 Chr. 24.9).—7. The son of Hammelech (1 Chr. 26. 6, R.V. "the king's son"; cf. A.V. of 1 K. 22. 26, 2 Chr. 28.7), into whose dungeon or cistern Jeremiah was cast. From a comparison with 1 K. 22.26, 2 Chr. 28.7, and 1 Chr. 29.26, it would seem that the title "king's son" was official, like that of "king's mother," and applied to one of the royal family, who exercised functions somewhat similar to those of Potiphar in the court of Pharaoh.

Malchiel (Gen. 46.17), the son of Beriah, son of Asher, and ancestor of the Malchielites (Num. 26.45). In 1 Chr. 7.31 he is called the father, i.e. founder, of Birzavith.

Malchijah,—1. A priest, ancestor of Adahiah (1 Chr. 9.12), = Malchiam, 7 (Ne. 11.12; J.e. 38.1) and Malchian (1 K. 11.30) of the fifth of the twenty-four courses appointed by David (1 Chr. 24.9).—3. A Levite of the sons of Parosh, who put away his foreign wife (Ezr. 10.25).—4. "Son" (= "descendant") of Harim, who, with Hashub, repaired part of the wall of Jerusalem, including "the tower of the furnaces." Perhaps the same as Malchiam 3 (Ne. 3.11).—5. A priest who sealed the covenant (10.3); if a family name = 2.—6. One of the priests who assisted in the dedication of the restored wall of Jerusalem (12.12).

Malchiram', one of the sons of Jecamiah, i.e. king Jehoshaph in (2 Chr. 18).

Malchi-shua', a son of Saul (1 Sam. 14. 49, 31.2; 1 Chr. 8.33, 9.39). Nothing is known of him beyond the fact that he fell, with his two brothers and before his father, in the early part of the battle of Gilboa.

Malchus, the high-priest's slave whose right ear Simon Peter cut off with his sword at the arrest in the garden (1 K. 18.10; cf. Mt. 26.51; Mk. 14.17; Lk. 22.51). One of his kinsmen afterwards recognized St. Peter in the house of Caiphas (1 K. 18.26). It has been noticed that only "the physician" mentions the healing of the ear. Malchus was not an uncommon name in Syria, being a Gk. form from a Heb. root, mentioned several times by Josephus and others. [C.L.F.]

MALLOWS

Malefactors. [Thieves, Two; Law in O.T.]

Mal'eelel (L. 3.37), the Gk. form of Malaleel.

Mallos, They of, who, with the people of Tarsus, revolted from Antiochus Epiphanes because he had bestowed on them some of his concubines (2 Mac. 4.30). Mallos was an important city of Cicilia, at the mouth of the Pyramus (Seihun), on the shore of the Mediterranean, N.E. of Cyprus, and about 20 miles from Tarsus (Tarsus).

Malloth', a Kohathite, one of the 14 sons of Hanan the singer, and head of the 19th course of temple-musicians (1 Chr. 25.4, 26).

Malloths (Job 30.4 only; Heb. mallowah), i.e. some species of Oracbe, probably the Atriplex halimus. R. Levi (on Job 30), Luther, and others, with the Swedish and old Danish versions, hence understood "nettles." Others suggest some species of "mallow" (malata); e.g. (Sprengel) the "mallow" (Atriplex olitorius). This same mallow is still eaten in Arabia and Palestine, the leaves and pods being used as a pot-herb. But the Atriplex halimus has the best claim to represent the mallowah. The Heb. word is derived from mela'h, salt; and the Gk. name Halium signifies salt. R.V. reads salt-wort. Wyckoff's "orbeis" (herbs) has simplicity in its favour. Pliny refers to the Halium probably when he says (xxii. 22): "Others affirm, that Alimon is a sea-wort, of a salt and brackish taste, whereof it had the name. The leaves be round and yet after a sort long withall; and the whole herbe is highly commendable for the pleasant tast, and good to be eaten." (Holmann's translation, 1601, B. 128, 129). [N.C.R.]
Malluch.—1. A Merarite Levite; ancestor of Ethan the singer (1 Chr 6.44).—2. One of the sons of Barzillai (1 Chr 27.31).—3. One of the kings of Judah (2 Chr 31.32), who had married foreign wives.—4. A priest or family of priests (Ne 10.4), and—5. One of the "heads" of the people who signed the covenant (10.27).—6. One of the families of priests who returned with Zerubbabel (Ne 12.2); probably the same as 4.

Mam'tanai'mus, a name in the lists of 1 Esd.9.34, which occupies in Ezr 10.37 the place of "Mattaniah, Mattenai," of which it is a corruption.

Mam'rob, an Amorite of Hebron, in alliance with Abram (Gen 14.13). Abram camped under the oaks of Mamre (15.3, 2 Chr 11.18 14.13, 18.1). The "tree" (14.14) was W. of the cave of Machpelah (23.17), which was in Hebron (ver. 19), and was near the city (25.9, 35.27.49.30.50.13). The oak was shown in 4th cent. A.D. at Râmé el Khallil ("Abraham's tank"), N. of Hebron, and was then cut down. It was afterwards shown W. of the city, like the present Ballûtèt es Sebta, or "oak of rest." [C.R.C.]

Mamu'chus (1 Esd.9.30) = Malluch, 2.

Man represents (1) 'āḥām, i.e. generally, including both sexes, Gk. ἄνδρος, mostly collectively, the human race; as a proper name, Gen.4.23.5.1ff., 1 Chr 1.1. (2) 'ēnōsh, of similar use, but chiefly poetic. (3) 'ish, man, distinguished from woman, hence husband, Gk. ἡμερ. (4) bā'āt, owner, lord, hence husband, also inhabitant. (5) zākhār, a male, Gk. ἄνδρα. (6) wāṭthis (only pl}], properly, "males," but sometimes men generally. (7) qebhr, qibbōr, mighty man, warrior. [Soul: Spirit: Future Life; Adam.] [C.H.]

Man, Son of. [Son of Man.]

Man of Sin. [Thessalonians, II: Antichrist; Paul.

Manaen (Gk. Μαναήν, Heb. מנהם), mentioned (Ac 13.1) as one of the "prophets and teachers" at Antioch at the "separating" of Saul and Barnabas. The name signifies consoler, and implies Jewish descent. There is nothing except the name to connect him with the Naanaem (Маанан) mentioned by Josephus (15 Adv. x. 5), who was an Essene of great repute, enjoying the favour of Herod the Great, because in early life he had foretold that prince's greatness. But some relationship is possible. What is the exact meaning to be attached to Μανάην του τεταρτάρου σιωπόρος (Ac.13.1)? The Herod must be Antipas, called "tetrarch" in Luke (3.1, 19), son of Herod the Great. The word σιωπόρος (A.V. which had been brought up with; A.V. marg, and R.V. foster-brother) is capable of two interpretations, "foster-brother" (con-lectantenus) or "school-mate." The frequent occurrence of the name in inscriptions and with reference to kings makes it improbable that what is implied in "foster-brother" should be taken literally. The idea of "companion in education" is simpler and more frequently possible, and Josephus states (17.1) that Antipas and Archelaus were brought up in a private house at Rome, whither Manaen may have accompanied them. But there is much to be said for interpreting the phrase as a mere court-title (cf. 1 Chr 27.33; 1 Mac 1.5 2 Mac 9.29) from which the literal connotations had disappeared (cf. Deissmann, B.S. p. 372). This sense, if true, would add to Manaen's importance as a Christian convert, and as the possible source of St. Luke's special knowledge of the Herodian family history. [E.H.P.]

Manahath, son of Shobal, and descendant of Seir the Horite (Gen 36.23; 1 Chr 1.40).

Manahath. The Benjaminites of Gibeon removed to Manahath (1 Chr 8.6), which was probably in the lot of Benjamin; but "half the Manahethites" (2.52) came from Kirjath-jearim, so that the town would lie on the border of Judah and Benjamin, S.W. of Jerusalem. This is the situation of the town "Manocho in the plain" (2 Sam 3.31), 15.50 [Eltekon], and it answers exactly to Māthlah, 3 miles S.W. of Jerusalem, on the border of Judah and Benjamin. [C.R.C.]

Manas'ssens (1 Esd.9.31) = Manasseh, 3.

Manasseh (making to forget). The name of the eldest son of Joseph, by his Egyptian wife Asenath, and so rendered, and I öğrenci to Joseph's exclamation at his birth (Gen 41.51). It is remarkable, however, that the name king Manasseh, son of Hezekiah, as spelt (Me-na-si-i) in a cuneiform record of Esar-haddun, would signify "exalted." Though Manasseh was the elder brother of Ephraim (48.20), Jacob is related (48.19) to have foretold that the latter would be the greater tribe—an allusion no doubt to Joshua, the great leader of Ephraim, though Manasseh produced the great judge Gideon (Judg 6.15). The grandchildren of Manasseh were born while Joseph still lived (Gen 50.23). In the desert the tribe marched in rear of the tribes and did not possess the smaller territory, but that of Manasseh E. and W. of Jordan was only in part wrested from the Canaanites. Half the tribe joined Gad and Reuben on E. of Jordan on account of their cattle (Num 32.33-41), and its warriors settled there after the conquest of the W. (Num 26.29-34; Jos 1.12, 13.6, 29.1-7, 37). They were famous for courage and for swiftness in war against the Hagarites to their E. (1 Chr 5.18, 19), but were wasted by Hazael of Damascus (2 K.10.33), and taken captive by Tiglath-pileser in 734 B.C. (1 Chr 5.26). They appear to have inter-married with Arameans (7.14-19), and though some helped David against Saul (12.19-23), and others dwelt in Jerusalem (9.3), yet in the time of Asa (2 Chr 15.9) they were regarded as strangers, after the separation of the kingdoms of Israel and Judah, and on account of idolatry (36.6) even in Josiah's time. The estrangement is reflected in the Psalms (Ps 80.2; cf. 60.7, 108.8);
Manasseh and Isaiah (9:21) speak of their quarrel with Ephraim, and enmity to Judah. They are last noticed in Ezek. 48, Rev. 7.6. The Tribal Lot included two portions (Jos. 13:29-31, 17:16-18), the portion closest to Manasseh's home being assigned to Ephraim. A privilege of Manasseh during his reign was a further itemisation of the land of Canaan by Ephraim and Benjamin (Num. 32:40, 41), included in Solomon's sixth district (1 Chr. 4:13) with Gedor and Bashan as far N. as Hermon (1 Chr. 5:23). W. of Jordan the tribal portions were very clearly designated, the province of Samaria, extending from Jordan to the Mediterranean, and touching Ephraim and Dan on S., with Issachar on N. and E. Asher on N. It was a mountain region (Jos. 17:18), including apparently the woods (ver. 15) of Carmel, but the cities held by the tribe within the borders of Asher and of Naphtali were not taken from the Canaanites till late times, and the plains of Manasseh remained probably unoccupied by the early Hebrews. [C.R.C.]

Manasseh.—1. The thirteenth king of Judah, who reigned longer than any other king of this house. He died at the age of eighty-five, fixed twelve years before the death of Hezekiah, 710 B.C. (2 K. 21:1). Hezekiah, it would seem, recovering from his sickness, anxious to avoid the danger of leaving his kingdom without an heir, married, at or about this time, Hephzibah (2 K. 21:1), the daughter of the chief priest in Jerusalem (but see Is. 62:4). The child born from this union was called Manasseh. This name is significant (see Gen. 41:51). It appears nowhere else in the history of the kingdom of Judah. His accession appears to have been the signal for an entire change, if not in the foreign policy, at any rate in the religious administration of the kingdom. The result was a debasement which had not been equalled even in the reign of Ahaz, uniting in one centre the abominations which elsewhere existed separately. Not content with sanctioning their presence in the holy city, as Solomon and his successors had done, he held the sanctuary itself (2 Chr. 33:3). The worship of foreign nations was introduced was predominantly Babylonian in character. With this, however, there was associated the old Molech-worship of the Ammonites. The fires were rekindled in the valley of Ben-Hinnom, the Baal and Ashthoreth ritual, imported under Solomon from the Phoenicians, was revived with fresh splendour, accompanied by extreme moral degradation. Every faith was tolerated except the original faith of Israel. This was abandoned and proscribed. It is easy to imagine the bitter grief and burning indignation of those who continued faithful, many of whom shed their blood for the establishment of the same (2 K. 21:10). They spoke out in words of corresponding strength. Evil was coming on Jerusalem in which should make the eyes of men to tingle (2 K. 21:12). The line of Samaaria and the plenitude of the house of Ahab would be the doom of the holy city. Not only had she once been full of piety and splendour, but had afterwards become foul. Jerusalem would be emptied, wiped out, and turned upside-down. Foremost, we may well believe, among those who thus bore their witness was the prophet Isaiah, now bent with the weight of years, who had in his earlier days protested with equal courage against the crimes of the king's grandfather. Retribution came. Israel was soon in war with Judah. There are indications that the neighbouring nations —Philistines, Moabites, Ammonites—who had been tributary under Hezekiah, revolted at some period in the reign of Manasseh, and asserted their independence (Zeph. 2:4-15; Jer. 47:48, 49). Palestine was again overrun by the Assyrian armies, and apparently was taken. Manasseh himself was made prisoner and carried off to Babylon. It is possible that Isaiah accompanied him, and this would account for the Babylonian element in his book. It is interesting to note that on a cylinder of Esar-haddon, Manasseh is referred to with other Syrian kings, with date being, and for a time the Assyrian king's repented, and his prayer was heard, and the Lord delivered him (2 Chr. 33:12, 13). It is singular that the writer of Kings does not refer to this. The omission is in part explained by the character of the narrative of 2 K. 21. The writer deliberately turns away from his hero, and deals with the E. part of his reign as a reign of shame, and from the personal biography of the king. Whilst the character of the writer of 2 Chronicles, obviously a Levite, and looking at the facts from the Levite point of view, would lead him to attach greater importance to a partial reinstatement of Hebrew ritual and to the cessation of persecution, Manasseh. This is the view of the writer as an historical, in some measure of the nature of an understanding coincidence, testifies to the extreme accuracy of the sacred historian, viz. the fact that the captives of the host of Assyria take Manasseh to Babylon, and not to Nineveh. The first attempt of Babylon to assert its independence of Nineveh failed. It was crushed by Esarhaddon, and for a time the Assyrian king held his court at Babylon, so as to effect more completely the reduction of the rebellious province. In course of time Manasseh's release was granted, and he returned to Jerusalem. The old faith of Israel was no longer persecuted. Foreign idolatries were no longer popular, and in Judah a form of worship existed for itself. The altar of the Lord was again restored, and peace-offerings and thank-offerings were freely offered to Jehovah (2 Chr. 33:15, 16). But beyond this reformation did not go. The Assyrian monarchy was toiling to its fall, and the king of Judah seems to have thought that it was still possible for him to rule as the head of a strong and independent kingdom. He fortified Jerusalem (2 Chr. 27, 3), and put captains of war in all the fenced cities of Judah. There was possibly a special reason for this. Egypt had become strong and aggressive under Psammeticus, and the thought of an Egyptian alliance began to be popular. The name of Manasseh's son, Amon, identical in form and sound with that of the great sun-god of Egypt, is possibly an indication of how gladly the alliance of Psammeticus was welcomed. There are reasons for believing that there existed, at some time or other, a fuller history, more or less legendary, of Manasseh and his conversion, from which the Prayer in the Apoc., may possibly be taken. Scattered here and there, we find the disjecta membra of such a work. —2.
One of the descendants of Pahath-Moab (Ezr. 10:30), and—3. A layman of the family of Hashum, who both put away their foreign wives at Ezra's command (10:33). 4. In the Heb. text of Judg. 18:30, the name of the priest of the graven image of the Danites is given as "Jonathan, the son of Gershom, the son of Manasseh," the last word being written מַנְאָסֶה, and a Massoretic note calling attention to the " omission. Rashi's note upon the passage is as follows: "On account of the honour of Moses he wrote מַנְאָסֶה to change the name; and it is written suspended to signify that it was not Manasseh but Moses." The LXX., Pesh.-Syr., and Chaldee all read "Manasseh," but the Vulg. retains the original and undoubtedly the true reading, Moses. Kennicott attributes the מַנְאָסֶה to Jewish transcribers. As to the chronologically difliculty of a grandson of Moses living at an apparently late period, there is reason to believe that the last five chapters of Judges refer to earlier events than those preceding. In 20:28 Phinehas, the grandson of Aaron, is said to have stoned the ark, and there is therefore no difficulty in supposing that a grandson of Moses might be alive at the same time, which was not long after the death of Joshua.

Manasses.—1. (1 Esd. 9:33) = Manasseh, 4.—2. (Mt. 1:10) = Manasseh, king of Judah. 3. A wealthy courtier, favoured Bethulia, and husband of Judith. He died from sunstroke (1 Macc. 8:2, 7, 10, 13, 16; 2 Macc. 4.—3. (Rev. 7:6) = Manasseh, son of Joseph.

Manasses, The Prayer of. (1) The repentance and restoration of Manasses (2 Chr. 33:12ff.) furnished the subject of many legends. "His prayer unto his God" was still preserved "in the book of the kings of Israel" when the Chronicles were compiled (2 Chr. 33:18), and, after this record was lost, the subject was likely to attract the notice of later writers. "The Prayer of Manasseh," which is found in some MSS. of the LXX., is the work of one who has endeavoured to compound, without true feeling, the thoughts of the repentant king. (2) The Gk. text is thought to be original, and not a translation from the Heb. The writer was well acquainted with the LXX. But beyond this there is nothing to determine the date or place at which he lived. The allusion to the patriarchs (v. 18) appears to fix the authorship on a Jew. (3) The earliest reference to the Prayer is in a fragment of Julius Africanus (c. 221 A.D.), but whether to our present text is not certain (Jul. Afr. Jr. 40). It is, however, given at length in the Apostolical Constitutions (ii. 23) in the Alexandrine MS. (4) The Prayer was never distinctly recognized as a canonical writing, though included in many MSS. of the LXX. and of the Lat. version, and has been deservedly retained among the Apocrypha in A.V. The Lat. translation in the Vulg. MSS. is not by Jerome.

Manasses, The, i.e. members of the tribe of Manasseh (Deut. 4:43; Judg. 15:4; 2 K. 10:33). Mandrakes. The ḫā'ām is "loves," hence our "love-apples" (occurring only in plur.), are mentioned in Gen. 30:14, 15, 16 and Can. 7:13. From Gen. i.e. we learn that they were found in the fields of Mesopotamia, where Jacob and his wives were at one time living, and that the fruit was gathered "in the days of wheat-harvest," i.e. in May; from Can. 7:13, that the plant was strong-scented, and grew in Palestine. The most satisfactory identification of the ḫā'ām is the mandrake, as in A.V. The LXX., Vulg., Syr., and Arab versions, the Targums, the most learned Rabbis, and many later commentators, favour this translation. The mandrake is scarcely odoriferous, the plant being even fetid in European estimation. But Oedemann, after quoting authorities to show that the mandrakes were prized by the Arabs for their odour, justly remarks: "It is known that Orientals set an especial value on strongly smelling things that to more delicate European senses are unpleasant... The intoxicating qualities of the mandrake, far from lessening its value, would rather add to it, for every one knows with what relish the Orientals use all kinds of preparations to produce intoxication." That the fruit was fit to be gathered at the time of wheat-harvest is clear, for Schultz found mandrake-apples on May 15th, and Hasselquist found flowers and fruit together at Nazareth early in May. Dr. Thomson found mandrakes ripe on the lower ranges of Lebanon and Hermon towards the end of April. The mandrake (Mandragora officinalis) is closely allied to the well-known deadly nightshade (Atropa belladonna), and belongs to the order Solanaeae. Pliny refers to the smell later called intoxicating, thus: "The scent is about Vintage time: the sent thereof is strong, but the root and fruit do smell the stronger." There is no need here to deal with the multitude of superstitions accumulated around the mandrake and constantly occurring in our early
MANNAN

literature. Prof. Henslow, who overlooks the passage in Solomon's Song, reproduces an illustration which prevails among a root from the goddess of discovery. Harris (Nat. Hist. of B., 2:324) refers to the same author (i. iv. c. 76), with the words “Among the Greeks and Orientals this plant was held in high repute as being of a nature provocative of amorous inclinations.” [B.C.H.] Manger occurs only in connection with the birth of Christ, in Lk. 2:7, 12, 16. The Gk. is φαράγγι, which is found but once besides in N.T. (13:15), and rendered “stall.” In classical Gk. it undoubtedly means a manger, crib, or feeding-trough; but, according to Schleusner, its real significations in N.T. is the open courtyard, attached to the inn or khan, and enclosed by a rough fence of stones, wattle, or other slight material, into which the cattle would be shut at night, and where the poorer travellers might unpack their animals and take up their lodging, when excluded from the house by want of room or of means. This interpretation is at variance with the tradition which Dean Stanley considered to be destitute of foundation, that the Nativity took place in a cave. On the other hand, however, Conder (Tent Work in Pal. x. 114) and others think the traditional cave has much to be said for it. The tradition dates from Justin Martyr (2nd cent.) and Eusebius (Pilgrim to Jerusalem). Maṇi (Ezr. 9:30; cf. Ezr. 10:29) = Banâ 4.

Man'nius, T. In the account of the conclusion of the campaign of Lysias (163 B.C.) against the Jews given in 2 Mac. 1, four letters are introduced, of which the last purports to be from “Q. Memmius and T. Manlius, ambassadors of the Romans” (vv. 34-38), confirming the concessions made by Lysias. No such names occur among the legates to Syria noticed by Polybius; and it is difficult to accept the letter as genuine. If the true reading of 2 Mac. 1 is preserved (not “Man- lius”), the writer is probably thinking of the mission of C. Sulpicius and Manius Sergius to Syria shortly before the death of Antiochus Epiphanes. [C.D.]

Maṇna (Heb. mân) occurs in O.T. in Ex. 16:14-35; Num. 11:6-9; Deut. 8:3, 16; Jos. 5:12; Nm. 9:20; 18:7, 24-25; Wis. 16:20-21. From these we learn that it came every morning except the sabbath, in the form of a small round thing resembling hoar frost; that it had to be gathered each day early, before the sun was able to melt it; that on the attempt to lay aside for a succeeding day, except on the day before the sabbath, the substance became wormy and offensive; that it was prepared by grinding and baking; that it was white like coriander seed, and that its taste was like fresh oil, or waters made with honey, equally agreeable to all palates; that the whole nation ate it forty years; that the supply suddenly ceased when they first got the new corn of Canaan; and that it was always regarded as a miraculous gift from God. The natural products of the Arabian deserts and other Oriental regions which bear the name of manna, have not the qualities or uses ascribed to the manna of Scripture. But as regards the scriptural food, Harris’s words (Nat. Hist. of B., Thos. Tegg, 1824), “In short, the whole history of the giving the manna is miraculous,” sum up the position. That excellent writer gives an ample list of references to authorities on this subject. According to the LXX., Vulg., Syr., and Josephus, the Heb. mân, always used for this substance, is the interrogative pronoun (What?); and the name is derived from the inquiry (mōn ki, What is this?) which the Hebrews made when they first saw it upon the ground. The Arabian physician Avicenna describes the manna, used in his time as a medicine, thus: “Manna is a dew which falls on stones or bushes, becomes thick like honey, and can be hardened so as to be like grains of corn.” The substance now called manna in the Arabian desert through which the Israelites passed is collected in the month of June from the târîd or tamarisk shrub (Tamarix gallica). Buxkhardt says that it drops from the thorns on the sticks and leaves which cover the ground, and must be gathered early, or it will be melted by the sun. The Arabs cleanse and boil it, strain it through a cloth, and put it in leather bottles; and it can be thus kept for years. They use it like
honey or butter with their unleavened bread, but never make it into cakes or eat it by itself. In the cold season, other grains like loaves, and grains to coriander seed. Niebuhr observed the manna at Mardin in Mesopotamia lying like meal on the leaves of a species of oak, called in the East baltā and 'afs or 'as. The harvest is in July and August, and most plentiful in wet seasons. Near the Jordan Valley Burchhardt found manna like gum on the leaves and branches of the kħarrub, which is as large as the olive-tree, having a leaf like the poplar, though somewhat broader. Two other shrubs, suggested as yielding the manna of Scripture, are the Alhagi mauroum, or Persian manna, and the Alhagi desertorum—thorny plants common in the desert. It is fluid at first, but hardens on the dew, but begins to harden in the morning.

Manoah (Judg.13), a Danite living between Zorah and Eshtaol, the father of Samson. He was evidently a monogamist, and the story of his relations with his wife and with the angel, who foretold the birth of a son, are admirable. He was described as being a devout faith and devout life. Manoah objected to Samson's marriage with a Philistine, and apparently died before his son (16.31). [SANSON.]

Manslayer. [HOMICIDE; GOEL.]

Mantle is employed in A.V. to translate four Heb. terms, entirely independent both in derivation and meaning: (1) swālāhā or swātāhā, once only (Judg.4.18). (2) mēli, rendered "mantle" in iSam.15.27; 28.14; Ezr.9.3.5; Job.1.20, 2.12; and Ps.109.29; elsewhere "coat," "cloak," and "robe." In one case only—that of Samuel—is this inconsistency of importiance. The garment which his mother made and redressed be wore was described in the person of the official priesit gown or robe; such as the great prophet wore in mature years (1Sam.15.27), and by which he was on one occasion identified (28.14). (3) ma'atāpāh (Is. 3.22 only), apparently some article of a lady's dress; probably an exterior gown, longer and ampler than the internal one. (4) addērāh (rendered "mantle" in 1K.19.13.19, 2K.2.8, 13.14; elsewhere "garnment" and "robe"). By this, and this only, is denoted the coat or wrapper which, with the exception of a strip of skin or leather round his loins, formed, apparently, the sole garment of the prophet Elijah. It was probably of sheepsking, such as is worn by the modern dervishes.

Maach, father of Achish, the king of Gath with whom David took refuge (1Sam.27.2); called in Syr. vers. Maachah, perhaps, therefore, identical with the Maachah who was "father of Achish, king of Gath at the beginning of Solomon's reign (1K.2.29). But if not, one other Maachah appeared in the tribe of Judah, in the Hebron mountains; of the same group with Carmel and Ziph (Jos.15.55; rSam.25.2). Its interest for us lies in its connexion with David (rSam.23.24,25). Now M'aim, a ruin with a tell about 100 ft. high, 8 miles S. of Hebron, with caves, cisterns, and a mediaval tower. It is close to the desert or "wilderness of Maon." In 1Chr.2.43-45 Maon is connected with Hebron and Beth-zur. The Muhumim or Meunim (Ezr.2.50; Ne.7.52) may have belonged to this place. [C.R.C.]

Maitos, The, a people mentioned as having oppressed Israel (Judg.10.12). Either inhabitants of MAON, near the Amalekite country, with which they are noticed, or of M'din. [EDOM.] The LXX., however (Vat. and Alex. MSS.), reads "Midianites." [C.R.C.]

Marah, [Naomi.]

Marah (bitter), a place in the wilderness of Shur, on the border of Midian; 3 days' journey distant (Ex.15.22-24; Num.33.8) from the place at which the Israelites crossed the Red Sea, and where was a spring of bitter water, sweetened subsequently by the casting in of a tree which "the Lord showed" to Moses. Burchhardt suggested that Moses made use of the berries of the plant gargarofic, and bottled the water which is known by Arabs. 'Al Huwārāh, distant 163 hours from 'Ayūn Mūsā, has been identified with Marah by Robinson, Burchhardt, Schubert, and Wellsted, because of its bitter water, the distance being appropriate for 3 days' journey with flocks, women, and children. [EXODUS, TUR.]

Maralah (Jos.19.11), a place on the border of Zebulon, perhaps the S. border. It may possibly be M'ailâ, a village which is 35 miles W. of Nazareth. [C.R.C.]

Maranatha, an expression used by St. Paul at the conclusion of rCor. (16.22). It is generally supposed to be a Grecized form of the Aram. 'ātāh, "our Lord cometh," or "our Lord is come," R.V. thus rightly inserts a period after the preceding "anahtama." St. Paul says (Ph.4.5), "The Lord is at hand" (or "nigh"), but Christian texts of Syria (c.4th cent.) give the invocation eteléthe Kurie ("Come, O Lord") which suggests the reading máran-ēthā ("Come, O our Lord"). [SEMITE LANGUAGES.] Another explanation is that it is the beginning of a cursing formula, muhrān 'ātā = "curst art thou"; hence, "Let him be [subject to the] anahtama," muhrān 'ātā.

Marble. Like the Gr. adamantos, the Heb. šēḵ, the generic term for marble may probably be taken to mean almost any shining stone. At the present day it is applied by builders to any limestone that will take a polish; sometimes even to rocks of quite different composition. The so-called marble of Solomon's architectural works, which Josephus calls 'Nādū Meqâāl, was probably the pale-cream-coloured limestone, which is about the age of the English chalk and is quarried in many parts of Palestine. It was very likely obtained, as that for Herod's temple almost certainly was, from the great excavations, called the Royal Caverns, which run beneath the city from near the Damascus Gate, but it is possible that in the latter building some foreign marbles may have been used for decorative purposes. A compact, pale-reddish limestone, that should polish well, is worked to the S. of Jerusalem. The marble pillars and
MARCHESVAN

[MONTHS.]
Mar'cus (Col. 4.10; Ph. 24; 1Pe. 5.13) = the evangelist Mark.

Mardocheus, the Gk. form of —1. Mor-decai, i (Est. Apoc. 10.1, etc.; 2Mac. 15.36); —2. (1Esd.5.8) = Mordecai, 2.

Mareshah.—1. A town in the shephelah region of Judah (Jos. 15.61), fortified by Rehoboam (2Chr.11.18). It was in the valley of Zephalathah (14.9,10), evidently therefore the ruin 'Mara'is, a mile S.W. of Beit Jibrin. The site was known in 4th cent. a.d. (Onomasticon). The name means "chief town"; but in Micah (1.15) there is a play on the word. Second. [Ac.l2.i2] shows his identity with the "Mariss" of 2Tim.4.ii. It is noticed as Marisa (2Mac.12.35), with Adullam, and was burned by Judas Maccabaeus in 164 b.c. (Josephus, 12 Ant. viii. 6), and taken by John Hyrcanus in 110 b.c. (13 Ant. ix. 1). [C.R.C.]

Mariss (Est. Apoc. 10.1, etc.) = Mariss (Ezk. 47.11). The A.V. so renders Heb. gebheth, "a deep place," referring to marshes and bogs near the Dead Sea. The word is an old Eng. form of the word "marsh" (Skeat, Etv. Dict.), a "mire-ish," or swampy, place—Low Ger. maris. Low Lat. maris. Cf. Marishes Road Station on N.E. Railway. [C.R.C.]

Mark is mentioned in nine places in N.T. (Ac.12.12,25,13.5.13.15.37ff.; Col. 4.10; 2Tim.4.11; Ph. 24; 1Pe. 5.13). The "John Mark" of Ac. is the same as the "Mark" of St. Paul's epistles, as proved by Col. 4.10, where he is called the cousin of Barnabas, and Ac.12.12 shows his identity with the "Mark" of 1Pe. 5.13. He was son of a Mary who was an influential member of the church at Jerusalem, the church meeting in her house. Papias (c. 130 a.d.), says, "He neither heard the Lord, nor accompanied Him." He was at Jerusalem during the famine and there he met the Roman leader, Antiochus on returning thither from Jerusalem at that time. SS. Paul and Barnabas took him with them on St. Paul's first missionary journey. He laboured with them at Salamis, in Cyprus; but, after crossing to the mainland and arriving at Perga, St. Mark would go no further. Probably he was not yet prepared for so great a work as the conversion of the Gentiles, or for the substitution of the leadership of St. Paul for that of St. Barnabas. He returned to Jerusalem, and was probably at Antioch about the time of St. Paul's rebuke of St. Peter (Ac.15.30.37). Possibly he was one of those who urged SS. Peter and Barnabas to withdraw from full fellowship with Gentile Christians. Whether he did so or not, St. Paul refused to take St. Mark with him on his second missionary journey (40 a.d.). St. Barnabas then went home to Cyprus with St. Mark. We hear no more until c. 61 a.d., when he was with St. Paul at Jerusalem. St. Peter and Barnabas seemed so reconciled St. Mark is St. Paul's "fellow-worker" and his "comfort" (Col. 4.10, 11; Ph. 24). The way in which St. Paul urges the Colossians to receive St. Mark kindly, possibly implies that wide dissatisfaction had been felt at his previous desertion of St. Paul. Some four years later St. Paul, in writing, shortly before his martyrdom to Timothy, requests him to come to Rome and to take up St. Mark along the way, "for he is useful to me for ministering" (2Tim.4.11). The last notice in N.T. of St. Mark shows how completely SS. Peter and Mark had widened their policy in harmony with that of St. Paul. St. Peter refers to St. Mark, my son," and his words show that the two were still together and with SS. Peter and Paul. From Papias we learn that St. Mark was the interpreter of St. Peter; probably because St. Mark, who was of some social standing, originally knew Gk. better than the humbly-born prince of the apostles. In the 4th cent. it was widely believed that St. Mark was the founder of Christianity in Alexandria, and therefore in all Egypt, and the first bishop there. This is quite possible. St. Mark might have been there either after his first separation from St. Paul or after the death of St. Peter. "Bishop and writer," says Eusebius, the great church historian (c. 320 a.d.), quotes (Hist. Eccl. iii. 39) from Papias as follows: "The testimony of the still earlier John the Presbyter, that St. Mark, the interpreter of St. Peter, wrote down what he remembered. Irenaeus (c. 185 a.d., Adv. Haer. iii. 1) says that the gospel was written after the deaths of SS. Peter and Paul. Papias says that St. Mark "wrote down accurately," but "without recording in order, what was either said or done by Christ." This has occasioned some difficulty. For there is a considerable degree of chronological order in Mk., and our Lord's missionary journeys around Capernaum can in Mk. be accurately traced. Probably Papias was confusing the two gospels, which he considered as that of Jn., where the dates are carefully given in due order. Justin Martyr (born c. 100 a.d.) says (Dial. 106) that Christ changed an apostle's name to Peter, and that this was written "in his memoirs." Some suppose that this refers to a forged gospel of "Peter" written in the 2nd cent. It is more likely that it refers to Mk., especially as Justin certainly called the gospels "memoirs." The connexion between this gospel and St. Peter is strongly corroborated by internal evidence. It consists almost entirely of things which St. Peter personally knew. It omits things which reflect credit on St. Peter, and inserts things which were of a nature to humble him. St. Mark records the reprimand that St. Peter received from our Lord (8.33) and his fearful plan of erecting tabernacles on the scene of the Transfiguration (9.5). It was St. Peter who informed Christ that the fig-tree had withered after His curse (11.21). The reconciliation of St. Mark's name by uttering his name "Simon," and St. Peter's denial appears doubly guilty in this gospel, as he did not repent until the cock crew twice (14.68,72). The whole gospel is
beyond all reasonable question by St. Mark, except the ending (16.9-20). The gospel cannot have originally ended at 16.8. The best solution of the difficulty is that the last page of the gospel was lost soon after St. Mark's death, when only one copy was in existence. A new ending was written by some person of authority. An Armenian MS. written 986 a.d. attributes it to "the presbyter Ariam," probably the Aristion mentioned by Papias as one of the Lord's disciples. The date is proved to be very early by internal evidence, and by the use of this gospel by SS. Matthew and Luke. Clement and Origen were probably right in thinking that it was written in the lifetime of St. Peter — a hypothesis (15.34) to represent, in St. Mark, when it was written after St. Peter's death. If so, it must have been almost immediately after. But the use of it by St. Luke is in favour of a date previous to the death of St. Paul, probably c. 61 a.d. — *Style and Character.*

The literary style is distinct and peculiar. It abounds in colloquial expression, such that might naturally be used by a man of Jewish origin who had never received a Gk. education. The diminutives are frequent, resembling words such as "lasse" and "doggie." Commonly parts of Great Britain (see Mk.3.9,8.23,39.7,27). Latin words which had passed into colloquial Gk. are found. Such are centurion, spectaculum, quadrans, census, and denarius. There are no peculiar words not found elsewhere. The grammar is rough, and there are several Aram. words transliterated into Gk. Such are Boanerges (3.17). Taleitha koum (5.41), Ephphatha (7.34). Abba (14.36): and the words Elo, Ebel, lamed, and others.

The Aram. idioms (6.7,39,10). There are Aram. phrases (3.28,5.43,16.2). Prepositions are repeated after compound verbs, and the participles of verbs is used with the imperfect indicative of "and." Some of the irregularities have led to the theory that this gospel was first written in Aram. and then translated into Gk. This theory is not impossible; but it is opposed to the singular freshness of the style, and also to the most ancient traditions as to the date of composition. If St. Mark wrote in Rome after SS. Peter and Paul had gone there, it is most unlikely that he would have written in any language but Gk., which was the common language of Christians in Rome for a long period. All we can affirm is that the evangelist had learnt to think in Aram. before he could think and write in Gk. Freshness of detail, graphic touches describing the looks, gestures, and conduct of our Lord and the feelings of those who surrounded Him, characterize Mk. It is the most life-like of the gospels. Only here do we learn that SS. Simon and Andrew lived together (1.29), how the mud roof was broken to let the paralytic through it (2.4), that there was a single parable in which the Son of Man (4.38), that the five thousand on the grass looked like "garden beds" (6.40), that Jesus took little children into His arms (9.36,10.16), how He looked at the rich young man (10.21ff.), how a denarius, a Roman coin, was brought into the temple, where only Jewish money was current (12.15). St. Mark, too, knows the names of Levi's father (Alphæus. 2.14) and of the sons of Simon of Cyrene (Alexander and Rufus, probably familiar names in the church at Rome) (15.21). The emotions of our Lord are far more often described by St. Mark than by SS. Matthew and Luke. Only St. Mark records St. Peter's conversation in the latter room dealt: 1.43; His grief in 3.5. His wonder at the people's unbelief (6.6); His indignation at the disciples (10.14); the amazement mingled with our Lord's grief in the Agony (14.33). While such emotions are recorded with great simplicity and reverent boldness, there is no tiling to influence of Christ so speaking, and so origin and supernatural authority. He is essentially and throughout the Son of God (1.1,3,17,5,7, cf.15.39). He is "the Holy One of God" (1.24), and God's "beloved Son" (1.11,9,7). His death has an atoning power, only possible in the death of one both divine and human (10.45,14.24). He is "the Man," the superior Messiah and representative of mankind, who will come hereafter in glory (8.8,14.62). He has authority to forgive sins (2.5,10), and can abrogate the Jewish law, being "lord of the sabbath" (2.28). He knows the thoughts of man (2.8,3.17,12.15), and knows what will happen in the future (2.20). He foretells His Passion (8.31, 9.31), the destruction of the temple (13.2), the universal Gospel (13.10). He is not without human limitations — just as He sleeps, eats, and drinks. He asks for information (6.9,8.5,9.16), and, as man, says that He is ignorant of the day of judgment (13.32). This is the one authentic instance of Christ so speaking, even in this passage He puts himself apart in the matter of knowledge, above all beings except the Father. St. Mark records numerous references made by our Lord to O.T., though fewer than SS. Matthew or Luke, but the only quotations made by St. Mark himself are in 9.23 (Mal.3.1), and 7.17 (Deut.5.9). On the other hand, there are 18 miracles, only two less than in the much longer gospel of St. Matthew. The two peculiar to Mk. are the healing of the deaf stammerer (7.31ff.) and of the blind man at Bethsaida (8.22ff.). The only parable peculiar to Mk. is that of the seed growing secretly (4.26ff.). One of the most distinctive features of Mk. is the clearness with which it shows how our Lord trained His disciples, and relates the dullest of His friends and apostles. St. Mark relates how early in Christ's ministry His friends (3.21) said that He was mad, and that "His mother and His brethren." (3.31) sought to bring Him back. He also notices Christ's silence at the disciples' obstrenerous remonstrance (5.31,32), His care in bidding them to rest (6.31), His rebuke of their childish misinterpretation of His words (8.17), their lack of intelligence when He speaks of His Death and Resurrection (9.32), their dispute about their own precedence (9.34), their hesitation in following Him (13.20). St. Mark alone tells us of the wonder of Pilate at His death, and his inquiry of the centurion (15.44). St. Mark's love of vividness in style leads him sometimes to a use of redundant expressions, which SS. Matthew and Luke omit.
MARKET-PLACE

The old theory that he "abbreviated" their gospels must be abandoned for the theory that they frequently abbreviated Mk., even omitting details of interest to them. Hence the writer in adopting the theory that SS. Matthew and Luke deliberately removed possible stumbling-blocks which the "can- dour" of St. Mark narrated (e.g. Mk.1.32-34, cf. Mt.8.16 and Lu.4.40; Mk.1.45, cf. Mt.4.25 and Lu.5.13; Mk.6.5f., cf. Mt.13.58; Mk.7.24, cf. Mt.16.21; Mk.16.39, cf. Mt.20.20; Mk.11.20. 15. 22). It is at least possible in some cases SS. Matthew and Luke are following the Logia when they show divergences from Mk. This is also more probable than the hypothesis that SS. Matthew and Luke used an older version of Mk. into which variations were afterwards inserted. Our Mk. is, with the exception of Mk.20.3; Mk.7.1, highly primitive, realistic, historical, and practical. Having fewer Hebraisms than Mt. and fewer Grecisms than Lu., it is a gospel well fitted for the Christians of Rome amongst whom St. Peter preached.

MARKET-PLACE. The Gr. ἀγοραῖος signified any open space, originally used for the purpose of assembly. Hence it suggests any open or public place, in contrast with what goes on in privacy. It is found in N.T. in connexion with business dealings (Mt.20.3; Mk.7.1), with children's games (Mt.11.16; Lu.7.32), with the greetings of passers-by (Mt.23.7; Lu.11.43), with trials (Ac.16.19), and (in Athens) with public discussions (Ac.17.17). [T.A.M.]

MAR'emoth (1 Esd.8.62) = Meremoth, 1.

Mar'oth (bitterness, sadness), one of the towns of the W. lowland of Judah whose names are played upon by the prophet Micah (1.12).

The site is unknown. [C.R.C.]

MARRIAGE. The institution of marriage is commonly regarded from one or other of two points of view. Either it is considered as the merely human regulation of the sexual relation involved in human nature as we find it, or it is regarded as a divine institution, having laws and regulations imposed by God. The latter point of view is repeated by our Lord Jesus Christ: "What therefore God hath joined together, let no man put asunder" (Mt.19.6; Mk.10.9). It will be adopted in this article. In Holy Scripture the divine laws may best be considered under three heads: (1) marriage as instituted after the Fall by perverted man; (2) Christian marriage.—I. Marriage in the State of Innocence. Such indications as are given in the early chapters of Genesis show the race as descended from a single pair. Polygamy is not here contemplated (Gen.2.18); nor does divorce find place in the primal institution (Mt.19.8). II. Marriage after the Fall. If neither polygamy nor divorce found place in marriage as God instituted it, both are very generally found in the marriage usages of Asiatic peoples in historic times. The narrative of Genesis shows polygamy already in the case of Lk. (Gen.16). The code of divination in that of Abram (16.) These features would appear to have been introduced into the divine institution by perverted man; and both polygamy and divorce are suffered and regulated in the codes of the Pentateuch. We are told that God suffered these declensions for a time "for the hardness of their heart, so that they were not yet reformed; and in the time of education these faults could be left alone. If, however, polygamy and divorce are found to be suffered, there is ordinarily no sufferance of the marriage of near kin, which is esteemed unholy. It is probable that in the vast majority of cases the marriages of the time of research would show the lifetime union of one man with one woman, as is the case with poor Mohammedans at the present day. The addition of one servant-wife would be the most usual form of polygamy. Two marriage codes may be discriminated in the Pentateuch. The regulations of Deuteronomic are found in ch. 21. (5) Laws of incest. Deut. 22, 23. Marriage. The Codes. (1) A woman to her sister. The prohibition of "a woman to her sister... beside the other in her lifetime" (Lev.18.18) seems to admit polygamy in cases not so barred. (2) Slave marriages. The slave is not to retain unimpaired his food, his raiment, and her duty of marriage, if the master "take him another," is clearly a toleration of polygamy (Ex.21.10). (3) Royal polygamy. The provision affecting the marriage of kings ("neither shall he multiply wives to himself, that his heart turn away from the Lord") must be understood to bar only the unlicensed licence of Asiatic monarchs, of which Solomon is a notable example (Deut.17.17). (4) Ceremonial checks. The ceremonial uncleanness following the copula, taken together with the right of each wife, amounts to a distinct check upon the extent of the polygamy permitted. (5) Laws of polygamy. The law governing the distribution of property as between the sons of two wives gives a certain sanction to such marriages with two wives (Deut.21. 15-17). (6) Captives of war. The permission to take as wives the women captured in war clearly admits polygamy (Deut.20.13-15). But this provision is so constructed that it is to be free from solicitation for a month after capture; (b) she is then, if the man desire it, to be his wife; (c) if he tire of her, he is not to sell her, but to let her go whither she will, because he has humbled her (Deut.21.10-11). Summing up these provisions as they affect polygamy, it appears that they provide (a) that they find the practice admitted, (b) that they regulate and restrict it, (c) that they do not condemn it.—Practice of the Hebrew people. The following instances may be noted. "Gideon had three-scores and ten sons of his body begotten; for he had many wives" (Judg. 8.30; 1 Sam.1.2); Saul had two wives which were afterwards given away to David's "bosom" (2 Sam.12.8); David took him more concubines and wives out of Jerusalem, after he was come from Hebron (5.13); Solomon "had seven hundred wives, princesses, and three hundred concubines" (1 Kings 11.1). 1 Chron. 3: 15: Solomon "had many wives and sons" (1 Chr.7.4): Hushim and Baara were wives of Shaharaim (8.5); Rehoboam "took eighteen wives and three concubines" (2 Chr.11.21); Abijah
MARRIAGE

Married fourteen wives (13.21); Jehoiada took for Joash two wives (24.3). Polygamy must be inferred from the 30 sons of Jair the Gileadite (Jdg.12.4); from the 40 sons of Abdon (12.14). Holy Scripture contains no instance of polygamy in the post-Babylonian period. The practice was then probably rare. Josephus states that Herod the Great had nine wives at one time (17.4.3). The gospels have no mention of polygamy as contemporaneously practised. But in the Mishna, treatise Yebamoth (? 220 A.D.), there is constant reference to the two or more wives of one man, the appellation used being zaroth, i.e. adversaries or rivals. There has been but little practice of polygamy among the Jews in later times. B. Divorce. The permission of the wife to a wife with her husband to divorce her if the husband have "found some uncleanness in her," is clearly given in Deut.24.1-4. He is to "write her a bill of divorcement, and give it in her hand, and send her out of his house." She is then free to marry again. The phrase rendered "some uncleanness" (R.V. "unseemly thing") is literally the "nakedness of a thing" (ereth dabbhar). The exact meaning of the phrase has been disputed [Divorce], but the divorce was permitted for the ground here indicated is undeniable. It is clear, however, that although the code of Deuteronomy suffers the practice of divorce, it neither originated the practice nor rendered it more easy. The regulations are in the direction of restraint, not in that of encouragement. The grounds of divorcement are required, and a formal document, the bill of divorcement, must be given. There are indications of a sense of unholiness attaching to divorce. Priests are forbidden to marry divorced women (Lev.21.7). The prophet Malachi writes, "The Lord, the God of Israel, saith that He hateth putting away" (Mal.2.16). Our Lord confirms this attitude (Mt.19.8). Divorce seems to have been freely practised. The tone in our Lord's time may be seen in the opinion of the disciples that without freedom of divorce marriage was too hazardous (Mt.19.10). (See also Divorce.) C. Porrimo Polygamy. It may be noticed the prohibitions of marriage on grounds of kinship. If in the codes of the Pentateuch concessions are admitted in the matters of polygamy and divorce, there is no tone of concession as to the marriage of near kin. The prohibitions are introduced (Lev.18.3) with a warning that the doing of the land of Egypt," or "after the doings of the land of Canaan," and are followed by a warning to obey, "that the land whither I bring you to dwell therein, spue you not out" (20.22). We infer that these prohibitions are held to be binding on all men by the law of nature, at least in a fallen state in which the "uncovering of the nakedness" of near kin is consciously shameful. The list of prohibited degrees includes a considerable number of relationships of affinity, as well as of consanguinity. They may be best shown in tabular form:

In such an enumeration it would be unreasonable to expect exhaustive completeness or analytical arrangement. There is (a) a preamble, (b) a general enactment: "None of you shall approach to any that is near of kin to him to uncover their nakedness: I am the Lord" (Lev.18.6); (c) a number of representative cases. The cases thus expressed are defective on any possible principle, if regarded as an exhaustive statement; while there is some redundancy (18.11). But the prohibitions appear to involve certain great principles: (a) that near relationship of blood is a bar, involving all ascendants and descendants, but only the nearer cases of collaterals; (b) that near relationship of affinity, or connexion by marriage, is a bar, because a man and his wife are one bāsar, flesh or kin (of the 14 relationships certainly barred, 6 are relationships of consanguinity and 8 of affinity); (c) that relationship through the woman is precisely analogous to relationship through the man. The application of these principles will be found to result in the expanded table familiar to English Churchmen in the pages of the Prayer Book. It is not indeed to be asserted that such logical expansion always found acceptance among the Hebrew people; but that principles are recognized as binding outside the actual enumeration may be gathered from the lament of Amos, "A man and his father will go in unto the same maid, to profane My holy Name" (Am.2.7). The case of the wife's sister has been the occasion of much
MARRIAGE

controversy. It is beyond all question one of the nearest of the relationships of affinity. As such it must be held to be barred by the great
scriptural principle of marriage unity, that a man and his wife are one *bêsar* flesh or kin. This principle, unrecognized by other ancient
laws (e.g. Roman and Hindu systems), is not
reservedly stated in the account of the Creation in Genesis (Gen. 2:24), in the provisions of Levi-
ticus (Lev. 18:8, 16), in the teaching of our Lord
(Matt. 19:5; Mark 10:8), and in that of St. Paul
(1 Cor. 6:16). It is the principle which governs
the prohibitions of marriage in cases of affinity.

Thus, "the nakedness of thy father's wife shall
not enter thee: it is thy father's nakedness" (Lev. 18:8). The father and the father's wife are
one *bêsar*. Similarly, in ordinary cases marriage with a husband's brother is
prohibited, the penalty of childlessness being
indicated. It is clear that if the principle of
one *bêsar* is to be applied logically, the mar-
riage of a man with his deceased wife's sister is not permissible. But the actual prohibi-
tion of 18:18 is, "Neither shalt thou take a
wife to her sister, to vex her, to uncover her
nakedness, beside the other in her lifetime."
The case indicated is such a case as that of
Levi and the wife of his deceased brother Jacob. Its
significance lies probably in the emphasis with which it is insisted that even the honoured
example of Jacob must not be followed in this
matter. There may be no thought of other
cases of marriage with a wife's sister. But the
marriage of a man with the sister of his deceased
wife is not in this verse expressly barred.

And in history it does not appear that the
Jewish people have commonly disallowed such
marriages, but Christian practice undoubtedly
has. The levirate law is considered elsewhere.

[LEVIRATE LAW.] If the prohibition of mar-
riage with a brother's wife is ordinarily to be
insisted on because of the nearness of kin,
rendering such marriage unholy and involving
the penalty of childlessness, the levirate law
must probably be regarded as a temporary
concession to established practice, analogous
to the concessions of polygamy and divorce.
Rabbis may have been moved by a desire to
condemn by St. John the Baptist of Herod's
marriage with Herodias, his brother Philip's
wife (Matt. 14:3, 4; Mark 6:17, 18; Luke 3:19).
St. Mark gives the words of the Baptist thus:
"It is not lawful for thee to have thy brother's
wife." Herodias was the divorced wife of
Philip, who was still living. This no doubt
was felt to be an aggravation of the offence.

But under the existing law and practice of the
Jews, divorce was admissible, while the mar-
riage with a brother's wife was not. It must
therefore be understood that the condemnation
of the Baptist had to do mainly with the bar of affinity. For the prohibition of marriages with non-Israelites, see MIXED MARRIAGES.—III. CHRISTIAN MARRIAGE. Our
Lord, in the Sermon on the Mount, asserted
that He was not come to destroy the law, but to
fulfil; and further, that unless the righteousness
of the scribes and Pharisees be exceeded the righteousness of the scriptures and Pharisees they should in no case enter into the kingdom of heaven (Matt. 5:20). Among the instances of this
principle is that of the law of Divorce (Matt. 5:32), dealt with under that head. The Western
Church has consistently barred all remarriage
after divorce, as representing the true mind of
our Lord; and that this could be done in the
face of the laxity of consensual divorce pre-
valent in the Roman empire is sufficient
evidence of the strength of the early contro-
version. In the Eastern Churches divorce is
admitted for various causes. Polygamy has
never been suffered among Christians, but in
apostolic times there was no practical diffi-
culty with regard to it. At the time of our
Lord there appears to have been no practice of
polygamy among the Jews; and as regards
the Roman empire, the law of Rome did not
suffer a man to hold two women as in any sense
his wives at one and the same time. Thus by
the Roman law, if a man had a legally recog-
nized concubine, he could not at the same time
have a legal wife. Polygamy thus nowhere
confronted the Christian in apostolic times.

It was never permitted to him at any time.
The requirement of St. Paul in 1 Tim. 3:2 that a
bishop be "the husband of one wife" has been
generally understood to bar those who had
married more than once in successive mar-
rriages. He is analogous to that sentiment that
a widow becoming the church roll should have
been the wife of one man (1 Tim. 5:9). As re-
gards prohibited degrees, the two codes of law
with which the first Christians had to do, the
Jewish and the Roman, were agreed in con-
demning most near unions, alike of consan-
gunity and of affinity. Thus St. Paul notices
an aggravation of the sin of the incestuous
Corinthian with his step-mother that it was a
"fornication . . . not so much as named
among the Gentiles" (1 Cor. 5:1). To an
obedient Christian no question could arise,
except as regards relationships outside the
consent of the Jewish and the Roman codes.
The Christian Church seems to have accepted
from the first the principle of the Roman law
that the consent of the parties was in all cases
essential to a valid marriage. This principle
had not been recognized by the Jewish law.

Christians could not, however, accept the
principle of Christian marriage as a serious
contract pure and simple, in which nothing
could be recognized which the contract had
not placed there. To them marriage was an
honourable estate instituted of God, and
accordingly the nature, obligations, and privi-
elages of marriage were to be sought not only or
chiefly in the terms and conditions of the con-
tract, but in the institution of the Founder
(1 Cor. 7; Eph. 5)—Marriage Procedure. (a)
HEBREW MARRIAGES. In O.T. marriages may be
distinguished (1) the choice of the bride, (2)
the betrothal, (3) the wedding. (1) In patri-
archal times the head of the man's family,
usually the father, chooses the bride (Gen. 24:
38, 38:6). Hagar chooses a wife for Ishmael
(21:21). The woman is regarded as subject to
her father's control (29:15). Instances occur of
direct choice by the bridegroom—e.g. Esau
(26:1), Jacob (29:18). In later times, as in
earlier, marriages seem to have been usu-
ally arranged for the parties than by them.
(2) Legally the marriage was effected by the
act of betrothal, the chief feature of which was
the payment by the bridegroom of the *mohar*

---
to the parent or guardian of the bride. The mōhar was not a dowry which the bride brought with her, nor was it a donatio propter nuptias, or settlement on the bride by the bridegroom. It was an exchange or purchase-money paid by the bridegroom to the parents of the bride (Deut. 22.29). The bride's consent was unnecessary. The law has no reference to it. Once the mōhar was paid, the betrothal was effected. The bridegroom was then at liberty to take his wife, when that was convenient to himself. (3) The actual wedding was the solemn home-bringing of the bride to her husband's house. The bridegroom, fitly arrayed, came with his companions (Mt. 9.15) to the bride's house to fetch her. She, in wedding-attire, and veiled, came forth with her companions, and the marriage procession, it was commonly at night, and by torchlight. It was characterized by such pomp and circumstance as were available. There would generally be music and singing (Gen. 31:27; J.e. 7.34). On the way the procession might be joined by other companions (Mt. 25.6). The marriage of the bishop or bridegroom usually took place in the bishop's residence (22.24-25.10). (b) Christian marriages.

The marriages of Gentile Christians in the Roman empire in apostolic times were doubtless in accordance with Roman custom. The procedure would include (1) the sponsalia, and (2) the wedding. These might be separated by an interval of time, or the parties might follow the sponsalia directly. (1) At the sponsalia the tables were signed after some or all of the subsidiary ceremonies of (i) the arrhae, (ii) the ring, (iii) the kiss, (iv) the joining of hands. The benediction of the Christian bishop or priest seems to have found place at Christian espousals from the earliest times probably, as a rule after the signing of the tables. The congratulations of the friends followed. (2) The actual wedding was by Roman custom, as by Jewish, the ceremonial home-coming of the bride. She would be adorned in the usual way with the long white robe, the girdle, and the yellow head-covering. She was often barefoot or bound only in a net, and crowned with a floral wreath. As with the Jewish marriages, there would be the torchlight procession, the supporters and friends in attendance, and the singing by the way. There would be, further, the ceremonial salutation of the door-posts, and the carrying the bride across the threshold of her new home. The husband would be ready with the fire and water to welcome her, the marriage feast would be set out, the lectus genialis solemnly prepared. It was not till later times that there would be any religious ceremonial in the public congregation, and historically the Christian practice of marriage in church appears to have grown out of the general wish for the celebration of the Holy Eucharist on the occasion. Such celebration is mentioned in the 2nd cent. (confirmat oblationi—Tertullian, Ad Uxorom ii. 9.) (CRIMES; FAMILY; LAW; T. J. Selden, Uxor Latinæ; F. Kalisch, The Marriage Laws of the Hebrews; Watkins, Holy Matrimony (1895); Thiervers, Das Verbot der Ehe innerhalb der nahen Verwandtschaft (1886). For Christian canon law: Freisen, Canonisches Eherecht (1888); Zhishmann, Eherecht der Orientalischen Kirche (1864). [O.D.W.]

Mars' Hill, better known by the name Areopagus, of which the "hill of Mars" or Areus is a transliteration, was a rocky height set apart as a tribunal before the time of Solon, and was the most ancient and venerable of all the Athenian courts. It consisted of all persons who had held the office of Archon, who were members of it for life unless expelled for misconduct. It enjoyed a high reputation throughout Greece. Before the time of Solon the court tried only cases of wilful murder, wounding, poison, and arson; but he gave it extensive powers of a censorial and political nature. The Council continued to exist even under the Roman emperors. Its meetings were held on the S.E. summit of the rock. There are still six stone steps cut in the rock, leading up to the platform half way of the Agora; and immediately above the steps is a bench of stones excavated in the rock, forming 3 sides of a quadrangle, and facing the S. Here the Areopagite sat as judges in the open air. On the E. and W. sides is a raised block. The Areopagus possesses peculiar interest to the Christian, as the famous address of St. Paul delivered his memorable address to the men of Athens (Ac. 17.22-31). It has been supposed by some that St. Paul was brought before the Council of Areopagus; but there is no trace in the narrative of any judicial proceedings. St. Paul disputed daily in the market or Agora (17.17), which was situated S. of the Areopagus in the valley between this hill and the hills of the Acropolis, the Pnyx and the Museum. Attracting more and more attention, "certain philosophers of the Epicureans and Stoicks" brought him up from the valley, probably by the stone steps. They had already made it their custom to meet there, and it is quite possible that they might listen to him more conveniently. Here the philosophers possibly took their seats on the stone benches, while the multitude stood upon the steps and in the valley below. Marsena, one of the 7 princes of Persia and Media, counsellors of Ahasuerus (Esth. I.14).

Martha. The only person of this name in the Bible is the elder sister of Mary and Lazarus, mentioned in Lu. 10.38ff. and Jn. 11.1ff., 12.2. These three were honoured in being specially loved by our Lord, and at their home in Bethany He spent much of the last few days of His life on earth. In all three passages cited above Martha comes before us as the busy, active housekeeper, anxious to entertain her guests with an almost excessive hospitality, rather than, like her sister, to profit by their society and intercourse—this characteristic being specially marked when her guest was the Son of Man, and He gently rebuked her for this fault. It has been conjectured with some plausibility in order to reconcile the various anointings, that she was the wife of Simon the leper (Mt. 26.6; Mk. 14.3) whose house was at Bethany. [Simon, 9; Mary of Bethany.] In any case, she
and her sister held a good position in the village where they lived (Jn.11,79,39,33,45,46). In the account of the raising of Lazarus we find further signs of the practical nature of her affections and interests—even her confidence in our Lord is limited by considerations of common sense and reason (vv. 11,12,28,39). A somewhat late tradition connects Martha as well as Mary and Lazarus with the early history of the church in S. France. Adney's art, in Hastings, D.B. (5 vols. 1904), gives the best authorities for this.

Mary (Ro.16.6), a Roman Christian who ministered to St. Paul.

Mary Magdalenae (Μαργαριτ). The best explanation of the name is, that she came from the town of Magdala, or Magadan, near Tiberias. Sheyne (Encyc. Bib. 1635) suggests Magdalanumia, near Tiberias. Magdala was famous for its wealth, but its citizens had a bad character for licentiousness. (1) Mary was one of the company of women (Lk.8.2) who ministered to Christ of their substance. It is said that "seven devils went out of her." We must think of her as having had "in their most aggravates forms some of the phenomena of mental and spiritual disease which we meet with in other denominations, the wretchedness of despair, the divided consciousness, the preternatural frenzy, the long-continued fits of silence" (Thomson). At the tradition she was one who "stood afar off" (Lk.23.49), and then followed the body of Jesus to the grave. On Easter Day she came with the others [Mary of Cleophas] to anoint His body. Hurrying on, she found the stone rolled away and rushed off to fetch SS. Peter and John (Jn.20.2). Again returning after they had left, and stooping to look in, she saw two angels, and repeated, as one in a dream, what she had said to the apostles. Turning round, she failed to recognize the risen Lord, supposing Him to be the gardener. Her name spoken by Him brings joyful recognition in the cry "Rabboni." This was a title of reverence, but she must be taught that the old life of companionship was at an end. Touch Me not. When Christ had ascended, a closer communion in the spirit would be granted.

(2) Mary Magdalenae has been identified with the woman who was a sinner, and with Mary of Bethany. Probably these were two distinct incidents. Lk.7,36-50 describes how a poor sinner washed the Lord's feet in the house of Simon the Pharisee. Jn.12.1-8 narrates the anointing of His head with precious ointment in the house of Martha and Mary. We can only say that the identification is improbable in either case. But it has become the tradition of the Western Church, e.g. in the services for the Feast of St. Mary Magdalenae. The translators of R.V. assumed it, as did Bishop...
MARY, MOTHER OF MARK

Andrewes, Donne, Jeremy Taylor, Dr. Pusey, and other Anglican divines.

[A.E.B.]

Mary, mother of Mark, aunt to Barnabas (Mt.10.2); and evidently a wealthy widow, owned a house at Jerusalem large enough to be a principal meeting-place of the local church (Ac.12.12). St. Peter probably lodged there (12.12), and, becoming intimate with her son, effected his conversion (rPe.5.13). [C.H.]

Mary of Bethany, the sister of Lazarus.

All that is certain about her is that which is recorded in Lu.10.38, 41; 11.14. These three passages reveal her as the direct contrast to her sister Martha in character. On the first occasion, while Martha is busy in preparing food and in waiting on her much-loved Guest, Mary sits at His feet and listens to His gracious talk, being exonerated by Him from the rebuke which Martha asks Him to join in administering for her idleness. In the account of her brother's raising from the dead, but few words of hers are recorded. When our Lord's arrival is announced, she remains in the house till Martha secretly summons her to Him. Thereupon she goes out quickly, without explanation, and meeting at His feet, she proclaims her sister's lament, "Lord, if Thou hadst been here, my brother had not died." It is perhaps significant that the mourners are, three times out of the four, said to have come to Mary, not to Martha (the elder sister): see vv. 31, 33, and 45 compared with ver. 19. At the supper in their house six days before the Passover at which our Lord suffered, Mary's act was again characteristic. From the worldly point of view it was wasteful and unpractical to take a pound of costly ointment in order to anoint her Friend and Master's feet, and then wipe it off with her hair; but, as before, she was exonerated from blame by our Lord Himself, Who expressed His approval of the act as done against the day of His burial. Nothing further is known of this Mary, unless the identification with Mary Magdalene is correct. For mediaeval legends about her, see Martha. [C.L.F.]

Mary of Cleophas (A.V. marg. and R.V.; pre-Christina Woman. Jn.2.25) standing by the cross. If, as a reference to the parables (Mt.27.56; Mk.15.40) renders probable, she is identical with "Mary the mother of James and Joseph [Joses]" [JAMES; ALPHAEUS], she had followed Jesus in Galilee, and ministered to Him of her substance. She and Mary Magdalene watched our Lord's burial, and remained sitting disconsolately opposite the sepulchre (Mt.27.61; Mk.15.47). Very early on Easter morning she and Salome and Mary Magdalene went to the sepulchre with the spices, which they had prepared on Friday night (Mt.28.1; Mk.16.1; Lu.23.56), and heard the words of the angel announcing the Resurrection. As they returned, they met the risen Lord (Mt.28.9). Several difficulties are connected with Mary's name.

(1) Was Cleopas her husband or her father? R.V. and A.V. translate Μαρία ἡ τοῦ Κλωτρά, "Mary the wife of Cleopas." But (there being no indication to the contrary in the context) it seems certain that Cleopas was St. John's "husband of Cleopas," not "father of Cleopas." (2) Was this Mary the Virgin's sister? A cursory reading of Jn.19.25 suggests it, but further consideration renders it doubtful. From Mk.15.40, Mt.27.56, we learn that besides the Virgin, and Mary Magdalene, and Mary of Cleopas, a fourth woman stood by the cross. Her name was Salome, and she was second to St. John's in the Lord's regard. It is probable therefore, especially as St. John would not be likely to ignore the presence of his own mother, that the Virgin's sister of Jn.19.25 is not Mary of Cleopas, but Salome. The omission of κατὰ before Μαρία is not fatal to this view (see Mt.10.2-4). For (3) Was Cleopas the same as Alpheus? See ALPHAEUS. (4) Were Mary's sons the "brothers of the Lord."? And (5) Was her son James an apostle? See JAMES. [C.H.]

Mary, the Blessed Virgin. Holy Scripture tells us of St. Mary only in so far as she is connected with our Lord. Consequently we find no mention whatever of her before the visit of the archangel Gabriel or after the narration of the descent of the Paraclete. But owing to her unique position in the history of our Redemption, the passages in which she is mentioned, and even those which only indirectly refer to her, are of immense importance, bearing as they do so closely upon the fact of the Incarnation. Of Mary's personal history we are only told her name, her lineage (though even this is not quite certain), that she lived at Nazareth, that she had a sister, that she was related to St. Elisabeth, the mother of St. John Baptist, that she was betrothed to one named Joseph who was a carpenter, and that after the Death and Resurrection of her Son (her husband presumably being dead too), she made her home with the apostle John. Her name was the common Jewish name of Mary, the Gk. Μαρία, the same in the original as that of the sister of Moses (Ex.15.20). In the gospel St. Elisabeth speaks of her as "the mother of my Lord," ἡ μητέρα τοῦ Κυρίου μου (Lu.1.43); St. John once only, and the writer of the Acts once only, calls her the mother of Jesus (Jn.2.1: Ac.1.14); most commonly she is called simply "his mother" (nine times) or "Mary" (seven times). There are three occasions on which our Lord is recorded to have addressed her. He uses no title, though it may be noticed that on that occasion He seems to have been addressing St. Joseph also (Lu.2.48); on the other two He uses the common title of respect, γυναῖκα, translated in E.V. "woman." (Jn.2.4,19.25).—Her Lineage. We cannot be sure that St. Mary as well as St. Joseph belonged to the house of David. The genealogies given by SS. Matthew and Luke are both of them almost certainly the genealogies of St. Joseph and not of St. Mary; St. Luke's words in 1.27 ("of the house of David") are ambiguous; they may belong to either Joseph or Mary. In 2.4 St. Luke expressively mentions Joseph only. Still, in none of these passages is it said that St. Mary was not of the lineage of David. Some have thought that the fact of her being related to St. Elisabeth, whom we know to have been descended from Aaron, proves that St. Mary was not of the tribe of Judah, St. Joseph's other. St. Luke's words in Ro.1.3, "Who was born of the seed of David according to the flesh," have been understood as referring to our Lord's actual birth rather than to his
birthright as the legal heir of Joseph, in which case, of course, they must imply that His mother, as well as His foster-father, was of Davidic lineage. St. Mary is described by SS. Matthew and Luke as a virgin at the time of the conception and of the nativity of her Son, and as such she has been regarded by the Catholic Church in all ages. With regard to this belief, it must be said in the first place that some such mode of generation as that of the Virgin Birth is required by the necessity of the case. The necessity of the case was that One should be born Who could become the new Head of the human race, Who should become related, not to one human personality, but to Human-kind in general. Ordinary birth results inevitably in the transmission of a tainted human nature and in a personality distinct and separate from all other personalities. Human-kind needed a perfect representative. In the conception and birth moment the necessity for a mode of generation which should cut off the entail of sinfulness and provide for mankind a second Head, from Whose human nature mankind might retrieve what it had lost in Adam, we can readily understand the fitness of the birth which is described in St. Luke and which does not, as we can go on to consider the credibility of the account there given with reference to the objections urged against it. With regard to the objection on the score of its miraculous nature the Virgin Birth must stand or fall with the whole miraculous element of the gospel narrations. Anything which may be described, to use the term commonly employed, as miraculous, the Virgin Birth must of course be rejected. If, on the other hand, we adopt an attitude of at least an unwillingness to dismiss as incredible all that lies outside our complete apprehension, we shall probably feel that the Virgin Birth and the supernatural element of the gospels generally is not the natural and fitting accomplishment of the manifestation of Him Whose glory the evangelists beheld full of grace and truth. And we may go on to inquire whether the objections urged against the narratives of SS. Matthew and Luke are nullified and against them. It has been urged that the silence of the other evangelists and of St. Paul are fatal to the account given by St. Matthew and St. Luke. St. Mark sets out with the clear intention of recording the public ministry of our Lord, and obviously the narration of the birth does not come within his proper scope. St. John, writing after the other gospels were well known in the Church, is not only concerned with a different portion of our Lord's ministry, but is largely occupied with the principles which underlie the facts narrated by the Synoptists rather than with the facts themselves; as this explains his omission of the account of the institution of the Eucharist, so it may also explain why he does not narrate the birth and nativity of the Lord. So, too, St. Paul, in his letters are written with a wholly different object from that of supplying the facts of our Lord's life; still less does it come within the scope of his writing to speak in any detail of those facts. Another objection has been found in the fact that the evangelists of the Nativity do not themselves mention it after their opening chapters, and that they even speak of the Lord as though He were the Son of Joseph (e.g. Mt. 13:55; Lk. 2:18, 4:22). If clearly the Lord must have passed for the Son of Joseph during His earthly life, since not to have done so would have been to bring that very shame on His Mother which Joseph was so anxious to avoid (Mt. 1:19); and He would no doubt have addressed Joseph as "father," as being the obvious title for one who was His foster-father and the natural protector of His childhood. And SS. Matthew and Luke do but prove themselves honest and true historians by narrating the actual words of the contemporary men and women, from whom the miraculous circumstances of the birth had beenleftrightarrow. It is urged that there is so much discrepancy between the accounts of SS. Matthew and Luke themselves, that it casts doubts upon their credibility. Against this objection it may be urged (i) that there is no discrepancy between them as to the main assertion made by both that the Lord's Mother was a virgin; and (ii) that the case of the conception and nativity, and that she was enabled to become a mother whilst retaining her virginity by the power of the Holy Ghost; (2) that to say that St. Matthew "knew nothing" of a previous residence of St. Mary at Nazareth, and that St. Luke "knew nothing" of the events attending the birth of Our Lord is unfounded, it is certain that the documents used respectively by the two evangelists for the compilation of their narratives those particular incidents were perhaps not mentioned; and (iii) that we should naturally expect a different point of view in narratives which bear upon them so plainly the evidence of being derived from such different sources, St. Matthew having clearly derived his information, whether directly or not, from St. Joseph, St. Luke even more clearly from the Lord's Mother. It may, therefore, be said that the virginity of St. Mary can only be denied at the cost of the repudiation of the whole evangelical narrations; and such a position is not held by the Catholic Creeds, and of the early chapters of the first and third gospels, and it may further be questioned whether the birth of the Redeemer as the natural son of Joseph and Mary could have met the needs which His becoming man was intended, in the counsels of God, to supply. A further question arises, namely, whether Holy Scripture warrants us in believing that the Mother of the Lord was, in the words of Bishop Pearson, "not only before and after His Nativity, but also for ever, the most immaculate and blessed virgin " (on the Creed, art. iii. 3), or in the words of St. Augustine, "virgo conceipiens, virgo parietis, virgo moriens" (De Catech. Rud. § 70). This question arises, in any consideration of the Scriptural notices of the Lord's Mother, out of the several passages in which the Lord's brethren are mentioned in Holy Scripture (Mt. 12:46; Lk. 2:41, 51; Jn. 7:12, 15; Cor. 15:50, Gal. 1:19). But, as shown under JAMES, where the subject is discussed at length, they were almost certainly not children of Mary, and
most probably were children of Joseph by an earlier marriage. Those who have maintained the view that the Blessed Virgin bore children to St. Joseph after she had become by the power of the Holy Ghost the mother of the Christ, rely upon the two passages, Lu.2.7 and Mt.1.25, as implying subsequent child-bearing: but though they may do so, they do not do so necessarily, since παρθένος was the title given to the eldest even if he were the only son, and the ἔκς ὧν of Mt.1.25, whilst safe-guarding the truth of the virginity up till the birth of the Lord, does not necessarily imply, at least in Scriptural usage, that there was any change after it. In accordance with this belief the title given to St. Mary in the writings of the Greek fathers and in the ancient liturgies was not only παρθένος but διεσύρκετος. It is, however, to be noted that this title, like the title Θεοτόκος, while both of them expressing her unique and unapproachable honour, was not given to her primarily out of honour to her, but rather to the Person of our Lord, though not of course needed in the way that Θεοτόκος was to guard the One and indivisible personality of the Word incarnate. This later title, the watch-word of the Faith at the third General Council against the heresy of Nestorius, finds its Scriptural justification in the teaching of Holy Scripture as to the unity of the two natures of our Lord in the One Person. Holy Scripture predicates of the two natures uniquely in the Person who is jointly true of only one of them. Birth and death, strictly speaking, are properties of the human nature, because the human nature was so closely united to the divine, Holy Scripture predicates them not of the human nature only but of the Divine, speaking of the Blood of God (Ac.20.28) and of the crucifixion of the Lord of Glory (1Cor.2.8). In the same way the Church spoke of the Mother of God, not because God could be born, any more than God could shed His Blood, but because so closely were Godhead and manhood united that she who bore the manhood bore that which was never, from the very tenet of Incarnation, separate from the Godhead. The Child on His Mother's knees was God; therefore, as the Fathers of Ephesus rightly argued, the Mother of the Child was Θεοτόκος, Mother of God. There is, therefore, it may be said, Scriptural ground for the three titles given to St. Mary in the theological and liturgical language of the Church—παρθένος, διεσύρκετος, Θεοτόκος—though again, it must be said that the second is not needed in the same way as the other two are for the safe-guarding of the great doctrine of the Incarnation. The consideration of these three titles practically exhausting the passages of Holy Scripture which have reference to the Blessed Virgin. After the gospel narrative she appears again for the last time as being present with the little Christian company in the upper room after the Lord's Ascension (Ac.1.14). After that notice she is withdrawn from the knowledge of the Church, dwelling no doubt in the home of the apostle John until the time of his death falling asleep. In the Apocalypse (12.1-6, 13-17) the "great sign" of the woman arrayed in light and crowned with stars, travelling in birth with the Man-child and persecuted by the great red dragon, may be regarded, as Prof. Milligan regards it, as, not indeed the actual picture, but as the ideal preceding and underlying it, of the Birth of Jesus. [INCARNATION; I.EMANUEL.] It may be added in conclusion that whilst Holy Scripture gives no encouragement to the position assigned to St. Mary in some popular devotions, it does represent her, not alone in place and station, but in character, as worthy of the highest honour and regard. If we had only the narrative of the Annunciation, there is in it ample testimony to the wonderful faith and humility of the Blessed Virgin. She is there portrayed to us as accepting in simple trust a message and a commission which required a consummate act of faith in the power of God, which entailed upon herself great suffering, and which more than any call that has ever been given to man demanded a readiness to accept the Will of God courageous and heroic in the extreme; yet in all that is told us of her we recognize nothing that is out of keeping with the most womanly and most tender character. It is doubtless to her way of pondering (Lu.2.19) over the sayings and doings in which she played so great a part that we have the narrative of the first chapter of St. Luke's gospel, a narrative which shows throughout the pure and delicate colouring of a true woman's thoughts. In the Magnificat those thoughts find an expression which for all ages has stood as the highest example of exalted rapture and of lowly self-abandonment. It is what the heart of St. Mary's relationship to her Divine Son we seem to see a readiness to accept at once our Lord's own estimate of that relationship, even though something of a reproof, or at least of a correction, was involved in it (Lu.2.49; Jn.2.4,5). We may say that in all that is said about the Blessed Virgin, and in all that is implied, in Holy Scripture, her own prophecy about herself, that all generations should call her blessed, is more than justified; and we may find an exact expression of the mind of the Church as to her unique and unapproachable position in the eloquent words of Bishop Pearson: "We cannot but feel a sovereign respect for the Mother of our Lord, so long as we give her not that worship which is due unto the Lord Himself. Let us keep the language of the primitive Church: let her be honoured and esteemed, let Him be worshipped and adored." [H.V.S.E.]

**Mash**

*MASH* 519

**Mash.** [PSALMS, TITLES OF.]

*Mash*, son of Aram (Gen.10.23). In 1Chr. 1.17 the name is used as the Persian title of the Moschi. Josephus (1 Ant. vi. 4) connects the name with *Mesene* in lower Babylonia, on the shores of the Persian Gulf. Bochart and others think that the name Mash is represented by the *Mons Mactus* of classical writers, a range which forms the N. boundary of Mesopotamia, between the Euphrates and the Tigris and another range of the same name in the plains of Bashan. In the Amarna
MASHAL

letters (Berlin 42, 76; Brit. Mus. 44) the Missi are noticed as aiding the king of Gebal, in the 15th cent. B.C., with ships, against the Amorites. [C.R.C.]

Mashal (1 Chr. 6.74). [Misheal.]

Masi'as, one of Solomon's servants, whose descendants returned with Zerubbabel (1 Esd. 5.34 only).

Mas'man (R.V., Maasinas) occurs for Shem-
mah, 12, in 1 Esd. 8.43, and is a corruption of Sogdias (A.V. Manasias), which is misplaced in ver. 44.

Mason. [Handicrafts, 3.]

Mas'pah.—1. A place opposite to Jerusa-
lem, at which Judas Maccabaeus and his followers assembled to bewail the desolation of the city and the sanctuary (1 Mac. 3.46), and where they prayed aforerime in Israel.' Clearly Mizpeh (Tell en Nasseh).—2. One of the cities which were taken from the Ammonites by Judas Maccabaeus in his campaign on the E. of Jordan (1 Mac. 5.33). Probably Mizpeh of Gilad (Sif). [C.R.C.]

Masrekhah, an ancient place, the native spot of Samlah, one of the old kings of the Edomites (Gen. 36.30; 1 Chr. 1.47). The site is unknown. [C.R.C.]

Massah, a son of Ishmael (Gen. 25.14; 1 Chr. 1.30), or a tribe at a place so called near Dumah. Some scholars read: Words of Lemuil king of Massa that his mother taught him” (Pr. 31.1). [C.R.C.]

Massah, = “temptation”; the “rock in Horeb” — apparently at Rephidim (Ex. 17.7, 8) —stricken by Moses for water. It is usually placed at the base stream of Wady Feirun (the valley of Paran). Horeb (desert) applying to the vicinity of Sinai. The name occurs also in Deut. 6.16, 8.22, 33.8, and in Heb. and R.V. of Ps. 95.8, where it is rendered “temptation” in A.V. [Meribah.]

Massias (1 Esd. 9.22) = Massiah, 3.

Massora. [Old Testament.]

Mastick-tree (Sis. 54 only; A.V. marg. and Geneva text, lentisk). That the Gk. word is correctly rendered is evident from the descriptions of Theophrastus, Pliny, Dioscorides, and other writers. The fragrant resin known as “mastic” is obtained by incisions made, in the month of August, in the trunk of the Pistacia lentiscus, order Anacardiaceae, which is common on the shores of the Mediterranean, and (Strand, Flor. Palael. No. 559) has been observed at Joppa, both by Rauwolf and Pococke. It is used with us, as it was by the ancients, to strengthen the teeth and gums, and was much prized for its many supposed medical virtues. Pliny says, “The very best Mastickle is brought out of the Island Chios . . . it issueth forth as a gum out of the Lentis tree. Minglest this also, like as Frankincense with Rosin” (xii. 17). See, for another place, under Nuts: and a third, under TURPENTINE.

Mathan’ias (1 Esd. 9.31) = Mattaniah, 6.

Mathu’zala (Lu. 3.37) = Methuselah.

Matred’, a daughter of Mezahab, and mother of Mehetabel (Gen. 36.39; 1 Chr. 1.50). Matri, the Benjamite family to which king Saul belonged (1 Sam. 10.21).

Mattiathas. The priests of Baal slain before his altars in the idol temple at Jerusalem, when the usurpation of Athaliah was overthrown (2 K. 11.18; 2 Chr. 23.17).—2. The father of Shephaiath, 5 (Je. 38.1).

Mattana’n, a station in the latter part of the wanderings of the Israelites (Num. 21.18, 19). It was placed beyond the wilderness and between it and Nahalil: Nahalil again being but one day’s journey from the Bannoth of Moab. The site is doubtful. [C.R.C.]

Mattaniah’—1. The original name of Zedekeiah, King of Judah, changed by Nebu-
chadnezzar when he placed him on the throne instead of his nephew Jehoiachin (2 K. 24.17).—2. A Levite singer of the sons of Asaph, des-
scribed as the son of Michah (1 Chr. 15.1), Micha (Nc. 11.17), or Michaiah (12.35). He was leader of the temple-choir after its restoration (11.17, 12.8), and one of the “keepers of the thresholds” (12.23). A comparison of 12.15 with 41, where Zechariah is represented as a priest’s son —Mattaniah being a Levite —and with 12.26 (cf. 11.17 for similar association with Bakbukiah), which represents Mattaniah as a contemporary of Nehemiah, whose Zedekiah (if his great-grandson) could scarcely also be, seems to indicate that 12.35 is corrupt, and that the latter part of it belongs to ver. 36, where “his brethren” are mentioned (cf. ver. 8).—3. A descendant of Asaph, and ancestor of Jahaziel the Levite, in the reign of Jehoshaphat (2 Chr. 20.14).—4. One of the sons of Elam (Ezr. 10.26).—5. Of Zattu (10.37).—6. Of Pahath-Moab (10.30), and—7. Of Bani (10.37), who, like the three preceding, put away his foreign wife.—8. A Levite, father of Zachur, 6, and ancestor of Hanaan, 8 (Ne. 13.13).—9. One of the 11 sons of Hemam; appointed by David head of the oth course of the temple-choir (1 Chr. 25.4, 16).—10. A descendant of Asaph, who assisted in the purification of the temple under Hezekiah (2 Chr. 29.13).

Mattathas, son of Nathan, and grandson of David, in the genealogy of our Lord (Lk. 3.31).

Mattathian’ah, a descendant of Hashum, who put away his foreign wife (Ezr. 10.33).

Mattathias’as.—1. (1 Esd. 9.43) = Mattathian, 4.—2. The father of the Maccabees (1
Mac. 2:1 (etc., 14:29).—3. Son of Absalom, and brother of Jonathan, 14; one of two captains who stood by the latter in the panic of Nasor (1Mac. 11:70, 13:11).—4. Son of Simon the Hasmonaean, treacherously murdered, with his father and brother, in the fortress of Docus, by Ptolemeus, son of Abubus (18:14).—5. One of the three envoys sent by Nicæor to treat with Judas Maccabæus (2Mac. 16:19).—6. Son of Amos (Lu. 3:25), and—7. Son of Semei (3:26), in the genealogy of our Lord.

Mattenai.—One of the family of Hashum (Ezr. 10:33), and—2. A descendant of Bani (ver. 37), who put away their foreign wives at Ezra's command. (Ezr. 9:5).—9. A priest in the days of Joiakim, the son of Jeshua (Ne. 12:19).

Matthan, the son of Eleazar, and grandfather of Joseph "the husband of Mary" (Mt. 1:15). He occupies the same place in the genealogy as Mathath in Lu. 3:24, with whom indeed he is probably identical. [GENEALOGY OF JESUS CHRIST.]

Matthâni (1Esd. 9:27) = Mattaniah, 4.

Mattheas (1Esd. 9:19) = Maseiah, 1.

Matthew, Mark, Luke, and John, 3. The author of this apostle. He is called Levi, the son of Alphæus. There can be no doubt as to the identity, for the Synoptists agree in their account of the feast associated with a publican called Levi in Mk. 2:14 and Lu. 5:29, and Matthew in Mt. 9:9. Also it was common with Jewish at that time, to have two or more names, strictly Jewish and the other not. He was a "publican," or collector of customs, in the service of Herod Antipas at Capernaum. As our Lord had lived at Capernaum He had probably noted something in the man which made him fit to be an apostle. At the call of Christ "he forsook all and rose up and followed Him." He then made a great feast, to which he invited many publicans and sinners, doubtless that they too might come under the Master's influence. It led to criticism from certain scribes and Pharisees, and our Lord's statement that He had not come to "condemn sinners, but to save them." From this moment all men knew there was no line of separation. The call was thus a repudiation of the Pharisaic principle of "separation." After the appointment of the apostles, St. Matthew was put in the second of the three groups of apostles, and is placed seventh in the lists in Mk. and Lu., and eighth in those in Mt. and Ac. The N.T. gives us no further information. St. Paul does not seem to have found any of the apostles at Jerusalem when he was there in 56 A.D. (Ac. 21:17f). According to Clement of Alexandria (200 A.D.), St. Matthew led a strictly ascetic life, such as is recorded of St. James. In the 4th and 5th cent. Parthia, Ethiopia, and India were believed to have been visited by him. Clement's on says (Strom. iv. 9) that he did not suffer martyrdom. The fact that he disappears almost completely from the realm of history strengthens the tradition which connects our first gospel with his name. A false tradition would have connected this favourite book of the primitive Church with a more popular figure.
Matthew, Gospel Acc. to St.

The text is a page from the Gospel of Matthew, discussing the relationship between Jesus and the Pharisees. The page contains detailed analysis of the Gospel's text, focusing on the historical and theological implications of Jesus' interactions with the Pharisees. The text explores themes such as the kingdom of God, Jesus' authority, and the contrast between religious expectations and Jesus' teachings. It references verses from the New Testament, particularly from the Gospel of Matthew, to support its arguments. The page is a historical and theological analysis rather than a direct translation of the Gospel text.
is that he had been a constant attendant upon our Lord throughout His ministry; for such was declared by St. Peter to be the necessary qualification of one who was to be a witness of the Resurrection. There is a tradition that he preached and suffered martyrdom in Ethiopia.

MATTIAH.—1. A Levite, the first-born of Shallum the Korhite, who presided over the offerings made in the pans (1 Chr. 9.31; cf. Lev. 6.20 ff.).—2. A Levite, one of the six sons of Jeduthun (1 Chr. 25.3); appointed by David head of the 14th division of the temple-choir (25.21), under Asaph before the ark. (15.18, 21, 16.5), "with harps upon Sheminith."—3. One of the Bene-Nebo, who had married a foreign wife (Ezr. 10.43).—4. One, probably a priest, who stood at the right hand of Ezra when he read the law to the people (Neh. 8.4).

Mattock (Is. 7.25).—The tool (mal'dër) used in Palestine for digging; answers generally to our hoe. The ancient Egyptian "hoe" was of wood, and served the purpose of hoe, spade, and pick.

MEALS

MEALS. The early Hebrews do not seem to have given special names to their several meals, for the terms rendered "dine" and "dinner" in A.V. (Gen. 43.16; Pr. 15.17) are general expressions which might more correctly be rendered "eat" and "portion of food." In N.T. the Gk. terms ἐπισκευάζω and βεστιάζω, are rendered by A.V. "dinner" and "supper" respectively (Lk. 14.12; Jn. 21.12), but are more properly "breakfast" and "dinner." The ordinary meals were at mid-day, a light meal (1 K. 20.16; Ru. 2.14), and at even (cf. the Passover meal; Ex. 16.12; Jud. 19.21). The post of the meal was that of squatting on the ground, later, on chairs (Gen. 27.10; Judg. 19.6; 1 Sam. 20.5; 1 K. 13.20; Am. 3.12, 6.4). Tables in the modern sense were unknown in early Israel. שולחן often implies no more than a mat spread on the floor; cf. the sufra (a leathern mat) of modern Arabs. Narrow, tables placed parallel to each other (2 K. 4.10). [TABLE.] In N.T. times reclining was the universal custom, as is implied in the terms used for "sitting at meat," as A.V. incorrectly has it. The couch itself is only once mentioned (Mt. 7.4; A.V. tables), but there can be little doubt that the Roman triclinium had been introduced, and that the arrangements resembled those described by classical writers. Generally speaking, only three persons reclined on each couch, but occasionally four or even five. The couches were provided with cushions on which the left elbow rested in support of the upper part of the body, while the right arm remained

Another word (malak'ashā, 1 Sam. 13.20) rendered "mattock" refers to a sharpened instrument: the meaning is doubtful. In 2 Chr. 34.6 "mattocks" is a clear error for "ruins" (R.V.), or perhaps for "villages." [G.K.C.]
MEALS

free; a room provided with these was described as ἑσπερινή, lit. "spread" (14.15; A.V. furnished). A guest might thus be said to "lean on the bosom" of his neighbour (Jn.13.23, 21, 26). The ordinary arrangement of the couches was in three sides of a square, the fourth being left open for the servants to bring the dishes. Women were present at meals (1Sam.1.8; Deut.16.14, 14; Job 1.4; Ru.2.14): the Israelites differing herein from the present custom of the East. Before commencing the meal, the guests washed their hands. Another preliminary step was the grace or blessing, of which we have but one instance in O.T. (1Sam.9.13), and more than one pronounced by our Lord Himself (Mt.15.36; Lnu.9.16; Jn.6.11). The mode of taking food did not differ materially from modern usages of the East; generally there was a single dish, into which each guest dipped his hand (Mt.26.23); occasionally separate portions were served out to each (Gen.43.34; Ru.2.14; 1Sam.1.4). A piece of bread was held between the thumb and two fingers of the right hand (forks, spoons, and table-knives being, of course, unknown), and was dipped either into a bowl of melted grease (ΣΟΠ) or into the dish of meat, the bread being folded round a piece of meat to convey it to the mouth. The meal being ended, grace was again said in conformity with Deut.8.10, and the hands again washed. On state occasions more ceremony was used, and the meal was enlivened in various ways. Such occasions were numerous, both in connexion with public and private events. A sumptuous repast was then prepared; the guests were previously invited (Esth.5.8; Mt.22.3), and on the day of the feast a second invitation was issued to those that were hidden (Esth.6.14; Pr.9.2, 3; Mt.22.3). The visitors were received with a kiss (Tob.7.6; Lu.7.45); water was produced to wash their feet (Lu.7.44); the head, beard, feet, and sometimes the clothes, were perfumed with ointment (Ps.23.5; Am.6.6; Lu.7.38; Jn.12.3): on special occasions robes were provided (Mt.22.11); and the head was decorated with wreaths (Is.28.1; Wis.2.7, 8; Josephus, 19 Ant. i. 1). The regulation of the feast was the function of a special officer, named διηραστήρας (Jn.2.8; A.V. governor of the feast), whose business it was to taste the food and the liquors before they were placed on the table, and to settle about the music and amusements. He was generally one of the guests (Eccles.32.1, 2), and might therefore take part in the conversation. The places of the guests were settled according to their respective rank (Gen.43.33; 1Sam.9.22; Mk.12.39; Lu.14.8; Jn.13.23); portions of food were placed before each (2Sam.6.19; 1Chr.16.3), the most honoured guests receiving either larger (Gen.43.34; cf. Herod. vi. 57) or more choice (1Sam.1.4, 5, 9.24; cf. II. vii. 321) portions than the rest. The meal was enlivened with music, singing, and dancing (2Sam.19.35; Ps.69.12; Is.5.12; Am.6.5), or with riddles (Jug.15.12) and the festivities sometimes prolonged for several days (Esth.1.3, 4).

Meat.

The same as מֶהָעְנִים (Esth.5.31; cf. Ezr.2.50).

Mearah, a place named, in Jos.13.4 only, as "Mearah, which is to the Zidonians." The word מֶהָעְנִים means in Heb. "a cave"—Arab. مَهْرَال. Probably of Mejheiriyyeh (place of the little cave), a village 6 miles N.E. of Sidon.

C.R.C.

Measures. [Weights and Measures.]

Meat. Of the 12 or 13 Heb. words which A.V. renders "meat" (nearly 90 times), scarcely any mean "meat" in its modern sense: though Gen.27.1, Ps.14.12, are exceptions. All refer to "food," which only in the rarest instances consisted of meat. When "meat" in the restricted

AN ANCIENT EGYPTIAN DINNER PARTY. (Wilkinson.)

a, l., s., r., Tables with various dishes. b, p. Figs. d, e, g, and s. Buckets of grapes. Fig. 3 is taking a wing from a goose. Fig. 4 is about to drink water from an earthen vessel.
modern sense is referred to, the word ἄβασις (flesh) is used. In a large number of instances A.V. renders the Heb. minhād “meat-offering,” but it should be *meat-offering*, as always in R.V. (either text or marg.). In O.T. “meat” is never used figuratively. In N.T. also “meat” often means “food” generally, but occurs some 7 or 8 times with the modern limitation. In the gospels the *figurative* use of the word predominates. [Footnote.]

**Meat-offering (properly Meat-offering).**

**Sacrifice, 3. i. b; 3. v. b.**

**Mebunnal** (2Sam.23.27only) = SIRBECHAI. [HUSHATHITE.]

**Mecho’rathite, The, i.e. the inhabitant of a place Mecherah (1Chr.11.36). In 2Sam.23 the name appears as “the Marachathite” (ver. 34); Kennicott concludes that this is correct.

**Me’daba** (1Mac.9.36), the Gk. form of MeDEBA.

**Medad**. [ELDAD and MEDAD.]

**Medan** (Gen.25.2,37; 1Chr.1.32), a son of Abraham and Keturah, and a tribe descended from him. Glaser has found mention of Medan (if the reading is correct; the first character is not certain) in a Minean temple-inscription, where a slave-girl of that tribe is named Mephitai. The Massoretic Heb. Manda (properly and analogously “Medians,” as A.V. and LXX.) in Gen.37.36, where (cf. ver. 28) they seem to be identified with the latter. Has the same omission of yodh in 25.2 led to the repetition “and Medan and Midian,” both being the same name? This is the more possible, as nowhere else in the Bible do we read of Medan (1Chr.1.32 being copied from Gen.25.2). Glaser, Mittheilungen; Hommel, Die altisraelische Ueberlieferung. [W.S.T.C.T.]

**Medeba, a city in the “plain” (minshôr, or “plateau”) of Moab (Jos.13.9,16): first noticed in the Amorite song of triumph (Num.21.30). It is denounced by Isaiah (15.2); and, according to 1Chr.19.7, was the scene of Darius’ victory over the Amorites and Arameans. [HELAM.] On the Moabite Stone Medeba is noticed as possessed by Omri and Ahab, and recovered, in 9th cent. B.C., by king Mesha. In 110 B.C. it was besieged and taken by John Hyrcanus (Josephus, 13 Ant. ix. 1). It is now the ruined town Mâda, on the high-road, 6 miles S. of Heshbon, on the Moab plateau. The ruins (Surv. E. Pal. pp. 178-183) are those of the Roman city, as late as the 5th cent. A.D. Gk. and Lat. inscriptions have been found, with others in Aramaic. On W. are remains of a cathedral, on the S. a large tank, and on N.E. the ruins of a gate and street of columns. In the notable discovery, however, is that of a mosaic pavement in the cathedral, of which fragments remain (see Die Mosaikkarte von Medeba, P. Palmer and Dr. Guthrie, 1906); for it represents a map of Palestine, with Gk. lettering, dating c. 440 A.D., and giving a valuable representation of the tradition of that time. Among of the walls and buildings of Jerusalem. [G.R.C.]

**Medes** (Heb. madhây, Assyr. Mânâd, Mâdâ, Matâ, Akhaem. Pers. Mâyâ, Gk. Mîdā : first mentioned in Gen.10.2 as descended from Japheth, an Aryan tribe, closely connected with the Persians in language and descent. On the Assyrian tablets the Medes (manda) are first spoken of as subjects of Nebuchadnezzar II. (Nimr., Obl. 1. 121), c. 840 B.C., as dwelling in what was afterwards called Media Atropatene, the modern Azarbâijân. From the E. of Assyria their territory stretched to the Caspian Sea. Like the Gks. and other Aryans, they were divided into a number of small independent states ruled by “kings” (cf. Je.25-25). KamânâmîrârÎIII. of Assyria (810-781 or 812-783 B.C.) boasts of having conquered the “land of the Medes” and the “land of Parsua” (Persia), as well as Mesopotamia, Palestine, etc. (W. Asiatic Inscriptions, vol. I. p. 35). Asshur-nârî II. in 749-748 B.C. made an expedition into Medea, and the latter king added Kisheshin, Kharkhar, and several other parts of the W. of Media to his dominions (716 B.C.), transplanting Israelite captives to the “cities of the Medes” and elsewhere (2K.17.6). Sargon conquers Medea; the latter name of a city called Dayaukk (probably the Dēōkēs of Herodotus) in 713, having captured the prince himself in 715 B.C. According to Herodotus, Dēōkēs founded the “Median” empire, and his successor Phraortes conquered Persia. The inscriptions of Darius seem to prove that the Medes were the “host of the Medes” to Cyrus, and that of Medes, a name again found among the ancestors of Cyrus. But the chief agents in the overthrow of Nineveh, which followed c. 606 B.C., were the Mandâ, under their king Ḥusrâtu-tukulti; subsequently those of Babylon, father of Nebuchadnezzar. These Mandâ (more commonly Umman-Mandâ, or “host of Mandâ”) were a number of Aryan tribes, probably the Scythians; but are by Herodotus confounded with the Medes proper. The Mandâ are first mentioned by Esar-haddon I. They formed a confederacy, which ultimately became a kingdom, having as its capital Ecbatana (Hamadan). Being closely connected with the Medes in language, it is not surprising that, when they formed an alliance with them, the union should have been spoken of by the Greeks as the Median empire, though it is not so styled by the Babylonians and Persians. From this compelled Ishtubûrû-girânu’Ia, Dēōkēs’ third successor, according to Herodotus, king of the Mandâ, to raise the siege of Haran. He defeated Astyages, captured him, plundered his capital, and carried the spoil to Ashan in 549 B.C. The true Medes seem to have shortly after thrown off their lot with the Persians, and advanced with him to the overthrow of Nabû-na’â’id of Babylon (J.51. 11, 27-28). As Cyrus, though of Persian descent, did not take possession of Persia, or Persia proper, till 540 B.C., being originally
king of Anshan in Northern Elam, the Medes are at first spoken of before the Persians as more important (Dan. 8.20; cf. 5.28, 6.8, 12). So the Old Testament identifies Media with Persia when it means the Persian empire. Later this position was reversed (Esth. 1.3, 14, 18, 19), as in the Behistun inscriptions. It is certainly possible that Medæi and Mandā may be forms of the same word, whatever its meaning may be; as both in Assyr. and in Skt., the root *maud* has another family, media and Mandai, the Persian names being due to quite different families. A serious revolt in Media occurred under Darius I. The leader of the rebels, Fravartish (Phraortes), claimed the throne of Media, as descended from Cyaxares, and fought many battles before being captured at Ragā (near Tehran). Darius cut off his hands and put out his eyes, and crucified him finally at Ecbatana. Henceforth the history of Media forms part of that of Persia. The religion of the Medes was probably very similar to that of the Persians, Zoroastrians. It is very probable that the Avestā represents their language in various stages, while the Greek version, the Persica, may be the Mandaic inscriptions of that of Persia proper. However that may be, the few Median words mentioned by Gk. writers (e.g. spāka, Herod. i. 110, "bitch," is the Ave. stān [nom. spā], cf. Russ. sōhaka; and ṭērē). Eust. ad Dionys. = σαχής ὡς βηστάρι. Μήδων γάρ πετάνω καλούσ τοῦ τάσεων. Ave. līgha, "sharp," ṭērē, "an arrow") are found in the Avestā. Darius the Mede (Dan. 5, 31, etc.) is almost certainly the Gaharana, or Ogbarana, of the Babylonian inscriptions, where the latter performs the part ascribed to Darius the Mede in Dan. 5c (cf. Media; Persia; Persians). Rawlinson's W. A. Inscriptions, etc.; Inscriptions of Cyrus and Darius; Pinches, O.T. in the Light of History. Records of Assy. and Bab. Sayce, Higher Crit. and the Mon. [W.st.c.t.]

**Media.** The meaning of this term varied at different times. It is impossible to define the limits of the "land of the Medes" when we first meet with them in the Assyrian annals about 819 b.c. When Media became a provincial subdivision of the empire of Cyrus and Darius it extended from somewhat N. of Isfahan (Aspadana) as far as the river Araxes, or even to the Kūr (Cyrus), to the W. and S.W. of the Caspian. Under the Parthians it was bounded on the E. by the Caspian, Hyrcania, and Parthia, on the S. by Persis, on the W. by Assyria and Armenia, on the N. by the Cyrus. Its main divisions were Atropatene (Azerbaijan) to the N. and Media Magna to the S. Its capital under the Mandā was Ecbatana (Hamadan). Another famous city was Ragā (Rhagae), now represented by the ruins of Rej, near Tehran. From the central plateau of Persia, 5,000 feet above the sea, where the soil is mostly unproductive through want of water, the ground sinks gradually (though broken by mountain-chains) to the Caspian. Beyond Tehran the rainfall is greater, the olive grows wild, and grass grows on the gentler hills. Along the shore of the Caspian the land is low and fertile. Wherever there is water, to which N. of Ecbatana, was of old celebrated for its horses. Atropatene was (as its name, Atropat-āken in Armen., implies) a great centre of fire-worship in the past. It is, generally speaking, more fertile than most of Media Magna. [Media; Persia; Persians.] [W.st.c.t.]

**Median.** Darius "the Mede" (Dan. 11.1) is thus described in Dan. 5.31. [W.st.c.t.]

**Mediator.** (1) Gal. 3.16, 20. St. Paul contrasts the elaborate basis of contract on which the legal relationship between God and Israel was founded with the simplicity and directness of "the promise." The law is an agreement between two parties, arranged by amediator, Moses (not, of course, Christ, as Origen supposed) as "mediator between God and men" (Deut. 33.3, LXX.). "Now a mediator is not a mediator of one," i.e. the idea of mediation implies a contract to which there are two parties. "But God is one"; to the covenant there is no second party; God's promise is independent ultimately of human wills, however much for a time they may thwart it. Thus Christianity implies a direct relationship between God and man, and in this sense mediation is a thing of the past. (2) Nevertheless St. Paul's epistles are full of a Christian doctrine of mediation: not, however, a mechanical and outward mediation like that of Moses but one which rests on the revealed divine and human natures in Christ, the "one mediator between God and men, Himself man" (1 Tim. 2.5, R.V.). [Paul.] (3) One of the central ideas of the Ep. to the Hebrews is that Christ is the Mediator of the "new covenant" foretold in Jer. 31.31-34, a "better covenant enacted upon better promises than that of Moses" (Heb. 8.5, 6). But this mediation is the antitype of Aaron's as well as Moses' (9.13-15). It is the priestly mediation of the unblemished life devoted in sacrifice to God, and therefore of cleansing efficacy. Christ not only declares the terms of a contract; He enters the holy of holies "through His own blood," and transforms the relationship of man to God. The material terroirs and legal code of Sinai are replaced by the communion of saints and that new covenant whereof Jesus is the Mediator (12.18-24). [Hebrews, Ep. to.] [K.B.M.D.]

**Medicine.** Considering what a high pitch of civilisation and science the ancients had reached, it is astonishing that we have not more evidence of their knowledge of the art of healing. That the Egyptians had a very considerable knowledge of the matter is evident from various sources. It has been said that their acquaintance with anatomy was very deficient, but although a casual observer might deduce this from the lack of perspective in their descriptive drawings on the monuments, such a conclusion is unwarranted. In the British Museum are portions of Egyptian sculpture, which in themselves are sufficient evidence of very considerable anatomical skill on the sculptor's part. Moreover, the better class of Egyptians was not carried on without much knowledge of anatomy. Doubtless, therefore, the Jews must have had by the time of the Exodus a good deal of such knowledge. Yet it is a remarkable fact that, with the exceptions of circumcision and of the making of emuums, the Jews were not allowed to any practice of surgery, though mid-wifery seems to have been known and followed as a profession among the very earliest peoples (Gen. 35.17; Ex. 1.17; 1 Sam. 4.20). It is in-
 MEDICINE

interesting to note that the Code of Hammurabi (c. 2100 B.C.) includes laws concerning the responsibilities and fees of doctors. In the present article we deal with our subject under the three heads of disease, treatment, and hygiene. (1) Disease. Many diseases are mentioned in O.T.—often, as in the case of the plagues of Egypt, as a direct punishment for sin. Indeed, the primary idea with regard to sickness in the Jewish mind seems always to have been to connect it with wrong-doing, either on the part of the sufferer himself or of those intimately related to him. Thus, when Abraham denied his wife, the woman-kind of Abimelech become barren (Gen. 20.18), diseases occur among the plagues of Egypt (Ex. 9.9), the "plague" is the direct punishment of the evil spirits (Num. 14.37), and of those who followed Korah (16.47), and so throughout the whole of O.T. Even in N.T. times this idea was still prevalent among the Jews—e.g. in St. John (9.2) the disciples jump to the conclusion that a man born blind must of necessity be either himself a notorious sinner or the child of such. At the same time it is only right to remember that many things which to the unenlightened appear to be abnormal divine intercessions are, according to the inner meaning of the divine law of nature. Thus Deut. 28.15 f. might well be taken at first sight to refer to some miraculous punishment upon evildoers, whereas it is simply a statement of the natural results of national wrong-doing in the fields of economics, justice, and morals. To discuss how far the development of legal regulations in the case of the Jewish nation is outside our scope, though the cases of Korah and of the evil spirits, together with many others, seem fairly conclusive as far as the principle is concerned. To turn to the examination of diseases in general. It is exceedingly difficult to identify many of the symptoms mentioned in the Bible with special modern diseases. Lepra is fully treated elsewhere, but we may mention, in passing, that skin diseases of one sort and another are, and probably always have been, exceedingly common in the East. We therefore find many references to such: to boils (Lev. 14.3), to "inflamed skin" (Num. 6.12), the "boch of Egypt," coupled with the scab and itch (Deut. 28.27.35), this last at least suggesting that syphilis was present then as now, and to gangrene or cancer (whichever interpretation is placed upon 2Tim. 2.17). Other diseases mentioned in the Scripture are as follows. Eremedes were the punishment of the Philistines who profaned the ark of God (1Sam. 5.6-12.6.11; see also Deut. 28.27). These were possibly haemorrhoids or external piles, but more probably bubonic plague. [PLAGUE.] Blindness was exceedingly frequent in the East, owing to various local conditions, the dryness of the atmosphere, the sand and glare, and above all the innumerable foul-living insects. Though no doubt all these conditions were ameliorated by the exceedingly careful laws of the Jews with regard to cleanliness and sanitation. Consumption is mentioned in Lev. 26.16 and in Deut. 28.22, but the word must be regarded as an agglutinate, and not as having necessarily any connection with phthisis. The withered hand of 1K. 13.4-6 and Mt. 12.10 is either paralysis or atrophy. It might be the result of disease or injury to nerve or artery. We have a case of sunstroke in 2K. 4.19, and possibly of dropsy in 2Chr. 16.12. Antiochus (2Mac. 9.5-10) and Herod Agrippa I. (Ac. 12.23) are said to have been "eaten of worms," and this fate is also ascribed to Josephus to Herod the Great (17 Ant. vi.). Colic is specified as the direct result of over-eating (Ecclus. 37.30), and scurvy, like all other skin affections, is a bar to a descendant of Aaron exercising the priest's office (Lev. 21.20). MADDNESS is frequently mentioned or implied. Finally, as a proof that, however deficient the medical knowledge of the ancients might have been, they were certainly not lacking in powers of observation, we have the magnificent description of old age and its symptoms in Ec. 12. (2) Cures and Treatment. Here Scripture affords us very little information. We find throughout Holy Writ a constant mention of physiognum of few indications as to how they performed their office. In all probability there was, at least in the earlier days, a great deal of superstition mixed up with their ideas of treatment. Thus, the mandrake is supposed to correct barrenness in women (Gen. 30.14), and according to the prevalent Jewish legends, Josephus is accredited with power to work magical cures, and Abraham has a talisman the touch of which will cure all diseases. On the other hand, it is interesting to note that there is no suggestion in O.T. of the healing art being a preserve of the priesthood, as is usual in the earlier days. (3) The development of a proper judge of leprosy, but this is apparently more because of the ceremonial uncleanness it involves than from the point of view of the physician. Indeed, while most careful directions are given in Lev. 13 as to the diagnosis of leprosy, there is not a word said as to its cure, apparently intimating that the priestly work finished with the pronouncing of clean or unclean. At the same time it is reasonable to imagine that the greater dignity and leisure of the Levites would make them the students, and therefore the physicians, of the nation. Healing and physicians are frequently mentioned in the O.T. (see 2K. 19; Z. 8.29, 2Chr. 16.12; Je. 8.22, etc.). Lepra is also called "spake of trees" (1K. 4.33), is very fond of discussing questions of disease and remedy (Pr. 3.8, 6.15, 12.18, 17.22, 20.30). Elisha has knowledge enough to heal the bitter water (2K. 2.21) and to cure the poisonous poottage (4.39-41). [Poison.] Hezekiah's boil is treated with a compress of clay (Is. 38.21), and Asa is healed because he thinks of the physicians rather than of Him from Whom their skill comes (2Chr. 16.12). The Babylonish Captivity brought the Jews into contact with new methods of thought and feeling, and no doubt increased their knowledge of medicine as of other civilized arts. Ecclus. mentions shows, by its repeated mention of physicians, etc., the increased regard given to the study of medicine, as is natural in a book probably belonging to the period of the Ptolemies. The wisdom of prevention is recognized in 18.19. Rank and honour are said to be the portion of the physician, and of whom it is said to the Lord (Ps. 38.1, 3.12). The repeated allusion to the book (7,
35, 30, 17, 31, 22, 37, 30, 88, 9), coupled with the former recognition of merit, have caused some to speculate that the author was himself a physician, but of this there is no evidence. In Wis. 16.12 plaiter is spoken of; anointing in Tob. 6.8 (see also Rev. 3.18). In the period of N.T. St. Luke, "the beloved physician," who had practised at Antioch, could hardly have failed to have been conversant with all the leading opinions current down to his own time. Situated between the great schools of Alexandria and Cilicia, within an easy sea-transit of both, as well as of the Western homes of science, Antioch enjoyed a more central position than any great city of the ancient world, and in it, therefore, all the streams of contemporary medical learning probably found a point of confluence. The medicine and surgery of St. Luke were probably not inferior to those in demand among educated Asiatic Greeks, and must have been, as regards their basis, Greek and not Jewish. (The Greek origin of the medical profession is proved by a number of words for drugs, doctors, etc., in the Talmud, all of which are Greek.) Hence a standard Gk. medical writer, if any is to be found of that period, would best represent the profession to which the evangelist belonged. Without absolute certainty as to date, we seem to have such a writer in Aretæus, commonly called "the Cappadociam," who wrote certainly after Nero's reign began, and probably flourished shortly before and after the decade in which St. Paul reached Rome and Jerusalem fell. If he were of St. Luke's age it is striking that he should also be perhaps the only ancient medical authority in favour of denominal possession as a possible account of epilepsy. Assuming the date above indicated, he may be taken as expounding the medical practice of the Asiatic Greeks in the latter half of the 1st cent. There is, however, much strongly marked individuality in his work, more especially to the minute version of his cases. As the general science of medicine and surgery of this period may be represented by Aretæus, so we have near that time a representative of Materia medica in Dioscorides. He, too, was of the same general region, a Cilician Greek, and his first lessons were probably learned in Antioch. His exact period is likewise uncertain, but he has usually been assigned to the end of the 1st or the beginning of the 2nd cent. (3) Hygiene. In regard to this aspect of the treatment or avoidance of disease, we find much more advanced knowledge than in the branches already treated. The tradition of personal cleanliness among the Jews was pushed to an extreme which even in these days of great care in such matters seems at first to be unnecessary. But further consideration shows that it was not so. The washing of hands before every meal (Mt. 15.2; Mk. 7.3) becomes a mere axiom of cleanliness, when we remember that hands were constantly used as we use forks (Mt. 26.23; Jn. 13.26); our Lord did not find fault with the custom, but with the Pharisees for their lack of a sense of proportion (cf. Mt. 23.23). Again, in Deut. 23.12-13 we have a direction given professedly for ritual reasons, because such reasons would appeal to the Eastern mind more than mere considerations of hygiene, but which contains all the essentials of that most recent scientific device, the "earth-closet." The O.T. rules as to diet and the killing of animals for food are most interesting. The Talmudical laws of "Bediqa" elaborate these, and, if carefully observed, are said to reduce the chance of infection through meat to a minimum. It is also worthy of notice that in a country where dead bodies rapidly putrefy and infectious flies abound, the prohibitions as to touching dead bodies (Num. 19.11, etc.; Lev. 17.13-16) become absolutely necessary for health. In the case of infectious diseases, especially of leprosy, most elaborate precautions are enjoined; all of which are amply justified by modern research. These precautions are summed up by Dr. Adler, the Chief Rabbi, as follows: "They comprise (1) complete isolation of the sick from his family, friends, and the general community till the malady had disappeared; (2) a thorough and absolute purification of the sick person, and of any that have come in contact with him, before he is to re-enter the camp; (3) a second period of quarantine; (4) lastly, the destruction of his clothes and other effects." To compare these directions with modern ideas, running as they do on almost exactly the same lines of prohibition, protection, and purification, would be a fascinating subject for further investigation. The precautions as to "leprous houses" [LEPROSY] have called forth much criticism, but in this connexion it is interesting to note the comments of Dr. John Sutherland. "When a house," he says, "has been built in a locality where the air is moist and loaded with putrescent matter, or where a house has been overcrowded or inhabited an undue length of time, without the walls having been cleansed, the plaster becomes saturated with damp and with organic matter, etc. Whenever this takes place the house will become unhealthy and the colour of the walls will be changed. A greenish or reddish tint (these are the very colours of the house-leprosy in Deut.), apparently arising from minute lichens or fungi, appears in various places, and it is in houses with walls in this condition that cholera and other epidemics usually select their earliest victims." In view of these and many more instances of the need of hygiene, it is a curious fact that most of modern hygiene, is it very far-fetched to say, as one writer on this subject has done, "Still throughout the land, in this twentieth century, Moses hath in every city them that preach him."? [F.J.]

Me'edia (Rev. Ed. 5.32) = Me'ida. Me'giddo' (pl. of cut). The termination in "me" shows the name to belong to the old Canaanite language, which—like the Babylonian—had a nominative ending in "u", as in Jericho, etc., a royal Canaanite city (Jos. 12.21), noticed between Taanach and Keshem (perhaps of Nahalot). It lay in Bashan, though held by Manasseh (17.11), being one of "three countries" (nehpheth, "open lands"), the other two being Es-dor and Taanach. It was one of the places not taken from the Canaanites (Judg. 1:27), and is noticed in this passage next to Jizreel. The kings of Canaan fought "not to the waters of Megiddo" (5:19); but
the battle in question was fought near En-dor. [Kishon, River.] Megiddo was included in Solomon’s fifth district—answering to Issachar—which reached to Taanach, and Megiddo, and the valley wherein (1K.4.12); it was fortified by him (9.15). Ahaziah of Judah fled before Jehu from Jezreel, “by the way of Beth-hag-gan,” to Gér by Ibleam, where he was wounded, and driven thence to Megiddo (2K.9.27). King Josiah met the Egyptians at Megiddo, and was there slain (23.30), As thus was the valley being a “plain” near it; but in Zechariah (12.11) we read of the “valley [bīqād] of Megiddon”—a term applying, not to a plain, but to a wide valley between mountain chains. The Armageddon of the Apocalypse (16.16), stated to be a Heb. word, is evidently har-megiddôn, the mountain of Megiddo; his future triumph is represented as occurring, on the field where Israel lost its freedom at the death of Josiah. None of these notices very clearly indicate the position of Megiddo; but it was a strong place, well watered, in or near a broad valley, on the highway of armies, in the lot of Issachar. As being in a separate “open space,” it appears not to have been in the same district as Taanach. But the site was unknown in the 4th cent., and the Talmud does not notice Megiddo. Robinson’s suggestion that it lay at Lejjûn (the Roman Legio), 4½ miles N.W. of Taanach, is a mere conjecture, due to Megiddo being several times noticed next to Taanach, and to the site being well watered, near hills and plains, and evidently important. Lejjûn, however, is not on the high-road from Egypt to Damascus, which runs on E. side of the plain of Esdrælon, whereas that on the W. leads to Accho, past Taanach. There is no highway across the plain itself, and it is improbable that Ahaziah, even if he fled S. to Jerû, would then have fled again to N.W. to Lejjûn. Nor is it likely that two royal cities (Megiddo and Taanach) would have been within five miles of each other, especially as they were in different “countries” or “regions,” according to the Targum on Joshua (4.12, 13). Several important notices are rather vague, but cast some light on the question. About 1580 b.c. Thothmes III., on his first campaign, met the Hittites, and other Syrians, at Makitha (or Magida), a city which appears to be Megiddo, since Taanach is noticed in the account of his advance. He was marching on Damascus, and the account of his first campaign, on the walls of the Karnak temple (Brugsch, Hist. Egl. i. pp. 318-337), though fragmentary, is valuable. He rejected the N. roads near Taanach, and apparently followed the more open trade route by Dothan, leading to Aaruua (perhaps ‘Arrînèh, near Jezreel), whence he entered a “valley,” and invested Megiddo on N., and on the side of the “southern mountain.” The enemy fled into the fortress, which was finally taken, and great spoils captured. About a cent. and a half later an Egyptian traveller (see Brugsch, Hist. Egl. ii. p. 106) crossed Lower Galilee to the Jordan between Bethuon and Rehobû (Tell er Rehāb, near Beisân), and recorded, “lord of Jordan” and the “passage” opposite Makitha or Megiddo. This—like the notice of Megiddo with Beth-shean (1K.4.12)—suggests that the “valley” of Megiddo was near the Jordan, and that the “passage” was the broad vale leading W. to Jezreel. If so, the “waters” of Megiddo and the “ruin of Mujjēddā, which lies 3 miles S.W. of Beisan, with a mountain to its S., where the valley of Jezreel enters the Jordan Valley. It commands the high-road to Damascus, and that down the Jordan Valley, which reaches Jerusalem by the Jericho road—a route followed by Pompey and Vespasian. Thus king Josiah, marching N. up the valley, would be on the flank of the Egyptian advance; and Ahaziah, flying to Megiddo, would thence be carried to Jerusalem down the valley. The name Mujjēddā (the cut-off place) is the only one known in this region recalling Megiddo (the place of cutting). [C.R.C.]

Megiddo, Valley of, the extended form of Megiddo (Zech.12.11 only). Mehetabel' (Mehetabel, R.V.), ancestor of Shemaitah, 15 (Ne.6.10).

Mehetabel’, daughter of Matred, and wife of Hadad, or Hadar, the eighth and last-mentioned king of Edom (Gen.38.39; 1Chr.1.50).

Mehida’, a family of Nethinim who returned from Babylon with Zerubbabel (Ezr.2:52; Ne.7.54).

Mehir’, son of Chelub, 1 (1Chr.4.11).

Meholahthe, The, a word occurring once only (1Sam.18.19). It no doubt denotes that Adriel belonged to a place called Meholah, but whether that was Abel-meholah, afterwards the native place of Elisha, is uncertain.

Mehuajel’, son of Irad, and fourth in descent from Cain (Gen.4.18).

Mehuman’, one of the seven eunuchs (A.V. chamberlains) of Ahasuerus (Esth.1.10).

Mejunim’, or Meunim’ (plur. forms). According to 2Chr.26.7, Uzziah, king of Judah, gained victories over the Philistines, Arabsians of Gubba, and the Meunim. These are apparently the same as the Mæonites, who are mentioned with the Zinjirjes and Amalécitos among the oppressors of Israel (Judg.10.12), though the LXX reads Midian and the Vulg. Canaan. In 1Chr.4.41 the word rendered in A.V. by “habitations” should probably be “Meunim,” according to the qərî reading in the Massoretic text in the LXX. The verse refers to a road by the Simeonites on the people of Ham and the Meunim. In 2Chr.20:3 the LXX, possibly correctly, reads “Meunim” for “Ammonites.” In the lists of those who returned from captivity the Meunim are reckoned among the Nethinim or temple-servants (Ezr.2.50; Ne.7.52). The LXX renders “Meunim” in all three passages of Chronicles by Mœon, and in Job 21:11 “Zephor the Namaithite,” the third friend of the patriarch, is called Σωφαὸς τοῦ Μειναίου Βαζαλην, evidently an attempt to connect this people with the Minean Arabs, who were well known to the ancient geographers. Probably, however, the Meunim (or Maonites) were an Edomite clan. [Mœon.]

F.R.F.-J.

Me-jarkon’ (water of greenness, Jos.19.46), mentioned with Rakkon (Raqqâ) and Jarju (Yâjû) as in the lot of Dan. Probably the ‘Aygelj stream, flowing from Antipatris to the sea, is meant. It is remarkable for the
green turf by its head springs; and there are bushes and caves along its course. [C.R.C.]

Mekonah, a city of the tribe of Judah (Nu.11:28). Jerome (Onomasticon) notices Machamim as 8 Roman miles from Eleutheropolis. This is possibly el Megenn'a, a ruin 12 miles N.W. of Beit Jibrin. The modern name means "veiled one," but may be a corruption of Mekonah. [C.R.C.]

Melatiah', a Gibeonite, who assisted in rebuilding the wall of Jerusalem (Ne.3:7).

Melch. — 1. (Son of Jannia (Lu.3:24), and — 2. Son of Addi (3:28), both ancestors of Joseph in the genealogy of Christ.

Melchiah. [Melchjah, 1.]

Melchiel', father of Charmis (1Th.6:15).

Melchisedecc, the form of Melchizedek in A.V. of N.T. (Heb.5:6,7).

Melchi-shu'a (1Sam.14:49,31:2). Correctly Melchisedek.

Melchizedek, king of Salem and priest of the Most High God, met Abram in the valley of Shaveh (the king's dale), brought out bread and wine, blessed Abram, and received tithes from him (Gen.14:18-20). In Ps.110:4 the Messiah is described as a priest for ever, "after the order of Melchizedek," and in Heb.5:6,7, these two passages of O.T. are quoted, and the typical relation of Melchizedek to our Lord is stated at great length. There is something surprising and mysterious in the first appearance of Melchizedek, and in the subsequent reference to him. Bearing a title ("king of righteousness") which Jews in after ages would recognize as designating their own sovereign, bearing gifts which recall to Christians the Lord's Supper, this Canaanite crosses for a moment the path of Abram, and is hesitatingly recognized as a person of higher spiritual rank than the friend of God. The fact that he was not acquainted with the plan of salvation has produced a superstitious awe. A Jewish tradition pronounces Melchizedek to be a survivor of the Deluge—the patriarch Shem. Equally old, perhaps, but less widely diffused, is the supposition, not unknown to Augustine, and ascribed by Jerome to Origen and Didymus, that Melchizedek was an angel. The Fathers of the 4th and 5th cents., record with reprobation the tenet of the Melchizedekians that he was a Power, Virtue, or Influence of God, and the not less daring conjecture of Ieracius and his followers that Melchizedek was the Holy Ghost. Epiphanius mentions the erroneous opinion of some Christians that Melchizedek was the Son of God appearing in human form. Similar to this was a Jewish opinion that he was the Messiah. The context in Gen. would lead to the inference that Melchizedek was of one blood with the children of Shem, among whom he lived, chief (like the king of Sodom) of a settled Canaanitish tribe. As Balaam was a prophet, so Melchizedek was a priest, among the corrupted heathen, not self-appointed, but constituted by a special gift from God, and recognized as such by him. The "order of Melchizedek," in Ps.110:4, means likeness in official dignity as king and priest. The relation between Melchizedek and Christ as type and antitype is: (1) that each was a priest, (2) not of the Levitical tribe; (3) whose beginning and end are unknown; (4) who is not only a priest, but also a king of righteousness and peace (Heb.5:6,7). [Hebews, Ep.10.] Salem may have occupied in Abraham's time the ground on which afterwards Jerusalem stood; and Shaveh was possibly the Kidron Valley E. of Jerusalem. Jerome, Ep. Lxxiii. ad Evangelium; Aquinas, 3 Summa, xxii, §6; Turretinus, Theologia, ii. pp. 443-453; Mozley, Lectures on O.T., pp. 20, 21; and for a parallel story from the monuments as evidence to his historical character, see Sayce, Higher Crit. and Mon. ch. iv. [C.R.D.B.]

Melcan, son of Menan, and ancestor of Joseph in the genealogy of our Lord (Lu.3:31).

Mel'ch, second son of Micah son of Merib-baal, or Mephibosheth (1Chr.8:35,9.41).

Mel'icu (Ne.12:14) = MALLUCH, 6.

Melita, the modern Malta. This island is noted in Scripture as the scene of that shipwreck which Paul and his company narrowly escaped in their voyage from Puteoli to Rome (Ac.27:7). As the Malta was infallibly safe, and every practised sailor would allow) that the ship's direction of drift would be about W. by N., and the rate of drift about a mile and a half an hour, we come to the conclusion, by measuring the distance on the chart, that she would be brought to the coast of Malta on the 14th day (see ver. 27). (3) A ship drifting in this direction to the place traditionally known as St. Paul's Bay would come there without previously touching any other part of the island, since the coast trends from this bay to the S.E., as may be seen in any chart of Malta. (4) On Koura Point, which is on the S.E. coast of Malta, the supposed shipwrecked ship is said to have been breakers when the N.E. wind was blowing. Now the alarm was certainly caused by breakers, for it took place in the night (ver. 27), and it does not appear that the passengers were at first aware of the danger which the quick ear of the "sailors" recognized. (5) Yet the vessel did not strike: this corresponds with the position of the point, which would be some little distance on the port side, or to the left, of the vessel. (6) Off this point of the coast the soundings are 20 fathoms (ver. 28), and a little farther, in the direction of the supposed drift, they are 15 fathoms (ib.). (7) Though the danger was imminent, we find from examining the chart that there would still be time to anchor (ver. 29) before striking on the rocks ahead. (8) With bad holding ground there would have been great risk of the ship dragging her anchors. The bottom of St. Paul's Bay is remarkably tenacious. (9) The other geological characteristics of the place are in harmony with the narrative, which describes the creek as having in one place a sandy or muddy beach (ver. 39), and which states that the bow of the ship was held fast in the shore, while the stern was exposed to the action of the waves (ver. 41). (10) Another
MELONS

point of local detail is of considerable interest—viz. that as the ship took the ground, the place was observed to be διβαλεσσός, i.e. a connexion was noticed between two currents. We see from the chart that this is the case. [SEA.] (11) Malta is in the track of ships between Alexandria and Puteoli, an Alexandrian vessel which ultimately conveyed St. Paul to Italy, had wintered in the island (28.11). (12) Finally, the course pursued in this conclusion of the voyage, first to Syracuse, and then to Rhegium, confirms our theory. The exact order of the events by which we prove that Melita is Malta. The question has been set at rest for ever for Mr. Smith of Jordan Hill, in his Voyage and Shipwreck of St. Paul, the first published work in which it was thoroughly investigated from a sailor's point of view. The illness of Paul when St. Louis was taken was a dependency of the Roman province of Sicily. Its chief officer (under the governor of Sicily) appears from inscriptions to have had the title of ἄρτος Μελταίων, or Primus Melitensis, and this is the very phrase which St. Luke uses (Ac.28.7). Malta, from its position in the Mediterranean, and the excellence of its harbours, has always been of importance both in commerce and war. It was a settlement of the Phoenicians at an early period, and their language, in a corrupted form, continued to be spoken there in St. Paul's day.

Melons (Num.11.5 only). The Heb. bə'əšîm probably represents both the melon (Cucumis melo) and the watermelon (Cucurbita citrullus); the Arab. noun bəfšikhah is identical with the Heb. The water-melon is by some considered to be indigenous to India, whence it may have been very early introduced into Egypt. The common melon (Cucumis melo) is cultivated in the same places and at the same time as the watermelon. The water-melon, now extensively cultivated in all hot countries, is not unlike the common melon, but the leaves are deeply lobed and gashed, the flesh is pink or white, and contains a large quantity of cold watery juice without much flavour; the seeds are black. [The reading in the Geneva version of the melon is punpkins.] Pliny says of cucumbers: "Now when they exceed in greatness, they be called Pepones, i.e. Melons or Pompoms... with meats they are not unwholesome: and yet for the most part swim they will aloft, and ride upon a man's stomach" (Holland's trans.). [H.C.R.] Men of Mark (Matt.11.16; Rev.5.11). The word παντοθέν, "steward," R.V.]. Not a proper name, as in A.V., but probably the Assyrian word māṣārā (māṣārā, māṣārā), "a guardian," "warden," māṣārā, "to guard": cf. mēnāz in Na.3.17. (The latter form retains the root of the verb, which in mēlsār is softened to l, and in Assyri- is assimilated to the following.) In Assyri- we find māṣār sibītī, "guardian of the prison," ga'olā; māṣār bāšīt, "guardian of the gate," etc., in frequent use. But see SEMITIC LANGUAGES.

Mem'ius, Quintus (2 Mac.11.34). [Manlius, T.]

MEMPHIS

is a city of ancient Egypt on the W. bank of the Nile, mentioned by Isaiah (19.13), Jeremiah (2.16,46,14,19), Ezekiel (30.13,16) under the name of Noph and by Hosea (9.6) under the name of Moph; but the LXX. everywhere reads Ἡμεφίς. It has various names in old Egyptian, one being Mennesert, "the good resting-place," of which the first syllable Mēn is the name of Men or Menes, said by the Greeks to be the founder of the city. Memphis was situate near the head of the Delta, not very far from the present city of Cairo. Its ruins are marked by the mounds in the villages of Bedreshein and Mitrahinē, which show them to be of an extreme antiquity and considerable; according to Diodorus, the circuit of the city was 150 stadia. Herodotus says that Menes, the first king of Egypt, built Memphis on land which he reclaimed from the river. The Nile flowed, before his time, along the Libyan Desert. He banked it up, and dug a new course for the river. In the new city he erected a temple to Hephaistos, identified by the Greeks with Phtah. Thus Memphis would be one of the oldest cities of Egypt. Linant Pasha thinks that he discovered Menes's work in the embankment at Kosheishe, about 35 miles above the site of modern Cairo. The ground of Memphis was Phtah; and even when Memphis could not be called the capital, its temple was one of the great sanctuaries of the country together with Thebes and Heliopolis. The triad of Memphis was Phtah, Sekhit (a lion-headed goddess), and Nefertum, or sometimes Imhotep. Phtah has generally a human appearance, a mummy-shaped body, and a head-dress, and he holds a sceptre. He is often styled the lord of truth or justice. Nothing remains of his temple, except a few statues. A colossus of Ramses II., now prostrate, probably stood in the dromos. Memphis was also the residence of Apis, one of the two sacred bulls, the other one, Mevis, being at Heliopolis. The cemetery of the Apis (the Sera- peum) has been discovered by Mariette. It is at Saqqarah in the desert, a short distance from Memphis. It consists of subterranean galleries, on which open the niches containing the enormous sarcophagi of the sacred animals. The name, of which the Arabic form is Jumah, is ultimately the Greek name "the white wall"; it was also the name of the citadel. The Greeks translated it λευκῶν τεῖχος. This fortress was often occupied by foreign garrisons, e.g. the Persians. Memphis was the most important city of the kingdom under the great dynasties of the old empire, the 4th, the 5th, and the 6th, as we can see from the extent of the necropolis. The whole region now called Abu Roash, Ghizeh, Saqqarah, and even farther S. is the cemetery of Memphis and Heliopolis, but chiefly of the former. Under the Memphite kings there was a remarkable development of civilization, and art reached a perfection not afterwards surpassed. This was the time when the king and queen, in pyramids these huge buildings being erected for that purpose. Under the great dynasties of the new empire (the 8th to the 20th), Memphis was superseded by Thebes, but it was still an important city. With the decay of Thebes and the passing of political power to the Delta, it again increased in importance, and for this reason Memphis is often mentioned by
the prophets when they threaten Egypt with impending calamities. Later still, during the wars against the Persians, the political life of the country centred in Lower Egypt, and the fate of the kingdom depended on that of Memphis—for instance, when Cambyses conquered the city in 525 B.C. Memphis was the last place of refuge for Nectanebo II, when Artaxerxes Ochus invaded the land. Nectanebo dared not face the Persian army, but gathered his treasures and fled to Ethiopia. This was the end of the Egyptian monarchy. Ochus entered the city and pillaged it, and Egypt became a Persian satrapy (350 B.C.). There are Roman imperial coins of the nome of Memphis, which show the goddess Isis standing, and the Apis bull. We do not know exactly when Memphis ceased to exist; but the foundation of Fostât (old Cairo) by the Caliph al-Mahdi (683 A.D.) on the opposite bank of the river certainly contributed to its destruction. The materials of the old city were used for the building of Cairo.)

Memucan, one of the seven princes of Persia in the reign of Ahasuerus, who "saw the king's face," and sat first in the kingdom (Esth. 1:13-22). They were "wise men who knew the times" (skilled in the planets, according to Aben Ezra), and appear to have formed a council of state. Belshazzar says that one of their duties was to interpret the laws (11 Ant. vi. 1).

Menahem, son of Gadi, slew the usurper Shallum and seized the throne of Israel, 759 B.C., and reigned ten years (2 K. 15:14-22). From ver. 14 it has been inferred that Menahem was a general under Zechariah stationed at Tirzah, and that he brought up his troops to Samaria and avenged the murder of his master by Shallum. He maintained the cult-worship of Jeroboam. The contemporary prophets, Hosea and Amos, have left a melancholy picture of the ungodliness, demoralization, and feebleness of Israel. In the brief history of Menahem, his glorious treatment of Tiphah occupies a conspicuous place. The time of the occurrence and the site of the town are matters of uncertainty. During Menahem's reign the Assyrians invaded Israel for the first time under Pul (identified with Tighlath-pileser III. or Pul II of the Hebrews, Dn. 11:11; 2 K. 16:7), and the Jews were forced to pay tribute. In 753 B.C. they rebelled against their conquerors and succeeded in driving them away, but instead of converting from an enemy into an ally by a gift of 10,000 talents of silver

Mena'n, son of Mattathah, and ancestor of Joseph in the genealogy of Christ (Lu. 3:31).

Mene, mene, tekel upharsin. These words (Dan. 5:25-28) were written on the wall of Belshazzar's palace, apparently in Aramaic, letters. The Aramaic language was extensively used then, and even previously, as the commercial tongue of Western Asia, and there could be no difficulty in translating these very ordinary Aramaic words, m'ne m'ne tygl upharsin, especially as the change of only two consonants (r into ṣ and the omission of the final ָו) would render every word Assyrian. Their meaning, however, was enough to cause terror to Belshazzar, besieged in the citadel of Babylon by the Persians: it is, "Numbered, numbered, weighed," * or interpreting tygl for tygℓ. Vowel points were not then invented, nor were the weak letters used instead.

and divisions" (or, "they are dividing," if we read ʾaphārsin). In Assyry, the verb manu, "to number, to allot," often means "to hand over," especially to destruction; and parāsū in Assyry. means not only "to divide" but also "to scatter," e.g. to the four winds, "to break in pieces." In both Assyry, and Aram. the final word would mean both divisions and Persians, so that paranomasia was hardly needed to make the miraculously written words seem ominous under the circumstances. The LXX., Vulg., and Theodotion wrongly omit one mene. prēs is the Aram. singular of parāsin, which becomes parāsin when the a ("and") is prefixed. Contrary views are expressed by Sayce, who renders, "Reckon a maneh, a shekel and (its) parts" (from Clermont-Ganneau: Sayce's Higher Criticism and the Monuments, p. 530); and by Kamphausen, "There has been counted a maneh, a shekel and half-manacs" (Book of Daniel in Hebrew, Polytech. 1873, p. 335). Menela'us, according to Josephus (12 Ant. v. 1), was a younger brother of Jason and Onias, and, like Jason, changed his name Onias for a Gk. one. More probably he was a brother of Simon the Benjamite (2 Mac. 4:23). In this case he was not of priestly descent. He bought, therefore, purchased the high-priesthood from Antiochus Epiphanes (171 B.C.), outbidding Jason (4:21). Difficulties arising as to the payment of the bribe, he was summoned to Antioch, where, in the king's absence, he persuaded Andronicus, the governor, to murder Onias (4:27-36); and on the king's return he bribed Polemion to secure from Epiphanes his own appointment and the punishment of his accusers (4:30-50). While Epiphanes was away in Egypt (170 B.C.), Jason, to regain the high-priesthood, fell upon Jerusalem and drove Menelaus into the citadel. Epiphanes promptly returned, and plundered both city and temple, the latter with the help of Menelaus, who thus regained his position (5:5-16, 23-26). Nothing more is heard of him until he fell into disfavour with Antiochus V. (162 B.C.), who executed him at Beroea in a manner deserved by his sacrilege (13:3-8). (c.d.)

Mene'pheus, father of Apollonius, 3 (Mac. 3:41).

Men'i. The last clause of Is. 65:11 is rendered in A.V. "and that furnish the drink-offering unto that number," with the marginal reading for the last word "Meni." The R.V. has "destiny," indicating that the word so rendered is the name of an object of idolatrous worship by the Jews at Babylon. Meni has been regarded as the Moon-god or goddess (Deus Lunus or Dea Luna), masculine as the illuminator of the earth, feminine as the one who receives light from the sun. Kashi, Abanel, and others understood it by the "number" of the priests who formed the company of revellers at the feast. Kimchi says of Meni that "it is a star, and some interpret of it the stars which are numbered," i.e. the planets. Gesenius connected the word with mānāh in the sense of assigning or distributing, to which he refers Mānāh, one of the three idols worshiped by the Jews before the time of Mohammed (Kosin. Sura 53: "What think ye of Allat, and Al-Uzzah, and Mānāh, that other
third goddess? "). Mavi was adored by the tribes of Judah and Edom, and the idol was considered divine. It was usually kept by a man named Sa'ad. Men would therefore be the personification of fate or destiny—possibly, as Gesenius thought, identified with the planet Venus, known to Arab astrologers as the lesser good fortune (the planet Jupiter—identified by Jewish tradition with Gaad—being the greater). Lewormant has identified Meni with a deity, seemingly masculine, named Manu Rabâ, possibly meaning the great good fortune, who was worshipped in the temple of Urâš at Ašur, the capital of Assyria. [T.G.P.]

Melonem', Plain of, "the plain (otherwise "oak," or "tree") of enchanters," near Shechem (Judg.9.37). [PILLAR, PLAIN OF.]

Meonothai', son of Othniel, and founder of Ophrah (1Chr.4.14; cf. marg. and Vulg.).

Mephaath (beauty), a city of the Reubenites (Jos.13.18), lying in the Mishor (cf. 17, and Je.48.21, A.V. plain), or plateau of Moab. It was allotted to the Merarite Levites (Jos.21.47; 1Chr.6.79), to have not the same site as Heshbon, but the site is unknown. [C.R.C.]

Mephibosheth.—1. One of the sons of Saul by Rizpah, surrendered by David to the Gibeonites, and by them put to death, to avert a famine from which the country was suffering.—2. The son of Jonathan, grandson of Saul, and nephew of the prophet. His original name, Merib-baal, is preserved in 1Ch.3.34.9.40. (1) His life seems to have been, from beginning to end, one of trial and discomfort. How, at 5 years of age, he became permanently lame, owing to a fall in the hurried flight of his nurse on the news of Saul's defeat at Gilboa, is related in 2Sam.4.4. (2) After this accident, Mephibosheth was carried with the rest of his family beyond Jordan to the mountains of Gilead, where he found a refuge in the house of Machir at Lo-debar, not far from Mahanaim, which during the reign of his uncle Ishboseth was the headquarters of his family. By Machir was this house cajoled, and was living there when David, having completed the subjugation of the adversaries of Israel on every side, had leisure to turn his attention to other matters. So completely had the family of the late king vanished from the W. side of Jordan, that the only person to be met with in any way related to them was one Ziba, from whom David learnt of the existence of Mephibosheth. Royal messengers were sent to the house of Machir at Lo-debar, and by them the prince and his infant son Michâ were brought to Jerusalem. The interview with David was marked by extreme kindness on the part of the king, and on that of Mephibosheth by characteristic fear and humility. David restored all the property of his grandfather to him, with the whole family and establishment of Ziba as his slaves. He himself was to be a daily guest at David's table, and henceforward resided at Jerusalem. (3) An interval of about seventeen years brings us to the crisis of David's life. Of Mephibosheth's bearing on this occasion we possess his own account (2 Sam.19.24-30) and that of Ziba (16.1-4). They are naturally at variance. Ziba tells his story first, and is given the possessions of his master, thus once more reinstating him in the position he had lost on Mephibosheth's arrival in Judah. Mephibosheth's story, told several days later, when he met David returning to his kingdom at the W. bank of Jordan, is very different. David evidently believed it, and revoked his previous judgment, but allowed Ziba to retain half the lands of Mephibosheth. "Shall then any man be put to death this day?" is the key-note of the whole proceeding. A different view of Mephibosheth's conduct was maintained with much ingenuity by Prof. Blunt in his Undesigned Coincidences. But Mephibosheth could have had nothing to hope for from the revolution. Ziba, on the other hand, had everything to gain and nothing to lose by a change of affairs. The absence of the name of Mephibosheth from the dying words of David is the main occasion of Dr. Blunt's stricures; but it is natural to suppose that, in the interval of eight years between David's return to Jerusalem and his death, Mephibosheth's painful life came to an end—possibly he did not long survive the anxieties and annoyances consequent upon the overthrow of his dynasty. Merab', the elder daughter of Saul (1Sam.14.49). She first appears after the victory over Goliath, when David had become an inamie in Saul's house (1Sam.18.2) and a friend of Jonathan. In accordance with his promise (17.25), Saul betrothed Merab to David (18.17). David hesitated, and when the time before the marriage Merab's younger sister Michal had passed, Saul attached for Merab, and Merab was then married to Adriel the Meholathite (18.18,19), to whom she bore five sons (2Sam.21.8, see R.V. marg.). In the A.V. of the last passage "Michal" is clearly a transcriber's mistake for "Merab."

Meraioth', the representative, in the days of Joiakim, of the priestly family of Seraiah (Ne.12.12).

Meraioth'.—1. A descendant of Eleazar the son of Aaron, and head of a priestly house (1Chr.6.6,7,52; Ezr.7.3), perhaps the immediate predecessor of Eli in the office of high-priest. It is apparently another Meraioth who comes between Azariah and Ahitub in the roll of the Levites of Azariah (1 Chr.9.11; Ne.11.11), unless the names Ahitub and Meraioth are transposed.—2. The head of a priestly house represented in the time of Joiakim by Helkai (Ne.12.15).

Meran (Baal.23). The "merchants of Meran" are here associated with "Themam" and "the Agarenes." (Hagarenes.) Meran is a mistake for Midian or Dedan (cf. Ezk.25.13). Teman was in or near Edom, as was Dedan; while Midian's territory stretched along the E. shore of the gulf of "Aqaba, its N. boundary touching upon Edom" (Sayce, Higher Crit. and the Mon.).

Meren.1. Youngest of the three sons of Levi. He was born in Canaan, and went down with Jacob into Egypt (Gen.46.11). He had two sons, Mahli and Mushli (Ex.6.19). The "sons of Meren," as a branch of the Levites, are frequently mentioned in the priestly writings. The least numerous of the three, they had charge of the more solid parts of the tabernacle—the boards, pins, cords, etc. (Num.3.36.4.31-33), while the sons of Gershon carried the tent itself with its hangings, and the Kohathites bore the sacred vessels and furniture. They encamped on the N. side of the taber-
nacle, and on the march they followed, along with the Gershonites, the camp of Judah, and preceded that of Reuben, thus reaching the camping-ground and having the tabernacle erected before the ark of the sanctuary, which followed Reuben (10.17,21). At the division of the land, twelve cities were assigned to them (Jos.21.7). They were mentioned in the time of David as assisting in the bringing up of the ark (1 Chr.15.6), and in the time of Hezekiah as associated with other Levites in the sacred business of the temple (2 Chr.29.12). At Ezra's return, although he had difficulty in inducing many Levites to accompany him, the Merarite branch is represented (Ezra.8.18,19).—

2. Father of Judah (Jth.8.1,16.7).—

Merathaim, Land of, i.e. "of double rebellion" (Gesenius, Thes. S.19a, etc.), alluding to the Chaldeans, and the double captivity which they had inflicted on Israel (Je.1.12,13).

Mercurius (in Gk. Hermes), the herald and interpreter of the gods, inventor of music, letters, and arts. When SS. Paul and Barnabas were at Lystra, the people, having in mind the folklore legend which Ovid (Metam. viii.480) says was preserved by Baus and Philomen, and which represented the gods as assuming the likeness of men in order to mingle with them, called Barnabas Zeus, and Paul Hermes (Ac.14.11,12), "because he was the chief speaker." Hermes was the son of Zeus and Maia, the daughter of Atlas, and was the latter's son's son. He went on visits to the earth. Hence the curious scene at Lystra. [Jupiter; Lycaonia.] [A.R.]

Mercy-seat (kappōrēth). The root from which this word comes means "to cover over," though scholars differ as to whether the "covering over" refers to the face of God or to the sin committed. The kappōrēth (properly speaking, "propitiatory"), was the place where the act of "covering over" was accomplished; it has nothing to do—as the use of the root so clearly shows—with any covering, in the sense of a "lid," to the Ark. It was a golden slab, 2 1/2 cubits long and 1 1/2 broad (its breadth was the same as the width of the Ark); at each end of the slab, and forming part of the whole, was a cherub—a fact which betrays Babylonian influence—each made of beaten gold; their wings, which were spread out upwards, met over the "mercy-seat," and their faces were bowed down towards it. On the Day of Atonement the high-priest entered the holy of holies, in which the "mercy-seat" stood, and after burning incense in great profusion before it, sprinkled upon it and before it, seven times, the blood of the sin-offering, whereby atonement (i.e. the "covering over") was accomplished. It was believed that upon the "mercy-seat," the throne of Jehovah, God in actual presence appeared. Its great holiness, on this account, is evidenced by the fact that the temple proper (i.e. the sanctuary) was called after it "the house of the mercy-seat" (Hchukkōrēth). See also the whole subject in Ex.25.29-31,32,33,34,30.6,37.6-9; Lev.16.2-15; Num.7.89; 1 Chr.6.9. [W.O.F.O.]

Mered. A Judahite mentioned in a fragmentary genealogy in 1 Chr.4.17,18. [Bithiah; Pharaoh.]
Sennacherib, and defeated at Kîš, Bēl-īna (Belbus) being placed on the throne. The Chaldean king then advanced to Tell Mawâqir, the Chaldean city on the Persian Gulf. This city was attacked by Sennacherib in 695 B.C., but Merodach-baladan's fate is unknown. [T.G.P.]

Merom, Waters of (Jos.11.7). These are usually identified with the Hulē Lake, but without any good reason. Joshua was fighting a large body of Canaanite kings who were the king of Hazor. Josephus supposed Hazor to be above the lake Semechonitis, which is the Hulē (5 Ant. v. 1, 3 Wars x. 7, 4 Wars i. 1); but of Joshua's battle he only says that it was fought at a place called Beroth, not far from Kadesh in Upper Galilee (5 Ant. i. 18). Beroth in the case of the Hulē is near the plains. The term for the Hulē in Heb. would be yām (sea), and not māyām (waters), usually applied to streams. The kings who fought at the waters of Merom were kings of Madon, Shimron, Achshaph, Chinneroth, Dor, and Hazor, all places in Lower Galilee and the plain of the Sea, and to the city of Hazor was the most favorable route (vv. 8, 10). It is very unlikely that a chariot force (ver. 6) could have been assembled near the Hulē Lake, which is flanked by steep mountains; and the swamps would have made their evolutions impossible. The LXX. reads Ma-pôw (Marōn), and the site might possibly be near Shimron-Meron (Səmûnîyê); in which case the "waters of Merom" would be the perennial stream of Wādy el Melekh, which passes W. from the Ba'ttafr Plain to join the Kishon. This stream runs 3 miles N. of Semûnîyê, and the flat open valley is the easiest approach to the plain S. of Hazor (Hass Şur), where chariots could be used easily. [C.R.C.]

Meronothite (Mēronoth'ītec). i.e. native of a place probably called Meronoth, perhaps Mârrinâ, a ruin 7 miles S.W. of Bethlehem. Two Meronothites are named in the Bible:—1. Jērēde'ah, who had charge of the asses of David (1 Chr. 27.30); and—2. Jâ'don, also described as a man of Gibon, who assisted in repairing the breaches of Jerusalem (2 Chr. 8.14). [C.R.C.]

Meroz (refuge), a place mentioned only in the Song of Deborah (Judg. 5.23), and there denounced because its inhabitants had refused to take any part in the struggle with Sisera. Meroz must have been in the neighbourhood of the Kishon, but its real position is not known; possibly it was destroyed in obedience to the curse. No modern name representing correctly the Heb. word is known. [C.R.C.]

Mē'ruth (Ezsd. 5.24), a corruption of Im'em-r, 1.

Mes'ech, Mes'shech, a son of Japheth (Gen.10.2; 1 Chr.1.4), and the progenitor of a race noticed in Scripture in connexion with Tubal, Magog, and other northern nations. They appear as allies of Gog (Ezk.38.2,3,39.1), and as supplying the Tyrians with copper and slaves (Ezk.27.13); in Ps.120.5 Mēsech is mentioned with Kēdar. Both the name and the associations favour the identification of Meshech with the Moschē; the form of the name adopted by the LXX. and the Vulg. approaches most nearly to the classical designation. The position of the Moschē in the age of Ezekiel was probably that described by Herodotus (iii. 94), viz. in Armenia, where a mountain chain connecting Antitaurus with Caucasus was named after them the Moschitci Montes, and where was also a district named by Strabo (17.47-49). Meshech was, as seems indicated in the verse, the W. limit of the Joktanites, it must be sought in Yemen. The seaport called Mēšēra or Mō'yā, mentioned by Ptolemy, Pliny, Arrian, and others, perhaps presents the most probable site. It was a town of note in classical times, but has since fallen into decay, if the modern Mousa be the same place. Gesenius, from the latitude given by Ptolemy (vi. 7), places Mesha at Mau'shid on the W. coast of Yemen. [C.R.C.]

Meshech', the Babylonian name given to Michael, one of the companions of Daniel (1-3). It probably means, "Who is as Aku [i.e. the moon-god]?" [H.A.R.]

Meshech. [MESHECH.]

Meshelemiah', a Korhite, "son of Kor", of the sons of Asaph, who with his 7 sons and his brethren, "sons of might", were gatekeepers of the house of Jehovah in David's reign (1 Chr. 21.28, 25.1, 2, 9). [MESHELLAM, 20; SHALLUM, 40.]

Meshezabeel'.—1. Ancestor of Mes'hullam, 13 (Ne. 3.4).—2. One of the "heads of the people," probably a family, who sealed the covenant (10.21).—3. Father of Pethahiah, and descendant of Zerah, son of Judah (11.24).
MESSENGER

I. The son of Immer, a priest (1 Chr.9.12), called in Ne.11.13 Meshillemith.

II. An Ephraimite, ancestor of Berekiah (2 Chr.26.3).—2. (Ne.11.13) Meshillemith.

MESSIAH

I. An ancestor of Shephan the scribe (2 K.22.3).—2. The son of Zerubbabel (1 Chr.3.19).—A. A Gadite who dwelt in Bashan in the reign of Jotham, king of Judah (5.13).—4. 5. 6. Three Benjamites (8.17, 9.7, 5).—7. The father of Hilkiah the high-priest (1 Chr.6.11); called Shallum in 1 Chr.6.13.—8. A priest, son of Meshillemith (1 Chr.9.12; cf. Ne.11.13).—9. A Kohathite in the reign of Josiah (2 Chr.34.12).—10. One of the "heads" (A.V. chief men) sent by Ezra to Iddo "the head," to gather together the Levites to join the caravan about to return to Jerusalem (Ezr.8.16).—11. A Levite in the time of Ezra who assisted Jonathan and Jaha- ziah in annealing the marriages with foreign wives (10.15).—12. A descendant of Bani who had returned from Babylon (12.13).—13. A son of Berechiah, who assisted in rebuilding the wall of Jerusalem (Ne.3.4), as well as the temple wall, adjoining which he had his "chamber" (3.30). His daughter was married to Jehohan, son of Teabhath the Ammonite (6.18).—14. Son of Besediah: he assisted Jehoai- sbod, son of Zechariah, in the same day in the wall of Jeru- salem (5.6).—15. One of those who stood at the left hand of Ezra when he read the law to the people (8.4).—16. A priest (10.7), and—17. One of the heads of the people who sealed the covenant (10.20).—18. A priest in the days of Jeiakim, son of Jeshua, and representative of the house of Ezra (12.13).—19. Another priest at the same time as 18, and head of the family of Gimneth (12.16).—20. A family of porters, descendants of Meshullam (12.25), who is also called Messillemiah (1 Chr.26.1), Shellemiah (26.14), and Shallum (Ne.7.15).—21. One of the princes of Judah in a building of the dedication of the wall of Jerusalem (12.33).—22. Meshullemeth, daughter of Haruz of Jothbah, wife of Manasseh, king of Judah, and mother of his successor Amon (2 K.21.19).

METHOBA (R.V. Mezo'baite). The, a title which occurs only once, attached to the name Meshillemith (Ne.11.47).

MESOPOTAMIA, the ordinary Gk. rendering of the Heb. Armam-naharaim, or "Arab of the Two Rivers," so frequently mentioned in the earlier books of O.T. (Gen.24.10; Deut.23.3; Judg.3.19). It was properly the tract between the Tigris and the Euphrates, measuring about 700 miles in length, and from 20 to 200 in breadth, extending in a south-easterly direction from Turkestan (lat. 38° 23' long. 46° 18') to Qurumah (lat. 30°, long. 40° 30'). The Arabic geographers call it "the island," a name which is very appropriate, as only a few miles intervene between the sources of the Tigris and the Euphrates at Telch. The greater portion is a vast plain, but it is crossed in its upper part by the Sinjar hills, running nearly E. and W. from about Mosul to a point below Rakkekh; and in its northern portion it is even mountainous. The upper Tigris valley being separated from the Mesopotamian plain by an important group, which includes the Alexanian Mountains. Strabo. The N.W. district of the country between the great bend of the Tigris and the Upper Euphrates (lat. 35° to 37° 30')—is that most referred to in O.T. It consists of mountainous country, extending from Bisir to Jeshech on N., and the great undulating plain as far as the Sinjar Hills, and the river Khabur on S. From the N. side of the northern range short rivers flow into the Tigris, and on the S. side into the Euphrates, ultimately forming the Behik (ancient Belchis) and the Khabur (Habor or Chaboras). Besides Orfa and Harran, the chief cities of modern Mesopotamia are Mardin and Nisibin, S. of the Jebel-tur, and Diarbekr, N. of that range, on the Tigris. We first hear of Mesopotamia in O.T. as the country where Nahor and his family settled after leaving Ur of the Chaldees (Gen.24.10). Bethuel and Laban lived there, and thither Abraham sent his servant to fetch Isaac a wife "of his own kindred" (ver. 38). Thither, too, Jacob journeyed a century later, returning with his two wives after an absence of 21 years, and had frequent wanderings in the wilderness (Deut.23.4); and half a century later appears the seat of a powerful monarchy (Judg.3.8). Mesopotamia is the Nairi of the Assyrian inscriptions and the Naharina of the Amarna tablets; the non-Semitic Mitanni being a principal state, of which the Assurbanipal, born at the court of the Chal- shan-riashthain was king. The Nairi of the later Assyrian inscriptions seems to have been more N., near the sources of the two great rivers, and Assyria had settlements there, one of the places being Tubh'a, whose prince, Amme-ba'ala, paid tribute to Assur-nasir- apil, but was afterwards slain by his nobles (about 870 B.C.). Indeed, this king claims to have captured no less than 250 strongly fortified cities of "the lands of Nairi" during his expeditions. That some of the tribes or petty nationalities of Mesopotamia were very warlike may be gathered from the fact that the Ammonites, bordering on the Nairi, were descended from Mesopotamia, Syria-maachah, and Zobah, in their war against David (1 Chr.19.6). The amount of spoil taken from the inhabitants by the Assyrian kings testifies to the prosperity of the region. On the fall of the Assyrian empire, Mesopotamia seems to have been divided between the Medes and the Babyloniens. The conquests of Cyrus brought it wholly under the Persian yoke, and it remained thus until the time of Alexander. [T.G.P.]

MESSIAH. The expectation of the Messiah may be said to be the characteristic feature of Jewish belief, just as the advent of the Messiah is the characteristic feature of the Christian religion. Christianity is the religion of the Christ. But the name Christ, or Messiah, and its meaning, was created by the Jewish faith and experience. In O.T. the word is generally found united with Jehovah, and means "the Anointed of Jehovah." David gives the title to Saul in 1 Sam.16.10, where the Vulg. translates "he shall be called the Anointed Christus Domini est." The high-priest is also styled...
"the anointed" (Lev. 4:3); and in 1K.19:16 Elijah is directed to anoint Elisha prophet in his room. Anointing to an office in God's name implied a solemn dedication to it, and consequently a special gift of God's grace for the fulfilment of it. For the most part, however, by the Lord's anointed is meant the ruling king of the Jewish nation, who represented God to the nation and the nation to God. The personal relation of God to His people was regarded as embodied in a personal ruler. The consequence was that the ideals which were planted by revelation in the minds of the people of Israel were more and more expected to find their realization in a perfect king. Those ideals had been quickened by a peculiarly vivid experience. Great characters arose in the nation who, in spite of their imperfections, exhibited in singular force the great offices of life. Moses was an ideal lawgiver and deliverer; Joshua was an ideal leader and commander; David was a type of a judge. Similarly, as soon as the kingly office was called into existence, David arose, who, notwithstanding his great sin, nevertheless exhibited in the main the ideal character of a righteous king, in a form in which it fascinated the eyes of subsequent generations. It is remarkable that, as described in Ps. 72, its primary characteristic is not warlike success or power, but righteousness. "Give the king thy judgments, O God, and Thy righteousness unto the king's son," is the keynote. The experience of the nation had taught them also the necessity to their national well-being of a life being to declare and exponm to the laws of God, and of a Priest to make atonement for their violations of those laws. For each of these offices they needed an anointed person, and the three functions became gradually concentrated in one. In Ps. 110 the king is "a priest for ever after the order of Melchizedek." This conception also attached itself naturally to the typical national representative, the Messiah. So the conception arises, not artificially, by means of isolated and mysterious predictions, but naturally and unconsciously, through a living experience, of the realization of blessing, national and individual, under the rule and guidance of a perfect King, Priest, and Prophet. This is the view which, in our Lord's time, fills the mind of an inspired man like Zacharias: "He hath raised up an horn of salvation for us in the house of His servant David, ... that we, being delivered from the hand of our enemies, might serve the Lord in holiness and righteousness before Him." In this song of Zacharias a point is mentioned which became a fixed element in the Messianic hope. The horn of salvation was to be raised "in the house of His servant David." It was recorded from the time of David onwards that a promise had been made to him that his descendants should remain the royal house of the nation, however they might be for a time obscured. In David's seed the Jewish nation was to find its centre, and in time its ideal King. Now, it is characteristic of the Jewish nation that it lived on these promises, and it is characteristic of the Jewish literature that it was perpetually renewing and enforcing them. The attachment of the vision of perfect rule to the House of David gave to the promise a definite-ness by which it acquired an extraordinary solidity in the national mind. Other nations have had hopes of a great future, but none other has had its whole hope and vitality based on a specific promise, which enabled and compelled the people to look for and yearn after a definite deliverance, rule, and guidance by an individual king of an historic house. When the gospel of St. Matthew opens with the words, "The book of the generations of Jesus Christ, the son of David, the son of Abraham," it summed up the whole of Jewish history, and the prophecy was announced. The Messianic kingdom of the ancient prophets. But the manner in which prophetic revelation kept alive this hope is of the utmost importance to it. The history of the nation after the time of David is one continuous failure. The people fall away into idolatry and moral corruption, and are consequently left to the victims of internal dissension and external pressure. The visions which had been held before them of peace, righteousness, and prosperity are shattered; at length the nation is dispersed; to all human appearance there is an end to it. But throughout these disasters, amidst them, and after them, the prophets maintain the divine assurance of a reign of righteousness, justice, and peace, and generally of its realization under the rule of the House of David. Sometimes the predictions or promises are simply the establishment of a reign of righteousness under Jehovah HimselH; and this is the case even in prophets who at other times announce the fulfillment of all Jewish hopes. The Messianic hope in this double sense is the life of the prophetic messages. The divine rule and the Messianic rule are indissolubly associated, and the figure of the Messiah thus assumes more and more of divine attributes. The vision is, indeed, more or less dim. The inspired intimations given to the prophet combine with his own and the national experience to adumbrate a king, prophet, and priest who needs divine qualifications for his office; but the realization in the actual Incarnation itself is but dimly within his ken. The older interpretation of the Messianic prophecies was, therefore, right in substance so far as it saw in the prophetic utterances promises and hopes which could only be fully realized in an incarnate Son of God and Son of man. But it erred in over-straining the literal significance of particular passages and expressions. Each expression by itself may be capable of an interpretation short of the highest. But the whole strain of pro-
Messianic expectations of the Jews. [Messiah; Jesus Christ.]

Messianic, the Gk. form of Messiah (Jn.1.41). Metals. The Hebrews were acquainted with nearly all the metals known to modern metallurgy, whether as the products of their own soil or the results of intercourse with foreigners. One of the earliest geographical definitions is that which describes the country of Havilah as the land which abounded in gold, and the land of which was good (Gen.2.11,12). According to Genesis, the first artist in metals was Tubal-cain, the son of Lamech, the forger or sharpener of every instrument of copper (A.V. brass) and iron (4.22). "Abram was very rich in cattle, in silver, and in gold" (13.2); silver being the medium of commerce, while gold existed in the shape of ornaments, during the patriarchal ages. Tin is first mentioned among the spoils of the Midianites taken when Balaam was slain (Num.31.22), and lead is used to heighten the imagery of Moses' triumphal song (Ex.15.10). Whether the Hebrews knew of copper, brass, and steel, properly so called, is uncertain; the words so rendered in A.V. (2Sam.22.35; Job 20.24; Ps.18.43; Je.15.12) are in all other passages translated brass, and would be more correctly copper or bronze. Commentators believe the "northern iron" of Je.15.12 to have been iron hardened and tempered by some peculiar process, so as more nearly to correspond to what we call steel; and the "flaming chariots" of Nahum (see R.V.) and the flashing steel of the war-chariots which should come against Nineveh. The Hebrews must also have used the mixture of copper and tin known as bronze, and probably in all cases in which copper is mentioned as in any way manufactured, bronze is to be understood. Except iron, gold is the most widely diffused of all metals. Almost every country in the world has in its turn yielded a certain supply, but, though it was known at a very early period, and was procured with little difficulty, we have no indications of its occurrence in Palestine. The Hebrews obtained their principal supply from S. Arabia and the commerce of the Persian Gulf. It was probably brought in the form of ingots (Jos.7.21; A.V. wedge, lit. tongue), and was rapidly converted into articles of ornament and use. The great abundance of gold in early times is indicated by its entering into the composition of every conceivable article of value. Among the spoils of the Midianites taken by the Israelites when Balaam was slain were earrings and jewels to the amount of 16,750 shekels of gold (Num.31.48-54), equal to more than £30,000 of our present money, and 1,700 shekels of gold (worth more than £5,000) in the form of ingots, and taken per person of the Midianites as compensation for the slaughters of their army from the slaughtered Midianites (Judg.8.26); though these values must be halved if the Bab. "light" shkel be intended. The numbers, though large, are not incredibly great, when we consider that the country of the Midianites was then perhaps rich in gold-streams since exhausted, and that like the Malays of the present day, and the Peruvians of the time of Pizarro, the Midianites carried most of their wealth about them. But the amount of treasure accumulated by David from spoils taken in war is so enormous, that we are tempted to consider the numbers exaggerated. Though gold was thus common, silver appears to have been the ordinary medium of commerce. The first commercial transaction of which we possess the details was the purchase of Ephron's field by Abraham for 400 shekels of silver (Gen.23.16); slaves were bought with silver (17.12; E.V. money); silver was the money paid by Abimelech as a compensation to Abraham (20.16); Joseph was sold to the Ishmaelite merchants for 20 pieces of silver (37.28); and generally in O.T. the "money" of A.V. is literally silver. The first payment in gold is mentioned in 1Chr.21.25, where David buys the threshing-floor of Ornan, or Araunah, the Jebusite, for 600 shekels of gold by weight. But in the parallel narrative of the transaction in 2Sam.24.24 the price paid for the threshing-floor and oxen is 50 shekels of silver. With this one exception there is no mention in O.T. of gold as a measure of weight. The Hebrews may have been partly gold, but we have no proof of it. [Money; Weights, Coins.] Silver was brought into Palestine in the form of plates from Tarshish, with gold and ivory
METERUS.

"The sons of Meterus" returned with Zerubabel (Ezr.5.5,6; 6.17).

Mecheth-ammah', a place which David took from the Philistines (2Sam.5.21).

In the parallel passage 1 Chr.18.1: "Gath and her daughter-towns" is substituted for Mecheth-ha-ammah. In the R.V. Mechat-ha-ammah is taken as meaning "mother-city or "metropolis" (cf. 2Sam.20.19), and Mecheth-ha-ammah is "the bridle of the mother-city" — viz., of Gath, the chief town of the Philistines. With other points (ummah) the meaning would be "control of the people." The LXX. (Vat. MS.) renders the word ἀρχηγὸς πόλεως.

C.R.C.

Mehusaia', son of Mehujael, in the line of Caleb, father of Lachmi, 1 (Gen.4.18).

Methushelah', the longest-lived Eduluvian (Patriarchs); son of Enoch in the line of Seth, and father of Lamech, 2 (Gen.5.21ff).

Meunim'. (Mehunim.)

Mezahab', father of Matred and grandfather of Mehetabel, who was wife of Hadar or Hadad, the last-named king of Edom (Gen.36.33). From him the Edomites derived the name of their country, i.e. the inhabitants, who were called "waters of gold"; more probably "covered with gold."

Miamin.—1. A layman of the sons of Parosh, who put away his foreign wife (Ezr.10.25).—2. (Ne.12.5.) [Mijamin, 2.]

Milbhar'. "Milbhar the son of Haggeri" is the name of one of David's heroes (2Sam.11.38). The parallel passage in 2Sam.23.36 reads "of Zobah, Bani the Gadite," which is probably the true reading. See Driver, Text of Samuel, 284.

Mibsam'.—1. A son of Ishmael (Gen.25.13; 1Chr.1.29), not elsewhere mentioned.—2. A Sinonite (1Chr.4.57).

Mibzar', a phylarch or "duke" of Edom (Gen.36.42; 1Chr.1.53).

Miech'.—1. (Judg.17.18.) This story was included in Judges to prove how idolatry and lawlessness prevailed when there was no king (17.6,18.6). The story refers to the generation after Joshua. Critics postulate two documents with inconsistent facts, but they are not agreed as to the analysis or as to the inconsistencies. Micah lived in Mt. Ephraim. He stole 1.100 shekels of silver from his mother. She cursed the thief and devoted the money, if restored, to Jehovah. To escape the curse, Micah confided; to escape from her vow, the mother besought her son to obtain the money. Micah, afraid of the curse, was afraid also of sacrilege, so the mother compromised with her conscience by giving a silversmith 200 shekels for an image. The result was a shrine at home. The money was not lost altogether, and the shrine no doubt was profitable. There was evidently only one idol and the whole of Jehovah was not intended; in consequence "a graven image and a molten image" (pesel and massékhab) raise difficulties. The words may mean a molten image engraved, or a carved image with molten ornaments. massékhab in 18.20 is misplaced. The idol led to a shrine. The shrine necessitated an ephod and teraphim. They in turn required a priest to use them. The ephod here cannot be an idol or the teraphim large. In 18.20 the Levite carries all. The ephod (like Aaron's) was probably a garment with a purse containing the teraphim, used, like the Urim and Thummim, for divining. Micah at first made his idol, but, finding the money intended for another purpose, he sold it to a wandering Levite at a miserable pittance. The Levite was Jonathan, the grandson of Moses, and later Jews, out of respect for the lawgiver, inserted an "n" above the line and read Manasheh (18.30). He belonged to Bethlehem, and was "of the family of Judah" (17.7). These words are not sufficient to prove there was no tribe of Levi, or to overthrow the witness to the parentage of Moses. Levites were doubtless affiliated to the tribes with which they lived. Micah's pleasure and Dan's subsequent desire to secure his services prove that Levites had recognized religious functions. Micah disobeyed the second commandment, but was careful as a ritual propriety. He is typical of many superstitious men. When the Danites were driven from the Maritime Plain by Amorites (1.34), they sent five spies to find a suitable settlement for their surplus population. These spies passed Micah's house and recognized the Levite "by his son's head-dress, and his son's face was 'warding'. At their request he consulted his God and assured them of success. They found Laish, in a northern valley, pros-
persecuted and unprotected by alliances. In consequence two armed Danites with families and cattle marched from Mahanah-dan and came to Micah's house. Jonathan was held in converse at the gate while the spies robbed the shrine. Jonathan protested a little, but consulted his own interest and went with the Danites. Micah, discovering his loss, collected his neighbours and pursued. The Danites had sent on their impedimenta, and turned on him with threats. Micah was afraid, and returned home. The Danites marched to Laish, surprised and burnt the town, and settled in the country, calling it Dan. The idol was set up, Jonathan and his sons became its priests, and the worship continued "all the time the house of God was in Shiloh," i.e. "until the captivity of the land," when the Philistines captured the ark. The narrative is vivid. The story is told throughout with grim humour. The author, by his presentation of the facts, renders common things uncommon. See especially the exposure of superstition. See Judges, op. cit.; Day, Social Life of Heb.; Robertson, Early Rel. of Isr.—2. (1 Chr. 5:5.) Son of Shimel, a Reubenite. —3. (1 Chr. 9.15) = Micahiah. 2—4. (34.35.39.40.41; cf. 2 Sam. 24.16.) The son of Merib-baal (Mephibosheth) and grandson of Jonathan. He lived in the house of Ziba. —5. (1 Chr. 23.20.) A Kohathite, son of Uziel. —6. (2 Chr. 34.20.) "Abdon, son of Micah," cf. 2 K. 22.12. —7. "The prophet, ride next art. [I.M.S.]

Micah, the writer of the sixth book of the minor prophets (third in LXX.), is called, to distinguish him from Micah (K.V. Micanah) son of Iniah (I K. 22.28), whose message he takes up (cf. Mi. 1.2 with 1 K. 22.28). The "Morashith" (I K. 1.1) from the city of his birth in Judaea (1.1), where in early times his grave was shown. He prophesied in the reigns of Jotham (according to Kautzsch 730-736), Ahaz (736-727) and Hezekiah and Hosea (possibly 727-716), and was therefore a younger contemporary of Hosea (1.1) and Isaiah (1.1), with which last prophet he is often in touch (cf. Mi. 1.10 with Is. 10.29f., 2.17 with Is. 28.7, 3.5 with Is. 29. off., 3.12 with Is. 32.13ff., 4.11 with Is. 22.1ff., 5.21 with Is. 7.14, 9.5f.; in several of which passages the language is word-play, especially noticeable in the Hebrew). Since Jud. was written before 722, and 3.12 is placed by Je. 26.18 in Hezekiah's time, and since the whole book shows the hand of an artist in the relation of its parts, we may consider the book to have been completed in its present form in the reign of Hezekiah, before 722. Even 6.10 does not necessarily give us a later date than this (cf. 1.5, 5.11f., 2 K. 16.3). That proclamations of salvation usually follow on threatenings of chastisement is no reason for alleging their spuriousness, since the threatening is not set on one side, but is presupposed in the very substance of the promise itself. To understand aright the prophetical writings, we must bear in mind the twofold object of the prophet's mission—to rebuke the careless and ungodly, and to encourage the weak-hearted and troubled. Again 1.7 is 12 and in Hosea, so also in Micah, promise is always found at the end of a passage which begins with the customary rhetorical "Hear." The following table will indicate this principle more plainly:

<table>
<thead>
<tr>
<th>Threatening</th>
<th>Promise</th>
</tr>

</tbody>
</table>

This simple consideration forms also the most serviceable answer to the onslaughts of critical caprice, of which the name here is legion. Following Stade's precedent, it is customary to regard the whole, or nearly the whole, of 4-7 as not genuine. In Marti's hands the genuine book shrinks to a little over a quarter of its original bulk. Volz distinguishes in 4-5 alone six stages of revision. The inconsistency frequently insisted upon, that Jerusalem in ch. 4 sometimes appears as conquered, sometimes as set free, disappears at once if we are allowed to regard the prophetic insight as speaking of events yet to take place after the Exile (see 2 K. 21.5, 14; 14.17, marg., 7.13ff.; He. 2.31; Ezk. 38f.).—Zech. 12.1 and was to remove the difficulty by a forced theory of interpolation is excluded by any reasonable view of the context. — Contents. Ch. 1. Jehovah appears in judgment on account of the guilt of Samaria and Jerusalem. Samaria is to become a waste! To Jerusalem is drawn near hostile hosts from the N. and S., and their approach is delineated with great poetical power. Ch. 2 finds the reason of the chastisement, which has its climax in exile (1.16, 2.4, 10) in the covetousness of all the higher ranks of society; after the deepest misery, and not before the punishment, as the soothsayers pretend, follows the times of happiness, deliverance, enlargement, and victorious exodus. 1 v. 12, presuppose the judgment, and do not give the words of the lying prophets; ver. 11 is a parenthesis. Ch. 3—5. The leaders by covetousness, the false prophets by self-seeking, the soothsayers by lack of perception, with the evidence of disaster. Before the judgment, the priests by vileness and carnal security in administering their office, have greatly led the people astray and have brought about the overthrow. Therefore for your sakes Zion shall be ploughed up for a field, Jerusalem shall become a rubbish heap, and the high condition to which your ancestors attained shall have come to an end, triumph only to be followed by ruin. (3.12) the princes of the land (Je. 26.16-19) used to show that Jeremiah was not worthy of death simply because he prophesied evil, since Hezekiah had not considered that Micah should be so punished. But again, the conclusion that Micah could not have therefore proclaimed any message of salvation is not justified, since such a message does not make void the threatening, but on the contrary makes it surer. The promise of Mi. 4.1ff., which is indirectly attached to 3.12, sets forth the religious significance of Zion, v. 8-14 its outward fortunes. 5.1ff. introduces, in correspondence with the sovereignty of the early days which 4.8 mentions, the thought of the personal ruler, born in Bethlehem of a virgin (clearly referring to Is. 7.14) issuing from eternity, equipped with divine power and majesty; and 5.6-14 shows the people of God of the future, greatly blessed, and yet fearing of the peoples of the world, and at the same time without a false reliance on outward
ceremonial or on the worship of idols. The well-known prophecy of the temple hill (4.1f.) meets us again in 1s.2.1f. Since from chronological reasons Micah, with whom the passage fits closely, could not have taken it from him, and since, moreover, interpolations in both prophets are excluded by the continuous consistency of their work, it follows that both have made use of an earlier common writing, with which also Joel (3.10 ff.), Jeremiah (31.61.), and Zechariah (3.10ff.) were acquainted, and after which Micah shaped the imagery of 3.12 (see the unique expression "mountain of the house" for the temple hill). That Babylon is named as the place of the Exile (4.10)—and the word coheres to its context too closely to be abandoned—is not more improbable than that Isaiaus, no less the most important of the annexation of Israel by Assyria (7.17ff.); or that Zechariah (9.13) should know of the rising of the Greeks (Ionians) amongst the world-powers hostile to the Hebrews or that Isaiah (39.6) should in the same way indicate Babylon as the land of the Exile, or Micah (4.10f.) the place. Micah, who, indeed, in But 5.1ff. is a real advance in the Messianic expectation, especially as stating that Christ comes from eternity; in other respects Micah agrees closely with the thoughts of Is.7.14,9.1ff. Ch. 6, in a third part of the book, contains, with bolder expression, God's controversy with His people, and the thought of the religious and ethical thought. God requires rectitude, love, and a humble walk; where these are wanting, as in Israel, the greatest sacrifice avails nothing. 6.6ff., which was once used as a principal lever in support of the view that the law is later than the prophets, is now relegated by Mashi to the 5th cent. B.C., leaving the hypothesis of Weisbach no longer care of itself! The first part of ch. 7 expatiates with a bitter cry upon the lack of goodness in the people, and the whole book ends (ver. 7ff.) with hopes of redemption and restoration, and, with a confession of sin indeed, but also with an unlimited faith in God's forgiving goodness and truth, with a word-play upon the ancients' belief in the prophet's name in ver. 18. Ver. 12 does not refer to the return from Exile, but to the entrance of the heathen into the kingdom of God (cf. 4.1ff., 5.6ff.,7.16,17). Thus Micaiah makes prominent throughout, in equal proportions, the holiness of God and the love of God. The language is powerful and bold, with frequent similes, especially from the shepherd life (1.6-8,2.12,4.3ff., 5.3,7.1,14), and ch. 6 is vividly dramatic. Quotations in N.T.: 5.2 in Mt.2.26ff. Jn.7.42; 7.6 in Mt.10.35f., Mk.13.12, Lu.12.53; 7.20 in Lu.1.72f. Critical views: besides commentaries and introductions, see Stade, Zeitschrift für die T. Wissenschaft, i. 161, ii. 167, who first started the criticism of Micah; Volz (1897), Die vorrömische Jahre-prophetie und die Messias, pp. 63 ff. Positive views: Ryssel, 1857; Untersuchungen über die Text-gestalt und die Echtheit des Buches Micah. The present writer has thoroughly examined the most modern views in Die vorrömische Jahre-prophetie und die Eichtheit des Buches Micah (1906), pp. 233-282. [W.M.] Micaiah. There are 7 persons of this name in O.T. besides Micah the Levite, to whom the name is twice given in the Heb. (Judg.17,1,4). Micah and Micaiah both meaning, "Who is like Jehovah?" In A.V., however, the name is given as "Micaiah." "Micah" is the son of Imlah, a prophet of Samaria, who, in the last year of the reign of Ahab, predicted his defeat and death. Three years after the great battle with Benhadad, Ahab proposed to Jehoshaphat that they should jointly go up to battle against Ramoth-gilead. Jehoshaphat assented, but suggested that they should first "inquire at the word of Jehovah." Accordingly, Ahab assembled 400 prophets, who unanimously gave a favourable response; and among them, Zedeckiah the son of Chenaniah made horns of iron as a symbol, and announced that with those horns Ahab would push the world-powers. Also, the prophecy of Micah was not satisfied, and asked if there was no other prophet of Jehovah at Samaria. Ahab replied that there was yet one—Micaiah the son of Imlah; but added, "I hate him, for he does not prophesy good concerning me, but evil." Micaiah was, nevertheless, sent for: and after a vain attempt to dissuade him, he expressed an ironical concurrence with the 400 prophets, and then openly foretold Ahab's defeat and death. In opposition to the other prophets, he said that he had seen Jehovah sitting on His throne, with all the host of heaven standing by Him, and that Jehovah had said, Who is the man that shall die for the spirit of his friends? Who is that man like me? for in my sight there is no other.
Michah

or patron-angel of Israel (Dan.10.13,21,12.1).
[Angel.] Not named in the Apocrypha, but often in the Pseudepigrapha. Slav. Enoch xxii. 6, Michael, as "the chief captain," brings Enoch before the Lord. Eth. Enoch xx. 5, "set over the best part of mankind over people" (i.e. Israel); xl. 9, "the merciful and long-suffering"; xl. 2, one of the four presences; in xx. 5, one of the six "holy angels who watch." As. Isa. iii. 16, "the chief of the holy angels" with Gabriel at Christ's sepulchre; ix. 23 (Slav. ver.), "the great archangel." N.T.: (1) J.u. 9, "the archangel" contended with the devil about the body of Moses. Cf. strife of the good Ahura-Mazdâ and the evil Angra Mainyin about a man's soul; and the haggadah in Midrash Rabba on Deut.31.14 for a similar strife between Samuel and Michael for the soul of Moses. (2) Rev.12.7. Michael and his angels fight with the Dragon (the wording of the symbolism rests ultimately on the myth of Merodach's fight with Tiamat). For Col.2.18, see Angel. Lueken, Michael(1808); E. Böklén, Die Verwandtschaft d. jüdisch-christl. m. d. parsischen Eshel. (1902), pp. 50 ff.; Charles, Assumption of Moses (1897), pp. 166-110; and Wetstein, Biblischer Atlas v. 6; Dan. vi. 2, and Beni, vi. 1. [A.L.W.]

Michah (1Chr.24.24,25) = Micah, 5.

Michaiah (c.f. Micajah).—1. Father of Achbor, 2 (2K.22.12). [Micajah, 6].—2. Son of Zaccur, a descendant of Asaph (Ne.12.33) = Micha, 3; son of Zichri (1Chr.9.15) = Micha, 3; son of Zabdi (2K.11.2,11) = Mlchah, 13; and (as priest) at the dedication of the wall of Jerusalem (12.41).—3. [Maachi, 3].—4. A prince whom Jehoshaphat sent to teach the law of Jehovah in the cities of Judah (2Chr.17.7).—5. Son of Gemariah, 1. After Baruch had read to the people Jeremiah's prophecies of imminent calamities, Michaiah reported them to all the princes assembled in king Jehoiakim's house: whereupon the princes sent for Baruch to read the prophecies to them (Jer.36.11-14).

Michaiah, the younger of Saul's two daughters (1Sam.14.49). The king had proposed to bestow on David his elder daughter Merab; but when the marriage could be arranged Michaiah fell in love with a young woman who eagerly caught at this opportunity of exposing his rival to the risk of death. The dowry demanded for Michaiah was the slaughter of a hundred Philistines, David by a brilliant feat doubled the tale of victims and Michaiah became his wife (18:17-29). Soon the strength of her affection was put to the proof. They seem to have been living at Gibeah. After one of Saul's attacks of frenzy, Michaiah learned that the house was being watched by the myrmidons of Saul, and that it was intended on the next morning to attack her husband as he left his door. She met stratagem by stratagem, first lowering David out of the window and then arranging the bed as if still occupied by him: the Tiraphim, or "image," was laid therein, its head enveloped with a "rug" (Heb. kebbir, occurs here only) of goat's hair [PILLOW], the rest of the figure covered with the wide bagheth or cloth. Such a deception was such that Michaiah in her fear fabricated a story that David had attempted to kill her (19.11-17). This was the last time she saw her husband for many years; and when the rupture between Saul and David had become open and incurable, Michaiah was married to another man, Phalti or Phaltiel of Gallim (1Sam.25.44; 2Sam.3.15). After the death of her father and brothers at Gilboa, Michaiah and her new husband appear to have gone with the rest of the family of Saul to the E. side of Jordan, whence David recovered her. [Phalti.] Fourteen years at least had elapsed since David and she had parted, but his love for his absent wife had clearly undergone no change. The meeting took place at Hebron. Subsequently, on the day of David's greatest triumph, when he brought the ark of Jehovah from its temporary resting-place to its home in the newly acquired city, Michaiah watched the procession from her window, and the "dancing" of her husband before the ark seemed to her unhappily "she despaired in her heart." The king was recovered by his wife with a bitter taunt. David justified himself and separated from her (2Sam.6.20-23). Her name appears but once again (21.8) as the mother of five of the grandchildren of Saul; but Merah should doubtless be substituted for Michaiah in this passage.

Micha'as (2Esd.1.39) = the prophet Michaiah. Micha'as, a variation, probably a later form, of Michmas (Ezr.2.27; Neh.7.31).

Michmash', a town noticed in connexion with the Philistine war of Saul and Jonathan (1Sam.13.14). Now Mikhmas, 7 miles N. of Jerusalem, on the N. edge of the great Wady Swaeni. [Bezalel, 30.] It lies between Bethel and Gibeah, as one of the chief points of Saul's position at the outbreak of the war (1Sam.13.2). It is mentioned by Isaiah (10.28) as lying N. of the "passage" or gorge. After the Captivity the men of the place returned, 122 in number (Ezr.2.27; Neh.7.31). About 153 B.C. Machmas became the residence of Jonathan the Hasmonaean (1Mac.9.73). In the time of Eusebius and Jerome (Onomasticon, "Machmas") it was "a large village shown in the confines of Aelia [Jerusalem], keeping its old name, 9 [Roman] miles distant thence, near the town Ramath (c.27)."

Miche'math (Jos.17.7).—"And the border of Manasseh was from asher hamik'hemath, which is in front of Shechem." [Asher.] The Heb. words may perhaps be rendered "the going forth of the open place," and the reference appears to be to the Makkah plain, or "camping-ground," E. and S.E. of Shechem, included in Ephraim, while Gerizim lay in Manasseh. [SHECHEM.] [C.R.C.]

Michri', ancestor of Eleah, 4 (1Chr.9.8).

Michtam. [PSALMS, TITLES OF.]

Middin', a city of Judah (Jos.15.61), one of the six specified as situated in the district of "the Middibar" (A.V. wilderness). The site is unknown. [C.R.C.]

Mid'lan (midhyan), Midlanites (mid'vyanim, Mid'barim, Mid'barain), name of a son of Abraham and Keturah (Gen.25.2) and of a tribe descended from him. The Midianites first appear as a tribe in Gen.37.25-28, and are closely associated in the story with their kinsmen the Ishmaelites; their territory extended along the eastern coast of the gulf of 'Aqabah, and was coterminous
with Edom to the N. From the fact that in Judg.10.12 the Heb. יַדֶּבֶר (mâ’don) is rendered "Midian" by the LXX., the Meonim (mrwînim) elsewhere mentioned seem to have been ultimately identified with the Midianites. It seems the latter must have settled in their territory, as the word mā’don is the Magon of very ancient Akkadian texts. It denoted the Sinaite Peninsula and the country S. of it, from which dorie and other articles were brought to Babylonia in very early times. The name survives in that of the port of Maknah, near which great ruins still exist. Classical writers knew the Meonim as Mineans, and recent explorations show that the latter formed a kingdom of great antiquity. In Moses' youth the Midianites proper—who may have in some degree become intermingled with the earlier inhabitants—appear to have been governed by priests, though later in his life we find kings mentioned. In this respect they resemble many other tribes of ancient Arabia, for in the S. of that peninsula, as in Assyria and in the S. of Babylonia, the rulers were priests before they became priest-kings, and finally lay monarchs. In Sheba we find, in like manner, the priests were the "capital" (caur), Magârib, and only later assumed the royal title. The name of Moses' Midianite father-in-law, Jethro, was a not uncommon one in both Northern and Southern Arabia, as we learn from inscriptions. The Midianites finally became, probably through trade, one of the most powerful tribes in Arabia. We find their elders uniting with those of Moab in avitating Balaam to visit Balak (Num.22.4,7). The Midianites joined with the Moabites in tempting Israel to sin (Num.25), and in consequence suffered a great overthrow (Num.31). They were among the most cruel of the oppressors of Israel in the times of the Judges, but were defeated by Gideon (Judg.6.7,8), and their power broken. In each instance we find them ruled over by a number of kings, and in Gideon's time in alliance with the Amalekites. Their overthrow at Gideon's hands became proverbial among the Israelites, and is repeated in the Psalms (Ps.78.35). It is a cruel and unjustifiable treating of the human race (Ps.83.9; 159.4,10,26) and a divinely wrought deliverance of God's people. Sayce, Higher Crit. and the Mono.; Hommel, Alt.-israelitische Uberlieferung; Hipprecht, Expl. in Bible Lands; and for other views, see Arabia, Madian, Maonites, in this Dict. [W.S.T.C.R.]

Midwife. [Family, D. iv. (6); Puah, 3.]

Migdal-êl, one of the fortified towns of Naphtali (Jos.19.38 only); the name means "tower of El, or God." It is noticed between Iron (Yârân) and Horem (Hârâh), being probably the present village Mjeddel, 6 miles N.W. of Hârâh. [C.R.G.]

Migdal-gad (Jos.15.37), a town in the lowlands of Judah, mentioned with Mizpeh (Sâbêk) and Lachish (Tell el-Hesî). It appears to be the ruin Medâleh, 5 miles S. of Beit Jibrîn. This is 6 miles S.S.W. of Mizpeh, and 10 miles E. of Lachish. It is an ancient ruin, with caves, cisterns, and Heb. rock-cut tombs, evidently an important town. [Stru. W. Pal. iii. 284.]

Migdol, the proper name of two different places on the E. portion of Egypt, both in the

islmus of Suez. The word means originally a watch-tower.—1. Migdol occurs in the account of the Exodus (Exod.7.14:2; Num.13.21,27) as a place to which the Israelites is said to have come from Pi-hahiroth, between Migdol and the sea. It is evidently the place which is mentioned in the papyri with its Semitic name of Maklar, or Makal, of Seti I., and which the Sinaic Bedouin had to pass when they came to graze their cattle in the pasture-grounds of Pithom. It is located, it appears, on the site which the French engineers called the Serapeum, a little N. of the Bitter Lakes. Darius erected there a Persian stele. [Red Sea, Passage of.]—2. The N. boundary of Egypt, corresponding to Syene in the S. (Ezk.29.10,30.6 marg.). The same place is spoken of by Jeremiah (44.1) as being inhabited by Jews. It is the Magdolon of the Itinerary of Antonine, 12 miles S. of Pelusium. It was a fortress in that region, afterwards superseded by Pelusium, and was the first city reached by travellers from Palestine to Egypt. As it was the nearest to their country, it was natural that Jews should settle there, and it is likely that the name of Migdol should come first in the threats of the prophets against Egypt. [E.E.]

Migron (precipice), a place near Gibeah (tSam.14.2), where a pomegranate tree grew. Here the Assyrians crossed the Michmash Valley (Is.10.28). Probably the cliffs E. of Jeba are meant. [Gibeah.] [M.]

Mijamin. [1. The chief of the sixth of the 24 courses of priests established by David (1Chr.24.9).—2. A family of priests who signed the covenant (Ne.10.7); probably descendants of 1; identical with Miniamin (12.5) and probably with Mijamin (12.17).]

Mikloth.—1. Son of Jehiel by his wife Machach, and brother of Shimeah or Shimean (1Chr.8.32,9.37,38)._2. The "ruler" (nâgîdd) of the second division of David's army (27.4).—3. ев (M.), a Levite of the second rank, gatekeeper of the ark; appointed by David to play in the temple-band "with harps upon Sheminith" (1Chr.15.18,21).—4. A son of Mihal by his wife Bathsheba, and brother of Absalom (2Sam.5.14).—5. Daughter of Haran, sister of Lot, grandmother of Rebekah, and wife of her own uncle Nahor, Abraham's brother, to whom she bare eight children (Gen.11.29,22.20,23.24,15.24,47).—6. The fourth daughter of Zelophehad (Num.26.33,37.1,36.11; Jos.17.3).—7. Daughter of Jeconiah (2Chron.36.22).—8. [M.]—9. [M.]—10. [M.]—11. Daughter of Haran, sister of Lot, grandmother of Rebekah, and wife of her own uncle Nahor, Abraham's brother, to whom she bare eight children (Gen.11.29,22.20,23.24,15.24,47).—2. The fourth daughter of Zelophehad (Num.26.33,37.1,36.11; Jos.17.3).

Mile. [Weights and Measures.]

Miletus (Ac.20.15,17), less correctly called Miletum in 2Tim.4.20. In the context of Ac.20.16 we have the geographical relations of Miletus brought out as distinctly as if it were St. Luke's purpose to state them. In the first place it lay on the coast of the S. of Ephesus. Next, it was a day's sail from Trogyllium (ver. 15). Moreover, to those who are sailing from the N., it is in the direct line for Cos. All these details correspond with the geographical facts of the case. The site of Miletus has now receded 10 miles from the coast, and even in the apostolic time it had lost its strictly maritime position. The passage in 2Tim.4.20 presents a very serious difficulty to the theory that there was only one Roman imprisonment.
Milen was far more famous five cents, before St. Paul’s day than ever afterwards. In early
In the ancient order of events, it was absorbed in the Persian empire. After a
brief period of spirited independence, it received a blow from which it never recovered, in the
siege conducted by Alexander, when on his Eastern campaign. But it held, even through the
Roman period, the rank of a second-rate trading town, and Strabo mentions its four
harbours. At this time it was politically in the province of Asia, though Caria was the old
ethnological name of the district in which it was situated.

**Milk.** In the East milk is not restricted to the use of the young, though naturally the
characteristic food of childhood both from its simple and nutritive qualities (1Pe.2.2), and particularly as contrasted with meat (1Cor. 3.2; Heb.5.12); but is regarded as substantial food, adapted alike to all ages and classes. Not only the milk of cows, but of sheep (Deut.32.14), camels (Gen.32.15), and goats (Pr.27.27) was used, sometimes ( hálāḇḥ) in its natural and sometimes in a sour coagulated state (ḥemā‘). In A.V. the latter is rendered “butter”; but undoubtedly in every case (except perhaps Pr.30.33) the term refers to curdled milk, well known in Eastern countries under the name of leben. The refreshing draught which Jael offered “in a lordly dish” to Sisera (Judg.5.25) was Leben. It is still
offered in hospitality to the passing stranger, exactly as of old in Abraham’s tent (Gen.18.8).

**MILL.** The hand-mills (reḇavim) of the ancient Hebrews differed but little from those still in use in the East. These consist of two circular stones, about 18 to 24 in. in diameter, the lower of which is fixed, and has its upper surface slightly convex, fitting into a corresponding concavity in the upper stone. The latter, called by the Hebrews rekkeb, and by the Arabs rekkab, “rider,” has a hole in it, through which the grain passes, immediately above a pivot or shaft, which rises from the centre of the lower stone, and about which the upper stone is turned by means of an upright handle fixed near the edge. It is worked by women, sometimes singly and sometimes two together, facing each other. The one whose right hand is disengaged throws in the grain as occasion requires through the hole in the upper stone. The N.T. reference (Mt.24.41) is true to life, for women only grind. The labour is very hard, and the task of grinding was in consequence performed only by the lowest servants (Ex.11.5) and captives (Judg.16.21; Job 31.10; Is.47.1, 2; Lam.5.13). So essential were millstones for daily domestic use, that they were forbidden to be taken in pledge (Deut.24.6), lest a family might be deprived of the means of preparing their food. The hand-mills of the ancient Egyptians were of the same character as those of their descendants, and like them were worked by women. Specimens have also been found, by excavation in Palestine itself, which are of great antiquity. Ancient oil mills also are found, with cylindrical rolling stones (like a cheese in shape), which were turned in a stone trough by an ass or an ox. These presses are noticed in the Mishna (Shebith viii. 6). A millstone of this kind is alluded to in Mt.18.6. With the movable upper millstone of the hand-mill the woman of Thebez broke Abimelech’s skull (Judg.9.53).

---

SAMARIAN WOMAN GRINDING CORN (Mt. 24:41). W.D.A.
Milennium. [COMING, SECOND.]

Millennium (Heb. dōhan, Arab. doḥan), the Panteion miliaeneum, or Sorghum vulgare. It is probable that both were used by the ancient Hebrews and Egyptians, and the Heb. dōhan may be the same as the description of the operations of mining. The latter is however called dhārah in Arabic. (Tristram, Nat. Hist. of Bible, p. 470). Mention of millet occurs only in Ezek. 4:9. It is still grown in Palestine.

Millo', a place connected with the defences of ancient Jerusalem, previous to its capture by King of Judah (2Sam. 5:9), and David and Solomon built round about Millo and inward (I Chr. 11:8). Solomon also built Millo as part of the great work carried out by his levy (I Kings 9:15, 24:11-27). King Hezekiah strengthened Millo in the city of David, on the approach of the Assyrians (2Chron. 32:5). Millo is now conjectured to be an archaic Jebusite word borrowed by the king of Judah (2Sam. 5:9). It is evident from the various allusions that it was a mound, keep, or citadel. This is the view of the LXX, as they render it in every case (except 2Chron. 32:5) as ἡ ἁρπα, a word denoting a guard or watchtower. Now, ἡ ἁρπα means the citadel, and this is the word used throughout the books of Maccabees and by Josephus for the fortress overlooking the temple. The position of Millo is discussed under Jerusalem.

Millo, The house of (Beth-Millo).—1. (Judg. 9:6,20). The name of a family or clan mentioned with Shechem.—2. The place where Joshua was slain by his servants in Jerusalem (2K. 12:20). [MILLO; SILLA.]

Mines, Mining. "Surely there is a source for the silver, and a place for the gold which they refine. Iron is taken out of the soil, and stone man melts [for] copper. He hach[es] sank a shaft far from the sojourner; that they are forgotten of the foot hang [stray], away from man they flit to and fro. [For] the earth, from her cometh forth bread, and he hatches mountains from the root; in the rocks he hatches channels, and every rare thing hath his eye seen: the streams hach he bound that they weep not, and that which is hid he bringeth forth to light (Job 28:1-17). Such is the highly poetical description given by the author of the book of Job of the operations of mining as known in his day, the only record of the kind which we inherit from the ancient Hebrews. It may be fairly inferred from the distinction that a distinction is made between gold obtained in the manner indicated, and that which is found in the natural state in the alluvial soil, amongst that gold washed down by the torrents. This appears to be implied in the expression "the gold they refine," which presupposes a process by which the pure gold is separated from any natural alloy of silver or copper, or may refer to extracting it from veins of quartz. Silver also is associated with gold in almost every allusion to refining. In the above quoted passage of Job, so far as can be made out amid the obscurities with which it is beset, the natural order of mining operations is observed. The poet might have had before him the copper-mines of the Sinai Peninsula. In Wady el-Maghārah, "the Valley of the Cave," are still traces of the Egyptian copper mines, which settled there for the purpose of extracting copper from the sandstone rocks, and left their hieroglyphic inscriptions upon the face of the cliff. The ancient furnaces are still to be seen, and on the coast of the Red Sea are found the piers and wharves whence the miners shipped their freight. In the persecution of Diocletian the Christians were condemned to work them. The gold-mines of Egypt in the Bishāri Desert, the principal station of which was Escharanib, are still worked. Beyond Wady Allaga, were discovered by M. de Morgan and Bonomi. Ruins of the miners' huts still remain as at Šurābīt el-Khādīm. According to the account given by Diodorus Siculus (iii. 12-14), the mines were worked at night, by gangs of convicts and captives in fetters, who were kept day and night to their task by soldiers. The work was superintended by an engineer, who selected the stone to be worked, and from the rock was split by means of fire, but the softer was broken up with picks and chisels. The miners were quite naked, their bodies being painted according to the colour of the rock they were working; and in order to see in the dark passages of the mine, they carried lamps upon their heads. The stone was carried off by boys; it was then pounded in stone mortars with iron pestles by those who were over 30 years of age till it was reduced to the size of a lentil. The women and old men afterwards ground it in mills to a fine powder. The final process of separating the gold from the pounded stone was entrusted to the engineers who superintended the work. They spread this powder upon a broad, slightly inclined table, and rubbed it gently with the hand, pouring water upon it from time to time so as to carry away all the earthy matter, leaving the heavier particles upon the board. This was repeated several times. The crucibles with the hand and afterwards with fine sponges gently pressed upon the earthy substance, till nothing but the gold was left. It was then collected by other workmen, and placed in earthen crucibles with a mixture of lead and salt in certain proportions, together with a little tin and sometimes mercury. The crucibles were covered and carefully closed with clay, and in this condition baked in a furnace for five days and nights without intermission. Of the three methods employed for refining gold and silver—(1) by exposing the fused metal to a current of air; (2) by keeping the alloy in a state of fusion and throwing nitre upon it; and
(3) by mixing the alloy with lead, exposing the whole to fusion upon a vessel of bone-ashes or earth, and blowing upon it with bellows or other blast—the third appears most nearly to coincide with the description of Diodorus. To this, known as the cupelling process, there seems to be a reference in I.S.12.6, J.e.6.28-30, Ezk.22.18-22. Silver-mines are mentioned by Diodorus (i. 33), with those of gold, iron, and copper, in the island of Merøe, in the Nile. But the chief supply of silver in the ancient world appears to have been brought from Spain. The mines there were celebrated (Mac 8.3). Mt. Oroseida, from which the Guadalquivir, the ancient Baltes, takes its rise, was formerly called, from its silver-mines, "the silver mountain" (Strabo, iii. p. 148), but the largest silver-mines in Spain were near Carthago Nova. The process of separating silver from lead is abridged by Strabo from Polybius. The lumps of ore were first pounded, and then blown through with bellows. The sediment was again pounded, and again filtered, and after this process had been repeated five times the water was drawn off, the remainder of the ore melted, the lead poured away and the silver left pure. The metal workers of Tarshish must have possessed the art of cupelling (Je.10.9). We have no means of knowing whether the gold of Ophir was obtained from mines or from the washing of gold-streams. Its great abundance seems to indicate that the largest part of the gold which came into the hands of the Phoenicians and Hebrews was obtained from streams. As gold is seldom if ever found entirely free from silver, the quantity of the latter varying from 2 per cent. to 30 per cent., it has been supposed that the ancient metallurgists were acquainted with some means of parting them. To some such process it has been imagined that Pr.17.3. "The fencing pot is for silver, and the furnace for gold," and 27.21 refer. A strong proof of the acquaintance possessed by the ancient Hebrews with the manipulation of metals by the process known in modern times as calcination is found by some in the destruction of the gold in the vessel and in the gold which they had made, and by its being in fire, and ground it to powder, and strawed it upon the water, and made the children of Israel drink" (Ex.32.20). But this appears to have arisen from a desire to find too much in the text. The main object of the destruction of the calf was to prove its worthlessness and to throw contempt upon idolatry, and this might have been done without any refined chemical process like that referred to. How far the ancient Hebrews were acquainted with the processes at present in use for extracting copper from the ore it is impossible to assert, as there are no references in Scripture to anything of the kind except in Job (l.c.), but it was known to the Egyptians not a few centuries before the Exodus. Some means of toughening the metal so as to render it fit for manufacture must have been known to the Hebrews as to other ancient nations. The Egyptians evidently possessed the art of working it at a very early time, and much of the knowledge of metals which the Israelites had must have been acquired during their residence among them. Of tin, apparently, there is no trace in Palestine. That the Phoenicians obtained their supplies from the mines of Spain and Cornwall there can be no doubt. The lead-mines of Jebel er Kusís, near the coast of the Red Sea, about half-way between Berenice and Rosaea, may have supplied the Hebrews with that metal, of which there were no mines in their own country, or it may have been obtained from the rocks near Sinai. Iron ore is obtained on the southern base of the Lebanon hills, and the mines are still worked there, though in a very simple, rude manner, like that of the ancient Samothracians: of the method employed by the Egyptians and Hebrews we have no certain information. It may have been similar to that in use throughout India from very early times, which is thus described by Dr. Ùre: "The furnace or bloomery in which the ore is smelted is from 4 to 5 ft. high; it is some feet wide, being about 5 ft. wide at bottom and 1 ft. at top. It is built entirely of clay. There is an opening in front about a foot or more in height, which is built up with clay at the commencement and broken down at the end of each smelting operation. The bellows are usually attached to a row of small holes or nozzles of the bellows are inserted into tubes of clay, which pass into the furnace. The furnace is filled with charcoal, and a lighted coal being introduced before the nozzles, the mass in the interior is soon kindled. As soon as this is accomplished, a small portion of the ore, previously moistened with water to prevent it from running through the charcoal, but without any flux whatever, is laid on the top of the coals and covered with charcoal to fill up the furnace. In this manner ore and fuel are supplied, and the bellows are urged for three or four hours. When the process is stopped and the temporary wall in front broken down, the bloom is removed with a pair of tongs from the bottom of the furnace." It has seemed necessary to give this account of a very ancient method of iron-smelting, because, from the difficulties which attend it, and the intense heat with which it is carried out, and from the ore, it has been asserted that the allusions to iron and iron manufacture in O.T. are anachronisms. That, however, is not so (Iron), and it might well have been known to the Hebrews, who may have acquired their knowledge by working as slaves in the iron-furnaces of Egypt (cf. Deut.4.20).

Mingled people. In the Heb. of Je.25.20, 50, 57 and Ezk.30.5 we meet with 'erebh (the same as 'erebh rendered Mixed MULTITUDE). The same Heb. consonants differently pointed would mean "Arabia" (1K.10.15; 2Ch.9.14). The verb root in the Hiphil voice means to "mingle [with the heathen]" (Ezr.9.2; Ps. 106.5). [1F.1E.1J1]

Mingled seed. [Agriculture.]

Miniamin.—1. A Levite in the reign of Hezekiah (2Ch.31.15).—2. (Ne.12.17).—Miniamin, 2.—3. One of the trumpeter-priests at the dedication of the wall of Jerusalem (12.43).—Minister, (1) In O.T. the word usually represents mshmirah, the part participle of sháráh, mshmirah is used for Joshua, as the servant of
MINNII

Moses (Ex. 24:13, 33, 34; Num. 11:28; Jos. 1:11) Samuel, as ministering to the Lord (1 Sam. 2:1, 8, 3:1), the servant of Amnon (2 Sam. 13:17, 18); Abishag the Shunammite, as ministering to David (2 Sam. 5:13, 14); the officers of high rank of Solomon's court (10:5); the servant of Elisha (2 K. 4:3, 6, 15); those who ministered in the tabernacle (1 Chr. 23:17); the Levites and priests (2 Chr. 35:21), Ne. 10:36, 39 (37, 40); Is. 6:1, 6; Joel 3:20, 22; Ezek. 44:11, 19, 45:4, 5, 46:21; Joel 1:6, 13, 2:7); the officers of the Lord (Ps. 103:21, 104, 4). Other parts of the verb are used in like senses. In Ezek. 7:24 the word translated "ministers" in A.V. and "servants" in R.V. is תַּחְנוֹן, the participle (plur. masc. constr.) of the Aramaic verb πράξεω, which usually means to serve, or pay reverence to the deity. In 2 Sam. 8:18 and 2 K. 4:4 the word translated "chief ruler" and "principal officer" in A.V. and "priest" in R.V. (margin "chief minister") is κοθή, the ordinary word for priest. (2) In N.T. there are three distinct words, each sometimes translated "minister": λειτουργια, διάκονος, ἑρμηνεύς. Λειτουργια is used of an officer of the State under the Persian influence, or of a servant of God, in Ro. 13:6; St. Paul, as the minister of Christ in his priestly work of sacrifice in the offering of the Gentiles, in 15:16; Epaphroditus, as ministering to the needs of St. Paul, in Ph. 2:25; the angels, as the ministers of God, in Heb. 1:7; and of Christ, as the heavenly sanctuary, in 8:2. Δίάκονος is used frequently in the general sense of servant, e.g. Mt. 20:26; sometimes in the special sense of a "deacon" or "deaconess" [DEACON, DEACONESS], and frequently in the sense of a minister of Christ, or of God, without the office being defined, as of St. Paul and Apollos, in Cor. 9:5; Pet. 5:3; Eph. 3:21; Col. 4:7); Ephesias (Col. 1:7); and St. Timothy (1 Tim. 3:2). In Ro. 15:8 and Gal. 2:17 διάκονος is used of Christ. Ερμηνεύς is used frequently for a servant, e.g. Mt. 26:58; for the ministers of the word (Lk. 1:2); the minister, or attendant, in the Jewish synagogue (Lk. 4:20); St. Mark, as the minister or attendant on St. Paul and his companions (Mark 16:11, 12); St. John, as the minister of Christ (Ac. 26:16; 1 Cor. 4:17). [CHURCH.] Bevan in Smith, D.B. ii. 371, 372; Cheyne in Encycl. Bibl. iii. 3099, 3100; Hastings and Missie in Hastings, D.B. iii. 376-378. [n. s.]

MINNI, a country mentioned in connexion with Ararat and Ashchenaz (Je. 51:27). [ARMENIA.] The Minini were a people speaking a Mongolic language and living W. of lake Van. They are noticed in 15th cent. B.C. in one of the Amarna letters (Berlin 27), and were probably the Men, a people of the E. near Assyria, according to the tablet of nations at Edinou. [c.c.]

Minnith, apparently the southern part of Japheth's pursuit of the Ammonites, who claimed Moab (Judg. 11:33). It is perhaps the place whence wheat was sent by Israel to Tyre (Ezk. 27:17). The ruins of Minyeh, above the spring of the same name, 13 miles S.W. of Hesbon, probably represent Minnith (Surv. E. N.P. ii. 85). [c.c.]

Ministrum. The Heb. מְנֶגֶגָּן in 2 K. 3:15 properly signifies a player upon a stringed instrument like the Harp, or קים, on which David played before Saul (1 Sam. 16:16, 18, 19), and which the harlots of the great cities used to attract notice (Is. 23:16). Elisha, consulted by Jehu, sent out his attendants with Moab, at first indignantly refuses to answer, and is only induced to do so by the presence of Jehoshaphat. He calls for a harper, apparently a camp follower; "and it came to pass, as the harper harped, that the hand of Jehovah was on him." Other instances of the same divine influence or impulse connected with music are seen in the case of Saul and the young prophets in 1 Sam. 10:5, 6, 10, 11. The reason of Elisha's appeal is thus explained by Keil, who has been followed by later commentators: "Elisha calls for a ministrum, in order to gather in his thoughts by the sound of its music, and at the same time to belong to the large natural order Labiatae. [HYSSOP.]

Miphkad, The gate. [JERUSALEM.] Miracles. (1) Definition. The word "miracle" is used with a twofold significance: (a) in the scientific sense, as a portent (τικάφας), an abnormal event, not explicable by known natural laws; (b) in the religious sense, as a sign (σήματα), a direct and direct action of God. It is obvious that with every advance in our knowledge of natural laws the sphere of miracle in the scientific sense is proportionately narrowed. What has once seemed miraculous is brought within the domain of science and seen to be possibly usual, but not therefore supernatural, e.g. a comet or an earthquake is a miracle to the South Sea islander, but to us, with a wider knowledge and a more complete experience, they can be scientifically explained and thus cease to be miracles. This is possibly the case with some of the Biblical miracles, e.g. the dividing of the Red Sea; [Ex. 14:21] the miraculous change of the parallel to the Gospel miracles may be found in modern cases of "faith healing." Thus, at the display of the "Holy Cross" at Treves, in 1801, eleven such miracles, including the cure of paralysis of the arm, lupus, rheumatic gout, and blindness due to brain fever, were performed, the curious being effected, according to the testimony of physicians who were present, without the application of any ordinary physical remedies. It is possible that many others which, in the light of our present
knowledge, we cannot understand, will be explained in the future, though it is probable that there will always remain an inexplicable element in the occurrence. It is important to notice that when an event ceases to be a miracle in the scientific sense, it does not necessarily cease to be a miracle in the religious sense. For in this sense, the word, it is the significance, and not the mere strangeness, of the event which constitutes it a miracle. The event is still a miracle, in the religious sense, even if it be explained as the result of a combination of natural causes, provided it carries with it the conviction that in this particular case natural forces are being directed to a given end and for a definite purpose by God Himself. Thus the dividing of the Red Sea is none the less a miracle in the religious sense if in view of its significant occurrence and its results it suggests a special Providence guiding and controlling natural forces at this great crisis in Jewish history. So, too, Christ's miracles of healing. They are still miracles in the religious sense, but not in the scientific sense, for we should not see in it the hand of God, and, as it would have no religious significance for us, it could have no value as merely scientifically inexplicable. We define a miracle, then, as a "special providence"—an act suggesting either in itself, in its results, or in the person who performs it, the direct action of God, revealing His will and His purpose towards mankind, whether or not it can be fitted into the known course of nature. (2) Possibility. There is no just ground for denying the a priori possibility of miracle, either in the scientific or religious sense. No conceivable event is more extraordinary, no event, that is, which is not contrary to the laws of thought and therefore inconceivable, e.g. that A should be the same as not A—is impossible. This has, of course, been denied. Hume asserted that miracles were impossible because they were contrary to experience. "Nothing," he said, "happens in the common course of nature. There must therefore be an uniform experience against every miraculous event, otherwise the event would not merit that appellation. And as an uniform experience amounts to a proof, there is here a direct and full proof against the existence of any miracle." Huxley, however, exposed the "naked absurdity" of this argument, "if by the term miracle we mean only 'extremely wonderful events.'" For it whatever is contrary to present experience is contrary to the laws of nature and therefore impossible, no new fact can ever be proved. New facts are constantly discovered and are not disbelieved because they are contrary to previous experience—e.g. the Röntgen rays. "A uniform experience" had shown and had therefore, according to Hume, conclusively proved that it was not possible to photograph the bones through the flesh. Nor is it legitimate, except on a materialistic hypothesis, to say that miracles, viewed as "acts of God," are impossible. We do not argue this, says Hume, "and the production by His direct volition of an effect which in any case owed its origin to His creative Will is no longer a purely arbitrary hypothesis to account for the fact, but must be reckoned with as a serious possibility." It can scarcely be maintained that He Who created life was literally unable to bring back to life one who was dead. "Denying the possibility of miracles," says Huxley, "seems to me quite as unjustifiable as speculative atheism." (3) Credibility. Granted that miracles are possible, it follows that, viewed simply as "wonderful events," they are subjects of testimony, i.e. that their occurrence can be proved if adequate evidence in their support is produced. This conclusion seems obvious, but it also has been denied. Hume maintained that even if a miracle happened its occurrence could not be proved. "No testimony," he says, "is sufficient to establish a miracle, unless the testimony of some person who actually saw it is, or has seen it, and who can produce, not merely a hypothesis, but be more miraculous than the fact which it endeavours to establish." This argument is sometimes found in a somewhat specious form. It is contended, a man in whose veracity you have the utmost confidence were solemnly to assure you that he saw one of the lions in Trafalgar Square come down from its perch on its paws, and drink water from the fountain, you would not believe that the event occurred, and if fifty such witnesses were to support his testimony you would still be unconvinced: no evidence, therefore, can prove the occurrence of a miracle. But a fallacy underlies the argument. It is based upon an assumption which never has been and never could be verified—viz. that a large number of honest and independent witnesses can be found to testify to a plain matter of fact which has never occurred—and the answer is simple. Either the event occurred, or it did not; if it occurred, such evidence could not, and if it did not, such evidence could not exist. It is, of course, perfectly legitimate to argue that the evidence, in the case of a particular miracle, is not adequate, and that it is more probable that the witnesses were mistaken than that the event occurred. But a sweeping generalization to the effect that this must always be the case if the evidence is not complete nor is it legitimate to argue, as Matthew Arnold practically does, that the probability of the witnesses being deceived is so great that it is simply waste of time to examine their evidence. It is undoubtedly true that many of the miracles recorded by the ecclesiastical historians and by secular writers are fabulous, but this does not prove that "miracles do not happen," and that therefore the evidence in favour of any particular miracle is in no case worth considering. It is highly illogical to argue that because some documents which we do not trust record miracles we do not believe therefore any document, however reliable on other grounds, is to be regarded as untrustworthy simply because it records miracles. If, then, it is admitted that miracles, viewed simply as "wonderful events," are possible, the question of their occurrence is one of evidence. Each alleged miracle must be examined indepen-
ently, and the character and amount of evidence in its support considered. To accept or reject our acceptance of the canons of critical: each must be tested by the ordinary canons of historical criticism, and however extraordinary it may be, it must be accepted as historical if it satisfies, or rejected if it does not satisfy, the conditions of that test. But though miracles, in the scientific sense, are subjects of testimony; in the religious sense, as “acts of God,” they are not. Our belief in their occurrence will ultimately be determined by our presuppositions. The fact itself may be established by the production of adequate evidence, but its divine character, its supernatural cause, cannot, in the nature of things, be so demonstrated. “The evidence,” says Huxley, “may prove that the event occurred: it cannot prove that it was the effect of a particular volition of the Deity: it may be so, but how is the assertion to be tested? If it is said that the event exceeds the power of natural causes, what can justify such a saying? The discovery of a shock wave of an infinitesimal supernormal than has man, with his infinitesimal power of duration, to say that the most astonishing event that can be imagined is beyond the scope of natural causes.” That is, unless we claim for ourselves an absolute knowledge of the working of natural laws, it is impossible to enjoin grounds for disbelieving that any event, merely because it is inexplicable, must be, in a special sense, an act of God. The unique event must have had a special cause, or combination of causes, and among other possible causes we may include a special act of the divine volition, but whether or not we ascribe it to such a cause, depends ultimately upon the views we already hold as to the Being of God and His relation to the Universe; i.e. our ultimate judgment will be determined by our metaphysical and theological presuppositions, and not by our scientific investigation of the evidence. “No testimony,” it has been said, “can justify a belief in anything supernatural: testimony can only prove an extraordinary and perhaps inexplicable occurrence or phenomenon; that it is due to a supernatural cause (or, we would add, that it is not due to a supernatural cause) “is entirely dependent upon the previous belief and assumptions of the parties.” Thus, while the historical character of an alleged miracle must and can only be determined by historical criticism, once its occurrence is established, our belief or disbelief in its divine character, its spiritual significance, must and can only rest upon our theological presuppositions. Two important conclusions follow: (a) The man of science who refuses to accept a miracle as an “act of God” cannot claim that his view is more scientific than that of the theologian who accepts it as such, for in each case the conclusions are based upon presuppositions which it does not fall within the sphere of science to criticize. Science deals only with phenomena and proximate causes, which in reality are not causes at all, only means or instruments, and it has nothing to do with ultimate causes, which belong to the sphere of metaphysics. (b) It also follows that the Biblical miracles, however well attested they may be, cannot be regarded as proofs either of the existence of God or of the divine character of the Christian revelation, because the acceptance of the Biblical miracles, i.e. the claims of God, is dependent not upon the evidence produced in their support as historical events, but upon our previous belief in God and in Christianity. We do not believe in Christ because we believe in the miracles, but we believe in the miracles because we first believe in Christ. The Christian who already believes in the Incarnation will find no difficulty in accepting the N.T. miracles as acts of God, provided the evidence in their support will justify their acceptance as historical events; but the unbeliever, though in view of the evidence he might accept them as historical, would not, because they were inexplicable, therefore attribute them to a spiritual cause in which he did not previously believe, or be convinced by them of the divine character of the Christian revelation which he had previously denied. This is the view of N.T.: “spiritual things must be spiritually discerned: neither will they be able to discern that which is spiritual, except through a spirit.” But though miracles cannot be regarded as proofs to an unbeliever, they are of some evidential value to the believer as providing corroborative if not demonstrative evidence. (4) The Christian Presuppositions. (a) Relation of God to the universe. The Christian conception of God holds a middle ground between Deism and Pantheism, neither of which, any more than materialism, really admits of miracles as special acts of God. The Deist regards God as entirely transcendent, altogether outside the world. The universe is viewed as a machine, automatic and self-regulating, made and set in motion by God and then left to do its own work. A miracle, then, is an interference with the laws of nature—as though God were suddenly to stop the machine, or set it working in a new way—and, on the deistic theory, is inconsistent with a belief in His omnipotence and omniscience, and attributes arbitrary if not irrational and irrational functionings to God as entirely immanent in and co-existent with the universe. For him, also, the universe is a mechanism; but while the Deist thinks of God as simply watching the working of His machine, the Pantheist thinks of Him as identical with the machine itself, and therefore as incapable of guiding or controlling it. The divine activity is limited to the order of nature, and cannot manifest itself independently of that order. Consequently, so far as miracles are concerned, Pantheism stands on precisely the same level as materialism; it is only “materialism grown sentimental.” But for the Christian, God is both transcendent and immanent. Self-existent behind and beyond the universe, He yet sustains and dwells within it; though manifested in the order of nature, He is not limited by it. His relation to the universe has been compared to that of spirit to matter in the human personality. The comparison must not be unduly pressed, but may serve to illustrate the Christian conception of the universe as an organism in which the divine mind is ever at work, as the human mind in the human body. As every action of ours owes its origin and its execution to the human will, acting through the material
organism, so in the universe every movement and every result is ultimately to be traced back to the operation of the Divine Will. What we term the operation of natural law, and the force behind them is His will. It is thus as much an act of God when the trees put forth their leaves in spring, as when the water was turned into wine at Cana of Galilee, the only difference being that in the case of the miracle God is departing from the customary method of His action as revealed in nature. Science, the sphere of which is the observation of phenomena, shows us that God's method is one of law and order, of evolution, gradual and almost insensible, by fixed and unchanging laws, by which His purpose is gradually realized; that there are no arbitrary interferences with these laws, and that, though He is ever at work, His hand is rarely prominently and unmistakably thrust before our eyes. Thus we speak of the uniformity of nature, which simply means that God acts in a uniform way. "The uniformity of nature is the will of God choosing to produce phenomena, and to produce them in a certain order. God is not free, certainly not desire, that it should be otherwise. If God did not act by uniform and ascertainable laws, we could have no real knowledge of nature, and the progress of civilization, in so far as it is due to man's knowledge of nature, is solely dependent upon this uniformity; it is impossible without a voluntary self-limitation on the part of God. This is where the difficulty of miracles lies. There must always be an improbability attaching to those phenomena which in the light of our present knowledge seem to imply that God is deviating from His normal course of action as revealed in nature, unless exceptional circumstances seem to demand this exceptional action. But, granted an adequate motive, the difficulty in great part disappears. Uniformity is not the only criterion of rational action, and there is no reason why we should deny to God what we allow to man. "To be tied to the normal and must suffer by deviation from exception. What is needed is to be mechanical, and not rational. It is the highest order of rational action, as we know it in the world, which is our best image of God's action, and not more mechanical uniformity. Thus the more fully we recognize in God the supremely free personality acting in the world, the more readily we shall be to accept the evidence for exceptional or abnormal action on God's part, when the situation demands it." (Gore, New Theology, pp. 112-113). And the Christian believes that there are times when something exceptional is needed. This leads to our second presupposition. (b) Relation of God to man. The Christian believes that the power behind the universe is not merely a Force, but a Person who is in touch with human spirits and human wills, and that man is made in God's image and destined for communion with Him. Hence a Revelation is the only probable form of God's action. The God who could not speak would not be rational, the God who would not speak would not be moral," but the revelation will need authentication. Now different ages demand different proofs, and the Bible shows plainly enough that when the revelation which it contains was given, proof of a certain sort was required. Among the Jewish people the power to perform miracles was universally believed to be the sign or proof that the prophet was the mouth of God. With us it is different. We find the proof of the inspiration of the prophet in the character of his teaching; the ancient world found it rather in the miracles which accompanied it. This provides an answer to the common argument that because "miracles do not happen" nowadays, it follows that they never did happen. We in one age "isolated signs" can be seen to be the most appropriate vehicle for conveying a divine message. In another age . . . corresponding lessons may come through the investigation of history, or of nature, which was impossible before. In each case God speaks to men as they can hear Him, and according to the knowledge which they have gained of Him." (Westcott). We do not ask for miracles, because we see the hand of God in the order of nature rather than in apparent deviations from it, and consequently we do not nowadays expect that miracles will happen. But in an age in which we can no longer expect any miracles would be given, because it is reasonable to suppose that God's self-revelation will be presented in such a form that its character is unmistakable. It now remains to consider the Biblical miracles in the light of these presuppositions, and, as has been said already, the question is how do we turn a vehicle of providence into a vehicle of reverence (5) Evidence. (a) As regards the O.T. miracles the evidence is of unequal value. The narratives are sometimes written long after the alleged events are supposed to have occurred, and the stories have been handed down by popular tradition, which is notoriously untrustworthy. In such cases the evidence scarcely justifies a literal acceptance of the miracle—e.g. the speaking of Balaam's ass, the standing still of the sun at Gibeon. In the books of Kings and the writing prophets the evidence is much more nearly contemporary, and though in the miracle stories of Elijah and Elisha we may, probably, find the isomorphism of the popular tradition which makes an insistence upon the detailed accuracy of the narratives impossible, it seems quite certain that the Heb. prophets, as a body, were endowed with exceptional powers, which they freely used to prove their divine commission. These powers would appear to be mainly dependent upon their unique knowledge of the Character, and so of the Will, of God, and consequently, as a rule, their miracles are of the nature of prophecy—the miracle consisting in the prediction rather than in the inexplicable character of the events—e.g. Miriam's prophecy of the death of Ahah, Isaiah's prophecy of the deliverance of Jerusalem from Sennacherib. Such incidents are miracles in the religious, if not the scientific sense of the word, and provide the prophet with his credentials. But there is more than this. The O.T. makes it clear that the history of the Jewish people and the God who has spoken is brought to an end unless we allow for special and repeated interventions of Providence in the great crises of national life. How far the details of the stories may be pressed is uncertain; how far more than a providential focussing of natural processes upon a particular point and for a particular
end" (Sunday) is implied, is not clear; but that the Jews were right in seeing the hand of God guiding and controlling the destiny of the nation, is indubitable. And if the hand of God can be seen in the development of the Church, much more is this true of the history of the Christian Church. The spread of Christianity in the 1st cent. is in the truest sense of the word "miraculous," even though it may to some extent be explained by the exceptional condition of the Greco-Roman world. (b) In dealing with the New Testament narratives we are on more certain ground, for here the evidence is frequently first-hand and always of considerable historical value. The genuineness of most of the Pauline epistles is universally admitted, and, this granted, it is quite clear that St. Paul believed he possessed, and was believed by others to possess, miraculous powers. We will take one illustration only—from 2 Corinthians.

St. Paul's defence of his apostolic authority in this epistle largely rests upon an appeal to the miracles he had performed during his visits to Corinth. "Truly the signs of an apostle were wrought among you in all patience, by signs, and wonders, and miracles, according to the works of the Gospels" (Ac. 16:16-18).

There must have been many among those to whom the epistle was addressed who remembered the incidents connected with St. Paul's visits, and, had there been no miracles, they could have contradicted his statement and so have invalidated his argument. This passage, too, shows clearly that all the miracles were regarded as "the credentials of an apostle," shows that from the very first the performance of miracles by the apostles was accepted as a "notorious and unquestioned fact." This conclusion is confirmed by the Acts, written by St. Luke, the companion of St. Paul. The performance of miracles is assumed throughout, and some of those recorded must have taken place in St. Luke's presence. Modern criticism has vindicated the honesty and general trustworthiness of St. Luke, and it is therefore quite certain that he believed that the apostles worked miracles. In the case of the Gospels, even if the miracles attributed to them are not attributed to the Gospels, the narratives are ultimately based upon the reports of eye-witnesses, and the miraculous element cannot be eliminated from them; their proved early date will not allow our regarding the miracle narratives as simply the legendary additions of a later age. Moreover we find, in the earliest apostolic preaching, constant appeal to the miracles of Christ as a proof of His divine commission (e.g. Ac. 2:22).

In view of the evidence it is undeniable that events which were believed to be miracles took place and played an important part in the development of Christianity. Nothing in history is more certain than that the apostles believed that Christ rose from the dead; yet it is difficult to see how this belief could have originated had it not been for the empty tomb; visions alone will not explain it. Nor, indeed, can we see how, apart from miracle, Jesus would ever have been accepted as Messiah, so little was the Jewish mind prepared by the Messianic expectations. And, that in all ages men have been led to accept Christ as Lord and God because of a belief in His miracles, is simply a matter of history. In view of these facts it is difficult for the Christian not to believe that the purpose which these miracles actually fulfilled was the purpose which was assigned to them in the divine economy. (6) Conclusions. What, then, have we come to briefly state? (1) Events which were believed to be miracles undoubtedly happened. (2) These events served the purpose of miracle, for they revealed the will of God and provided credentials for His appointed messengers. That is, the occurrence of miracles, in the religious sense, is amply-proved. And we need go no farther. It is the business of the man of science, not of the theologian, to ask how the events happened, whether, that is, they are also miracles in the scientific sense. Some of them, it would seem, can be fitted into the course of nature and scientifically explained. Possibly, if we allow for slight inaccuracies in the details of the stories, others also, as we understand more of the laws of nature, may be thus explained, but if we attribute to the Synoptic Gospels that historical value which modern criticism justifies, it would appear that there must always remain an inexplicable element; and even in the New Testament one would not materially affect the Christian position. It would simply mean that God, by His complete knowledge and control of natural laws, is able to reveal Himself and fulfill His purpose in the universe, without interference with those laws; that He controls nature by obeying her laws, but when He needs to, it would vindicate Augustine's definition "Portentum fit non contra naturam sed contra quam est nota natura" (De Civit. xxi. 8)—and show us that God so controls the laws He Himself has made that through them He may in each age speak to men as they are most capable of hearing Him. Primitive man demanded miracle, and he received miracle—or, at any rate, what he believed to be miracle, and what served the purpose of miracle, probably τερατα (wonders), certainly σημεια (signs).

Theol. Essays; Mill, Essays on Religion. [R.B.]

Miriam. It is noteworthy that this name (like Aaron and Phinehas—cf. also Moses) has no recognized Heb. etymology. It has been thought to be an Egyptian name; perhaps = meri-am, "the beloved of the home." —I. The sister of Aaron and Moses, and probably the eldest of the three. She first appears as watching her infant brother's cradle in the Nile, and suggesting her mother to a nurse (Ex.2:4ff.). In Num.12:1 she is placed before Aaron; and in Mi.6:4 reckoned as one of the three deliverers. She is called "the prophetess, the sister of Aaron," and she led the choir of women in the song of thanksgiving after the plagues of Egypt (Ex.15:20, 21). At Hazeroth Miriam took the lead with Aaron in the complaint against Moses for his marriage with a Cushite. "Hath Jehovah indeed spoken only by Moses? Hath He not spoken
also by us?" A stern rebuke was administered in front of the sacred tent to both offenders, but the chief punishment fell on Miriam, who "became leprous, white as snow." How great was her position, and how heavy the blow, is implied in the cry of anguish which goes up from both her brothers; and it is no less evident in the silent grief of the nation (Num. 12:1-16). According to Josephus (3.14. ii. 4), she was the wife of Hur, and grandmother of Bazaeeel. She died towards the close of the wanderings at Kadesh, and was buried there (20:1). It is of interest to note that in her name (Mapau, I.XX. and N.T.), as well as in her prophetic gift and her care for the safety of Israel, she is a type of the Virgin Mary. —2. A man (or woman) in the genealogy of Judah in 1 Chr. 4:17. [H.C.B.]

Mirma, a Benjamite, "chief of the fathers," son of Shaharaim by Hodesh (1 Chr. 8:16).

Mirror. Two words, mar'a (Ex. 38:8) and r'ith (Job 37:18), are rendered "looking glass" in A.V., but from the context evidently denote a mirror of polished metal. The Hebrew women on coming out of Egypt probably brought with them mirrors like those used by the Egyptians, made of a mixed metal, chiefly copper, and, says Sir G. Wilkinson (The, Eg. iii. 384), "susceptible of a hostage, which has even been partially revived at the present day, in some of those discovered at Thebes, though buried in the earth for many centuries. The mirror itself was nearly round, inserted into a handle of wood, stone, or metal, whose form varied according to the taste of the owner." The metal, being liable to rust and tarnish, required to be constantly kept bright (Wis. 7:26; Ecclus. 12:11). This was done by means of pounded pumice-stone, rubbed on with a sponge which was generally suspended from the mirror. The obscure image produced by a tarnished or imperfect mirror appears to be alluded to in 1 Cor. 13:12. The givonim (Is. 3:23), rendered "glasses" in A.V., after the Vulg. speculae, were hand-mirrors used by women.

Mithredath

MISHEAEL. —1. (1 Esd. 9:44) = Misheael, 2. —2. (Song 3 Chil. 66) = Misheael, 3.

Misgab, a place in Moab named with Nebo and Kiriathaim in the delusion of Jeremiah (49:1). It appears to be mentioned also in Josh. 13:18, though there rendered "high fort." The site is unknown. [C. R. C.]

Misheal, —1. One of the sons of Uzziel, the uncle of Aaron and Moses (Ex. 6:22). When Nadab and Abihu were struck dead for offering strange fire, Misheal and his brother Eleazar, at the command of Moses, removed with other articles "from the sanctuary, and buried them without the camp" (Lev. 10:4, 5). —2. One of those who stood at Ezra's left hand when he read the law to the people (Neh. 8:4). —3. One of Daniel's 3 companions in captivity, and of the blood-royal of Judah (Dan. 1:6, 7, 11, 19, 2:17). —4. [Mishal].

Mishal (Jos. 15:13), Mishael (Jos. 19:26, R.V. Mishal), a town of Asher. It is probably the Mashala of the list of Thothmes III. (No. 30) in 16th cent. B.C. There is a valley called Maïsheh, 8 miles N.E. of Accho, which may represent a corruption of this name. [C. R. C.]

Misham, a Benjamite, son of Elphael (1 Chr. 8:34).

Mishma, —1. A son of Ishmael and brother of Mihsam, 1 (Gen. 25:14; 1 Chr. 1:30). The Masamani of Ptolemy may represent the tribe of Mishma. —2. A Simeonite (1 Chr. 4:25).

Mishmannah, a Gadite warrior who joined David at Ziklag (1 Chr. 12:10).

Mishraddos, The, the fourth of the four "families of Kirjath-jearim," i.e. colonies proceeding therefrom and founding Zorah and Eshtal (1 Chr. 2:53).

Mispereh, one of those who returned with Zerubbabel from Babylon (Ne. 7:7).

Misrephoth-maim (the smelting places by the waters), Jos. 11:3, 15, 6), near Zidon. Probably the same as Zarephath, the N.T. Sarepta (Sirahend). [C. R. C.]

Mite (λεπτός), a copper coin, the least valuable of any that existed in Palestine (Mk. 12:41-44; Lu. 21:1-4), two of which were equal to a Parthing (σμαξανῆς). Some very small Jewish copper coins have been found, among them one belonging to Herod I., counterfeit of Agrippa II. (bearing the inscription χαλώνει: see Madden, Coins of the Jews, pp. 111, 146), and several pieces belonging to the time of Christ, which were issued by the different procurators. There is some justification for the belief that one or other of these coins represents the mite, for they were of extremely small value, bearing the inscription χαλώνει, when there is reason to believe that the λεπτός, being a denarius (i.e. about 3 of qdr.), as a rule, these coins of such small worth bore no inscription of value, but the χαλώνει is an exception. [w. o. e.]

Mithekah, the name of an unknown desert encampment of the Israelites, meaning, perhaps, "place of sweetness" (Num. 33:28, 29).

Mithnite, The, the designation in 1 Chr. 11:43 of Joshua of, one of David's guard. The LXX. has Lithianite or Matthianite. [R. H. G.]

Mithredath, or Mithridates. —1. The treasurer of Cyrus, king of Persia (Ezra 1.8; 1 Esd. 2:11). —2. One of the Persian officers at Samaria who persuaded Artaxerxes to hinder
the rebuilding of the temple (Ezr.4.7; 1Esd.2.16).

**Mitre.** [Crown; High-priest.]

Mitylene, the chief town of Lesbos, situated on the coast of the island. St. Paul stopped for the night between Assos and Cnos at Mitylene (Ac.20.14-15). It may be gathered from the circumstances of this voyage that the wind was blowing from the N.W.; and in the harbour or in the roadstead of Mitylene the ship would be sheltered from that wind. The town itself was mentioned in Roman times for the beauty of its buildings. In St. Paul's day it had the privileges of a free city. It is one of the few cities of the Aegean which have continued without intermission to flourish till the present day. It has given its name to the whole island, and is itself now called sometimes *Chios.*

**Mixed marriages.** The code of Deuteronomy, while it allows marriage with foreign women captured in war (Deut.20.14; 21.10-14), forbids marriage with the women of the Canaanite peoples under other circumstances (Deut.7.1; Jos.23.12). The motive of the prohibition is indicated in Deut.7.7 (Deut.34.15). Marriage with the heathen would lead to idolatry. It would appear from Judg.3.5ff. that mixed marriages with the Canaanite peoples occurred largely in the period of the Judges, and that idolatrous practices in fact followed. The prohibition of Deut. covers only the Canaanites and the married Israelite men with Moabite and Ammonite women, or again with Edomites and Egyptians, were not only practised but justified. After the return from the Captivity it appears that there had been much marrying with foreign women, presumably of the nations who had been brought into the Holy Land by the Assyrian and Chaldean conquerors, and these are described under a sort of formula as "the Canaanites, the Hittites, the Perizzites, the Jebusites, the Ammonites, the Moabites, the Egyptians, and the Amorites" (Ezr.9.1). Separation was called for in the case of all these marriages, and the provision of Ezra narrate a striking act of repudiation. Particular instances of mixed marriages may be noticed. Ruth, the Moabitess, finds a place in the line of David and of Christ (Nu.4.21; Mt.1.5). David married a daughter of the king of the Geshurites (2Sam.3.3). Solomon married a daughter of Pharaoh, and also princesses of Moab and Ammon (1K.11.1). Ahab married Jezebel, a Phoenician (1K.16.31). For Christian regulations as to marriages with non-Christians certain passages in N.T. are cited. Such marriages may be contemplated by St. Paul in 2Cor.6.14, "Be not unequally yoked together with unbelievers," where *épórhoων* seems to mean "yoked with a wrong fellow." The permission to widows to marry again "only in the Lord" (μόνον ἐν κυρίῳ, 1Cor.7.39) has been very generally understood to be equivalent to "only with a Christian." In Church history the marriage of baptized persons with the unbaptized came to be barred. In 1Cor.7.12-16, St. Paul considers the case of the converted partner in a marriage entered into before baptism. If the unconverted partner is "well content to abide" (συνενέδοκε ἀκείων), the Christian partner is counselled to maintain the union. "If the unbelieving depart (ὑποτάσσεται), let him depart (ὑποτάσσεται). A brother or a sister is not under bondage (δεδομένῳ) in such cases" (1Cor.7.15). Much here depends on the meaning of each of the two words δεδομένῳ and ὑποτάσσεται. The "bondage," would seem to apply not merely to living together, but to the *vinculum* of marriage. In that case the brother or the sister who is "not bound" is free to marry again. The verb ὑποτάσσεται is translated in E.V. by *depart,* and in Vulg. by *discedere* (Quod si infidelis discedat, discedat). But the Gk. commentators do not confine the word to the meaning of *departure.* St. Chrysostom comments: "But what does that mean? *Εἰ δὲ ο ἡπότασσεται* χωρίζεται. For instance, if he command thee to sacrifice, and to communicate with him in impiety by reason of the marriage, or to retire, it is better that the marriage rather than that piety should be torn asunder." Here the meaning of ὑποτάσσεται is taken as to cause to separate. If, then, the unbelieving partner give adequate cause for separation, one should appear that the believing partner is permitted to marry again. And in Christian history this concession, often spoken of as the Pauline privilege (privilegium Paulinum), has been commonly allowed. Selden, *De Juris Naturali et Gentium Juxta Disciplinam Ebraeorum* (1640); Watkins, *Holy Mothers of the East* (1895). [O. D. W.]

**Mixed multitude.** When the Israelites went up out of Egypt they were accompanied by a mixed multitude (Heb. *έκβαλλς, LXX. ἑπίστασθαι, Ex.12.38). This is in accordance with the tradition given by Manetho, that the Exodus of the Israelites was joined by some Egyptians. In Num.11.4 we are led to infer both in A.V., and strangely enough in R.V. also, that this non-Israelite element was the cause of the murmuring against Moses. The Heb., however, has a totally different word, which Tyndale, true to the spirit of the 16th cent., renders "the rascal people." The same word occurs in Ne.13.3, when all the "mixed multitude," or the foreign people were separated from them, when the people had heard the law about the admission of Ammonites and Moabites to the congregation. [F. J. P.-1]

**Mizar,** Hill (Ps.42.26). The word means "small," and is so rendered by the LXX. The verse (see R.V.) in Heb. may read: "I will remember Thee from the land of Jordan and Hermon, from the little hill," representing the lowest, highest, and intermediate regions of Palestine. [C. R. C.]

**Mizpah,** or Mizpeh (phot of view), a name applying to sites on heights, or to a "watch-tower."—1. **Mizpah of Gilead** (Gen.31.49; Judg.10.17; 11.11, 29, 34), a town by the Gilead, or "heap of witness," erected by Jacob and Laban. It was the home of Jephthah, where his daughter was sacrificed. It is perhaps the same as *Ramath-Mizpeh* (height of the view), near Betonim (the Baitein district), towards N. border of Gad. Judas Maccabaeus, in 164 b.c. "turned aside" to *Maspia* (*1Mac.5.35*) from *Bosora* (ver. 28), and proceeded thence to *Casphion*. The requirements are met by the position of the village of *Syl,* about 6 miles N. of *Gerasa,* and 30
MIZPAH

Mizpah, [Mizpah.]

Mizraim first occurs in O.T. in Gen.10.6, "The sons of Cush, and Mizraim, and Put, and Canaan." Again (Gen.10.13,14), "Mizraim begat Ludim, and Anamim, and Lehabim, and Naphtuhim, and Pathrusim, and Casluhim, (out of whom came Philistim,) and Caphtorim." The Vulg. gives "Mizraim genmit Ludim, et Anamim," etc. In Gen.10.12, however, where the Heb. has "mizraim, the Vulg. translates "descenditque Abram in Aegyptum," and in the same passage Mizraim becomes in A.V. Egypt, which use is afterwards always followed. Thus the name Egypt becomes the usual equivalent for the Heb. mizraim. The origin of the name is exceedingly obscure. It has been thought that the use of the two words mādor and mizraim, the latter being presumed to express the dual, refers to the two districts of Upper and Lower Egypt, which are divisions of extreme antiquity. Yet this explanation fails if, as now generally asserted, Mizraim designates a dual. mādor has been variously interpreted to mean "a fort," "a mound," "a bulwark," or, as is also suggested, "distress." There is no great helpfulness in these derivations. Probably a nearer suggestion may be Misr, as in the cuneiform texts. Misr, translated "red earth," may, however, be a corrupt reading. The clue to the blue of the mother of the blue of the blue is, however, impossible. It is the blue that is the clue as corresponding to the old word kem or kim, indicating darkness of colour. Herodotus and Plutarch connect the word with the dark-coloured sandy red land of the desert. Another poetic name for Egypt is "the land of Ham" (Ps.105.23,27). It has been alleged that the word kem or kim cannot be connected with the name Ham. Yet, on the other hand, it is advanced that the chief priapic Egyptian deity was named Men, or sometimes Khem. This Kem might correspond to the progenitor of Ham. The social and distinctive features of the worship of Men or Kem approximated to what is recorded in Gen.9.20-24. Mizraim indicates a land whence great hordes of migrants went forth to people other regions (Gen.10.13,14), even as Ham, the descendant of Noah, was the founder of the four nations of which the Mizraites were one (Gen.10.15). Mizrah, a "duke" of Edom; son of Renel; and descended from both Edom and Ishmael (Gen.36.13,17; 1 Chr.1.37).

Mnason, described as "an early disciple" (Acts.21.16), possibly implying that his conversion dated from Pentecost. St. Paul lodged with him when visiting Jerusalem for the last time. Mnason, like Barnabas, was a native of Cyprus. [A.C.D.]

Moaib. Though this name, given to the son of Lot's eldest daughter, the progenitor of the Moabites, is often supposed to mean "that which comes from a father," [Gen.19.12], no support is given to the idea by the narrative in the passage cited. As a geographical term mū'ābbh appears to mean a "wide tract," which applies to the general character of the region. Moab extended N. and S. from Jazer to the brook Zered, a distance of about 55 miles. On the
MOAB

W. it was bounded by the whole length of the Dead Sea, and by the lower Jordan as far N. as Nimrah. On the E. it merged into the Syrian desert of Midian; but the old trade route, 30 miles E. of Jordan, may be regarded as the boundary. The area was thus about 1,600 square miles, divided into N. and S. districts by the Arnon River, 25 miles S. of Jazer. At the time of the Heb. conquest the Moabites had been driven into the S. district, the better lands N. of the Arnon having been conquered by the Amorites (Num.21.13). Moab contained four natural regions, which have distinct names in O.T. The Jordan Valley near the Dead Sea— with a width of 5 miles—constituted the 'árabbāh of Moab [Arabah], rendered "plains" in A.V. (Num.22.1,26-36,31.12,33.48,49,50,35.1,36.13; Deut.34.1,8; Jos.13.32), these being at a level of 1,000 ft. or more below the Mediterranean. E. of the Dead Sea the steep slopes and precipices rise to a hilly plateau 2,500 feet higher than the lake, and 5,000 ft. above, answering to the similar step called the Jeshimon on W. of the Dead Sea. This desert region is perhaps described by the peculiar term "mount of the valley" (Heb. 'arab ́śān). It is again the mountain spurs run out from the plateau above them, which has an average level 1,500 ft. higher, or 2,700 ft. above the Mediterranean. This plateau is the "field [ṣādāh] of Moab" (Gen.36.35), rendered also "country" in A.V. (Num.21.20; Rev.1.12,6.22,2.6,4.3; 1Chr.5.8), the word occurring also generally in past tense [FIELD]. This region is moreover described as the mishōr, or "plateau," of Medeba (Deut.3.10; Jos.13.9,16,17). The fourth region was the "wilderness of Moab" (mīdḥāhār), including the barren lands between the Arnon and the brook Zered, through which Israel passed to reach Edom (Deut.2.18). The lower slopes—as in Gilead—are composed of Nubian sandstone (Green-sand period), above which lies a hard limestone; while the plateau consists of soft porous Eocene limestone. Hence the springs all issue on the W. slopes, some 300 ft. below the plateau, which have therefore a more abundant supply of water and are better fitted for the growth of corn; and in spring it is covered with grass, supporting large herds of camels, and a few goats. The hillsides are very bare and rocky, with scattered bushes of the white broom (Heb. rōχaš, Arab. retm), the "juniper" of the A.V. The streams at Heshbon, Baal-meōs, and Calahrohe (Zerqa-Mā'āin) are perennial, and flow with the Arnon and Zered brooks into the Jordan and the Dead Sea. Though now inhabited by nomads, the ruins show that Moab had a settled population down to c. 700 A.D., and remains of wine-presses at Sèheram prove the culture of the vine. The pasture still grows in the gorges near the Dead Sea (especially in the Zerqa-Mā'āin ravine). The lion is no longer found (see Is.15.5), but the wild ass and the oryx, known to Job, still range in the desert to the E., with the addax and the bubale antelopes—the latter called the Buqar el Wāshīk, or "wild cow," by the Arabs—the gazelle, the gazelle-pal, and the oryx, or Wild Bull, of the O.T. (See Tristram, Nat. Hist. of Bible, pp. 57, 126.)— Inhabitants. The original inhabitants, called E̱mīms (supposed to mean "frightful," Deut.2.11), were succeeded by the descendants of Lot, who were cousins of the Hebrews, a relationship fully acknowledged down to David's time. Hebrews and Moabites intermarried at times (Ru.1.; 2Chr.24.26), though the law forbade the adoption of any Moabite into the congregation of Israel, even in the tenth generation (Deut.33.3), or, as understood in later times, "for ever" (Ne.13.1). By the time of Nehemiah, however, the Moabite population was mingled with both Jewish and Nabatæan elements. Solomon had married Moabite wives (1K.11.), and many of a Hebrews who fled to Moab after 588 B.C. (Je.40.11) had also married there (Ezr.9.1; Ne.13.23), to the horror of their stricter brethren. The language of Moab in 9th cent. B.C. is known to us, from the Moabite Stone, to have been a dialect closely akin to Hebrew, but with some Aram. affinities.— Semitic Languages. It probably, however—like the Canaanite—included a few old words borrowed from the Akkadian: for 'Astar, the name of a deity on the Moabite Stone, is the Akkadian Istar (light-maker) for a river. (A.V. Land.) It also seems to be peculiarly Moabite, and occurs on the Moabite Stone with the same meaning; yet it has no evident Semitic derivation, but might be the Akkadian Ar-aš, a "fierce" or "brave" man. Substantially, however, Moabite was a language of the Heb. group, and hence we find no mention of any different dialects in a land occupying one and the same area as Hebrews and Moabites, Ammonites, Edomites, or even Amorites.— History. Moab is mentioned in 60 chapters of O.T. and Moabites in 10 chapters, yet the historic episodes are few. The defeat of Midian, on the plateau of Moab, by Hadad, king of Edom, is the event first mentioned, but it probably occurred after Joshua's time (Gen.36.35). In 15th cent. B.C. the Hebrews found king Balak ruling Midian and Moab, between Edom and the Amorites; and after the defeat of the latter, Israel descended to the 'árabbah of Moab before attacking Gilead, and before the Rohbensites were conquered by Jehoshaphat, 8th cent. B.C. Khemmis, the father of Arnon, as a fine pasture region. Under this king, the Moabites and Midianites were organized under "princes," or "chiefs" (sārīm, Num.22.8,23.6,17), and elders (22.7). Israel respected the actual possessions of Moab, but finally took possession of the N. district, conquered by Seso the Amorite perhaps only a few years before the Heb. invasion. [DAMASCUS.] King Balak, however, when the Amorites were destroyed, and Israel had passed on, seems to have claimed the old N. province even as far as Neso, though O.T. confines his rights to the region round Ar (A.V. a city, Num.22.36; see Deut.2.9), between Arnon and Zered: for, with Balaaam, he looked down on the Heb. tents from the heights to the S.E. (Num.22.4,13,34,1,428). Moabite idolatry corrupted the Hebrews, through the influence of Moabite and Midianite women, even under Moses (Num.25.1-6); but the extermination of the Midianites by the Moabites, after the colonization of Moab by Reuben (32.37-38) from Arnon to Jazer (Jos.13.15-25). The
Moabites remained enemies of Israel hereafter, and about a century later Edom, king of Moab, ruled even in Jericho for 18 years (Judg. 3:12-30), by aid of the kindred Ammonites and Moabites. A later king of Moab (probably S. of Arnon) was friendly towards Edom (2Sam. 14:4), perhaps on account of his ancestry Ruth the Moabitess (Ruth 4:11). 2Kings 3:19, 22; but in later years David snatched Moab, which became tributary (2Sam. 8:2, 12). Ahab (and Omri his father, according to the Moabitic Stone) ruled Moab, exacting tribute of sheep, but king Mesha rebelled and succeeded to Ahab's death (2K. 1.1; 2.4, 5), for the attack on Kiriath-sepher from the S., by the kings of Judah, Israel, and Edom, failed (3:6-27), though the towns of Moab were destroyed. Perhaps, even before Ahab's death, the Moabites and Ammonites attacked Judah from the S.E., and were defeated near Tekoa (2Chr. 20:1-18). Moabites continued to caravans to W. of Jordan yet later (3K. 13:20), and aided the Babylonians against Jerusalem (24:2). At some early period, perhaps in David's time, men of Choseba dominated Moab (1Chr. 4:22), and Benjaminites spread over the south, perhaps in 8th cent. The final triumph is recorded in the Psalms (60:8-10). The tribe of Judah comprised the majority of the population of Moab, which seems to have been nomadic, with Assyria (83:5-8), probably dated after 724 B.C., when the Heb. tribes E. of Jordan were carried captive by Tiglath-pileser. 3Kings 15:29, 15:25. Isaiah, a few years later (15:1-9), speaks of the fall of Moab and Judah, and mentions nineteen cities, of which are mentioned on the Moabite Stone a cent. and a half earlier. The ruin of the country was lamented at its shrines by Moabites, who shed head and beard as a sign of woe (23:3). They fled again over Arnon (16:2), and the "pride of Moab" was crushed (ver. 4). Jeremiah, who speaks of a "king" of Moab as late as 600 B.C. (Jer. 27:3), predicts that the Moabites will drink of the cup of wrath with others (25:21; see 9:26). He appears to paraphrase not only the older prophecy of Isaiah (2K. 18:1-16; cf. 1K. 15:16), but even with the cup of the Assyrian大国 (1K. 18:8-20; Num. 21:29; 2K. 25:29; 25:45, 46); Num. 21:28, 29); predicting a restoration of Moabite captives (1K. 29:47), which Cyrus may have allowed. Ezekiel (25:8-11) predicts troubles for the hated Moabites, who had said that Judah is like any other nation. Daniel (11:41) speaks of Antiochus Epiphanes in Moab. The elder prophets (Amos 2:1; Mi. 6:5; Zeph. 2:8) refer to its past history. Ezra refers to a "governor" of Moab (Ezra 2:6, 8; 6:4; Ne. 3:11), using a word of official signification among the Hebrews (pehr). In later times the name of Moab occurs only in Judith (1:12), the population being included in the Nabatean kingdom. [NABATEANS.] In Roman times, and under the early Khalifs of Damascus (whose buildings at Rabbath-Amon, and at Maathitha the "winter-house" in Moab itself, remain in ruins), the plateau of Moab still supported a considerable settled population. [HESATOR.] In the Middle Ages the region was mainly pastoral, and after the 13th cent. was entirely given over to invading Arabs from the Hejaz, fresh tribes having arrived thence only a few centuries ago.—Monumental Notices. The earliest Moabitic monumental record is that of king Mesha (Dibon), written perhaps after Ahab's death, but silent as to the troubles that followed. He relates (c. 888 B.C.) that he succeeded his father Chemosh-nadk, who ruled for 30 years, when Omri seized Medeba, which Ahab held for half his reign—"for Chemosh was wroth with the land." Mesha recovered it, and built up Baal-meon and Kerithai. He took Ataroth, which "men of Gad," held "from of old" (2K. Num. 32:4), and made the king of Israel had built up. He slaughtered the inhabitants in the sight of Chemosh and Moab, and took the champion (ard) Dedah, and dragged him before Chemosh in Kerithoth. He took captive the people of the plain (aron), and slew 7,000 persons in the town of Necho (Judg. 3:12), and sacrificed to Chemosh. Here also he carried off the confederacy (ard) of Jehovah, and dragged them before Chemosh. He took Jazah from Israel, and annexed it to Dibon. He fortified Qirah (Cities), and made earaparts there as a defence against Israel. He rebuilt Arroth, and the ascent at Arnon, with Bamoth-naddi, which was Naba that he subdued, and added to Moab. Finally, he went down and fought at Horeb. This single monument thus includes the names of 12 places in Moab noticed in O.T., and the succession of the names shows a gradual spread of Moabite power from Dibon northwards. Within two cents., however, Moab disappeared as a subject of Assyria, and 734 B.C. the king of Assyria, and became the base of operations against Edom and Arabia. In 727 B.C. the same conqueror mentions Solomon of Moab (Saltamani) as a tributary. Seennacherib speaks of Qass-nadhi (otherwise read Kasm-nadhi), king of Moab, as a tributary, and Esarhaddon of Nineveh makes Moab his tributary, with its capital at Eznab (3K. 18:24). The later monuments—Gk., Rom., and Nabatean—are noticed under the names of towns, but are of small importance. Nabatean texts occur at Beth-gamul and elsewhere, and Christian remains especially at Medeba.—Religion. The Moabites are called the people of Chemosh (Num. 21:29; 2K. 18:6), a deity whose name has no recognized Semitic derivation, though occurring on the Moabite Stone. In Assyris texts it is spelt Qim-ns, which as an Akkadian word would mean Lord of Conquest. The Moabites also worshipped Baal-phon, a licentious deity, and a third deity (Ashat) is coupled with Chemosh, in the title Astar-Chemosh, on the Moabite Stone. Whether female (like Ashethoreth), or male (like the Arab Ashtar, this deity also was of Akkadian origin. The three may have formed a triad—father, mother, and son—in the same way as elsewhere. In the Middle Ages the region was mainly pastoral, and after the 13th cent. was entirely given over to invading Arabs from the Hejaz, fresh tribes
of sacrificing the firstborn son in times of trouble, was also practised in Moab (2K.3.27). Mesha’s account agrees in making Chemosh the chief god, and in recording extensive slaughters of women and children, as well as of men in his house. He includes dolmens. In addition to the monuments already noticed, Moab is remarkable for the number of rude stone structures which occur on the hill slopes, and in the vicinity of the Jordan Valley (as described in detail, Surv. E. Pal. pp. 11, 98-100, 125-133, 159-171, 184-190, 198-203, 226, 227, 229-236, 253-274, 277). They include dolmens, like those of Britain, varying from little monuments a few inches high to others under which a man may stand. Of these as many as 150 are found on a single hill slope. They are accompanied by standing stones, and stone circles varying from 20 ft. to 200 ft. in diameter. The most remarkable is the circle of el Mearighid (Surv. p. 187), 12 miles S. of Heshbon, where three rude pillars (6 ft. high) stand on a knoll, in a circle 300 ft. in diameter. There can be no doubt that these stones were sacred, like those still erected by Indian hill tribes in circles. This circle has also a moon pool in its centre. On Moab these dolmens are often marked on the capstone with cup-hollows, and channels for libations. This monument may explain the allusion to a place called ‘Eglath-sheshilahiyah (R.V. Is.15.5; Je. 48.34), noticed with Zoaar and Horonomim. The A.V. follows the LXX. in rendering the word as ‘Hezekiah’ in this place, which makes no sense at all. Probably it means ‘the round place of the triad,’ or a circle with three erect stones representing three deities [GEZER] for the passages refer to Moabite worship. Such a circle occurs at el Mearighid, and a small one, 22 ft. in diameter, with fallen central stones, was found not far from Zoaar, at Tell el Mat’alib’a (Surv. E. Pal. ii. 233). [C.R.C.]

**MOADIAH** (Ne.12.17) = **MOADIAH**.

**MOCHMUR**, **Brook** (Jth.7.18), near Chusî (Kûzah) and Ekerelî (‘Aqrahû). This is apparently the great valley Wady el Hunr, which rises N. of ‘Aqrahû, and runs into the Jordan. [C.R.C.]

**MODIN** (Mo’dîn, Mo’dîtîn, Mo’dîelah), the home of the Hasmonean family, where the great revolt of 168 b.c. began, and where Mattathias, father of Judas Maccabaeus, was buried (1Mac.2.15,23,70), and afterwards Judas himself (9.19) and his brother Jonathan (13.25-30) ; over whom Simon—the second of the five brethren—built a monument of hewn stone, raised above the surface, with seven pyramids for the father, mother, and five sons. It had “designs” on great stelaí, representing “panoplies” and “ships,” the monument being visible from the sea. Thus the adornment did not break the law against the representation of living beings. Simon camped at Modin when—after 140 b.c.—he was about to meet the Gks. “in the plain,” near Cedron (Qatrah)—see 16.,5,9; 2Mac.13.14. Josephus repeats this account 12 Ant. vi. 1, 2, xi. 2, 13 Ant. vi. 6). Eusebius and Jerome (Onomasticon), in 4th cent. A.D., place “Modimin near Jerusalem,” and Jerome (Pesakhim ix. 2) as a long distance from Jerusalem, which is explained (Tal. Bah. Pesakh. 3b) to mean 15 miles; while from another passage (Hagigah iii. 5) it appears that Modai‘ath was near the borders of Judaea and Samaria. The true site (Guerin) is the village el Midîh, on a hill spur 17 miles from Jerusalem, 6 miles N. of Lydda. These are called Mo’dishôn (Surv. W. Pal. ii. pp. 297, 298, 347-352). On a hill to W. there are Christian tombs, and remains of a tesselated pavement with a cross on it. The mound may cover the monument of Simon; and Jerome states that the “tombs of the Maccabees” were visible in his time. They were, however, shown later at quite another site, 7 miles S., near Lâfurôn, which is not “near Lydda,” as the Onomasticon states; and even at Sôba (Belmont), only 6 miles W. of Jerusalem, in 13th cent. A.D. [C.R.C.]

**Mo‘eth.** In rEsd.8.63, “Moeth the son of Sabbah” takes the place of “MOADIAH the son of Binnul” (Exz.8.33).

**Moladah** (= birthplace; Jos.15.26,19.2 ; rChr.4.28 ; Ne.11.26), a town of Judah in the far S. It was given up to Simeon, and then abandoned, on the Mournful Boundaries of David’s time, but re-inhabited by men of Judah after the Captivity. The site is unknown, for the Malath of the Onomasticon (Tell el Midih) appears to have been really the “city of salt.” [SALT.] [C.R.C.]

**Mole.** Two words are thus translated. (1) *tinschameth*: This occurs in the honorific title of unclean birds in Lev.11.18, Deut.14.16 (A.V. swan), and in Lev.11.30 (A.V. mole). There seems considerable probability that *tinschameth* refers to the Chameleon. (2) *l̷j̷m̷^h̷r̷ o̷̷r̷h̷o̷r̷h̷, rendered “moles” by the A.V. in Is.2.20. Although this word clearly indicates some kind of burrowing creature, nothing definite can be medicated as to its nature. Apparently true moles (Talpa) are absent from Syria and Palestine; and even if such were present, they do not haunt ruins, which were the resorts of the animal referred to. It has accordingly been suggested that one of the species of mole-rats (Mm.6; Spalax typhlus of E. Europe and Egypt, may be the animal intended. These mole-rats, which are members of the rodent order, and are stated to burrow at times under rubbish heaps, are blind, grey animals of the size of a rat, with curiously flattened heads and rudimentary tails. [Wk.aseil.] [R.E.]

**Molech.** This deity is the same (cf. rK.11.7 with ver. 5) as Milcom, Malcam, and the Mo’olah of the LXX. (once erroneously so spelled in A.V. in Am.5.26, and hence in Ac.7.43). *molekh* in Heb. has always the article prefixed, and should be read hammelekh, literally “the king.” The change of the vowels into those of *bôshekh* (shake; cf. rChr.5.34; with 2Sam.4.4, Meribaal = Mephiboseth) is due to Jewish objection to pronounce idol-names (cf. Ex.23.13b). Molech is the Malku (king) of the Assyry texts. A tablet (K. 2100) in the British Museum states that Malku was, among the Shuhabites on the banks of the Euphrates. Malku (Mamedu) or Maida (Rimmon), god of the atmosphere, and hence of the storm. Though Malku occurs as
an element in Babylonian personal names c. 2000 B.C., his worshippers seem even then to be of Canaanite or Syrian descent, and a Canaanite king Uru-Malik is mentioned by Naram-Sin, 3500 B.C. His worship is therefore very ancient in Palestine, where he probably represented the rain-god, as he was adored in Babylonia, where he is the 2nd member of the triad Šamaš, Malik, Bunācē, the latter becoming his consort there. The god Molech was the chief deity of Amnon, as Chemosh was of Moab. The form Milcon (mitkōm) is the word melek̄ with the minimation, this termination (properly -um, as in Assyr.) marking the nominative of a verb. As a name it is found in the older language, just as ḫu in yomām does the old accusative. "Malcam" (malkōm) in Je.49.13, Am.1.15. Zeph.1.5, though the rendering "their king" is supported by the Targum and Qimhi (Kimchi), is a mistake for Milcon, as Rashi perceived, the misspelling being occasioned by misundertaking his serialization. While 1K.11.33 and 2K.23.13 makes the latter clear. It was Milcom's and not "their king's" crown that weighed a talent (2Sam. 12.30; 1Chr.20.2). Molech is first mentioned in Lev.18.21, where the Israelites are warned not to imitate the Canaanite practice of burning their children as offerings to him. Alas, Ezr.1.2 says that children were passed "over" the fire, and that some survived and others died; Rashi that they passed between two burning piles of wood. That they were actually burned is clear from Deut.12.31, Ps.106.37-38, Je.7.31, 19.5; and this became customary among the Israelites idolatry at Samaria. Topher was formally noted for this terrible rite. Similar scenes marked the cultus of Chemosh in Moab and Baal at Tyre and elsewhere. Qimhi's detailed description of the idol and worship of Molech at Topher (comm. on 2K.23.10) is unreliable. It is probable that the children were placed in the fire as a way of illustrating the burning of the sun-god (Molech), fire being his most natural emblem. The offering was propitiatory, as human sacrifices seem everywhere to have been. But these and other "abominations" necessitated the extermination of the Canaanites (Deut.12.31), and afterwards the captivity of Judah (Je.22.18). It is certain that it is represented on Inscriptions of Western Asia; Pinches's O.T. in Light of Hist. Records of Assy. and Bab.; Sayce's Rel. of Anc. Egypt and Babylonia, and his Hibbert Lectures: Hommel's Die altisraelische Überlieferung; Swete's ed. of the LXX.; G. Hoffmann in Zeitschrift fur alttest. Wissensch., vol. iii.; Targum, Qimhi, and in his Snith lectures, Baker's [W.S.C.T.]

Mo'li (1Esd.8.42) = Mollih. 1.
Mold', son of Abishur by his wife Abihail, and descendant of Jerahmeel (1Chr.2.25).

Molech ("Tubarcu of your Molech" in Am.5.26) is a mistranslation of the Heb. words sikkuth malke'khom, rightly rendered "Sikkuth your King" in the text. [REPHAIN.] The term Molech instead of the usual Molech is borrowed from the LXX. Mo'Vex in this passage and in Ac.7.13 only. [W.S.C.T.]

Mom'dis (1Esd.9.34) = Maadal. 1.

Money. 1. Uncoin'd Money. Ancient nations that were without a coinage weighed the precious metals, a practice represented on the Egyptian monuments, where we see that gold and silver were kept in the form of rings. The gold rings found in Celtic countries have been held to have had the same use. We have no certain record of the use of ring-money or other uncoined money in antiquity excepting that of the Egyptians. There is a distinct mention of coined money in the books of O.T. before the return from Babylon. Abimelech gave Abraham "a thousand [pieces] of silver" (Gen.20.16). [Piece of Silver.] For Gen.23.3,6,16,33,51.10, see Weights. Throughout the history of Joseph we constantly find money used in preference to barter (Gen.43.21,47.13-16). At the time of the Exodus money seems to have been still weighed (Ex.30.13). Here the shekel is evidently a weight, of which the standard examples were probably kept by the priests. Balances and weights were carried in a bag (Deut.25.13-16; Pr.16.11; Is.46.6). Throughout the Law money is spoken of either in connection with the giving of money, gold being mentioned as valuable, but not clearly as used in the same manner. We find no evidence in the Bible of the use of coined money by the Jews before the time of Ezra.—II. Coined Money. (1) The Antiquity of Coined Money. Respecting the origin of coinage there are two accounts seeming at variance: Some saying that Phidon king of Argos first struck money, and according to Ephorus, in Aegina (Strabo, viii. 6); while Herodotus (i. 94) ascribes its invention to the Lydians. The former statement probably refers to the origin of the coinage of European Greece, and the latter to Asiatic Greece. On the whole, it seems reasonable to carry up Gk. coinage to the 8th cent. n.c. (2) Coined Money mentioned in the Bible. The earliest mention of coins in the Bible refers to Persian money. In Ezr.2.69.8.27 and Ne.7.70-72 current gold coins are spoken of under the name dar'moonim, which only occurs in the plural, and appears to correspond to the Daric. The Apocrypha contains the earliest distinct allusion to the coinage of Jewish money, where we read (1Mac.15.6) that Antiochus VII. granted to Simon permission to coin money with his own stamp. This was in the fourth year of Simon's reign, and the coinage of darim, or darics, and probably the coined shekel is about 220 grs. troy. The Shekel corresponds almost exactly to the tetradrachm or drachm of the earlier Phoenician talent in use under Persian rule, and, after Alexander's time, at Tyre, Sidon, and Berytus, as well as in Egypt. It is represented in the LXX. by drachma. The fabric of the earliest Jewish silver coin is so different from that of any other ancient money, that it is extremely unsafe to base any argument on it alone, as the cases of other special classes, e.g. the ancient money of Cyprus, have shown. Some have been disposed to consider that it proves that these coins cannot be later than the time of Nehemiah, others will not admit it to be later than Alexander's time, while some still hold that it is not too archaic for the Macedonian period. The inscriptions of these coins, and all the other Heb. inscriptions of Jewish coins, are in the old character of Israel. Their existence would indicate a period of Jewish freedom from
Persian Gold Daric (1 Chr. 29.7, etc., R.V.).

Jerusalem Silver Shekel.

Silver Half Shekel.

Silver Tetradrachm of Antioch; = “Piece of Money” 
(Slater, Mt. 24.27).

Silver Denarius (“Penny”; Mt. 20.2) of Tiberius.

Copper Assarion (Mt. 10.29; Lu. 12.6).

Copper ‘Farthing’ (Mk. 12.42) of Pontius Pilate.

Coin of Titus, commemorating the Capture of Jerusalem.

p. 558]  MONEY.  (Brit. Mus.)
Gk. influence, and the use of an era dating from its commencement. The old explanation of the meaning of the types of the shekels and half-shekels, that they represent the pot of manna and Aaron's rod that budded, seems remarkably consistent with the inscriptions and with what we should expect. Cavedoni has suggested that the one type is simply a vase of the temple, and the other a lily, arguing that the pot of manna had a cover, which this vase has not. The copper coins form an important guide in judging of the age of the silver, as they undoubtedly belong to the same age. We thus find that (i) the shekels, half-shekels, and corresponding copper coins, may be on the evidence of fabric and inscriptions of any age from Alexander's time until the earlier period of the Maccabees. (ii) They must belong to a time when Gk. influence was excluded. (iii) They date from an era of Jewish independence. Gk. influence, by the ancient appearance of the silver coins, and disregarding the difference in style of the copper, has conjectured that the whole class was struck at some early period of prosperity, such as the pontificate of Jaddua, and he supposes them to have been first issued when Alexander granted great privileges to the Jewish nation, but there are many difficulties in the way of this supposition. The basis we have laid down is in entire accordance with the old theory, that this class of coins was issued by Simon the Hasmonaean (Maccabee). The small copper coins have for the main part of their reverse-type a Gk. symbol, the united cornua copiae, and there are many coins with a peculiar form of Gk. influence. Is it possible that Judas Maccabaeus, the restorer of the Jewish worship, and the sworn enemy of all heathen customs, could have struck money with a type derived from the heathen? The use of such a type seems rather to point to the time when prosperity had corrupted the Hallot family, and Gk. usages were once more powerful. This period may be considered to commence in the rule of John Hyrcanus. Thus M. de Sauley's attributions before John Hyrcanus seem extremely doubtful. On these and other grounds we maintain Bayer's opinion that John Hyrcanus was the first Jewish king to which we ascribe the coins of Jonathan the high-priest to Alexander Jannaeus, and propose the following arrangement of the known money of the princes of the period under consideration: John Hyrcanus, 135-106 B.C. — Copper coins, with Heb. inscription, "John the high-priest": on some a Gk. A. marking alliance with Antiochus VII., Sidetes. — Judas-Aristobulus and Antigonus, 166-105 B.C. (probable attribution) — Copper coins with Heb. inscription, "Judas the high [?] priest." — Alexander Jannaeus, 105-78 B.C. First coinage: copper coins with bilingual inscriptions—Gk. "Alexander the king"; Heb., "Jonathan the king." Second coinage: copper coins with Heb. inscription, "Jonathan the high-priest"; and copper coins with Gk. inscription, "Alexander the king." (The assigning of these latter two to the same ruler is confirmed by the occurrence of Heb. coins of "Judas the king, which there is good reason to attribute to one and the same person.) — Alexander, 78-69 B.C. The coin assigned to Alexander by M. de Sauley may be of this sovereign, but those of Alexander Jannaeus are so frequently blundered that we are not certain that it was not struck by himself. Hypercaneus II., 66-65 B.C. (no coins). Aristobulus II., 66-65 B.C. (no coins). Hyrcanus restored, 63-57 B.C. (no coins). Antigonus, 57-47 B.C. (no coins). Aristobulus II. and Alexander II., 49 B.C. (no coins). Hyrcanus again, 47-40 B.C. (no coins). Antigonus, 40-37 B.C.—Copper coins with bilingual inscriptions. It is not necessary to describe in detail the money of the time commencing with the reign of Herod and closing under Hadrian. The money of Herod is abundant, but of inferior interest to the earlier coinage, from its generally having a thoroughly Gk. character. It is of copper only, and seems to have been formed of three different types: (i) The coins of Gk. influence, present no remarkable peculiarities. There are several passages in the Gospels which throw light upon the coinage of the time. When the twelve were sent forth, our Lord thus commanded them, "Provide neither gold, nor silver, nor brass in your purses; (lit. gridles), Mt.10.9. In the parallel passage in Luke, "Neither be ye like to the TXennary, The only coin alone is mentioned for the money, the Palestinian currency being mainly of this metal, although silver was coined by some cities of Phoenicia and Syria, and gold and silver Roman money was also in use. St. Luke, however, uses the term "money" (9.3), which may be accounted for by his less Hebrew style. The coins mentioned by the Evangelists are the following: First, of silver: the stater is spoken of in the account of the miracle of the tribute-money. The receivers of dirhamae demanded the tribute, but St. Peter found in the fish a stater, which he paid for our Lord and himself (Mt.17.24). Second, of brass or copper, as Simon was commanded to make by the Gk. influence, and thus the coinage of the time was formed of two classes, which were clearly the denarius, or Roman penny, as well as the Gk. drachm, then of about the same weight, are spoken of as current coins (Mt.22.15-21; Ln.20.19-23). Of copper coins the farthing and its half, the mite, are spoken of, and these probably formed the chief native currency. The proper Jewish series closes with the money of the Roman emperor, who headed the revolt in the time of Hadrian. His most important coins are shekels; but for the opposite view, seeWeights, Coins.

Money-changers. There are 3 names in N.T. for the money-changer: καρπατησις (Jn. 2.14), κολυμβησις (Mt.21.12; Mk.11.15; Jn.2.15), τραπεζις (Mt.26.27). Their interest from
the N.T. point of view is that they exchanged money of all kinds into that which was lawful for the temple. Every adult Jew (male) had to pay annually the half-shekel or didrachm for the maintenance of the temple servants, etc. of the temple. In the vast majority of cases, the Jewish banker was not paid in gold, but exchanged other coin for the half-shekel. Jews came from all parts of the civilized world to Jerusalem, so that there was, at the time of the feasts especially, a constant demand for the half-shekel. The practice of the money-changers sitting in the Court of the Gentiles—i.e., without the temple proper—had legally grown up, and the disputes incidental to changing money must have been most unsuited there; besides, the temptation to be dishonest, with which the money-changer was constantly confronted, was evidently not always resisted (Mt. 21:13, etc.). [w.o.e.o.]

**MONTHS**

The Hebrew word rendered "month" are (1) דְּבָכָשׁ = new moon, and (2) יֵרָח, of doubtful etymology (Aram. yerah, "new moon"). The Heb. month, like that of the Babylonians and other ancients [Year], was lunar, and commenced in the evening with the appearance of the new moon. Since the moon passes through all her phases in 29 days, 12 hours, 793 parts (i.e. of an hour of 1,080 parts), the month was either 29 or 30 days. In the flood story 150 days are equal to five months (Gen.7.11, 12, 8, 4), and the 30 days of mourning (Deut.34.8) are said to be a month (21.13). The Egyptian month was 30 days. The Heb months are designated by numbers and names.—I. **Numbers.** This was the earliest, method of identifying the months, the month of the Exodus being taken as the first and the others reckoned from it (Ex.12.2; cf. Deut.16.1; also Gen.7.11, 8, 4, 5, 13, 14, where the months are counted as parts of the year of Noah's life). The same system was the prevalent one during the Exilic period (Je.39.1; Ezk.40.1; Hag.1.1; Zech.1.1, 7, 7, 1).—II. **Names.** (1) Only four of the ancient (Canaanite) names have been handed down. (a) Abib (post-exilic Nisan), the month of "ripening ears" (Ex.13.2, 23, 15, 34, 18; Deut.16.1). (b) Zif (post-exilic Shebat), the "second month" (K. 6.1). (c) Ethanim (post-ex. Tishri): 82, the month of "perennial streams," the "seventh month" (Lev.23.34). It occurs in a Phoenician inscription from Cyprus, 4th cent. B.C. (d) Bul (post-ex. Marcheswan), month of "produce," the "eighth month" (K. 6.38). This occurs on the Ishmunazar tablet (Corp. Inscrip. Sem. 1.3), in a inscription from Cyprus (ib. 1.10), and in one from Idalium (ib. 1.90). (2) Babylonian names. According to a statement in the Jerusalem Talmud (Rosh ha-shanah 1.2), the names current in post-exilic times were borrowed from the Babylonians. There is no reason to doubt this assertion, as there are no traces of these names, before the Exile. Only seven of the twelve names occur in O.T.—viz. the 1st, 3rd, 6th, 9th, 10th, 11th, and 12th. (a) Nisan (Abib, Ex.13.1); No. 1; Bab. Nisanu. The 1st ecclesiastical and 7th civil month. The Assyrians, Babylonians, and Jews reckoned at the vernal equinox (Nisan corresponds approx. to March 21—April 20). (b) Iyyar (Zit, K. 6.1). Not in O.T.; occurs in the Targ. (2Chr.30.

2): Bab. Airu, from a root meaning "to be bright," or another "to send forth" (flowers), thus answering to the Heb. ziv (April-May). (c) Sivan (the "third month"). Ex.19.1; Esth. 8.9; Bab. Simanu (May-June). (d) Tamnuz (the "fourth month"); its name for the half-shekel was exchanged for the shekel in Tann. iv. 5. Bab. Du'uzu and Du-mu-zi. Cf. Ezk.8.14, where Tamnuz is the god Adonis (June-July). (e) Abi ("fifth month", Je. 1.3). Not in O.T.; Pesach. iv. 5. Bab. Abu (July-Aug.). (f) Elul ("sixth month", Hag.1.1): Ne.6.15. Bab. Ulul (Aug.—Sept.). (g) Tishri (the Tenth): (K. 8.3). Bab. Yeri\(\acute{\text{a}}\). His name is in Gen. 25.31. Not in O.T.; Sack. ii. 1. The first month of the civil year. The Assyrians, like the Jews, had two beginnings of the year—the sacred in Nisan, and the civil in Tishri (Sept.—Oct.). (h) Marcheswan (Bul. 1K.6.38). Not in O.T.; Tann. i. 3. Bab. Aray\(\acute{\text{a}}\)nunu = eighth. Schwarz, Der Jud. Kalender, 3. 5. **Moon** (Heb. יֵרָח, "pale" or "yellow," and בּוֹאֵית, "white"). That the moon held an important place in nature was known to the Hebrews. In the history of creation (Gen.1.14-16) it appears simultaneously with the sun, and, compared with it, it is said to be "for sign and for seasons, and for days and years"; though in this respect it exercised the more important influence, if by the "seasons" we understand the great religious festivals of the Jews (see Exe.43.6,7). Besides this, it had its special office in the distribution of light; it was appointed "to rule over the night," as the sun over the day. The inferiority of its light is occasionally noticed (Gen.1.16; Can.6.19; Is.30.26). Ps.121.6 may have reference to the idea of a supposed injurious effect of moonlight on sleeping persons which was at one time generally held, and gave rise to the expressions moonstruck, lunatic, moodsichtig, etc. The worship of the moon was extensively practised by the nations of the E. under a variety of aspects. In Egypt it was honoured under the form of Aah. In Syria and Babylonia it was represented by Ashtoreth, surnamed "Karshlima," and identified at O.T. Job 31.26,27 and the warning of Moses (Deut.4.19) are directed against nature-worship. At a later period, however, the
worship of the moon in its grosser form of idol-worship was introduced from Syria. In the figurative language of Scripture the moon is frequently noticed as presaging events of the greatest importance through the temporal or permanent withdrawal of its light (Is.13.10; Jl.2.31; Mt.24.29; Mk.13.24).

Moore, New. [New Moon.]

Moos'ias (1Esd.9.31). Apparently = Maa-seiah. 4.

Moph. [Moph.]

Mor'cheth, [Mocheth], i.e. native of a place named Morcheth (not Maresah, as Targ.). It only occurs as the description of the prophet Micah (J.e.26.18; Mi.1.1). [Moresheth-gath.]

Mord'ecai. 1. The agent employed by God for the deliverance of the Jews from extermination at the hands of Ahasuerus' grand vizier, Haman. Mordcaic's cousin and adopted daughter, Esther, being chosen queen, he remained in close communication with her, though forbidding her to disclose her nationality. Unrewarded through inadvertence for the discovery of a plot against the king's life, he incurs Ahasuerus's hostility by refusing to do him homage when passing the palace gates; probably, however, to end his life, in view of the hereditary enemy of Israel [Haman] rather than from viewing such action as equivalent to idolatry (for cf. 2Sam.14.4,18.28; 1K.1.16). Haman obtains from the king, as vengeance for this slight, a decree, for the destruction of all Jews. This is the more readily obtained through the fact that the value of the property the royal treasury will be greatly enriched. Soon Ahasuerus, passing a sleepless night in hearing the chronicles of the kingdom read, is reminded of Mordcaic's claims. Haman, arriving early at the palace to obtain permission to hang his enemy, and thinking that the king's question as to the fitting meed to be bestowed upon a worthy recipient has to do with himself, is involved in the necessity of conferring the honours he suggests upon the hated Mordecai. Meanwhile the decree for the overthrow of the Jews has been communicated by the latter to Esther, with the warning that it is her instrument to effect the downfall of her idolatrous enemy. The hope for her nation and herself. After Haman's overthrow Mordecai becomes vizier, and, receiving the king's seal, writes an authorization to the Jews to defend themselves. He and Esther accordingly send two letters to their countrymen, prescribing the commemorative feast of Purim with a preceding fast. The apocryphal additions to the book of Esther set forth in ampler form the glory and dignity of Mordecai, and as time went on his traditional fame increased. He was reputed to have known 70 languages, and his age to have exceeded 400 years. His name is probably derived from Marduk (Mardach). That the name of a Babvlonian should be given to a Jew (see Sacye, The Higher Crit. and the Mon., p. 470, for instances), though strange at first sight, may have no real significance from the religious point of view, just as in later times the name Martin is devoid of association with its etymological source, Mars. Mordecai has, however, been by some identified with Matalcas, a eunuch and favourite of Xerxes, mentioned by the historian Ctesias (Persica, 27). According to him Xerxes, on returning from his ill-starred expedition against Greece, sent Matalcas to the temple of Apollo at Delphi to plunder the property of the god. This commission Matalcas duly carried out. A Jew would not, as such, be an unnatural person for Xerxes, himself a foe to idolatry, to employ on a like errand. Moreover, that Mordecai should have been a eunuch harmonizes with several details of the narrative in Esther, such as his possessing neither wife nor child, and having apparently unrestricted access to the court of the harem. Further, a position of great influence was not uncommonly obtained by eunuchs in Persia. We must, however, bear in mind that Ctesias is by no means trustworthy as an historian. Mordecai is described (Esth.2.5) as a "son of Iair, the son of Shimel, the son of Kish. It is best (with Jewish tradition and Aramaic) to consider the two last to be the well-known members of the tribe of Benjamin (2Sam.16.5f.; 1Sam.9.1). Frequently it is only the more prominent links in a descent that are expressed. If, on the other hand, we take Kish to be Mordecai's great-grandfather, and consider him and not Mordecai to be the son of Kish, the passage then reads as if Mordecai and his fellow-captives in 508 B.C. (see Esth.2.6)—a construction nevertheless which is contrary to the ordinary syntactical usage of Hebrew—there is no difficulty in accepting Mordecai as flourishing in the days of Xerxes. If, on the contrary, in deference to Heb. grammar, we consider the statement as a loose mode of indicating that he was member of a family which three generations previously had been included among the exiles of that date. 2. One of the leaders of the returning exiles under Zerubbabel and Jeshua (Ezr.2.23; Ne.1.7). [A.W.S.]

Morning, translated "high" in LXX—perhaps an Aram. word, like Mār, an "exalted" person or "lord." The Plain of Moreh [Pillar, Plain of], otherwise the "oak" or "tree" of Moreh, was near Shechem (Gen.12.6); and these "oaks" or "plains" (Deut.11.30) were close to Gerizim, and perhaps connected with Moriah. The Moreh (gibbōd, manure) lies on N. side of the valley of Jezreel (Judg.7.1), and this "high" hill was no doubt the volcanic peak of Jebel en Néby Dîkhî, so called from a companion of Muhammad, whose shrine is on the summit, with a legend attached. In the Middle Ages this hill, 1,690 ft. above sea-level, and about 1,400 above the plain, was called "little Hermon" (see Ps.89.12), because it was near Tabor. [C.R.C.]

Moresheth-gath', a place named by Micah only (1.14), with Lachish, Achzib, Maresah, and other towns of the lowland district of Judah. Micah was himself the native of a place called Moresheth-gath' (1.14). [Moresheth-gath.] The word means "a possession." The site is unknown. [C.R.C.]

Moriah. This name is spelt in two ways, and the two sites may be distinct. 1. "Moriah" the temple hill at Jerusalem (2Chr.3.1); perhaps "the mount of the vision [hār hammōriyviyl] where the Lord appeared unto David." 2. "Moriah," a "land" (Gen.22.2),
which I.XX. renders "the high land," perhaps "conspicuous," or a "place of view," connected with náá, "to see," in the narrative (ver. 14). Abraham, travelling from Beer-sheba to sacrifice Isaac, and riding an ass, saw the place "afar off" on the third day (Gen.21.33, 22.4). Josephus (1 Ant. xiii. 1, 2) identifies this Moriah with "the hill of the temple." The Samaritans hold it to be Gerizim, which is 75 miles from Beer-sheba, but visible 10 miles off; thus entailing a daily journey of 22 miles—which is not impossible. The temple site is certainly not "high" or "conspicuous," if that be the true rendering of Moriah; but there are no other allusions to enable us to decide between the traditions, unless Moriah is the same as Morah. [C.R.C.]

**Mortar.** The simplest (and probably most ancient) method of preparing corn for food was to crush it under a millstone and a pestle. The pestle and mortar must have existed from a very early period. The Israelites in the desert appear to have possessed mortars and handmills. When the manna fell, they gathered it and either ground it in the mill or pounded it in the mortar (Heb. מַחֲקַ֫ה; Num.11.8). So in the present day, the mortars are used by the Arabs to pound wheat for their national dish, kibbeh. Another word, מַחֲקַ֫ה (Pr.27.22), probably denotes a mortar of a larger kind, in which corn was pounded. "Though thou shouldst lay the towel in the mortar [among the bruised corn with the pestle], yet will not his foot depart from your neck." [Ps.44.23]

**Mortar.** (Gen.11.3; Ex.1.14; Lev.14.42,45; Is.41.25; Ezk.13.10,11,14,15;22.28; Nu.3.14). The various compacting substances used in Oriental buildings were: (1) bitumen, as in the Babylonian structures; (2) common mud or moistened clay; (3) a very firm cement compounded of sand, ashes, and lime, in the proportions respectively of 2, 3, 1; (4) a compound, sometimes mixed and sometimes coated with oil, so as to form a surface almost impenetrable to wet or the weather. In Assyrian, and also Egyptian brick buildings, stubble or straw (as hair or wool among ourselves) was added to increase the tenacity, and is still used for bricks. [Plaistier]

**Moses.** (Deut.10.6), apparently the same as Moseroth (Num.33.30), its plur. form, the name of a place near mount Hor. The word means "bonds"—perhaps in the sense of "bound,"—and stands for mount Hor (which was the border of Edom) in the later passage, as the place where Aaron died. [C.R.C.]

**Moses.** The exact signification and derivation of the name is by no means clear. The narrative leads naturally to the conclusion that the name must have been originally Egyptian. Liberals connect it with the Egyptian word signifying child, son. The older scholars derived the word from the Heb. מַעֲקַ֫ד, as if "drawn out," misunderstanding the real meaning of the remark in Ex.2.10. For the Heb. is active, not passive as would be required by the traditional explanation. Several other Egyptian derivations have been proposed for the word (e.g. מַעֲקַ֫ד a child born in water). All these, however, are more or less uncertain. The variety of spelling presented by the LXX. and Gk. versions (e.g. Mωσῆς, Μωυθίζας, etc.) creates a difficulty, as in the original form of the name of Amram, son of Kohath, son of Levi, by Jochebed, consisted of the eldest—a daughter, Miriam or Hur—and two sons, Aaron, the elder, and Moses, the younger. The account of Moses' birth and early life given in the Pentateuch is simple and sober. In the later accounts even the earliest parts of the history abound with marvels. Josephus, for manifest reasons, adds considerably to the Biblical narrative; according to him, one of the "sacred scribes" of Egypt foretold that a child of the Hebrews would be born who would overthrow Pharaoh, and exalt the Hebrew nation above the Egyptian. This he narrates as the cause why the king of Egypt commanded the male children of the Hebrews to be put to death. It is scarcely necessary to point out that this does not strictly agree with the account in the book of Exodus. Again, prior to the birth of Moses, Aaron is said to have dreamed a remarkable dream, in which God assured him that his protection would secure the child's safety. These legends have been considerably added to in the Korán, and still more copiously by Muslim writers. (See, for a popular account, Weill's *Biblische Legenden der Muselmänner*.) Josephus added new elements to the story of Moses in his work of chronicles, which were again largely increased by the Arabic writers and in the Jewish Midrash. Earlier legends exist in the book of Jubilees, which is as old as 135-105 B.C. (see Charles' Introduction to his edition of that work). In it we are informed that the daughter of Pharaoh was named Tharmuth, which name Josephus gives in his *Antiquities* ( redux) at least 200 years later. Josephus also adds legends of Moses' campaign against the Egyptians as general of the Egyptian armies. These legends are, in not a few cases. evidence of the great antiquity of the Pentateuch, which has no reference whatever to the earlier histories, while the account of the early days of Moses is strongly confirmed by the copious reference to the events of these early days in the N.T. writings. The Biblical records leave unfilled a considerable gap in Moses' history. Stephen (Ac.7), however, observes that Moses was educated in all the wisdom of the Egyptians, and was mightily active in words and works. There may be some historical truth underlying the story that Moses was educated in Heliopolis. There he seems to have been known under the name of Osarsiph, probably = Aarsip, "the young Osiris," an Egyptian name. As a priest he seems to have kept himself aloof from idolatry, and he is represented in the Egyptian tradition as offering up his prayers under the open temple of heaven, towards the sun-rising (Josephus, *Cont. Apion*, ii. 2). He was also, according to the same tradition, renowned as a mathematician and grammarian, and Philo-Judaeus represents him as well acquainted with the literature of the Chaldeans, Assyrians, and Greeks. It is not unlikely that he may have been employed in warfare by the king of Egypt. One of the Egyptian traditions states that his success in an Ethiopian campaign was partially owing to the admiration felt for him by an Ethiopian princess.
The combination of incidents given in Wiedemann's *Aegyptischen Geschichte* (pt. ii. p. 494 ff.) is, however, open to serious criticism. It may also have occupied a portion of his time in writing the earlier memorials of his people, and it is possible that St. Stephen may have referred to some such writing in Ac. 7.25. On the connexion of Moses and Osarsiph, see the art. of Dr. Lauth in the *Zeitschrift der D.M.G.*, Band xxv. 139-148 (1877). After the killing of the Egyptian who was caught in an act of cruel oppression towards an Israelite, Moses fled into Midian, where he appears to have spent the next forty years in pastoral employment. However occupied, it was in reality a time of preparation for the great work, to which he had been called by the revelation of the significance of the name of God made to him in connexion with the divine appearance in the burning bush (Ex. 3). After the stay in Midian, Moses, accompanied by his wife Zipporah and his two sons, set out for Egypt, but at their first resting-place he received a severe reminder that he was not to forget to obey his laws and the duty of obedience to the law. He was severely attacked by some illness, and no hope of recovery was given unless he fulfilled the divine enactment of circumcising his second son, Eliezer, who for some reason had been left without that mark. Zipporah, most probably in a panic-stricken hurry, cut off the foreskin of her new-born babe at the feet of her husband, in reference to the child just circumcised, "A bridegroom of blood thou art to me, because of the circumcision." Hebrew children were consecrated to the Lord by the ceremony of circumcision, and seem to have been called "bridesgrooms," as by that sign united to God. But Eliezer deserved the appellation in a peculiar sense, because his blood had purchased his father's life. This is Kalisch's view of the passage, and is, perhaps, the simplest interpretation of its obscure phraseology. The miracles performed in the land of Egypt, culminating in the exodus of the children of Israel and their journeys until they arrived at the borders of the promised land and were put in possession of the land on the E. of Jordan, fill up the third great portion of the life of Moses. Appearing before Pharaoh, attended by his brother Aaron, as his prophet or spokesman, Moses required that monarch to send the Israelites out of the land. The refusal on the part of Pharaoh led to the outpouring of ten plagues upon Egypt and its people. [PLAUGES, TEN.] The departure from Egypt immediately followed the last of these, the death of the first-born. The Israelites were commanded to "spoil" the Egyptians by "demanding" of them on the day when they went out of Egypt gold and silver and raiment as their lawful payment in compensation for their long servitude. In none of the passages in which the command is recorded or the fulfilment of it narrated is there any mention made of borrowing or lending; the word employed to signify "to demand with authority" (e.g. Ps. 2.8, and many other passages), Pharaoh collected his army, and pursued the Israelites towards the Red Sea, the way through which was wondrously opened for the Israelites, while the Egyptians were overwhelmed by the waters. [RED SEA, PASSAGE OF.] The greatest of the Pharaoh's "mighty magicians" was repulsed by the great night of deliverance, is discussed in a separate article. The triumphal song over Pharaoh and his army, composed by Moses, was recited by Miriam his sister, the prophetess, accompanied by the women with timbrels and dances. The supply of water at Marah at their first encampment was found to be bitter, but the waters were healed by the intervention of Moses. The Amalekites made a treacherous attack at Rephidim, but were repulsed after a severe battle by the enduring intercession of Moses. Jethro, hearing of Moses' success, brought back to him his wife and family, while Jethro gave them symmetry as to the organization of the people by judges appointed by Moses. The grandest portion of the narrative in Exodus contains the account of the giving of the law from mount Sinai. That greatest event in Israel's history was, however, associated with Israel's deepest dejection. The commanded holiday of the Lord's great mountain, accompanied by Aaron, Nadab and Abihu (Aaron's eldest sons), and by 70 elders of the people. Moses alone was permitted to approach the thick darkness, while the other selected persons were to worship afar off. An altar was specially erected for God, in the midst of which twelve pairs of silver trumpets were placed, as the type of the twelve tribes of Israel. On that altar were offered sacrifices by "the young men" who then discharged the office of priests, while Moses himself, as a kind of high-priest, performed the most important portion of this last distinctly recorded act of the old patriarchal ritual (Ex. 24:4-8). Israel's apostasy in making and worshipping the golden calf, when Moses, in his vain imagination, appeared to have been lost upon mount Sinai, led to the bringing in of another ritual by which the people were excluded from sacerdotal functions. When the first tables of stone were broken, and the Israelites had been severely punished for their idolatry by the Lord under Moses' intercession, a simpler patriarchal ritual appears to have been almost entirely abolished. A portion of the plan of the tabernacle which was to be erected had been given before this to Moses (Ex. 25:10-31); but new elements were now added. The "young men" are no more spoken of, the Levites take their place and perform the lesser duties connected with sacrifice. The Tabernacle itself, fully adapted to the new ritual, was constructed later from the gifts of the people by the mechanical skill of Bezaleel and Aholibab; Aaron and his sons were severally consecrated for their priestly office by the Lord under Moses' intercession. The work of the Levites in general was restricted to the performance of the other numerous duties connected with the tabernacle. The possession of the prophetic gift led Miriam and Aaron to rebel against Moses. The attempt, however, was severely punished (Num. 12); Miriam was stricken with leprosy, and on her recovery she fell under a curse of Moses. From Rimmon-parez, which seems to have been close to Kadesh, though nearer to Sinai, Moses dispatched twelve spies to go through the land of Canaan, on the borders of which the people had now arrived. These
spies went first to Kadesh (Barnea), then N.W. to Hebron. Thus Israel afterwards followed the way of the spies (Num.21.1), who rejoined the people at Kadesh (13.26). The spies agreed in speaking highly of the country, but ten of them considered the Moabites powerful and so well fortified that it was impossible to overcome them; and notwithstanding God's command, communicated by Moses, that they should at once advance and take possession of the country, the ten cowardly-minded spies stirred up a rebellion and provided captives to return to the land of Egypt. For this rebellion, the ten spies were punished by death before the Lord," Joshua and Caleb, who had encouraged the people to go forward, alone being excepted. The people were punished by being commanded at once to march backward into the wilderness, in which they had to wander for 37 or 38 years longer. A full list of the wanderings of the children of Israel is given in Num.33. Only a few of those places have been discovered. [Exodus, Th.] The rebellion of Korah, Dathan, and Abiram (16) probably took place shortly after the people returned into the wilderness. The heads of the rebellion were one of the main charges of Moab. The object of Korah was to obtain admission into the rank of the priesthood, which, by God's commands, was occupied exclusively by Aaron and his sons. This second rebellion in Moses' own family was put an end to by a fire which destroyed Korah and his followers, and by a sudden earthquake, in which the other rebels were swallowed up alive. God's will was then decisively made known by the trial of the twelve rods. No other incidents are recorded until near the expiry of the 40 years. Another wonderful miracle, resulting a second time in an outburst of water from the rock at Meribah, is narrated in 20.1-13, and on that occasion Moses and Aaron failed to honour God in the eyes of the people. The people had to journey from Kadesh, and to compass the whole land of Edom, because the king of that country and his people refused to let them pass through. But they fought lightly (20.14), shortly after on mount Hor, and Eleazar succeeded to the priesthood. The king of Arad fought against Israel, but was this time defeated and he and his cities were utterly destroyed. The episode of the fiery serpents 21.4-9), the digging of wells (21.15-21), the conquest of Sihon (which he brought on himself) and that of Og the king of Bashan followed; and about this time happened the events concerning Balak and Balaam (22-24), and the efforts to entangle the Israelites in the sin of Peor (25), afterwards so severely avenged on all the tempters (31). The children of Reuben and God with a part of the tribe of Manasseh received their portion in the territories on the E. of Jordan (32), under definite conditions; and Moses appointed three cities of refuge E. of the Jordan, to which three others were afterwards added by Joshua. After several solemn addresses on the borders of the promised land (35), Moses died on the plains of Moab (Deuteronomy), the work of the great deliverer, lawgiver, priest, and captain was finally accomplished; and as his transgression at the waters of Meribah had precluded him from entering the land, God gave him a sight of that land from mount Nebo in Moab before he died there in solitude. It has too often been taken for granted that it is distinctly stated in Deut.34.6 that the Lord buried Moses, but the Heb. word certainly can bear such a significance, but as there is no emphatic pronoun in the sentence, it would just as naturally be translated as the indeterminate third pers. sing., signifying that "one buried him," equivalent to "and he was buried" (see Kautzsch-Gerstenr., Heb. Gram., edited by A. E. Cowley, §144). The two statements by Canon Cook in the Speaker's Commentary in favour of the popular idea cannot be justified. If the Lord had indeed buried Moses, some reference to that extraordinary fact might have been expected in some of the later passages of the sacred Scriptures, but none can be cited even from the long list of apocryphal writings given by Professor Charles. We might even go further, and maintain that there is no reference in that literature to any dispute between Michael the archangel and Satan as regards the body of Moses. The Assumption of Moses, as far as it is in our hands, contains only a few fragments of what was founded upon the assertion of Origen. We may regard the passage in Jude as speaking of Israel as figuratively "the body of Moses," the O.T. Church having been described in Hebrews as "the house of Moses" (Heb.3-6). [CH.IL.W.]

MOSOLLAM (158d.9.14) = MESHULLAH, 11.

MOSOLLAMON (158d.8.4) = MESHULLAM, 10.

Moth (Heb. 'ash). The Heb. word certainly indicates in most cases some species of clothes-moth (Tinea). Reference to the destructive habits of the clothes-moth is made in Job 4.10,13.23; Ps.39.11, etc. In Job 27.18, "He buildeth his house as a moth," the allusion may be to some of the leaf-eating caterpillars; unless it refers to the cases of the pupae of the clothes-moth. [WORM.]

Mother. (1) Motherhood was most fervently desired and highly honoured—e.g. Gen. 30; 1Sam.1; Pr.31.2; Ps.113.9. For position, etc., see also Num.12.4. Aaron's mother was treated with exceptional honour, and usually had great influence—e.g. 1K.2.13; 2Chr.22.21. Indeed, her position amounted almost to an office (Je.13.18, Heb. and E.V. ; cf. 29.2) from which she could be deposed (1K.15.13; 2Chr.15.16). She had a technical title, 1111.11.

Mount Ephraim. [EPhRAIM.]

Mount Gilgal. [GILEAD, MOUNT.]

Mount, Mountain. In O.T. this word is used to represent the following terms only of the original. (1) Heb. hir, with its derivative or kindred hirar. (2) The Aram. (or, in Dan.2.15.15; the Arab. jer, for an isolated summit. In N.T. "mountain" is usually the Gk. βόης. The Heb. hir, like the Eng. "mountain," is employed both for single eminences more or less isolated, such as Sinai, and for ranges, such as Lebanon. It is also applied to a mountainous country or district. The various meanings given in the book of Deuteronomy, in which it is applied in O.T. are as follow: "Ararim; Amanah; of the Amalekites; of the Amorites; Ararat; Baalal; Baal-
Hermon; Bashan; Bethel; Bethhoron; Carmel; Edom; Ephraim; Eremon; Eseau; Gaash; Gerizim; Gilboa; Gilead; Halak; Heres; Hermon; Hor; Horer; of Israel; Jearim; Judah; Olivet; or of Olives; Mizar; Moriah; Naphthali; Nebo; Paran; Peraan; Ram; Samaria; Serachiar; Sinai; Sion, Siron, or Shemer (three names for Hermon); Shaphar; Tabor; Zacalon; Zemaraiam; Zion. The Mount of the Valley was a district allotted to Reuben (Jos.13-19), being the lower plateau above the Dead Sea on E., but below the Moab plateau—a terrace of desert land. The following are, it is believed, all the words used of features in relation to mountains or hills: (1) Head, rosh, Gen.8.5, Ex.19.20, Deut.34.1, 1K.18.42 (A.V. "top"); Arab. râs, "headland" or "top"). (2) Ears, asânôth, Aznoth-tabor. Jos.19.34: possibly in allusion to some projection of the mountain. (3) Shoulder, kâthâph, Deut.32.12, Jos.15.48. (4) Brest, kâthâph, Assyr. sadu, Arab. sadeh, a "range": used in reference to a mountain in 1Sam.23.26, 2Sam.13.34. (5) Loins or Flanks, kisâlôth, Chishloth-tabor, Jos.19.12, 18. (6) Rib, câlā: once only, viz. of the mountain of Olives, 2Sam.16.13, and there translated "side" (7) Bend, Fâdôh, possibly the name of the mountain of the town Shechem, which may be derived from its situation on a water-shed. (8) Thigh, yârêâkhâ: applied to mountain Ephraim, Judg.19.1, and to Lebanon, 2K.19.23. 1K.19.37. 24; used also for the sides of a cave (1Sam.24.3). (9) The word translated "shoulder" (4) was often used of the root of the name of the town Shechem, which may be derived from its situation on a water-shed. (10) Head, Fâdîb, or Fâdâb, "to hide," and probably refers to the thicket through which Abigail's path lay. [C.R.C.]

Mount, Sermon on. [Sermon on the Mount.] Mountain of the Amorites (Deut.1.19, 20). The Amorites were a Semitic race of highlanders (Num.13.29), living in Lebanon, Gilead, and the Hebron mountains. The "mountain region [hâr] of the Amorites," in the passage cited, was apparently the plateau of Moab, which confronted the Hebrews at Kadesh-barnea, rather than the more distant Hermon range (Deut.1.2). [R.C.]

Mounting. The numerous expressions in Scripture for the various actions characteristic of mounting show in a great degree the nature of the Israelite customs in this respect. These customs appear to have been chiefly (1) Beating the breast or other parts of the body. (2) Weeping and screaming in an excessive degree. (3) Wearing sad-coloured garments. (4) Songs of lamentation. (5) Funeral feasts. A marked feature of Oriental mourning is what may be called its studied publicity, and the careful observance of the prescribed ceremonies (Gen.23.2; Job 1.20, 2.8; Is.15.3, etc.). Among the particular forms observed were the following: (a) Riding the clothes (Gen.37.24, 44.13, etc.). (b) Dressing in sackcloth (Gen.37.34; 2Sam.3.31, 21.10, etc.). (c) Ashes, dust, or earth sprinkled on the person (2Sam.13.19, 15.32, etc.). (d) Black or sad-coloured garments (2Sam.14.2; 1K.2.21, etc.). (e) Removal of ornaments or neglect of personal dress (2Sam.21.12, 13, etc.). (f) Shaving the head or plucking out the hair of the head or beard (Lev.10.6; 2Sam.19.24, etc.). (g) Laying bare some part of the body (Is.20.2, 47.2, etc.). (h) Fasting or abstinence in meat and drink (2Sam.1.12, 3.35, 12.16.22, etc.). (i) On the same principle, temporary abstinence from sacrificial food (Lev.7.20; Deut.26.14). (k) Covering the upper lip, i.e. the lower part of the face in some cases, and sometimes the head, in token of silence (Lev.13.45; 2Sam.15.30, 19.4). (l) Cutting the flesh (Je.16.7, 8, 11.5). Beating the body (Ezk.21.12; Je.31.19). (m) Employment of hired persons to lament (Ecc.12.5; Is.6.17; Am.5.16; Mt.9.23). (n) Akin to this usage the custom that friends or passers-by join in the lamentations of bereaved or afflicted persons (Gen.50.3; Judg.11.40; Job 2.11, 30.25, etc.). (o) The sitting or lying posture in silence indicative of grief (Gen.23.3; Judg.20.26, etc.). (p) Mourning feast and cup of consolation (Je.16.7, 8). The period of mourning varied. Similar practices are noticed in the Apocryphal books. In Jewish writings not Scriptural, these notices are in the main confirmed, and in some cases enlarged. Other points to be noted are: (a) The idolatrous "mourning for Tamuz" (Ezk.8.14) indicates identity of practice in certain cases among Hebrews and heathens; that is does the "mourning for Nebachadnezzar" (Eccles.30.18). (b) The high-priest and the Nazarites are forbidden to go into mourning even for a father or mother (Lev.21.10, 11; Num.6.7). The inferior priests might mourn only for near relatives (Lev.21.12, 4). (c) The food eaten during mourning was regarded as impure by the Jews (Deut.14.17, 18). (d) Heathen writers refer to similar usages, which are in accordance with general Oriental customs, both ancient and modern. D'Arvieux says Arab men are silent in grief, but the women scream, tear their hair, hands, and face, and throw earth or sand on their heads. The older women wear a blue veil and an old abba as mourning garments. They also sing the praises of the deceased. Niebuhr says both Mohammedians and Christians in Egypt hire wailing women, and wail at stated times. Burckhardt says the women of Atbara in Nubia shave their heads on the death of their nearest relatives, and a custom among several of the prudent tribes of Upper Egypt. He also mentions wailing women, and a man in distress besmearing his face with dust and dirt in token of grief. Lane, speaking of the modern Egyptians, says: "After death the women of the family raise cries of lamentation called weâeldeh or wifâd, uttering the most piercing shrieks, and crying upon the name of the deceased, 'Oh my master! Oh my resource! Oh my misfortune! Oh my glory!'" (see Je.22.18). The females of the neighbourhood come to join with them in this conlamation: generally, also, the family send for two or more nedâbèhs, or public wailing women. Each brings a tambourine, and beating them they exclaim, 'Alas for him!' The female relatives, domestics, and friends, with their hair dishevelled, and sometimes with rent clothes, beating their faces, cry in like manner, 'Alas for him!' These make no alteration in dress, but wear laurels, shirts, head-veils, and handkerchiefs of a dark-blue colour. They visit the tombs at stated
periods." (Med. Eg. iii. 152, 171, 195). The Arab women in Meab, when a husband or father dies, cut off the plait of hair which they wear and suspend it by a cord over the graves. Col. Conder speaks of having seen a dozen or more plaits over one tomb.

Mouse (Heb. 'akhbār) occurs in Lev.11.29; 1Sam.6.15; 15.66.17. The Heb. word is in all probability used in a wide sense for murine rodents generally, and is not intended to denote any particular species of mouse. Eponymically it denotes a field-ravager.

In iSam.6.5, "the mice that mar the land" may more particularly refer to the continental short-tailed field-mouse, or "vole" (Microtus agrestis), which causes great damage to cornfields in Syria.

Mowing. Grass is not mown in the East. [Hav.] The Heb. ḫez (floccē; Deut.18.14; Job 31.20) means what is "shorn": in Ps.72.6 the LXX. understands "floccē" (A.V. mown grass), recalling Judg.6.37-40. In Am.7.1 "the king's mowings" means apparently the season when his flocks were shorn. (c.r.c.)

Wood. With the name of Caleb was recorded Beth-coneumbine Ephah (1Chr.2.46).—2. Son of Zimri, and descendant of Saul (8.36.37.9.4.43).

Mozah' (Heb. mōḏă, "spring"), a town of Benjamin (Jos.18.26), mentioned with Cephearah and Irpeel. The site is uncertain; it is sometimes supposed to be Qalūnī, 4 miles W. of Jerusalem, and 2 miles W. of Elal (Lafa), with which Mozah is noticed, while it is about 5 miles S. of Irpeel (Rā-fād). There is a fine brook at Qalūnī, which may answer to the mōḏă, or "source"; and a ruin at the spring, a mile N.E. of the village, is called Beit Mizzeh (house of hard stone), which may represent a corruption of the Heb. name. The ruins appear to be ancient (Surv. ii. Pal. iii. p. 108). [C.R.C.]

Muller. [Veil.]

Mulberry-trees (Heb. bēḵkāhīm; 2Sam.5.23.24; 1Chr.14.14). It is quite uncertain what kind of tree is denoted by the Heb. bēḵkāhī. The Jew is of the opinion that the modern versions, understand the mulberry-tree. It is difficult to see any foundation for such an interpretation. Celsius (Hierob. i. 335) identifies it with a tree of similar name in a MS. of the Arab. botanical writer Abu el Fudli, viz. some species of Amyris or Balsamodendron, but the Amyridaceae are tropical shrubs, and never could have grown in the valley of Rephaim. Rosenmuller follows the LXX. of 1Chr.14.14, and accepts "peartrees." Dr. Royce refers the Heb. bēḵkāhī to the Arab. Shaṭafat-al-baqā, "the great-tree," which he identifies with some species of poplar; but this is open to objection, for the Heb. bēḵkāhī and Arab. baqā are clearly distinct both in form and signification, the second radical letter being different; and the poplar is only found in Palestine, near Bānās—though common near Damascus—and only occurs beside rivers. Canon Tristram’s suggestion that through the foliage of the poplar (P. euphratica) the promised marching of the winds gave audible signal to the king of Israel and his soldiers, as they stood on the heights beyond the "valley of the giants" (2Sam.6.24; cf. Jos.15.8), is to be remembered in connexion with Royce’s remark. But it is probable that bēḵkāhīm is a place-name, and the phrase = the hill-tops of Becaim. Though it is thus impossible to avoid the introduction of a name in the Heb. Bible, its fruit is mentioned in rMac.6.34. Mulberry-trees (Arab. tāfī) are found in Palestine, and appear to be noted even in the Amarna letters (19th cent. b.c.), but they are not common. [H.C.N.]

Mule, the translation in A.V. of the following Heb. words: (1) pereḥā, pereḵī, masculine and feminine nouns rightly denoting the mule, the first occurring in numerous passages, the latter only in rK.1.33.38.44. No mention is made of mules till the time of David, when the Israelites were becoming well acquainted with horses. After this time horses and mules are often mentioned together. Michaelis conjectured that the Israelites first became acquainted with mules in the war of David with the king of Zobah (2Sam.8.3-4). In Solomon’s time it is possible that mules from Egypt occasionally accompanied the horses which the king of Israel obtained from the king of Egypt (2K.9.25). It is rarely mentioned under these names, and is perhaps ceased to be imported. (2) ḫeḵbēsh. [DROMEDARY.] (3) yōnim is found only in Gen.36.24, where it is rendered in A.V. mules. The passage is one concerning which various explanations have been attempted; but whatever may be the proper translation, it is certain that the A.V. is incorrect. The most probable explanation is that yōnim means "warm springs," as in Vulg. [Anah; Camel.] [K.L.]

Muppim’, a Benjamite (Gen.46.21). In Num.26.39 the name is Shaphunim (Shephupham, R.V.). In 1Chr.7.12.13.26.16 it is Shuppim, and in 8.8 SHEPHUPHAM.

Mush’i, son of Merari, son of Levi (Ex.6.19; Num.3.20; 1Chr.6.19.47.23.21.23, 24.26.30). [MAHILL.]

Music. That the Hebrews were enthusiastic musicians is apparent from the most cursory glance at the O.T. Though the invention of musical instruments was attributed to Jubal, a Caineite, and therefore an alien, it was cultivated zealously by the chosen people. It was associated with every phase of life, private and public. The parting guest was sped "with songs, with tabret, and with harp" (Gen.31.27); the householders enjoyed in his leisure hours the sound of the timbrel, the harp, and the organ (Job 21.12); at the wine-press or in the vineyard work was lightened by songs, of which we have traces in the titles of some psalms and in Is.65.8. Of love-songs we have a collection in Canticles, and there is at least one nuptial ode in Ps. Prominent mention is made of music in connexion with national victories (Ex.15.1.20; Judg.5.2; 1Sam.18.6). It was cultivated by the early prophets to promote an access of inspiration, or to calm the mind and prepare it to receive the divine message (2K.3.15). [MINSKEL.] Naturally

MUSIC

it was employed at royal coronations (1K.1.39f.) and at state and private banquets (Am.8.6,5). Very striking is its application to disorder in the case of Saul, who obtained relief from David's playing on the kinnor. Lastly, the presence of musicians was general at funerals (Je.9.17,18), and the memory of the dead was often celebrated in the wailing song, of which David's laments over Saul and Jonathan (2Sam.1.17) and over Abner (2.33) are conspicuous examples. Music thus entered into the whole life of a Hebrew, and we see how seriously it was taken by him from Ps.137. The exiles, brought together by their homesickness, could not play on their harps, yet could not part with them, and so, weeping, they hung them on the willows. It was its introduction into the worship of the temple, however, that gave music its chief importance and promoted its greatest development. The union of music with the liturgy took place on an elaborate scale and under official sanction at a comparatively late date. Apart from the dibrāth (hāqûdrath and šēqhûdrāth), the law says nothing about the use of music in the worship of Jehovah. It is not likely, indeed, that even in earlier times it was altogether wanting in public worship; and in Wis.18.9 we read that at the first Paschal feast the fathers led "the sacred songs of praise" ("V.), and this at least points to belief in the antiquity of the practice. But according to O.T., it was David who first established and regulated the musical service in its final form. We are told (1Ch.15.16-24) that when the ark was transferred from the house of Obededom to Jerusalem, David directed the Levites to choose from their number singers who were expert instrumentalists. Singers and players were divided into two grades. In the first are named especially the three conductors, Heman, Asaph, and Ethan. In the second class 14 Levites are mentioned. These are divided into three choirs, according to the instruments played: the first had cymbals of brass, the second choir, psalteries on šêlômôth, and the third, harps on shûmînith (see Psalms, Titles Of). In 23.5 we are told that 4,000 Levites were selected to praise the Lord with instruments "which I made, said David, to praise there with." The instrumentalists were divided into 24 classes. Over these were set (ch.25) the sons of David's conductors. Each of these 24 leaders had 11 trained singers to assist him, the rest were the pupils; and a choir consisted therefore of 12 experts and 154 scholars, i.e. 166 members. Although many details in Ch.25 are probably derived from the practice of later times, and apply strictly to the second temple, there is no reason to doubt that David and Solomon had already made some such arrangements as those described above. The proportion of experienced teachers to pupils would be especially necessary in choirs dependent entirely on tradition for their knowledge of the notes sung. The services of the temple thus instituted were sometimes disarranged or suspended by renegade kings, and then restored by their faithful successors. Such a restoration was effected by Hezekiah, and the terms in which it is described (2Ch.29.25f.) emphasize once more the importance attached by the Hebrews to music. David had composed and handed down the music (see 2Sam.6.5). Various striking pieces are mentioned, such as the song of thanksgiving after the battle of Admah and Zin (2Sam.18). But he also established a permanent musical organization in connection with the prophets Gad and Nathan. Similarly Josiah (35.15) included in his reforms a return to the ordinances of David regarding sacred music. After the Captivity the wall of Jerusalem was dedicated with great ceremony, in which music played an important part (Ne.12.7). The "sons of the singers" were brought together, and two large choirs were formed which sang thanksgivings and praises to the accompaniments of "cymbals, psalteries, and harps." At the close of Ne.12 it is noted that the musical service was now put on a permanent footing, and that the people contributed regularly to the support of the musicians. We know nothing directly as to the nature of Heb. music. None other treatises have been handed down, as in the case of the Greeks. The ancient instruments preserved are not in a state to give any definite results. It has been found possible to produce sounds equivalent to those of the diatonic scale only by two sets of harmonized tones. We therefore are completely in the dark even as to the scales employed, and it adds little to our knowledge that Clement of Alexandria and Augustine warned the early Christians against the chromatic music of the heathen, directing them to adhere to the pure diatonic music of the Ps. of David. It is not even probable that there was any musical notation. The accents, which in any case are of late origin, could not have been used for that purpose, as they are too regular in their sequence. They are evidently grammatical, and at most suggest a fixed system of cantillation. We are therefore limited to a few inferences of a general or negative kind. It is certain that the music was unisonal. Harmony or counterpoint was not known to the ancient world, and is not yet employed in native Eastern music. Nature would suggest or even compel the performance of a melody in octaves, and perhaps even parts of it at lesser intervals, but the only other tone colouring was derived from the difference of instruments or the character of the voices. Variety was obtained, however, by means of antiphonal singing, which was employed both in secular songs (1Sam.18.6f.) and in many psalms; cf. Rev.4.8, 5.11. Generalizing, we may regard the province of the instruments as well as of modern Eastern music, ancient Heb. music was loud and strident, and the rhythm was strongly marked. Drums, triangles, castanets, sistra, and cymbals, frequently mentioned in O.T., not only in connexion with dances but even in Ps., show this. Strongly rhythmical also was the singing, and it is the sincerest artistic forms. Leyrer (and others who have adopted his words) says that in estimating Heb. music the Rabbis and the moderns have erred in two opposite directions. The former held it to have reached the highest degree of excellence, the latter considered it barbarous and uninteresting. It is impossible to assign a scale to this per-
Hiller's probably correct explanation is, that the birds settled on the mustard-plant for the sake of the seed, of which they are very fond. Again, the mustard-plant "seems to be a herb, or more properly "a garden herb," Irby and Mangles mention the large size attained by the mustard-plant in Palestine, which, in their journey from Beisan to Ajlon in the Jordan Valley, reached as high as their horses' heads. Dr. Thomson, speaking of the wild mustard on the rich plain of Akkar, corroborated this. If then, the wild plant grows so high, it might attain the same or a greater height when cultivated. The expression "which is indeed the least of all seeds," is hyperbolical, to denote a very small seed indeed, as many seeds are smaller than mustard. "The Lord in His popular teaching," says Trench (Notes on Parables, 105), "adhered to the popular language"; and the mustard-seed was used proverbs for anything very minute. [H.C.B.]

Muth-laben. [PSALMS, TITLES OF]

Myr'rus, a town on the coast of Caria, between Miletus and Halicarnassus. It was the birthplace of the celebrated poet Mys (Mac. 15. 23). The name still lingers in the modern Mentesch, though the remains of the city are probably at Gamaschi.

My'ra, an important town in Lydia, where St. Paul, on his voyage to Rome (Ac. 27. 5), was removed from the Adramyttian ship which had brought him from Cos. "The ship was wrecked on the west coast of Malta. Myra (called Dembra by the Greeks) is still remarkable for its remains of various periods of history. The tomb of the island, enriched with ornament, and many of them, having inscriptions in the ancient Greek character, show that it must have been wealthy in early times. Its enormous theatre attests its considerable population in what may be called its Gk. age. In the deep gorge which leads into the mountains is a large Byzantine church, a relic of the Christianity which may have begun within the city."

Myrrh. It is mentioned in A.V. two Heb. words. (1) Môr is mentioned in Ex. 30. 23 as an ingredient of the "oil of holy ointment"; in Esth. 2. 12 as one of the substances used in the purification of women; in Ps. 45. 8, Ps. 7. 17, and in Can. 1. 13, etc. as a perfume. The Gk. occurs in Mt. 2. 11 amongst the gifts of the wise men to the infant Jesus, and in Mt. 15. 23 we read that "wine mingled with myrrh" [GALL] was offered to, but refused (because it would stupefy) by our Lord on the Cross. Myrrh was also used for embalming (see Jn. 19. 39, and Herod. ii. 86). Various conjectures have been made as to what Môr really is (see Celsius, Hierob. i. 522), and what the countries of its origin are, has been questioned. According to Herodotus (iii. 107), Dioscorides (i. 77), Theophrastus (ix. 4, § 1), Dioburus Sicelus (ii. 40), Strabo, Pliny, etc., the myrrh-producing tree grows in Arabia. Forskål mentions two kinds (Amuris kafar and Amuris kafal) near Haes, in Arabia Felix. The myrrh-tree, which Ehrenberg and Hemprecht found in the borders of Arabia Felix, and Mr. Johnson in Abyssinia, is the Balsamodendron myrrha, order Terebinthaceae, "a low throrny caged-looksing tree, with bright trifoliate leaves." It is probably the murr of Abu el

Which emit a strong odour. The gum which exudes from the bark is at first oily, but becomes hard by exposure to the air. (2) lôt (Gen.37.25, 43.11 only), erroneously translated "myrrh" in A.V. (R.V. marg. hadam, a rendering originally established by Celsius), is generally understood as the odorous resin which exudes from the branches of the Cistus creticus (ladanum, or labdanum). Clearly lôt cannot signify "myrrh," which is not produced in Palestine, for Gen. (II.c.) speaks of it as being exported from Gilead to Egypt.

There are several species of Cistus, all believed to yield the gum ladanum, but that of Dioscorides is probably identical with the one found in Palestine, viz. the Cistus creticus (order Cistaceae, the Rock-rose family). The Heb. lôt, Arab. 'ādhan, Gk. λάδανον, Lat. and Eng. ladanum, are undoubtedly identical.

Myrtle (Heb. hadas; Ne.8.15; Is.41.19, 55.13; Zech.1.3, 10, 11). All the old versions agree with A.V. in this identification, and the identical noun occurs in Arab. as the "myrtle." Modern Jews still adorn myrtle the booths and sheds at the Feast of Tabernacles. Formerly (Ne.8.15), myrtles grew on the hills about Jerusalem. "On Olivet," says Dean Stanley, "nothing is now to be seen but the olive and the fig-tree." On some of the hills, however, near Jerusalem, Hasselquist observed the myrtle. Dr. Hooker says it is not uncommon in Samaria and Galilee. There are several species of the genus Myrta, but the Myrtus communis (order Myrtaceae) is the only kind denoted by the Heb. hadas. It is too well known to need description. The myrtle-tree is mentioned also in Sus.8.58 as the alternative hiding-place of the other elder; the first one being the lentisk, or mastic. In the Geneva version the reading is, "prisme tree" (privet?), with "mirtle-tree" in marg. Pliny has an important chapter on the myrtle, of which he says there are many kinds. He states truly that it was a stranger in Europe, and introduced before his time. It is native in W. Asia and Palestine. [H.C.H.]

**Mystia.** The exact limits of this N.W. district of Asia Minor are disputed, but it is mentioned only once in the N.T. (Ac.16.7,8), and that cursory and in reference to a passing journey, and the term is evidently used in an ethnological, not a political sense. Hence the best description that can be given of Mystia at this time is that it was the region about the frontier of the provinces of Asia and Bithynia.

**Mystery** (lit. that which is kept closed or secret), a characteristic N.T. word adopted from contemporary Gk. usage, by which it was applied to such sacred ceremonies of heathenism, as those at Eleusis, which were kept inviolably secret, and only revealed to the initiated. In N.T. use, especially in St. Paul's writings, it is applied to any important Christian truth which, while beyond or above the world's understanding, is revealed by the Holy Spirit to the believer. It is indeed the new knowledge of the initiated rather than the ignorance of the outsider which is the prominent thought in N.T. Thus our Lord speaks of "the mysteries of the kingdom" revealed to His disciples (Mt. 13.11, etc.). To St. Paul the whole Gospel dispensation is a "mystery," while other typical mysteries are the calling of the Gentiles into the Church (Eph.3), the union of Christ with the believer (Col.1.27), the new life of holiness based on the Incarnation (1Tim.3.16). Answering to the Gospel mystery there is also a "mystery of iniquity" (cf. 2Th.2.7 with Rev.17.5). A later ecclesiastical "mystery" of the Holy Spirit, common from the 4th cent. onwards, is in reference to the Christian sacraments. The nearest N.T. parallel to this is perhaps 1Cor.4.1. Lightfoot, Epistle to the Colossians (note on Col.1.26) (7th ed. 1884); Suicer, Thesaurus, μυστήριον; Thayer-Grimm's Lexicon: Cheetham, The Mysteries, Pagan and Christian. [A.R.W.]

**N**

**Na'am,** one of the sons of Caleb the son of Jephunneh (1Chr.4.15).

**Naamah.**—1. One of the four women whose names are preserved in the records of the world before the Flood. She was daughter of Lamech by his wife Zillah and sister to Tubal-cain (Gen.4.22).—2. Mother of king Rehoobam (1K.14.21-31; 2Chr.12.13). In each passage she is distinguished by the title "the [not "an",] A.V. Anamothess." She was therefore one of the foreign wives of Solomon (1K.11.1; Ne.13.23). In the LXX. (1K.12.24[14.31]) she is described as "daughter of Ana [i.e. Hanun] the son of Nahash."

**Naamah, a town of Judah in the Shephelah (Jos.15.41).** Now the village Na'amath, 6 miles S. of Lydda, [C.R.C.]
NAAMAN

Naaman.—1. One of the sons of Benjamin who came down to Egypt with Jacob. According to the LXX., he was the son of Bela (Gen. 46:21; cf. Num. 26:38,40; 1 Chr. 8:3,4).—2. A Syrian warrior, a remarkable incident in which life is recorded in 2 K.5, and referred to by our Lord in Luke 10:33. As a Jewish tradition with served by Josephus (7 Ant. xv.5), identifies him with the archer who “drew his bow at a venture,” and struck Ahab with his mortal wound, and thus gave deliverance to Syria. The expression is remarkable—“because that by him Jehovah had given deliverance to Syria.” The explanation is that Naaman, in delivering his country, had killed one who was the enemy of Jehovah not less than he was of Syria. Whatever the exploit referred to was, it had given Naaman a great position at the court of Benhadad. He was a commander-in-chief of the army, and was near to the person of the king, whom he accompanied to the temple, to worship in the temple of Rimmon (ver. 18). He was afflicted with a leprosy of the white kind (ver. 27), which had hitherto defied cure. The circumstances of his visit to the prophet are related under Elisha. His request for two mules’ burthen of earth is not easy to understand. The explanation is that, with a feeling akin to that which prompted the Pisan invaders to take away the earth of Aeceliana for the palace at Pisa, the grateful convert to Jehovah wished to take away some of the earth of His country wherewith to form an altar. (2 K. 5:20, 22.)

Naamathite, the gentile name of Job’s friend Zophar (Job 2:11,11.20, 14.2). The town whence it is derived is unknown. Probably in or near Edom. (2 K. 3:8.)

Na’mites, The, descendants of Naaman, grandson of Benjamin (Num. 26:40).

Na’arah, second wife of Ashur, the “father of Tekoa” (1 Chr. 4:5,6).

Na’araim, son of Ezri; one of David’s mighty men (1 Chr. 11:37). (1 Chr. 11.37.)

Na’aran (1 Chr. 7:28), Na’arath (Jos. 16:7), a town on E. border of Ephraim N. of Jericho. The name probably signifies “irrigation.” Josephus (17 Ant. xiii.1) says that Jerusalem was a place where a stream diverted by a wall which watered the village Nearer to irrigate his palm-trees in the plain. Eusebius makes Naaraath “a little village of Jews 5 miles from Jericho.” These notices apply to the ruin called ’Atulh, 5 miles N. of ancient Jericho. An aqueduct runs E., from 1 Am el ’Atulh, for 5 miles to Khabul el ’Atulh off Taftah (or the Lower ’Atulh), and bends N., with several irrigation channels leading out of it eastwards. There are still a few dwarf palms in the plain close by. (C. E. C.)

Naashon. [Naushon.]

Naasson, the Gk. form of the name Naasson (Mi. 1).—1: Na’athus, one of the family of Adi who put away his foreign wife (1 Esd. 9:31 only).

Nabai, a rich sheep-master, of the house of Caleb, dwelling on the plateau or “hill-country” of Judaea. His shepherds were encroached on, at the suitable season, to drive his flocks in the wild downs in the desert of Carmel (1 Sam. 25:2,3). On one of these excursions they met a band of outlaws, who showed them unexpected kindness, protecting them by day and night, and never themselves committing any depredations (ver. 7,15,16). Hearing that Nabai was about to shear his sheep—a time of great festivity (re. 2.46)—David sent ten of his young men, accompanied from the shep’-master some reward for his services. This Nabai churlishly refused: “Who is David ? and who is the son of Jesse ? there be many servants nowadays that break away every man from his master” (ver. 10). Informed of her husband’s conduct, Abigail, with a long train of asses loaded with provisions, set forth to meet David, who had already determined upon vengeance (ver. 22). He accepted her present, laid aside his anger, and thanked her for saving him from a crime (ver. 18,35). Abigail returned, and found Nabai at the height of his revhecy. The next morning she told him of the risk he had run, and the heart of Nabai * died within him, and he became as a stone.” It was as if a stroke of apoplexy or paralysis had fallen upon him. Ten days he lingered, “and the Lord smote Nabai, and he died” (ver. 37,38). (N. C. B.)

Nabathites, The (1 Mac. 5:25,9,35). (Naboth.)

Naboth, victim of Ahab and Jezebel. He was a native of Jezebel, and the owner of a vineyard, which was close to the palace (Heb.) or threshing-floor (LXX.) of Ahab (1 K. 21:1). In accordance with the gentile texts, the vineyard was near the city wall, and immediately adjoined the vineyard (1 K. 21:1,2, Heb.; 1 K. 21:2, LXX.; 2 K. 9:30,36), and it thus became an object of desire to the king, who proposed to its owner to purchase it, or give him in exchange another and better vineyard. This Naboth refused to do: “Jehovah forbid it to me that I should give the inheritance of my fathers unto thee” (1 K. 21:4; cf. Lev. 25:23; Num. 36:8). Ahab was cowed by this reply; but the proud spirit of Jezebel was roused. She took the matter into her own hands. A solemn fast was proclaimed; Naboth was “set on high in the public place of the king’s palace,” and reproved with the words, “are you not ashamed of having “cursed God and the king?” He and his children (2 K. 9:26) were dragged out of the city and slain the same night by stoning, the usual punishment for blasphemy. The doom pronounced upon Ahab and Jezebel is recorded in 1 K. 21:17-24; its fulfilment in 1 K. 22:38, 2 K. 9:25,26,27. (B. 1.e.c.)

Nabuchodon’sor’son (1 Esd. 1:40 fl.; Tob. 14:15; Jth. 1:1, etc.) = Neruchadnezzar.

Nacho^n’s threshing-floor, the place at which Uzzah lost his life in his too hasty zeal for the safety of the ark on its way from Kirjath-jearim to Jerusalem (2 Sam. 6:6). (C. Iu. 1.1, etc.)

Nadab.—1. Eldest son of Aaron and Elisheba (Ex. 6:23,24; 1:3 Nu. 3:2). Nadab and his brother Abihu were slain before the sanctuary by fire from the Lord, for kindling the incense in their censors with “strange fire”—i.e. not taken from that which burned perpetually (Lev. 6:13) on the altar (10:1; cf. Ex. 30.
NADABATHA

9).—2. King Jeroboam's son, who succeeded to the throne of Israel 926 B.C., and reigned 2 years (1 K.15.25-31). At the siege of Gibbethon a conspiracy broke out in the army, the king was slain by Baasha, a man of Issachar (15.25-31), and the prophecy of Ahijah the Shilohite (14.10) fulfilled.—3. Son of Shammar (1 Chr.2.28) of the tribe of Judah.—4. Son of Jehiel (8-30,9-36) of the tribe of Benjamin.

Nadabatha, a place from which the bride was being conducted by the children of Jambri when Jonathan and Simon attacked them (1 Mac.3.97). See NODAB, with which it is perhaps connected. [c.r.c.]

Nehari, or Neharai, or Naharai (1 Chr.3.7). It represents the Heb. nūgah (1 Chr.2.2).

Nahalal' (Jos.21.35), Nahalal' (19.15), Nahalol' (Judg.1.30), a town of Zebulun, given to the Levites, but in which Canaanites remained as tributaries. The site is uncertain. Asherophilus (Mekhaur, Pal.), the later name was Mahul, which might be Ma'ālāl 3 miles W. of Nazareth, or more probably 'Ain Māālīl 3 miles N.E. of Nazareth, both still inhabited villages. [c.r.c.]

Nahaloth (the valley of God; Num.21.19). Israel, entering Moab from Ith and the brook Zered, the site of this valley, was called Nahaloth. N 8 miles as the crow flies to the south of the Dead sea, where there is no water. The tributary streams of Nahaloth are numerous, and the range of this valley and its branches is well marked in the topographical chart. [c.r.c.]

Nahalol' (the valley of God; Num.21.19). Israel, entering Moab from Ith and the brook Zered, the site of this valley, was called Nahaloth. N 8 miles as the crow flies to the south of the Dead sea, where there is no water. The tributary streams of Nahaloth are numerous, and the range of this valley and its branches is well marked in the topographical chart. [c.r.c.]

Nahalal' (Jos.21.35), Nahalal' (19.15), Nahalol' (Judg.1.30), a town of Zebulun, given to the Levites, but in which Canaanites remained as tributaries. The site is uncertain. Asherophilus (Mekhaur, Pal.), the later name was Mahul, which might be Ma'ālāl 3 miles W. of Nazareth, or more probably 'Ain Māālīl 3 miles N.E. of Nazareth, both still inhabited villages. [c.r.c.]

Nahalot (the valley of God; Num.21.19). Israel, entering Moab from Ith and the brook Zered, the site of this valley, was called Nahaloth. N 8 miles as the crow flies to the south of the Dead sea, where there is no water. The tributary streams of Nahaloth are numerous, and the range of this valley and its branches is well marked in the topographical chart. [c.r.c.]

Nahal, or Nahalai, or Nahalai (1 Chr.6.19). Nahalani', a leader of those who returned from Babylon with Zerubbabel (Ne.7.7).

Naharai or Nahari', a native of Beeroh who was Joab's armour-bearer (2 Sam.23.37; 1 Chr.11.39).

Nahash (serpent). Probably all the passages in which this name is found relate to the same person. He was king of the "children of Ammon" at the time of Saul's election, and survived David's accession for some years. It was about the former date that he threatened the inhabitants of Jabesh-gilead with the loss of their right eyes (1 Sam.11.2). The crisis thus produced seems, according to Samuel's address at Gilgal (1 Sam.12.12), to have formed the main incentive to the establishment of the Israelitic monarchy. As, however, Nahash's menace is stated to have occurred after Saul's election at Mizpah (1 Sam.10.17-11.1), it is possible that Samuel's words may have reference to earlier attacks on the part of Ammon. The attempt on Jabesh-gilead was signally defeated, the Ammonites suffering severe loss (1 Sam.11.11). Josephus indeed asserts (6 Ant. v. 3), but apparently without historical support, that Nahash was himself slain. Some service was evidently rendered by Nahash to David, the latter of whose children Ish-bosheth or Achish (1 Sam.21.15), while later "Shobi the son of Nahash" gave David substantial assistance in his flight from Absalom (2 Sam.17.27ff.). Some light seems thrown on the cause of the friendly relations between David and the Ammonite ruler in 2 Sam.17.25. Amasa, commander-in-chief of Abishai, and Amnon, the grandson of Nahash, who was the son of Ithra by "Abigail, daughter of Nahash, sister to Zeruiah, Joab's mother." It is true that Abigail and Zeruiah elsewhere (1 Chr.2.16) appear as sisters of David, and thus presumably daughters of Jesse, although, it may be observed, he is not there directly called their father. The discrepancy, if there be one, disappears, if we consider that the woman who had been Nahash's wife or concubine had, after bearing him Abigal and Zeruiah, been given in marriage to Jesse. On the other hand, the words "daughter of Nahash" have been taken (e.g. by Wellhausen, Text d. BB. Sam. p. 201; G. B. Gray, Heb. Proper Names, p. 91) to be an interpolation in the Heb. text. [A.W.S.]

Naphath.—1. A "duke" or phylarch of Edom, eldest son of Reuel son of Esau (Gen.36.13,17; 1 Chr.1.37).—2. A Kohathite Levite, son of Zophai (1 Chr.6.26).—3. A Levite; one of the overseers of the tithes in the reign of Hezekiah (2 Chr.31.3).

Nabhi', the Naphtalite spy; son of Vophsi (Num.13.14).

Nahor'. This name occurs twice in the genealogy of Abraham's stock (Gen.11.22 and 26).—1. The grandfather of Abraham.—2. One of Abraham's two brothers. The latter remained behind in the country from which (Abraham and his sons) came, and became the grandfather of Rebekah. The two lines were thus connected again by the marriage of Isaac, and also by that of Jacob, who married the daughter of Laban, another grandchild of Nahor. [n.p.s.]

Nahshon, or Naxshon, son of Amminadab (Ru.4.4), father-in-law to Aaron (Ex.6.23), and prince of the children of Judah (1 Chr.2.10) at the time of the first numbering in the wilderness (Num.1.7, etc.). In the encampment, in the offerings, and in the order of march, the first place is assigned to him.

Nahum (nāḥum, "comfort"); Naooa, the prophet, was a native of Elkosh, the situation
of which, however, is very doubtful. It has been placed in Galilee, and on the E. of the Jordan near Bethabara; it has been thought to be on various positions — *Datu*. The question of the date is simple. The prophecy has but one thought—Woe to Nineveh, the bloody city. Nineveh fell before the joint attacks of Babylonians and Medes in 607–606 B.C. On the other hand, we have a highly suggestive warning that no city must think itself secure since No-amon, or Thbes, had been taken and sacked by a conqueror. It seems clear that the reference is to the capture of Thebes by Assur-banipal in or about 663 B.C. At what point between these limits we must place Nahum must be a matter of opinion. Yet it is clear that the very force of the appeal to Thbes springs from the recent and vivid memory of a recent event, and that the reference to Nineveh was a recent one, and fresh in the memories of all men, as it would not have been a generation later. Thus Dr. Schrader (*Cuneiform Inscrip. and O.T., ii. 152, Eng. trans.*) takes 660 B.C. as the approximate date of the utterance.—Style. The contents of the book are singularly homogenous, and many of the single sentences are due to a common prophet, not an arrangement. In the composition there is a marked parallelism of thought, and the whole falls into a vividly picturesque style. So fiercely wrought is the prophet, that there is no room for one word of thankfulness to God for the deliverance. The style is one of great force and power, and the overthrow of Nineveh is pictured in a manner hardly anywhere equalled in the Bible. Not a few words and forms are more or less peculiar to Nahum, and the word rendered "captains" (marshals, R.V.) is undoubtedly Assyrian (3.17). —Integrity. Until recently the integrity and unity of the book have been taken for granted. Of late, however, the character of Nahum as a work in Stade's *Zeitschrift für die A.T. Wissenschaft, 1893, p. 223? has been breached that 1.2–2.2[3] is an alphabetic psalm. The kind of handling Gunkel indulges in might lead to any results, and Dr. Driver puts the matter wisely when he attributes the phenomena of the text to "the fact that the author allowed himself here and there, and perhaps half accidentally, to follow the alphabetic order." Again, if the alphabetic arrangement were lost, could there be the least chance of restoring it? If the theory be accepted, we have in ch. 1 a poem of quite late date, which has nothing at all to do with the fall of Nineveh. The genuine work of Nahum is in that case ch. 2, which is simply a description of the fall of the tyrant-city, or a declaration of the fall when imminent. Ewald, *Prophecies of O.T*. (Eng. trans.); Pusey in his *Minor Prophets*: Orelli (Eng. trans.); A. B. Davidson in *Camb. Bible for Schools*: G. A. Smith, *The Twelve Prophets*, vol. ii. [6.18.]

**Naidus**. Bruxam, 8, of the sons of Pahath-moab. Addi (1 Esd. 9.33; cf. 2 Esd. 10.30).

**Nail.** (1) Of finger (ʾṭḥm). This sense occurs only once (Deut. 21.12). The reference is to the cutting away of a part of the body to which impurity clings; the same idea exists among Arabs. (ʾṭḥm is used of eagles' nails (Dan. 4.33).) (2) *yāḥidh* is used of a tent-peg (Judg. 4.21), as a peg to hang things on (in a S.S.E. picture), *mashār* (or *mashmer*), more in the modern sense, occurs in [1.10.4, etc. In N.T. the word only occurs in Jam. 2.25 of "the print of the nails." [W.O.E.O.]

**Naín** (Lu. 7.11). Eusebius places it correctly about two miles from Tabor (Onomasticon). Now Nin, a village W. of Endor and 6 miles S.S.E. of Nazareth, situated on a small plateau on the N. side of the hill of Nebi Dubah. There are rock-cut tombs near a spring on W., which may mark the cemetery to which the widow's son was being taken. A path ascends from the valley on the N.W. [C.E.C.]

**Naloth**, or more fully, *Naboth in Ramah*, a place in which Samuel and David took refuge together, after the latter had made his escape from Saul (1Sam. 19.18, 19, 22, 23, 20.1). Josaphus (5 Ant. xi. 5) thinks it was not actually in Ramah. The name signifies "habitations," and from an early date has been interpreted to mean the dwellings of the school of prophets there (see e.g. 2 Kings 1.10).—NAMES. The origin and significance of names have always been matters of interest, sometimes of strike. Nowhere, however, does the study of names approach the importance that it has in religious matters, where it touches the most vital doctrines, pervades worship, and exercises the greatest influence on moral life. A name is the sign of something or of an idea of something. The giving of names is the prerogative of man, a prerogative which he shares with God. Whatever may be our opinion of the narrative of the Creation, the account of the giving of names in Gen. 2.19, 20 represents the truth. The names that Adam gave were the expression of man's mental insight into the nature of the beings. In Rev. 2.17, 19.12 the divine mystery of names receives its highest expression (cf. Gen. 32.20). The significance of names consists in the fact that they recall the individual with his character and history, and thereby give the reader an early belief of the Israelites, as of other races, that a spirit or demon was bound to come if his name was correctly invoked. Hence the Jews ascribed our Lord's miracles to His having learnt the correct pronunciation of the name of Jehovah. The importance of names is not a matter of fancy but of divine purpose. God gave names (Isaac, Jesus, John) and changed them (Israel), as our Lord did (Peter). The meaning of the change in "Abraham" and "Sarah" is that He introduced into both of them a letter of His own name (7), and it was the sign of the covenant made with them (Sarah is the only woman whose name was changed), just as Joshua's name was changed at the renewal of the covenant also by the insertion of one of the sacred consonants. The religiousness of the Hebrews is well exemplified in their names: the majority of them are compounds of the name of God, and of the one God. In earlier names the word El, predominant; later compounds of Jan are more common; others are compounded of titles (e.g. Baal = Lord, Melch = king), originally applicable to Jehovah, though afterwards associated more exclusively with individual heathen gods (see Robertson, *Early Religion of Israel*, p. 176).
Few, if any, show signs of totemism, and those chiefly of females: Deborah (bee), Rachel (ewe), Huldah (mole-rat), Nahash (serpent). The interpretations found in the Bible are often later glosses, and show attempts to interpret foreign words by Heb. sounds, e.g. Moses (Ex.2:10). It is unlikely that Pharaoh’s daughter would have given, or even known, a Heb. name; the word may be Egyptian, and means “son of water” (maced). Jerusalem is probably not a Heb. word, being found on the Amarna tablets. It is remarkable how seldom the great names of history were repeated, e.g. Abraham and David never. Names generally expressed some pious wish or prayer, or, in the case of women, an expression of gracefulness or beauty: Tamar (palm-tree), Ruth (beauty), Tabitha (gazelle). The divine intervention with regard to names, so different from the case in the majority of races, is a matter of marked importance. The Almighty has pronounced judgment on those who take His Name in vain; the Lord’s Prayer bids us pray, “Hallowed be Thy Name”; and in the “Te Deum” devotion is summed up in the words “We worship Thy Name,” for the Name represents all the attributes of the Almighty; hence too miracles were worked in the Name of Jesus Christ. [FAMILY.] [B.R.]

Nanea (Nārāē, 2Mac.1:13,15; cf. 2Mac. 6:1-4), originally an old Akkadian goddess Nann or Nanu (“the lady”, cf. Ninna = Nineveh), mentioned in very early days on cylinders of Gudea, and afterwards called the consort of Nebo and associated as such with Tašmetu. Assur-bani-pal states that he brought back to her temple at Erech a statue of Nāna which had been carried off to Elam 1635 years before. She was the Ishtar (Ashtoreth) of Erech and had many titles, such as “lady of Agade,” “lady of Babel,” and “associate of the Sun-god.” Later she was identified with the Anāhita of Persia. This word means “the Undeñled,” and was originally an attribute and then a name of A̓rēvid Sūra, a sacred river, the celestial source of waters and of the goddess presiding over them, and hence over generation. Artaxerxes Mnemon in one of his inscriptions is the first to mention her (in Akhaem. Pers. Anahata), together with Aurora and Mithra, as his guardians. Afterwards she was very widely worshipped and had many temples in her honour throughout Persia. In Armenia until long after she was one of the most popular deities. Her images were often of the precious metals, and hence she was styled “the Golden.” The treasures of the State were generally placed under her protection in her temple. This probably explains why the Seleucidae more than once tried to pillage such temples. Strabo is right in identifying Nanea with Anālīs, the Gk. form of Anāhita, and Anāis is the Ephesian (as distinct from the Gk. virgin huntress) or Asian Artemis (Ac.19:35; see R.V. marg.), who was the same nature-goddess that was elsewhere styled Aphrodite and Mylitta (= genitrix). Nanea is probably the deity called “the Desire of Women” in Dan.11:37. Rawlinson, W. A. Inscriptions. [W.S.C.T.]

Naomi¹, wife of Elimelech, and mother-in-law of Ruth (Ru.1:2, etc.). The name is derived from a root signifying sweetness, or pleasantness, and this contributes to the point of the
NAPPHISH

paronomasia in 1.20, 21, though there is also a play on the mere sound of the name: "Call me not Naomi [pleasant], call me Mara [bitter]; for Shaddai hath dealt-very-bitterly [ḥēmār] with me. . . . Why call ye me Naomi when Jehovah hath testified [yāš] against me?"

Naphish, the last but one of the sons of Ishmael (Gen.25.15; 1Chr.1.31); or Nephish (1Chr.5.19; cf. R.V.). It apparently applies to a tribe E. of Gilead or of Moab. [C.R.C.]

Naphish (1Esd.5.31) = Nepheshim.

Naphthali (=my struggle), Jacob's fifth son, the second child of Bilhah and own brother of Dan, whom Rachel adopted as the son of her slave-woman, according to a custom noticed in the laws of Hammurabi, in Abraham's age. Hence Rachel's exclamation, "In struggles with God I have struggled with my sister and I have prevailed" (Gen.30.8). Naphthali and his descendants are noticed in 37 chapters of P.S., and there is an allusion to Naphthali in Mt.4.13. There were four families descended from the four sons of Naphthali (Gen.46.24; Num.36.48-50; 1Chr.7.13), the chief of the tribe in the desert being Ahira, and the spy selected from it Nabi. In the blessing of Jacob the LXX. rendering of the Heb. (Gen.49.21) seems to be the best: "Naphthali is a free growing stock, good in giving produce." In the blessing of Moses (Deut.33.23) the Heb. reads: "Possess thou both sea [or "lake," yām] and dry land" (dārōm), in evident allusion to the tribal lot, including the Hejil and Genesaret Lakes, and the dry plateau W. of the latter, as well as Mount Naphthali (Jos.20.7), or the mountains of Upper Galilee. The tribe at first failed to occupy places in the lowlands held by Canaanites (Judg.1.33), like Beth-anath and Beth-shemesh. Barak belonged to this tribe, which, aided by Zebulun, defeated the king of Hazor, and the sar, or "chief," of his array, Sisera—perhaps an Egyptian resident (Nēs-Ra, "servant of Ra," for Ramses II, some little time before, had taken Tahor, as well as Beth-anath, Merom, and other towns in Galilee, according to his own records (seeJudg.4.6,10,5.18). The tribe of Naphthali aided Gideon (6.35-7.23), and became organized as the eighth of Solomon's districts (1K.4.15). Their lands were invaded by the Assyrians in 10th cent. B.C. (1K.15.20; 2Chr.16.4), and by the Assyrians in 734-732 B.C. (2K.15.25), when in the northern tribes, with those E. of Jordan, were carried captives to Assyria. The idols of Naphthali (whether of the Hebrews, or of strangers introduced by the Assyrians), were destroyed by king Josiah (2Chr.34.6) in the cities "with their villages round about." In earlier times the "princes" of Naphthali and Zebulun had worshipped in Jerusalem (Ps.68.27). Isaiah (9.1) refers to the Assyrian attack; and to a future glory (see R.V.) for the land of Zebulun and Naphtali (hence also Ezek.48.29-34; Mt.4.13).—The Tribal Lot (Jos.19.32-39) included about 800 square miles of country, embracing the mountains of Upper Galilee, the Upper Jordan valley to the river, and the plateau of volcanic soil above the sea of Galilee to W. The W. border, between Naphthali and Asher, is defined by the towns Migdol-el, Edrei, Heleph, and Dabbasheth, in Naphthali and on N. of Zebulun, and by Kanah and Ramah in Asher. At Dabbasheth the border turned E. and, including Ramah of Naphthali, ran to Hannathoth, being the N. border of Zebulun. It then ran S., leaving Hebron and Adamah in Naphthali, and E. border of Zebulun, till, at Daberath, mount Taahir formed the point of contact with Issachar. The S. border of Naphthali then ran E. along a deep ravine, leaving Jabnehel and Adamah in Naphthali, and Anaharath in Issachar. On the N. Naphthali reached to Dan and Lycon, or to the sources of Jordan. The mountain region—though well watered and producing trees and vines—is very rugged; but the corn plateau W. of the sea of Galilee and the fertile vale of Genesaret were richer lands. [C.R.C.]

Naphthar, the name given by Nehe- miah to the substance which after the return from Babylon was discovered in the dry pit in which at the destruction of the temple the sacred fire of the altar had been hidden (2Mac.1.19-36). The place from which this "thick water" (ver. 20) was taken was enclosed by the "king of Persia" (Artaxerxes Longimanus), and made holy place (335 B.C.) connected with Persian fire-worship such as that of the old temple at Baku—still served in 1879 where petroleum furnished the holy
NAPHTHUIHM

fire stream) was attached in the Middle Ages to the Bir Yebu outside Jerusalem on the S.E. The word "naphthar" is explained (1:36) as נָחַתָה (Naphthah) (A.V. Naphthah). [c.r.c.]

Naphthum. Save from ingenious deduction, scarcely anything has been brought to light concerning any tribe, race, or locality bearing this name. Amongst the descendants of Noah (Gen.10.17) R.C.B. (1 Chr.6.11) "Mizram begat Ludim, and Anamim, and Lehahim, and Naphthum," with others. It has been attempted, though hardly with success, to connect the district near to Memphis, where the Egyptian god Ptah was venerated, with a race (they of Phtah) who followed this worship. The name Naputa in Nubia, which, as Aten-Ra worship, offers also a tempting solution, though lacking confirmation. Beyond being of Mizraite descent, little can be asserted of the Naphthum. [A.H.P.]

Napkin. [Handkerchief.]

Nareis'ssus, a dweller at Rome (Ro.16.11), some members of whose family were known as Christians to St. Paul. Lightfoot and others have identified him with Narcissus, the favourite of the emperor Claudius, put to death 54 A.D. But the name is so common that this must be deemed no more than an interesting conjecture. [A.C.D.]

Nard. [Spikeard.]

Nathan, the nephew of Tobit who came to the wedding of Tobias (Tob.11:18).

Nas'ith (1 Esd.5:32) = NEZIAN.

Nas'or, Plain of, the scene of an action between Jonathan the Hasmonaean and the forces of Demetrius (1 Mac.11:67). [Hazor.]

Nathan.—1. A Hebrew prophet who first appears as approving David's project of building the temple (2 Sam.7:3), but that very night was charged with Jehovah's message to David forbidding it. The refusal, however, was accompanied by a promise that a son of David should carry out the work, and his throne should be established for ever; "I will be his father, and he shall be my son; and I will establish his throne for ever upon his kingdom." This was one of the most notable Messianic prophecies in the O.T. (2 Sam.7:12-17; 1 Chr.17:11-15; cf. 2 Chr.28:3,6,7). Nathan next appears as reproving David for the sin with Bathsheba, by his famous apologue on the rich man and the ewe lamb (2 Sam.12:1-12). On the birth of Solomon he was either specially charged with giving him his name, JEDIDIAH, or else with his education (2 Sam.12:25). In the last years of David he advised Bathsheba in the matter of Solomon's accession; he entered the royal presence to remonstrate against the king's apathy; and at David's request assisted in the inauguration of Solomon (1 K.1.59). He left two works behind him—a history of David (1 Chr.29:29-30) and a history of Solomon (2 Chr.9:29).—2. One of the four sons of David by Bathsheba (1 Chr.3:5; cf. 14:4 and 2 Sam.5:14). He appears as one of the forefathers of Joseph in the genealogy of St. Luke (3:31).—3. Son or brother of one of the members of David's guard (2 Sam.23:36; 1 Chr.11:48).—4. One of the head men who returned from Babylon with Ezra on his second expedition (Ezr.8:16; 1 Esd.8:44). He may be the same with the "son of Nathan" in Ezr.10:39. [H.C.B.]

Nathanael.—1. (1 Esd.1:9) = NATHANIEL, 7.-2. (9:22) = NETHANEEL, 8.-3. An ancestor of Judith (Jth.8:1).—4. A man of Cana brought to Christ by Philip (Jn.1:45). He is welcomed by Christ as a type of the true Israelite, reproducing the character of Jacob, without his guile, and this leads to the promise that he and the other disciples shall see, as he did at Bethsaida, a vision of God and the ministry of angels (Jn.1:51). It can hardly be doubted that one who made so early and so remarkable a confession of his faith (Jn.1:49) was included in the number of the Twelve, and this is confirmed by the position in which the narrative of his conversion occurs, and by his being enumerated among the disciples in Capernaum (Jn.21:2). Several of the Twelve bore two names, but the most probable identification is with Bartholomew, which is a patronymic form (son of Tolma). That Bartholomew is placed next to Philip in three of the lists seems to point to a special intimacy (cf. Jn.1:45) that favours his identification, however, does not appear in early writers, nor is it recognized in the choice of the Epistle and Gospel for St. Bartholomew's Day. [E.R.B.]

Nathani'as (1 Esd.9:34) = NATHAN, 4. Nathani-me'lech, a eunuch (A.V. chamberlain) in the court of Josiah's father (2 K.23:13).

Na'm, son of Esli and father of Amos, in the genealogy of Christ (Lk.3:25), about contemporary with the high-priesthood of Jason and the reign of Antiochus Epiphanes.

Na've, the LXX. form of Nun, father of Joshua, retained in Eccl.46:1.

Nazareth, a native of Nazareth. The word has no connexion with Nazarite (separated), but is connected in Mt.2:23 with the Heb. n̄ācher, from the same root (to be vāndant) referring to the prophecy of the "branch" of the house of David (Is.11:1). The word (yemah) used in Zech.3:8 is different (see 6.12). The Christians were called Nazarites by the Jews (Ap.24:5), as followers of Jesus of Nazareth; and this remains the usual term (Nasrânē, m.; Nasrâyōn, fem.; Nasârâh, collective plur.) for Christians in Asia to the present day. [C.R.C.]

Nazareth (Heb. nāzârā, probably derived from its spires), the home of both John and Mary (Mt.2:23; Lk.1:26,2:39), which our Lord went to leave to Capernaum (Mt.4:13), passing thus from Zebulon to Naphtali (the gospel referring in this passage to Is.8:1). He was, however, still regarded by the Jews as the "prophet of Nazareth" (Mt.21:11), which lay in Galilee (Mt.13:5; Lk.4:4), and where Jesus was brought up (Lk.2:51). In its synagogue He read the lesson for the day (4.16), when He was thrust out and led to the "brow of the hill on which the city was built that they might cast Him down headlong" (4.29); see also Lu.18:37; Jn.1:45,46,18,5). Nazareth
NAZARITE

was apparently a small place; and, as it did not lie on any main route, but in a mountain plateau, it is unnoticed in O.T., Josephus, and the Talmud; but it retains its old name as of Nazareth to the present day. Nathaniel could not believe that "any good thing" could come from such a little country place (Jn. 1:46); and the Jews remarked that no former prophet is said, in O.T., to have come from Galilee (Jn. 7:52). Jerome (Onomasticon) calls Nazareth a little village (viciulus), Galilee, 15 miles E. of Legion (Legio), near mount Tabor. He gives a fanciful rendering ("flower") for the name (Paula et Eustochium, 8); but mentions no sacred sites or church at Nazareth. The town lies 12 English miles N.E. of Legion and 5 miles W. of Tabor, on a plateau 1,300 ft. above the sea, and 1,000 ft. above the plain to the S. A hill rising 300 ft. higher overlooks the site on God (Lev. 22:2; Ezek. 14:7). A Nazarite is, consequently, one who separates himself or is separated for a religious reason from the rest of the people. In the law of the Nazarite a man or woman who had taken a vow of separation unto Jehovah was bound to avoid all possible ceremonial defilement throughout the whole period, and was subject to some of the same restrictions as the high-priest himself (cf. Num. 6:1-21, with Lev. 21:10-12, "the Law of Holiness"). Modern criticism supposes these laws to be of comparatively late date, but Nazaritism, or self-consecration by vow, was probably of great antiquity, and played a considerable part in the life of the Israelites. The Nazirite was to abstain from wine, grapes, and all possible produce of the vine (Num. 6:3, 4); and no razor was to come upon his head, but his hair was to be allowed to grow. Above all things, whilst the

N. and a precipice, overlooking the plain 2 miles S. of Nazareth, is called Jebel Qafar (mountain of the leap), being the traditional "Leap of our Lord" (Luke 4:29) in the Middle Ages. The spring in the Gk. church (whence a channel runs to a public fountain of modern date on S.) is the traditional site of the Annunciation. The mediaeval Latin cathedral is built over caves ("the Holy House"), which seem to be ancient cisterns. The sites of Joseph’s workshop, and of the synagogue, are yet more recent. Nazareth is a flourishing Christian town, with a large orphanage, and an Anglican church with a spire. The population is about 6,000, including 2,000 Moslem. Hebrew rock-cut tombs are found on the N.W. (Nyer, W. Pal., pp. 275-270, 328). [C.B.C.]

Nazarite or Nazirite. The word nazir is derived from a root meaning "to separate," used in the Bible of religious separation (Zech. 7:3; Ho. 9:10), also of separation from consecration of God (nīzēr 'ĕlokīm) was on his head, he was not to defile himself by contact with a dead body, even of his nearest relative —his wife and child are not, however, mentioned; and even if a man fell down dead near him he had to go through an elaborate purification (Num. 19:11ff.), offer a sin-offering, and begin again the period of his vow. When the days of his vows were fulfilled, he was brought by the priest to the door of the sanctuary, and burned (vādī), sin (ḥattāl), and peace (shelêm) offering, together with the meal and drink offering, were made, showing the importance of the ceremony. He was then to offer the hair of his separation in the sacrificial fire, the prescribed portions of the sacrifice were to be put by the priest on his hands, the wave and breast offerings were solemnly made, and "after that the Nazirite may drink wine" (6:20). There are no specific instances of such Nazarites as these described in the Pentateuch in the

THE "VIRGIN’S FOUNTAIN," NAZARETH. W.P.A.
O.T.; but the name is applied to Samson, who is commanded by the angel to be "a Nazirite of God from the womb." Neither in the case of Samson do we have any thing but life-long abstinence from wine. The unshorn locks alone denote the Nazirite, though in the case of Samson his mother is to drink no wine nor strong drink during her pregnancy (Judg.13. 3-7; 1Sam.1.11). In the case of John the Baptist nothing but life-long abstinence from wine. He lived, however, the life of an ascetic (Mt.3.1,11.18, etc.)—a circumstance which may be illustrated from Am.2.11,12, where the Nazirites, who abstained from wine, are joined with the prophets in being raised up by divine inspiration. The position of a Nazirite was evidently higher, as is shown by the elaborate sacrifices, the similarity of his consecration to that of the high-priest (the crown of the anointing oil—Lev.21.12—is rendered nêzer, the same as consecration in Num.6.7), and the name nāzîr, which is used twice of Joseph in the sense of "priest" (Gen.41.53; 50.26).) There is one allusion to Nazirites in the Apos. (1Mac.3.19); and in N.T. we have the case of St. Paul, at the request of the Jewish Christians of Jerusalem, assisting the four brethren who had a vow in the temple (Ac.21.23,24). It is disputed whether St. Paul had taken a Nazirite vow when he is said to have shaved his head at Cenchreae (Ac.18.18). In Josephus, Nazirites are mentioned in 2 Wars xv. 1, 19 Ant. vi. 1. The Rabbis made a distinction between the "Nazirite of days" and the "Nazirite for life," and prescribed 30 or even 60 days for the period during which the vow was to last. The objects of the three features of the Nazirite vow—(1) the abstinence from wine, (2) the growing of the hair, and (3) the avoidance of pollution—have to be considered. (1) It is a question whether wine was rejected for an ascetic reason. It is noteworthy, however, that not only wine but an intoxicant was shunned—as in the case of the priests during their ministrations (Lev.10.11). It is reasonable to conclude from this reason it seems probable that the Nazirites, like the Rechabites, rejected wine, as Robertson Smith says, "as a religious protest against the Canaanite civilization in favour of the simple life of ancient times." (2) The hair is regarded by many primitive people as the special seat of life and strength, and therefore the inviolability of the Nazirite's hair was a sign of his consecration to Jehovah. (3) All Israelites had to observe a law of ceremonial holiness, but it was peculiarly binding on those under this vow.  

Neah', a place which was one of the landmarks on the N.E. boundary of Zebulun (Jos.19.11 only). The site is unknown.  

Neapolis is the place in N. Greece where Paul and his associates first landed in Europe (Ac.16.11), where no doubt, he landed also on his second visit to Macedonia (Ac.20.1), and whence certainly he embarked on his last journey through Thessalonica, Philippi, Thessalonica, and Thessalonica (Ac.20.6). It was a town of Philippi. It has been questioned whether the harbour occupied the site of the present Kavalla, a Turkish town on the coast of Roumelia, or should be sought at some other place. Cousinery and Tafel maintain, against the common opinion, that Luke's Neapolis was not Kavalla, the ruined port of the ancient town, but at a deserted harbour 10 or 12 miles farther W., known as Eski (or Old) Kavalla. In favour, however, of the claim of Kavalla to be regarded as the ancient Neapolis we may mention that, first, the Roman and Gk. ruins at Kavalla prove that a port existed there in ancient times. Neapolis, wherever it was, formed the point of contact between N. Greece and Asia Minor, at a period of great commercial activity, and would be expected to have left vestiges of its former importance. The antiquities found still at Kavalla fulfil entirely that presumption. On the contrary, no ruins have been discovered at the ancient site, Kavalla, or Paleopolis, as it is also called, which can be pronounced unmistakably ancient. No remains of walls, no inscriptions, and no indications of any thoroughfare leading thence to Philippi are reported to exist there. Secondly, the advantages of the position render Kavalla the more probable site. Neapolis (1) was a convenient harbour S. of the Hellespont, on coming from the E. It lies somewhat open to the S. and S.W., but is otherwise well sheltered. Thirdly, the facility of intercourse between this port and Philippi. The distance is 10 miles, and hence not greater than Corinth was from Cenchreae, and Achaia from Corinth. The distance between Philippi and Eski Kavalla must be nearly twice as great. Fourthly, the notices of the ancient writers lead us to adopt the same view. Thus Dio Cassius says that Neapolis was opposite Thasos, and that is the situation of Kavalla. Finally, the ancient Itineraries support entirely the identification of the present Kavalla, which is a town of that name, and the ancient site, Neapolis, with Eski Kavalla. Both the Antonine Itinerary and the Jerusalem Itineraries show that the Egnatian Way passed through Philippi. They mention Philippi and Neapolis as next to each other in the order of succession; and since the line of travel which these itineraries sketch was the one which led from the W. to Byzantium, or Constantinople, it is more than probable that, after leaving Philippi, would pursue the most convenient and direct course to the E. which the nature of the country allows. If the road was constructed on this obvious principle, it would follow the track of the present Turkish road, and the next station, consequently, would be Neapolis, or Kavalla, on the coast, at the termination of the only natural defile across the intervening mountains. Neapolis, therefore, like the present Kavalla, was on a high rocky promontory which juts out into the Aegean. The harbour, a mile and a half wide at the entrance, and half a mile broad, lies on the W. side.  

Nebaioth, or Nebayoth (R.V. always Nebaoth). The word means "heights" in the plur. The eldest Ishmaelite tribe, mentioned with Kedar, and Dumah, named ac-
According to "their towns and forts" (Gen.25.13, 10). The population was mingled with that of the Hittites, who were defeated (1Chr.12.20); in later times Nebaioth and Kedar were celebrated for their flocks (Is.60.7). These Nabateans, or "highlanders," dwelt in the plateau S.E. of Edom, and first appear in history in the Assyrian accounts. [ARABIA; DAMASCUS.] They were naturally friendly later—as Nababites to Judas Maccabaeus when, in 164 B.C., he marched into the deserts E. of Gilead to attack Bostra [Bosora]; for they strove for freedom against the Gk. Seleucidae monarchs, as he did (1Mac.8.25, see 9.35). Having allied themselves with the Assyrian invaders of Edom, after 734 B.C., they had gradually spread over all E. Palestine, and had a capital at Petra, where Aretas (Harith) was king c. 166 B.C. (2Mac.8.58). Other kings so named, or called Obodas (as in 93 B.C.), followed him (Josephus, 13 Ant. xiii. 5, xv. 1, 2; 14 Ant. v. 1: 15 Ant. vi. 2; 1 Wars iv. 4, vi. 2). A later Obodas, 24 B.C. (16 Ant. vii. 6), treacherouslythreshed Galatians and attacked Arabia; and a later Aretas ruled c. 38 A.D. (2Cor.11.32). The dynasty opposed Herod the Great, Herod Antipas, and the Romans down to 105 A.D., and prospered as traders between Egypt and Mesopotamia. [EDOM.] The race appears in Arab histories as Nabî or Nabîb (plur. Nabîyâ or Nabîyî); in Jewish, as Nabatâ; and in Christian, as Nabat. (Josephus, ii. 1. iii. 3. xix. 6) mentions Nabatites at Petra and near the Dead Sea, shortly before the Christian era. They lived in villages, and were rich in cattle, but were dredged as pirates in the Red Sea, though famous for justice and honesty. They held a market at Petra, and traded in myrrh, frankincense and silver. They massacred Gk. forces sent against them c. 330 B.C. in the so-called "Book of Nabatânic Agriculture" a work not older than 900 A.D., based on Jewish and Babylonian sources, and it has no value for Biblical studies. Robinson, Bib. Res. ii. pp. 159-164; Koldan, Pal. Illust. 1. pp. 90-93. [C. R. C.]

Neballât, a town of Benjamin, which the Benjamites recaptured after the Captivity (Ne.11.34). It is named with Lozô and Osô. Now Beit Nebila, a village 33 miles N.E. of Lydda. [C. R. C.]

Nebat, father of Jeroboam I (1K.11.26, etc.; 2K.3.3, etc.; 2Chr.9.29, etc.); an Ephraimite (2K.22.20). [C. R. C.]

Nebô (Is.46.1; Je.38.1) is the Heb. form of the name of the well-known Assyro-Babylonian Nabû or Nabû. He was the god of learning and letters, corresponding with the Egyptian Thoth, the Gk. Hermes, and the Rom. Mercury. Astronomically he was identified with Mercury, who was likewise called Nēbô by the Maccabees, and Tīr by the ancient Persians. In the text, which identifies the deity with Merodach, he seems to be called "Merodach of trading," and he occupied a prominent place in Babylonian mythology from the earliest times. The great centre of his worship was the temple-tower now called the Birs-Mûrûd, in the ancient city of Borsippa. Statues of Nebô were set up for the protection of the temple of Adad-nirari at Calah (Ninûrid), and two are now in the British Museum. In late Babylonian names Nabû probably appears as a component part more frequently than does the name of any other god (cf. Nebuchadnezzar, Nabûnûdû, Nebûshazzûr, etc.). His consort was named Iskāšûmmû "she who sees." See Pâchûnes, Religion of Bab. and Assy. (Constable). [T. G. P.]

Nebô (= swelling).—1. A mountain in Moab where the Israelites camped (at Asûdûth-Pîsghâr or streams, N. of the summit), before descending to Shûrûmm (Num.33.17; see 21.20). It "looks towards Jeshûm," and is described as "in the mountain region of the places beyond" (ābâhûrîm, or lands E. of Jordan) "over against Jericho." (Deut.32.19). It is again so described, and identified with the "top of Pîsghâr" (34.13); and Moses' view thence is said to include all the land of Gilgal, the land of Nîbû, and the land of Edom (49.13). The site of the town of Nahû or Nabû, which is 2,990 ft. above the Mediterranean, Nebû being 2,640 ft. above the same. The view embraces the Jeshûm, and N. part of the Dead Sea, with part of the negeb mountains S. of Hebron, and all the watershed of Judah, Bethelhem, and Olivet, with mount Ephraim, Ebal, and Gerizim in Manasseh, the chain of mount Gilboa, and Tabor in Naphtali. The Jordan Valley—including Jericho and Zoâr—lies below in full view, and the only points in the description which are not fully satisfied are the expressions "unto Dan," and "unto the west [or, utmost] sea." For, though Gilead is in the latter case described (Is.16.4), which is 3,592 ft. above sea level) shuts out the sea of Galilee and Hermon, while the Mediterranean is hidden by the watershed of W. Palestine. The site is, however, the only one satisfying the conditions, and we may therefore read "towards" (ād) for "unto" (ūd) in the cases noticed. The situation is furthermore confirmed by the notice of the "field of Zophûm" as beside the "top of Pîsghâr" (Num.33.14), the name surviving in Tāl at es Sîfi close to Nebû. The mountain was known in the 4th cent. (Onomasticon), and identified in recent times by de Luynes. The little "swelling" knoll, to which the name applies, lies W. of the Heshbon plateau, which shuts out the view E., being nearly 100 ft. higher. On the knoll is a cairn, and to N.W., on the flat ridge, there are four domes, and another on the S. slope, where also there is a stone circle, 500 yds. from the cairn, towards S.W. It appears therefore that Nebô was a sacred mountain, surrounded by Canaanite altars—as we learn also from O.T. The view is one of the most remarkable in Palestine (Surv. E. Pal. pp. 108-203). [Pîsghâr.—2. A town of Moab (Num.32.3, 35; 1Chr.5.8; Je.48.1, 22), rebuilt by the Reubenites, who changed the name
It and women against Cheomsh I doomed them; and I took thence the champions [Arōhī] of Jehovah, and dragged them [or, tore them in pieces] before Cheomsh. —3. (Ezr.2.29.) Noticed with Bethel and Ai, and called "the other" (or, "western") Nebo (Ne.7.33), is thought to be Nebu-zar-adan (604 B.C.), who, with his father, in bringing with their own hands material for the restoration of E-temen-an-kī, which the Babylonians called "the Tower of Babylon." He is said to have married Amyitis, daughter of Astyages, king of Media, before the attack of Nabopolassar and the allies which resulted in the downfall of Nineveh (612 B.C.). It is supposed that he was the leader of a Babylonian contingent which accompanied Cyaxares in his Lydian war, by whose interposition, on the occasion of an eclipse, that war was brought to a close in 610 B.C. When Pharaoh Necho (whom Nabopolassar apparently regarded as his governor in Egypt) marched to Babylon, in 606 B.C., Nebuchadnezzar, being advanced in years, sent his son Nebuchadnezzar, the result being that the Egyptian king was defeated in a great battle at Carchemish (J.e. 46.2-12), and the Babylonian army overran the whole district, took Jerusalem (Dan.1.1,2), and was pressing forward to Egypt, when the news reached Nebuchadnezzar that his father had died, after a reign of 21 years. In some alarm as to the succession, he hurried back to Babylon, accompanied by his light troops, and finding everything still tranquil, mounted the throne without opposition (604 B.C.). Disaffection again showed itself in Syria and Palestine in 601 on account of Jehoiakim's rebellion, that king trusting, apparently, to support from Egypt. He was again reduced to subjection (2K.24.1ff). According to Josephus, who is here our chief authority, Nebuchadnezzar punished Jehoiakim with death (10 Ant. vi. 3; cf. J.e.22.18,19 and 38-50), and placed his son Jehochain on the throne. He, however, he aged only 3 months, Nebuchadnezzar, having in his seventh year decided to besiege Tyre, apparently sent an army against Jerusalem at the same time, and afterwards conducted the operations in person, whereupon the Jewish king submitted at once (2K.24.1ff.), and was carried captive to Babylon, where he resided for 37 years, and among those people, and the chief of the temple treasures. Mattaniah was now made king of Judah under the name of Zedekiah, but he, too, proved faithless to his suzerain. Disregarding the warnings of Jeremiah, he made a treaty with Apries (Hophra), king of Egypt (Ezk.17.12ff.), renouncing his allegiance to Babylon. Nebuchadnezzar now commenced his final siege of Jerusalem (588 B.C.), and took the city in 586, after defeating Apries (who had come with a large army), apparently within Jewish territory. J.e.37.5-8 seems to imply that the Egyptians retreated without fighting. When, after all hope of escape was given up, Zedekiah escaped, but was captured near Jericho (J.e.39.5), and brought to Nebuchadnezzar at Riblah in Hamathite territory, where his sons were slain (by the Babylonian king's order) before his face, after which his eyes were put out, and, bound with chains, he was taken to Babylon, where he was confined, and among the inhabitants were carried away captive by Nabu-zar-adan (Nabū-zēr-īššānu), the captain of the guard, to Babylon. Gedaliah, a Jew, was made governor, but was shortly afterwards murdered by his own countrymen, thus putting an end to Jewish rule. Tyre, which was taken that year under Nebuchadnezzar, in 582 B.C., became a confederate of Egypt, and Tyre then submitted (Ezk.26-27; Josephus, Contra Ap. i. 21). Proof of the Babylonian occupation of Tyre is contained in a contract-tablet dated in Nebuchadnezzar's 40th year, from which it would seem that Babylonian influence was supreme in that city. After this Nebuchadnezzar sent an army into Egypt (582 B.C.), attacking Canaan and other points to the west on the way. The inscriptions of this king at Wady Brissa, whither he went to get wood for the temples of Babylon, were carved on this or some similar occasion. He had gone thither, he states, because a "foreign enemy" had taken possession of the district. A mutilated inscription of his father, Nebuchadnezzar, accompanies the inscriptions. From an historical fragment we gather that Nebuchadnezzar made an expedition against Amasis, king of Egypt, in his 37th year. This inscription has a reference to the city of Pūtu Ṭawān, or Ionian Phut, and "a distant district, which is within [across] the sea," pointing to other western conquests. Under the rule of Nebuchadnezzar Babylon became one of the wonders of the world. He adorned the temple of Belus (Ē-sagila) magnificently, likewise the temple-tower of Babylon, E-temen-an-kī, in connexion with it. Josephus also relates that he added another city to that which was there old, and added both the upper and the outer one each with three walls. This, however, receives no confirmation from the German excavations on the site. [BABEL, BABYLON.] After he had thus becomefully walled the city, and adorned its gates gloriously (10 Ant. xi. 1), he built another palace joined with that of his father, as being his own residence, in 15 days (so also Josephus and Berosus). He likewise made elevated places for walking, and built the celebrated hanging gardens, on account of his Median wife desiring to have things
as they were in her own country. A slab regarded as showing a part of Babylon has a representation of Nebuchadnezzar being succeeded by the reign of Assur-bani-apli, c. 645 B.C. (British Museum, Assyrian Saloon). Besides Babylon, he built or restored the temples in many other cities, including that of Nebo (E-zida) at Borsippa, Samas (E-babbarra) at Sippar and at Larsa (Ellasar), Ishtar (E-anma) at Erech, Sin (E-geis-
mandi) at Ur of the Chaldees, with others at Baz, Nippur (Calnei), etc., etc. As may be expected, the inscriptions furnish us with no indication of the madness which, in the book of Daniel, is said to have overtaken him; but that he suffered from such a malady, which the Greeks called "lycanthropy," wherein the sufferer imagines himself a beast (Dan.4.33), is by no means impossible. It has often been remarked that Herodotus ascribes to a queen, Nitocris, several of the important works which other writers (Berosus, Abydenus) assign to Nebuchadnezzar, and which he also, in his inscriptions, claims for himself. The conjecture naturally arises that Nitocris was one of Nebuchadnezzar's queens, who may have carried on his restoration work during some period of inactivity. The great glory and honour attributed to him after his recovery (Dan.4.30) are reflected in his inscriptions, and the fact that he reigned 43 years testifies to his having attained to a fairly advanced age. He was succeeded by his son Evilmerodach, in 561 B.C. Two other sons are apparently mentioned in the inscriptions—Marduk-sun-usur and Marduk-nadin-ahhi, who, as their names occur only in his 40th and 41st years, were probably much younger. [T.G.P.]

Nebushasban (Nebu-shas-bani = O Nebo, free man), a rabbâris of Nebuchadnezzar at the time of the capture of Jerusalem (J. 39.13). Rabâris is literally the chief enmunch (cf. Rab-shakeh, the chief cup-bearer, 2K. 18.17), but probably is here the Heb. equivalent of the Assyr. rubu-su-ra-rešu, i.e. chief captain, the name of a certain rank in the Babylonian army as shown by the cuneiform tablets. [E.R.S.]

Nebuzaradan (Nebu has given a seed), the Rab-tabbachim, i.e. chief of the executioners (A.V. captain of the guard), Nebuchadnezzar's commander-in-chief. Absent apparently during the siege of Jerusalem, he arrived immediately on its capture, and from that moment everything was completely directed by him, save the appointment of the governor of the conquered district by Nebuchadnezzar himself. All this Nebuzaradan appears to have carried out with wisdom and moderation. He seems to have left Judaea for the time when he brought the chief people of Jerusalem to his master at Riblah (2K. 25.18-20). Five years later he further deported 745 captives (Je. 52.30). [A.W.S.]

Necho. [Pharaoh, 9.]
Necodon (1B.15.47) Nikoda, 2.
Necromancer (Dent.18.11). [Magic; Divination.]
Nehemiah (Neh. 3.1-13), a son of Jeroham and descendant of David.
Neemias (Ezech.49.13; 2Mac.1.18f., 2.13) Nehemiah, 7.
Neglah, Neginoth. [Psalms, Titles or.]

Nehemiah, The, the designation of a man named Shemaiah, a false prophet, who professed repentance (2K. 19.36; Jer. 29.21, 31, 32). Whether the name is formed from that of Shemaiah's native place or from the progenitor of his family is uncertain.

Nebuchadnezzar, his kinsman seems to have been of that tribe (1-2, 5.7-2). All that we know certainly concerns him is contained in the book which bears his name, and which is to a large extent autobiographical. He is first at Shushan, the winter residence of the kings of Persia, in high office as the cup-bearer of king Artaxerxes Longinmannus. In the 20th year of the king's reign (c. 445 B.C.) certain Jews, one being a near kinsman, arrived from Judaea, and gave a deplorable account of the state of Jerusalem and of the residents in Judaea. Nehemiah immediately conceived the idea of going to Jerusalem to endeavour to better their state. After three or four months (from Chislev to Nisan), an opportunity presented itself to obtain the king's consent to his mission. He was appointed pashua Judaea, and started under the protection of a troop of cavalry, with letters from the king to the different satraps through whose provinces he was to pass, as well as to Asaph the keeper of the king's forests, to supply him with all that was needed to the undertaking. The project was defeated by the vigilance and prudence of Nehemiah. This armed opposition continued. Various devices were attempted to get Nehemiah away from Jerusalem, and if possible to take his life, but in vain. Having accomplished his great task of rebuilding and peopling the city, after 12 years, Nehemiah returned to Babylon, where the king stayed for part of the year. But after a delay, perhaps of several years, he was permitted to return to Jerusalem. Much had to be done, for the Jews had relapsed into evil ways. He had to purify the temple, to repress the excesses of the nobles and the usury of the rich, and to rescue the poor Jews from spoliation and slavery. He made careful provision for the maintenance of the ministering priests and Levites, and for the due and constant celebration of divine worship. He expelled from all sacred functions those of the high-priest's family who had contracted mixed marriages, and rebuked and punished all inter-marriages, even of laymen, with foreigners; and he provided for keeping holy the sabbath day, which was shamefully profaned by many, both Jews and foreign merchants. Probably in many of
these tasks he was assisted by the prophet Malachi. The autobiography closes shortly after 32nd year. Nehemiah's narrative presents to us the picture of a shrewd, devout, upright statesman. He sacrificed his own interests and ran endless risks for the welfare of his people. He was a man of action, prompt and vigorous, and he was a man of prayer, constantly and confidentially looking up to God, and on which great power and confidence were spoken to Moses hundreds of years before (cf. 1.8,9 with Deut.30.3,4).—2. A leader of the first expedition from Babylon to Jerusalem under Zerubbabel (Ezr.2.2; Ne.7.7).—3. Son of Azbuk, and ruler of the half part of Beth-zur, who helped to repair the wall (Ne.3.16).

Nehemiah, Book of

The city wall (3.12) contains valuable historical materials for setting the topography of Jerusalem. The list of captives (ch. 7) who returned under different leaders from Zerubbabel to Nehemiah (amounting in all to only 42,360 adult males and 7,337 servants) conveys a faithful picture of the political and social conditions of the nation with the times when Judah alone numbered 470,000 fighting men (1 Chr.21.5). The lists of leaders, priests, Levites, and of those who signed the covenant reveal incidentally much of the national spirit as well as of the social habits of the captives, derived from older times. Thus the fact that twelve leaders are named in Ne.7.7 indicates the feeling of the captives that they represented the twelve tribes, a feeling further evidenced in the expression "the men of the people of the Lord." The fact that nine of the chief priests (10.1-8; 12.1-7) bear the names of those who were heads of courses in David's time (1 Chr.24) shows how, even in their wasted numbers, they struggled after the spirit of their ancient institutions. Taken in conjunction with the list of those who sealed (Ne.10.1-27), it proves the existence of a social custom, the knowledge of which explains certain chronological difficulties, e.g. that of calling chiefs by the name of their clan or house. (d) Other materials of information includes the apocryphal portions, as the treasurers' books (12.1-32), with the account of the sacrifices and offerings, the number of servants, and the defraying of the priestly and Levitical salaries. (e) The goldsmiths, whose business probably was to repair the sacred vessels (3.8)—and statistics, reminding one of a Domesday Book. The only task of the political history is to determine whether the dedication of the wall took place in or before the 32nd year of Artaxerxes. The expression in Ne.13.1, "On that day," if interpreted literally (which, however, is not necessary), seems to fix the reading of the law to the same day as the dedication (see 12.35). If so, the dedication must have been after Nehemiah's return from Babylon (mentioned 13.7). But as the wall only took 52 days to complete (Ne.6.15), and was begun as soon as Nehemiah entered upon his government, how came the dedication to be deferred till 12 years afterwards? On the whole, it is best therefore not to press the words in their strictest sense, but to make the narrative historically consistent, i.e. to regard Nehemiah's absence (13.6) the gentilizing party recovered strength, and the intrigues with Tobiah (6.17), which had already begun before his first departure, were more actively carried on, and led so far that Eliahish the high-priest actually assumed the chief of the store-chambers in the temple to Tobiah's usurpation of Nehemiah's position as the chief priest, and book of Nehemiah. He detaches Ne.8 from its context, and appends its narratives to the times of Ezra. He makes Nehemiah die before Nehemiah comes to Jerusalem as governor, and consequently ignores any part taken by him in conjunction with Nehemiah. He also makes Nehemiah's return from Babylon to the events of Nehemiah's government, but places him in the time of Jaddua and Alexander the Great. The cause of Josephus's variations was the use of the apocryphal tEzdras, and probably other apocryphal versions of the story of Nehemiah.—Authorship. As regards the authorship of the book, it is admitted by most critics that it is, as to its main parts, the genuine work of Nehemiah, with extracts from various chronicles and registers. Interpolations and additions have, however, been made in it since its time; and there is considerable diversity of opinion as to what are the portions which have been so added. The first ten chapters are fairly continuous, as the story of Nehemiah and his having superintended the building of the wall (12.25 to the end except 12.44-47) in which the use of the first pers. sing. is constant (12.30,38,40,13.6,7, etc.). It is therefore only in the intermediate sections that we have to inquire into the question of authorship, though a difficulty has been felt by some with regard to the extraction from the register in ch. 7. This is manifestly the same document as that contained in Ezr.2, but there seems no reason for its reproduction by Nehemiah. Probably, however, he took it as forming a basis for later statistical arrangement. It is highly improbable that it was borrowed by the writer of Ezr.2 from one of Nehemiah some 90 years later. The variations make it clear that copyists were not always very accurate in their work. The same is the case with the offerings (Ezr.2.68), which were intended "to set up the house of God in His place." Ne. 8-11.3 is supposed by some to be written by Ezra. Ezr.11.1-46 contains a list of the families of Judah, Benjamin, and Levi where it is shown by the xerarchies (which, however, are not always very accurate) who took up their abode at Jerusalem, in accordance with the resolution of the volunteers, and the decision of the lot, men
NEHEMIAH, BOOK OF

Recent Discoveries. Much interesting light has been thrown on the book and on the condition of the Jews at the time when it was written by the discovery of certain Aramaic papyri near Assouan (Syene) in 1906-1907. From these it appears that there was a Jewish colony settled in that place before the time of Cambyses, and that they had a house of the Lord (Yahu), with regular worship; that Cambyses, though strongly opposed to Egyptian idolatry, respected the Jewish cult; that a local authority sacked the house of Yahu on his own account; and that an appeal was made to Darius in his 17th year (408 B.C.), and was backed by petitions to Bagohi (Bagoses), and to Jehohanan, the high-priest (see Ne.12.22, where he is mentioned), also to Delaiah and Shelemiah the sons of Sanballat, the governor of Samaria. At first this appeal was not attended to, but subsequently Darius gave orders for the restoration of this sacred place. References to Sanballat are frequent in the book. Sanballat's daughter had married a Persian by the name of his was a brother to Joroanah (Ne.13.28). For Bagos, see Josephus, Ant. vii. 1; and for the sons of Sanballat, cf. Ne.6.10. The whole narrative thus brought to light illustrates the condition of things in the age of Nehemiah, who possibly was alive when this book has been transacted, for the papers were written only 24 years after Nehemiah's second visit to Jerusalem and 16 years after the death of his patron Artaxerxes. We also learn from them that the Jewish dispersion was not altogether a calamity, for here we find a branch of the scattered people in the island of Elephantine opposite Syene, some 800 miles up the Nile, busy in commerce and not forgetful of the worship of God.

Nehem'ias—1. (i Esd.5.8) = Nehemiah, 2.-2. (i Esd.5.10) = Nehemiah, 1.

Nehloth. [Psalm, Titles of] Nehum' (Ne.7.7) = Nehum, 1.

Nehushta', daughter of Elnathan of Jerusalem, wife of Jehoiakim and mother of Jehoiachin, kings of Judah (2 Ki.24.8).

Nehushtan occurs only in Ne.12.22, which states that Hezekiah broke up the bronze serpent which Moses had made (Num.21.9), and to which the Israelites had been in the habit of burning incense. [Serpent, Bronze.] Nehushtan was the name given to it by Hezekiah (so LXX. εἴδωλος, the Vulg. and A.V. or by the people (so Lucian's recension of LXX. εἴδωλον and οὐδέν Νεχθάρι). The Heb. admits either rendering. The stem from which the name is derived may mean either a serpent, or bronze (copper), or to be ill-omened, or to use omens for divination; and the ending an is equivalent to εἴδωλον, as in "leviathan." Hence Nehushtan would be a popular name meaning the great serpent," or a name given by Hezekiah, "the thing of bronze," or "the copper," or "the ill-omened one": cf. the name Naabah, 2 Sam.17.25. Nöëlle derived the name from năḥash and tan (s. of tamnim), each meaning "serpent": Klostermann as a contraction of năḥash yăthān (old serpent). It should be mentioned that the language of the whole of is peculiar and late; but no one questions the historicity of the last clause.

[i.h.w.]
NEIEL, a place on the borders of Asher and Zebulun (Jos.19.27) which went out "north of Caubah". It seems clearly to be the present ruin of Yana (Tal. Yana). It lies N. of Kish and about 2 miles E. of Accho. The border ran E. from near Bith-Dagon (Tell D'ach) along Wady el Halzun (valley of the shell)—whence purple dye was made,—which is the main affluent of the river Belus. At Neiel the border turned N. to DABBASHETH.

Neked (Num.3.5), the Hebrews applied to a shallow road (Arab. Nuqab) leading up a pass. The R.V. (Jos.19.33) joins the name to that preceding it, making it descriptive—Heb. Adamu-han-neqeb. The Rabbis, however (Tal. Jer. Megilla 1.1), distinguish the two places, and state that the later name of Nekeb was Qidatha. This is the ruin Şeyyedeh, in the broad valley up which a road leads from a pass to S.E., and on W. of which lies Adus (ot Dümich), 4 miles N.W. of Seyyedeh. [c.r.c.]

Nekoda.—1. The ancestor of some Nethinim who returned after the Captivity (Ezr.2.48; Ne.7.50.—2. Children of Nekoda were among those who went up after the Captivity from Tel-melah, Tel-harsa, and other places, but were unable to prove their descent from Israel (Ezr.2.60; Ne.7.62).

Nemuel.—1. A Reubenite, eldest son of Eliab, and brother of Dathan and Abiram (Num.26.8).—2. Eldest son of Simeon (Num.26.12; 1 Chr.4.24), and ancestor of the Nemuelites. [c.r.c.]

Nephesh (vulgar term for phlegm).—1. Son of Ithar, the son of Kohath (Ex.6.18).—2. One of David's sons born in Jerusalem (2 Sam.5.15; 1 Chr.7.14.6).

Nephew, obsolete for "grandchild", or "kindred". So A.V. in Judg.12.14; Job 18.19; Is.14.12; 1 Tim.5.4. R.V. modernizes these passages.

Nephilim (2 Mac.1.36) = Naphthali.

Nephilim. [Giants; Sons of God.]

Ne'phi's (Ezr.5.21), apparently for Nebo (Nûba); Ez.2.29. [c.r.c.]

Nepheš (1 Chr.5.19), properly Naphesh.

Nepheshim (Ne.7.52). Members of this family were among the Nethinim who returned with Zerubbabel. [Nephushim.]

Nephthali (vulgar for Nebitali, according to Wilkinson). 1 Tim.7.3; Mt.4.13,15; Rev.6.7 = Naphtalit.

Nephthoah, Waters of (Jos.15.18,19). These are identified (Tal. Bab. Yoma 31a) with 'Ain 'Aïn, S.W. of Bethlehem. [Etam; ] Judah, 1. [c.r.c.]

Nephusim, the proper form (Ezr.2.50), according to Gesenius, of Nepheshim (Ne.7.52).

Ner, son of Jehiel, and (according to 1 Chr.8.33) father of Kish and Abner, and grandfather of king Saul. Abner was, therefore, uncle to Saul, as is expressly stated 1 Sam.14.50; but cf. 1 Chr.9.36 which makes Ner the brother of Kish, and therefore Saul and Abner first cousins. From this apparent discrepancy it has been suggested that the names Kish and Ner (see "son of Abiel," 1 Sam.9.14,51) may have both been repeated in different generations of the family.

Ner'us, a Christian at Rome, saluted by St. Paul (Ro.16.15). Origen conjectures that he belonged to the household of Philologus and Julia. Lower authorities to prove that Nerus are given in Acts Sanctorum and in the apocryphal Acts of Nerus and Achilleus.

Nergal', whose name occurs only in 2 K.17.50, was the chief Assyro-Babylonian god of war, disease, and death. His name is Sumero-Akkadian, and means "lord of the great region," meaning the abode of the dead. His spouse was Eresh-ki-gal, the queen of the underworld, or Hades, and a curious legend exists dealing with the courtship of these two deities. The centre of his worship was Cuthah, now represented by the mounds of Tel-Ibrahim, N.E. of Babylon. [r.g.p.]

Nergal-sharezer, the Nergal-sarru-usur of the inscriptions, is mentioned only in Je.39.3.13. There appear to have been two persons of this name among "the princes of the king of Babylon," who accompanied Nebuchadnezzar on his last expedition against Jerusalem. The name of these seems not to be distinguished by any title (unless Shamgar-nebo, which follows, may be so regarded), but the other has the honourable distinction of Rab-mag, which is possibly the Babylonian rab-mwi, "chief of the commandants." In Je., i.e., he appears among the persons who, by command of Nebuchadnezzar, released that prophet from prison. It is not improbable that it was this Nergal-sharezer who afterwards became king of Babylon. Nebuchadnezzar had been succeeded by his son, Evil-mardak, but as he "governed public affairs after an illegal and impure manner," a plot was laid against him by his brother, who killed him, and mounted the throne (Josephus, Contra Ap. i. 20). He reigned four years, and was succeeded by his son Lábasí-Marduk (Laborosaroach), who was killed after a reign of nine months. Nergalissar calls himself son of Bel-šun-iskun, and states that he restored the temples of E-sagila at Babylon and E-zaìda at Borsippa. His daughter Queen married the priest of Nebo at the latter sanctuary. See Pinches, O.T. in the Light of the Records, pp. 408, 436 ff. [r.g.p.]

Neri, son of Melchi, was of the line of Nathan; but his son Salathiel (Luz.27) became Solomon's heir on the failure of Solomon's line in king Jeconiah, and was therefore reckoned at the royal linealogy among the sons of Jeconiah (Mt.1.12).

Neriah' or Nerias (Baal.1.), son of Maaseiah, and father of Baruch (Je.32.12, 36.1.43.3) and Seraiah (51.59).

Net. Various terms are applied by the Hebrews to nets, and these are again variously rendered in A.V. The word was used for the purposes of fishing and hunting. The Egyptians constructed their nets of flax-string; the netting-needle was made of wood, and in shape closely resembled our own (Wilkinson, ii. 95).
The nets of Egypt were known to the early Hebrews (Is.19.8), and probably the material and form was the same in each country. [Fishing.] Metaphorically, the net is used of the subtle devices of the enemies of God (Is. 9.15,19.11), 1 of the covenants of God (Lam. 1.13; Ezk.12.13; Ho.7.12). sbakh (A.V. net) is used of the open ornamental work of the capital of a pillar (1K.7.17).

Nethaneel. 1. Son of Zuar, and prince of the tribe of Issachar at the time of the Exodus (Num.1.38,5,7,18,23,10.15).—2, Fourth son of Jesse and brother of David (1Chr.2.14).—3, A priest who blew a trumpet before the ark when it was brought from the house of Obed-edom (15.24).—4, A Levite, father of Shemaiah the scribe (24.6).—5, The fifth son of Obed-edom, 2(26.4).—6, One of the princes of Judah, commanded by Jehoshaphat to teach the law (2Chr.17.7).—7, A chief Levite, who made passover-offerings in the reign of Josiah (35.9).—8, A priest of the sons of Pashur, who had married a foreign woman (Ezr.10.22).—9, The representative of the priestly family of Jediah in the time of Joiakim (Ne.12.21).—10, A Levite-musician, of the sons of Asaph, at the dedication of the wall of Jerusalem (Ne.12.37).

Nethaneel. 1, Son of Elishama, and father of Ishmael, 6(2K.25.23,25; Je.40.8,14,15,41.11,12), and of the royal line of Judah.

2. One of 4 sons of Asaph the minstrel, and head of the fifth course of the temple-choir (1Chr.25.21,22).—3, A Levite sent by Jehoshaphat to teach the law of Judah (2Chr.17.7).—4, Father of Jehudi (Je.36.14).

Nethinim, a class of temple servants, mentioned several times in Ezr. and Ne., only once in Chr. (1Chr.9.2), and in no other book of O.T. Though the earlier books had no occasion to mention them, their origin must be traced back to pre-Exilian times, since they returned as an official class from the Exile. The name, at whatever time first bestowed, simply means "given ones"; and as the Levites were "given" to the priests for ritual service (Num.3.9), so we are expressly told of "Nethinim" whom David and the princes had given for the service of the Lord (1K.8.68; Ezr.2.41); they were "children of Solomon's servants," who are only mentioned along with them (2Chr.29; Ne.6.11,13). Apparently belong to the same category. Their names have a foreign look (cf. Ezr.2.50 with 2chr.26.7, Gen.25.15); and they were probably prisoners taken in war and their descendants. Temple slaves were common among other ancient peoples; even as early as the wilderness period the captives of the Midianites were in certain proportions "given" to the priests and to the Levites (Num.31.40-41,47), and in Joshua's time the identical slaves were made hewers of wood and drawers of water for the sanctuary (Jos.9.20-27). When the temple was built and its service organized, there would be a greater demand for such menials to perform duties which the Levites were unable or not disposed to undertake. Ezekiel complains that uncleanly aliens had been brought into the service of the sanctuary (Ezk.44.17); but if his words refer to all or any of the Nethinim, no stigma attached to them in Ezra's time.

Both under Zerubbabel and under Ezra they returned in even greater numbers than the Levites (Ezr.2.40,58,15-20); they shared in the immunities conferred by the Persian king on the official class (7.24); and they are numbered among those who took the covenant oath "to walk in God's law which Moses hath taught us," etc. (Ne.10.29). Benzing, 'Hebraische Archäologie'; Kyle, 'Ezra and Nehemiah' (in Cambridge Bible), Introd. § 7, iv., E. [J.R.]

Nettophathite, the (Ezr.2.22; Ne.7.26; 1Esdr.5.18), a town inhabited by men of Judah after the Captivity, and mentioned between Bethleem and Anathoth. It apparently cannot therefore be the present Beit Nettif, which lies far W. in the lowlands of Judah. Tobler poses to place it at the ruin Umum Toba, near Sur-bahir, half-way between Jerusalem and Bethemeth, E. of the main road, which is a suitable position for a market.

Netophathites, the (1Chr.2.54,9.16), inhabitants of Netophah. The Heb. is the same word throughout.

Nettle. The representative in A.V. of two Heb. words. 1, The word הָרָע (har) occurs in Job30.7; Pr.24.31; Ezr.9.2; Ps.109.16. Its meaning is uncertain, and many identifications have been suggested, including brambles, sea-orchae, butchers' broom, wild mustard (Royle), the Christ-thorn (Cæsius), wild vetches (R.V. marg.), and thistles. Most writers and some modern versions favour the nettle. The commonest and, on account of its height, the most remarkable species in the lower parts of Palestine is the Roman nettle (Urtica pilulifera). It abounds in ruins and stony waste places near cultivation (cf. l.c.c.). The word הָרָע is probably derived from a root signifying to burn, from the stinging of the nettle. The passage in Job is to be taken in a metaphorical sense. 2, The word גִּימָור (girmor) occurs in Is.34.13 and Ho.9.6. Another form of the same word, girmorshonim (thorns, A.V.), occurs in Pr.24.31. Modern commentators are generally agreed that this term also denotes some species of nettle (Urtica).

New Moon. The new moon, or not known, N. 1, The new moon means the first day of the lunar month was determined in ancient times and later pre-Exilic times, but it was probably by the somewhat uncertain method of direct observation. After the Exile observation and calculation were both employed. The ancient Babylonians, and indeed all ancient astronomers, were able to draw up almanacs in which the times of new moon were predicted. Though the Jews adopted the Babylonian names of the months, they do not seem to have acquired during the Exile the astronomical knowledge of the Babylonians. By the end of the 2nd cent. a.d., astronomical calculations were mainly relied on, and entirely so at the beginning of the 4th cent. During the second temple the Sanhedrin, or a court of not less than three, presided over by the president (masi), decided the date of the new moon. It was known that the new moon could not appear till after an interval of at least 1 day; and the notices were posted on the heights around Jerusalem to make observations. When one saw the new...
moon he hastened to the council, who were assembled throughout that day, and made his report. His evidence was carefully tested, and if corroborated the news was flashed to all parts by means of beacon fires, the first being on the mount of Olives, followed by the rest of the Samarians in setting alight false signals in order to lead the Jews astray, messengers were substituted for signals. As it took some time to carry the information, the Jews living far from Jerusalem observed two days, being uncertain whether the 29th or the 30th was the correct one. This was the usage in Asia Minor, Greece, and Egypt, in the earlier times also. The new moon was observed as a festival, and was inaugurated by the president (in earlier times the high-priest) pronouncing the word *meggidash*, "consecrated." Special sacrifices were offered, with blowing of trumpets (Num.10.10, 28.11-15; 2 Chr.2.4, 8, 13; Ezra 3.9f; Neh.10.3f). On the 7th month, the first day of the civil new year, was a special sabbath and holy convocation (Lev.23.24,25). The prophets often mention the new moon festival in connexion with the sabbath (Is.1.13, 66.23; Ezk.45.17, 46.3; Ho.2.11; Am.8.5). On these days especially religious instruction was given, and family feasts were held and sacrifices offered (Isa.29.20, 56, 18,27,29). There seems to be a trace of a one-day observance in ver. 27. Work was prohibited (Am.8.5).

[H.H.] New Testament, Text of. Few branches of theological science have been more profoundly scrutinized than the New Testament, and by more thorough investigation of existing material, during the last 40 years, than the science of the textual criticism of the New Testament. The admirable article which Bp. Westcott contributed to Smith's *Concise D.B.* was a model of the work which at once summarizes an existing state of scholarship and ascertains the text; but perhaps the modifications of a fundamental character are rendered necessary by newer knowledge. It is one principal purpose of the present article to bring out these changed conditions into bold relief: and in enumerating our principal authorities for the text, according to the time-honoured division into the three classes, gives a guide to the modern reader. New editions and revisions, patristic quotations, distinction will be made, under each head, of the new material of the last half-century. But it must be remembered, at the outset, that these three classes of evidence were not all brought into equal play at the same moment. The first writer to make systematic use of the late sources, and of the manuscripts, was the young Lucas of Bruges, in his brief *Notae ad Varias Lectiones Editionis Graecae Evangeliorum* (1606). And the scientific foundations of the N.T. textual criticism were not really laid till the end of the 17th cent., when Richard Simon, in three momentous works—full of acute observation and reasoning, anticipatory in detail of many of the conclusions of 19th-cent. scholars—explored successively the three departments of the critic's laboratory: *Hist. critique du texte du N.T.*, *Hist. crit. des versions du N.T.*, *Hist. crit. des principaux commentateurs du N.T.* (Rotterdam, 1689, 1690, 1693; to which add *Nouvelles observations sur le texte et les versions du N.T.*, Paris, 1695). Simon was a French Oratorian; but the interest which England took in these studies—an interest reaching from the middle of the 17th cent. to the present day—was signalized by contemporary translations of the two books first mentioned, *Crit. Hist. of Text of N.T.* (two volumes, London, 1689) and *Crit. Hist. of Versions of N.T.* (London, 1692: licensed already in 1689). We must distinguish, therefore, under each head, the work subsequent to 1689, as well as the work subsequent to 1693.——

I. GREEK MSS. The natural starting-point, in any consideration of the text of these MSS., had been from the Gk. MSS.; unlike the quotations in the Fathers, they give us a continuous text; unlike the versions, their continuous text is in the original language. These MSS., though it must be remembered that not many of them contain the whole N.T., are extant in very large numbers and in various forms. It is, therefore, a matter of the utmost importance to discriminate in some way among so vast a mass, critics have made use of an external difference in the character of their handwriting. About the 9th cent. *uncial* writing began to be superseded by *cursive* writing; and MSS. written in uncial letters are denominated by capital letters of the alphabet. MSS. written in cursive are designated by small letters. Numerals admit, of course, of indefinite extension; but the alphabet suffices for 26 uncial only, and with the discovery of more uncial recoures was had first to such Gk. letters as differ from the Latin forms (I, J, etc.), and, now that these too are exhausted, to the letters of the Hebrew alphabet. There seems to be a trace of a one-day observance in ver. 27. Work was prohibited (Am.8.5).
they only give us again a form of text which we already knew existed, and was largely accepted as authoritative, as early as the 5th cent. Of the great mass of later MSS. (cents. xiii.-xv.) this is still more true: a late MS. is not necessarily a worthless MS., but the mere multiplication in the Middle Ages of copies of the same general type of text proves by itself little or nothing as to the prevalence of that text in early times. As a matter of fact, most late MSS. come to us from the ecclesiastical jurisdiction of the patriarchate of Constantinople—Constantinople itself and the monasteries on Mt. Athos were probably then the principal centres of the reproduction of Gk. MSS.—and represent admittedly the same type of text, a text which in that part of the world was undoubtedly prevalent from 5th cent. onwards.

The mere repetition of this text in mediaeval MSS. gives us no help in tracing the history of the N.T. documents back from the 5th cent. towards the days of the apostles. But it was natural that this text, as received and kept in living use by the Gk. Church of the day, should have formed the basis of the first editions of N.T. in the original language by the scholars of Renaisance (Basle, 1516) onwards. In proportion, however, as more MSS. and especially older MSS., began to be consulted, the divergences accumulated until they were too serious to be left out of account. An apparatus criticus, recording variant lections in the margin of the text, and formed for the first time in the third edition of "Stephanus" (R. Etienné: Paris, 1550). But the great Gk. MSS. whose names are so familiar to us nowadays came only very gradually into use. Some of them, of course, were not brought till a later date from the East; but this is only a partial explanation, for the libraries of Europe were already filled with Gk. MSS., brought by refugees whom the conquests of the Turks and the fall of Constantinople in 1453 had driven westwards. The great 4th-cent. Codex Vaticanus of the Gk. Bible, B (Vat. gr. 1269): its N.T. is unfortunately imperfect, for it has lost half Hebrews, the pastoral epistles, and the Apocalypse. The Codex Torinoensis (15 cent.), already mentioned in the earliest catalogue, 1475, of the Vatican library. Another MS., which has been in the West for some 400 years and at Paris since the time of Catharine de Medici, is Codex C (Paris, gr. 9): the remnants of what was once a complete Gk. Bible of 5th cent. Each of these two MSS. illustrates some one principal cause which has retarded important evidence from becoming easily available. Codex B belongs to a library which, until the pontificate of Leo XIII. (1878-1903), was not fully open to all comers. Codex C is a palimpsest—the upper writing contains Gk. versions of the treatises of Ephrem of Edessa—and the value of the under-writing was not detected till the beginning of 18th cent.

Of all the early uncials now accessible to scholars, the 16th cent. editors used none save two, which still remain the earliest known copies of the four Gospels: Codex Bezae (D.: cents. v.-vi.) of the Paris Library, and Codex Alexandrinus (A.: cent. v.) of the British Museum, said to have been found at Clermont, near Beauvais, and now in the National Library (gr. 107) at Paris. Next to be used was the Codex Alexandrinus (A.: cent. v.) of the whole Gk. Bible, which was sent to Charles I. in 1628 by Cyril Lucar, patriarch of Constantinople and then of Jerusalem. Readings from it were incorporated in the edition which formed the first great contribution of England to N.T. textual science, the Polyglot of Brian Walton, afterwards Bp. of Chester (N.T. in vol. v.), 1657. In 1636 Abp. Laud had given it to the Bodleian—he had probably acquired it from Würzburg—the Greco-Latin Codex Laudianus of the Acts (E.: cents. vi.-vii.: Bodl. Laud 35), and it was used in the N.T. of Bp. Fell (Oxford, 1675). But it was not till the 18th cent., after the publications of Simon, that real progress was made in the systematic examination of the MS. material that had been brought together in the libraries of Europe. The most epoch-making editions in this respect are those of Mill (Oxford, 1707: MSS. especially of Oxford and Paris)—Bentley procured many collations, but never got beyond the publication of a specimen (1720)—and Bezae (Halle, 1777, 2nd ed. 1784, 3rd ed. 1796, 4th ed. [Munich Germany], Wetstein (Amsterdam, 1751-1752: who introduced our present notion of Gk. MSS.); Matthaei (Riga, 1782-1788: 2nd ed. 1803-1807: MSS. of Moscow); Birch (Copenhagen, 1788-1801: MSS. of Italy, Vienna, and the Escorial); and Griesbach (Halle, 1st ed. 1774-1780, 3rd ed. 1777, 2nd ed. 1784). The MSS. are therefore not in its earlier stages was necessarily haphazard; many MSS. of various ages and in different localities had to be examined before just distinction could be drawn between the significant and the insignificant, and some libraries, like the Vatican, remained difficult of general access. Small blame, then, to the scholars of the 18th cent. that so much of the most important part of the work remained still to be done after them. No one had yet drawn systematically on the Biblical treasures of the East. Only in isolated cases had the due preeminence of the older MSS. been signalized by preparation of a separate codex; the old MSS. in England were, indeed, made public by Hearne's edition of Codex E., at the beginning of the century (Oxford, 1715), and by Woide's edition of Codex A (London, 1786) and Kipling's of Codex D (Cambridge, 1793) at the end of the century; but on continental MSS. hardly anything had been done. A beginning was made in the process of deciphering the palimpsests: Knittel published in 1762 as much as he could read of the fragments of two early MSS. of the Gospels (P.: cent. vi.; Q.: cent. v.) used in a Bobbio codex at Wolfenbüttel, while Barrett in 1801 printed the still more valuable Dublin fragments of St. Matthew known as Z (cent. v.-vi.: between 200 and 300 verses); but both editions were imperfect, and have been superseded, the former by Tischendorf (see below), the latter by T. K. Abbott (Dublin, 1880). For more than 40 years after Barrett's edition the palimpsest question may be made of Rettig's edition of the Greco-Latin Gospels of St. Gall known as Δ (Sangall, 48, cent. ix.-x.: specially important in St. Mark), Zurich, 1836. In filling up 586 NEW TESTAMENT, TEXT OF
Among Southwell and Westcott, the text of the N.T., published at the end of the 19th cent., was revised and augmented, and parts of the N.T., and the Psalms of Tregelles' ed. they belong to the latter portion of the modern period, after 1863, and we proceed to enumerate and distinguish the achievements of the new period in discovering or editing Greek MSS. of the N.T. Among new MSS. may be mentioned a group of four purple MSS. of 6th cent., perhaps always written at Constantinople, which all came to light within a quarter of a century of one another: Σ at Rossano in Calabria, containing Mt. and Mk. (edited by von Gebhardt, Leipzig, 1886); φ at Berat in Albania, also containing, but incompletely, the same two Gospels (ed. Batifol, Paris, 1891); N in Asia Minor, of which 33 leaves at Patmos and a few elsewhere were previously known, now reinforced by the arrival of 182 new leaves at St. Petersburg, the total amounting to about half of each of the four Gospels (ed. Cronin, Texts and Studies, v. 4, Cambridge, 1899); and a fourth, not yet lettered, at Sinope, containing about a third of Mt., not yet lettered, gr. 1209, and Omont, Notices et Extraits, tom. xxxvi, Paris, 1901). Three of the four, the Rossano, Petersberg, and Paris MSS., resemble one another, wherever they can be compared, very closely, and present a text which, considering their antiquity, is relatively uninteresting because it is only a later version of the text of the 3rd cent. which is essentially the same character but has more unusual readings. At Mt. Athos four new uncials have been noted, but not yet fully collated: two of the Gospels, Ω (cent. vii.-ix.) and Π (cent. x.-x.), one of the Acts, Catholic, and (part of the) Pauline Epistles, St. (cent. vii.-ix.); and a fourth, ψ (cent. viii.-ix.), more extensive in contents (N.T. except Mt., first half of Mk., and Rev.), and apparently more interesting in text, at least in Mk. (K. Lake in Studia Biblica, V. ii.; Oxford, 1902). Of another older and more important Athos MS., H of St. Paul (cent. vii), so much more is known now of Mt. than of St. Paul that it is considered as a new discovery; Westcott, in 1863, knew of 14 leaves in two libraries, Omont in 1889 (Notices et Extraits, tom. xxxiii.) edited 47 leaves from six libraries, and since then Dr. Armitage Robinson ("Euthaliana," in Texts and Studies, iii. 3, 1893) and Prof. K. Lake (Facsimiles of the Athos Fragments of Codex H. . . . Oxford, 1905) have rescued parts of several more pages from the "set-off" or traces which lost leaves have left on those which still remain. But it is Egypt which, since the time, a quarter of a century ago, when it came under Western administration, has become more and more the happy hunting ground of the search for new MSS. Unfortunately the numerous papyri of N.T. so far discovered are all fragmentary; but a high interest attaches to a leaf of 3rd cent. (Grenfell and Hunt, Oxyrhynchus Papyri, i. p. 4, 1898) which contains Mt.1.1-9,12,14-20, in a text closely agreeing in details with Codex B, so that the type of the text of the latter MS. in the Gospels is taken a good step nearer primitive times. All discoveries, however, of the modern period are thrown into the shade by the most recent of them all: a vellum codex of the four
Gospels in the order Mt., Jn., Lu., Mk., written probably in 5th cent. and still preserved in its original binding, has lately (1906) been acquired in Cairo—it came, as it would seem, from a tomb near the Pyramids of Egypt—by C. I. Freer, Esq., of Detroit, U.S.A. Little is yet known of it save that it expands the ordinary conclusion of Mk. (16:6-20) by an addition between vv. 14, 15, entirely unexamined in MSS. but supported by a statement of St. Jerome (Contra Pelagianos, ii. 15). It is understood that Dr. Freer came into possession at the same time of a much-nilified uncial MS. of the Pauline epistles. Of separate editions of MSS. already known, the two most noteworthy represent an attempt to do for the most important cursives what had already been done for the chief uncials; W. H. Ferrar and T. K. Abbott, A Collection of Four Important MSS. of the Gospels (13, 60, 124, and 346; the Ferrar group), Dublin, 1877, and K. Lake, "Codex I and its Allies" (1, 118, 131, and 209) in the Cambridge Texts and Studies, vii. 3 (1902). But the principal contribution of the last period to the better knowledge of the Gk. MSS. of N.T. has been the publication of the British Museum, which is now following one another in rapid succession. The British Museum led the way with Codex A, Facsimile of the Codex Alexandrinus (vol. iv., containing N.T. 1870). Even more welcome was Cozza-Lazini’s similar undertaking for Codex B, N.T. et Codice Vaticanus, etc. pho- tographic reproductions, and, apparently better, edition, Milan, 1904: for none of the previous editions of the MS. had been wholly trustworthy; Tischendorf’s no more than the rest, since he had never been allowed anything beyond a limited and hasty inspection of it. Cambridge University followed suit with Codex D in 1899, Codex Bezae Cantabrigiensis, etc. Sumptibus Academici Phototypicis repraesentatus. And in the present year (1908) Prof. Lake—to whose photographic edition of the Athos leaves of Codex E (Oxford, 1905) reference has already been made—hopes to complete the cycle of the great MSS. by a photographic edition of the N.T. Codex S. But the really significant note of the modern period (1863-1908) and especially the first two-thirds of it, is the supreme and unique influence of S and B. These two, our oldest MSS. of N.T., became known, the one for the first time, the other for the first time with tolerable completeness, within the sixties of the last century; and it was natural that the criticism of the immediately succeeding years should have been dominated by the one master idea of their value. The exclusive authority of the Gk. MSS., as we shall see in the next two sections of this article, had been gradually giving way to allow room for more stress on the evidence of versions and Fathers, seemed to regain for the moment, in the person of the new representatives, all its original status. Tischendorf is generally admitted to have succumbed to the temptation of the archetype S, his own discovery. Hort, taking a juster and more detached view about S, fell under the glamour of the greater MSS. and placed on B a more exclusive, if more refined, reliance than even Tischendorf on S. The investigations, which will now follow, into other departments of evidence, will equip us with the necessary means to test and control the witness of the primary Gk. MSS.

H. VERSIONS. Taking Gk. MSS. alone, the two latest—MSS. 46 and 1457 of the 6th cent.—are a link among their mass to distinguish them from their age. There is a presumption that the nearer they are in time to the apostolic originals the purer their text will be. But when brought to the touchstone of facts, this presumption shrinks to very small dimensions. Even if we reject the reading later than 600 a.d., and confine ourselves to the few that remain from the 4th, 5th and 6th cents., we shall find that practically the whole sum of the divergences represented in our latest MSS. existed already among the oldest of them. Then, as between our oldest MSS. we can hardly accept the testimony of SB against A, merely because they are a single century older. The difference of age, so far as it goes, is indubitably in their favour; but it would seem preposterous to accept as final the testimony of one witness against another, on the ground that the former was removed only 250 years from the apostolic age, and the latter 100 years. Grouping by age alone is ineffective, because it attempts too much, a more modest method of classification will be to group our MSS. by locality. All MSS. of, say, the 6th cent, do not, as a matter of fact, give us the same type of text; but if we find that MSS. from the same single locality tend to give the same sort of text, we have at least made a beginning towards educating order out of chaos, and have found a starting-point from which we may try to reconstitute the history of their early divergences. The initial difficulty, however, in this line of investigation is that Gk. MSS., and especially early Gk. MSS., do not often present clear indications of place. The four sister purple MSS. of 6th cent. were, indeed, probably written at Constantinople. The MSS. of the Ferrar group were mostly written in Calabria; but they are all comparatively late, and their archetype may easily have been in Egypt. If a group of MSS. began to be prevalent in the days of Justinian) from the East. The new uncial in America undoubtedly came to light in Egypt, though it surprises us by arranging the Gospels in the characteristic Western order—Mt., Jn., Lu., Mk. On the ground of orthographical peculiarities, Hort thought that both B and S were written at Rome or in the West; but in this view he seems to have few followers. Palaeography may some day furnish us with more distinctive clues; at present it seems to be generally held that our four great early MSS., β, α, β, γ δ, to these we may now add the American MS. as a fifth—were all written in Egypt or else in Palestinian Caesarea while its affiliations were still with Egypt; and if that be so, locality grouping, as based on our earliest MSS., affords us little or no assistance. But there remains one class of Gk. MSS. where we begin to touch a surer ground, bilingual MSS., in which the original Gk. originated and divided face one another in opposite columns or on opposite pages. Three early uncials, perhaps all of the 6th cent., D, D, E, are written in Gk. and Lat.; several fragments of at least
as early date give us Gk. and the dialect of Upper Egypt. And the bilinguals, as employed for purposes of localizing a Gk. text, form the transition to the class of MSS. where a vernacular translation is given alone without the Gk. original. A Latin or Syriac MS. will tell us, within certain limits, from what type of Gk. text it was translated, even though the Gk. does not accompany it within the boards of the same MS. The conception of thus calling the early versions of N.T. into the witness-box as a help to the grouping of the Gk. MSS., or indeed to the construction of the Gk. text at all, was quite foreign to the minds of the earliest editors. Separate editions of the Latin Vulg., of course, there were in plenty, among which the official recension of Pope Sixtus V. (1590), re-issued in an emended form by his successor Clement VIII. (1592), marked an epoch; and separate editions appeared also, during the 16th and 17th cents., of the Latin Vulg. of Lachmann's (Vienna, 1823). In the case of Syriac Vulg. or "Peshitta" N.T. (Vienna, 1555), of the Arabic Gospels (Rome, 1590), of the Arabic N.T. (Leyden, 1616), of the Gothic Gospels (Dordrecht, 1665), and of the Armenian Bible (Amsterdam, 1666). In the Polyglot Bibles the versions were brought into conjunction so that the Gk., together with the others, are they are there printed in separate columns and do not form any constituent element in the Gk. text itself. The N.T. of Cardinal Ximenes' Complutensian Polyglot (1517) has only the Gk. and Vulg. Latin; the Antwerp Polyglot (vol. v. N.T. 1571) adds the Syriac; the Paris Polyglot (vol. v. N.T. 1630), or as Toulard des further the Arabic, while that of Brian Walton (1657) has the Ethiopic as a fifth, and in the Gospels the Persian as well. The first editor of N.T. to make use of any of the versions was Beza (Geneva, 1565, 1582), who not only printed the Gk. and Lat. texts side by side, but adduced evidence from the Syriac in his notes; but the first Bp. fell definitely named their assistance on the title-page of his edition (Oxford, 1675), "Accesserunt... variantes lectiones ex plus 100 MSS. codicibus et antiquis versionibus collactae." Besides the texts already printed Fell used collations of Coptic MSS., for the version of the Gospels was published by himself (Oxford) in 1716. And from the time of Simon's Histoire critique des versions du N.T. (1690) no excuse could any longer be pleaded for neglecting them. One version surpassed all others, if not in age, at least in the capacities and circumstances of the translator, and in this realm of the verbal evidence it no longer derived from so many centuries of use in the Western Church; and just at the time when the importance of the versions was beginning to be recognized, two scholars independently conceived the idea that the true text was to be found in the harmony between Gk. MSS. and the Vulg. Lat. of St. Jerome. Tournard published his Evangeliorum Harmonia Graeco-Latina at Paris in 1707. Bentley's Proposals for Printing a parallel edition of the true Gk. and true Lat. text followed in 1720: the apparatus, in confirmation of the dual text, was to include the Syriac, Coptic, Gothic, and Ethiopic versions, and all Gk. and Lat. Fathers of the first five cents, but the point to which all lines of evidence in Bentley's belief converged was that a Gk. text as used by Origen, and a Lat. text as used by St. Jerome, would be established in so close an agreement with one another that "there will scarce be two hundred places where the reading of the original text would be in doubt. It was a striking conception, and perhaps contained more elements of truth than has always been recognized; the text of our greatest Gk. MSS. does resemble that found in Origen, while the excellence of the Gk. text used by Jerome becomes more patent in proportion as the true text of the Vulg. receded. But Bentley found a successor—like himself, a distinguished classical scholar—more than a century later in Lachmann, whose parallel edition of the Gk. and of the Lat. Vulg. (1842-1850) claimed to reproduce the text as known to antiquity at the close of the 4th cent. Thus in his estimations of the Gk. MSS. Lachmann and Bentley were on a lower level: for, while Bentley's Gk. was to be that of Origen, Lachmann's was only that of Jerome's contemporaries, and, while Bentley thought he could restore the text of the apostles, Lachmann was sensible of the gap between the 4th cent. and the first, and never supposed that the Gk. text would produce the original form of N.T. Both Bentley and Lachmann started on the Latin side from the Vulg., finding in St. Jerome's work an obvious bridge to connect Gk. and Lat. texts. But Bentley's contemporaries were already feeling their way, by help of the versions, back to those earlier stages of the history which Lachmann in his edition had passed over. The first impulse towards the traditional Gk. text, and reaching, and had begun to attack the problem of the Latin texts that lie behind St. Jerome, thereby opening the second chapter in the criticism of N.T. versions. Just as the earlier Gk. editions had been based on Gk. MSS. of the current type, so the task first taken in hand upon the versions was to bring the Latin or Syriac or Coptic texts that were in actual Church use. It was now time to enter upon the more formidable but more fruitful labour of recovering, often only in fragments, the primitive translations which had been superseded in bygone ages by the current texts. Among these new editions, the most original and, course the most easy of access, were the Old Latin texts: Mill was the first editor of N.T. (1707) to use the Old Latin, or, as he called it, the "Italica"; the Benedictine Martianay was the first to publish an Old Latin text (Paris, 1695), printing the epistle of James from a Corbie MS. (now in the Bibliothèque Nationale), and the Gospel of Matthew from another Corbie MS. (also now at Petersburgh) known as f—f old Latin MSS. are symbolized by the small letters of the alphabet—with variants from a St. Germain's MS. (now Paris, lat. 11,553) known as g. Bianchini's Evangeliarium Quadruplex (Rome, 1749; reprinted in Migne, P.L. vol. xii.), reprinted in 1765 by the Bishop of N. Italy, those of Vercelli (a, cent. iv.), Verona (b, cent. v. or vi.), and Brescia (c, cent. vi.), incorporating Martianay's material for St. Matthew. But the great contribution of the 18th cent. to this study was the splendid collection in three large folios,
drawn from both MSS. and Fathers, which Sabatier, another Benedictine, published under the title Bibliorum Sacrorum Verbum Canonis Antiquae (vol. iii. N.T. Paris, 1751). Later in the century the differentiation of different Syriac versions was commenced by White's edition of the recension of Thomas of Harkhel, or Heraclia, (Oxford, 1778-1803), and of different Egyptian versions by several publications of fragments in the Upper Egyptian dialect—called variously Sahidic or Thebaic—between 1778 and 1810, the most important being Woide's collection, of the Oxford MSS., posthumously edited in 1790. So far, while an Old Latin was known anterior to the Vulgate, and a second Egyptian version independent of the Coptic or Menaphitic, all that had been discovered in Syriac, besides the Peshîta, was a later recension of the Peshîta intended to bring the Syriac into a closer and more slavish adherence to the Gk. The gap was not filled till Cureton published, from a MS. of 5th cent. acquired by the British Museum as part of the Nitriau Library, (Add. 4496), his Remains of a very Ancient Recension of the Four Gospels in Syriac (London, 1848). Griesbach was the first editor of N.T. to make, by the help of versions, a serious beginning of order and system in the vast and ever-increasing mass of authorities, and to introduce a sort of geographical method into the study of the versions, a method which, however, has not been extended to the versions with which they show most agreement. Having first set aside, as compiled out of the others, a later Constantinopolitan group headed by Codex A, he distinguishes especially two ancient families: (1) the Western, consisting of the Latin authorities, especially the Old Latin, with the bilingual MSS. such as Codex D, and in part certain other Gk. MSS. including some of the best cursives; (2) the Alexandrine, consisting of the Coptic and Ethiopic versions, with the Alexandrine Fathers and a longer list of Gk. MSS. headed (B) where still relatively unknown by the geographical method. Ciasca's edition began already to involve complications when Griesbach counted the Peshîta as often sided with the Westerns; and Cureton's Syriac only made the complications worse, for its text was even more Western than the Peshîta. The Sahidic again, which was coming to light while Griesbach worked, ought, nearly, on his principles, to have ranged itself with the Alexandrine group; yet it too was found not infrequently with the Western text. Further progress was only possible when the Fathers were called in to reinforce evidence of locality by evidence of date. Meanwhile the versions have not ceased to play a preponderant part in the researches and discoveries of the modern period. During its first halt, indeed, interest in them paled before the interest excited by B and K; but for somewhat more than twenty years a continuous series of publications has illustrated the mutual relations of the earlier and later Latin, Syriac, and Egyptian versions, and has fundamentally modified the balance of evidence as between Gk. MSS. on the one hand and versions on the other. For the Old Latin an epoch-making change in its subdivisions is due to the insight of Holt; the MSS. are now classified into an African (k), an European (a b f f etc.), and an Italian (f g) type, of which the African is regarded as the latest. New editions of some of the most important MSS. are appearing in the Oxford series of Old Latin Biblical Texts: vol. i. (1883) St. Matthew of g; vol. ii. (1886) the Bobbio fragments, 8 (Turin, G vii. 15, cent. iv.-v.), of Mt. and Mk.—now recognized as the purest of the African type with important prolongmena by Dr. Sanday; vol. iii. (1888) the Freising Gospels, q (Münich, lat. 6224, cent. vii.), of the Italian type; vol. iv. (1897) Bobbio palimpsest fragments, s (Venice 16, cent. vii.), of Acts, James, and 1 Peter; vol. v. (1907) the Corbie Gospels, f f (called originally f f 2: Paris, lat. 17225, cent. v.), and after S. Berger, Le Palimpseste de Fleury, Paris, 1889) the Fleury fragments, h (Paris, lat. 6400, G, cent. v.), of Acts, Apocalypse, and Catholic Epistles in an African text. Less accurate, but still very convenient, are the transcripts of numerous Old Latin MSS. published by a Norwegian scholar, Steenstrup, in his Remanens of the Gospels and Acts of the Syriac and Western Versions, with a prefixed description of the origin and character of the versions. On the Vulgate even more has been done: Samuel Berger traced its history during the gradual establishment of its supremacy throughout the West, Histoire de la Vulgate pendant les premiers siècles du moyen âge (Paris, 1893), while a definitive critical text of its N.T. (a) is being edited by N. T. G. Horner, after the edition of B. J. Wordsworth and H. J. White (M. 1889; M. 1891; L. 1893; J. 1895; Acts, 1905). In the epilogue to the Gospels, 1898, B. Wordsworth deals with the Gk. MSS. used by Jerome, and brings out some remarkable points of contact with N. Of the Coptic or Menaphitic or Boharic version of N.T. G. Horn has completed a critical edition (Oxford, 1898-1905), and is now at work on the far more important task of editing the Thebaic. Many new fragments of the latter version have been brought to light, especially in Ciasca's splendid collection Sacrorum bibliorum historiae veteris, in distributiones orientis et africani, of which the N. T. volume was published, after Ciasca's death, by Balestri (Rome, 1904). The demonstration by Guidi, in the Göttingen Nachrichten der K. Gesellschaft der Wissenschaften (1886), of the relative lateness of the Menaphitic Version, appears to be accepted, by those most competent to judge, as the true explanation of the Borgia, and so that the Thebaic may be definitely described as the Old Egyptian Version. In Syriac the Peshîta Gospels have at last been critically edited by G. H. Gwilliam and the late P. E. Pusey (Oxford, 1901), and a version of the Apocalypse (a book absent from the Peshîta), has been published by Gwynn (Dublin, 1877); and a part of Hebrews, missing from White's MS. of the Harcean, has been supplied by Bensly (Cambridge, 1889). But the two most sensational discoveries of our time have both had to do with Syriac Gospel texts of an earlier type than the Peshîta, that of Latian's Didascalon, or "Harmony of the Four," seems to be the form in which the Syriac Churches first read the Gospel, and though the Syriac Didascalon has not itself been recovered, three documents have now been identified as originally depending on it. An Armenian version of the commentary of St. Ephrem of Edessa
The Diatessaron was translated into Latin by Aucher and Moesinger (Venice, 1876); this in turn showed that the Latin Harmony of Victor of Capua, in the Codex Fullius, was a Vulg. (c. 540 A.D., edited by E. Ranke, Munich, 1845) without anything, not even a Latin adaptation of Tatian; and, finally, two MSS. of an Arabic version of the Syriac Diatessaron were edited by Ciasca (Rome, 1888). Comparison of these authorities enables us to reconstruct with approximate certainty the order and arrangement of the Diatessaron, but only seldom to recover its actual readings; for the Arabic Harmony is conformed to the Peshîtä text, Victor's to the Latin Vulg., and the Armenian of Ephrem's commentary not seldom to the Armenian Bible. But just as there is no reason to doubt that the Syriac Diatessaron was a translation of a Gk. original, made not at Edessa but in Rome, so, too, such of its readings as can be securely made out are of a Western and Roman type. Far more momentous textually is the discovery, at the same monastery on Mt. Sinai where Codex N came to light, of a palimpsest of the Old Syriac Gospels, something dated by scholars to the 4th cent., and by Cureton's, more complete in its contents, and much more homogeneous in the antiquity of its text; see The Four Gospels in Syriac transcribed from the Sinaiatic Palimpsest, by the late R. L. Bensley, by J. Rendel Harris, and by F. C. Burkitt, Cambridge, 1894, and some Patristic Additions. The discovery of the Gk. textus receptus, by A. Lewis (the original discoverer of the MS.), London, 1896. Both MSS., Sinai and Cureton, are combined, and invaluable prolegomena added, in Burkitt's Evangélion da-Mépharresî, 2 vols., Cambridge, 1904. The Sinai MS. only confirms and enhances the Western sympathies, already noted, of the Curetonian. Most, indeed, of the glosses or (apparently) apocryphal additions which seemed to bring discredit upon our most ancient Latin or Greek-Latin texts, like D and K, are absent from the Old Syriac; but in very many less obviously suspicious readings the Old Syriac and Old Latin authorities unite against the Western, and the Western, therefore, of the new discoveries is that they afford us a rough test for discriminating between such Western readings as may be attributed to a merely local development of the geographically Western text, and those readings, on the other hand, which, being supported both in the far East and the far West, must either be considered genuine—in which case there is of course nothing to surprise us in finding them both at Carthage and Edessa—or, if not, make final havoc of the attempt to group divergent texts on any system of locality. [Variations.] We turn, then, to patristic evidence for further help in the solution of our difficulties—III. PATRISTIC QUOTATIONS. We have seen that Gk. MSS. neither go back in date behind the 5th cent., nor afford us, as a rule, any precise indication of place; while versions give us, indeed, clear evidence up to a certain point of locality—though an early Latin translation may have proceeded from places as distant from each other as Carthage and Antioch;—but with rare exceptions, such as the Vulg. of St. Jerome or the Diatessaron of Tatian, contain, like the Gk. MSS., no more direct evidence of date than the age of their earliest exemplars. On the other hand, thebulk of patristic quotations are of fixed date as well as of fixed place; and it is consequently possible that different types of text can be arranged in their due sequence and chronological relation to one another. Very slowly has this conviction forced itself on the minds of editors of N.T. The Fathers were still neglected even after the aid of the versions was called in; before Simon and Mill, Lucas of Bruges was apparently the only critic who thought of using them. Plausible ground for this neglect might have been urged, no doubt, in the uncertainty of their text; scribes and early editors displayed a marked tendency to substitute a familiar for an unfamiliar form of a Biblical quotation. Gk. the textus receptus, in Latin the Vulg., in Syriac the Peshîtä—and even in our own day the want of critical editions, in the case of many of the Fathers, is a real hindrance. But, with whatever difficulties it is hampered, patristic testimony has been an essential element of N.T. textual criticism since the time of Diocletian. Since 1791 it did good service in describing the patristic commentaries (Hist. crit. des principaux commentateurs du N.T., Rotterdam, 1693), for a commentary differs from casual quotations by expounding a continuous and carefully recorded text, and deserves proportionate attention. Mill first pointed on his edition of the four Gospels not only of MSS., editions and versions, but of the "holy fathers and church writers." Bentley was intending (1720) to employ "all the Fathers, Greeks and Latins, within the first five centuries." Sabatier (1751) collected Latin patristic evidence for the whole Bible with a fulness never before or since equalled. When Griesbach (1777, etc.) contrasted his two early recensions, the Western and the Alexandrine, with a third and later, the Constantinopolitan, the contrast was doubtless less based upon the absence of early patristic attestation for the latter. But it was Hug, in his Einleitung in die Septuaginta (1808: 3rd ed., Stuttgart and Tübingen, 1826), who, by the help of patristic material, systematically developed his theories on distinctions of date as well as of place, and less than justice seems to be done to him by Hort (Introduction, § 247). Hug saw how much more widely spread was Griesbach's Western type of text, in the earliest period, than the Alexandrine; and to the Western, in consequence, though he had no belief in its genuineness, he gave the name of kóýh έκδοσις. In the 3rd cent. he detected the appearance of three revisions of the common text: the Alexandrine recession he connects with the name of Hesychius, the Constantinopolitan with that of the Asiatic, and connects with the name of Lucian of Antioch—for we know, from Jerome's preface to his Vulg. Gospels, that both Hesychius and Lucian did, as a matter of fact, edit revised texts, at least of the Gospels; and the evidence of Origen's writings seemed to Hug to point to a second revision of the Gospels. Griesbach, too, noted the importance and the difficulty of Origen's evidence,
and suggested (1811) that he used different texts at different times of his life—an Alexandrine text of Mk. in the citations made from that Gospel in the commentary on St. John, a Western text of Mk. in the citations made in the later commentary on St. Matthew. The French Benedictines had produced, between the end of the 17th and the end of the 18th cent., good working texts of most of the Fathers; and as long as patristic evidence was relegated to a comparatively obscure place in the reconstruction of N.T. documents, these editions did well enough. But if we are in the last resort—and this is the conclusion to which the whole argument has led us—to depend on the Fathers for dating and grouping the various divergent forms of N.T. text, then we cannot be content, in the case at least of the commentators and of the chief ante-Nicene writers, with anything less than the most absolutely accurate presentation possible of their texts. The series of critical texts in this sense, with accurate apparatus criticus, is not yet complete, but matters of the sort may be said to have been inaugurated by Dr. Field's admirable editions of the Homilies of Chrysostom on St. Matthew (Cambridge, 3 vols. 1870) and St. Paul (Oxford, 7 vols. 1845-1862); with which may be mentioned Marriott and P. E. Pusey's edition of Theodore's Commentary on St. Paul (Oxford, 2 vols. 1852, 1870). Chrysostom and Theodore represent substantially that type of N.T. text which is propagated throughout the great mass of the mediaeval MSS.; and what their evidence proves is that this text was in use, at any rate in the sphere of the Church of Antioch, as early as 400 A.D. But the large mass of patristic material from the generations contemporary with St. Chrysostom, so far as it is not Antiochene but Egyptian or Palestinian, Latin or Syrian, appears to represent quite different textual traditions. The Antiochene text of the end of the 4th cent., in other words, the group of several texts which the fathers of the 4th cent. had combined, though it may be right to call it the Antiochene, and to set aside, and the predominance of the Diatessaron lasted for two centuries longer, while the four Gospels in the Old Syrian gradually faded into oblivion, to be rescued in our own day, and to form—it if the interpretation here given of the evidence is correct—our only test of the text to which the church in Syria, and possibly Antioch accepted 200 years before Chrysostom (Burkitt, Evangelion da-Miftharshé, ii. 34). Attention has already been called to the significant agreements between the texts of the far East and of the far West, and it would be a welcome addition to our knowledge if we could establish any lines of communication between them. Now among the Westerns the two earliest witnesses of importance—both were Greeks themselves, but both have come down to us mainly through Latin channels—are Marcion, who published his mutilated edition of St. Luke and St. Paul c. 140-150 A.D.; and Tatian, whose Diatessaron was finished 248-258 A.D., perhaps in the year when the Peshitta text of St. John was finished in Edessa (1868-1871) and the latter probably 250-260 A.D., or a year or two later. The Peshitta or Peshit of the West, or, as it is called, the Peshitta of the Syriac church, as never,:, it may be by St. Peter, and it was carried to Rome; but little is known of the identity of the Gospel texts of k (Cod. Robisonis) and of Cyprian—Cyprian's works were among the first publications (1868-1871) of the Vienna Corpus Scriptorum Ecclesiasticorum Latinorum, and though the edition was far from final, the apparatus enables the reader to control the text—a fixed point was reached
earlier than the middle of the 3rd cent., and the type of text thus established is known conventionally as the "African." A somewhat similar relation exists between Novatian, Cyprian's Roman contemporary, and a (Cod. Vercellensis); but a is the most "African" of the "European" group, and if it is also the oldest—if, that is, the "European" texts become African in the farther back we can trace them—then the conclusion suggests itself that the "European" type represents a gradual process of divergence from an "African" original. This original need not have come from Africa to Italy; the converse is more likely to have been the case. Anyhow, this "African" is attached to St. Augustine we, not the earliest stage of N.T. text in Africa. Tertullian was wont to translate too much directly from the Gk. for his Latt. text to be easily identified; but Nemesianus of Thubunae, a remote town in Numidia, used, at Cyprian's great council on Re-baptism, a N.T. that has clear points of contact with the Gk. necessary words. Cyprian (Journal of Theol. Studies, ii. 602 [1901]). Critical texts of 4th cent. writers illustrate at once the presence of "African" texts in Africa (Optatus of Miletim, Vienna, C.S.E.L. vol. xxvi. 1893), and especially among the Donatists (Tyconius, ed. Burkitt in Texts and Studies, iii. 2. 1894), and among non-African texts in the European provinces: Lucifer of Cagliari (C.S.E.L. vol. xiv. 1886) stands in close agreement, for the lesser Pauline epistles, with d. (Latin of Cod. Claromontanus), Priscillian the Spaniard (C.S.E.L. vol. xvii. 1898) serves to connect with Spain the Scripture or collection of Biblical passages falsified in Africa. A S. of Acts agreeing with that of the Old Latin MS. known as gigas (g) is found in three nearly contemporary writers, Lucifer at Cagliari, Ambrosiaster in Rome, and Niceta at Rennesiana in Dacia. Continual process of revision, especially in the 1st and 2d century in Lat. MSS., substitutions of every type of text which became popular among the Greeks. The sort of text which St. Jerome worked over to produce the Vulg. Gospels is represented in f (Cod. Brixianus); and J is a type of text in which clear elements of the Antiochian text as used by Chrysostom and Theodoret have already been introduced. What J supplies in relation to the sources of the Vulg. Gospels may be expected to be found for the Vulg. epistles in the text of the commentary of Ambrosiaster, an elder contemporary of St. Jerome at Rome; but of that commentary the critical edition is still imperfect. After the early reception of the Vulg. texts of St. Augustine throw welcome light; the De Consensus Evangelistarum (C.S.E.L. vol. xiii. 1904), c. 400 a.d., is based on a pure Vulg. text of the Gospels, while the Acta contra Felixam (ib. vol. xxi. 1892) show that in 404 he was using the Gospels in the Vulg., the specially Old ("African") Latin; and J ("Old Latin and Itala," Texts and Studies, iv. 3, 1896), starting from these premises, argues that it was the Vulg. which Augustine already had in mind in 397 when he wrote (De Doctrina Christiana, ii. 22) that the Italian translation, Itala, was to be preferred to the rest both for exactness and for lucidity. The De Consensus has not yet been used, as it might now be, as a witness to the Vulg. text as it reached Africa; but criticism is busy with South Italian patristic evidence for the Vulg. Gospels in the 6th cent. Victor of Capua ordered the writing of the Codex Wallenius. In the Codex Epternacensis takes us back to Eugipius of Lucullanum; the Codex Amiatinus has points of contact with Casiidorus (P. Cosson in Jahrbücher für protestantische Theologie, Leipzig, 1883); its sister MS., the Lindisfarne Gospels, bears traces of Neapolitan ancestry. Wordsworth's leading MSS. betray, in fact, a close family likeness of origin, and the known zeal of Casiidorus for the reproduction of Bible MSS., as portrayed in his De Institutione Divinorum Litterarum, suggests that traces of the influence of his scription may be found in them. To balance this S. Italian recension, the evidence of MSS. from other parts of Italy, the S. part with which is said on the text of the Vulg. Gospels; equal weight must be laid on four 6th cent. MSS. from N. Italy, two of them—the Milan and the Friuli Gospels—used by Wordsworth, two of them still unpublished: St. Gall 1395 (fragments amounting to nearly half the Gospels, copied by the present writer in 1892), and a MS. in the cathedral of Ancona, described by Mgr. G. Mercati in Rassegna Gregoriana, i. 64 (1902). For the Vulgate text of the Pauline epistles a new and early witness is Pelagius, the genuine form of whose commentary published c. 409, has lately been discovered by Mr. A. Souter in a Reichenau MS. of 9th cent. (Carlsruhe, Augiensis, cxxi.). Among the Fathers of Egypt and Palestine four are of special importance in the history of the N.T. text: Clement of Alexandria (c. 190—200), Origen (at Alexandria till 231, at Caesarea 231—250), Eusebius (Bp. of Caesarea c. 313—339). Cyril and Bishop of Alexandria surpassed them; and though they show earlier traces even than do the early Latin and Syriac writers of the type of text used from the 4th cent. onwards at Antioch and Constantinople. Of Cyril, P. E. Pusey has re-edited a large number of writings, and among them the imperfect commentary on St. John (Oxford, 1872). Rev. C. L. Payne Smith the Syriac version of the homilies on St. Luke (Oxford, 1858: English translation from the Syriac and the Gk. fragments, 1859); Cyril's text is close to that of the Memphitic Version, and the two show us an official Alexandrine text of the 5th cent., most nearly represented in the Gk. MSS. held at BN. (BN, viii. 62, cent. viii.). It is a local development of the earlier Egyptian text represented by Origen (BN) and the Sahidic. Eusebius was so multifarious a writer that even the steady issue of his works in the Berlin anti-Nicene Gk. Fathers has not yet included much that bears directly on our subject. But his place in the history of the N.T. text belongs to him not only in virtue of his writings, but even more by reason of the great library which he and his friend Pamphilus founded at Caesarea to enshrine the literary traditions of Origen. Biblical MSS. formed its nucleus; and when Constantine was furnishing his new churches
at Constantinople, he turned to Eusebius with the order for fifty sumptuous Bibles. Its preservation was provided for by Bp. Acacius, successor to Eusebius, under whose direction the original papyrus rolls were re-copied on the now fashionable and more durable material of the vellum codex. Definite testimony is borne to this Caesarean MSS. transition in Hr of St. Paul and in the O.T. of $N$. The archetype of $H_2$ was, as its mutilated colophon tells us, written by the great Origenist and ascetic Evagrius († 390); and either the scribe of the existing MS. or, as seems more likely, Evagrius himself, collated his work with "the library copy of the hand of the Pamphilus Codex S", according to a note at the end of the book of Esther, was compared with "a very ancient MS." reaching from 1 "Kingdoms" to Esther, which (as its colophon in turn bore witness) had been collated by the confessor Antoninus and confirmed in prison by Pamphilus after the fall of Origen; a growing tendency among scholars to-day to believe that $N$ certainly, and $B$ possibly, were written in the library of Caesarea. Origen composed commentaries (rōmata, volumina), homilies (στοιχεῖα, tractatus), or notes (σχόλια, exeripta), on most of the books of N.T.; but in the original Gk. not one of these works has reached us complete, and Latin versions (homilies on Lu. by Jerome, commentary on Romans by Rufinus, and an older anonymous translation of part of the commentary on Mt.) are naturally under suspicion of adaptation of the Scripture text to that familiar to the translators. Steady advance has been made, during the last few years, in critical editions of the Gk. remains: at Cambridge the Philoclia, which includes six passages from works on N.T. was edited by J. A. Robinson in 1893, and the extant portions of the commentary on Jn. by A. E. Brooke in 1896—the latter commentary has also appeared in the Berlin series, edited by Preuschen in 1903; and the fragmentary in the Pauline epistles, preserved in catena, are in process of appearing in the Journal of Theol. Studies; Ephesians, by J. A. F. Gregg (1902, in 233, 306, 551), 1 Corinthians by C. Jenkins (begun in Jan. 1908, ix. 231), while Romans is also in preparation. Special mention must also be made of the discovery by E. von der Goltz of fresh material for reconstituting Origen's text of the Acts and Epistles (especially Eph. Paul) in an Athos MS. of cent. x., Eine textitische Arbeit des zehnten bis x. schelten Jahrhunderts (Leipzig, 1899; note, e.g., that Origen's text omitted εν Ῥωμαίοις in Rev. 1.). But the final word on Origen's position in the history of N.T. texts has yet to be said: a systematic collection of his evidence is one of the chief desiderata of textual criticism. Even if he did not definitely edit the N.T., as he did the O.T., it is still probable that the form of text adopted by him would propagate itself through the influence of his school. Pamphilus and Eusebius at Caesarea, Dionysius and Pierius at Alexandria; and, in fact, Jerome quotes as the most authoritative for him among Gk. MSS. the "exemplaria Adamantii" (Adamantius Origeni in C. L. i. 11, and exemplaria Adamantii in Pierius in Mc. 24, 26 (Comm. in Gal. and in Matt., ad loc.; Comm. in Matt., ad loc.). In the case of Origen we have to weigh the probabilities that he was merely using a text that had come down to him, and that he was consciously choosing between different texts or even constructing a new text; but Clement was no textual critic, and the problem of his N.T. is therefore a simpler one. But it was left to P. M. Barnard and F. C. Burkitt ("Biblical Text of Clement of Alexandria in the Four Gospels and the Acts," Texts and Studies, v. 5, 1899), to work out the startling result that Clement's text has very clear "Western" affinities. The "Western" element in the Sahidic and in Origen no longer causes surprise, now that we know that at Alexandria as well as at Edessa and Rome, Lyons and Carthage, the earliest traceable text was "Western." It should be added that Clement shares one certainly wrong reading (Lu. 9:62) with D and the Old Latin; but conversely the error does not appear in the Old Syriac.—IV. SUMM. I, K. We ask, in conclusion, how the principles of the text of Westcott and Hort's great edition were constructed have been affected by the discoveries and investigations of the years that have elapsed since its appearance in 1881. There is a true sense in which Hort's masterly introduction will never be superseded. Its simultaneous publication with the text meant that the principles of the text were known from the outset, and the details then followed as the logical outcome of the principles. Hort taught us to note the temper of each of our leading MSS. and the company which it keeps; and the results, as he presented them, converged in assigning a unique place to Codex B. The bulk of MSS. were still divided off into a single "group," which he called Syrian; it was perhaps by deliberate avoidance of Hug's terminology that Hort used neither the word "revision" nor the word "Antiochene." Yet in the case of the Syrian MSS. Hort detects such obvious combinations of pre-existing readings as the results of the rough of the revision of the text; and the most persistent of the early criticisms on his position, namely, that history had preserved no record of the revision that on internal evidence he postulated, would have lost its edge if he had boldly followed Hug in convoluting it with the known name of the scribes and books of Linnaeus. Hort further retained, with Griesbach, a Western "group," and is forced to admit, with Hug, its wide prevalence in the 2nd and 3rd cents.; for to Hug's authorities Cureton's Syriac had to be added, so that "during that part of the ante-Nicene period of which we have any direct knowledge, Western is at any rate at least dominant in most churches of both East and West" (§ 177). An Alexandrine text also reappears, but in a sense so much more limited than Griesbach's that even "group" is too definite a term for it; no Gk. MSS. gives an "approximately unnixed Alexandrian text" (§ 182), but for practical purposes the text represented by Alexandrine writers and Egyptian versions when their readings are neither those of the Western nor of the "Neutral" text. The coinage of this latter term is Hort's specific contribution to the nomenclature of textual criticism; it is meant to signify division from the faults or local colouring of the other texts,
NEW TESTAMENT, TEXT OF

and it is represented in effect by B and by other authorities when they agree with B. Agreement with B reached its highest per-
cenage among MSS in scriptores origines in the Memphitic, among Fathers in Clement and
Origen, Eusebius and the Alexandrine Cyril. Now, according to Hort, internal evidence of
"transcriptional" and "intrinsic" probability, where these can be brought to bear,
confirmed nearly always the readings of \#B against those of the other two MSS. The deduction of excellence drawn from these
clearer cases might then be properly employed in favour of B’s reading in those other cases
where the same tests cannot, for whatever reason, be applied. As between the Gk. MSS.

may it at once be conceded that, taking signi-
cificant and significant variations together, the
claims of B to be regarded as our best and
purest MS. cannot be denied. But what Hort
asked for B was much more than this; for if
the combination \#B practically always, and
B alone nearly always, gave us—a part from

the ordinary blunders of even a careful
scribe—what appeared to be an essential and
Western element in the Pauline epistles
true text, it is obvious that the inde-
pendence value of other authorities, such as
versions and Fathers, tended to vanish. They
only served for the most part to reinforce
the Western text; and the Western text is
wrong when it differs from the Neutral. And
since Hort wrote, Clement, the earliest Father
on whom he relied, has gone over to the
Western enemy, while the Memphitic, his
most faithful ally among the versions, has
slipped down three centuries in date and value.
It is more than ever clear that Hort’s work is
equivalent to a reaction in favour of depend-
ence on MSS.—cf. §§ 262, 369—as against the
increased value set on other evidence of which
we have traced the growth since the begin-
ing of the 18th cent. But the tendency of all dis-
coveries and all research during the past quarter
of a century has been to re-establish more
firmly the texts and to give to the neutral text
and Fathers to be heard in modification of
the textual results arrived at by the help of
Gk. MSS. alone. The Western text of the
Gospels, little support as it gets from the Gk.
uncials apart from D, is seen on the one hand
to receive continual reinforcement from the
earliest versions and the earliest Fathers, and
on the other to be something above and apart
from the local or individual aberrations of its
different representatives; D was the only
uncial giving a Western text, and perhaps
Hort, true to his preference for MSS., judged
the Western text by the, in many ways, de-
prayed standard of D. The great classical
scholar, Fr. Blass, at least is able to give the credit
of both Neutral and Western texts, in the books
where their divergence is greatest, by
the hypothesis that St. Luke published two
editions of his Gospel and Acts (Acta Aposto-
lorum, sine Lucate ad Theophilum liber alter,
Gottingen, 1895, ed. minor, Leipzig 1896;
Theophilum liber prior [uniform with ed. minor
of Acts], Leipzig, 1897; Philology of the Gospels,
London, 1898); but whatever germs of truth

may be concealed in his theory, it was found,
in the shape which he gave to it, far too compli-
cated for acceptance. And while the Western
text is represented in such diverse quarters
that no merely local name can now efficiently
describe it, the witnesses to the Neutral text
are more and more clearly localized to Egypt
and Caesarea. Whether the Neutral text
existed before Origen or not, the evidence is
insufficient at present to decide. But this text is certainly not secondary in the same
sense as the Syrian text, there are not wanting
readings in B which have somewhat the appear-
ance of confabulations—such as Lu.10.42, διλέγω
... ἡ ἐνός, Lu.12.47, μὴ ἐτοιμάσας ἡ τοῦπα
d-and in that case indicate at least the pre-
existence of rival texts, if not also the industry
of a scholar in combining them. But, what-ever view be taken of the origin of the B text,
the whole aspect of the problem is altered, now
that the “Neutral” text has become, and the
“Western” has ceased to be, representative
of one particular locality. The a priori proba-
bilities are not in favour of a purer text being
preserved at Alexandria than at Rome; but
when the text is read with the highest efficiency,
and the most that can now be said is that we have good evidence from three different quarters—Alexandria,
Edessa (Antioch), and Carthage (Rome)—of
the Gospel texts in use before 250 A.D.; that
there is a very considerable amount of agree-
ment between these texts against all or a ma-
jority of later texts, that the three dis-
agree, the reading of any two of them are more
likely to be right than the reading of the third,
though in individual instances each will be
found right against the others combined. This
new conception of the evidence, of course,
renders the task of the textual critic more
complicated than if faith is pinned to one
authority alone. It also involves the re-entry
of the Syrian text as a factor not quite to be set aside; for as that text is made up for the
most part of pre-existent elements, it may
enable us to identify fragments of ancient texts
to which our earlier authorities themselves,
during the 3rd century, called upon to desire
preserve direct testimony. Enough has been
said to show that the task of textual criticism
of the N.T. is not yet complete, and that it
will still have calls to make upon both the
courage and the patience of Christian scholars.

En τῆς ἐπιστολῆς ὑμῶν κτίσωμεν τὰς φυσικὰς ὑμᾶς.

—Bibliography. Older books and modern
discussions of detailed points have been
sufficiently dealt with above, and need not
be recapitulated here; the following list con-

fines itself in time to what we have called
the modern period, and in subject-matter to
editions of the text and general works on
textual criticism. (1) Editions. Tischendorf’s Editio Graeca. And while the Western
text is, for full statement of the evidence, whether
of MSS., versions, or Fathers, absolutely indis-
ispensable, though of course already to some
extent out of date. The last part of the text of
Tregelles appeared in the same year as the
last part of Tischendorf’s; in both cases the
introductions were written indepen-
dantly (for Tischendorf, see below under Gregory;
prolegomena to Tregelles were edited by Hort
and Strane in 1879), while Westcott and

NEW TESTAMENT, TEXT OF
Hort, as was noted above, published their whole text and introduction simultaneously in 1881 (annual edition of the text, 1885). Among more editions, both of Nestle's and his companion parallel Gk. and Vulg. texts (Stuttgart, 1906). (2) Introductions. For all material connected with the bibliography of editions, MSS., and versions, the prolegomena to Tischendorf's eighth edition, carried through by C. R. Gregory (Leipzig, 3 parts, 1884-1891), are as indispensable as his text, and have supplied many details, especially in the first half of this article. F. H. A. Scrivener's Plain Introduction to the Criticism of the N.T. (4th ed. 2 vols., by E. Miller, 1894) contains a vast mass of miscellaneous information, and should not be neglected; the standpoint on textual matters is conservative, but less trenchantly so than J. W. Burgon and E. Miller, The Traditional Text of the Holy Gospels vindicated and established, and The Causes of the Corruption of the Traditional Text (both 1896); of Miller's Textual Commentary upon the Holy Gospels no more than Part I, Mt. 1-14, 1898, seems to have been published. Fundamentally, the accounts to recommend to the student are probably E. Nestle, Einführung in das Griechische N.T. (Göttingen, 1897, 2nd ed. 1899; English version, Introduction to Textual Criticism of the Greek N.T., London, 1901), and F. G. Kenyon, Handbook to the Textual Criticism of the N.T. (1909). Kenyon's position is that of a moderate adherent of Hort; a more thoroughlygoing classic is J. O. E. Murray's article "Textual Criticism of the N.T." in the supplementary vol. of Hastings' Dictionary (1904). But if the argument suggested in this article is valid, the most accurate summary of the present position will be found in F. C. Burkit's article, "Text and Versions," in Encyclopaedia Biblica (vol. iv. 1903); no amount of disagreement with this scholar's views on other matters should carry with it an under-estimate of his brilliant services—greater perhaps than those of any living scholar in the textual criticism of the New Testament. Solidity rather than brilliance is the note of the most recent German work, Freiherr von Soden's Die Schriften des N.T. in ihrer ältesten überlieferbaren Textgestalt: this great undertaking has reached so far (1902-1908) p. 1618 of vol. i.; the author has hardly simplified an already difficult subject by re-naming and re-numbering all MSS. of the N.T. [C.R.T.]

New year. [TRUMPETS. FEAST OF; YEAR.]

Neziah, ancestor of some Nehinthim who returned with Zerubbabel (Ezr. 2:51; Ne. 7:50). Nezib, a city of Judah (Jos. 15:33 only), in the district of the Shephelah, one of the same group with Keilah and Maresah. Eusebius (Onomasticon) places it on the road between Eleutheropolis and Hebron, 9 miles from the former. It is now the rum Nebib, 8 miles N.W. of Hebron. [C.R.C.]

Nibhaz; a deity of the Assyrians, introduced into Syrian mythology, the colossus of the Assyrian king (2 K. 17:34). Nothing is known beyond the Bible records either about the deity or about the people who worshipped it. [FARTAK.]

Nibshan, one of the six cities of Judah (Jos. 15:62) in the midbahr (A.V. wilderness). The site is unknown. [C.R.C.]

Nica nor.—1. Son of Patroclus (2 Mac. 8:9), a general engaged in the Jewish wars against Antiochus Epiphanes and Demetrius I. He took part in the first expedition of Lysias, 166 B.C. (1 Mac. 3:38), and was defeated with his fellow-commander at Emmaus (1 Mac. 4: cf. 2 Mac. 8:9 ff.). After the death of Antiochus Epiphanes and Lysias, Demetrius appointed him governor of Judaea (2 Mac. 14:12), and he is noted as being one who bore the name of Israel!" (1 Mac. 7:26). At first he endeavoured to win the confidence of Judas, but, his treacherous designs being discovered, he had recourse to violence. An indecisive battle took place at Caphar-salama; but shortly afterwards Judas mortally wounded him at Adasa (1 Mac. 6:47, 111.), and he fell "first in the battle." A general revolt followed: and Adar 13, on which the engagement took place, "the day before Mardochoeus' day," was ordained to be kept for ever as a festival (1 Mac. 7:49; 2 Mac. 15:36). There are some discrepancies between the narratives in 1 and 2 Maccabees, but, though this is 1 Mac. 7:26. Internal evidence is decisive in favour of Mac. 7:26. One of the first seven deacons (Acts 6:5).

Nico demus, a wealthy Pharisee, member of the Sanhedrin and "teacher of Israel," three times mentioned by St. John. (1) In 3:1-21 he came to Jesus by night, and our Lord held with him a well-known conversation as to the near birth by water and the Holy Ghost. (2) In 7. 50, 51 he raises his voice in the Sanhedrin itself, in a timely (though guarded) protest against judging Jesus unheard, which is received with little favour or respect. (3) In 19. 35, 36, when Joseph of Arimathaea has succeeded in obtaining the body of Jesus for burial, it is Nico demus who brings a large quantity of spices with which to embalm it, before it is laid in Joseph's new tomb. These three incidents reveal a character which (by nature both intellectually and morally timid) gains strength and decision under the masterly and sympathetic guidance of his fellow-commander. His acts of generosity when he and his fellow-commander purchased the field of another for a burial-ground, and bequeathed his seat in the Sanhedrin to one of his best young scholars, show him to be a man of real worth. His place is a fitting one in the story of Jesus' life. Internal evidence is decisive in favour of Mac. 7:26. One of the first seven deacons (Acts 6:5).

Nicolaitanes, Twice mentioned in N.T. (Rev. 2:6, 15); a sect of Christians in certain Asian cities. At Ephesus their works are described as "idolatory," "debauched," or "ruthless," or "carried away with lasciviousness." (Rev. 2:6) "I know where thou dwellest, who hath thy companions in thy abominations." (Rev. 2:15) "I know where thou dwellest." This is the first time of the Nicolaitanes mentioned in the New Testament. The meaning of the word is uncertain. It has been suggested that "Nico-lanais" ("conqueror of the people") is simply the Grecized form of Balaam ("destructor," or "lord," or "of the people"). This suggestion does not seem very convincing; but "in like manner" (2:15) implies that the
Nicolaitans were at least akin to the Balaamites (cf. Num. 31:16, which traces to Balaam's suggestion the sin of Peor). We may take it then that the charge against the Nicolaitans is that of eating things offered to idols and committing fornication—the same conjunction of a ceremonial with a moral offence as is observable in Ac. 15:29. Prof. Ramsay, in his Letters to the Society of Biblical Literature, propounded the hypothesis that the New Testament for any one to remain a member of the clubs and trade-guilds of the Asiatic cities without joining in idolatrous feasts; and doubtless the Nicolaitans had much to urge as to the danger of a sectarian attitude on the part of the Christian minority. But St. John knew well how closely pagan festivals were connected with immorality; and hence we have the severe condemnation of Rev. 2:22, 23, reminding us of the strictures of Jude and 2Pe. 2. Later writers endorse the rebuke. Irenaeus states that the sect taught that adultery and eating things offered to idols were "things indifferent." The same testimony is borne by Clement, Tertullian, and Origen. Now the language used to express the connection with incipient Gnosticism, holding that doctrine of a "Demiurge" other than the supreme God, and that Docetic view of Christ, afterwards taught by Cerinthus. It has been supposed, in spite of 1Cor. 8, that the author of Rev. is here attacking St. Paul. Impossible as this is, it is likely enough that the Nicolaitans, who fled from the persecution and offered themselves under the name of the champion of liberty, [Nicolas.] [k.d.m.]

**Nicolas**, one of the first seven "deacons" (Ac. 6:5). Is there any connexion between him and the "Nicolaitanes" (Rev. 2:6, 15)? Irenaeus states that they were his followers, and he is charged with heresy by Hippolytus and with immorality by Epiphanius. The Gk. version of Ignatius, on the other hand, implies that the Nicolaitanes could not make good their claim. Perhaps an explanation may be suggested by Clement of Alexandria, who (in telling a curious story that Nicolas was once reproved by the apostles for his licentiousness and answered the charge by offering his wife to any one who would have her) adds that he led a chaste life, and used to say that we should παραχρησάωντας τῇ σαρκί, "Abuse of the flesh", thus inculcated in one sense may well have been adopted in another to justify Gnostic self-indulgence. There is of course a third possibility that the sect looked to some other Nicolas as its founder. [k.d.m.]

Nicopolis is mentioned in Tit. 3:12 as the place where, at the time of writing the epistle, St. Paul was intending to pass the coming winter, and where he wished Titus to meet him. Nothing is to be found in the epistles or elsewhere to explain the expression, and we are here intended. There were cities of this name in Asia, Africa, and Europe. One Nicopolis was in Thrace, near the borders of Macedonia. The subscription (which, however, is of no authority) fixes on this place, calling it the Macedonian Nicopolis. Another Nicopolis was in Thrace Chalcidion, and Sozomen pronounces for this; but this opinion is connected with a peculiar theory regarding the apostle's journeys. Jerome's view is probably correct, that the Pauline Nicopolis was the celebrated city of Epirus. This city (the "City of Victory") was built by Augustus in memory of the battle of Actium. Nicopolis is on a peninsula to the W. of the bay of Actium, in a low and unhealthy situation, and is now a very desolate place.

**Niger.** [Simeon Niger.]

**Night,** the period between sunset and sunrise. It represents in A.V. four Heb. words: (1) laylah (Mazza) [night], distinguished from day, (2) nešešāh, Is. 21:4,59,10 (R.V. twilight); and in 51:11, where both E.V. give "night," (3) cyreb, Gen. 49:27; Lev. 6:20 (R.V. even, evening), and in Job 7:4, where again R.V. also renders "night." (4) hōšēk, Job 26:10 (R.V. darkness). [Day; Watches of Night.] [i.h.]

**Night-hawk** (Heb. tāhānās). By "night-hawk" the translators of the Vulg. probably mean one that is a goose-sucker, or night-jar, but the derivation of the Heb. word (which occurs only in Lev. 11:16, Deut. 14:15, and signifies "to scratch the face") apparently indicates a bird of prey. The LXX. and Vulg. understand some kind of "owl," while most of the Jewish authors rendered it Sōmis or "merlin," but the LXX and Vulg. are probably correct, and it is possible, if the word is not used in a wider sense, that the barn-owl (Strix flammea) is the species indicated. There is no justification for the idea that tāhānās means either swallow or ostrich, especially as the latter is elsewhere mentioned in the same sense. [Owl.] [s.l.]

**Nile** (Νεῖλος). The origin of this name is unknown. It does not occur in either the Heb. text or LXX., and only once in Vulg. (Is. 23:3; A.V. great waters; R.V. Nile). The names of the Nile in the Heb. Bible are shīhōr and yēʾōr. [River.] shīhōr (the black), supposed to be derived from the colour of the water, is by various authors to be the Semitic name of the river. On the contrary, we believe that it is a transcription of the Egyptian word Shī-Hor, "the basin or the water of Horus." Owing to what is called popular etymology, it has taken in Heb. a sense quite different from the original meaning... Shīhōr was the name of the Egyptian branch which watered the Saitotic (the most Eastern) nome. Through that province ran one of the principal roads to Palestine. Caravans and armies had to pass its capital, the fortress of Zar, now Kantarah. The water of Shī-Hor was the first Nile water one could drink coming from Palestine by that way, and this explains the words of Jeremiah (12:7,8), "What hast thou to do in the way to Egypt, to drink the waters of Shihor?" and also that Shihor is said to be (Jos. 13:3) "before Egypt." [Shīhōr.] The more usual name is yēʾōr, the old Egyptian atar or aur. In the sing. yēʾōr always means Nile, except once in Daniel (12:5-7), where it refers to another river. In the plur. it means streams, branches, or channels, generally those of the Nile. The nāhāl miy-rayim, "brook [A.V. river] of Egypt" (Num. 34:5; Jos. 15:4,47), seems to refer to a winter torrent flowing through the valley, now called Wādī el-Arish, the Nile actual frontiers of Egypt. At its end stood the small city Rāghūn, mentioned once in LXX. (Is. 27:12). [River of Egypt.] The usual Egyptian name of the Nile is Ḥāp or Ḥāpi, but the river is designated by a great many other words. Ḥāpi is also the
name of the Apsis bull, which is said to be an
emblem of Osiris. The Nile, Hapi, is called the
father of the gods, and is generally represented
as a man with a woman's breasts bringing offer-
ing, and having on his head the plant of the
North or that of the South. For there are two
Niles in the mythology and religion of the
Egyptians. One of them comes out of a cave
in an island above the cataracts, and flows
as far as Babylon, now Old Cairo; the Northern
Nile begins there. The two Niles are often
seen tying their plants to a kind of pole, which
reads in hieroglyphics sam or sna, and which is
the sign of junction. It supports the throne
of the king, or is engraved on its sides. The Nile,
being the giver of life to the whole country, is
one of the great gods, and is qualified by epita-
thren very similar to those which are given to
Amon or Ra. Did the old Egyptians know the
sources of the Nile? It seems very probable
for they had commercial intercourse with the
populations of the inner part of Africa. We
see in the sculptures negroes and other tribu-
tary nations bringing to the king the products
of their soil or of their industry. They knew
the dwarfs (the "psylli") discovered by
modern travellers on the Upper Nile. Here
Ptolemy gives us only vague or con-
tradictory hearsay information. But the geo-
grapher Ptolemy in 2nd cent. a.d. makes state-
ments that have excited the admiration of
travellers like Stanley. Ptolemy says that on
the same parallel as the island of Menouthis
(Madagascar) are the mountains of the moon,
the sources of which fill the lakes of the Nile.
There are two of these lakes; from each of them
issues a branch of the Nile. They very soon
unite, after which the Nile receives the Astapus,
now the Bahr el Azraq (the Blue Nile), and the
Astaboras (the Atbara). It seems probable
that Ptolemy, who was an Egyptian, had this
information from his countrymen, and that
this tradition went very far back. In ancient
times the water of the Nile emptied itself into
the sea through seven mouths, the most eastern
being the Pelusiac and the most western the
Canopic. Now there are two principal tranches
the Kassa branch on E. and the Rosetta branch
on W.; from this starts the Mahmundiah Canal, dug by Mohammed 'Ali,
which provides the water for Alexandria. The
Nile is often referred to in the Pentateuch. Out
of it come the cows seen by Pharaoh in his
dream. Into it the children of the Hebrews
are thrown, and on it Moses is exposed in his
basket of reeds, and found by the king's daugh-
ter. Moses meets Pharaoh on the river's brink
when the country is to be struck by the first
plagues. The prophets also speak of the Nile—
e.g., Isaiah (18. 2) mentions the "vessels of papy-
rus upon the water." Jeremiah describes its
powerful course (46. 8, R.V.), "Egypt riseth up
like the Nile, and his waters toss themselves like
the rivers: and he saith, I will rise up, I will
cover the earth." There is a magnificent de-
scription in Job of two animals of the Nile, the
behemoth (40. 17-24); the hippopotamus and
the leviathan (the crocodile), 41. The hippo-
opotamus has been identified with the Nilotic bull.
It seems to have been a sport of the rich Egyp-
tians to chase that huge animal. It is now
seen in the Soudan only at several days' march
above Khartoum. (Cf. Behemoth; Palest-
tine; the latter art, giving the opposite view
as to the behemoth.) The prophets call the
crocodile the dragon, and for them it is the
emblem of the king of Egypt (see Ezk. 29. 3).
Thirty years ago there was supposed to be
Upper Egypt on the sand-islands of Qeneh
and especially at Kôm Ombo. It has now
retreated above the second cataract. The
papyrus which in the time of the Pharaohs
covered the banks of the canals has now en-
tirely disappeared. We know now that
the Nile comes out of the great lakes of Central
Africa, the two southernmost of its ultimate
sources being the Albert Nyanza and the Victo-
ria Nyanza. After 500 miles of its course,
it receives on the W. the Bahr el Ghazál: 550
miles farther, at Khartoum, the Bahr el Azraq,
or Blue Nile; and 180 miles farther N. the
Atbara. From there to the sea the Nile has
not a single tributary, and its volume is di-
ninished by the intense evaporation and by
the numerous canals which spread the fertiliz-
ing water over the irrigated land of Egypt. Its
inundation begins about the summer solstice.
The river rises for about 100 days, and there are
two distinct periods of swelling. The begin-
ning inundation is from the melting of the snow
on the Abyssinian mountains, which causes
the Blue Nile to swell considerably. The
second is the inundation produced by the White
Nile, which comes straight from the S.; as its
current is extremely weak, and its bed ob-
structed by a thick vegetation still further
fixed, it takes several months for its increase to
reach Egypt. It carries a considerable amount
of very fertile mud, which is deposited on the
land and gives it its marvellous fertility.
Egypt lives entirely on the Nile; in old times
even in the inscriptions of the Pharaohs we
find names caused by a low Nile. A very
high Nile may carry away a number of mud
villages, but is a great benefit to the whole
country. The area of cultivation varies ac-
cording to the height of the river, since all land
which is not reached by the water remains
absolutely barren. The Nile begins to fall in
September, but it goes on raining and the
water, agricultural labours begin. The river is
very low in spring, and the fall continues
till the rise again begins. There thus is no
normal level for the Nile. The efforts of the
Government have been directed towards en-
larging the area of cultivated land. Many
canals have been opened lately, and various
dams or barrages have been erected to store
the water, so as to have for use in the spring
a considerable amount which otherwise would
be lost in the sea. [F. N.]

Nimrah (Num. 32. 3). Beth-nimrah (32.
36: Jos. 13. 27.), a town of Gad, in the Jordan
Valley, mentioned with Beth-arabim (Tell er Râ-
rèch). The Waters of Nimim (Is. 15. 6; Je. 48.
34), mentioned with Zoar, seem clearly to have
been near it. The word indeed (Abra. Nimr)
signifies "abundant water." The site is now
called Tell Nimrin, at the foot of the hills of
Gilead, 6 miles S. of Zebaim. Beth-arabim
(Beth-araim). Perennial streams of good water
flow in the valley just N. of the tell. The site
was known, in 4th cent. a.d. (Onomasticon),
as being 5 miles N. of Lybias (Tell er Rârkèch),
NIMROD

The white tell is surrounded by groves of lotus-trees (Surv. E. Pal. pp. 237, 238). [c.e.c.]

Nimrod, a son of Cush and grandson of Ham (Gen. 10:6), is the ancient king and empire of Assyria. The name appears in the inscriptions as Nind and Ninua, and is probably connected with that of the goddess Nina, which is written with the same character. Nimrod is first mentioned in O.T. in connexion with the primitive migrations of the human race, Assur, or, according to R.V. (which is generally preferred), Nimrod, being there described as extending his kingdom from Shinar or Babylon, in S., to Assyria in N., where he founded four cities, of which Nineveh was one (Gen.10.11). In 2K.19.36 (= Is.37.37) the city is mentioned as the residence of a monarch, in this case Sennacherib, who was slain there when worshiping in the temple of Nisroch his god. (The parallel passage in 2Ch.32.21 omits the name of the city.) Zephaniah, who lived late in 7th cent. b.c., speaks of Assyria and the destruction of Nineveh as a future event, thus indicating that the city was still in existence in the 6th cent. (the reign of Josiah). Somewhat later, apparently, comes the book of Nahum, whose prophecy falls between the capture of Thebes and the taking of Nineveh, its latest date, in the absence of other objections, being 606 B.C. Later than these, though referring to an earlier period, is the account of Jer. of its destruction; and from the linguistic argument, there is good reason to regard it as belonging, not to the 8th, but to the 5th, or, with Ed. König, to the 4th cent. b.c.—cf. Jon.3.3, "Now Nineveh was an exceeding great city," and the incorrect title "king of Nineveh," instead of "king of Assyria" (3.6); but for another view see Jon.3. Further reference to the city, and also to the Assyrian empire as a power to be feared, ceased with its destruction in 606 B.C. Nineveh was then laid waste, its monuments destroyed, and its inhabitants scattered and perhaps carried into captivity. It never rose again from its ruins, and the site of it is still one of the world's most desolate places. It was the scene of the famous battle described by Thucydides, and was surrounded by the records of profane history. The accounts of Diodorus (i.103) speaks of the Tigris as the river "along the bank of which lay the city of Nineveh." The historians of Alexander, with the exception of Arrian, do not even allude to it, though the conqueror must have actually marched over the ruins. The later Gk. and Rom. writers—e.g. Strabo, Ptolemy, and Pliny—derived any independent knowledge they possessed of Nineveh from authorities not always well informed. During the Roman period a small castle or fortified town appears to have stood upon some part of the site, and to have been in its turn abandoned, for there is no reference to the place in the account of Heraclius' great victory over the Persians in the battle of Nineveh, fought on the very site in 627 A.D. After the Arab conquest a fort on the E. bank of the Tigris bore the name of "Ninawi," and Benjamin of Tudela, in 12th cent., mentions that its site was occupied by numerous villages and small towns. The name remained attached to the ruins during the Middle Ages. Traditions of the size and magnificence of Nineveh were equally familiar to the Gk. and Rom. writers and the Arab geographers.

NINEVEH

Nimshi, the grandfather (2K.9.2,14) of Jehu who is generally called "the son of Nimshi" (1K.10.16; 2K.9.20; 2Ch.22.7).
—KOUVUNIK: History. Owing apparently to the tradition that Nineveh was founded by Nimrod, Assyria is called "the land of Nimrod" in the Bible, though it is rather Babylonia which has the real claim to that title. In all probability Nineveh was originally a colony from Nineveh, in S. Babylonia, at some unknown date. The goddess of the city was Ishtar, whose name, like that of the city itself, is written with the same characters as the Babylonian goddess Nin, thus suggesting identity between the two deities. The city and its temple, E-maššu, are referred to in the Laws of Hammurabi (Introduction), c. 2000 B.C., and both seem to have continued to increase in renown, as is shown by the fact that Dussumir of Mitanni, c. 1400 B.C., sent a statue of the goddess Ishtar of Nineveh to Egypt, that her presence there might benefit Neb-nun-Ra (Amunophis, III.). Her temple, which is elsewhere called E-maššu, seems to have been built by Samsi-Adad, viceroy of Asur, in 15th cent. B.C., and was restored by Shalmaneser I. c. 1300 B.C. The first king known to have lived at Nineveh was Assur-bel-kala, son of Tidath-pileser I., c. 1100 B.C. Though Calah (Nineveh) was also a favourite place of residence of the Assyrian kings, and Nineveh seems to have been neglected until the time of Sennacherib, who built a palace there, and paid great attention not only to the adornment of the city, but also to the health of the inhabitants, by providing pure drinking-water. Esar-haddon built a palace at Calah, but probably resided at Nineveh from time to time. Assur-bani-apli, his son, the last great king of Assyria, on coming to the throne, again made Nineveh the royal residence, building a palace there whose sculptures are of wonderful beauty and artistic skill. The additions which this kingdom made to the royal library attached to the palace must have made it the richest collection of literary material ever before collected together. The fall of Nineveh took place in 606 B.C., during the reign of Sargon (the Sin-Sarra-Iškun of the inscriptions), and was brought about by a combined attack on the part of the Medes and the Babylonians. According to Diodorus Siculus, a portion of the wall was carried away by the overflow of the Euphrates (he apparently confuses the capture of Nineveh with that of Babylon—the river should be the Tigris or the Khasor), giving admission to the enemy; and the king, gathering his concubines and his precious things, erected a great funeral pyre, and mounting it, perished with all his belongings in the flames. With the disappearance of Nineveh the history of Assyria practically ends.—The ruins of Nineveh lie on the E. bank of the Tigris, opposite Mosul, and the published plans show a well-defined enclosure, narrow at the S., and increasing in width towards the N., being the widest part by more than double. According to G. Smith, the W. face is over 25 miles, the N. abt. 17, the S. 34, and the S. rather more than half a mile. The walls are said even now to be 50 ft. high, whilst the breadth of the rubbish at their bases is estimated at from 100 to 200 ft. The roads from then down their thickness as being probably 50 ft. At present the walls are interrupted by roads, but in some cases the gaps represent the ancient gates. That in the N. wall was excavated by Layard, and is paved with slabs of limestone, and flanked by winged bulls and mythological figures. It seems to have been under the centre of a tower.

![Nineveh Map](image-url)
Another gate is represented by the gap in the S. part of the E. wall, near T on the road to Ervil or Arbela. This section is protected by four walls and three moats. Flood has destroyed the inner wall where the Khosor comes through. According to Smith's estimate, the circuit of the inner wall was about 8 miles. The palace-mounds are in the W. wall, the large one, called Kouyunjik, occupying the angle between the wall and a sharp bend in the Khosor, which partly determined its rather irregular shape. It measures abt. 3,000 yds. in length, and 500 in greatest width. Its height—abt. 96 ft.—suggests that it may have been in part a natural eminence. Its sides are precipitous, and its base must have been regarded as numbering about 600,000, and more than three cities of this extent would have been required to contain them. This being the case, it is clear that, in the mind of the writer of the book, a space in proportion—"an exceedingly great city of three days' journey" (3:3)—would probably not have been mentioned, especially as there was, in addition, "much cattle." Many scholars have therefore conceived Nineveh as having been also understood in a larger sense, and including within its radius several other towns. This view is favoured by the first reference to Nineveh in Gen.10:11: "Nineveh, and Nahoroth, and Calah, and Resen, between Nineveh and Calah (the same is the great city)," for it is clear that Resen, being a comparatively unimportant place, cannot have been the "great city," so that this final parenthetical explanation must refer to the whole group, to which, in the time of Jonah, others, such as Dur-Sarru-kinu or Khorsabad, must have been added. Even with these additions, however, an extent of three days' journey, or abt. 60 miles, seems to be excessive; it is doubtful whether greater Nineveh could have reached farther than Calah (Nimrud) on S., and Dur-Sarru-kinu (Khorsabad) on N., a distance of less than 30 miles (abt. 12 days).

Khorsabad. The ruins of Dur-Sarru-kinu lie about 12 miles N.E. of Kouyunjik, and show a large enclosure abt. 2,000 yds. square, with remains of towers and gateways. The mound which gives its name to the ruins lies on the N.W. face, and consists of an extensive plat-
Assur-êtil-lâni, Esar-haddon's grandson (625 B.C.).—The Palaces. Assyrian palaces were generally built upon artificial platforms varying in height from 30 to 50 ft., sometimes, as at Nimrûd, of sun-dried brick, or of earth and rubbish, as at Kouyunjik. They were in all probability faced with masonry, and access was gained to them by broad flights of steps, or inclined pathways. The plan of the ground-floor is all that can at present be traced, but these palaces may have had upper stories, which, when they were destroyed, covered the lower portions with their debris, thus preserving them to later ages. The depth of accumulation above the alabaster sculptures varied from a few inches to 20 or 30 ft. The edifices excavated consist of halls, chambers, and galleries, opening for the most part upon large uncovered courts. The partition-walls are from 6 to 15 ft. in thickness, and are built of sun-dried brick, against which the paneling of sculptured or inscribed slabs was placed. As no windows have been discovered, it is probable that light was obtained through openings in the roof or through the doors. Above the stone panelling the walls of the rooms were plastered, and painted with ornaments or scenes of an historical nature. The pavement consisted either of inscribed slabs of alabaster, or large, flat, kiln-burnt bricks resting upon layers of bitumen and fine sand. In Assurbanî-âpî's palace at Kouyunjik the pavement slabs were richly sculptured with a carpet-like design. With the exception of the large human-headed bulls and lions which flanked the doorways, the sculptures are in low relief. The large slabs show the king, his attendants, and mythological figures, and the smaller ones scenes of the battle and the chase, with a few religious ceremonies. In many cases there are traces of colour, principally red and black, suggesting that in some cases whole series may have been painted. Thus decorated without and within, the Assyrian palaces, when perfect, would probably have given to a modern visitor an impression of barbaric magnificence, not devoid, however, of a certain grandeur and beauty probably unexcelled by any ancient or modern edifice. Nineveh in its restricted sense, as represented by the walled enclosure
where Kouyunjik lies, must have been an
imposing city; but when we consider the series of
monuments, each representing splendid palaces and
temples, extending from Khorsabad on the N. to Nimrud or Calah on the S., the visi-
tor passed through a series of architectural
monuments such as no other country of the
ancient world could have shown. Leaving
Sargassus behind, the palace of Dibnah. There is no
place where it might be possible to pass the
river Tigris, but to the river Euphrates. The
traveller passed a name called the "springs," and
then entered Rébit Ninua, "the broad
places of Nineveh," regarded as being, in all
probability, Rehaboth-Ir, of which Sherif-
Khan or Tarbisi was probably the centre.
Continuing towards the Tigris, he reached Nineveh proper, with its palaces, libraries, temples and
parks, in one of which wild animals were kept
for the king's sport. Concerning Selamiah,
S. of Nineveh proper, we do not know much,
but any disappointment which the traveller
might have met with there would be amply
hit for by the sight of Calah (Nimrud),
with its picturesque palace on the banks of the
river Tigris, and its splendid temple, which
was possibly the traditional tomb of Ninus under
the shadow of which the tragedy of Thisbe and
Pyramis was regarded as having taken place
(Ovid, bk. iv.). The difficulty is, that Ovid
describes it as being at the entrance of the
city of Nineveh, and this could only be the case
if we take the palace of Dibnah, or the palace of
Assur-nasir-apli, as having been considered its
commencement, approaching from the S. Atb.
40 miles S. of Nimrud lies Qal'ah Sherqät, with the
tensive ruins of Assur, the older capital of
Assyria, but this would seem to be too far away
to have been included in the limits of greater
Nineveh.—Prophecies and Illustrations.
In his "burden of Nineveh," Nahum foretells
the utter destruction of the city: "With an
running flood He will make an utter end of
the place thereof..." He will make an utter end:
affliction shall not rise up a second time" (Na.
1:8,9). "Thy people is scattered upon the moun-
tains, and no man gathereth thee in the
healing of thy bruise" (3:18,19). The manner
in which the city was to be defended seems to be
indicated: "They make haste to the wall
thereof, and the mantelet is prepared" (2:3,
R.V.). "The overflowing flood" is generally
understood to refer to the destruction of the
walls by the overflow of the Tigris, but the
latest researches seem to show that this is
impossible. An alternative suggestion is that the
words "the gates of the rivers are opened" in 2:6
(R.V.) refer to the opening of the sluices of the
Khoser by the enemy, thus rendering the city, as in old times,"like a pool of water" (2:8, R.V.). The
city was too protected by the Tigris. The final
affliction was brought by fire, which was
noted by Diodorus states that the final assault
was made when the soldier was drunk with
wine, as the scene of the surrender was described in
1:10 that they were "drenched as it were in
their drink" (R.V.). The scattering of the
inhabitants is predicted in 3:18. The temples
were to be plundered of their idols: "Out of the
house of thy gods will I cut off the graven
image and the molten image" (1:14); and the
city sacked of its wealth: "Take ye the loyal
of silver, take ye the spoil of gold" (2:9). After
her fall, Nineveh was to be "empty, and void,
and waste" (2:10), and all those who looked
upon the city were to fly, saying, "Nineveh is
laid waste" (3:7). "The joyous city," who
dwelt carelessly, was to become a desolation,
and dry like the wilderness (Zeph.2:13-15),
which, except after the periodical rains, is ac-
tually the case. There are several allusions to
the Ninivites as soldiers in the book of Nahum:
"The shield of his mighty men is made red, the
valiant men are in scarlet" (Na.2:3), but prob-
ably various colours were used, as the shields
depicted in the small frescoes are coloured blue,
with blue and yellow borders, through which
colour may originally have been red. The
sculptures show that the magnificent descrip-
tion of a warlike attack in 3:1-3 is correct in
every particular. Lofty erections were built
up over against a besieged town (cf. 2 K.19:12;
Is.37:33; Je.32:24, etc.), battering-rams were
employed (Ezk.4:1), and. unusually, the art of
developing their own armour, with helmets, shields, spears, swords, bows and arrows, and the sling and the stone.
The interior decoration of the palaces is similar
to that mentioned by Ezekiel, who, captive in
Babylonia, describes pictures similar to those
found at Nineveh and Calah (23:14,15).—Scul-
pures and Inscriptions. The art exhibited in the
sculptures would seem to be a modifica-
tion of that of Babylonia, from which country their
civilization, literature, and political system
also came. Their architecture is plainly Baby-
lonian, and it is apparently owing to that in-
fuence that they were accustomed to build
their palaces upon platforms, though natural
elevations are not uncommon in Assyr.
Ninevite art comes before us in a very ad-
vanced state, but its development in the course
of centuries can be traced. The vigorous style
of the reign of Assur-naşir-apli (885 B.C.) gradual-
ly changes to that of Assur-bani-apli, whose
town lies at 626 B.C. when much greater
finish and a more refined taste in both the
colouring and animal forms, is observable—indeed, it was they who brought Euphratean art to its highest
state of perfection. Numerous nations, in-
cluding the Jews and the Persians, copied their
methods, not only in exterior decoration, but
also in the ornamentation of the interiors,
though the more profane figures and deities
were copied more closely after them than the latter, who had for centuries been in close contact not only with the Assy-
rians, but also with the Babylonians before them.
Assyro-Babylonian civilization and
literature had affected all the nations as far as
the Mediterranean, and including Asia Minor.
The colossal statues at the sides of the doorways
were mythical compositions emblematic of the
protecting spirits sent down by the gods to
guard the footsteps of the king; the eagle-
headed figures were, perhaps, representations
of the god Zû, Hadad's storm-bird; the fish-
headed figures probably represent Ea or Iâa
(Aa, Aos), who, in Babylonian mythology,
came from the sea to teach the people the arts
and sciences. The sacred tree, which is a
curious combination of knotted branches and
flowers around an ornamental central stem, is
probably emblematic of the productive powers

NINEVEH 603
of nature, controlled by the beneficent gods; and if this be the case, offerings were made to it as representing the deity. The king, as the representative of the gods intellectually, and as their mediator with the people, occupied a unique position. The historical bas-reliefs depict the king on the battlefield and in the chase, but descriptions of the scenes seldom appear, especially on the earlier sculptures, in which the ruler preferred to inscribe, between the rows of sculptured slabs, a more or less dense series of bulls and lilies. The buildings he had constructed or restored, often preceded and followed by a list of his titles, and numerous honorific terms applied to him in Oriental wise. As yet no sculptures specially illustrating the private life of the Assyrians have been discovered, except in a few instances where men are baking bread, tending horses, etc., but these are merely to illustrate camp-life.—COMMERC1.

Although the site of Nineveh afforded no special advantages for commerce, and she owed her greatness rather to her political position as capital of the empire, yet, situated on a river communicating with the Euphrates and the Persian Gulf, she must soon have become one of the great trading stations between that important sea and Armenia, Asia Minor, and perhaps Persia. She must also have traded with Syria and the Mediterranean states when Assyria was not warring in those districts. Ezekiel (27.24) refers to Assyria as trafficking in blue and broidered work, and probably, as shown in the dresses on the Ninevite sculptures and frescoes, and her merchants are described in Nahum (3.16) as "multiplied above the stars of heaven." The numerous contract-tablets found at Nineveh confirm these statements, though they refer rather to local transactions—merchandise from abroad is mentioned especially in the tribute-lists.—INSCRIPTIONS.

The ruins of Nineveh have furnished large numbers of inscriptions, either on stone slabs or impressed on six- or eight-sided prisms, upon barrel-cylinders, and upon tablets of various sizes. These were written by means of rectangular or triangular stilbas, while the clay was baked or dried forwards baked in a furnace or kiln (cf. Ezk. 4.1). The character employed was the arrow-headed or cuneiform, so called because the lines of the ancient hieroglyphic from which they were derived assumed this form when the angle of the stick with which they were written was impressed into the soft clay. This mode of writing, which came from Babylonia, existed in Elam from a very early date, and extended N. into Armenia, N. Mesopotamia, and Asia Minor, and was the common script before the entry of the Israelites into the Holy Land. The Ninevites spoke a Semitic dialect identical with that of Elam, and closely akin to Hebrew; and an Aramaic dialect similar to the so-called Chaldee in the books of Daniel and Ezra was also in use.

Among the most important inscriptions found at Nineveh bearing upon Biblical history are those upon a pair of colossal winged bulls and upon several clay cylinders from Kouyunjik, and closely akin to other things, Sennacherib’s wars with Hezekiah. In a series of bas-reliefs also an extensive representation of the siege and capture of La-

chish. Other records from the same city are the chronicles of Esar-haddon and Assur-bani-apil, his son, who is identified with "the great and noble Assymer." Among the numerous legends and chronicles, the library of the last named king may be mentioned the story of the Creation, which differs considerably from the account in Genesis, and that of the Flood (the eleventh tablet of the Gilgamesh legend), which agrees with the Biblical story in a remarkable manner. [NOAH.] The tablets found at Nineveh inclusive historical and chronological documents, legends, mythological texts, prayers, hymns, penitential psalms, series of tablets concerning witchcraft and sorcery, a large number of omen and forecasts of various kinds, numerous letters and dispatches, and a number of contract-tablets. Of great importance are the bilingual inscriptions, which appear in the form of word-lists, classified in various ways, and syllabaries, which were intended for the instruction of young scribes when learning their profession. Of special value are the bilingual incantations, which show how we are to translate the non-Semitic (Sumerian) inscriptions, both those written in the standard tongue and in the cuneiform script, which are now represented by the Chaldaean Christians of Mosul and the neighbourhood. They show the ancient type of features, but now speak only Arabic, though Aramaic, a tongue similar to the Biblical "Chaldee," is still used as the ecclesiastical language. [r.e.p.]

Ninevites, inhabitants of Nineveh (LUT. 11.30).

Nisan. [MONTHS.]

Nisraoh, the god in whose temple Sennacherib was worshipping when assassinated by his sons, Adrammelech and Sharezer (2 K. 19.37; Is. 37.38). The name, however, must be corrupt, as nothing like it is found in the Assyrian inscriptions. The LXX. has the variants Meseraeh, Nasaraeh, and perhaps Asarach, which suggests that the original reading may have been Assur. But Josephus read Arasko, which he gives as the name of a temple and not of a god. Nisraoh and Nisraoa, "a tower," is the city.

Nitre (Heb. nether) occurs in Pr. 25.20 ("and as vinegar upon nether") and in Je. 2.22. The substance denoted is not that of our modern nitre—i.e. nitrate of potash—"salt-petre"—but the xipos of Xirpos of the Greeks, the nitrum of the Latins, and the natron or hydrous carbonate of soda of modern chemistry. The latter part of the passage in Pr. is well explained by Shaw, who says (Trav. ii. 387): "The unsuitableness of the singing of songs to a heavy heart is very finely compared to the contrariety there is between vinegar and natron. Natron is found abundantly in the well-known soda lakes of Egypt, described by Pline, and referred to by Strabo, in the barren valley of Babi bella-ma (the Waterless Sea), about 50 miles W. of Cairo.

No. [NO-AMON.]

Noadiah.—1. A Levite, son of Binnu, one of those who weighed the temple-vessels of gold and silver, among others, which Nebuchadnezzar carried away from Babylon (Ezr. 8.33).—2. A prophetess who joined Sanballath and Tobiah in attempting to intimidate Nehemiah (Ne. 6.14).
Noah is reckoned the tenth in descent from Adam, through the line of Seth, his father being Lamech, his grandfather Methuselah, and his great-grandfather Enosh. The line of Seth was religious, and this is shown by the expressions used by Lamech on the occasion of the birth of Noah. There is a play upon words, but not a derivation, in the original of 5:29. An apostasy from God had already begun to develop seriously even in the line of Seth. That apostasy [Sons of God; Giants] was more strongly seen in the line of Cain, and the Lamech of that line, in his song, well designated by Ewald " the Song of the Sword," breathes a spirit of defiance against God (4:23,24). The comparison between the two Lamachs and their sayings is remarkable. The light that has been seen is a prophetic spirit, and was enabled to look beyond the dark future and the judgment impending to days of comfort and new blessing. The germ at least of Messianic prophecy may be detected here. As no terminus a quo is given in 6:3, the 120 years there spoken of cannot be arrived at by any calculation of time of grace offered before the judgment of the Deluge; and although Noah was termed "a preacher of righteousness" (2Pe.2:5) that phrase may have no reference to a particular number of years preceding the Deluge. It may therefore be more probable that it refers to the duration of the law of righteousness. Possibly even in the years of Moses' life (Deut. 34:7) there may be a reference to Gen.6:3. Noah was 600 years old when that catastrophe took place.—The Flood or Deluge. The difficulties connected with the history of the Flood have been largely increased by the interpretations of commentators even in the earliest ages, while the light that has been thrown upon the narrative of Genesis since the discovery of the Babylonian tablets has not been sufficiently noted. The expression tēbhā, "ark," in the history of the Flood, occurs 25 times in that narrative, and twice in Ex.2:3,5, where it is used of the ark of bulrushes in which Moses is hidden. This word probably originally derived from Egyptian, and does not occur in the Babylonian account, which uses elippu, "ship," which is common in Aramaic and Syriac. The tēbhā or ark was simply designed for floating. It possessed neither masts, sails, nor rudder; nor is there any mention made of oars by which it could have been propelled. Its material was Gopār Woon, or cypress, a timber light and durable, and hence much used by the Phoenician sailors of later days. Its planks were protected by a coating of bitumen or pitch, used on both the inner and outer sides. It was furnished with many compartments, considerably varying, no doubt, in size, but termed "nests," arranged in three tiers or stories one above the other. The vessel must have been duly provided with a large number of windows, some of them possibly admitting light from above. The translations of A.V. (window) and R.V. (light) in 6:16, which the A.S.V. (ark) is the same word; and is used in the Babylonian account of the Flood. The phrase esēn sēr (or sēr) elippu means "the ridge of the roof of a ship." The breadth of this ridge was 1 ½ ft., and it formed the highest part of the vessel. It was also broad enough to enable the workmen, while the ark was being built, to pass from one end of the floating bark to another. It was something like that made use of in our canal boats. In any vessel built for the special purpose for which Noah's ark was designed, plenty of light was essential; for a vast number of animals had to be supplied with food of bruised grain. The berry of the oak must have been dried every day. An examination of the Babylonian Deluge tablets enables us to detect a number of words and phrases which have been derived directly from some older document used by the compiler of that work. That document, in spite of all that has been written about it, is not yet known to modern scholarship. It appears to have been considerably older than the Babylonian Deluge tablets. For instance, the latter speak of a ship, of a steersman, and of the ship sailing. The description in Genesis omits all these. It would have been easy in the course of time to develop a ship, with oars, as the earlier and meant insincere. There is gradually the idea of a steersman. But the reverse process is inconceivable. Further, according to the Babylonian account, the Flood was an arbitrary act of Bel. All other legends of the Flood, including that of the Brahmins, speak of its being brought about by terrible sin, but in the Babylonian account the sin of mankind is not mentioned till towards the close of the description, when Ea, stirred up by the intervention of Istar, demanded of the gods that in future every man shall be judged for his own sin: "On the sinner let his sin fall, and on the transgressor let his transgression fall"; but even here there is no mention to that of a steersman which the Babylonian account omits as committed before the Flood was sent in judgment upon the world. The name for the Deluge in the Babylonian records is Ašābu, which Paul Haupt identifies with the Heb. mābbūl. The Babylonian is akin to the Assyrian nabūlu, "to destroy." See the art. on the latter word in Fried. Delitzsch, Assy. Handwörterbuch, p. 443, col. 2, and p. 444, col. 1. In Brown, Driver, and Briggs' Heb. Lex. the name is regarded as a loan-word from the Assyro-Babylonian. It is used in the O.T. as the proper name of the Deluge. The Heb. in this particular may have been later than the Babylonian designation, but that fact in this case is of minor importance. The Babylonian account forms part of a great epic which set forth the deeds of the hero Gilgamēs. The epic was inscribed on twelve tablets corresponding (as Sir H. Rawlinson conjectured) to the twelve signs of the Zodiac, or parts of the twelve months of the Babylonian calendar. In the seven days, the down-pouring of the rain, the closing of the door of the ark, are all common to the two accounts, except that in the Heb. account it is Jehovah that closes the
door, in the Babylonian Ḥasidāra (the Noah of that narrative) shut himself in, after committing the boats to the palace, and all that it contained to the charge of the helmsman. There are not a few expressions common to the Babylonian and the Genesis story, such as, *to preserve seed, " the seed of life of all kinds," etc. The gods themselves, according to the Babylonian account, trembled and cowered down under the terror of the terrible storm, like a dog upon its bed (Column iii. 6, 7), and ascended into the highest heaven. The Babylonian account also contains not a few statements additional to, or contradictory of, the Biblical with many others which are distinctly polytheistic. Under the former it should be noted that the Biblical narrative speaks of only two birds sent by Noah—namely, the raven and the dove. The dove was sent forth three times. According to the Babylonian tablets, Ḥasidāra went forth, first, a dove, which came back because it found no resting-place; then he sent forth a swallow, which also returned, and a raven, which remained outside the ark, being able to supply its needs by feeding on the corpses which floated upon the waters. The Biblical narrative speaks of the place where the ark rested as "the mountains of Ararat" (Gen. 8:4); the Babylonian tablets give it as "three land[s] of Deluge" (P. Haupt and Friedr. Delitzsch render as "the land of deliverance." Schroeder originally rendered it as a proper name (K Marketschriften u. das A.T., 206, p. 53). For several reasons this explanation seems to be the more probable. Ḥasidāra, the name in the Babylonian story, is identical with the Xisuthros of Berosus, the Chaldean historian, a priest of Bel, who was born in the time of Alexander the Great and lived till the reign of Antiochus II. (261-246 B.C.). The account of Berosus, though it has much in common with the Babylonian, has also considerable differences. The birds sent forth correspond to those mentioned. They are said only to have been sent out three times, and returned the second time with mud on their feet; the third time they did not return. Xisuthros erected an altar and offered sacrifices, and was soon after translated to heaven with his wife, daughter, and pilot. Most of the early traditions of other nations contain accounts (more or less varying) of the Deluge. Although their descriptions (as far as we possess them) are shorter, and less poetical than that in the Babylonian epic, they are in respect to the cause of the flood in advance of the Babylonian narrative. The well-known story of Deucalion and Pyrrha is common to Gk. and Lat. writers, who in this particular agree together. The Phrygian legend has peculiar points in common with the Biblical, because it makes the sage Anakos (Enoch) to have lived 300 years before the flood of Deucalion, and to have been translated to heaven prior to that event. At Anymera (which city was formerly known by the name Kebotes, or the Ark) coins have been found which were struck in the days of the emperor Septimius Severus (193-211 A.D.). They represent an ark or chest floating on the water containing a man and a woman. On the top of the ark is a dove perched, and another flying to it with a twig in its feet. The man and woman are also depicted as on dry ground, and several of the biblical characters. All these legends contain points sometimes differing from one another, but found in the Biblical story. Such facts prove that the legend was widely spread among all portions of the human family, and tend to support the priority in age of the Bible story. It is interesting, too, to note that all of these histories, with the exception of that enshrined in the Biblical narrative, contain matter inconsistent with the universality of the Flood, and some even intimate that the catastrophe was not even universal in the sense of destroying the entire human race. The Biblical narrative, if it be taken with strict literalness, intimates the universality of the Flood; although it is quite possible to maintain that its description, while it affirms the utter destruction of all mankind then on the earth, is not, if compared with other Scripture, absolutely decisive, as to the universality of the Flood itself. There is no necessity to suppose that the Deluge was absolutely universal. The object was to destroy completely the human race. It is unnecessary to allude further to the polytheistic details found in these Deluge tablets, since those who maintain the greater antiquity of the Babylonian record argue that the Heb. record was purified by the omission of all those details. But the facts already referred to are fully sufficient to prove the important point that the narrative in Genesis is far older than the Babylonian. The size of the ark was 300 cubits in length, 50 in breadth, and 30 in height. Approximately, it must have been about 525 ft. in length, 67 or 68 in breadth, and 52 1/2 in height. The human beings saved in the ark were eight—Noah and his wife with his three sons and their wives. There is no contradiction whatever between the commands of Gen. 6:19 and 7:1-4, although the general one that "all animals should be brought into the ark in pairs; the second order exclusively refers to the clean beasts or fowls, seven pairs of each of which were to be brought in. This is clearly intimated in 7:9. These arrangements were evidently made to provide animals in sufficient number for sacred purposes. The destruction of animals was unavoidable if the human race was to be destroyed by water. The ark could not have held pairs of all the animals now found on the earth and also food for them all. We fully admit that the record appears to relate an account of a universal catastrophe, and the mention of Ararat is decidedly in favour of such a supposition. But the vividness of the description must not be pressed too far, and the name Ararat might have been inserted later. The destruction of plants which must have taken place must have been enormous, and there is no indication of any provision for preserving such alive. The sacrifice which was offered up by Noah after his release and that of his family from the ark is the first distinct record in the Bible of an altar and sacrifice. For in the story of Cain and Abel the building of an altar is not

mentioned, and sacrifice, though perhaps pretty clearly intimated, is not distinctly mentioned. It has often been argued whether the descent of the water from heaven at the time of the Deluge was, according to the narrative in Genesis, the first instance of the fall of rain. The Biblical narrative does not, however, justify any such contention. Even of the Rainbow it is simply said, 'And I have set My bow in the clouds,' etc. (see Cowley-Kantsch-Gesens, _Heb. Grammar_, § 106, g). and that does not preclude the appearance of rainbows before. The account in Genesis of the sacrifice and its acceptance by Jehovah is much more sublime than that depicted in the Babylonian tablets, in which the gods are represented as flies hovering over and snuffing up the savour of the sacrifice. The sacred narrative proceeds to relate the new covenant which God made with man, as well as the rainbow being made the visible sign of the covenant. After this Noah settled down to cultivation of the ground, and planted a vineyard. The main interest in the story is how he obtained the knowledge of making wine, but gives the sad account of his drunkenness, and the result of that sin upon his family. The shameful way in which Ham acted on that occasion can best be read in Gen. 9, but the punishment was meted out to his younger sons. The narrative does not explain how many centuries the family of Ham should have been regarded as all being under the curse, and that especially the scandalous oppression of the African races by the shameful slave trade was justified on such supposititious and false Biblical grounds. The descendants of Ham were among the most mighty rulers of the world, and the curse really only fell upon the races of Canaan, which country, when the iniquity of the Canaanites was come to the full, was to become the special inheritance of the seed of Abraham. The prophecy delivered by Noah was a most remarkable one, and most applied to the history of the "Valley of the Shadow," as we may suppose, to instruct Israel and prepare that people for the work which they would be called upon to perform in the conquest and purification of the land of Canaan. The only exegetical difficulty, and that not a serious one, in the prophecy of Noah is the uncertainty as to the subject of the clause "and he will dwell in the tents of Shem," for which see Japheth. An interesting art. by Dr. Tisdall, _Hasidrra and Noah_ appeared in _The Churchman_ for Nov. 1906, pp. 659-671. (c.h.i.w.)

**Noah**, the 2nd of five daughters of Zelophehad (Num. 26.3, 27.1, 36.11; Jos. 17.3).

**No-amôn** (Na.8.8, see marc. No (je. 46.25; Ezk.30.14-16), the capital of Upper Egypt, Thebès or Diospolis Magna. The second part of the first form is the name of Amón, the chief divinity of Thebès, alluded to in connexion with this place in Je. 46.25 (see R.V.), " Behold, I will punish Amón of No, and Pheraoh, and Egypt, with her gods, and her kings"; and perhaps also alluded to in Ezk. 30.18, "in the Egyptian Nu (the city), the compound No-amôn being "the No" or "city of Amôn." The destruction of the city alluded to by Nahum was brought about by the Assyrians. 662 B.C.

**Nob** (swelling or knoll), a place not mentioned in the book of Joshua, but named as inhabited by the Benjaminites (Jos. 21.21), (Num.11.32), with Michmash, Bethel, Ana-thoth, and Ananiah, and thus lying N. of Jerusalem. For four centuries after Joshua the central shrine of Israel, with tabernacle and ark, was at Shiloh. The ark was then taken out to war at Eben-ezer, and captured by the Philistines, then returned to Kiriath-jearim, where it remained for 20 years (1Sam.4.1, 4, 17, 7.2), to be again brought out for war by Saul (14.16), and afterwards carried again to Kiriath-je- airim, and perhaps even to Ephratah for a time (1326). When taken to Jerusalem (2Sam.6.17) it was placed in a tent (see R.V.), and thus appears never to have again been in the tabernacle. Shiloh was deserted after Eli's death, and on the accession of Solomon we find the tabernacle and altar at Gibeon (1K. 2.28, 29, 3.4; 2Chr. 1.3, 5, 6, 13). But in the time of Saul the table of shewbread was at Nob (1Sam.21.6), which was the "city of the priests." Saul and Samuel assembled at Shoph (21.9), so that the tabernacle appears to have been removed to Nob from Shiloh. Saul massacred the priests at Nob, for having aided David, and the tabernacle was then no doubt removed to Gibeon from the desecrated city. This massacre may be the slaying of the Gibeonites by Saul (2Sam. 21.12), which is not otherwise explained: they were slaves of the tabernacle (Jos.9.27), and it seems probable that Nob was near Gibeon. It may also have been near, or at, Mizpeth, where Samuel sacrificed (1Sam.7.6). In Isaiah (10.28-32) we find a passage, written perhaps in 721 B.C., immediately after the fall of Samaria (vv. 9-11), describing the Assyrian advance on Jerusalem from the N., perhaps with the object of covering the siege of Samaria. They appear to have extended over a wide front, the left flank resting on the strong position at Micmash, with advanced posts at Geba, S. of the "Valley of the Shadow," while Vespasian camped when advancing on Jeru- salem (5 Wars ii. 1). The narrative of the terror thus produced in the villages near Jerusalem concludes with the words: "Yet he remains at Nob that day, he shakes his hand at the mount of the [Holy] House of Zion [Heb. kethibh; bath, q.v.; bath: A.V. daughter], the hill of Jerusalem." It is not said that Jerusalem itself was in sight, and we may suppose Nob to have been no nearer than Geba, and on the main N. road. This agrees with the position of Mizpeh; and Nob may have been the priests' quarter near the taber- nacle, at that sacred centre which is only 3 miles N.E. of Gibeon. The site of Nob was wrongly placed at Beilt Nûba, in the valley of Ajalon, 12 miles W. of Jerusalem, by Jerome (Pilgr. of Paula, 5), and the name has never been recovered; but the high knoll of Tell en Nasbâb [Mizpah, 3] appears a suitable site. The term Isam-nônon (2Sam.21.16), applying to the son of the Philistine giant, may be rendered "dweller in Nob"; but this would be a place in or near Philistia, either Beilt Nûba, or the village Nûba, on a hill E. of the valley of Elah, 3 miles S.S.E. of Adullam. (c.r.c.)

**Nobah** (Num. 32.14; Judg. 8.11), the name
of a Hebrew who conquered Kenath in Bashan, which he called by his own name. Gilcom attacked the nomads who dwelt between Bashan and Gilead in Nobath, and even farther E. The word means "a copy of" or "like a dog." Nobath, or Nobib, is a great character in Samaritan legends; for, according to their "Book of Joshua," he was of the tribe of Manasseh (ch. xii.), and was crowned king of the two tribes and a half by Joshua (xxxii.), who sent a dove with a letter to him when Joshua and Israel were shut up by magie within seven walls at Leijim, whence they were delivered by the prowess of Nabiib (xxxiii.-xxxvii.), who went to their aid on his spotted horse. [Samaritans.]

Nod, Land of (Gen.4:16). Thither Cain fled after the murder of Abel. The name means flight or exile (cf. ver. 12), and may not be intended to signify any definite geographical area, though the "cast of Eden" points to direction. No attempts to identify it have been successful.

Nodab, the name of a tribe in 1 Chr.5:19 (Old Testament) and one of the tribes of the Reubenites, the Gadites, and the half of the tribe of Manasseh against the Hagarites. [Nadabath.] Apparently one of the desert tribes E. of Moab and Gilead. [C.R.C.]

No'e, the patriarch Noah (Tob.4:12; Mt.21:35-39; Lk.3:38, 17, 26, 27).

No'gah, a son of David born in Jerusalem (1 Chr.3:14, 16).

Nohah', 4th son of Benjamin (1 Chr.8:2).

Non (1 Chr.7:27) = Nun.

Noph (lc.19:13; Jer.2:16; Ezek.30:15,16), the classical Memphis (Hof.9:6), the capital of Lower Egypt. These forms are contracted from the Egyptian name, MEN-NEFER (the good place). As the great Upper Egyptian city is characterized in Nahum as "sitting among the rivers" (3:8), so in Hosea the Lower Egyptian city is one distinguished by its Necropolis.

Nophah', mentioned only in Num.21,30, in the remarkable song apparently composed by the Egyptian poet about the conquest of Heshbon from the Moabites. The LXX. follows somewhat. different Heb. text, and renders the word "fire." The Heb. means "a blast," the clause meaning apparently, "We have set fire to that which reaches to Medeba." [C.R.C.]

North Country (Je.6:22, etc.), refers to Sana.

Nose-jewel. [EARRINGS.]

Number. It is uncertain whether the pre-Exilic Hebrews used numerical symbols or were always accustomed to write their numbers in words. In the Massoretic text all numbers are expressed in words, but this affords no evidence as to how these, contained in it were originally written. The Massoretic and imperial witnesses are the Siloam Inscription, of the time of Hezekiah, and the Moabite Stone, contemporary with Jehoshaphat. The latter is inscribed in the old Heb. characters, and emanated from a tribe closely akin to Israel. If we accept Tischendorf's view that the Hebrew usage in both these inscriptions the numbers given are invariably in words. This fact, however, does not exclude the possibility that numerical symbols may also have been used in Israel. They were employed in the two great contemporary empires of Egypt (hieroglyphic) and Assyria (cuneiform), and probably therefore in Israel also. In the post-Exilic period the Hebrew alphabet were employed to stand for numbers; witness the Hasmonean coins. The early mode of expressing numerals has an important bearing upon the question of the accuracy of the numbers in the Massoretic text. The use either of alphabetical symbols or of special numerical signs might easily lead to copyists' errors, and probably this accounts for some questionable figures in the existing text—e.g. the numbers of the slain in O.T. battles (Judg.8:10, 20, 35, etc.). But apart from possible error in particular cases, there is a very wide use of round numbers in which there is no intention of exact determination. Certain numbers were thus used to express abstract ideas, which would be determined by the context, such as completeness, sufficiency, abundance, perfection, or their opposites. Such associations would arise from prominent examples of the use of such numbers. Thus "five" would be associated with the number of the fingers, and "forty" easy to derive from the number of months in a year. Often little more is intended than the idea of plurality. For this purpose the number "two" may be used (1 K.17:12) or more frequently "three" (Gen.30:36), while large numbers are expressed roundly, as a hundred (1 K.18:4) or a thousand (Judg.15:15). "Thousand," with its multiples, is frequently used also in a figure of speech very common in the East—viz. hyperbole (Dan.7:10). The use of the letters of the alphabet as numbers led to a form of cryptogram known as Gematria. Each letter having a numerical value, a word was sometimes cryptically represented by the initials of its letters. Another example is the number of the name of the Beast (Rev.13:18), which is given as 666. This is probably to be interpreted as standing for the emperor Nero (VICTOR). [J.C.V.D.]

Numbering. [CENSUS; PALESTINE.]

Numbers. The fourth book of the law, named by the Jews bemidbar, from its fifth word, and by the Greek translators Arithmoi (Numbers). It continues the history of the previous books, from the departure of the Israelites from Sinai in "the 1st day of the 2nd month of the 2nd year" after the Exodus (1:1), till their arrival at the plains of Moab in the 40th year. The contents are partly narrative, and partly religious; the march from Sinai, episodes of the wanderings before and after the mission of the spies and repulse on the borders of Canaan, and numerous enactments ( interspersed supplementary to those in the preceding books. A remarkable gap of 38 years occurs at 20:1, though all of the recorded incidents and laws no doubt belong to this period. This break in the narrative tells rather for than against the historicity of the book, for priestly inventors
could readily have filled up the blank, and would hardly have failed to do so. But it is left standing. The chief divisions of the book are these: (1) 1-10.10 contains the preparations for leaving Sinai. These embrace the numbering of the people (1), the disposition of the camp (2), the separation of the tribe of Levi (3), their duties (4), and later their consecration (8.5ff.), the offerings of the princes (7), with various enactments (purity, water of jealousy, Nazirite vow, priestly benediction, 5, 6; the second passover, 9; trumpets, 10.1-10). (2) 10.11-14 narrates the march from Sinai to Kadesh. The history includes the murmurs of the people (11) and Miriam's leprosy (12); the mission of the spies and repulse by the Canaanites (13, 14). The people are doomed for their disobedience to 40 years' wanderings (14.32-34). (3) Ch. 15-19 contain additional sacrificial (15; cf. Lev.4,5), and priestly (18, dues and tithes; 19, water of separation), laws; with the important episodes of the rebellion of Korah, Dathan, and Abiram (18), and the budding of Aaron's rod (17). (4) Ch. 20-26 relate the events of the 40th year till the second numbering of the people in the plains of Moab (25). They include such incidents as the census made by Moses (25, 1-12), the journeys of Moses striking the rock (20, 1-13), the deaths of Miriam and Aaron (20, 1, 22-29), the fiery serpents (21.4-9), the conquest of the territories of Sihon and Og (21.21-35), with the story of Balaam and his prophecies (22-24) and the sin of the people at Baal-peor (25). (5) Ch. 27-30 are concerned with further acts of the people, numbering r.1-13; a priestly calendar of the sacrifices for different seasons, 28, 29), and with further events of the 40th year, as the command to Moses to view the land and the appointment of Joshua as his successor (27.12-23), the war with Midian (31), and the settlement of Reuben and Gad on the E. side of Jordan (32). 33, 1-49 is an itinerary of the journeys of the Israelites from the beginning, and 33.50-35.34 give directions for the future division of the land and the setting apart of 48 Levitical cities (6 of them cities of refuge). In the modern critical analysis of the book, large sections are assumed to have been added and copied from another source (P)—viz. all those containing priestly laws, as 1-10.28, 15.17-19, 26-31, 33-36; while other sections, as 10.29-12.21 (mainly, 22-24 (story of Balaam), are ascribed to J.E. (On the nomenclature, see PENTATEUCH). Other sections, as 15, 14 (mission of spies), 16 (rebellion of Korah), 20, 32, are held to be mixed, P passages alternating or being interblended with J.E narratives. Certain of these chapters, particularly 20.1-13 and 32, baffle the analysis even of the critics. The former (water from the rock) is one of those instances, Mr. Addis says, "in which the documents (J, E) have been inextricably entangled, not, as is often the case, with each other, but with the narrative of the priestly writer." Wellhausen assigns 32.1-15 to a source which takes "a middle position between J and P," and is most nearly related to the Deuteronomist. It would appear that if a writer midway between J and P can resemble them, there can also be, between the styles, one that can be regarded as absolute (cf. LEVITICUS, on Lev.26). It would follow from the premises of the critical theory (PENTATEUCH) that the lengthy priestly sections above-noted are post-Exilian in date, and are absolutely without historical worth. There never, on this theory, were a Mosaic tabernacle, or encampments in the wilderness, or an Aaronic priesthood, or a separation of Levites, or the sacrificial rites which these chapters describe. The whole is alleged to be the product of the fertile imaginations of post-Exilian Scribes. Internal evidence is drawn from supposed historical impossibilities and numerical discrepancies and contradictions in the lists in corroboration of the fictitious character of the sections. Surely, however, it is not to be credited without further proof that sane men—not to say men of God—would ever, in the Exile or out of it, set themselves down to such a task of wanton, wholesale invention, with such pains-taking precision and circumstance of detail, as is implied in the critical analysis above-noted. Notwithstanding the seeming discrepancies themselves are a proof against this theory, for scribes capable of inventing these elaborate statistical schemes would assuredly have been skilful enough to make them agree in totals and in their mutual relations, instead of leaving them to be so difficult to reconcile with each other or with other reckonings. It is immensely more reasonable to assume that we are dealing in these lists and enumerations with trustworthy material, though the principle on which the reckonings are made may sometimes escape us. Thus, e.g., a formidable problem, urged, seems to arise from comparison of the male population figures in Israel, given as 22,273 (Num.3.43), with the total number of males, say about 900,000. This, taken strictly, would give a proportion of one firstborn to 40 males, which, on a first glance, is impossible. But the objection assumes, what is in every way unlikely, that the firstborns were reckoned from the whole male population, even those who were themselves married and heads of families. It is more reasonable to suppose that it was confined to the younger generation, still included in the families of their parents—that is, to those who were still "under age." Allowance has further to be made for deaths, for cases of polygamous marriages, where probably only the firstborn of the family was reckoned (cf. Gen.49.3, Reuben "my firstborn"). Then the difficulty practically disappears. Other difficulties originate in the assumption that the whole sacrificial system was already in full operation in the wilderness, whereas we know that it was not, and was never intended to be (cf. 15.1.2; Deut.4.14; Am.5.25). How, e.g., could offerings of "fine flour" be expected in the wilderness, where the people were living upon manna? How could sacrifices after childbirth be offered (500 a day, Colenso reckoned) within 33 days after circumcision, when we read in Jos.5.5 that "all the people born in the wilderness by the way, as they came forth out of Egypt, they had not circumcised"? It is elsewheere shown (PENTATEUCH) that proof of the post-Exilian origin of the priestly laws is not forthcoming, and that a much earlier, and practically Mosaic, origin must be assigned to these. If Deuteronomy is early, as contended
it makes this certain, for in 18.1.2 of that book we have express, and even verbal, allusion to the provision made in Num. 18.20-24 for the Levitical order, "They have no inheritance among their brethren: Jehovah is their inheritance, as He hath spoken to them." Dillmann says, "The corresponding law is in Num. 18." Among the most contested of the laws in Numbers is that of the Levitical cities (35). Yet one has only to think of the impossibility of Ezra declaring to the returned exiles that 48 cities in Israel had from time immemorial been set apart for priests and Levites, if every one present knew that no such cities had ever existed, to see the absurdity of the contention of a post-Exilian origin for this law. The Mosaic character of the legislation in this book cannot be questioned if the laws themselves are admitted to be genuine, for the greater number of these have no applicability save to the conditions in which Israel was placed in the wilderness. If given at all, they could only have been given by Moses. The dating of the book itself to which pointings to contemporary authorship. Of one important section—the list of stations in ch. 33—it is expressly said that "Moses wrote it by the commandment of the Lord" (ver. 2). This certainly does not prove, what on other grounds (diversity of style, etc.) is probable, that Moses wrote the book. The book itself by which we hand it, but it indicates a share in its authorship: for it is not to be supposed that a man of Moses' gifts and skill in the use of the pen confined his notes of Israel's "goings out according to their journeys to the bald list of stations preserved in this chapter. Again, in 21.13 we have the suggestive note: "For Arnon is the border of Moab, between Moab and the Amorites"—a passage which plainly refers to contemporary conditions. On the other hand, the quotation in the next verses (14.15), from "the book of the wars of the Lord," may suggest that it was somewhat later before the book was brought into its present shape. The eulogy on Moses in 12.3, which has the appearance of an inserted note, presents no difficulty on this hypothesis. The difficulties which attend the theory of a late compilation of the book from independent documents are so serious that the theory cannot be accepted as satisfactory. The grounds on which it rests, apart from admitted differences of style in the P sections, break down on careful scrutiny. It is alleged, e.g., that the JE narratives in 11.12 assume the tabernacle to be placed at a distance from the camp (11.26, 30, 12.4, 5; cf. Ex. 33.7), whereas in P it is in the midst of the camp. But in various JE passages it is made quite clear that the ordinary resting-place of the ark, therefore of the tabernacle, was within the camp, as in P (cf. Num. 10.30, 14.14) and the tabernacle cloud is over the people (10.13, 14, 14). In the "mixed" narratives of the sending of the spies (13.14) and of the rebellion of Korah (16), the separation of the alleged documents destroys the unity of the narrative. The list of the spies is given only in P (13.1-17 a), and the JE portion begins abruptly in the middle of a verse, "and said unto them, Get you up this way by the south." (ver. 17 b). JE is supposed to know nothing of Joshua as one of the spies, yet in the related sections (14.30-33, 32.7ff.) Caleb and Joshua are united. The Korah episode, similarly, has to be torn to shreds, and the P section (16.2-11) itself split up into two narratives, to attain the desired result. The book, in short, as it comes to us, is a unity, and belongs to the one great Mosaic texture of the Pentateuch as a whole. Critical view: Gray, "Numbers," in Inter. Crit. Com. Conservative view: "Numbers," in Speaker's Commm; Orr, Problem of O.T.

Nume'nus, son of Antiochus, was sent by Jonathan on an embassy to Rome (1 Mac.12.16) and Sparta (12.17, cf. 5), to renew the friendly connexions between these nations and the Jews, c. 144 B.C. He was well received at both places. He was again sent to Rome by Simon, c. 141 B.C., returning successful 139 B.C. (14.24, 15.15-24).

Nun, father of Joshua (Ex. 33.11, etc.) and a descendant of Ephraim (1 Chr. 7.27).

Nurse. In ancient times the position of the nurse was one of much honour (family) (see Gen. 24.59, 35.8 : 2 Sam. 4.4 : 2 K. 11.2). The same term is applied to a foster-father or mother, e.g. Num. 11.12 ; Ruth 4.16 ; Is. 49.23.

Nuts. The representative in A.V. of two Hebr. words. (1) botnim. Among the good things of the land which the sons of Israel were to take as a present to Joseph in Egypt, (Num. 33.11), undoubtedly the fruit of the pistachio-tree (Pistacia vera), though most modern versions are content with the general term "nuts." Syria and Palestine have long been famous for pistachio-trees. The town of Batna in the district around Aleppo is believed to derive its name from the excellence of its pistachio-nuts: Pethom, a town of Gad (Josh. 13.26), has probably a similar etymology.
OAKS

Oaks. (1) In O.T.—A. Two classes must be distinguished: I. Declarations, and II. Promises (or threats). I. Declaratory oaths consisted of statements of fact, belief, or intention, coupled with either (a) a comparison, e.g., as God liveth, or by God (probably = as God liveth), or as the king liveth, so is so true: or (b) a conditional imprecation, e.g., "May God make thee a curse if thou hast done this," answered by "Amen." An oath in the comparative form might be taken by a man or by God; but an imprecation was only possible in human oaths. (i) Oaths of men. Usually the comparative form was used, the comparative being understood as the affirmation of God; sometimes the existence of some person was added (1Sam.20,3) or substituted (Gen.42,15; Isam.1,26,17,55; 2Sam.11,11,14,19). In the last case the oath was in historical times probably nothing more than a strong affirmation, but where God was mentioned, the statement (as in those from Declaratory sanction (Ex.20,7; Lev.19,12, etc.), and originally a supernatural sanction doubtless attached to all oaths in whatever form. Sometimes one or both hands were raised in this oath (Gen.14,22; Dan.12,7, etc.). Declaratory oaths were used (a) to strengthen statements of fact, belief (2Sam.19,7[8]), or intention (e.g. 2Sam.11,11,21,17); (b) for purposes of purgation, i.e. as a mode of proof in some cases where evidence was lacking, e.g. in deposit; (c) as an integral portion of the ORdeal of Jealousy. Oaths of purification were apparently taken before the altar (1K.8,31), and the Law provides that one who takes such an oath of expiation may exercise himself guilt. In restoration of the subject-matter of the oath with the addition of one-fifth and sacrifice (Lev.6,2ff. [5,22ff.]. (ii) In the case of God, oath appears to be a mere figure of speech, for there is no distinction appreciable by the human mind between His oath and His statement. II. Promissory, or minatory: (a) of men. Here, too, the oath formula might be by way of comparison or imprecation, but for the imprecatory formula "God do so to me and more" was generally used where a single individual swore, and Cursed be he that... where the oath was laid upon or taken by a number of persons (Judg.20,8ff.; Deut.21,20,21; Josh.7,25,26; 14,28). (For a heathen formula, see, e.g., 1K.19,2.) In a sworn agreement between two parties the jurat sometimes consists of an appeal to God to judge (or be witness) between them. The effect of a promissory oath was to bind a bond upon the soul, i.e. to create an obligation to continue to do that which was undertaken. Promissory oaths shade off imperceptibly into vows. A promise made to a human being under divine sanction is an oath. A similar promise made to God is a vow.

The oaks of Bashan probably belong to the species known as Quercus aegilops, the Valonia oak, which is said to be common in Gilead and Bashan. The Pistacia trees, which grow on the borders of Galilee and Samaria, seldom grows above 30 ft. high in Palestine, though in ancient times it may have been a noble tree. There are perhaps a dozen varieties in Palestine, included under four chief species—Q. cocifera, Q. pseudecocifera, Q. aegilops, and Q. infectoria. Our British oak does not occur. [PLAINS, 7, 1.]

NYMPHAS

Dr. Hooker saw only two or three pistachio-trees in Palestine. These were outside the N. gate of Jerusalem. But he says the tree is cultivated at Beirut and elsewhere in Syria. Pistachio nuts are eaten in quantities by Greeks and Turks, and are commonly met with for sale in the Mediterranean districts, where the tree has become established from farther E. (2) 'egebìz (Can.6,11 only) is the walnut-tree (Arab. jòs, a "pair," hence a "walnut"); which, according to Josephus (3 Wars x. 8), was, as it now is, common in Palestine, and grew most luxuriantly around the lake of Gennesaret. In Persia these nuts are called gus (Harris), from Arab. jòs.

Nymphas, a Christian in Laodicea whose house was a place of assembly (Col.4,15).
The obligation and the sanction are the same in both. Hence the terms are convertible in poet. (Zx. 122.2) and the Law treats captivity to make promissory oaths and vows together. Oaths and vows made by men, widows, and divorcees were binding. The father in the case of a resident maiden daughter and the husband in the case of a wife could disallow the oath or vow on the day on which he heard of it, but not thereafter (Num. 30). Certain rash oaths might be expiated by confession and sacrifice, atonement being made by the priest (Lev. 5.17). In early societies the moral notions underlying promises, contracts, and treaties are undeveloped. Their absence is compensated by appeals to the supernatural, and hence oaths were very frequent and important in ancient Israel. Breach of an oath drew down the divine wrath (Jos. 9.20). Instances of the following forms are found: (1) raising a hand (Ex. 6.8, etc.); (2) putting the hand under the thigh of the person to whom the oath is given (Gen. 24.2 [see Spurrell, Genesis: 217 ff.]; Dillmann ad loc. passim); (3) Has member (4) oath with covenant accessories. [COVENANT.] (b) Oath is represented as swearing simpliciter, or else by the himself (Ec. 7.14), by his right hand and the arm of his strength (Is. 8.28). His holiness (Am. 4.2), the excellency of Jacob (Am. 8.7), his name (Ec. 4.4, 26). See also Is. 5.9 for another form of covenantason. As oaths (with few, if any, exceptions) involve appeals to the supernatural, two corollaries necessarily follow, (1) Israelites, being monotheists, were to swear by the God of the covenant. (Deut. 10.20, etc.), and it was sinful to appeal to other gods (Ex. 23.13; Am. 8.14, etc.). (2) False swearing by his name involved sin (Ex. 20.7, etc.), and consequently his wrath. Men came to avoid oaths altogether (Ec. 9.2), and to regard them as wrong (Zech. 5.3). Fidelity to an oath was a virtue (Ps. 15.4), so was truthfulness in swearing (Ps. 24.4.— C. Two sets of words must be distinguished: 'ād (noun of purgation; Gen. 24.26) and 'ādā (verb, Gen. 24:26). 'ādā never used of God. It is used (1) of the oath of a covenant, and also (2) specifically in the curses in the Deuteronomic covenant; (3) of an oath of purgation; (4) of the curse invoked in the ordeals of jealousy; (5) of a promissory oath (Gen. 24: 6). (6) of a curse simpliciter, e.g. Ps. 18.46 (7) of a person in such straits that an appeal to God to make one like him is a curse (Ec. 29.13; Num. 5.21, etc.); (8) of cursing as a vice (Ps. 10.7, 59.12 [13]). In Lev. 5.1 and 29.24 it is not clear whether the reference is to an imprecation (such as that uttered by Micah's mother, Judg. 17.2), an oath of purification, or some other formal oath. šēbhû'â is used of God's oath, and also in all the above senses, except (6) and (8). It is thought to be connected with the Heb. for "seven," so that its verb means "seven oneself"—i.e. "to bring oneself under the influence of seven things" (cf. Gen. 21.29, 10). The Heb. construction for a negative oath is "I swear if" (I swear that I will not), and for a positive oath "I swear if not" (I swear that I will), which makes it probable that originally the word denoted an imprecation. [Crnest; Vow.] Leist, "Gräcisch-Römische Rechtsgeschichte," 751-755; Ence, Brit. ed. 9, s.v. "Oath"; Wiener, "Studies in Biblical Law," 56-59; Post, "Grundriss der ethnischen Jurisprudenz," ii. 478 ff., 626-627, 664; Wi., R. Smith, "Religion of the Old Testament," ed. 2, 152., [n.m.w.] (2) In N.T. For the teaching of Jesus, see Mt. 5.34-37, 23.16-22. It appears the Jews swore by heaven, earth, Jerusalem, the head, the temple and its gold, the altar and the gift upon it (cf. Mishna, Sheb. iv. 13: "If one says, I adjure you, 'the oath is binding'; but if one says, 'by heaven and earth,' it is not binding"). Our Lord is probably condemning the latter form of oath (cf. Jas. 5.12). He Himself recognized the judicial oath (Mt. 26.63); and the answer "thou hast said," if it did not actually constitute an oath, was a solemn assent to the truth of the statement (ver. 64; cf. Sheb. iii. 2: "If one says, 'I adjure thee,' and the other answers, 'Amen,' he is guilty."). The dō kēras of Christ probably had the same force as this Amen. "Opēixw, to charge on oath"; in N.T. "to adjure." Mt. 26.63, "I adjure thee by the living God"; Mk. 5.7, "I adjure thee by God"; Ac. 19.13, "I adjure you by Jesus"; Th. 5.27, "I adjure you by both God and our Lord Jesus Christ"; And. The first Pascal denials, the first was simple denial (Mt. 27.60); the second was denial with an oath (ver. 72); ἕκος, Heb. šēbhû'â'ā; the third was denial with an imprecatory oath ("ādā in addition to šēbhû'â'ā, ver. 74). God swears by Himself (Heb. 6.13). He interposed (R.V. marg.: mediated) an oath, or made the oath intermediate between Himself and those He called (ver. 17). For declaration with an oath see Heb. 3.11, 7-21; promise with oath, Mt. 14.7, Ac. 2.30; Lu. 1.73; oath accepted as final in human disputes, Heb. 6.16. In Rev. 10.5, 6, the angel swears with uplifted right hand. [Witness.] [h.h.]

Obadiah.—1. Sons of Obadiah are enumerated in a confused passage of the genealogy of Judah (1Chr. 3.9). 2. According to the received text, one of five sons of Irsiahah, and a chief of Issachar (7.3).—3. One of six sons of Azel, a descendant of Saul (8.38, 4-4).—4. A Levite, son of Shemaiyah, and descended from Jeduthun (9.16); either he, or a member of his family, was apparently a principal musician in the temple choir in the time of Nehemiah (Ne. 12.25) — 5. A Gadite who joined David at Ziklag (1Chr. 12.8).—6. A prince of Judah in the reign of Jehoshaphat (2Chr. 17.7).—7. Son of Jehiel, and leader of the sons of Joab in the second caravan with Ezra in the return from captivity (Ezr. 8.9), possibly the same as—8. A priest, or family of priests, who sealed the covenant (Ne. 10.5).—9. The prophet. Vide next art.—10. The comptroller or steward of Ahab's palace (1K. 18.3 f.), who, though a devoted worshipper of Jehovah, retained his position during the fierce persecution of the prophets by Jezebel. At the peril of his life he concealed a hundred of them in caves, and led them with bread and water. He acted as messenger from Elijah to Ahab (18.7-16). Jewish tradition identifies him with the third captain of fifty sent by Ahaziah against Elijah (2K. 1.13).—11. Father of Ishmaiah, a Zebulonite (1Chr. 27.19).—12. A Merarite Levite; an overseer during Josiah's restoration of the temple (2Chr. 34.12).

Obadiah, Book of. The author has
been identified with Ahab's steward, with the captain of the third fifty, whom Elijah spared, and who afterwards became his disciple and rode with him. There are several parallels between Obadiah and Joel; and though our book is not quoted in N.T., there is a possible reminiscence of ver. 21 in Rev. 11.15. The lesson of the book is the one that runs through the prophetic books—that 'deliverance' is conditional, upon the faith and purity of the nation, and that the Edomites are prophesied against. For other views see G. A. Smith, The Twelve Prophets; Driver, Intro. to Lit. of O.T.; Pusey, Minor Prophets.

Obaš, a son of Joktan and the founder of an Arab tribe (Gen. 10.28). See RSV and AM. In RSV this name is rendered Obaš (1Chr. 1.22). Edom.

Obadi'a (1Ki. 5.8—2 Chr. 2.12) = HABABAIAH.

Obad'ah (2KI. 17.12; 1 Chr. 2.12; Mt. 1.5; Lu. 3.32).—2. A descendant of Jarha, the Egyptian slave of Sheshan in the line of Jerahmeel (2Chr. 2.37,38). Possibly the same as Obad. 3. One of David's mighty men (11.47).—4. A gate-keeper of the temple; son of Shemaiah, 9 (26.7).

Obed-edom (2Sam. 6.10,11; 1Chr. 16.38), a Gittite—i.e., probably, a Philistine of Gath—into whose house the ark was borne after the death of Uzzah, during its presence in the tabernacle; but if the dates which are usually assigned to the two prophets be accepted, Jeremiah was the earlier. Some scholars place Obadiah much earlier, perhaps in the reign of Jehoram (2Chr. 21.16), while Ewald thinks that Ob.1-9 is based on the transferring of Edom to Judah (Obad. 22-31, cf. EzeK. 2.16). Delitzsch, Keil, Kirkpatrick, and others consider the book pre-Exilic, while Hitzig and many conservative scholars put it in the days of the Exile. The antagonism between the houses of Esau and Jacob runs through all the history of the Hebrew nation, and Jerusalem so often suffered at the hands of the invader that neither of the two data, given in the book itself, is sufficient to fix the period with certainty. The mention of Sepharad in Ob.20, though it has been alleged as a proof of a date later than 590 B.C., may allow of an earlier date, since the place is probably the Shaparda in S.W. Media (so Sabora = Sippar in Pinches) mentioned by Sargon (722-705 B.C.), though advocates of a later date have favoured other identifications. There is the usual attempt to take such parts as seem best to fit one or other period as being from separate "sources," and the usual disagreement among the disinteg rationalists as to how to divide them—e.g., Ewald and Driver on the one hand, Kuenen and Cornill on the other. It is urged that different relations are implied between Edom and the nations in vv. 1-7 and vv. 13f. respectively, but whether this is an argument against the unity of the book depends upon the individual critic's preconceptions of the nature of prophecy. Differences are said to be evident by some to exist between the two halves of the book; but the brevity of the book necessitates that any decision of the point must be founded upon very limited instances, and so makes this criterion, even more than usually, a fallacious one. The text may not always be preserved in its purest form, though the book became his disciple, and goes down to the prophet in the Exile. Jehovah's inspired steward, with the captain of the third fifty, whom Elijah spared, and who afterwards became his disciple and rode with him. There are several parallels between Obadiah and Joel; and though our book is not quoted in N.T., there is a possible reminiscence of ver. 21 in Rev. 11.15. The
OHAD

(1 Ant. v. 3) as his friend and ally. His 60 cities, "fenced with high walls, gates, and bars" (Deut.3.5), were taken, and his territory assigned to the half-tribe of Manasseh under the rule of Jair, the descendant of Manasseh (Deut.3.13,14; Num.32.33). See also Deut.1.4,47;31.4; Jos.2.10,9.20,13.12,30; Num.9.22; Is.133.11,136.26. The belief in Og's enormous stature is corroborated by an appeal to a relic still existing in the time of the author of Deut.3.11. This was a "bedstead of iron," preserved in "Rabbath of the children of Ammon"—more probably a "sarcophagus of black basalt" (Porter, Giant Cities of Bashan), or a "throne" of iron (Conder, Heth and Moab, p. 155). See also Driver, Deuteronomy, pp. 7, 53 f. [n.c.b.]

O'had, one of the six sons of Simeon (Gen.46.10; Ex.6.15); omitted in the lists in 1Chr.24 (Syr. Okor) and Num.26.12.

Ohel. As the text now stands, Ohel was one of the six sons of Zerah (1Chr.2.20).

Oil. Of the numerous substances, animal and vegetable, known to the ancients as yielding oil, the olive-berry is most frequently mentioned in Scripture. The best oil is made from fruit gathered about November or December, when it has begun to change colour, but before it has become black. In order to injure either the fruit itself or the boughs of the tree, it was gathered by hand or shaken off carefully with a light reed or stick (Deut.24.20; Is.24.1). After careful cleansing, the fruit was preferably carried at once to the press, or, if necessary, laid on tables with hollow, sloping trays, which allowed the first juice to flow into receptacles beneath, care being taken not to heap the fruit so much as to prevent the free escape of the juice, which is injurious to the oil though itself useful in other ways (12.2.4).

The fruit was either bruised in a mortar, ground in a mill, or trodden with the feet (Deut.33.24; Mt.6.15). Special buildings for pressing were used also for olive-pressing. "Beaten" oil (Ex.27.20,29.40; Lev.24.2; Num.28.5) was probably made by bruising in a mortar. These processes, and also the place and the machine for pressing, are mentioned in the Passover, not with the wine, but with oil, "mixed with cylinders encasing a beam," turned by a camel or other animal. Both olives and oil were kept in jars carefully cleansed; and oil was drawn out for use in horns or other small vessels. Oil of Tekoa was reckoned the best. Trade in oil was carried on with the Tyrians, by whom it was probably often re-exported to Egypt, whose olives do not for the most part produce good oil (2Chr.2.10). Direct trade in oil was also carried on between Egypt and Palestine (Ezr.3.7; Is.57.9; Ezk.27.17; Ho.12.1). Besides the use of the olives themselves as food, the principal uses of their oil were: (1) Edible. Dried wheat, boiled with either butter or oil, but more commonly the former, is a common dish for all classes in Syria. (2) Cosmetic. As is the case generally in hot climates, oil was used by the Jews for anointing the body, e.g., after the bath, and for giving the skin and hair a glow and comeliness (Deut.28.40; Ro.9.3; 2Sam.12.20.14.2). At Egyptian entertainments it was usual for a servant to anoint the head of each guest, as he took his seat. (3) Funereal. The bodies of the dead were anointed with oil by the Greeks and Romans, probably as a partial antiseptic, and a similar custom appears to have prevailed among the Jews. (4) Medicinal. Celsus repeatedly speaks of the use of oil, especially old oil, applied externally with friction in fevers, and in many other cases. Josephus mentions that Herod was put into an oil-bath (1 Wars xxxiii. 5). Isaiah (1.6) alludes to the use of oil as ointment in medical treatment (cf. Lu.10.34); and it thus furnished a fitting symbol, as well as perhaps a partial remedy, when used by our Lord's disciples in miraculous cures (Mk.6.13). Similarly, its use was enjoined by St. James (5.14). [Anointing.] (5) Light. The oil for the "light" was expressly ordered to be olive-oil, "beaten" (Ex.25.6,27.20,21,35.8; Lev.24.2). Oil was used also for the great lamps at the Feast of Tabernacles and for domestic lamps (Mt.25.33). (6) Ritual.—a. Oil was poured on or mixed with the flour or meal used in offerings. On the other hand, certain offerings were to be devoid of oil—the sin-offering (Lev.5.11) and the offering of jealousy (Num.5.15). The principle is clearly that, as oil is indicative of gladness, so its absence denotes sorrow, humiliation (Is.61.3); Jl.2.10; Rev.6.6). b. Kings, priests, and prophets were anointed with oil or OINTMENT. (7) a. With other necessities of life, the Jew was required to include oil among his first-fruit offerings (Num.18.12; Deut.18.4; 2 Chr.31.5). b. Tithes of oil were also required (Deut.12.17; 2 Chr.31.5, etc.). (8) Shields were anointed or polished with oil or grease. Of the substances which yield oil, besides the olive-tree, myrrh is the only one specially mentioned in Scripture (Esth.2.12). Oil of myrrh is the gummy substance which exudes from the tree Balsamodendron myrrha of the Ganges for curative purposes.

Oil-tree. The Heb. ('c shemen) occurs in No.8.15 (A.V. pine-branches), Rk.6.23 (olive-tree), and in Is.41.19 (oil-tree). As, in Nehemiah, the 'c shemen is mentioned as distinct from the "olive-tree," writers have sought to identify it with the "oils of the Arabs, the Balantium aegypticum, an abundant shrub in the plain of Jordan. It is found all the way from the peninsula of India and the Ganges to Syria, Abyssinia, and the Niger. The zaqum-oil is held in high repute by the Arabs for medicinal purposes. It is possible that this is the 'c shemen of Scripture; but a preferable identification is given by W. H. Groser as the oleaster or wild olive, the latter being a misleading term. This tree, Eleagnus (Arab, 'azzuq), also yields an oil and is frequent in Palestine. Its wood is hard and fine-grained (Rk.6.23, etc.). Several species are cultivated in this country, and are beautiful and luxuriant bushes or small trees. [n.c.t.]

Ointment. The following are the Scriptural uses of ointment: (1) Cosmetic. The Gk. and Rom. practice of anointing the head and clothes on festive occasions prevailed also among Babylonians, Egyptians, and Hebrews. (2) Purification (Deut.28.40; Ro.9.3; 2Sam.12.20.14.2). At Egyptian entertainments it was usual for a servant to
OINTMENT

retained. The ceremony of Chrism, or anointing, was also added to baptism. [ANointing; Old Testament]

Olam'us (I Esd. 9:30) = Meshullam, 12.

Old Testament. In dealing with this very wide subject certain limitations must necessarily be made. Many matters are dealt with under other heads—e.g. Canon; Pentateuch; Samaritan Pent.; Septuagint; Versions; Writing—and each book is treated in a separate article. We proceed to deal here first with (A) Text of O.T. (1) Its History. This should properly commence from the date of the completion of the Canon; from which time we must assume that no additions to any part of it could be legitimately made, the sole object of those who transmitted and watched over it being thenceforth to preserve that which was already written. Of the care, however, with which the text was transmitted we have to judge, almost entirely, by the phenomena which it and the versions derived from it now present, rather than by any recorded facts respecting it. As regards the form in which the sacred word was preserved, there can be little doubt that the text was ordinarily written on skins, rolled up into volumes, like the modern synagogue-rolls (Ps. 40:7; Je. 38:14; Ezk. 2:9; Zech. 5:1). The original character in which the text was expressed is that still preserved to us, with the exception of four letters, on the Maccabean coins, and it has a strong affinity to the Samaritan character. It is probable that this was exchanged for the present Aramaic or square character somewhere about the commencement of the Christian era. The Old Jewish tradition, repeated by Origen and Jerome, ascribed the change to Ezra. [Writing.] No vowel points were attached to the text: they were, through all the early period of its history, entirely unknown. Convenience had indeed, when the later books of O.T. were written, suggested a larger use of the matres lectionis, or vowel letters: thus in those books we find them introduced into many words that had been previously devoid of them. There is reason to think that in the text of O.T., as originally written, the words were generally, though not uniformly, divided. Of the Phoenician inscriptions, though the majority proceed continuously, some have a point after every word, except when the words are closely connected. The same point is used in the Samaritan manuscripts. The practice of separating words by spaces instead of points probably came in with the square writing. Of ancient date, probably, are also the separations between the lesser parashiyoth or sections; whether made, in the case of the more important divisions, by the introduction of a new line, or, in the case of the less important, by a blank space within the line. These lesser and earlier parashiyoth, of which there are in the Pentateuch 669 (closed sections 290, open sections 379), must not be confounded with the greater and later parashiyoth, or sabbath-lessons, which are bound in the Massora. The name "parashiyoth" is in the Mishna applied to the divisions in the Prophets as well as to those in the Pentateuch. Of their real age we know but little. Hupfeld

VANTS ANointing guests on their arrival at their entertainers house, and alabaster vases exist which retain traces of ointment. (2) Funerale. Ointments as well as oil were used to anoint dead bodies and the clothes in which they were wrapped (Mt. 26:12; Mk. 14:38; Lu. 23:56; Jn. 12:3, 7, 19, 40). (3) Medicinal. Ointment formed an important feature in ancient medical treatment (Is. 1:6), as shown also by the mention of balm of Gilead and of eye-salve (Ib.; Je. 8:22; Jn. 9:6; Rev. 3:18, etc.). (4) Ritual. Besides the oil used in many ceremonial observances, a special ointment was appointed to be used in consecration (Ex. 29:7, 30:23, 33, 37, 29, 40:9, 15). The use of this unguent for any secular purpose, or on the person of a foreigner, or the imitating it in any way whatsoever, was strictly prohibited (30:32, 33). A process of making ointment, consisting, in part at least, in boiling, is perhaps alluded to in Job 41:31; though another suggestion is that the reference is to the movements of the "leviathan" (crocodile) causing the waters to "boil," and that his strong musky smell is compared to that of ointment. Kings, and also in some cases prophets, were, as well as priests, anointed with oil or ointment; but Scripture only mentions the anointing as actually taking place in the cases of Saul, David, Solomon, Jehu, and Joash. It is evident that the sacred oil was used in the case of Solomon, and probably also in those of Saul and David. A person whose business it was to compound ointments in general was called an "apothecary" (Ne. 5:8; Ec. 10:1; Echos. 49:1). The work was sometimes carried on by women "confectionaries" (I Sam. 8:13; cf. Ex. 30:35). In the Christian Church the ancient usage of anointing the bodies of the dead was long
found that they did not always coincide with the caputita of Jerome. That they are more ancient than his time is shown by the mention of them in the Mishna. In the absence of evidence to the contrary, their disagreement with the kethin of the Samaritan Pentateuch, which are 966 in number, seems to indicate that they had an historical origin; and possibly they may date from the period when O.T. was first transcribed in the square character. Of any logical division, in the written text, of the prose of O.T., in contrast, there exists in the Talmud no mention; and even in the existing synagogue-rolls such division is generally ignored. In the poetical books, the pseudepigraph mentioned in the Talmud correspond to the poetical lines, not to our modern verses; and it is probable, both from some expressions of Jerome and from the analogous practice of other nations that the poetical text was written stichometrically. Of the documents which directly bear upon the history of the Heb. text, the two earliest are the Samaritan copy of the Pentateuch and the Gk. translation of I.XX of the Pentateuch; Septuagint. [Versions.] In the translations of Aquila and the other Gk. interpreters, the fragments of works remain to us in the Hexapla, we have evidence of the existence of the text differing but little from our own; so also in the Targums of Onkelos and Jonathan. A more recent manuscript in the Hexapla shows additional evidence to the same effect in the fragments of Origen's transcriptions of the Heb. text. [Versions.] And yet more important are the proofs of the firm establishment of the text, and of its substantial identity with our own, supplied by the translation of Jerome, who was instructed by the Palestinian Jews, and mainly relied upon their authority for acquaintance not only with the text itself, but also with the traditional unwritten vocalization of it. [Vulgata.] This brings us to the middle of the Talmudic period. The learning of the school which had been formed in Jerusalem before the destruction of the city, and Shammua (c. 52 B.C.) was preserved, after the destruction of the city, in the academies of Jabneh, Sepphoris, Caesarea, and Tiberias. The great pillar of the Jewish literature of this period was K. Jehudah the Holy, who is called the redactor of the Mishna, the text of the Talmud, and who died c. 220 A.D. After his death there grew into repute the Jewish academies of Sura, Nehardea, and Pumbeditha, on the Euphrates. The twofold Gemara, or commentary, was now appended to the Mishna, thus completing the Talmud. In the Talmudic notices there is an entire absence of allusion to any such glosses of interpretation as those which, from having been previously noted on the margins of MSS., had probably been loosely incorporated into the Samaritan Pentateuch and the I.XX. Interpretation, properly so called, had become the province of the Talmud, not of the transcriber; and by the entire divorce of transcription from interpretation greater security for the transmission of the pure text had been obtained. On the other hand, there had crept in the practice of reading some words differently from the way they were written, in order to obtain a play of words, or to fix them artificially in the memory, or for reasons of reverence or harmony. But these traditional and confessedly apocryphal readings were not allowed to affect the written text. The scriptoria with which the Talmudists noted what they deemed the truer readings, and yet abstained from introducing them into the text, indicates both the diligence with which they scrutinized the text and also the care with which they guarded it. Critical procedure is also evinced in a number of their other decisions of manuscripts which were found not to agree with others in their readings; and the rules given with reference to the transcription and adoption of manuscripts attest the care bestowed upon them. The Talmud further makes mention of the euphemonistic readings of the qari, which are still noted in our Bibles—e.g. at 2 K. 6. 25. It also reckons ten instances of extraordinary points placed over certain words in the Pentateuch (e.g. at Gen. 18. 9), and five in the rest of O.T.; and of some of them it furnishes mystical explanations. It is after the Talmudic period that the Hexapla was definitively fixed, and the identity of the two large points (in Heb. soffh pdsiq) to mark the end of each verse. They are manifestly of older date than the accents, by which they are, in effect, supplemented. Coeval, perhaps, with the use of the soffh pdsiq is that of the mappath, or hyphen, to unite words that are so divided in the text, but one word between them. It must be older than the accentual marks, the presence or absence of which is determined by it. Such modifications of the text as these were the precursors of the new method of dealing with it which constitutes the work of the Massorete. It is evident from the notices of the Talmud that a number of oral traditions had been gradually accumulating respecting both the integrity of particular passages of the text itself and also the manner in which it was to be read. This vast heterogeneous mass of traditions and criticisms, compiled and organized in writing, forms the basis of the Massoretic Tradition—and includes observations respecting the verses, words, and letters of the sacred texts. (a) Verses. The Massoretes recorded how many there were in each book, and the middle verse in each; also how many verses began with particular letters, or began and ended with the same word, or contained a particular number of words and letters, or particular words a certain number of times, etc. (b) Words. They recorded the qari and kethibh readings, where different words were to be read from those contained in the text, or where words were to be omitted or supplied. They noted that certain words were to be found so many times in the beginning, middle, or end of a verse, or with a particular construction or meaning. They noted also of particular words, and this especially in cases where mistakes in transcription were likely to arise, whether they were to be written with the scriptio plena or the scriptio defectiva—i.e. with or without the matres lectionis; also their vocalization and accentuation, and how many times they occurred so vocalized and accented. (c) Letters. They computed how often each letter occurred in O.T.; they noted 15 in.
OLD TESTAMENT

stance of letters stigmatized with the extraordinary points; they commented also on all the unusual letters—viz. the majusculae, which they variously computed; the minusculea, of which they reckoned 33; the suspensae, four in number; and the inversae, of which there are eight or nine. The most valuable feature of the Massora is undoubtedly its collection of q'ri readings. The first rudiments of this collection meet us in the Talmud. It seems clear that the readings of the q'ri in all cases represent those which the Massoretes themselves approved as correct. The Massora furnishes also 16 instances of what it calls 'correction of the scribes.' The real import of this is doubtful. Furthermore, the Massora contains certain "conjectures," which it does not raise to the dignity of the q'ri readings, respecting the true reading in difficult passages. The Massora was originally preserved in distinct books by itself. A plan then arose of transferring it to the margins of the Heb. Bible, in the ordinary given by the scribes necessary. The Massora is now distinguished into the Massora magna and the Massora parva, the latter being an abridgment of the former, and including all the readings of the q'ri and other compendious observations, and being usually printed in Heb. Bibles at the foot of the page. The Massora itself was but one of the fruits of the labours of the Jewish doctors in that period. A far more important work was the furnishing of the text with vocal marks, by which the traditional pronunciation of it was recorded. That the insertion of these was post-Talmudic is shown by the absence from the Talmud of any reference to them. The vocal points are referred to in the Massora; and as they are all mentioned by R. Jehudah Chayug (early in 11th cent.), they must have been perfected before that date. Contemporaneous with the written vocalization was the accentuation of the text. The intention of it is shown, essentially rhythmical; hence they had from the first both a logical and a musical significance. Besides the evidences of various readings contained in the q'ri of the Massora, we have two lists of different readings purporting or presumed by those adopted by the Massoretes, and Babylonians respectively. The first of these was printed by R. Jacob ben Chayim in the editio princeps of the Rabbinic Bible (Venice, 1524-1525). The different readings are 216 in number, generally of but little importance. The other is the result of rival collations of MSS. made in the 14th cent. by R. Abraham ibn Asher, a Palestinian, and R. Jacob ben Naphtali, a Babylonian. The differences, 864 in number, relate to the vowels, the accents, the maqāph, and in one instance (Can.8:6) to the division of one word into two. From the end of the Massoretic period, the Massora became the great authority by which the text given in all the Jewish MSS. was settled. (2) Manuscripts. The O.T. MSS. known to us fall into two main classes: synagogue-rolls and MSS. for private use. Of the latter, some are written in the square, others in the rabbinic or cursive character. The synagogue-rolls contain, separate from each other, the Pentateuch, the Haphtaroth, or appointed sections of the Prophets, and the so-called Megilloth—viz. Can., Ru., Lam., Ec., and Esth. in varying order. The text of the synagogue-rolls is written without vowels, accents, or sopheres: the greater parashiyoth are not distinguished, nor yet, strictly, the verses—these last are indeed often slightly separated, but the practice is against the ancient tradition. The two modifications of the square character are distinguished by the Jews as the Talmud and the Welsh—i.e., probably, the Perfect and the Italian. Private MSS. in square character are in book-form, on either parchment or paper, and of various sizes, from folio to 12mo. Some contain the Heb. text alone; others add the Targum, or an Arabic or other translation, either interspersed with the text or in a separate column, occasionally in the margin. The upper and lower margins are generally occupied by the Massora, sometimes by Rabbinical commentaries, etc. The dating of a MS. is generally determined by the subscriptions, and the subscriptions are often concealed in the Massora or elsewhere, it is occasionally difficult to find them, occasionally also to decipher them. Even when found and deciphered, they cannot always be relied on. No satisfactory criteria to determine the ages of MSS. have as yet been established. Sometimes assignments of MSS. to the first half of 9th cent. (Orient. MSS. 4,445, Brit. Mus.), but it is undated; the oldest dated MS. is the Petersburg Codex of 916 A.D.; but see below. It is usual to distinguish in the MSS. three modifications of the square character: a Spanish writing, upright and regularly formed; a German, inclined and sharp-pointed; and an intermediate French and Italian. One important distinction between the Spanish and German MSS. is in the order in which the books are generally arranged. The former follow the Massora, placing the Chronicles before the rest of the Pentateuch, the Hagiographa, etc., in the latter conform to the Talmud, placing Je. and Ezk. before Is. and Ru., separate from the other Megilloth, before the Ps. Private MSS. in rabbinic character are mostly on paper, and of comparatively late date. Since the days of Kennicott and de Rossi modern research has discarded MSS. beyond the limits of Europe. Many of these do not add much to our knowledge of the Heb. text. It is different with the MSS. examined by Pincher at Odessa. One of these MSS. (A. No. 1), a Pentateuch roll, unpointed, brought from Derbend in Daghestan, appears by the subscriptions to have been written previously to the year 604 A.D., and, if so, is the oldest known Biblical Heb. MS. in existence. The forms of the letters are remarkable. The Samaritan MSS. collated by Kennicott are all in book form. (3) Printed Text. The history of the printed text of the Heb. Bible commences with the early Jewish editions of separate books. First appeared the Psalter, in 1477, probably at Bologna, in 4to, with Kimchi's commentary interspersed among the verses. Only the first four psalms had vowel points, and these but clumsily expressed. At Bologna there appeared, in 1482, the Pentateuch, in folio, pointed, with the Targum, and Rashi's commentary; and the
five Megilloth (Ruth–Esther), in folio, with the commentary of Rashi and that of Ibn Ezra on Esther, was printed in 1486 the Prophetae priores (Joshua–Kings), folio, unpointed, with Kimchi's commentary. The honour of printing the first entire Heb. Bible belongs to the town of Siena. This edition is in folio, pointed and accented. Only nine copies of it are now known, of seven one belongs to Exeter Coll., Oxford. The earlier printed Portions were perhaps the basis of the text. This was followed, in 1492–1504, by the 8vo edition printed by Gershom at Brescia, from which Luther's German translation was made. This edition, along with the preceding, formed the basis of the first edition, with the Massora, Targums, and rabbinical comments, printed by Bomberg at Venice in 1516–1517, fol., under the editorship of the converted Jew Felix del Prato; though the "plurimis collatis exemplaribus" of the editor seems to imply that MSS. were also used. This edition was the first to contain the Massora magna and Rabbah, with the Masorah ben Asher and Ben Naphthali. After the Brescian, the next primary edition was that contained in the Complutensian Polyglot, published at Complutum (Alcala) in Spain, at the expense of Cardinal Ximenes, dated 1514–1517, but not issued till 1522. The Hebrew is pointed, but has only two Massors; the accents for one MSS., still preserved in the Univ. Library at Madrid. To this succeeded an edition which has had more influence than any on the text of later times—the second Rabbinical Bible, printed by Bomberg at Venice (4 vols. fol., 1525–1526). The editor was the learned Tunisian Jew, R. Jacob ben Chayim. The great feature of his work lay in the correction of the text by the precepts of the Massora, in which he was profoundly skilled. The Royal or Antwerp Polyglot, printed by Plantin (8 vols. fol., 1569–1572), at the expense of Philip II. of Spain, and edited by Arias Montanus (together with the first Complutensian edition of Bomberg's, as the basis of its Heb. text. This text was followed both in the Paris Polyglot of Le Jay (10 vols. fol., 1629–1643) and in Walton's Polyglot (London, 6 vols. fol., 1654–1657). A text compounded of several of the preceding was issued in part by the Leipzig professor, Elias Hutter, at Hamburg (fol., 1590): it was intended for students, the servile letters being distinguished from the radicals by hollow type. Specific mention is also due to the labours of the elder Buxtorf, who carefully revised the text after the Massora, publishing it in 8vo at Basle, 1618–1629, and again, after a fresh revision, in his valuable Rabbinical Bible. The texts of Hutter and Buxtorf both had permanent influence: but the Heb. Bible which became the standard to subsequent generations was that of Joseph Athias, a learned Rabbi and printer at Amsterdam. This text was based on a comparison of previous edd., with two MSS.: one bearing date 1296, the other a Spanish MS., boasting an antiquity of 900 years. It appeared at Amsterdam (2 vols. 8vo, 1661), with a preface by Lepsius, professor at Utrecht; and again, revised afresh, in 1667. The progeny of the text of Athias include those of: (a) Codius, Francisco-t-on-Maine, 8vo, 1677; reprinted, with alterations, 8vo 1692, 4to 1716. (b) Tauberschütz, Berlin, large 8vo, 1751, reprinted, but less correctly, 12mo, 1712. (c) Van der Hooght, Amsterdam and Utrecht, 2 vols. 8vo, 1705. This edition, of good reputation for its accuracy, but above all for the beauty and distinctness of its type, deserves special attention, as constituting the present textus receptus. (d) Opitz, Kiel, 4to, 1709. (e) J. H. Michaelis, Halle, 8vo and 4to, 1720. The more modern editions of the Heb. Bible were all based on Van der Hooght, but are now superseded by the edd. of Baer, Ginsburg, and Kittel. (4) Critical Labours and Apparatus. The history of the criticism of the text following the labours of the Massoretes and their immediate successors must now be resumed. In the early part of 13th cent. R. Meir Levi, a native of Burgos and inhabitant of Toledo, known by abbreviation as Haramah, by patronymic as Todrosim, wrote a critical work on the Pentateuch called The Book of the Massora of the Holy Scriptures, in which, by a collation of MSS., to ascertain the true reading in various passages. Later, R. Menahem de Lonzano collated ten MSS., chiefly Spanish, some of them five or six centuries old, with Bomberg's 4to Bible of 1544. The results were given in his Light of the Law in Venice, 1576, and extended to the Pentateuch. A more important work was that of R. Solomon Norzi of Mantua, in the 17th cent., "Reparer of the Breach"—a copious critical commentary on the whole O.T., drawn up with the aid of MSS. and edd. of the Massora, Tal- mud, and all other Jewish resources within his reach. In 1746 the expectations of the public were raised by the Protegomena of Hombigt, of the Oratory at Paris; and in 1753 his edition appeared, splendidly printed, in 4 vols. fol. The text was that of Van der Hooght, divested of points, and of every vestige of the Massora. In the notes copious emendations were introduced, and the old tradition on the state of the Printed Text appeared at Oxford; the second followed in 1759. A subscription of nearly 10,000 was raised for a collation of Heb. MSS. throughout Europe, which was performed from 1760 to 1760, partly by Kennicott himself, but chiefly, under his direction, by Professors of Helmutsdorf and others. The collation extended in all to 581 Jewish and 16 Samaritan MSS., and 40 printed edd., Jewish works, etc.; of which, however, only about half were collated throughout, the rest in select passages. The fruits appeared at Oxford in 2 vols. fol. 1776–1780; the text was Van der Hooght's, unpointed; the variant readings were given below; comparisons were also made of the Jewish and Samaritan texts of the Pentateuch, and of the parallel passages in Samuel and Chronicles, etc. The labours of Kennicott were supplemented by those of de Rossi, professor at Parma. His text differed materially from Kennicott's: he confined himself to a specification of the variant readings in select passages; but for these he supplied also the critical evidence to be obtained from the ancient versions, and from all the various Jewish authorities. For the passages on which
it treats, the evidence in de Rossi's work may be regarded as almost complete. Passing over the edition of Döderlein and Meisner (Leipzig, 8vo, 1793) and the better critical one of Jahn (Vienna, 4 vols. 8vo, 1806), the first attempt to turn the new critical collations to public account was made by Boothroyd, in his unpointed Bible, with variant readings and English notes (Pontefract, 4to, 1810—1816), at a time when Houbigant's principles were still in the ascendant. This was followed in 1821 by Hamilton's Codex Criticus, modelled on the plan of the N.T. of Griesbach. An important contribution towards the formation of a revised text is to be found in Dr. Davidson's Hebrew Text of O.T., revised from Critical Sources (1855). It presents a convenient epitome of the more important variant readings of the MSS. and of the Massora, with the authorities for them. A still more valuable work lately published is the edition of the Heb. Bible by Kittel, giving the variations of the Massoretic text, together with the version-readings collected together all the more important conjectural emendations of the Heb. text proposed by various scholars during the last hundred years, which at present lie buried in their several commentaries and other publications. (5) Principles of Criticism. The methods and procedure required in the criticism of O.T. and N.T. are widely different. Our O.T. textus receptus is a far more faithful representation of the genuine Scripture, but, on the other hand, the means of detecting and correcting the errors contained in it are more precarious, the results more uncertain, and the ratio borne by the value of the diplomatic evidence of MSS. to that of a good critical judgment and sagacity is greatly diminished. It is indeed to the direct testimony of the MSS. that, in endeavouring to establish the true text, we must first have recourse. Where the MSS. disagree, it has been laid down as an axiom that the earlier manuscript is not to preponderate, but that we should examine what is the reading of the earliest and best. The MSS. lead us for the most part only to our first sure standing-ground, the Massoretic text: in other words, to the average written text of a period later by a thousand or fifteen centuries from us. In the case of the N.T. in ascending upwards from the Massoretic text, our first critical materials are the Massoretic qəri readings, valuable as witnesses to the preservation of many authentic readings. A qəri therefore is not to be received in preference to a kəbəbh unless confirmed by other sufficient evidence. A qəri is simply an isolated reading; and in reference to a qəri let the rule be borne in mind, "Procli scripitioni praestat ardua," many of them being but arbitrary softenings down of difficult readings in the genuine text. The express assertions of the Massora, as also of the Targum, respecting the true readings in particular passages, are of course important. From these we ascend to the version of Jerome, the most thoroughly trustworthy authority which we have to aid in amending the Massoretic text. It is not too much to say that a Heb. reading received by Jerome should, if sanctioned or countenanced by the Targum, be so far preferred to one upheld by the united testimony of all MSS. whatever. Of the other versions, although more ancient, none can on the whole be reckoned, from a critical point of view, so valuable. Of the Gk. versions of Aquila, Symmachus, and Theodotion, we possess but mere fragments. The Syriac bears the impress of having been made under the influence of the LXX. The Targums are important material for the correction of the Massoretic text; and their cumulative evidence, when they concur in their variation from it, is very strong. The LXX. itself, venerable for its antiquity, and the authorized version, so to speak, of the early Christian Church, deserves all the attention that can be given to it, especially in its earliest portions—e.g. the Pentateuch. It serves both to warn and to stimulate the careful student in his attempts at discovering the true reading in difficult and corrupt passages. Much caution, however, is required in its use, for it has only to be questioned whether the contentions of the LXX. is to be gained from the Samaritan Pentateuch. In the case of O.T., another source of emendations is generally allowed—viz. critical conjecture. The comparative purity of the Heb. text is probably different in different parts of O.T. In the revision of Dr. Davidson, who has generally restricted himself to corrections warranted by MSS., Massoretic, or Talmudic authority, those in Gen. do not exceed 11; those in Ps. are proportionately three times as numerous; while those in the historical books and the Prophets are proportionately yet more numerous. In all emendations it is essential that the proposed reading be one from some venerable Christian reading may have been derived; hence the necessity of attention to the means by which corruptions were introduced into the text. One letter was accidentally exchanged by a transcriber for another. Words, or parts of words, were repeated, or were dropped, especially in the vowels. Occasionally a letter may have travelled from one word, or a word from one verse, to another. Wilful corruption of the text on polemical grounds has also been occasionally charged against the Jews, and also against the LXX.; but the allegation has not been proved, and they are by no means more guilty than others against it. To the criticism of the vowel marks the same general principles must be applied, mutatis mutandis, as to that of the consonants. Nothing can be more remote from the truth than the notion that we are at liberty to pay scant attention to the Massoretic pointing, that it is so palpably wrong.—B. INTERPRETATION OF O.T. (1) History. At the period of the rise of Christianity two opposite tendencies had manifested themselves in the interpretation of the O.T. Scriptures among the Jews—one to an extreme literalism, the other to an arbitrary allegorism. The former was mainly developed in Palestine, where the law of Moses was, in the nature of things, most completely observed. The Jewish teachers there, acknowledging the obligation of that law in its minutest precepts, but overlooking the moral principles on which those precepts were founded, endeavoured to supply by other means the imperfections
inherent in the mere literal acceptance of any law. On the other hand, at Alexandria the allegorizing tendency prevailed. Gnosticism had a strong influence on the apocryphal writings, as where in Wis.18.24 the priestly vestments of Aaron were treated as symbolic of the universe. This tendency had been fostered by Aristobulus, and, two centuries later, culminated in Philo, from whose works we can best gather the form which it assumed. His expositions chiefly refer to the writings of Moses, whom he regarded as the arch-prophet, the man initiated above all others into divine mysteries; and in the persons and things mentioned in these writings he traces, without denying the outward reality of the narrative, the mystical designations of different abstract qualities and aspects of the invisible. The Alexandrian interpreters were striving to vindicate for the Heb. Scriptures a new dignity in the eyes of the Gentile world, by showing that Moses had anticipated all the doctrines of the philosophers of Greece. But Palestinian law is distinctly a different thing from Alexandrian allegorism which was never entirely distinct. The two extremes had, in their neglect of the direct moral teaching and prophetic import of Scripture, too much in common not to mingle readily. Thus we may trace the development of the two distinct yet co-existent spheres of Halakah and Haggadah [Talmud], within which the interpretation of Scripture of the later Jewish writings ranged. The former ('repetition,' "following") embraced the traditional legal determinations for practical observance; the latter ("discourse") the unrestrained interpretation, of no authentic force or immediate practical interest. The earliest Christian non-apostolic treatment of O.T. was necessarily much dependent on that which it had received from the Jews. The Alexandrian allegorism reappears most fully in the fateful epistle of Barnabas; but it influenced also other writings of the sub-apostolic Fathers. Even Jerome, a century later, passed the gage to the Christian Church, and is said to have been largely employed by the Gnostics. But this was not to last. Irenæus, himself not altogether free from it, raised his voice against it; and Tertullian laid it down as a canon that the words of Scripture were to be interpreted only in their logical connection, and with reference to the occasion on which they were uttered. In another respect all was changed. The Christian interpreters by their belief in Christ stood on a vantage-ground for the comprehension of the whole meaning of O.T. to which the Jews had never reached; and thus, however they may have erred in details of interpretation, they generally came to the right conclusions in regard to Christian doctrine. The view held by the Christian Fathers that the whole doctrine of N.T. had been virtually contained and foreshadowed in O.T., generally induced the search in O.T. for such Christian doctrine rather than to the old philosophical dogmas. It was at Alexandria that definite principles of interpretation were, by a new order of men, the most illustrious and influential teachers in the Christian Church, first laid down. Clement led the way. He held a fourfold import in the Jewish law—literal, symbolical, moral, prophetic. He was succeeded by his scholar Origen, whose Biblical interpretation showed itself more decidedly Christian; and while the wisdom of the Egyptians, moulded anew, became the permanent inheritance of the Church, the distinctive symbolical meaning which philosophy had placed upon O.T. disappeared. Origen recognizes in Scripture, as it were, a body, soul, and spirit, answering to the body, soul, and spirit of man; the last serves for the edification of the simple, the second for that of the more advanced, the third for that of the perfect. The reality and the utility of the first, the letter of Scripture, he proves by the number of those whose faith is nurtured by it. The second, the moral sense of Scripture, he illustrates by the interpretation of Deut.25.4 in rCor.9.9. The third, the spiritual sense, is that on which he principally dwells, showing how the Jewish law, spiritually understood, contained a shadow of good things to come. Both the spiritual and (to use his own term) the prophetic sense of the passages which are present in Scripture: the bodily not always. Origen's own expositions of Scripture were, no doubt, less successful than his investigations of the principles of interpretation. Yet as the appliances which he brought to the study of Scripture made him the father of Biblical criticism, so also of Biblical exegesis. The Christian scriptural commentators his were the first—a fact not to be forgotten by those who would estimate aright their several merits and defects. Jerome, a century later, adopted and repeated most of Origen's principles, but exhibited more judgment in the practical application of them: he devoted more attention to the literal interpretation, the basis of the rest, and brought larger stores of learning to bear upon it. With Origen he held that Scripture was to be understood in a threefold manner, literally, tropologically, mystically: the first meaning was the lowest, the last the highest. But elsewhere he shows that the gage had been passed to the Christian Church, and that the Alexandrian interpretation, identifying the ethical with the literal or first meaning, making the allegorical or spiritual meaning the second, and maintaining that, thirdly, Scripture was to be understood "secundum futurum beatitudinem." The influence of Origen's writings was supreme in the Gk. Church for a hundred years after his death. Towards the end of the 4th cent. Diodorus, bishop of Tarsus, previously a presbyter at Antioch, wrote an exposition of the whole O.T. attending only to the letter of Scripture. Of the disciples of Diodorus, Theodoret of Mopsuestia pursued an exclusively grammatical interpretation into a decided rationalism; Chrysostom followed a sounder course, rejecting neither the literal nor the spiritual interpretation, but bringing out with much force from Scripture its moral lessons; while Theodoret, who followed him, interpreted both literally and historically, and also allegorically and prophetically. In the Western Church the influence of Origen, if not so unqualified at first, was yet permanently greater than in the Eastern. Hilary of Poitiers is said by Jerome to have drawn largely from Origen in his commentary on the Psalms. But in truth, as a practical interpreter, he, like
Augustine, greatly excelled Origen, drawing forth the evangelical sense of Scripture from the literal with cogency, terseness, care, and elegance. But the advances made in the treatment of O.T. by the Latins since the days of Origen were unhappily not continued. We may see this in the Morals of Gregory on the book of John: the later great independent work of a Latin Father. Three senses of the sacred text are here recognized and pursued in separate threads: the historical and literal, the allegorical, and the moral. But the idea of any mutual connexion is ignored. Such was the general character of the interpretation through the Middle Ages, during which Gregory's work stood in high repute. The mystical sense of Scripture was entirely divorced from the literal. The first impulse to the new investigation of the literal meaning of the text of O.T. came from the great Jewish commentators, mostly of Spanish origin, of the 12th to the 15th century: Maimonides († 1204), Ibn Ezra († 1167), Kimchi († 1240), and others. Following in the wake of these, the converted Jew Nicolaus of Lyre, near Evreux, in Normandy († 1341), produced his Postillae Perpetuæ on the Bible, in which, without denying the deeper meanings of Scripture, he justly contends that the literal sense is of itself much that is figurative, such as metonymies, in which one name is substituted for another; metaphors, in which a word is transformed from its proper to a cognate signification; prophecies, or personifications; and even all anthropomorphic and anthropopathetic descriptions of God, which could never doubtfully have been understood in a purely literal sense. It is not to be denied that it is difficult, perhaps impossible, to draw the exact line where the province of spiritual interpretation begins and that of historical ends. On the one hand, the spiritual significance of a passage may occasionally, perhaps often, throw light on the historical element: on the other, the very large use of figurative language in O.T., more especially in the prophesies, prepares us for the recognition of the yet more deeply figurative and essentially allegorical import which runs through the whole. Yet it is no unhallowed or unworthy task to study, even for its own sake, the historical form, which, even by itself, proclaims the working of God, and reveals the care wherewith He has ever watched over the interests of His Church. Above all, the history of O.T. is the indispensable preface to the historical advent of the Son of God in the flesh. We need hardly add that the history recognizes the general historical character of the O.T. records. In reference to that which is not related as plain matter of history, the question of how far the descriptions are to be viewed as definitely historical, how far as drawn, for a specific purpose, from the imagination (e.g. in the book of Job), will remain to be decided according to the particular circumstances. In examining the extent of the historical element in the prophesies, both of the prophets and the psalmists, we must distinguish between those which were definitely fulfilled at a period not entirely distant from that at which they were uttered, and those which reached far beyond in their prospective reference. The former, once fulfilled, were thenceforth annexed to the domain of history. With the prophesies of more distant scope the case stood thus: A picture was presented to the prophet's gaze, embodying an outward representation of things spiritual struggles, judgments, triumphs, or blessings; a
picture suggested in general by the historical circumstances of the present, the past, or the near future already anticipated and viewed as present, or of all these variously combined, all is heightened by the prophetic words. But it does not follow that that picture was ever outwardly brought to pass: the local had perhaps been exchanged for the spiritual, the outward type merged in the inward reality, before the fulfilment took effect. [Prophecy.] Respecting the rudiments of interpretation, let us follow the course of the text.

The meaning of the words is gathered 
(a) from the context, (b) from parallel passages, 
(c) from the traditional interpretations preserved in Jewish commentaries and dictionaries, 
(d) from the ancient versions, (e) from the languages, Aramaic, Syriac, and Arabic. The syntax must be almost wholly gathered from O.T. itself; and for the special syntax of the poetical books, while the importance of a study of the Hebrew metre and parallelism is now generally recognized, more attention needs to be bestowed than has been hitherto on poetic structure and language. [Poetry, Hebrew.] From the outward form of O.T. we proceed to its moral element. It was with reference to this that St. Paul declared that every inspired Scripture of God is also profitable for teaching, for reproof, for correction, for instruction in righteousness (2Tim.3.16); and it is with impatience of the essence of the morally character of the whole that our Lord and His apostles not only appeal to its direct precepts (e.g. Mt. 15.4,19.17-19), and set forth the fullness of their bearing (e.g. 9.13), but also lay bare in O.T. passages moral lessons which lie beneath the surface (19.5.6,22.32; Jn.10.34,35; Ac.7.48,49; 1 Cor.9.9,10; 2 Cor.8.13-15). With regard more particularly to the law, our Lord shows in His Sermon on the Mount how deep is the moral teaching implied in its letter, and in His denunciation of the Pharisees, upbraids them for their omission of its weightier matters—judgment, mercy, and faith (Mt. 7.22). The actual present of the moral character of the O.T. has been made in the N.T. to the moral teaching of O.T. history (Lu.6.3; Ro.4,9,17; 1 Cor. 10.6-11; Heb.3.7-11,11; 2 Cor.2.15,16; 1 Jn.3.12). The interpreter of O.T. will have, among his other tasks, to analyse in the lives set before him the various yet generally mingled workings of the spirit of holiness and of the spirit of sin. The moral errors by which the lives of even the greatest saints were disfigured are related, and that for our instruction, but not generally criticized. In the choice in O.T. of the lives—generally those of religious men— which will best suggest the moral lessons that God would have us learn, we may most surely trace the overruling influence of the Holy Spirit by which the sacred historians wrote. But the O.T. has further its spiritual and therefore prophetic element. Our attention is here first attracted to such apparently pre-dictive parts of O.T., as to the prophetic presence of which, at the time that they were uttered, no question can exist, and the majority of which still awaited their fulfilment when the Redeemer of the world was born. With Christ the new era of the fulfilment of prophecy commenced. There was in His person a marvellous verification of the very letter of prophecy—partly that it might be seen how definitely all had pointed to Him; partly because His outward mission, up to the time of His death, was but the shadow of the great symbols of the house of Israel, and the letter had not yet been finally superseded by the spirit. Yet it would plainly be impossible to suppose that the significance of such prophecies as Zech.9.9 was exhausted by the mere outward verification. Hence the entire absence from N.T. of any re- cognition, by the heralds of the house of Nazareth, of such prospective outward glories as the prophecies, literally interpreted, would still have implied. The language of the ancient prophecies is everywhere applied to the gathering together, the privileges, and the triumphs of the universal Body of Christ (Jn.10.16,11.51; Ac.2.30,31.14-18; Ro.9.25,26,30,31.11,13.11, 25,26,27, etc.). Even apart, however, from the authoritative interpretation thus placed upon them, the prophecies bear evidence to their own spiritual import. The substance of them is the glory of the Redeemer's spiritual kingdom, from the present to the future, from the outward circumstances of the career of God's ancient people, who had all but ceased to be a nation before the fulfilment of the promised blessings commenced. Nor was there the form in which the announcement of the new blessings had been clothed to be and merely casual; that imagery of the prophets is on every account justly dear to us, and from love, no less than from habit, we still speak the language of Canaan. Must not, then, this language have been divinely designed from the first as the language of God's Church? The typical import of the Israelitish tabernacle and ritual worship is implied in Heb.9 ("the Holy Ghost this signifying"), and is almost universally allowed; and it mars the whole record to tear asunder the events of Israel's history from the ceremonies of Israel's worship, or the events of the preceding history of the patriarchs from those of the history of Israel. The N.T. fulfills the prophetic word, not the letter, the import of the O.T. narrative. In O.T. itself we have also, and this even in the latest times, events and persons expressly treated as typical (Ps. 118.22; Zech.3.4,9ff., etc.). A further testimony to the typical character of the history of O.T. is furnished by the typical character of the events related even in the New. All our Lord's miracles were essentially typical. So too the outward fulfilsments of prophecy in the Redeemer's life were types of the deeper though less immediately striking fulfilment which it was to continue to receive ideally. There may be an unswervingness to recognize the spiritual element in the historical parts of O.T., arising from the fear that such recognition may endanger that of the historical truth of the events recorded. Nor is such danger altogether visionary; for one-sided and prejudiced contemplation abuses one element of Scripture so as thereby to cast a slight upon the rest. But this does not affect the existence of the spiritual element. Against the unswerving puerilities to which some have fallen the spiritual interpreter of O.T. will guard by going too curiously a search for mere external resemblances between O.T. and N.T., while
 thanks to recognizing them wherever they present themselves. The spiritual interpretation must rest upon both the literal and the moral; and there can be no spiritual analogy between things which have nothing morally in common. One consequence of this principle will be, that we must never be content to rest in any mere outward fulfilment of prophecy. However remarkable the outward fulfilment may be, it must always guide us to some deeper analogy, in which a moral element is involved. Another consequence will be that that which was forbidden or sinful can, so far as it was sinful, not be regarded as typical of that which is free from sin. So again that which was tolerated rather than approved may contain within itself the type of something imperfect, in contrast to the more perfect. [Bible.—C. QUOTATIONS IN N.T. FROM O.T. These form one of the outward bonds of connexion between these two parts of the Bible. They are manifold in kind. Sometimes the passages quoted contain prophecies or involve types of which the N.T. writers designed to indicate the fully developed explanation. Others are introduced as direct logical supports to doctrine. It may not be easy to distribute all the quotations into their distinctive classes; but among the manifold references to the tabernacles, or to the kingdom of God, one of the most forcible allegories is ascribed in N.T. to the passage quoted may fairly be reckoned all that are introduced with an intimation that the Scripture was “fulfilled”; and it is noticeable that the word “fulfil,” as applied to the accomplishment of what had been predicted or foreshadowed, is in N.T. only used by our Lord Himself and His Apostles. In quotations from O.T. in the New, we find a continual variation from the letter of the older Scriptures. To this variation three causes contributed: First, all N.T. writers quoted from the LXX., correcting it indeed more or less by the Heb., especially when needful for their purpose; occasionally deserting it altogether; still, abiding by it so large an extent as to show that it was the primary source of their quotations. Secondly, the N.T. writers must have frequently quoted from memory. Thirdly, combined with this, there was an alteration of conscious or unconscious design. Sometimes they omitted, and sometimes they obtained increased force. Sometimes an O.T. passage is abridged and adjusted so as to omit what is foreign to the immediate purpose (Ac.1:20; 1Cor.1:31). At other times one passage is enlarged by the incorporation of another; thus in Lu.4:18,19, although the contents are preserved of one read by our Lord from Is.61, we have the words “to set at liberty them that are bruised,” introduced from 58.6 (LXX.); similarly in Ro.11.8, Deut. 28.9 is combined with Is.29.10. In some cases still greater liberty of alteration is assumed. In some places again, the actual words of the original are taken, but employed with a new meaning. These facts will sufficiently illustrate the freedom with which the apostles and evangelists introduce the older Scriptures into their writings. It could only result in failure were we to attempt any merely mechanical account of variations from the O.T. text which are themselves essentially not mechanical.

Old Testament

Olive. Many of the Scriptural associations of the olive-tree are singularly poetical. Its foliage provided the dove’s message of hope when the waters of the flood began to retire (Gen.8.11). It is also the most prominent tree in the earliest allegory (Judg.9.8,9). With David it is the emblem of musical divine blessing (Ps.52.8,128.3). So with the later prophets it is the symbol of beauty, luxury, and strength. Thus after the Captivity, when the Israelites kept the Feast of Tabernacles, we find them, among other branches for the booths, bringing “olive-branches” from the mount” (Ne.8.15), doubtless the famous mount of Olives. In the mystic imagery of Zechariah (4.3,11-14), and of St. John in the Apocalypse (Rev.11.3,4), we find the olive-tree used in a very remarkable way; and in the argument of St. Paul concerning the relative positions of the Jews and Gentiles in the counsels of God, it supplies a typical and his most forcible allegory (Ro.11.16-25). The olive-tree grows freely almost everywhere on the shores of the Mediterranean, but was, as it still is, peculiarly abundant in Palestine (see Deut.6.11,8,28.40). Olive-yards are as much a matter of course in descriptions of the country as vineyards and corn-fields (Judg.15.6; Is.55; Is.8.14). The king had very extensive ones (1Chr.27.28). The cultivation of the olive-tree was closely connected with the domestic life of the Israelites (2Chr.2.10), their trade and their public ceremonies and religious worship. [Oil.] In Solomon’s temple the cherubim were of olive-tree (1K.6.13), as also the doors (11.32) and the mercy-seat. The berries are mentioned in 2Esd.16.29 and Jas.3.12. The wind was dashed by the olive-grower, for the least breeze is apt to cause the flowers to fall (Job.15.33), and the locust was a formidable enemy of the olive (Am.4.9). Not infrequently therefore hopes were disappointed, and “the labour of the olive failed” (Hab.3.17). The meaning of the simile, “thy children like the olive plants [properly, shoots] round about thy table”” (Ps.128.3), is explained by the fact that suckers spring up round the bole of any ancient olive-tree. The tree is of a moderate height, with thick, firm, with the bark smooth, ash-coloured bark. It grows slowly, but lives to an immense age. Its appearance is singularly indicative of tenacious vigour; and its leaves are not deciduous, hence its “greenness” is emblematic in Scripture of strength and prosperity. The great age and patriarchal appearance of an important association of these trees inspire feelings of veneration. Those who see olives for the first time are occasionally disappointed by the dusty colour of their foliage; but those familiar with them find an inexpressee charm in the rippling changes of their slender grey-green leaves. [The olive-trees in the groves about Gaza are of enormous age. They usually have unbranched trunks a few (2 to 4) ft. in height, then divided, and at 7 or 8 ft. the leafy canopy, browse level below by cattle, commences. The average height is about 25 ft. The trunks of the oldest trees are merely stumps. Two trees near the present vineyard had girths of 18 and 20 ft. respectively at 2 ft.
OLIVES, MOUNT OF; LIVET

from the ground, a size maintained till the trunk forked at about 8 ft. [n.c.h.]

Olivet, MOUNT OF; Olive, Mount of. The chalky hill, terraced and dotted with olive trees, overlooks Jerusalem, E. of the brook Kidron, and rises 240 ft. higher than the level of the temple floor. David, fleeing to the E., went up "the ascent Olivet" (2 Sam. 15.30) to the "top, where he worshipped God" (ver. 32), apparently by the old road which passed N. of the main summit; it for the main has a lower summit on N., and a third, also lower, to S. of the central top, which is immediately E. of the temple. The range is called "the mountain [hār] facing Jerusalem" (1 K.11.7); and the term "mount of corruption" (2 K.23.13) applying to the same mountain, on which stood Solomon's temple, in honour of Ashtoreth, Chemosh, and Moloch, is perhaps better rendered "mount of anointing." Ezekiel alludes to Olivet as "the mountain which is on the E. side of the city" (11.23), and Zechariah notices it by name (14.4). It is often mentioned in N.T., and on it were Bethany and Gethsemane (M. 26.39; Mt. 27.3). Josephus places it 5 or 6 furlongs from the city, E. of the Cedron valley (20 Ant. viii. 6; 5 Wars ii. 3). It is now called Jebel et Tūr (the mountain of the isolated summit). In the Mishna (Parah iii. 6) it is said that a causeway (perhaps a temporary wooden bridge) would be made from the temple to Olivet, over which the high-priest passed to burn the red heifer, apparently on the summit, and exactly opposite the temple door (iv. 2). Part of the ashes were preserved on Olivet (iii. 11). The mountain is called also "the mount of inution" in the Talmud (Tal. Jer. Ta'anith iv. 8). Jerome speaks of the Ascension from Olivet, and of the red heifer there burnt (Pilgr. of Paula, 13), and from about this time the footprints of Christ were shown on the summit, though—according to N.T.—the Ascension took place near Bethany. The mountain is now covered with small town houses, chapels, and monasteries, most of which are quite modern, or date at earliest from 12th cent. A.D. The oldest traditional sites are not traceable before c. 330 A.D., including the Gk. site of Gethsemane and the Virgin's tomb. [Gethsemane.] The view from the mountain is extensive, over the desert of Judah and the Jordan Valley and Dead Sea to the Moab plateau and Gilead on E., while on W. Jerusalem lies spread like a map. Some remarkable Greco-Hebrew tombs occur on the W. slope, especially that called "the tomb of the Prophet," in which are rude graffiti in Heb. and Gk.; and near it have been found small stone boxes for bones, bearing Heb. texts. It was a Jewish custom, after the destruction of Jerusalem, to bring the bones of ancestors from foreign lands, and to bury them on the mount of Olivet; and the texts on these boxes date apparently about the 3rd or 4th cent. A.D. In the so-called "cave of St. Pelagia" under the church on the summit, Sæve found a Gk. pagan text of about the same age, reading "Courage, Domitila; no one is immortal"—a frequent sentiment among Gk. pagans in Palestine. (Surv. W. Pal., Jerusalem vol. pp. 308-1044, 142.) [C.R.C.]

Olympia, a Christian at Rome (Ro. 16.15), perhaps of the household of Philologus. According to the Pseudo-Hippolytus, he was afterwards martyred. [n.c.h.]

Olymnius, an epithet of Jupiter (Zeus), derived from mount Olympus in Thessaly, the abode of the gods (2 Mac. 6.2).

Ωμαρός (1 Esd. 9.34) = Amram, 3.

Omar, son of Eliphaz the firstborn of Esau, and duke or "leader" of Edom (Gen. 36.11.15; 1 Chr. 1.36).

O mega, the last letter of the Gk. alphabet. For its metaphorical use, see Alpha and Rev. 1.8, 11, 21.6, 22.13.

Omer. [Weights and Measures; First-fruits.]

Omeir.—1. Originally "captain of the house," E Elah, was afterwards himself king of Israel, and founder of a dynasty of which the four sovereigns were Omri, Ahab, Athaziah, and Jehoram. When Elah was murdered by Zimri at Tirzah, Omri was besieging Gibbethon of Dan, which had been occupied by the Philistines, and he was at once proclaimed king by his army. Thereupon he raised the temple of Gid'on, which stood on Mount Tabor, near Tirzah, where Zimri was holding his court as king of Israel. Zimri perished in the flames of the palace, after a reign of 7 days. Omri, however, had another rival in Tibni, whom "half the people" (1 K.16.21) desired to raise to the throne, and who was bravely assisted by his brother Joram (LXX.). The civil war lasted 4 years (cf. 16.13-15 with 23). After the defeat and death of Tibni and Joram, Omri reigned for 2 more years in Tirzah (cf. vv. 23 and 29); but after that transferred his residence to a strong strategic position on the mountain Shomron, better known by its Gk. name Samaria, which he bought for 2 talents of silver from Shemer. Here he reigned for 6 years more; the "twelve years" of ver. 23 being counted from the death of Zimri (cf. vv. 15 and 20). He appears as a vigorous and unscrupulous ruler, anxious to strengthen his position by union with the unscrupulous rulers of foreign states. From 20.34 we gather that in his wars with Syria Omri must have met with reverses, otherwise he would not have consented to make "streets"—i.e., a Syrian quarter or bazaar—"in Samaria." Of his successful military operations against Moab we learn from the Moabite Stone, erected by his son Mesha, king of Moab, son of Chemosh-melech. (See Driver's translation, following Soein, of the inscription, lines 4-7.) Omri "dealt wickedly above all that were before him" (18-25). This statement, read with Mikeah's reference to the "statutes of Omri" (Mi. 6.16)—a by-word for wickedness—seems to indicate that Baal-worship had already begun to infect the worship of Israel. It had, yet earlier, become a practice with the Canaanites (15th cent. B.C., as witnessed by the Amarna tablets).

—2. One of the sons of Becher, son of Benjamin (1 Chr. 7.8).

—3. A descendant of Pharez, son of Judah (9.1).

—4. A son of Michael, chief of Issachar in the reign of David (27.18). [n.c.b.]

On, son of Pelchth; a Reubenite who took part with Dathan and Abiram in a rebellion against Moses (Num. 16.1). The mention of
On is probably due to a copyist's error; his name does not appear in the subsequent narrative, but generally Παπαοπολος = Vulg. *Heliopolis*. The same city is called Beth-shemesh (Je.43.13), "the house of the sun," which is a Heb. translation of the Egyptian Pi-Ra, one of the sanctuaries of the city. The vowel points are evidently incorrect in Ezk.30.17: "the young men of Aven and Pi-beseth shall perish," where LXX. reads *Heliopolis* and *Bubastis*. On is the transcription of Anub, the usual name of a city not far from the head of the Delta, a short distance from Cairo. An was devoted to the cult of Ra, the sun. This god was worshipped there under the name Tum also, who is the setting sun, and was the first cosmogonic god, who came out of water "when there was no firmament." Another name of Ra is "Horus of the horizon," the rising sun, called by the Gks. Harmakhis. Tum-Harmakhis is very ancient, and is found on an Egyptian sphinx—a lion's body with a human head. The head is that of the god Shu, the body that of the goddess Tefnut. Both are the children of Tum. Another form of Ra was a stone in the form of a pyramid, which was kept in a closed shrine. The bull Mnevis was also one of the divinities of Anub. It was one of the most ancient cities of Egypt. It may be considered as the religious capital. The cosmogonic doctrine was first taught there. There were two cities of the name. Heliopolis is the An of the N.; Hermouthis, a little S. of Thebes, An of the S. The name of An is also applied to each of the two divisions of Egypt. The country is often called "the two lands of An." A mythological history recounts how Ra was the king of the city, and wished to destroy mankind, and how (having done it only partly), weary of the society of the survivors, he was carried to the sky by his daughter Nut, who was in the former character and was the sky. Part of the Book of the Dead, have also a Heliopolitan origin. An had an important and powerful college of priests; and the king, when he raised Joseph to his lofty position, gave him to wife Aseneth, a daughter of the high-priest (Gen.41.46). [Poti-Pherah.] It had also a medical school. The reputation of Heliopolis for learning and wisdom was very great, since Eudoxos and Plato stayed there to study; but in Roman times the city had entirely fallen. Strabo speaks of the priests with great contempt. He says that, instead of men very wise and very learned in astronomy, he had found only ignorant attendants, who offered sacrifices and who showed the temple to strangers. The remains of the temple of Heliopolis are in a village called Matarieh, and consist of a few sphinxes of the avenue, and one of the obelisks with the name of Senufrit I., the second king of the 12th dynasty, who considerably enlarged the temple. Part of the enclosure is still extant, but the whole area is now cultivated land. Until 1906 an old sycamore, called the "tree of the Virgin," was said by local tradition to have covered by its shade the holy family flying before Herod. The Arab historian Makrizi relates that in his time (14-15th cent.) the two obelisks remained, and also many sitting and standing statues of which some were more than 30 cubits high. They have all disappeared since. [Beth-shemesh, 4.]

**Onam.**—1. A son of Shobal the son of Seir (Gen.36.23; rChr.1.40).—2. Son of Jerahmeel by his wife Atarah (rChr.2.26,28).

*Onan* (Gen.38.4, 5-10, 16-12; Num.36.19; rChr.2.3), second son of Judah by a Canaanitess. He refused the duty of an Israelite brother, and Jehovah "slew him" for the accompanying act of moral evil, the modern description of which is derived from his name.

**Onesimus**, the fugitive slave on whose behalf St. Paul wrote his epistle to Philemon (q.v.). Upon the meaning of his name (help. are the apostles) see in ver. 11 of this epistle. It is possible that there is a secondary and deeper paronomasia in St. Paul's epithets (ἀγγέλος, ἀγαθός), since we learn from Tertullian that "Chrestus" was, among the Gks. and Romans, a common variant upon "Christus" as the name of our Lord. [Philem. Epistle.]

**Onesiphorus** is mentioned twice only in N.T., viz. 2Tim.1.16-18 and 4.19. St. Paul gratefully commemorates the kindness and fidelity shown by Onesiphorus when the latter was in Rome—conduct in sharp contrast to that which the apostle had more lately experienced from those who are in Epaphroditus (2Tim.1.15). He prays that Onesiphorus "may find mercy of the Lord in that day." In 4.19 special greeting is sent to "the household of Onesiphorus." That the salutation takes this form, together with the previous mention of his house—before that of the man himself—in 1.16, and the prayer, above quoted, of 1.18, are facts which show with some conclusiveness that Onesiphorus was dead when this epistle was written. The passage is of importance by reason of its bearing upon the lawfulness of prayer for the faithful departed. It should be noted, however, that the general form of character and name - Onesiphorus, together with intercession on his friend's behalf, imitated by the early liturgies of the Church, give no tenance to the more elaborate doctrines and devotions promulgated subsequently. [A.C.B.]

**Onias** is a name introduced into the Gr. and Syr. texts of 1Mac.12.19 by a very old corruption of the two consecutive names Onias and Arius. See A.V. marg. and R.V.

**Onias.**—1. The son and successor of Jaddua who was high-priest 323-300 B.C. He received from Antiochus I. of Sparta a letter which is quoted by Jonathan, 1Mac.12.20-23.—2. A grandson of Onias I., and son of Simon the Just. A minor at his father's death, c. 290 B.C., he was preceded in the high-priesthood by his uncles Eleazar and Manasseh. He held the office c. 240-226 B.C. His covetousness nearly caused a rupture with Ptolemy III. (Euergetes) (Jos. 12 Ant. iv. 1-3. Not mentioned in A.V.). He was succeeded by his son Simon II.—3. The son of Simon II., whom he succeeded c. 198 B.C. During his tenure of office Seleucus Philopator bore the cost of the temple sacrifices (2Mac.3.1-3). He averted the attempt of Heliodorus, the agent of Seleucus, who was prompter by Simon, "governor of the temple," to seize the treasures in the temple (3.4-35). The con-
timed hostility of Simon forced Onias to appeal to Seleucus at Antioch (4.1-6). But Seleucus was now (175 B.C.) succeeded by Antiochus IV. (Epihanes), from whom Onias' brother Jason purchased the high-priesthood (4.7), and Onias was detained in Antioch. Jason was soon displaced by Menelaus, who, being rebuked by Onias for sacrilege, is said to have procured his murder (171 B.C. (4.32-36).

4. The son of Onias III, who is not mentioned in A.V. Failing to obtain the high-priesthood in Jerusalem, he fled, in the time of Antiochus V. (Epihanes), to Egypt. He was received by Ptolemy Philometer, who granted him a disused temple of Babastis at Leontopolis. This he reconstructed on the model of the temple at Jerusalem, and here, until after the fall of Jerusalem, regular services were offered by priests and Levites, the proceeding being defended by appeal to Is. 19.18-21. Onias was made governor of the land, and by the Hee the two sons gained high rank in the Egyptian army (Josephus, 12 Ant. v. 1; 13 iii. 1-3, x. 4.; [c. d.]

Onias, City of, built by Onias, a Jewish high-priest who fled to Egypt before Antiochus Epiphanes. According to the narrative of Josephus, he was well received by Ptolemy Philometer and his wife Cleopatra who granted him a temple at Leontopolis in the nome of Helopolis. The new city was called Onias. It seems now certain that this place is to be looked for in the large mounds now called Tel el Yehudiyeh, near the station of Shabin el Quanater, on the road from Cairo to Zagi (see previous exercise). It is close to the city, a Jewish cemetery with Jewish names. Lately Prof. E. Petrie has found there old walls, which he states to be the remains of the temple built by the Jews, and he has restored the plan of their construction. The Egyptian name of the locality seems to have been "the house of Ka", on the N. of Onias; and this would agree with Isaiah (19.18), who says of the five cities in the land of Egypt which speak the language of Canaan, "One shall be called the city of destruction," where the Aram. and other versions read the "city of the sun" (avetel solis, Vulg.).

[t.x.] Onias, husband of Cleopatra, (see above). This occurs also in Nimm. 11.5, as one of the good things of Egypt of which the Israelites regretted the loss. Onias has been from time immemorial a favourite article of food amongst Egyptians. The onions of Egypt are much milder in flavour and less pungent than those of this country.

Ono, a town mentioned with Lod (1 Chr. 8.12), and inhabited after the Captivity (Ezr. 2. 33; Ne. 7. 37) by the Benjamites, who extended their settlements beyond the old tribal border in this later age (Ne. 11.35). Nehemiah was asked to meet Sanballat "in one of the villages of the plain of Ono" (6.2). The site appears to be the present village Keit 'Anat, in the open valley. 5 miles N.W. of Ludd. Though not mentioned early, Ono appears to be an old town, for Thothmes III., in 16th cent. B.C., enumerates Aana next to Ludd or Lod (Nos. 61, 65) in his list.

Onyx (1 Esd. 5.22; [Oxyn].) Onyx is the Heb. shaketh). The Heb. word occurs only in Ex. 30. 34, as one of the ingredients of the sacred perfume. In Ecclus. 24.15 Wisdom is compared to the pleasant odour yielded by "galbanum, onyx, and sweet storax." It is generally accepted that skhileth, like the ḥeḏ of Dioscorides (ii. 10) and the onyx of Pliny (xxxii. 10), refers to the operculum of a mollusc of the genus Strombus, perhaps S. lentiginosus, which is distinctly clade-like. When burnt, this emits a pungent, aromatic odour, and is still used as an ingredient in some kinds of Eastern frankincense. The "devil's claw" of the old Materia Medica may have been the same thing. Bothel believes some kind of bideleum to be intended. [x.l.]

Onyx, A.V. uniformly renders the Heb. shaketh by "onyx"; the Vulg. too is consistent, the sardonyx (Job 28.16) being merely a variety of onyx; but the testimonies of ancient interpreters generally are diverse and ambiguous. Nothing in the contexts of the several passages (Gen. 2.12; Ex. 28.9, 20; [1Chr. 28.2; Ezek. 28.13]) where this term occurs helps us to determine its signification. Josephus expressly states that the shoulder-stones of the high-priest were formed of two large sardonyxes, an onyx being, in his description, the second stone in the fourth row of the breastplate. The name now denotes sundry varieties, of which the sardonyx (15.4 B.C.), which is so arranged in regular zones or bands, that it is very suitable for cutting intagli or cameo. In this sense it was used by Pliny; but earlier Gk. writers, as shown by Mr. King (Precious Stones, s.v. "Onyx"), applied the name rather to mottled and veined agates. In any case, however, this term indicates a stone of very different appearance from the precious onyx of the Bible. Dr. Pinches suggests a possible parallel in the santo (for fem. of sāmu, "dark") of the inscriptions, where abnu santo is "the stone of love." For the "onyx" of Ecclus. 24.15, see OXVNYX. [t.g.n.]

Ophel (mount). The word is used in the plur. of the mounds on which fortified cities stood (Is. 32.14), and even of the "swellings" from which the Philistines suffered (Deut. 25. 27, kethib); 1 Sam. 5.6, 6.12; 6.4, 5). On the Moabite Stone the "wall of the Ophel" is noticed in connexion with a fortress in 1 Sam. 5.6. The Ophel lies north of the Temple. It is a place S. of the temple, so called either as being a natural "swelling" of the ground, or as being enlarged by a mound. The "wall of the Ophel" is noticed, with the temple, as being built up by Jotham (2 Chr. 27.3), and Manasseh, when he built a wall "outside the city of David," is said to have "compassed about the Ophel, and raised it up a very great height" (33.14). In Nehemiah's time it was inhabited by the Nethinim (Ne. 3.26, 27), near the Water Gate (above the Ginnon spring); and the wall of the Ophel was near the Horse Gate, which was close to the temple (see 11.24). We learn also that the "house of David," or ancient palace, was near the Water Gate, and thus stood on the Ophel (12.37). Josephus (5 Wars iv. 2, vi. 1; 6 Wars vi. 3) places the Ophel near the E. cloister of the temple, and the Kidron Valley. There is thus no doubt that the spur S. of the temple is the place intended. S. of the narrow ridge sinking gradually S. towards Sioba. The area of its flat ground, S. of the temple wall, does not exceed some 15 acres;
and, judging from the measurements given (1K.7.2,6) it would appear that it was nearly all covered by the royal palace built by Solomon. Thus Athallah was seized as soon as she left the precincts of the temple "by the way by which the horses came into the king's house" (2K.11.16), which was no doubt at the Horse Gate, which is noticed with the Ophel and the "king's high house" (Ne.3.25-28). The connexion is important, for Solomon housed his bride in the city of David until he had made an end of building his own house (1K.6.1), which included one for the queen (7.5), who was "brought up out of the city of David unto her house, which he had built for her " (9.24). Hence it appears that the Ophel was not in the city of David, which Josephus (5 Wars iv. 2) places on the S.W. hill of Jerusalem, and which covered at least 100 acres; but that it was a small area—perhaps artificially terraced by its "mound"—for the palace, which may not have been enclosed by any wall till the time of Jotham.—2. "Ophel [R.V. marg.; R.V. hill; A.V. stronghold] of the daughter of Zion" (Mi.4.8) seems to have been another place, since it is connected with the tower of Jeconiah (1K.22.38). It is mentioned with the "first dominion" of David—who came from Bethlehem.—3. Ophel in Lower Galilee (2K.5.24; A.V. lower; see R.V. marg.), where Elisha lived, is probably the present village Afulah, 3 miles of Shunem, which latter Elisha used to pass on his way from Damascus to Jerusalem. Al'afa, "queen," pose that the king of Israel (5.6-8) was at Jezreel, 4 miles S.E. of this Ophel, and that Naaman had thus only some 17 miles to go back to bathe in Jordan (or 4 hours in a chariot), so that the whole topography is easy to understand. This Ophel is mentioned as early as 16th cent. B.C., in the list of Thothmes III. (No. 53), with Anaharath, which lay only 6 miles to the E. [JERUSALEM.] [c.r.c.]

Ophir, a place famous for its gold in the time of Solomon and later. The only indication of exact position occurs in Gen.10.29 = 1Chr.1.13, where it is noticed, with Siphen, as one of the lands of the sons of Cush—clearly in the S. of Arabia. This agrees with the later notices, according to which it was reached by sea from Eloth (1K.9.26-28, 10.15, 22, 48; 2Chr.8.18, 9.10) on the shore of Edom. Besides gold and gems, Almug-trees came from Ophir and also from Lebanon (1K.10.11; cf. 2Chr.2-8). [ALGUM.] The word Ophir probably means "wealth" (Arab. 'afar), and is thus once used by itself (Job 22.24) as meaning riches. The gold of Ophir is noticed especially (Job 28.16; Ps.45.9; Is.13.12; 1 Chr.29.4), and Uphaz (Je.10.5; Dan.10.5) is thought by Gesenius to be a clerical error for Ophir, the last letter only being changed. Diphr is another Hebrew word for gold. Ophir is a gold-mine and nuggets in Arabia, and of the gold as apuros, which may probably mean "of Ophir," though he thought it meant "without fire"—that is, alluvial gold. Arabia was famous for its gold [ARABIA], according to Sophocles (iv. 22) and Piny (Hist. Nat. vi. 29, 32), who quote the Gk. H. HI. (iii. 216), though Talmudic legends magnifying Solomon have, however, led to many speculations placing Ophir in India, in Africa, and even (Arias Montanus) in Peru. Josephus (8 Ant. vi. 4) thought it was the Malay Peninsula, or Aurea Chersonese. The LXX. (except in Gen.10.29) usually reads Sophor for Ophir, and Coptic translators followed this name to India. The Arabians who adopted Talmudic legends about Solomon, imagined that Ophir lay in Mashonaland, whence they obtained gold in and after the 2nd cent. A.D. The Portuguese adopted this story, and have handed it on to the Dutch, English, and Germans; but there is no reason to suppose that S. Africa was known in the time of Solomon, or even of Jehoshaphat (1K.22.48), if the present reading of this passage is correct. [Tarshish.] The Mashona ruins have so far produced no clear indications of antiquity earlier than c. 17th cent. A.D. It is not stated in O.T. that "ivory, apes, and peacocks" (1K.10.22; 2Chr.9.21) came from Ophir; and even the notice of Almug (or Algun) trees does not certainly point to India, since the identification of this precious wood (found also in Lebanon) with the sandal wood is uncertain, while, on the other hand, sandal wood was imported into Oman in Arabia, according to the Arab notices, and may have been there known much earlier. The suggestion that Ophir is the Apir of Elamite texts (c. 600 B.C.)—a region near Susa (Hommel)—is equally speculative, since gold is not known to have been found there. The existence of a place called Ofir in the mountains of Oman (Sale) is noted by Josephus, and the name may have been given later in consequence of the O.T. notices; but Eusebius (Præp. Evang. ix. 30) quotes Eupolemus, a Gk. historian before the Christian era, as making Ophir an island with gold-mines in the Persian Gulf. None of these speculations seem to outweig the direct notice of Ophir in Genesis as a place in S. Arabia.

Ophi'ni, a town of Benjamin, mentioned in Jos.18.24 only, apparently in the N.E. portion of the tribe. It was probably the Gophna of Josephus (3 Wars iii. 5) and the Gufla of the Jerusalem Talmud (Taannith ii. 8), which is now known by the name Jufna, a village on the W. side of the road to the chief town of the Gophnitic district. The Heb. guttural may have been a gh (for 'ayin = 0), or the letter may have been miscopied. The LXX. (Vat. MS.) reads Môr. [c.r.c.]

Opha'rah. In 1 Chr.4.14 we read "Meonothai begat Ophrah," which may mean that he founded the town of that name (see next art.), many other names in this genealogy being place-names.

Ophrah, probably "soft dry soil" (Arab. 'Afrah).—1. A town of Benjamin (Jos.18.23) towards which the Philistine raiding bands went out from Michmash (1Sam.13.16,17), apparently northwards, to the land of Shual. It may be the same as Ephraim, or Ephrah. It lay as Apherema, and lay on the N.E. border of the tribe. The site at Tâishebek, which suits Ephraim, is also possible for Ophrah, for it lies 5 miles E. of Ophi'ni (Jufna) and 2 miles E. of Chephar-haamonial (Kefr 'Ana), which were in Benjamin, and at the head of the valley running to Na'in. It also lies between Benjamin and Ephraim. The place is a large Christian village, with good lands and
ancient remains. It was important in the middle ages; and a crusaders' tower crowns the hill on which it stands. (Sturt, W. Travels in Arabia, p. 315.)—2. **Ophrah of Manasseh** (Judg. 6: 32, 27, 31, 7: 5), according to the Samaritan chronicle, as translated into Arabic, was the present village Fer'ata, 6 miles W. of Schechem (Neubauer, in Journal Asiatique, Dec. 1860, p. 430). This village also has amid good lands, in a suitable site. (C.E.)

**Oracle.** The word is used in both O.T. and N.T. for any direct revelation of God to man. In O.T. it has the special signification of the place where such revelation was to be expected (Is. 28: 2); hence in connexion with Solomon's temple (1 K. 6: 17, 19, 8: 64); 2 Chr. 3: 16, 4: 20, 5: 9). For the means by which the divine utterance was sought, see Urim and Thummim. In N.T. oracle (Acts 2: 36) is generally used of the O.T. Scriptures, in special reference to the law of Moses (Ac. 7: 38; Ro. 3: 2). In Heb. 5: 12 and 1 Pe. 4: 11, a wider meaning is attached to the term, viz. "any inspired messages . . . [R.A.M.]

**Orator.** (1) One "skilful in divination" (Is. 3: 3, cf. R.V.) is reckoned among the men of repute (Divination), and wrongly interpreted in A.V. "eloquent orator." (2) The title applied to Tertullus, the advocate or patronus of the Jewish accusers of St. Paul before Felix (Acts 24: 1).—**Ordain.**

**Ordeal of Jealousy** (Num. 5: 11-31). Ordeal was a regular method of trial in ancient communities. It was an appeal to the supernatural to decide where evidence was lacking. In Heb. law it is found only in this instance. It is provided that if a man become jealous of his wife, he is to bring her to the priest, with an oblation of a heifer, and purify himself, by drinking a mixture of barley-meal and sour bulk, which is made into a meal-offering. The priest is to take holy water, and put in dust of the floor of the Dwelling, and set the woman "before God" with loosened hair and the meal-offering in her hands. The priest then administers an imprecation (Curse), imputing God to make her diseased, if she be guilty. The priest and her family shall swell, to which the woman assents. Next the priest writes these curses in a Book, and blinds them out with the water of bitterness, which he then makes the woman drink, after waving the meal-offering and burning a handful. [Sacrifice.] If she is guilty, the curses will be fulfilled; but if innocent, "then she shall be free, and shall conceive seed." [LAW IN O.T.; JUDGE; ADULTERY; WATER OF BITTERNESS.]—**Parallels in H. C. Lea, Superstition and Force, 3rd ed. passim, esp. 2222; Post, Grundriss der chin. Jurisprudenz, ii. 470, 490, 491; W. R. Smith, Religion of Semites, 2nd ed. 170ff.; Kohler, in Zeitschrift fur vergl. Rechtswissenschaft, v. 368-376; Encyc. Brit., s.v. "Ordeal." [H.M.W.]

**Ordination.** [CHURCH; LAYING ON OF HANDS.]

**Oreb (ra'ven).—1.** A "prince" of the Midadites (Judg. 7: 25, 8: 3; Ps. 83: 11; Is. 10: 26), who, with Zeeb (zēḇ), was slain by Ephraimites W. of Jordan, while Gideon pursued the N. of Midian E. of that river (Judg. 8: 21). Oreb was slain at the "rock Oreb," and Zeeb at the "wine-press" (or "hollow place") of Zeeb (7: 25). In 1871 the present writer suggested that the "rock Oreb" might be the remarkable peak in the Jordan Valley, 3 miles N. of Jericho, now called 'Osh el Ghurab, or the "raven's nest," while a miles farther N. is a ravine called Mejūr elh Dhib, "the water-holes of the wolf." These sites are perhaps rather farther S. than might be expected from the narrative, unless the "princes" fled S. while the "kings" of Midian fled E. (2 Esd. 5: 33 = Horeb. [C.R.C.])

**Oren:** a son of Jerahmeel the firstborn of Hezron (1 Chr. 2: 25).

**Orgon** (Gen. 4: 21; Job 21: 12, 30, 31; Ps. 150: 4). The Heb. 'ūghāb, thus rendered in A.V., is of uncertain meaning. The LXX. gives different translations. In Gen. we have κόθαρα, in Job ḫalûs, and in Ps. ḫrāyōn. In the Heb. trans. of Dan. 3: 5, 15 it represents the Aram. מָגָיָד, which was either the pan-pipes or the bag-pipes. The rendering which suits the four passages best is wind instrument. In Gen. 4: 21 Jubal is the inventor of string and wind instruments. In Job the wind instrument is generally, while in Ps. 150 'ūghāb is joined with 만nnim ("strings," i.e. string instruments), obviously a general term. [J.M.]

**Original Sin.** There are passages in O.T. which seem to anticipate the doctrine of Original Sin—e.g. the familiar Ps. 51: 5. But these are at most approximations. So far as Biblical authority is claimed for the doctrine, it is to be sought in St. Paul. And here the two crucial passages are Ro. 5: 12-21 and Eph. 2: 3. The following points are to be noted about the first of these: (1) The whole discussion is expository of Redemption. The unity of the human race in sin and death is the counterpart of its unity in Redemption. The key to the whole passage is Ro. 5: 19: "For as through the one man's disobedience the many were made [kareotbrwn einoi, sinners, even so through the obedience of the one shall the many be made righteous." The intellectual difficulties of the conception are similar in each case. (2) The essential point is corporate unity in man's fall. The truth of the Fall-story in Genesis, by which that unity is here explained, is of course assumed. But it is not in organic connexion with the main argument, and that would not necessarily be falsified by a different view of history (cf. Sanday and Headlam, Romans, pp. 146-177). (3) Sin is here, as in 1 Cor. 15: 22, connected with death (taken by the best commentators to mean physical death), which is its result. But we are expressly told that guilt is not imputed apart from law, i.e. apart from the conscious and deliberate transgression of the individual. Otherwise the sin is not sin in the full sense. (4) There is here no definite theory of the mode of transmission, or of the exact nature of that which is transmitted, such as is found in the later history of the doctrine. Nor is sin expressly connected with the flesh. The moral and physical regions are not indeed sharply separated; but it is moral causes which produce physical effects. In Ro. 8 and 9, where the connexion of sin with the flesh is prominent, there is nothing about inheritance from Adam. (5) In 6: 17ff. and 7 passim, sin is treated as an external power which has invaded the personality, and which within the

personality overpowers the ἐνθυμομένος. But this power is not connected with any theory of origin; and Sanday and Headlam distinguish it from inherited corruption. Eph. 5.3 reads "and were by nature children of wrath" (καὶ ἠμεθα τίκνα φίλοι ὄργης). To take this as an assertion of the doctrine of Original Sin is probably a misinterpretation. ὄργη indeed means the wrath of God; but it is actual sin which is suggested by the context as the object of this wrath. The words τίκνα and φίλοι have seemed, the one to suggest birth, the other a defect of constitution as opposed to anything which is the result of individual will. But τίκνα is a common Hebraism for "objects of," and φίλοι in ordinary Gk. usage would mean "in themselves," as opposed to something due to external influence. There is, therefore, no ground for seeing in this passage a reference to Original Sin in the technical sense. The doctrine then, as later developed by St. Augustine and subsequent theologians, though not necessarily inconsistent with St. Paul, is not found in his writings and cannot be directly deduced from them.

Orion. There seems little reason to doubt that the constellation known to the Hebrews by the name kherîl is the same as that which the Greeks called Orion, and the Arabs "the giant," though the ancient versions vary in their renderings (Job 9.9; 38.31; Am.5.8). The "giant" of Oriental astronomy was Nimrod, the mighty hunter, who was fabled to have been Bound in the sky for his impiety. The two dogs and the hare, which are among the constellations in the neighbourhood of Orion, made his train complete. There is possibly an allusion to this belief in "the bands of kherîl" (Job 38.31). Some Jewish writers, the Rabbis Isaac Israel and Jonah among them, identified the Heb. kherîl with the Arab. sokâl, by which was understood either Sirius or Canopus.

Ornaments, Personal. These form one of the characteristic features of Oriental costume, both in ancient and modern times. The monuments of ancient Egypt exhibit the hands of ladies loaded with rings, earrings of very great size, anklets, armlets, bracelets of the most varied character, richly ornamented necklaces, and chains of various kinds. There is sufficient evidence in the Bible that the inhabitants of Palestine were equally devoted to finery (cf. Is.3.18-23). The notices in the early books imply the weight and abundance of the ornaments worn at that period. Eliezer decorated Rebekah with "a golden ring [R.V.] of half a shekel weight, and two bracelets for her hands of ten shekels weight of gold" (Gen. 24.22); and he afterwards added "trinkets of silver and trinkets of gold" (ver. 53). Earrings were worn by Jacob's wives, apparently as charms—for they are mentioned in connexion with idols (35.4). The ornaments worn by the patriarch Judah were a "signet," suspended by a string round the neck, and a "staff" (38.18): the latter being probably ornamented. The first notice of the ring occurs in reference to Joseph: when he was made ruler of Egypt, "Pharaoh took off his signet-ring from his hand, and put it upon Joseph's hand . . . and put a gold chain about his neck" (41.42). The number of personal ornaments worn by the Egyptians, particularly by the females, is incidentally noticed in Ex. 3.22, and the Midianites appear to have been as prodigal in the use of them (Num. 31.50-52; Judg. 3.26). Among the Israelites, the appearance of the bride is thus described in Canticles: "Thy cheeks are comely with beads [A.V. rows of jewels, R.V. "plaits of hair," the neck with perforated pendants] [A.V. chains, R.V. strings of gold]; we will make thee beads [A.V. borders, R.V. "plaits" of gold with studs of silver" (Can. 1.10,11). Her neck, rising tall and stately, "like the tower of David built for an armoury," was decorated with various ornaments, hanging like the "thousand bucklers, all shields of mighty men, on the walls of the armoury" (4.4), and "the roundings" (not as E.V. "the joints") of her thighs are likened to the pendant of an earring, which tapers gradually downwards (7.1). Of the bridegroom we read: "his eyes are . . . set with the top of" like gems in sockets of rings (5.12): "his hands [are as] gold rings [better, cylinders, as R.V. marg.] set with the top of" the nails (dyed with henna) resembling gems. [Ring.] The yearning after close affection is expressed thus: (8.6): "Set me as a seal upon thine heart, as a seal upon thine arm." Babylonian ladies wore a cylinder, with their marriage contract on it, on the arm above the wrist. As regards the terms used in the Proverbs, we need only explain that the "ornament"
ORNAN

of A.V. in 1:9, 4:9 is more specifically a wreath, or garland; the "chains" (1:9) are the drops of which the necklace was formed; the "jewel of gold in a swine's snout" (11:22)

EGYPTIAN OSTRICH. (Heb. Mus.)

is a nose-ring; the "jewel" (20:15) a trinket and the "ornament" (25:12) an ear-pendant.

In that day the Lord will take away the bravery of their anklets, and their phalas (or, nets), and their necklaces; (19) the ear-pendants, and the bracelets, and the light veils; (20) the turbanas, and the step-chains, and the girdles, and the scent-bottles, and the armlets; (21) the signets and rings; (22) the state-dresses, and the cloaks, and the shawls, and the purses; (23) the mirrors, and the fine linen shirts, and the head-veils, and the face-veils.

ORNAN. [ARANAN].

Orpah, a Moabite woman, wife of Chilion, son of Naomi. When she and Ruth were widowed, they accompanied their mother-in-law on the road to Bethlehem. But Orpah's resolution failed her, and, unlike Ruth, she went back "unto her people and unto her god." (Rut 1:14-15.)

Orphan. [POOR.]

Orthosias (1Mac.15:37), a Phoenician sea-coast town, between Tripolis and the Euphrates River (Pliny, Hist. Nat. v. 17), and near the latter (Strabo, xvi.). The Pentinger Tables (5th cent. A.D.) place it 12 miles N. of Tripoli, and 30 S. of Antaradus. It thus appears to have been N. of the Nahar el Bârid, about 7 English miles N. of Trablus, and 26 miles S. of Tarbis (Antaradus). It was the seat of an eparch (Nadtha; see Reland, Pal. Hist., i. p. 216) mentioned with Byblos and Arados. [SMITH.] [C.E.B.]

Osi̇as (1Esd.8:48) = Iššāmah 4.

Osea (2Esd.13:40) = king Hoshia. [OSIAH, 4.

Oseas (2Esd.13:30), Osee (Ro.9:25) = the prophet Hosha. [ORENDAM.] [OSIIA.

OSTRICH

Osee (Ro.9:25). [Hosea.]

Oshe'â, the original name of Joshua the son of Nun (Num.13:8), which, on some occasion not stated, received from Moses (ver. 16) the addition of the great name of Jehovah.

Ospary (Heb. 'ezznûyâ). The Heb. word occurs only in Lev.11:13 and Deut.14:12 as the name of an unclean bird which the law of Moses disallowed as food to the Israelites. The old versions and many commentators are in favour of the A.V. translation; but Tristram is of opinion that while the osprey (Pandion halaetus) would have been called 'ezznûyâ, yet

THE OSPREY (Pandion halaetus).
OSTRICH

THE LAMMERGEREK, OR "OSSIFRAGE" (Gypaetus barbatus). See art. "Ossifrage."

which signifies either "daughter of greediness" or "daughter of shouting," by "owl," or, as in the marg., by "daughter of owl." In Job 30. 29, Is. 34.13, and 43.20, the marg. of A.V. correctly reads "ostriches." Bochart considered that bath-hayya'ānā denotes the female ostrich, and that jāhmasā, the following word in the Heb. text, indicates the male; but the 2nd word probably refers to an entirely different bird. The booming cry of the ostrich, which has been compared to the lion's roar, seems to be referred to in Mi. 1.8. yā'ēm occurs only in the plur., yē'ēm, in Lam. 4.3, where the context shows that the ostrich is intended. The same is the case with rū'ānā, of which the plur., rū'ānām, occurs in Job 39.13. A.V. renders rū'ānām by "peacocks," but these birds, for which there is a different Heb. name, were probably not known to the people of Arabia or Syria before the time of Solomon. On the other hand, the word (ḥāḏēhā) rendered by A.V. "ostrich" in Job 39. 13 represents the stork. Ostriches are polygonous, the hens laying their eggs promiscuously in one nest, which is merely a hole scratched in the sand. The eggs are then covered to the depth of about a foot, and when the sun is hot are generally left for the greater part of the day to its heat; but at night they are incubated by the cock, who is occasionally relieved by the hens when brooding is also necessary during the daytime. The habit of leaving the eggs to be matured by the sun's heat is generally regarded as confirming the Scriptural account, "She leaveth her eggs to the earth"; but the statement that "she forgetteth that the foot may crush" the eggs probably refers to the fact that ostriches deposit some of their eggs around the nest. These being used for the nourishment of the young birds. The Arabs have a proverb, "Stupid as an ostrich" (cf. Job 39.17); the legend of its burying its head in the sand to escape detection seems to be based on the fact that ostriches, instead of fleeing, will sometimes throw themselves down and feign death. The ostrich now extends from Barbary to Syria, Arabia, and even Mesopotamia, although it is exterminated in Egypt. [r.l.]

Othniel, son of Shemaiah, the firstborn of Obed-edom the Gittite (1 Chron. 26.7).

Othniel (God is force), son of Kenaz, took Kirjath-sepher (Debir), and won Caleb's daughter as his bride. [Achshah.] After the death of Joshua and the elders, the Spirit of the Lord came upon him, and he delivered Israel from Chushan-rishathaim, who had oppressed them for eight years. He vindicated Israel (Moore's trans.), and judged the people 40 years (Josh. 15.17; Judg. 1.1 ff.; 3.8-11). The Heb. text may be read to mean that Othniel was Caleb's younger brother. [Kenaz.] The LXX makes Kenaz Caleb's brother. Probably the word brother is not to be strictly interpreted. [Brother.] Caleb and Othniel belonged to the same clan. They were Kenites [Krizites]. The 40 years also need not be taken literally. It stands for a generation, and in Judg. 3.11 may only mean for as long as he lived. In 1 Chron. 4.13, Othniel's brother is Seraiah and his son Hathath. Heldai, his descendant, was one of David's 12 captains (1 Chron. 27.15). [Caleb; Chushan-rishathaim.] [Kenaz.]

Othonias (1 Esd. 9.28) = Mattaniah, 5.

Ouches (mishb'ōth), plaited work, sometimes of gold, in which gems were set; mentioned in connexion with the high-priest's ephod (Ex. 28.11, 13, etc.). The Heb. word is used of a kind of checker-work of gold thread in the clothing of a king's daughter (Ps. 45.14). [Handicrafts, (6).] [W.o.e.]

Oven. [Bread; Furnace.]

Owl, the translation in the A.V. of the Heb. words bath-hayya'ānā, yanshūhp, kōs, qippōs, and tilīth. (1) bath-hayya'ānā. [Ostrich.] (2) yanshūhp, or yanshōph, occurs in Lev. 11.17, Deut. 14.16, as the name of an unclean bird. (3) Another kind in Is. 34.10. In the description of desolate Edom, "owl [yanshōph] and the raven shall dwell in it." The Chaldee and Syr. are in favour of some kind of owl, and perhaps the etymology of the word points to a nocturnal

THE SACRED IBIS.
bird; on the other hand, LXX. and Vulg. read ἰδα, equivalent to the sacred ibis (Ibis religiosa) of Egypt. Although the evidence is inconclusive, it favours the ibis, under which title many probably be included the other Egyptian species (I. falcinellus). (3) kōs occurs as the name of an unclean bird (Lev.11:17; Deut.14:16), and again in Ps.102:6, and is translated in A.V. owl or little owl, which is probably correct, the last-quoted text pointing decidedly to some kind of owl, and not improbably to the Eastern little owl (Athene glaucus). one of the “governors” of Bethulia, in the time of Judith (Jth.6.15,7.23,8.9ff.).—2. An ancestor of Ezra (2Esdr.1.2) = Uzzi, 1.3. (Mt.1.9,9) = Uzziah, king of Judah.

Oziel, an ancestor of Judith (Jth.8.1).

Ozn, son of Gad and founder of the family of the Oznites (Num.26.16).

Ozo'ra. [Machnadabeil.]

PAINT

Paaral, “the Arbite,” one of David’s mighty men (2Sam.23.35), probably a corruption of “Naarai the son of Ezbai” (1Chr.11.37).

Padan (R.V. and Heb. Paddan; Gen.48.7, 24; tilled land; Arab. Feddah), otherwise Padan (Heb. Paddan) Aram (tilled land of the highlands), the region near Haran E. of the Euphrates (Gen.25.20,28.2,5,7,31.18,33.18,35.9,26.16,15). [ARAM.] Two ruins called Feddintar exist W. of Haran. [C.R.C.]

Padon, ancestor of a family of Nethinim who returned from captivity with Zerubbabel (Ezr.2.41; Ne.7.47).

Pagiel, son of Ocran, and the Asherite chief at the time of the Exodus (Num.1.13,2.27,7,72,77,10.26).

Pahath-moab, head of one of the chief houses of the tribe of Judah. Of the individual, or the occasion of his receiving so singular a name, nothing is known certainly. But as we read in 1Chr.4.22 of descendants of Shelah, of the tribe of Judah, who in very early times “had dominion in Moab,” it may be conjectured that this was the origin of the name; Pahath being perhaps derived from the Assy. pahanu, “a ruler”; cf. pasha. It may be a slight corroboration of this conjecture that as we find in Ezr.2.6, that the sons of Pahath-moab had among their number “children of Joab,” so also in 1Chr.4 we find these families who had dominion in Moab very much mixed with the sons of Caleb, among whom, in 1Chr.2.54,4.14, we find the house of Joab. That the family of Pahath-moab was of high rank in the tribe of Judah we learn from their appearing fourth in order in the two lists, Ezr.2.6, Ne.7.11, and from their chief having signed second, among the lev princes, in Ne.10.14. It was also the most numerous (2,518) of all the families specified, except the Benjaminite house of Seraiah (7,388).

Pai. [PAU.]

Paint (as a cosmetic). The use of cosmetic dyes has prevailed in all ages in Eastern countries. We have abundant evidence of the practice of painting the eyes both in ancient Egypt (Wilkinson, ii. 312) and in Assyria (Layard’s Nineveh, ii. 328); and in modern times the usage is general. It does not appear, however, to have been by any means universal among the Hebrews. The notices of it are few; and in each it seems to have been considered a meretricious art, unworthy of a woman of high character. Thus Jezebel “put her eyes in painting” (2K.9.30, marg.); Jeremiah says of the harlot city, “Though thou rentest thine eyes with painting” (Je.4.30 R.V.); and Ezekiel again makes it a characteristic of a harlot (Ezk.23.40). The
process is thus described by Chandler (Travels, ii. 140): "A girl, closing one of her eyes, took the two lashes between the forefinger and thumb of the left hand, pulled them forward, and then thrusting in at the external corner a bodkin which had been immersed in the soot, and extracting it again, the particles before adhering to it remained within, and were presently ranged round the organ. The eyes were thus literally "put in paint," and were also injured by the process. A broad line was also drawn round the eye, as represented in the accompanying cut. The effect was an apparent enlargement of the eye; and the expression in Je. 4. 30 has been understood in this sense. The term used for the application of the dye was kōhāl, "to smear," and Rabbinical writers described the paint itself under a cognate term. These words still survive in kōhāl, the modern Oriental name for the powder used. [METALS.] The Bible gives no indication of the substance out of which the dye was formed. The old versions (the LXX., Chaldee, Syriac, etc.) agree in pronouncing the dye to have been produced from antimony. Antimony is still used for the purpose in Arabia and in Persia, but in Egypt the kōhāl is aoot produced by burning either a kind of frankincense or the shells of almonds. The dye-stuff was moistened with oil, and kept in a small jar, which may have been made of horn; cf. Keren-happuch (horn of the paint; Job 42. 14). Whether the custom of staining the hands and feet, particularly the nails, now so prevalent in the East, was known to the Hebrews, is doubtful. The plant, henna, which is used for that purpose, was certainly known (Can. 1. 14; A. V. Camphire), and the expression in 1 Sam. 18. 10 is a corruption of the custom.

**Palace.** The A. V. so renders seven Heb. words. (1) affeḥēn (Dan. 11. 45): the Persian apaṇāna, "palace." (2) ar̂ ṭôn, a "high" building attached to a "king's house" (1 K. 16. 18; 2 K. 15. 25), occurs in 29 passages. (3) bird, a late word (Assyr. bir̂ ṭ hun), in 1 Chr. 29. 1, and in 15 other passages; in Esther, and in Dan. 8. 2, it applies to the palace of Shushan, and it occurs in Aram. (Ezr. 6. 2), meaning a "fortress" rather than a palace. (4) bēḥān (Esth. 1. 5, 7. 8), "the house" or palace of Xerxes. (5) ḫēḳhal, as in Assy., is used both of a temple and of a palace (Akkad. ḫgal, "great house"), including "ivory palaces" (Ps. 45. 8), otherwise "ivory houses" (1 K. 22. 39; Am. 3. 15), or shrines inlaid with ivory. The A. V. renders the word "palace" in 12 other passages. (6) ḥarmōn, "exalted" (Am. 4. 3, R. V. Harmon, as a place-name), cf. No. 2. (7) ihār is rendered palace in Can. 8. 9 (R. V. "tower"); Ezk. 28. 14 (R. V. "encampment"); but elsewhere castle (Gen. 25. 16; Num. 31. 10; 1 Chr. 6. 54) or (Ps. 69. 25) habitation (marg. palace) being always encampment in R. V. The word is common in Aram. and Arab. for a "citadel," and there is no reason to doubt that Moabites and Arabs had fortified buildings early in their history. Solomon's "house" on Ophel (1 K. 7. 11-12; see 3. 1, 9. 24), including a harīm as "an house for Pharaoh's daughter" (7. 8), is described in a manner that recalls the palace of Persian kings at Persepolis, 5 centuries later, as well as Babylonian and Assyrarian palaces, consisting of separate buildings—"porches" or halls—standing in a great court. The relative position of the buildings is however not stated, so that a plan cannot be made. The principal structure (7. 2) was the "house of the forest of Lebanon," measuring 100 by 50 cubits, and 30 cubits high. It was divided into four aisles by three rows of cedar pillars, 15 in each row, and ceiled with cedar planks on cedar rafters. (CIELING.) It had apparently three tiers of windows in the walls. Besides this building there were apparently four "porches" or "façades" (ālām, one (perhaps at the entrance on W.) measuring 50 by 30 cubits, with pillars. A second porch was the throne room, or porch of judgment, in which was the ivory throne (1 K. 10. 17-20). This hall had a floor of cedar. A third hall was in front of the king's own dwelling, which was apparently built around an inner courtyard [Houš]: while a similar building was the harīm with a fourth porch, and probably an inner court. The masonry of these buildings was described in the custom of the day.

**Alternative Diagram Sections of the House of Cedars of Lebanon.**
Palal, son of Uzai. He assisted in restoring the walls of Jerusalem (Neh. 3:25).

Palestina, Palestine. These words appear four times in A.V., representing the Heb. הַבֵּית (Heb. Philistia; Ex. 15:14; Is. 14:29, 31; [JL.4.]) in the last instance the gilibh הַבֵּית, noticed with Tyre and Sidon, clearly represent the "downs of Philistia"; and the word is rendered Philistia in A.V. (Ps. 80:8, 108:9; "Philistines" in 83:7). It was not until about the 4th cent. A.D. that the term was extended to cover the whole coast, divided into three ecclesiastical provinces, Palestina Prima (Judaea and Samaria), Secunda (Galilee, Bashan, and Gilead), and Tertia (Moab, Edom, and the Beer-sheba plains). The name, as applied to Philistia, is used in a text of Tiglath-pileser III. in 734 B.C. It is derived from the bed of Phra, the primitive inhabitants of ancient Cappadocia; but, inasmuch as the whole population of the Holy Land emigrated from E. of the Empirates, it is not inapplicable, though in O.T. the country is only called "the land of Israel," or "the land of Jehovah" (Ho. 9:3), "the glorious land" (Dan. 11:41), and by the later Jews and Christians the "Holy Land" (see Zech. 2:12). It includes about 6,000 sq. m. of Jordan, between Dan and Beer-sheba (113 m. N. and S. by an average of 40 m. E. and W.), and 4,000 sq. m. of the river; to which we may add 800 sq. m. of the Tiber plateau (the hot of Simoes) on S.W. of Tiberias, 1,800 sq. m. of the mountains are about the height of the Welsh mountains. The whole area is only a third of that of Syria immediately N. of Palestine, and the possession of Syria has historically been always followed by the submission of Palestine.

Geology. To understand the climatic and natural conditions prevailing in ancient Palestine, it is very necessary to have a clear idea of the geological history of the country. The floor on which it was built is the granite and porphyry crust which is so conspicuous on the surface in Africa, but which only appears in the great group of peaks at Sinai, rising to 8,580 ft. above the Red Sea, and farther E. in S. Edom (1,200 ft.). The carboniferous and yet earlier formations are not found in Palestine near the surface, but are represented by the "desert sandstone" and limestone, under the Tih Plateau in N. of Sinai. In the Chalk age Sinai seems to have stood up as an island in the ocean, when the great limestone beds were deposited above a later sandstone (usually called "Nubian sandstone") under the waters.

The upheaval of these beds appears to have begun in the Eocene age, during which a soft chalk bank of bands of chalk was deposited, and above this again a limestone full of minute nummulites, which distinguish it from the main beds of the Chalk age—characterized especially by their presence of hippurites and ammonites. In Palestine the Nubian sandstone on the lower slopes of Edom, Moab, and Gilead, and on the W. side of Hermon and Lebanon. The limestone of the Cretaceous age includes lower beds of meldeh, a somewhat soft but inmeasured and white stone from which the temple walls were built, and upper beds of hard dolomite easily worked; while the porous Eocene chalk forms districts throughout the country, in which the water sinks through to issue on the surface of the mezzeh. The nummulite limestone is found high up in patches, on Olivet, Gerizim, and Carmel, and is specially developed in the W. and S. parts of the Tih plateau. When the upheaval was ended, two long parallel ribs (represented by the lines of Lebanon and Anti-Lebanon) stretched S. from the Taurus, divided by the sea along the line of the Orontes (Jordan), and Jordan Valley, of which the N. side is the Tih or Dibon, the S. side of the Dibon, the Cretaceous strata on the W. were broken off the watershed beds, and fell E. sloping towards the sandstone wall. The old valley level of the early Moaene age is represented by the Jesurun plateau, and by the corresponding terrace E. of the Dead Sea. In the Pluvial age (including the glacial period), when the climate of Palestine resembled that of Britain, a great lake was formed, with beaches about 600 ft. below the Mediterranean level, and stretching from S. of the Dead Sea to N. of the sea of Galilee, a distance of 200 miles. The beaches are best seen at Jebel Usaid, on S.W. shores of the Dead Sea, and at the Medim a'Abd, N. of Jericho. The mollusks and the fishes of the Jordan Valley then developed into peculiar lacustrine species, and the valley sank, volcanic outbreaks accompanied the successive consolidations, and covered the plains of the Jaulan, of Bashan, and of Trachonitis with basaltic lava. Similar outflows occurred N. and W. of the sea of Galilee; and the basalt is found in the plain of Esdraelon and also W. of Carmel. In the S., however, it is found only E. of the Dead Sea
and in Edom and the Sinaite peninsula. Hot springs then appeared in the Jordan Valley; and this volcanic action, which formed the volcano craters of the N.W. Jaulan, is even now not quite exhausted, recent earthquakes in the valley having been accompanied by a sudden rise in the temperature of the baths S. of Tiberias. With the gradual change of the climate, after the Pluvial age, the great lake shrank until it was only represented, as at present, by the smaller sheets of the Huleh, the Sea of Galilee, and the Dead Sea. The result of these upheavals and subsidences, throughout long geological ages, has been that Palestine presents a fauna and a flora ranging from the Alpine to the tropical, including many European species, but also others (like the sunbirds of Jericho and Jaffa) distinctively African, and species (such as the coracias, flycatchers of those of the open vales). But, broadly speaking, Palestine has remained the same from the dawn of history, in climate and in natural conditions. [Agriculture.—Natural Features. These will be easily understood on the basis of the above geology. The mountain range of W. Palestine is a continuation (S.) of the Lebanon. The watershed throughout is nearer to the Jordan Valley than to the Mediterranean; abstract of the high mountains being of hard dolomitic limestone, while the W. spurs are of the chalky Eocene stone. Tabor and the hill Moreh (a volcanic peak) are outliers of the Nazareth highland; and Lower Galilee, which forms mainly of the Eocene limestones. [Galilee.] S. of Moreh, near Jezeel, the watershed is only 200 ft. above the Mediterranean, and then follows the range of Gilboa. The triangular plain of Esdraelon, drained by the Jordan, is bordered on W. by the long spur which ranges in altitude, at its base, in the promontory of Carmel. The base of this plain, along the S. slopes of the Nazareth mountains, is 12 miles long E. and W., and the apex at Jenin is 14 miles S. of the base: the average elevation is some 300 ft. above sea-level. The watershed runs S. to Enar and Gerizim, and then by Baal-Hazor, which rises 3,318 ft. above sea, and to the E. are small plateaux and rugged slopes, where the strata fall towards the Jordan Valley; on the W. are long spurs, running to the plain of Sharon. Here again the dolomite appears in the higher mountains, sometimes capped with the Eocene chalky limestone of Carmel, and other times in the strata of the sea. The chert bands in the Eocene chalk are particularly observable in the long spur N. of Samaria. The rugged and barren appearance of mount Ephraim is due to the dolomite, which forms bands (as in the Nicosia limestone of Italy), called in O.T. the "stairs" (Can.2.14), where "in the clefts of the rock," the wild dove makes its nest. The watershed of Benjamin, near Bethel, is equally rocky and barren, and to E. the rugged slopes form a desert above the lower Jordan Valley. Near Jerusalem the grid falls to about 2,500 ft. above the sea, and the Eocene chalk here covers the mezzeh dolomite on Oliver, which is capped by nummulitic limestone. Hence the only spring at Jerusalem is found in the E. valley [Kidron], the shed passing W. of the city, which stands on the slopes immediately E. and appears to slide downwards towards the Kidron. The Bethlehem spur runs out E. from the mezzeh dolomite on Oliver, like Olivet. The shed again rises to 3,000 ft. above the sea near Hebron, the mountains from Arabia, as the Akkadians fetched it 2,000 years before; and, on Carmel and elsewhere, the copse has even encroached on ancient vineyards, whose presses and towers are found amid a tangled growth of dwarf oak, lentisk, and hawthorn. The region round the sea of Galilee was fever-stricken in the time of our Lord, as it still is: the decay of ancient irrigation works has made parts of Sharon perhaps more miserable than of old.
being still of hard limestone. The mountain block is then split up by valleys running parallel to each other and almost at right angles to springs sinking into the Mediterranean near Beer-sheba, where the Tih plateau [Paran] begins, rising S. to about 4,000 ft. above the sea at the great descent to the desert N. of Sinai. In Judea, W. Palestine measures 50 miles from the Mediterranean to the Jordan, and is divided across its four regions: (1) the plain (sâdîk) of Sharon and Philistia, widening from 5 miles (E. and W.) near the Zerqa, or "Crocodile River," S. of Carmel, to 15 miles at Gaza; (2) the shephîdî [shepha] or foot-hills, formed of Eocene chalky limestone; (3) the mountains (hâr), of hard limestone and very rugged; and (4) the Jezirun, or desert of Judah— a plateau 5 miles broad, about 2,000 ft. above the Dead Sea level and 2,300 ft. below the main watershed. Long sharp ridges of chalk run E. and W. in this desert plateau, and no water occurs on the surface. Grass is found in spring, but it is one of the desolate regions in the country. On W. of the Hebron mountains the three great valleys of Ziph-thaïm, Elan, and Sorek enumerated from S. to N.—all alike at first run N., and then turn W., so that the shephîdî is separated by them from the mountains. Springs occur on the surface of the mountains, in open areas, and at their foot-hills; but the chalky shephîdî depends mainly on wells, yet is a district full of corn and olive-groves, about 15 miles wide E. and W. on the average. The maritime plain is a rich cornland, with rolling downs of calcareous limestone, and with shore dunes of blown sand from Acco to Gaza; low cliffs of the limestone occur in places along the shore under the dunes.

Palestine so described is separated from E. Palestine by the Jordan Valley and the Dead Sea. E. of the river the plateaux are of different levels, that of Bashan being on an average 1,500 ft. above the Mediterranean, and that of the Moab plateau (mishor) averages about 2,700 ft. above the Mediterranean, while the terrace above the Dead Sea is the counter-part of the Jeshimon W. of the same, both representing the bed of the early Miocene gulf which ran up far into Syria. The regions thus described are named in O.T. by terms which show them to be unchanged in character and position, such as hûr, "mountain region": mishor, "plateau": midbibh, "desert": shephîdî, "lowland": glibbîth, "downs": sâdîk and sharon: "plain": q'meg, a "deep valley": nabhal, a "water torrent": buq'd, a broad "vale" between mountain chains; gây, a "ravine." The water supply— including the Jordan, the Kishon, the Jabbok, the Behus [Sihon-Libanah], the Crocodile River (Zerqa) which flows to the sea just S. of Carmel, and which is the only place where crocodiles are found in Palestine, with the Mej-jarkon, N. of Joppa—is equally unchanged. Several other streams unnoticed in O.T. water Sharon, and brooks occur in Gilead [Jaazer; Ashdot-Yishai] and Zered, and Nahalil, flowing into the Dead Sea. In the regions where the dolomitic limestone is on or near the surface there are natural supplies, called "ayin, "spring": ëbôm, "depth": gâl, "stream": ëdphîgh, "brook": or mdqor, "source," in O.T. [Fountain; River].

The known valleys occur in well-defined courses, of which the Eocene chalk is artificial, and O.T. mentions it under the name bêtîr, "well," and ëbûr, "cistern." [Well; Cistern.] The wells, as at Beer-sheba, Shechem, Sirah, etc., are spring-wells sunk to the surface of the impervious strata, through the chalk, or shallow excavations (Arab. hâlîrah) in the beds of torrents; whereas the cisterns are artificial reservoirs for the rain water, while the ëbîkîh (or pool) is an open tank. [Pool; Pond.] The straight Palestine coast presents no natural harbours of any importance. The coast road of Carmel branches to the bay of Haifa from the S.W. winter storms, but the haven does not appear in history as a port. The reefs at Acco and Joppa were dangerous in winter, and the harbour of Caesarea was artificial; at Janneel, Ashkelon, and Gaza there are merely landing-places, and the one of Joppa was equalled by those of Tyre and Sidon. The natural highways of the country formed the trading routes and lines of advance for armies, since no roads, properly so called, were made before the Roman conquest. One of these highways (followed by Rameses II. in 14th and Saul in 10th cent. B.C.), and by Crusaders in 1099 and 1191 A.D.) led along the shores of the Mediterranean; another—now the Hâj route from Damascus towards Mecca—ran over the plateaux of Gilead, Moab, and Edom, descending to Elath. It was this route that the Israelites struck somewhere S. of the J糁dal-chiefine corries, and which continued N. from Damascus to Tadmor, and thus easily reached Hamath and Tiphashai. But the great trade route from Egypt to Car-chemish followed the plains of Philistia and Sharon to a point N. of the latitude of Samaria, where the great valley now called Wady Selbab (the long) gave access through the lower hills S. of Carmel, to the little plain of Dothan, which is a branch of the Esdraelon Plain S.W. of Jenin. It was on this line that the Ishmaelites from Midian journeyed in the time of Joseph (Gen.37.25), and the armies of Thothmes III. and of Jeho. followed the same route. At Jenin it divided into two, one road skirting the Esdraelon Plain on W., past Tanacu to Acco and Phoenicia; the other skirting the same plain on E. past Jezreel and descending by the valley of Jezreel to cross the Jordan at Beth-shara. A difficult ascent then led to the plateau of Golani; but, after this, the road lay in plains to Damascus (which formed the base for advance on Syria), thus avoiding the high mountains of Upper Galilee, and the Lebanon, which was impassable until the Eleutherian Valley was reached by the shore route. Natural Resources. The writer who
spoke of Palestine as "a land whose stones are iron, and out of whose hills thou mayest dig copper" (Deut. 8:9) no doubt acquired with the Egyptian mines in Sinai (Paran); and commerce speaks of copper ore coming from S.E. Edom. The sandstones in S. Lebanon are impregnated with iron ore, and iron was well known in W. Asia in the time of Moses (see Amarna tablets, Berlin No. 25), and to the Akkadians yet earlier, while the Egyptians called it by its Semitic name in 11th cent. B.C. (Diodorus Siculus, 8:47). In the mines above Beerith. But Palestine never appears in history as a country famous for its mines, and the Phoenicians got copper from Cyprus and iron from Asia-Minor. [TARSHISH.]

The riches of Palestine were mainly agricultural, and the climate—which resembles that of Sicily—was more favourable for a variety of cereals and fruits than that of either Egypt or Babylonia. [AGRICULTURE.]

The fauna and flora present a remarkable range between 10,000 ft. above the sea and 1,300 ft. below it. The woods do not have been thinned, but the trees and plants of the Bible are all still found in Palestine. The oak and the cedrel are often as single trees, as does the sycamore-fig. [Jericho.] The carob [Husks] is another of these solitary trees, which are generally sacred to the Fellahin. The stone-pine (Sinobdr) is native and, and—though mentioned in the Talmud—bears a Gk. name; but the native fir (Pirus carica) forms a wood of Hames. It also occurs also on Carmel. The poplar, common near Damascus, is only found in Palestine proper in any numbers at the Jordan source. The plane (dibl) occurs often, near springs thence named. The palm is found at the mouth of the Kishon in a grove, and also at Gaza; it flourishes in the deep gorges of the Dead Sea, and was cultivated near Jericho in the time of our Lord, but in the mountains it very rarely occurs (as a cultivated single tree in the cities). The acacia, the tamarisk, and the white broom [Juniper] are desert trees and shrubs, found in the Jordan Valley, Moab, and the desert of Assyria and Babylonia. Almond also occurs on Carmel. The chief bushes in the copse, on the hard limestone, include dwarf oak, mastic [Stacte], hawthorn, arbutus, and occasionally the "oil-tree," or wild olive (azzin), and myrtle. The oleander along river banks grows to the size of a large tree at 'Arad el Emir in Gilead. The apple is cultivated on Lebanon and at Jaffa. El Muqaddasi (985 A.D.) speaks of "excellent apples" at Jerusalem. The vine flourishes best in the mountains, where the heat of the sun, reflected from hard rocks, ripens the grapes, which are swelled by the autumn mists. The olive, on the other hand, though found in the mountains and on the plains, prefers the Eocene chalk of the shephald hills. The almond and pomegranate occur when cultivated, and the mulberry appears to have been also an early cultivated tree, now found in gardens, especially at Shechem. The wheat (Aeg. sp.), barley (avena), and the "double nut" may also have been known early. Among plants, the Egyptian papyrus is found both at Gebal and in the Huleh swamps, as well as the Syrian species. The bare mountains of Samaria are covered with thyme, mint, and the prickly bellan (Poterium spinosum), a rosaceous shrub. The marjoram grows in the plains (Hyssopus officinalis) and the cumin (Lepidium) and crocus are common flowers with the narcissus [Sharos]. In spring the Jordan Valley and the Sharon Plain are carpeted with flowers, among which the red pheasant's eye and the pink phlox are conspicuous, with yellow marigolds and cyclamen. The strawberry and winter flowers are particularly common in the plains. The gum-traganacalm and balm (Gen. 13:25), honey, styrax, pistachios, and cistus, with the almonds, noticed in Gen. 33:11 as sent to Egypt, were all native products of Palestine. Solomon's bride (Can. 1:13,14) says: "My beloved, I have a bunch of myrrh lying in my breast. O S. of Carmel! to me as a cluster of henna in the vineyards of En-gedi." The henna plant (Lawsonia inermis) is still found as a fragrant shrub, used for painting the nails and palms, and grows at En-gedi. In the time of our Lord it was cultivated near Jericho. [CAMPFIRE.] The fauna of Palestine is unchanged, like its climate, since the time of the Amarna tablets, for the extinction of the lion and the unicorn (v'lm, or "wild bull"); the bones of both have, however, been found. The leopard (niur) is still known in the Jordan Valley, with the wolf. Foxes, jackals, hyenas, and wild boar are found in the uncultivated districts, and the "coney" common in the rocks of the desert of Judah; but the bear is now only known on the summit of Hermon. The wild ass, the ostrich, and the ibex are confined to the Syrian desert, but antelopes, fallow deer, and the roebuck (Kose) are known in W. Palestine, and the ibex occurs in large droves near En-gedi (Isam. 24:2). The buffalo (in the Zeraq swamps), cotton and silk, which were brought by the Turkmans to Palestine in a later age, and the cat was in like manner introduced after Bible times. Mules are never mentioned in the Pentateuch (see R. V. in Gen. 36:24), but David had one (I.K.1.33), and they appear as pack animals on is. The ass and the horse, on the other hand, were known very early. In like manner domestic fowls are unnoticed in O.T., though known in the time of our Lord (Solomon's "fatted fowl" (1K.4.23) were "geese"—as in Egypt—according to the Targum); and while flax is mentioned in the Pentateuch, cotton and silk, which became known in the Persian age—are unnoticed in the Law. The peculiarities of the Jordan Valley fauna have been noted already. The sea of Galilee now contains many species of fresh-water fish. Among insects the wild bee (Apis fasciata) may be mentioned with the cochinial insect (16.7.18), which feeds on the Sycamore fig in but is fed on the cactus—a later introduction into Palestine. Snakes and scorpions are common, with occasional locust swarms. The birds noticed in the Pentateuch (Lev. 11; Deut. 14) are sea and desert birds. The heron is still found, and the pelican in the Zeraq swamps, on the Mediterranean, with the cormorant. The stork visits the Jordan Valley in spring, on its way N. The "lapwing" is not uncommon,
but the bird intended is clearly the hoopoe, which is often seen. Birds of prey are numerous, including eagles, kites, hawks, vultures, crows, and jackdaws, with great and small owls. The game birds include the Greek partridge and a small desert species, with quails, and (in the S.deserts) the ptilain grouse; woodcock are found in the woods of Lower Galilee. Wild doves and pigeons, swallows, cranes, sparrows (including the Passer montanus) are numerous in the wilds, with the beautiful black grackle of the Jordan Valley. The bee-eater, roller, and migratory hawk are conspicuous in the plains in spring; and sunbirds have found their way from Africa to the Jordan Valley and to Jaffa. The "Badger Marks" of the Bible (Ex.26:14) are probably the hides of the porcupine—common in the Red Sea and Mediterranean; but seals (perhaps from the Black Sea) have been found off the coast of Palestine. The wild sheep—perhaps the "Chamois" of A.V.—is now only known in Cyprus, but appears to be the kou of the M.L.; it is mentioned in Lebanon, where it was probably still in the time of Pliny—in the river S. of Carmel; but Behemoth is not known in the Jordan Valley (see Job 40:23). Modern scholars (for this view, see BEHEMOTH; NIM) follow a late Coptic translation in identifying this "beast" with the hippopotamus, which could only have been known in Egypt; but the latter does not feed in the mountains, it has not a "tail like a cedar," nor a "nose to destroy snares. Buxtorf and the A.V. margin are therefore perhaps more correct in pointing to the elephant, which existed on the Euphrates in 16th c. B.C. Ivory is not uncommonly found in excavations both in Palestine and in Phoenicia: the "Jordan" drunk up by Behemoth was, however, probably some "great river" outside Palestine. [JORDAN.—Inhabitants. The first known inhabitants of Palestine were migrants from Mesopotamia, at least 3500 years B.C. They were race-frontiers—the Akkadian or Mongol, and the Aramean or Semitic, stocks. The former race was found to a late period (600 B.C.) in Syria, and their earlier presence in the S. is indicated by the occurrence of their syllabic emblems on the pottery of Lachish and Gezer. [Weitrose.] The latter race must have been present before 1600 B.C. (and probably much earlier), since the nomenclature of Palestine—in the lists of Thothmes III.—is Aramaic at this date; while, a century later, the Babylonian language was used by the chiefs of Palestine writing to the Pharaohs. We are informed in 11th (Gen.10:6-19) that the early inhabitants of Canaan, or W. Palestine, were of the race of Ham, to which also Uzru belonged, including the earlier Babyloniains. But some of the tribal names are clearly Semitic, indicating the same mixed population found historically, as early at least as 2550 B.C., in Babylonia. The terms Amorite (probably "highlander") Canaanite or "lowlander," Hitite or "tribesman," Perizzite or "villager," are descriptive Semitic terms, though the names of the Hittite, Jebusite, and Girgashite appear more probably to be Mongol (see Gen.15:19-21); and these seven nations were the inhabitants of Palestine whom the Hebrews slaughtered. There is no indication in the Bible of the Arvian tribes [RACES] in Palestine; for even the Philistines were Semitic, according to both the monumental evidence and O.T. Fair tribes from the N. invaded Palestine in the 14th c. B.C. on their way to Egypt, but were driven back. Early pottery at Lachish and Gezer resembles that of Phoenicia, but the suggestion that this proves the presence of civilized Aryans leaves out of account the fact that this pottery is also found in N. Syria and Cappodocia. It is marked with signs of the Hittite syllabary; and, far from proving the presence of settled Hellenic tribes, it indicates that they (as is well proven by other evidence) took originally all their civilization from the Mongol and Semitic populations of Asia Minor and Syria. The first indication of the presence of Aryans settled near Palestine is found in the names of Greek kings in Cyprus; and soon after the Persians became rulers of W. Asia, Gk. influence was felt in Palestine, possibly as early as the 4th or 3rd c. B.C. at earliest. The Hebrews never succeeded in quite exterminating the old Canaanite population, which, after the fall of Samaria in 721 B.C., was reinforced by fresh Aramaic colonists from Syria and Mesopotamia. In Philistia from c. 2000 B.C. there were very probably an Egyptian element; and we are told that Hittites (who were clearly not Semitic) dwelt as far S. as Jerusalem and Hebron in early times (Gen.23:3,27,49,36:2; Ezek.16:45),—statements which there is no reason to doubt, though the Hittites were driven N. by Thothmes III. from Megiddo. The modern Fellahin appear still to present a considerable Aramaic element, mingled with later Arab blood no doubt, but very distinct from pure Arabs, and much resembling the population of Palestine as represented on the "Black Obelisk," on Sinacherib's picture of Lachish, or on the base of Ashurnasirpal. There are now several races representing the tribes of Palestine and Syria. A Gk. population—probably from Egypt—is indicated by inscriptions found in Philistia, but this refers to the 2nd c. B.C., and the earlier texts of Bashan show a Gk. element mingled with Aramaic and Arab stocks somewhat later. The Moslem invasion of 637 A.D. added a strong N. Arab element, which—in Moab—has been reinforced in quite recent times; but the pure Arabs of the upper class are very different in type from the Assyrian-looking Fellahin, or ploughmen, who are the peasantry of Palestine. In the Middle Ages the Turkmans, who are numerous in Syria, migrated S., and Turkmans tribes still exist in the plains of Esdraelon and Sharon. A few Circassians in Bashan and Gilgal, and Bosmans at Caesarea, have been established within the last quarter of a century. The Turks are only represented by officials, some of whom also are Kurds: the Franks have left no impress on the population, though colonizing Palestine for two centuries (1100-1291 A.D.). Among the Christians there is much modern Greek and some Italian blood. German colonists live at Jaffa and at Jerusalem. Finally the Jews mostly

John Thacker & Co, England
from Poland and Russia—have gradually increased in numbers since 1881, and, in the cities and agricultural colonies, are now said to amount to 80,000 souls, out of a population which does not exceed 600,000 in W. Palestine.

_Divisions._ The earliest description of definite boundaries in Palestine is found in the book of Joshua, which gives an account of the tribe boundaries, clearly written by one who had an intimate acquaintance with the whole country. These boundaries have been described in detail under the names of the tribes; but the following summary of areas and populations will show the distribution of the Hebrew population, according to the capacity of various districts to support a greater or less density of inhabitants: for Josephus rightly remarks (5 _Ant._ i. 21) "that one acre of some sort of land was equivalent to a thousand other acres."

The total of 601,730 grown men represents a population of about 3 millions in 10,000 square miles (allowing for unconquered land), or 300 persons to the square mile, which is three times the present sparse population, and intermediate in density between the present population of Egypt and the Roman population of Italy. But the distribution of the density of the population of the Roman empire in the 2nd cent. A.D., and the evidence afforded by ruins of that age in Palestine—often representing ten ruined sites for one inhabited village—it cannot be said that there is anything incredible in the number of the O.T. population. (E.g. 24:9) applied only to Israel when settled in Palestine. They would allow of an additional Canaanite population in regions like Philistia and Bashan, which were only conquered in part before the reign of Solomon. They represent a density proportional to the character of the country occupied, ranging from perhaps 50 persons per square mile in the deserts to 1,000 persons in the thickly populated rich lands of Lower Galilee, which had also a thick population in the time of our Lord (judging from the number of ancient villages), and which is still very fully inhabited. The more rugged mountain regions had an average population of about 250 persons per square mile. This calculation supposes an average of 5 persons for every grown male, which is perhaps rather in excess than otherwise.

The next account of the division of the land of Israel occurs in the time of Solomon (1 K. 4:27-19), when twelve officers were appointed, each to have 1,000 men, to supply the king, each for a month, or about 8 per cent. of the total produce. These twelve districts appear to answer to the twelve tribal lots, enumerated in the following order: 1. Ephraim, 2. Dan, 3. Judah, 4. Manasseh W. of Jordan, 5. Issachar, 6. Manasseh E. of Jordan, 7. Gad, 8. Naphtali, 9. Asher, 10. Zebulun (probably in part, though the text reads Issachar), 11. Benjamin, and 12. Reuben. Simeon is not noticed, as the tribe was broken up in the time of David (1 Chr. 4:31) and the negheb or "dry land" round Beer-sheba, was also not capable of furnishing the supplies (1 K. 4:22-23) which Solomon received. After Solomon's death the country was again divided into two kingdoms, of which Judah (about 2,000 sq. m.) was much smaller than Israel (about 6,000), since it appears that—at least in the time of Ahab—all the country E. of Jordan except Bashan belonged to the northern kingdom. The boundary did not exactly agree with the old border of Benjamin, since Bethel was held by Jeroboam, and even Ramah, farther S. by Baasha of Israel (1 K. 15:17); and for this reason the term "mount Ephraim" was extended in this age beyond the tribal limits. ([Ephrahim.] Gibeon (1 K. 16:1-17) also appears to have been claimed by Israel, and, in the W. by Bethel. This border between Judah and Samaria was apparently unaltered till 146 B.C., when the acquisition of three "toparchies" on the N. pushed back the Samaritan border to the line occupied in the time of our Lord. (I Juadea.) The three provinces of Judaea, Samaria, and Galilee, first mentioned in the 2nd cent. B.C., were fairly even divisions though Galilee was the largest and Galilee the smallest. E. of Jordan there were two provinces in the Herodian age—namely, Bashan and Perea—and the ancient land of Israel was then divided into three "tetrarchies" on the death of Herod the Great. Archelaus, receiving Judaea, Samaria, and Idumaea, whilst Herod Atticus held Galilee and Perea, and Philip ruled Bashan and Abilene. With the later Christian division of Palestine, with that of the 12th cent. into jiefs, and with the modern Turkish districts, we are not here concerned.—History. The Bible history of Palestine begins with Abraham's journey through it on his lengthened stay in Ur of the Chaldees, and its story is that of the three wars of it with its neighbors in Syria; but it appears that the Hebrew family of shepherds found the country already in possession of a settled and civilized population. Whether this civilization was as old as the time when Sargina, the "founder king" of Chaldea, who reigned "after the Flood," conquered the W. to the Mediterrean (Syras), is ages has not been known. A later Semitic ruler of Mesopotamia (supposed by the Babylonians of the 6th cent. B.C. to have been Sargina's son) was named Naram-Sin, and is said to have fought in Magan (or Sina), which suggests that he also held Palestine. The famous Hammurabi, the sixth king of Babylon (2150-2044 B.C.), was identified by Rawlinson with Amraphel (Gen. 14:1) as a contemporary of Abraham, and we are told that he invaded Palestine while yet under the suzerainty of Elam—that is to say, before the 30th year of his reign. That the country should then have contained cities and merchants, asphalt and tar, is not astonishing, since we have become ac
quainted with the very complete civilization of Hammurabi's empire. His power very probably extended over all Palestine; for, earlier than his time, the Asiatic emigrants had overrun the Nile delta as Hyskos, or shepherd kings. Amraphel's raid on E. Palestine led through Bashan, Gilead, and Moab to Kadesh, and back by En-gedi to the Jordan Valley, and thence to Damascus. The Babylonian supremacy was lost, however, when his dynasty decayed, and about 1700 B.C. the first king of the 18th Egyptian dynasty appeared on the S. frontier at Sharuhen. Early in the 16th cent. B.C., after his first great victory (Megido), Thothmes III. conquered all the lowlands along the trade route to Damascus. His list of 120 towns in Palestine does not include any beyond Jordan, except in Bashan, or any in the high mountains of Ephraim and Judah; but among the most certain items in the enumeration we find (as detailed under their proper headings) such places as Megiddo, Dothan, Rabbith, Damascus, Edrei, Abel (of Decapolis), Pithom, and Kadesh. Lachish, the Amarna [Zaphon], Canaan, Asheroth, Hazor, Chinnereth, Adana, Kishion, Shunem, Misheish, Achshaph, Taanach, Bileam, Qedesh (of Issachar), Anaharath, Ophel, and Nekeb, in Bashan and Lower Galilee; while, farther S., the list includes Joppa, Lod, Ono, Shochah, Naarah, Adullam, Saphir, and Aroer, Lebath, Rehoboth, Anim, Carmel, Rabbath (of Judah), Sharam, En-gannim (of Judah), and Gibeah, also of Judah, thus including the shephelah on E., and the neghebeh on S., as well as the Philistine plains. These towns were held by forces of chariots which could not reach the higher mountains; but in the time of Amos and Hosea, and the days of Saul and David, they had been reduced to the power of the Philistines, and Judah maintained a diminished independence till the fall of Damascus in 732 B.C., when the first Heb. captivities were taken by Tiglath-pileser III. from Gilead and Galilee. The fall of Samaria occurred only 10 years later, and the Assyrians, in 702 B.C., fought their way along the plains to the borders of Egypt. It is interesting in this connexion to note the Assyrian records of the numbers of the Hebrews in this age. Thus from Samaria Sargon took 27,280 captives, and Sennacherib, attacking the western towns of Hezekiah, claims to have taken 209,170 prisoners, when the "diminished kingdom" of Jerusalem, after his conquest of Joppa, Bence-berak, Azur (Yazir), Tinnah, and Eltekeh, besides Ekron and Ashkelon. Through defeated by Tirhakah, who seems to have followed Semacherib far N., the Assyrian monarch, after taking Lachish, received tribute from Hezekiah; and Manasseh was also tributary to Esar-laddon and Assurban-pal. But the fall of Jerusalem was not accomplished till it was taken by Nebuchadnezzar in 588 B.C. Palestine then passed successively under the power of the Persians, after 538 B.C., and of the Macedonians, after 332 B.C.; and great as was the religious im-

Merenpath (or Menephtah), the next Pharaoh, was attacked in Egypt by tribes coming from the far N. He repelled them and, according to his own account, followed their fate far N., as Canah, near Tyre. In this record occurs the first allusion to Israel—"The people of Israel is ruined, it has no seed." These events belong to the days of the Judges, who from time to time rose to repel the tyrants, from Egypt and from Mesopotamia, who afflicted the Hebrews. It is notable that their history relates almost entirely to the mountain country, and that the plains were held by Canaanites having forces of chariots and by Philistines under petty kings. These probably still acknowledged the Pharaoh as their over-lord. From 1400 to 1000 B.C. Assyria and Babylon were engaged in a struggle for supremacy. E. of the Euphrates, and after the time of Ramses III. Egyptian power also began to decay; so that the age of Saul, David, and Solomon was one in which it became historically possible to find an independent Hebrew monarchy. As at the same time the western age we have as yet no monumental records, since neither Assyria nor Egypt had any victories in Palestine to boast. It was only after Solomon's death that Shishak of Egypt (c. 960 B.C. or a little later) was able to make a list which probably represents at least 100 towns conquered by him, mostly in the lowlands. The monument is in a very ruinous condition, but the more certain names include Gaza, Megiddo, Rabbith, Taanach, Shunem, Haphraim, Gibeon, Beth-horon, Ajalon, Makkedah, Jehud, Ono, Elion, Keila, Shocoh, Migdol, Aroer, Gihon, Anim, Adoraim, Arad, Beer-sheba, Beth-anath, and Zoor, showing that Shishak conquered the mountains of Judah, while the last known name (Itra, etc.) is believed by Maspero to stand for "Jerusalem," which we know to have been spoiled by Shishak (1 K. 14:25), whose conquests were even more extensive in Galilee: than we should have gathered from the lists of the Egyptians. All these invaders from the N. and Judah maintained a diminished independence till the fall of Damascus in 732 B.C., when the first Heb. captivities were taken by Tiglath-pileser III. from Gilead and Galilee. The fall of Samaria occurred only 10 years later, and the Assyrians, in 702 B.C., fought their way along the plains to the borders of Egypt. It is interesting in this connexion to note the Assyrian records of the numbers of the Hebrews in this age. Thus from Samaria Sargon took 27,280 captives, and Semacherib, attacking the western towns of Hezekiah, claims to have taken 209,170 prisoners, when the "diminished kingdom" of Jerusalem, after his conquest of Joppa, Bence-berak, Azur (Yazir), Tinnah, and Eltekeh, besides Ekron and Ashkelon. Through defeated by Tirhakah, who seems to have followed Semacherib far N., the Assyrian monarch, after taking Lachish, received tribute from Hezekiah; and Manasseh was also tributary to Esar-laddon and Assurban-pal. But the fall of Jerusalem was not accomplished till it was taken by Nebuchadnezzar in 588 B.C. Palestine then passed successively under the power of the Persians, after 538 B.C., and of the Macedonians, after 332 B.C.; and great as was the religious im-

PALESTINA, PALESTINE
portance of the return from captivity, politically it was of small interest, until the tyranny of Antiochus IV. (170 B.C.) led to the great religious revolt under Judas Maccabaeus, which finally secured some measure of Hebrew freedom, till Palestine was conquered by Rome under Pompey in 63 B.C. The successful reign of Herod the Edomite (37 to 4 B.C.) was soon followed by direct Roman rule, until the great revolt was brought about by the bad government of Nero, and Judaism (in 70 A.D.) was crushed beneath the feet of the image of iron and clay. Even later, in 135 A.D., a vain attempt to recover Hebrew freedom was stamped out by Hadrian at Bether (Bittir), close to the ruined Holy City on the S.W. After this the Jews under the tolerant rule of the great Antonines appear to have accepted the inevitable, and settled down as Roman subjects. With the later history of Palestine we are not here concerned, but the great epochs date from the Moslem victory on the Yermiḥ in 637 A.D., the Seljuk conquest of 1099 A.D., and the loss of Acre to Christendom in 1291 A.D. The country then became an Egyptian province, till conquered again by Turks in 1518 A.D. Palestine in the time of our Lord was enjoying a period of comparative peace and prosperity, before the final struggle with the Moslems. The conflict of 1831-41 is that of the Hamedan period. The ancient system represented by the temple of Jerusalem. It was thus destined to become the Holy Land of Jew, Christian, and Moslem alike. The words of Jesus were, to the teaching of Shammal, what the quiet beauty of the dove-haunted woods of Galilee is to the rugged and barren mountains that stand round stony Jerusalem—the last stronghold of Rabbinic formalism. The fall of the city in 70 A.D. broke the last link that connected the Christianity of Greece, Italy, Egypt, and Asia Minor with the more rigidly Jewish Christianity of St. Peter in Palestine.—Antiquities. The temple of Jerusalem, represented by a few monuments of the Hellenistic period, excavations dates from the mining of Jerusalem by Warren in 1868. It was not until 1890 that any serious attempt was made to excavate other towns, since when Lachish, Gath, Taanach, and Gezer have been examined, as detailed under those headings. Survey of the country (1872-1882) naturally preceded the selection of such sites, and added some 150 Bible names to the 300 (out of a total of 600) previously known. Even now we are only at the beginning of excavation; and important places such as Caesarea, Samaria, and Herodium remain untouched, while Moabite texts may still await the spade in Heshbon and Dibon. But what has been already accomplished has revolutionized our ideas as to the civilization of Palestine from the time of Abraham onwards. The majority of the ruins are naturally of later ages, representing the work of Romans and Byzantines, Arabs, Crusaders, and later Moslem Khilifs of Egypt. But deep down in the mounds of ancient cities we now find evidence of the high civilization of Amorites, Canaanites, and Philistines, and later remains of Hebrews and Greeks. The oldest structures are probably the rude stone monuments—dolmens, menhirs, and circles—found in such numbers E. of Jordan [Dan; Tob; Moab]; for though they might be of almost any period, yet the discoveries at Gath and Gezer point to their Canaanite origin c. 2000 B.C. It is remarkable that while they have remained untouched on the surface, at places like Zoaar and near the Jabbok, or at Mizpeh of Gilead, only a few stray examples have been found, probably by the sea of Galilee), suggesting that they represent the macebblōn, or "erected" stones, which Israel was bidden to "overturn." Here and there a group of stones has been found in W. Palestine, thought to represent a fallen dolmen; and the law was at least carried out in the days of Hezekiah and Josiah, whose power did not extend to Moab or to N. Galilee, where these monuments escaped. They are mentioned in the Mishna (Aboda Zara iv. 3) with the sacred trees and other objects of idolatrous worship. The Arabs regard them with superstitious awe, and call the dolmens "ghous' houses." They are somewhat like the stones we have destroyed them. Besides these monuments, the bronze and pottery teraphim of the Canaanites are commonly found in the lower strata of excavated sites. The recovery of the Amarna tablets in Egypt (in 1887) proved the high civilization of the Canaanites, who wrote in cuneiform and engaged in trade. The inscriptions, especially in III. and IV. periods, pictures representing Canaanite art objects are fully in accord with the incidental allusions in the Amarna letters. Egyptian influence, evidenced by scarabs and texts, is very marked in Philistia, but the native art appears clearly to have been akin to that of Babylonia. The occurrence of jug handles with alphabetic texts, consecrating even common vessels to local Molochs, shows the survival of idolatry to a comparatively recent period. The great monuments now include the Moabite Stone [Dibon] and the Siloam text [Siloam]; and the Hebrews are otherwise only represented by a few very fragmentary ostraca. The inscriptions are compounded with that of Jehovah, and by inscribed weights older than 600 B.C. The rock-scarp of city walls, the aqueducts, and the rock-cut tombs are the main evidences of their presence at any site; and we still depend on the "Taylor Cylinder," prepared for Sennacherib, as a witness to the wealth of Hezekiah. From the 2nd cent. B.C. the architectural remains become more important, and the coins of the Hasmonaean appear in this age. [Weights; Money.] The strong Gk. influence is first shown in the palace of Hyrcanus, at 'Arıq q Emed in Gilead (Suru. E. Pal. pp. 65-87). It was built before 170 B.C. (Josephus, 12 Ant. iv. 11) by a Hellenizing priest, who did not scruple to adorn the walls with lions in bold relief. The masonry is drafted after the Gk. style, and the stones are in some cases 20 ft. long and 8 ft. high. The pilasters and cornices are Gk. in style, though some of the capitals are Gk. in form. This work is the prototype of the style which Herod adopted nearly two centuries later for the Jerusalem temple and for the Hebron enclosure. The domed roofs of the "Double Gate," on the S. wall of the Jerusalem temple, show the same imitation of Gk. art, mixed
with older native ideas. The temple of Sir'a, in E. Bashan, was also built by Herod the Great (to a local deity), and presents Gk. and Aram. texts. The resemblance in arrangement and style (according to De Vogüé's drawings) to the Jerusalem temple is very notable. The vine is carved round the eastern gateway; but the presence of rude busts and human heads in the capitals shows that Herod was no true observer of the Heb. law. The same, however, must be said of the Jews themselves in the 2nd cent. A.D., when Simon bar Yohai is said to have built 24 synagogues in Galilee. Of these apparently 12 still exist in ruins—2 at Keif Bir'im in Upper Galilee, 2 at el Jish, and 1 at Meirín, Sušši, and Nebratoin respectively in the same region, with others in Lower Galilee at İrbid, Umm el'Amid, Tell Hûm, Chorazin, and on Carmel. They are undoubtedly Jewish buildings—as shown by the Heb. text at Keif Bir'im—yet they are adorned with carvings of the lion, ram, and hare on the lintels of the doors, in spite of the law against images. There are many fine remains of Roman work of this age, in such cities as Gerasa, Bosra, and Gadara, whose stonework excelled that of Ba'albek and Palmyra; while Gk. and Roman texts, and coins of cities, are numerous under the Antonines and later Roman emperors. But throughout Palestine most of the ruins visible on the surface are proved, by inscriptions and architecture, to have been built by Byzantines, Crusaders, and later Egyptian Moslems. Since the Turkish conquest no important building has been added, and the decay of the country generally has been notable.—Bibliography. In spite of the enormous and ever-increasing literature connected with the Holy Land, the list of sources of original and scientific information is by no means large. Excluding popular works, and speaking only of standard books of reference, the following will be found the most useful to the student, and they furnish the materials out of which many later volumes have been compiled. The intimate knowledge of Palestine that a travel writer or topographer had been fully developed, renders the work of Eusebius and Jerome in the Onomasticon most useful, though many errors are to be found in their identifications of sites (see Larsow and Parthey, Eusebi Panophil Episcopi Caesariensis Onomasticon, Berlin 1862). The later accounts, from 333 A.D., can be studied in the annotated translations of the Palestine Pilgrims' Text Society. One of the earliest attempts at exhaustive study still retains value, on account of its classical and Talmudic learning, namely, Palestia ex Monumentis Veterum Illustrata, by Hadrian Reindel, 1714 (2 vols.). But scientific exploration dates from the publication of Biblical Researches (1838) and Later Bibl. Researches (1852), by Dr. E. Robinson, who furnished a storehouse of knowledge for his successors. The complete description of Palestine, due to the 1-inch survey, fills three quarto volumes (with plates). The topographs of the Memoirs of the Survey of Western Palestine (1881), to which must be added the Memoir of the Survey of Eastern Palestine (1 vol. 1889). The set is further extended to a total of twelve quarto volumes, by addition of the Name Lists, Special Papers, the Jerusalem volume containing the account of Sir C. Warren's excavations and other discoveries; the sketch of Geology by Prof. Hull; the Natural History by DuBuisson, Tristram, and Mivart; Flora of Sinai, Petra, etc., by H. Chichester Hart; and two volumes of researches by M. Clermont-Ganneau. Besides these Memoirs the Ordinance Survey of Jerusalem by Sir C. W. Wilson (1865) is valuable, and so are later short accounts, such as Across the Jordan (1886) and Northern 'Ajlûn (1890), by G. Schumacher; A Mound of Many Cities (1894) and Excavations at Jerusalem (1898), by F. J. Bliss, with the reports of Mr. K. A. Stewart Macalister, on Gezer, etc., in the Quarterly Statements of the Palestine Exploration Fund. On the survey discoveries the later work of Dr. G. A. Smith is based, and the short account by Dr. F. Buhl (Geographie des alien Palästina, 1896), but both these works contain errors. The Talmudic notices are collected by Neubauer (Geographie du Talmud, 1868). The Amarna letters may be studied in the original characters in Winckler's Thontafeltext von el Amarna (1878), and later selections by Y. Y. Conder's Tell Amarna Tablets (1893). The Karnak lists of Thothmes III. are given in papers by Mariette and Maspero, the latter having also specially studied Shishak's list. The Mohar's account is to be found in the Voyage d'un Egyptien by Chabas (1866). The Asshur Nama, a work by Schrader (Cassettmer Inscriptions and O.T.) ; see the English edition (2 vols, 1888), as translated by Rev. Owen Whitehouse. The works, of De Vogüé (Temple de Jerusalem, and Eglises de la Terre Sainte) are of permanent value, as is Waddington's Inscriptions Grecques et Latines de la Syrie (1870). Valuable papers have also appeared in the magazine of the German Palestine Society (especially regarding mediaeval topography), and the best guide-book is that of Dr. A. Socin (Baedeker). With regard to natural science, Dr. Tristram's Natural History of the Bible (1863), which must be added the Geologie of L. Lartet (1865), and the notes by Sir J. W. Dawson on Prehistoric Man in Egypt and the Lebanon. Works on Phoenicia and Syria are included under those heads, and special ones (e.g. Mebera) are quoted in other articles. The Mishna (Surenhusse, 1868) is also a storehouse of information as to Palestine and its inhabitants c. 150 A.D. [Agriculture] [C.R.C.]

Palu'ı, second son of Reuben and founder of the family of the Pallulites (Ex.6.14; Num.26.5; 1Chr.5.3).

Palmer-worm (Heb. ġizām), which occurs in H.I.14.25 and Am.4.6, is derived from a root signifying to "cut off," and is rendered in the LXX. by ἀγαμή, a caterpillar, while the Vulg. has the equivalent Lat. term erca. Caterpillar is therefore probably the correct translation, although locust has been suggested by some commentators. [K.R.]

Palm-tree (Heb. hophalām), the generic term stands, in the Bible, only for the date-palm, the Phoenix dactylifera of Linnaeus. It grew very abundantly in many parts of the Levant, and was regarded by the ancients as peculiarly.
characteristic of Palestine are connected in the Bible with the palm-tree, either by its mention in the text, or by its place in the margins. In (1) At Elim, one of the stations of the Israelites between Egypt and Sinai, it is expressly stated that there were "twelve wells [fountains] of water, and threescore and ten palm-trees" (Ex. 15.27; Num.33.9). (2) Eloth (plur.) and Elath (fem. sing. with archaic termination, used collectively) are from the same root, and may likewise mean "the palm-trees" (Deut.2.5; 1K.9.26; 2K.14.22,16.6; 2 Chr.8.17,26.2). (3) The rich palm-groves of Jericho were famous in the period of Moses (Deut.34.3; Judg.1.16), and not less in that of the Evangelists and of Josephus. (4) Hazezon-tamar (the dell of the palm-trees; Gen.14.7; 2 Chr.20.2). (Endend.) (5) Baal-tamar (Judg.20.33), and (6) Tamar (the palm), in the vision of Ezekiel (47.19,48.8,28), are instances of its occurrence in place-names; and probably (7) Solomon's Tadmor, afterwards the famous Palmyra, on another desert frontier far to the N.E. of Tamar, has the same root. (8) Turning to the N.T., Tertullian, speaking of the "house of dates"; and thus reminds us that the palm grew near Jerusalem, at our Saviour's entry into which the people "took branches of palm-trees and went forth to meet Him" (Jn.12.13; cf. Ne.8.15). (9) The country round Phoenicia (Ac.11.19,15.3) probably got the palm's name, Phoenix. (10) Phoenix in the island of Crete, the harbour which St. Paul was prevented from the storm by reaching (27.12), is doubtless derived from the Gk. for a palm.—11. Under the emblematical uses of the palm-tree in Scripture may be classed: (1) The striking appearance of the tree, its uprightness and beauty, naturally suggesting the giving of its name occasionally to women (Gen.38.6; 2 Sam.13.1,14.27). (2) Notices of the employment of this form in decorative art, both in the real temple of Solomon and in the visionary temple of Ezekiel. This work seems to have been in relief, and was doubtless copied from ornaments in Eastern architecture. (3) The palm does not appear as frequently as we should expect in the imagery of O.T., but the familiar comparison of Ps.92.12, "The righteous shall flourish like the palm-tree," suggests many illustrations, e.g. the orderly and regular aspect of the tree, its fruitfulness, the perpetual greenness of its foliage, the height at which the foliage grows, as far as possible from earth and as near as possible to heaven, and also the elasticity of the fibre of the palm, and its determined growth upwards, even when loaded with weights. Hence it was a usual comparison: "Vertue is compared to the palm tree, which the more it is pulled down, the more it returneth upward" (Primadanye, French Academy, 1586). (4) Rev. 7.9, where the glorified of all nations are described as "clothed with white robes and palms in their hands," is illustrated by the fact that palm-branches were used on the Feast of Tabernacles (Num.18.26; Mal.4.2; 2 Mac.13.51; 2 Mac.10.7,14.4).—111. The industrial and domestic uses of the palm are very numerous; but there is no clear allusion to them in the Bible. That the ancient Orientalis, however, made use of wine and honey obtained from it is evident from Herodotus, Strabo, and Pliny; and it is possible that the honey of the palm-tree may be the same as that found in 2 Chr.31.5 the marg. has "dates"). (5) Cant.7.8, "I will go up to the palm tree, I will take hold of the boughs thereof," appears to refer to climbing for the fruit. So in 2.3 and elsewhere (e.g. Ps.1.3) the fruit of the palm may be intended; but this cannot be proved. It is curious that this tree, once so abundant in Judaea, is now comparatively rare, except in the Philistine plain, and in the old Philistia about Beyrut. [There is a well-known variety of the date-palm, with stoneless fruit, preserved in the convent court-yard at Marsaba, near Jerusalem. Another palm, the dom-palm, from Upper Egypt, reaches the Sinai Peninsula at Tor and is found at 'Aqaba. Possibly it formerly ranged, with other sub-tropical species still existing there, to the Ghor-e-safiyyeh at the S. end of the Dead Sea. Its botanical name is Hyphomea thebatica. H.c.h.]

Palsy meets us in N.T. only, and in features too familiar to need comment. It is probably the words "grieviously tormented" (Mt.8.6) may well refer to paralysis agitans, or even St. Vitus' dance, in both of which the patient is never still for a moment when asleep. The woman's case who was "bowed together" by "a spirit of infirmity" may probably have been paralytic (Ac.10.11).

Palti, the Benjamite spy; son of Raphu (Num.13.9).

Paltiel, son of Azza and prince of the tribe of Issachar, which he represented at the division of the land (Num.34.26).

Paltite, The [Pelonite.]

Pamphylia, one of the coast-regions in the S. of Asia Minor, having Cilicia on the E. and Lycia on the W. In St. Paul's time it was not only a regular province, but the emperor Claudius had united Lycia with it, and probably also a good part of Pisidia. It was in Pamphylia that St. Paul first entered Asia Minor, being shipwrecked in a boat and standing on the wooden breast of a vessel, Paul sailed near the coast (Ac.27.5).

Pan. Of the six words so rendered in A.V., two, mahabath and masreth, seem to imply a shallow pan or plate, such as is used by Bedouin Arabs and Syrians for baking rapidly cakes of meal; the others, especially sôr, a deeper vessel or caldron for boiling meat, placed during the process on three stones. [Cruise.]

Pannag was exported from Palestine to Tyre (Ezk.27.17). Its identification is purely conjectural, as the term occurs nowhere else. A comparison with Gen.43.11 suggests that it represents some of the spices grown in Palestine. The LXX. rendering σακshowers this opinion. Hitzig observes that a similar term occurs in Phœnician (pamoum) for an aromatic plant. The Syr. version understands it "millet"; and Dr. Redpath (Ezekiel in Westminster Comm.) points out that pamoum was one of the Lat. names for "millet" at least as far back as the time of Julius Caesar (de Bell,
Gall. ii. 22), and that a kind of grain would suit the context here. R.V. inserts a marginal note "perhaps a kind of confection." Perhaps, however, Pannag may be a place-name, and the sense is "from Pannag." Pappos, a town at the W. end of Cyprus, connected by a road with Salamis at the E. SS. Paul and Barnabas travelled, on their first missionary expedition "through the isle," from Salamis to Paphos (Acts 13.6). Paphos was famed in the worship of Astarte or Venus, who was fabled to have here risen from the sea. Her temple, however, was at "Old Paphos," now called Kouklia. The harbour and the chief town were at "New Paphos," at some little distance. The place is still called Baya.

Papyrus. (Reed.)

Parable (Heb. מַשָּל; παραβολάν; parabolâ). The Gk. word means a "comparison," and is used in the LXX. commonly for the Heb. מַשָּל = "similitude," either in the shorter form of a proverb or in the longer form of a narrative. A parable is distinguished from a fable by its truth to nature. The fables of O.T., taught by Jotham (Judg.9.5ff.) and Jehosh (2 Kings 14.9), have no parallels in the teaching of any prophet. They teach the wisdom of this world only. But a parable is, in the familiar phrase, an earthy story with a heavenly meaning. It interprets the facts of nature and of life, while it keeps apart the story told and the meaning suggested. Herein it differs from allegory, in which a metaphor and its explanation are combined—e.g. the allegories of the Good Shepherd, the True Vine, etc. In O.T. the word parable is used to express (1) obscure sayings (1 Kings 4.1), (2) discourses in figurative language (Balaam, Num.23.7; Job 27.1), (3) parables proper, the narratives in 2 Sam.12.1-4, 14ff.; 1 Kings 20.33ff.; Isa.5.1-6; 28.24-28, no less than the more formal parables of Ezek.5.3b-26, 4.1-12.5-14.—Parables in N.T. The use of parables was common in Rabbinic writings, but their style seems stiff and artificial when compared with the exquisite grace and ease of Christian. Moreover, when the son of Sirach, reserved their parables for their chosen disciples. Christ, to the astonishment of the disciples (Matt.13.10), gave them to the multitudes. He used them for a double purpose: (1) to attract attention; (2) as a test of character. It was only when His direct teaching was met with scorn and unbelief that He began to change His method and veil His meaning. He no doubt used figurative sayings from the beginning of His ministry—e.g. the metaphor of the Narrow Gate, and the similitude of the Two Builders in Matt.7. But a distinct change in His method can be traced from the time when He began to cease preaching to the multitudes and devoted Himself to the training of His disciples, seeking to impress upon them the inner meaning of His public instruction. Too much is sometimes made of a supposed divergence between the Fourth Gospel and the Synoptic Gospels in regard of our Lord's parables. In Luke 16.14, the Lord is represented as speaking in proverbs (marg. parables, R.V.) to His chosen disciples, to whom certainly He had spoken the allegory of the True Vine (John 15); but it is untrue to say that He reserved figurative speech for them, the allegory of the Good Shepherd having been spoken to the unresponsive Jews (John 10.14).

The educational value of such teaching has been greatly overrated. Parables are not the fables that men think out for themselves they never forget; the exercise of their mind makes it their own. Moreover, the language of symbols—expressed in what is seen by the eye or pictured by the imagination—is more powerful and enduring in its effects than the language of mere abstractions; words and phrases are constantly changing their meaning, whereas the symbols of life and Nature (such as our Lord used in His parables) are as abiding as Nature and life themselves.—Classification of Our Lord's Parables. Opinions will probably always differ on this point. The simplest method of classification is probably the best. Goebel, followed by Eidersheim, makes three groups: (1) Parables of the ministry in and near Capernaum (Matt.13); (2) Parables recorded in Luke 10-18 in connexion with the journeys from Galilee to Jerusalem; (3) Parables of the last days in Jerusalem. The teaching of these groups has been referred by J. J. Megill to "whole groups of individual members, coming judgment. On the other hand, Bishop Westcott classifies by subjects: (1) Parables drawn from the material world. These include the Sower, the Tares, the Seed growing secretly, the Mustard Seed, the Leaven (Matt.13; Mark 4), illustrating the development of the elements of natural or spiritual life. (2) Parables drawn from the relations of men, (i) to the lower world, the Drag-net (Matt.13.17), the Barren Fig-tree, Lost Sheep (Luke 15.3), Lost Coin (15.8); (ii) to their fellow men, (a) in the family, Unmerciful Servant (Matt.18.23), the Two Sons (21.28), Two Debtors (Luke 7.41), Lost Son (15.11), setting forth the beauty of mercy and gratitude, of forgiveness and obedience; (b) in social life, Friend at Midnight (Luke 11.5), Unjust Judge (18.1), teaching zeal in prayer; the Ten Virgins (Matthew 25.1), the Lower Seats (Luke 14.7), teaching humility; the Prodigal Son, Supper (14.16), the King's Marriage Feast (Matthew 22.1); (c) in regard to their means (a) thoughtfulness in planning work, the Tower Builder (Luke 14.28), the King making War (14.31), the Unjust Steward (16.1); (b) fruitful, the Talents (25.14), the Pounds (19.12); unselfish, the Wicked Husbandmen (21.28); humble, the Unprofitable Servants (Luke 17.7); dependent, Labourers in Vineyard (Matthew 20.1); (iii) to Providence, since "advantages imply duties, whether we obtain them, unexpectedly, Had Treasure (Matthew 13.44); after search, Man seeking Pearls (13.45); by inheritance, Rich Fool (Luke 12.16). Westcott goes on to suggest that the symbolic narratives the Publican and Pharisee, the Good Samaritan, and the Rich Man and Lazarus give direct patterns for action, and apply to classes rather than individuals, illustrating the opposition of Christianity to Judaism in spirituality, love, and self-sacrifice. But it is narratives the Publican and Pharisee, the Good Samaritan, and the Rich Man and Lazarus give direct patterns for action, and apply to classes rather than individuals, illustrating the opposition of Christianity to Judaism in spirituality, love, and self-sacrifice. But it is
classification, though for practical purposes so thorough a study as this of Westcott's is help-ful..—Interpretation. It is obvious that in most cases one lesson stands out as of primary importance; but our Lord's own interpreta-tions, e.g. of the parable of the Sower warns us against the assumption that one lesson only is to be looked for in each, as is maintained by Jülicher. On the other hand, the warnings of St. Chrysostom against pressing details, when he cuts off his interpretation with words like "Be not curious about the rest," are necessary. We must always consider what was the primary lesson of each parable to the group of by-standers who first heard it. Within its limits, so long as we preserve simplicity, we may safely proceed to discuss the meaning of details. We may interpret the lamps of the Ten Virgins as typifying the outward signs of Christian pro-cession, and the oil as the symbol of the Spirit (cf. 1 Jn.2.20). We may keep within the circle of symbols familiar to the disciples. We learn the important lesson that readiness to meet the Bridegroom is only maintained by renewal of spiritual life. Christ's parables are the words of a divine Speaker. They last for ever. Each generation finds new inspiration, because the names and the incidents are changed to correspond to new applications. "We seem (in Dr. Sanday's words) "to be placed for the moment at the very centre of things. On the one hand there is laid before us the human heart as it really is, or ought to be, with all its perversities and affections stripped away; and on the other a plan, a word, is laid before us, to the secret council chamber of the Most High, and to have revealed to us the plan by which He governs the world, the threads in all the tangled skein of being." His words interpret His life, and His life was the highest and most glorious of all parables" (Trench). R. C. Trench, Notes on the Parables, 1851,1882; Goebel, Die Parabeln Jesu (1880); A. B. Bruce, The Parabole Teaching of Christ (1882); A. Jülicher, Die Gleichnissreden Jesu, (1899); (Bp.) C. G. Lang, The Parables of Jesus (1906). [A.E.B.]

Paraclete. [Spirit, Holy.] Paradise, said to be a Persian word meaning a "king's park," or possibly borrowed by the Persians from an Akkadian origin, and adopted first in Heb. (Ne.2.8; Can.4.13; Ec.2.5), and afterwards, from the time of Alexander the Great, in Gk., and especially applied by the LXX. translators to the garden of Eden. [Eden.] From this application it was used symbolically first of a garden of perfect fruitfulness, with trees of largest stature (see LXX. in Gen.13.10; Ezek.31.8,9), and then of an ideal abode of blessedness (the Paradise of God, i.e. a garden like Eden: Ezek.28.13; cf. Ecclus.40.17,27; Ps. of Sol. iv.2). When the idea of distinctions between the good and the bad in Sheol became familiar to the Jews, Paradise was regarded as a park (generally literally), either outside the world, or on the earth but far away in the remote East, to which the good were carried after death. The word occurs three times only in the Old Testament (Ps. 16.10; 52.15; 116.10), but the general sense mentioned above. Our Lord uses it in His promise to the dying thief, to whom it would convey the hope of rest under the cool shadow of trees beside fresh streams (Lu.23.43). St. Paul uses it as synonymous with the "third heaven," to which he was caught up in his vision (2 Cor.12.4). From the time of the early Church it has been used as the abode of the blessed dead until the Last Day. Art. "Paradise," by Salmond in Hastings, D.B. (5 vols. 1904); and works on the Future Life, e.g., Salmond, Christian Doct. of Imortality, pp. 348-352, and Charles, Eschatology (see ref.s in Index for Jewish use of the word). [S.C.G.]

Parah (Jos.18:23; perhaps spring), a town of Benjamin near Avim and Ophrah. With the ruin Parah (of the bubbling water), 4 miles S.E. of Michmash. There is a fine spring surrounded with reeds and oleander bushes (Suru. W. Pal. iii. p. 170). Possibly the Perah of Jeremiah (13.4,7) may be the same (E.V. Euphrates). [C.R.C.]

Paran (apparently diggings). The word survives at Wady Feiran (valley of diggings), near Sinai; the reference may be to the Egyptian mines in this region. The name first appears at El paran (the tree of Paran) in the desert near Kadesh (Gen.14.6,7), perhaps the Kadesh of Hagar (see 21.21, and cf. 16.13), and of Anim in the desert near Sinai (Num.10.12) to beyond Hazeroth (12.16), and up to Kadesh-barnea (13.26; Deut.1.1). It is called mount Paran (Deut.33.2; Hab.3.3), and extended N. towards the negheb of Judah (Is.25.1) and S. towards Egypt (1 K.11.18). It appears therefore to the answerer to the question called Badyreg (the waste of straying), between Palestine and Sinai. [C.R.C.]

Parbar (1 Chr.26.18). "At Parbar westward, four at the causeway and two at Parbar" (R.V. marg. the Precincts). Various render-ings: the suburb, the porticoes. In 2 K.23.11 the word Parvar is rendered "suburbs" (A.V.) and "the precincts" (R.V.). In the Mishna and Targums the word Parvar occurs for the suburbs of a city. Parbar occurs only in l.c., in the enumeration of the Levites guarding the outer gates of the temple of Solomon, and the inference from the context is that it is the name of the suburb or the outer city. At the W. wall of the temple and the upper city, in the Tyropoeon valley, and that the gate next to the causeway is the gate Parbar. The causeway still remains in existence, forming part of the first wall of the city and terminating at Wilson's arch (Bab es-Silsilah), at the W. wall of the Haram enclosed. The old gates to the suburbs are also in existence, piercing the Haram wall, at a lower level than the gate of the causeway, that to the N. of the causeway being called Warren's Gate (near Bab el-Matrah), and that to the S. Barclay's Gate (Bab en Nebi). Either of these two suburban gates may have been the gate Parbar. [C.W.] Parched corn is mentioned as edible in common use in Lev.23.14, Ru.2.14, 1 Sam.17.17,25,18, and 2 Sam.17.28. Parched or roasted ears of corn (wheat; rye, barley, etc.) "still constitute a part, and not a disagreeable one, of the food of the Arabs now resident in the Holy Land (Harris). It was held in high esteem in Roman times. Pliny (Natural Hist. as his authority) says, "King Numa
ordained to worship the gods with an oblation of corne... To induce the people of Rome the better unto it, he allowed them to parch their corne in the sacrifices: for that corne thus parched, was supposed to be a more wholesome food: by which means, this one thing ensued in the end, that no corne was counted pure and good, nor fit to be used in divine service, but that which was thus baked or parched. He also instituted the feast Fornacalia, to worship certain holydays for the parching and baking of corne.” (xviii. 2.)

The word ἑλετος, usually rendered “parched corne,” is translated “parched pulse” (A.V. and R.V.) in 2Sam.17.28. (Pulp. Food.)

Parched ground (Heb. shārāḇbāh, Is.35.7, cf. 49.10. A.V. heat: “The sun-parched ground shall become a pool [āqēlām], and the thirsty land springs of waters; in the abode of wild beasts shall be a resting place [for eagles, grizzly bears, leopards, and tigers”). The A.V. says “corbeled to be Gershom.” Gershom compares the Arab. sarib (mire): for the Arab. shārab means “to thirst,” “to drink up,” the ground having sucked up all the rain-water. [C.R.C.]

Parchments (zTim.4.13). St. Paul asks Timothy to send him parchments from Troas, because he left with Carpus, and the books, but especially the parchments. Some Gk. Fathers understand by the Gk. ῥῶς ἐξωβαίνοντο not a cloath but a bag for holding books. The “books” (Tā βιβλία) were probably papyri, used for occasional notes and memoranda, like those found at Herculaneum or in Egypt (cf. 2Jn.12). The “parchments” (καλόν or κινδυνια) were writings on skins: perhaps they were copies of the Scriptures. [Writing.]

Parlour. A room for interviews. The A.V. sometimes so renders three Heb. words. (1) ἐξοικεῖον (1Ch.28.11), rendered chamber in 33 cases. (2) ἱσχίον (1Sam.9.22), rendered chamber in 12 cases. (3) ἀλίθη, a “high” or “upper” room (Judg.3.20-25), the word having several other renderings—viz. loft (1K.17.10), chamber, or upper chamber, in 12 cases, and ascent, or going up, in 3. [House.]

Parnashta, one of the ten sons of Haman slain by the Jews in Shushan (Esth.9.9).

Parthenas. One of the seven Deacons, “men of honest report, full of the Holy Ghost and wisdom” (Ac.6.5). There is a tradition that he suffered martyrdom at Philippi in the reign of Trajan.

Parnach, father or ancestor of Elizaphan prince of the tribe of Zebulum (Num.34.25).

Paroosh. The descendants of Parosh, in number 2,172, returned from Babylon with Zerubbabel (Ezr.2.3; Ne.7.8), and later another detachment of 150 males with Ezra (Ezr.8.3; A.V. Pharaoh). Seven of the family had married foreign wives (10.25). Members of it assisted in building the wall of Jerusalem (Ne.3.25), and signed the covenant: see 10.14, where the name is clearly that of a family, and not of an individual.

Parousia. [Coming. Second.]

Parshandatha, the eldest of Haman’s 10 sons slain by the Jews in Shushan (Esth.9.7).

Parthians occurred only in Ar.2.9, where it designates Jews settled in Parthia and belonging to the “Eastern dispersion.” Parthia proper was the region stretching along the southern flank of the mountains which run N. of the Persian Desert and S. and S.W. of the Caspian Sea. It lay S. of Hydeana, E. of Media and N. of Sagartia. The ancient Parthians are by several writers said to be a Scythian race, and may have been brought captive by Sesostris from Scythia into their later home. Nothing definite is known of them till the time of Darius Hystaspis, when they are found in the district which so long retained their name, and appear as faithful subjects of the Persian monarchs. In the final struggle between the Greeks and Persians they remained faithful, serving at Arbela; but they offered only a weak resistance to Alexander when he entered their country on the way to Bactria. On the division of Alexander’s dominions, Parthia was reckoned among the territories of the Seleucidæ. About 256 B.C. however, they succeeded in establishing their independence under Arsaces, who founded the dynasty of the Arsacidæ, which lasted some five hundred years, till it was succeeded by the Sasanidæ in 226 A.D. For a long time the Parthians resisted the advance of Rome, inflicting a severe defeat on Crassus at Carrhae in 53 B.C., but finally Arsaces XV. (37 B.C. -3 A.D.), gave up his five sons to Augustus in token of submission. The importance of the kingdom is perhaps indicated by the prominent position assigned to the Parthian Jews in Ac.1c. Monmessen, Romische Geschichte, Die Provinzen; Schürer, History of the Jewish People (Eng. tr.); Har- nack, Expansion of Christianity (Eng. tr.).

Partition, Middle wall of [Temple.]

Partridge (Heb. gorêt = “caller”). This name occurs in Is.26.20, Je.17.11, and Ecc.11.30, and is doubtless rightly translated. Two species, the Greek partridge (Caccabis satellis), an ally of the European red-legged partridge, and Hey’s sisi partridge (Ammoderix heyi), abound in the mountains of Palestine; and both may be alluded to in the passage in Samuel which refers to hunting gorêt in the mountains. Some difficulty has arisen with regard to the passage in Jeremiah where it is stated that the “partridge sitteth on eggs and hatcheth them not.” Whether this refers, as Tristram supposes, to the eggs being taken by man, or to an old superstition with regard to the part-
ridge stealing and incubating the eggs of other members of its kind, may well be left open. The reference in Ezekiel is clearly to caged partridges, which are used as decoys both in Palestine and India. The name "chukor" applied in India to a hill-partridge may be akin to qôrê, and is derived from the bird’s cry. [R.L.]

Par'uah, father of Jehoshaphat, 4 (1K. 4. 4).

Parva’im, the name of a district whence the gold was procured for the decoration of Solomon's temple (2Chr. 3. 6). Wilford suggested that it is derived from the Sanscrit pûrva, "eastern," and is a general term for the East. Glaser identifies it with Sûq al-Farwaín, some distance from Dhariya, in Arabia.

Paschah, an Asherite, son of Japhlet (1Chr. 7. 33).

Pas-dammim (1Chr. 11. 13), in tSam. 17. 1. Ephes-dammim. The latter means "the end [or, border] of blood." It lay near Scenoch, and a ruin called Beth Pâsed (house of blood) exists just S. of Sihewîkh, on S. side of the valley cut by the R. Usha. [Cf. loc. cit.]

Paše'ah.—1. Son of Eshton, in the genealogy of Judah (1Chr. 4. 12).—2. Ancestor of a family of Nethinim who returned with Zerubbabel (Ezr. 2. 49). A member of the family assisted in the rebuilding of the old gate of Jerusalem (Ne. 3. 6).

PASHUR.—1. A member of a family of priests of the chief house of Malchiah (Je. 21. 1, 8. 1; 1Chr. 9. 12, cf. 24. 9; Ne. 11. 12). In the time of Nehemiah this family appears to have become a chief house, and its head the head of a course (Ezr. 2. 38, 10. 22; Ne. 7. 41, 10. 3). The individual from whom the family was named is probably Pashur the son of Malchiah, who was one of the chief princes of the court of Zedekiah (Je. 38. 1). He was sent, with others, by Zedekiah to Jeremiah when Nebuchadnezzar was preparing his attack upon Jerusalem (Je. 51.). Again somewhat later, he joined with several other chief men in petitioning Jehoiachin that Gedaliah might be put to death as a traitor (Je. 38. 13-15).—2. Another priest, and "chief governor of the house of the Lord," is mentioned in Je. 20. 1. He is described as "the son of Immer" (cf. 1Chr. 24. 14), probably the same as Amariah, 4 (Ne. 10. 3, 12. 2, etc.). In the reign of Jehoiakim he also showed himself hostile to Jeremiah, and put him in the stocks by the gate of Benjamin. For this indignity to God's prophet, Pashur was told by Jeremiah that his name was changed to Magor-missabbib (Teror on every side), and that he and all his house should be carried captives to Babylon and there die (Je. 20. 1-6).—3. Father of Gedaliah (Je. 38. 1).

Passage (Jos. 22. 11). [Ed.] Used in plur. (Je. 22. 20), probably to denote the mountain region E. of Jordan (R.V. Abarim).

Passengers, Valley of the. [Hamon-gog.]

Passing under rod. [Rod.]

Passion of our Lord. [Jesus Christ.]

Passover. A. O.T. References. I. Pre-Exodus. For the institution and directions for the observance of the Egyptian Passover, see Ex. 12. 1-13; rv. 21-27 are obviously part of the account of the institution; there is no mention of the Paschal meal or of the firstborn, and on the other hand certain details are added, i.e. the bason, hyssop, and the command to remain indoors during the night (ver. 22). The month in which the Passover fell is called the "first," of the Hebrew year (ver. 2; Lev. 23. 5; Num. 9. 28, 16. 33, 3; 2Chron. 35. 1; Ezr. 6. 19; Ezk. 45. 21), and Asib (Ex. 13. 4, 23, 15. 34. 8; Deut. 16. 1), corresponding to the Babylonian and later Heb. Nisan. The lamb might be either sheep or goat, must be without blemish, a male, probably a firstling, of the first year. It was to be selected on the tenth of the month, kept up till the fourteenth, and killed on that day "at even" (Heb. "between the two evenings"; Ex. 12. 3-6). This time is defined in Deut. 16. 5 as "at the going down of the sun." The term is, of the time of offering the evening sacrifice (Ex. 29. 39, 41), and the lighting of the lamps by Aaron (30. 8). The Samaritans and Karaites, Tbn Ezra and others, understand the twilight; Saadia, Rashi, Radak, and others, say the first evening began immediately after noon and the second at sunset, answering to the Greek ἐβδομάδα πρῶτην ἁγία (Herod. viii. 6, 9). According to Josephus (6 Wars ix. 3), the lambs were offered from the ninth to the eleventh hour, i.e. from three to five o'clock. The Heb. pâsah, "to pass or spring over," in the sense of "to spare," occurs in 12. 13, 23, 27; Is. 31. 5. From it is derived Aram. p’sah, Gk. Paschah, Passover, name of the lamb and also as the name of the feast;—they kept (Jos. 5. 10), killed (Ex. 12. 21), sacrificed (Deut. 16. 5, 6), roasted (2Chr. 35. 13) and ate (30. 18) the Passover. The Passover was closely associated with the Feast of Unleavened Bread or Cakes (maṣɔth), from which however it was distinct both in origin and observance (Ex. 13. 5-20). maṣɔth were to be eaten at the Passover meal (ver. 8), on the evening of the 14th (the beginning of the 15th) and for seven days, till the evening of the 21st. The penalty for eating leaven was "cutting off" (rv. 15. 19). The Feast of Unleavened Bread was observed in connexion with the remembrance of the deliverance from Egypt (Ex. 12. 26, 27). The first and seventh days were holy convocations (Ex. 12. 16; Lev. 23. 7, 8; Num. 28. 18, 25); and on these days no work was permitted except the necessary preparation of food. It was owing to the haste of the departure from Egypt that the people ate maṣɔth on the day following the Exodus (Ex. 12. 24, 29). II. Post-Exodus. (1) Ex. 12. 43-51. The ordinance of the Passover given in Succoth and with special reference to its observance in the land of Canaan. (2) 13. 3-10. Concerning the observance of Unleavened Bread in Canaan. The seventh day only is mentioned as a feast (ver. 6); cf. Deut. 16. 8. (3) Ex. 23. 14-19. Unleavened Bread brought into connexion with harvest and offering of the firstfruits (ver. 16). Each worshipper was to present an offering according to his means (ver. 15; Deut. 16. 17). (4) Ex. 34. 18-26. The term ḥag, a festival-gathering, is here only in the Pentateuch applied to the Passover (ver. 25). It is usually applied to the Feast of Unleavened Bread. The safety of the land was assured during the absence of the men on the three pilgrim feasts (ver. 24). (5) Lev. 23. 4-14. The Passover on the 14th (ver. 5), and Unleavened Bread on the 15th (ver 6), i.e. the lamb was killed towards
PASSOVER

the close of the 14th and eaten the same evening with ma'azeth, the Passover being here mentioned rather as introducing Unleavened Bread than on its own account, and though Unleavened Bread was consumed with the Passover meal on the eve of the 15th (Ex. 12.18), it could as a festival distinct from the Passover be said to begin on the morning of the 15th. See Num. 28.16-17. [DAX.] The ritual in Lev. 23.10-14 shows a close connexion between Unleavened Bread and harvest. According to the best Jewish tradition, the sacred loaf (ver. 11) was the 15th of the month, the first day of Passover; but the Samaritans, Sadducees, and Karaites interpret it of the regular sabbath occurring in Passover week. On "the morrow after the sabbath," either on the 16th, the second day of the Passover (Jos. 3 Ant. x. 5), or on the Sunday after the 15th, in accordance with one or other of the above opinions, the sheaf (omer) of the first-fruits of the barley harvest was to be taken to the priest and by him waved before the Lord (23.11.12). From this day were reckoned the seven weeks to the Feast of Weeks (23.15, 16). [Deut. 16.9.] (8) Num. 29.1-14. Passover kept in Jerusalem. The law of the Second and Little Passover added—those who were unclean through contact with a dead body, or who were on a journey, were to keep the Passover on the 14th of the second month (ver. 6-12). "Cutting off" was the penalty for non-observance of the Passover (ver. 15). [Critics.] (7) Num. 28.16-25. The additional offerings for each of the seven days of Unleavened Bread. (8) 33.3. Historical note—the exodus on the 15th, "on the morrow after the passover." (9) Deut. 16.1-16. A very important passage: "Thou shalt sacrifice the passover...of the flock and the herd" (ver. 2), is paraphrased in the Pal. Targum, "Ye shall sacrifice the passover at even, and the sheep and the oxen on the morrow, on the same day to rejoice in the feast." Sifri on the same verse explains the "herd" as the haqighia, or festive offering (see also Lev. 3.1-7, 7.11-21, 19.5-8), as do also the Jewish commentaries. Mt. 26.20, "The word rendered roast in Deut. 16.7 means to boil or seethe (K.V. marg.), but is sometimes used in the general sense to "cook," e.g. cakes (2 Sam. 13.8). It occurs 2 Chr. 35.13, "They roasted [boiled or cooked] the passover with fire" (cf. Ex. 12.8, 9). Not only was the passover to be killed at the sanctuary, since there only it was lawful to offer sacrifices, but also to be cooked and eaten there (Deut. 16.2, 5-7). The worshippers were to return to their tents in the morning (16.7; cf. Ex. 12.22). ma'azoth is called the "bread of affliction" here only (Deut. 16. 3), perhaps with reference to Ex. 12.11, "in haste," i.e. trepidation. (10) Jos. 5.10.11. The Passover kept at Gilgal. (11) 2 Chr. 8.13. Unleavened Bread observed by Solomon according to the law. (12) 30.13-27. Passover and Unleavened Bread observed in the reign of Hezekiah, in the second month. Many of the people, though Levitically uncleane, partook of the passover (ver. 13), and the Levites killed the lambs for them (ver. 17). The priests received the blood from the Levites and sprinkled it on the altar (30.16, 35, 11). Unleavened Bread was kept seven days (30.21), and then seven more (ver. 23). (13) 35.1-19. The Passover was kept in the 18th year of the reign of Josiah (ver. 19). See also 2 K. 23-21-23. The Passover and Unleavened Bread are regarded as distinct (2 Chr. 35.17). The Levites killed and played the lamb's head, all the people (ver. 24). (14) Ezr. 6.20. The Passover was kept by the returned exiles. The Levites killed lambs for themselves, the priests, and the people (ver. 20). (15) Ezk. 45.21-24. Here the Passover is a feast of seven days, on which ma'azoth is to be eaten (ver. 21). The Feast of Unleavened Bread is almost lost in the Passover. The daily sacrifices differ from those prescribed by the law (Num. 28.19). Especially noticeable in this connexion is the sin-offering (ver. 22; cf. Ezk. 45.22). Thus the Passover was in the first instance essentially a domestic rite, but it partly lost this character as soon as a central shrine was set up, and with it a distinguishing feature—the blood-sprinkling on the doorposts of the house. The sacrificial aspect became more prominent, and the individual element, though never entirely lost, fell into the background, till in the book of Ezekiel we see the prince offering the sacrifice with his own hand (Ezk. 20.3). B. In N.T. Times and Later Practice. I. The Passover and Unleavened Bread were not generally regarded as distinct, and the whole festival was called indifferently the "Feast of Unleavened Bread," or the "Feast of the Passover." The Passover and "Bread of the Exiled" we call Passover (Josephus, 4 Ant. ii. 1); "The Feast of Unleavened Bread being now at hand, which among the Jews is called Passover" (2 Wars i. 3; Lu. 22.7); "We call this festival Pascha, which signifies the Feast of the Passover" (2 Ant. xiv. 6); "The Feast of Unleavened Bread" (3 Th. 3; 2 Wars xii. 1, 6). But cf. Mk. 14.1. (1) During the month preceding Passover elaborate preparations for the observance of the festival were made, including the whitening of the sepulchres to prevent the pilgrims contracting ceremonial defilement by accidental contact with them. Mt. 26.19. "The feast of Unleavened Bread was a day of special preparation. After sunset on the evening of the 13th, the beginning of the 14th, the head of the family made a careful search throughout the house for leaven (Pascham i. 1), first pronouncing the benediction, "Blessed art Thou, O Lord our God, King of the Universe, Who hast safeguarded us with Thy precepts, and commanded us to remove the leaven" (ib. 74). The 14th was sometimes called the first day of Unleavened Bread: "The Feast of Unleavened Bread, which was now come, being the 14th day of the month" (Josephus, 5 Wars iii. 1; Mt. 26.17; Mk. 14.12; Lu. 22.7). The feast was then reckoned as eight days: "We keep a feast for eight days, which is called the Feast of Unleavened Bread" (Josephus, 2 Ant. xv. 1). Two desecrated thank-offering cakes were exposed, probably on the roof of the temple porica, one of which was removed at ten o'clock in the morning, to indicate the time after which no more leaven was to be eaten, and the other at twelve o'clock, when all leaven was to be burned (Pascham i. 4). The 14th is also known as the Fast of the Firstborn, the first-born son fasting in commemoration of the sparing of the Hebrews.
when the Egyptians were destroyed (Ex.12.12). All abstained from food from about three o'clock in the afternoon (Pesachim x. 1). On Passover Eve the daily evening sacrifice was killed at 14th hour. The priests and elders of each company took their lamb to the temple at the time of sacrifice. When the Court of the Priests was filled the gates were closed and a threefold trumpet-call sounded. All the 24 courses of priests were on duty, and were arranged in two rows leading up to the altar of burnt-offering; those in the one holding golden and the other silver bowls with rounded bottoms. The Israelite killed his lamb, and the nearest priest caught the blood in his bowl, passed it on to the next priest, and received an empty one in return. The priest nearest the altar cast the blood in one jet at its base. Meanwhile the Levites chanted the Hallel (Ps.113). The blood was sounded by instruments of brass. The lamb was then suspended on hooks fixed in the walls and columns or laid on staves resting on the shoulders of the men, skinned, and the proper parts salted and offered by the priest on the altar. Even if the 14th fell on the sabbath the killing, sprinkling the blood, skinning and burning of the lamb on the altar took place as usual, but the lamb was skinned only as far as the neck, and the worshippers waited at the temple till sunset before returning to the house where the Paschal supper was to be eaten. The court was filled a second and third time, the same order being observed in each case. The lamb was suspended in the oven by means of a spit of pomegranate wood, which passed through it from mouth to vent, care being taken that no part of the animal touched the oven. The ḥagighah also was offered on the 14th if the company was so large that the lamb would not suffice (Pesachim 67a). A lamb was offered on the 15th or any day of the festival. It could not be offered on the sabbath, or by one who was unclean. The 15th was a sabbath, and might coincide with the weekly sabbath, in which case it superseded the sabbath law in certain respects (Pesachim 66a). One or two days before the Passover, representatives of the Sanhedrin went to a field in the Kidron Valley and tied stalks of barley together in small sheaves, leaving them intact. On the 16th, or probably about sunset on the 15th, three men with sickles and baskets went to the field, where a number of people had assembled in festive array, and cut the barley. They gathered ten omers, took it to the temple courts, where it was threshed, roasted, ground, and passed through thirteen sieves, each finer than the preceding, and so obtained the omer. What remained was afterwards redeemed and eaten by any one. The omer of fine meal was mixed with oil, five years' old, of the firstfruits of their barley; after which they may reap their harvest” (Josephus, 3 Ant. x. 5). The 17th to the 20th were half-holydays, during which only necessary work was done. Many of the pilgrims return to their father’s house on this day.

II. The Paschal Meal. The ritual for the meal given in Pesachim x. 2 ff. is probably that which was in the main followed in our Lord’s time. It is very brief, and omits details common to all meals. In the following account these details, etc., are added in square brackets after the Mishnaic directions. The elements of the meal were: (1) The lamb, now represented by a bone with a fragment of meat attached. (2) The ḥagighah, when the company was large. It is now represented by a roasted egg. (3) Unleavened cakes, macfôth. (4) Bitter herbs, horse-radish. (5) harôsêth, a sauce compounded of apples, almonds, raisins, and cinnamon. (6) Vinegar or salt water. (7) Sufficient wine for each person to have four cups. (8) Parsley, not mentioned in the Mishna, and lettuce. Order (Pesachim x. 2): They mix the first cup (with water, and a little vinegar attached, according to the Pharisees, since [Mishna] says, he blesses for the day and the meal, and in his case, [the school of Hillel says, he blesses for the wine and then for the day. [Hillel’s rule is the one adopted. The benediction over wine is, “Blessed art Thou, O Lord our God, King of the Universe, Creator of the fruit of the vine.” That for the return of the Feast-day is longer, and composed. All drink cups of wine. The celebrant washes his hands. Some place the feet-washing here (Jn.13.3, 5, 12).) Pesachim x. 3: They bring (the table) before him, he dips the horse-radish before he comes to the bread waters. They bring before him unleavened cakes, horse-radish, harôsêth, and two kinds of meat; and in the temple they brought before him the passover itself. [The celebrant dips the horse-radish in salt water, eats and distributes to all, with benediction for “the fruit of the earth.” He breaks the middle one of the three unleavened cakes and puts half away to be eaten later. The dish with the cakes is decorated up and accompanied, according to Hillel, in the words of affliction which our fathers did eat in the land of Egypt. Let all who are hungry come in and eat; let all who require come in and celebrate the Passover.”] Ib. x. 4: They mix the second cup. And now the son asks his father, and if the son has not the knowledge his father teaches him to say: “Why does this night differ from all other nights? On all other nights we eat unleavened or leavened, on this night all unleavened; on other nights we eat all kinds of herbs, to-night bitter herbs; on other nights we eat meat boiled, broiled, or roasted, this night all roasted [since this question is now obsolete another is substituted: “On all other nights we eat either sitting or reclining, to-night we all recline’’]; on other nights we dip perhaps not once, this night twice.” And, according to the son’s intelligence, the father teaches him, beginning with shame (matters of reproach) and ending with honour (things to be proud of). The words “My father was a wandering Syrian” (Deut.36.5), until he has completed the whole passage. Pesachim x. 5: Rabban Gamaliel used to say, “Whoever does not on the
PASSOVER

PASSOVER

Passover pronounce these three words—Passover, Unleavened Bread, and Bitter Herbs, has not done his duty;—Passover, because God passed over the houses of our fathers in Egypt; Unleavened Bread, because our fathers were delivered from Egypt; Bitter Herbs, because the Egyptians embittered the lives of our fathers in Egypt. In every generation a man ought to look upon himself as if he had himself gone forth from Egypt, as it is said (Ex. 13:8), 'And thou shalt tell thy son on that day saying, For the sake of this the Lord did it for me when I went out from Egypt.' Therefore we are bound to thank, praise, glory, exalt, honour, bless, extol, and give reverence to Him Who did for us and for our fathers all these wonders; Who brought us from bondage to freedom, from grief to joy, from mourning to festival, from darkness to great light, from subjection to deliverance.

Let us say before Him: Hallelujah (Ps. 113-118). Psachim x. 6: How far does he say? [To the end of Ps. 114]; then the Blessing of Redemption and the benediction over wine, after which they drink the second cup. This ends the first part of the service, and the Paschal meal begins. All wash their hands, say ‘Blessed is He that sanctifieth us with His countenance’; they are given to each and eaten after blessing, then the celebrant distributes horse-radish dipped in the horseradish, which is eaten after the proper blessing. A piece of horse-radish between two pieces of cake is distributed, and the following is said: ‘This commemorates that the Lord fed the Israelites in the time when the temple existed. He used to take a piece of the Passover lamb, unleavened bread and bitter herbs, and partake of them together, in order to fulfil literally what is said in the law, “with unleavened bread and bitter herbs shall they eat it,”’ (Ex. x. 10) the Passover lamb. This is by many taken to be the Sop. [John 13:30]. This ends the second part of the service. Supper is now brought in and eaten. In temple times a piece of the Paschal lamb was the last thing partaken of, now the cake which was laid aside early in the service is distributed, after which nothing more is eaten until the conclusion of the Blessing of the Eucharist (Mt. 26:26; Mk. 14:22; Lu. 22:14), and that our Lord anticipated the usage of later times.] Psachim x. 7: They mix the third cup, and say with it the Grace after meals. [This was the Cup of Blessing, [1 Cor. 10:16], so called because a special blessing is pronounced over it, Lu. 22:20.] Then the fourth, and with it he finishes the Hallil (Ps. 115-118; cf. Mt. 26:30; Mk 14:26), and adds the Blessing of Song. He may drink, if he chooses, between the other cups, but not between the third and fourth. Psachim x. 8: They do not close (or take leave) with apophoma [the term applied now to the piece of unleavened bread last eaten: see above; the word may mean “dessert”] after the Pesach [the Passover lamb].—The festival observed by modern Jews is purely a Feast of Unleavened Bread, since lamb could be sacrificed only at the central sanctuary. The Samaritans still observe both. The ancient Synagogue, Mt. Gerizim. C. THE PASSOVER. The four gospels all clearly represent the Crucifixion as having taken place on a Friday, but since the 2nd cent. it has been disputed whether the supper of which our Lord partook on the eve of the Crucifixion was the legal Paschal meal on the 15th, or an ordinary, or at most quasi-Paschal, meal on the evening of Nisan 14, i.e. the day before the Passover. The Synoptists convey the impression that it was the Passover, St. John that it was a supper on the evening before the Passover. I. The Synoptists: “Now on the first (day) of unleavened bread the disciples came to Jesus, saying, Where wilt Thou that we make ready for Thee to eat the passover?” (Mt. 26:17); “And keep the passover at thy house” (ver. 18); “They make ready the passover” (ver. 19); “And on the first day of unleavened bread, when they sacrificed the passover, His disciples say unto Him, Where wilt Thou that we go and make ready, that Thou mayest eat the passover?” (Mk. 14:12); “I shall eat the passover” (ver. 14); “They made ready the passover” (ver. 16); “And the day of unleavened bread came, on which the passover must be sacrificed” (Lu. 22:7); “I shall eat the passover” (ver. 11); “They made ready the passover” (ver. 15); “With desire I have desired to eat this passover with you before I suffer. The preparations were made on the 14th and the meal eaten the same night, i.e. at the beginning of the 15th. Those who dispute this (among whom are Neander, Greswell, Stier, Ellicott, Westcott), raise the following objections: (a) The rulers did not propose to arrest Jesus during the feast; (b) Matthew’s table was filled for so many days, and the rulers had removed the danger of “tumult.” (b) The day of the Crucifixion is called the Preparation, the day before the sabbath (Mk. 15:14; Lu. 23:54); and the 15th, a festal sabbath, would scarcely be treated as the preparation for the weekly sabbath, whereas if it were the 14th it would be the preparation for both the weekly and festal sabbath. But as the necessary preparation of food, forbidden on the weekly, was permitted on the festal sabbath, it is not impossible that such preparation was undertaken towards the close of the 15th. The Preparation began about three o’clock (Josephus, Ant. 18. 13); it is said that the treachery of Judas removed the danger of “tumult.” (c) The name ἑρακεία was simply the Greek name for Friday, and that the circumcision in Mt. 28:62 was used to prevent St. Matthew’s Jewish readers from mistaking the day for the festal sabbath. (c) Field labour was not permitted on the 15th, but was on the morning of the 14th if necessary (Mk. 15:21; Lu. 23:26). But was Simon necessarily returning from field labour? (d) Could a winding-sheet have been bought on the 15th? (Mk. 15:46). (e) It is objected that Nisan 15 cannot fall on a Friday. This is the rule now, but is due to a later arrangement of the calendar (Psachim viii. 10). (g) It is urged that if the Crucifixion took place on the 14th, then Jesus rose on the 16th, the day of offering the firstfruits (1 Cor. 15:23). (g) Would not the priests and elders be at the Paschal supper on the night of the 15th? (Lu. 22:54). The meal would not occupy them longer than it did Jesus and His disciples, who finished the Passover meal (Ex. 12:22) applied only to the Egyptian Passover. II. St. John. Not the Paschal meal: “Now before the feast of the passover, Jesus,
knowing that His hour was come... And during supper" (Jn.13.1-2, R.V.). The note of time is too indefinite to prove anything, cf. Lu.11.38, πρὸ τοῦ ἀπόστολον, i.e. immediately before dinner. "That thou dost, do quickly." Someone thought... that Jesus said unto him. Buy what things we have need of for the feast; or, that he should give something to the poor... and it was night" (Jn.13.27-30). It is scarcely credible that it should be thought that Judas went to make purchases in the middle of the night of the 14th, but the ἁγίασμα might be provided in the night of the 15th. See Edersheim, Life, etc., ii. 508. "It was the preparation of the passover" (19.14, 31, 42); i.e. Passover Friday, see I. (b), supra. The "high-day" sabbath (ver. 31) is explained by those who follow the Synoptists as referring to the 16th, the weekly sabbath and also the day of appearance in the temple and offering of firstfruits; by those who follow St. John as the 15th, the festal sabbath coinciding with the weekly. "It was early; and they themselves entered not into the palace, that they might not be defiled; but might eat the passover" (18.28). Deut.16.2 applies the term "passover" to the high sabbath used in the temple. It is not explained elsewhere. There are two references to the death of Jesus in the Talmud, Sanh. 434a, 67α. In both the Crucifixion is said to have taken place on the Passover Eve, the 14th. The passages are of late date, and of no historical value. Joel, a Jewish writer, argues that the crucifixion was a repetition of the Passover of Sinai, the sabbath when the Israelites were delivered from the Egyptian bondage. In their contemporaries, kept a pastoral festival in the spring, when the firstlings were offered in sacrifice to the Deity. Ex.3.18 and 5.1 may refer to such a feast, which was made the occasion of the Exodus, and received new meaning from the events of the deliverance from Egypt. From the earliest times the firstlings were regarded as belonging to God (cf. Gen.4.4), and as at the Exodus God spared the firstborn of the Hebrews it was an additional reason why they and also the firstlings should belong to Him (Ex.34.19). The Passover belonged to the ἱδρύμα, or peace-offerings, by partaking of which the worshippers renewed the covenant with each other and the Deity. But since the sprinkling of the blood on the doorposts was the means of saving the Hebrew firstborn, and the feast was closely associated with the deliverance of the nation from Egyptian bondage, the Passover was to be celebrated by sprinkling on the threshold the events (Ex.12.12, 14, 27; Deut.16.1). In later times (see O.T. references) the piacular aspect became more prominent, and is specially emphasized in Ezekiel's scheme of sacrifices (45.22). The Paschal lamb was a type of Christ (Jn.19.36). Hence St. Paul says, "For our passover was sacrificed, even Christ. So, therefore, let us keep festal" (1 Cor.5.7, 8). It commenced the departure from Egypt (Ex.12.17, 13.3, 8, 23, 15), especially the nervous haste of the departure (Deut.16.3); and it was also a barley harvest festival, with ritual offering of the firstfruits (Ex.23.16; Lev.23.10). There is some uncertainty as to the original meaning of 1st. Bochim (Heb. 1. 38, 40). St. Cor. 5.8, gives "clean, pure," cf. 1 Cor.5.8: "Let us keep festival... with the unleavened bread of sincerity and truth." Patara (Ac.21.1 only), a Lycian city of considerable note; situated east of the Xanthus, on the Promontory, which is the southern extremity of the island of Rhodes. The coast here is very mountainous and bold. Immediately opposite is the island of Rhodes. Patara was practically the seaport of the city of Xanthus, to miles distant.

Pathus (1 Esd.9.23) = Pethiahiah, 2.

Pathros (Παθρός, plur. Pathrusim), a gentilic name. The Pathrusim—i.e. inhabitants of Pathros—are mentioned only in the ethnic list of Genesis (10.14; repeated in 1 Chr. 1.12), where they are said to be descendants of Mizraim. Everywhere else we find the singular. Pathros, is a transcription of the Egyptian Pa-ta-er, meaning the land of the Pathros. Upper Egypt: hence the name is sometimes called the land of Pathros (Je.44.1), and it is mentioned before Cush = Ethiopia (Is.11.11). [E.N.]

Patmos (Rev.1.9) is one of the Sporades, and in that part of the Aegean called the Icariæan Sea. It was conspicuous on the right when St. Paul landed at Samos, and was the third from Samos to Cos. The aspect of the island is peculiarly rugged and bare. It is divided into two nearly equal parts, a northern
and a southern, by a very narrow isthmus, where, on the E. side, are the harbour and the town. On the hill to the S., crowning a commanding height, is the celebrated monastery, which bears the name of "John the Divine." Halfway up the ascent is the cave or grotto where tradition says that St. John received the Revelation.

**Patriarchs**, including (1) ante-diluvians; (2) patriarchs proper; (3) the patriarchal Church. (1) Long-lived Ante-diluvians. From the Creation to the Flood, the complete ages of nine persons are recorded, all which lives, except Enoch's, ended naturally. These eight lives total 7600 years—the longest 990, the shortest 777, the average 882. Four lives exceeded 900 years. After the Flood, the "generations of Shem," like the "generations of Adam," give nine lives, from Shem to Terah, which shortens rapidly. Noah, who drew breath in the "old world," completed 950 years, and died only by Moses. Abraham lived to 175. The four next lives, before the confusion of tongues, average 854; the five after, only 212. Terah's is the last life exceeding 200 years; his father Nahor's the first below that number. The similarity of form in the "generations of Adam" and "of Shem" suggests that in both alike the years are natural. And in view of the statement in 2Pe.3. 5-7, of the great difference between "the heavens and earth that are now" and those of the "old world," we may well ascribe the shortening of human life to (i) the change of climate, and (ii) the dispersion of the human family, making the conditions of life much harder. The LXX chronology adds 1200 years to the "generations of Shem" by a simple device, which bespeaks its Egyptian origin, but adds nothing to the longevity of the several patriarchs. (2) *Patriarch* so-called in N.T. are Abraham (Heb.7.4), David (Ac.2.29), and the 12 sons of Jacob (Ac.7.8,9). In LXX, the Gk. word is used for rulers of the 12 tribes (1Ch.27.22), and in four other rev. of Chronicles for heads of families in Israel. (3) The patriarchal Church is a collective term for the God-bearing families who called on the name of the Lord before the Levitical Church was organized. In the New Testament, this term is used for the primitive Christian community, not as seeders from it. The circles of Job and Jethro would obviously be included. The habits, laws, and ceremonies of this body have been well put together in Blunt's *Scriptural Coincidences*, pp. 3 ff., in a paper by Dean Burgon. A noticeable fact in the records of this body is its practical acceptance of the obligations of the Decalogue, which was evidently written on the hearts of godly men before Moses. It is interesting to trace this acknowledgment in Genesis Ex.1 19, and in Job. [c.n.w.].

**Pau** (in 1Ch.1.90. Pau), the capital of Hadar, king of Edom (Gen.36.39). Its position is unknown.

**Paul.** I. Biographical.—(r) Antecedents. Three languages inscribed upon the cross represent three converging civilizations—the Hebrew, the Greek, and the Latin. Each possessed its distinctive characteristics: the first, religious insight and devotion; the second, intellectual thought and imagination; the third, political and practical power. It is most significant that all these three characteristics were embodied in the human agent to whom Christianity owes most. "With all that the proudest Jew could boast, he had the entry into the larger world of Greek culture, and withal a Roman's interest in the universal empire. He was a man to be claimed by a great purpose, if such a purpose were there to claim him" (Robinson, *Ephe- sians*, p. 5). His education was apparently chiefly in Jerusalem under Rabban Gamaliel the elder, distinguished for large-heartedness and humanity, who afterwards advised the Jewish Sanhedrin against the Christian cause (Acts 22.22, 28), and who was honoured alike by the Jewish Synagogue and by the Christian Church (see Schürer, *Jewish People*, ii. 364). It seems certain that St. Paul never met Jesus Christ, and must have been absent from Jerusalem during the crucifixion period (cf. Bp. Lightfoot, *Bible and Christian Religion*, p. 17; also Ramsay, *P. the Tra.;* McGiffert, *Hist. Christ. Apost. Age*, 115). For chronology, see Harnack, *Geschichte der Altehr.*, ii. i. 237, etc. According to Clemen, St. Paul's conversion was in 31 a.d.: *Paulus*, i. 349-410, table on p. 411.—(2) Conversion. (i) The narrative is given three times: first in the historian's account; second, by St. Paul, spoken in Heb. to the assembled crowds in Jerusalem; third, by St. Paul, spoken in Gk. before the authorities at Caesarea (Ac. 9.22,23). The variations consist chiefly in: (a) The intervention of Ananias, recorded in Ac.9.22, omitted in 26; the instruction given by him in the two former being ascribed in the last to our Lord Himself. The omission of Ananias before the magistrate is perfectly natural. There was no necessity to introduce him. And further, he had no share in the actual conversion. (b) The effect upon the Saul is variously attested. He is delivered from the Ishmaite community, but not as seeders from it. The circles of Job and Jethro would obviously be included. The habits, laws, and ceremonies of this body have been well put together in Blunt's *Scriptural Coincidences*, pp. 3 ff., in a paper by Dean Burgon. A noticeable fact in the records of this body is its practical acceptance of the obligations of the Decalogue, which was evidently written on the hearts of godly men before Moses. It is interesting to trace this acknowledgment in Genesis Ex.1 19, and in Job. (c.n.w.). Saul has no idea Who the heavenly Person manifested can be. The question, "Why persecutest thou Me," had not rebuked an uneasy conscience already filled with grave suspicions. Nor is the speaker recognized. The heavenly Person is compelled to assert His identity with Jesus before Saul can understand. Moreover, the effect of this announcement is to leave him "trembling and astonished" (9.6). Thus the whole experience finds

**Paul.** II. Historical.—(1) Priscilla and Aquila. The first time mentioned in Acts 18.2, the Elder in 1Cor. 16.19. The name in Rom. 16.3, 4, 20, Tit. 3.12. The inscriptions of the names of the Priscillas and Aquilas in Jerusalem were recorded in 166 A.D. (Sabatier's *A.M.*, ii. 428). The first mention of Priscilla in Rome is in 212 A.D. (see Sabatier's *A.M.*, ii. 428-30). The name was known in Rome earlier, but the "house" of Priscilla is never mentioned in Rome in the New Testament, nor was it associated with the Christian Church. It is difficult to imagine the early Christian community in Rome having a house in which so many people met on the Lord's Day. Priscilla's house must have been a Christian assembly, a meeting place for the primitive Christian community. The name is not usual outside Rome. The name, however, is mentioned at Damascus (Ac.9.26), and it is possible that the Christians in Rome were in contact with the Damascus community. The Christian community in Rome is mentioned in Acts 28.17, 18, but not in the New Testament. The name is also mentioned in 1Cor. 16.19. The name is also mentioned in 1Co. 16.19, 20, Tit. 3.12. The name is also mentioned in the Epistle to the Romans, 1Co. 16.19, and Tit. 3.12.
him unprepared. The only phrase which can be made to suggest misgivings is the proverb, "It is hard for thee to kick against the goads" (9.5). But this may easily mean being led by higher power into a course which he had conscientiously opposed. The ox which resents the goads may object to the yoke, but not to the superior power of the new master. Nor could this single sentence fairly be interpreted to contradict the general evidence of the narrative that the conversion was not the outcome of meditations and doubts, but sudden, startling, and unprepared (cf. Ac. 28:9). I verily thought within myself, that I ought to do many things contrary to the name of Jesus of Nazareth". "It was my deliberate and conscientious conviction" (Stevens, Pauline Theology, p. 17). (ii) It is certainly remarkable that no account of his own conversion is given in his epistles, but is probably accounted for by the fact that they are intended for converts who had heard the story from the mouth of the Apostle. And the epistles contain allusions unmistakable to men already informed of the occurrence. (a) 1 Cor. 9.1; cf. Gal. 1.1. St. Paul here bases his apostolic authority on a vision of Jesus. It is indisputable that this "seeing" was subsequent to the Resurrection, for only so could it have any argumentative value. The occasion must have been the conversion. (b) 1 Cor. 15.8, the metaphor of an untimely birth. "It expresses," says Guignebert (Manuel d'histoire anc. de Christ, p. 293), "the thought of a violent action which has thrown St. Paul into the faith." (c) "Nothing, it seems, had prepared St. Paul for this vision. He tells us plainly (1 Cor. 9.16) that he had no choice; that the preaching of the Gospel had been forced upon him; that calamities would visit him if he did not preach it" (Guignebert, p. 294). He is certainly under the influence of a brusque and imperious command. The narrative of the two lines is evidence. The narratives of St. Paul's conversion in Acts exhibit a remarkable independence of the allusions in his epistles. It is quite impossible that the former should have been derived from the latter. No human ingenuity could construct the story of Damascus out of the material of Acts. The story of St. Paul in Acts is based on an independent source. (iii) The analogy of the two lines is evident. The narrative of the two lines is evidence. The narratives of St. Paul's conversion in Acts exhibit a remarkable independence of the allusions in his epistles. It is quite impossible that the former should have been derived from the latter. No human ingenuity could construct the story of Damascus out of the material of Acts. The story of St. Paul in Acts is based on an independent source. (iv) The relation of the exalted Jesus to the Father in Heaven is that of sonship in a sense entirely unique and indeed of complete equality. These four conclusions were involved in the central fact from which all St. Paul's Christology was derived—the death of Jesus seen in the glory of His Resurrection. This experience of St. Paul is the exact reverse to that of the Twelve. They began at the other end. In process of time, they met. Three years after his conversion St. Paul went up to Jerusalem and spent a fortnight with St. Peter. St. Peter and St. Paul represent two methods of approaching truth: the method of induction from innumerable instances; the method of inference from a single central fact. Yet their conclusions agreed. St. Paul in retrospect was
able to say of the influence of the elder apostles upon him that they " imparted to him nothing" (Gal. 2.6). This does not refer to historical details (cf. 1 Cor. 15.1-8), but to fundamental principles—doctrine of salvation, Christology, etc.—which he already grasped as completely as themselves.—(4) The Years of Preparation. Comparatively little is known of the first few years after St. Paul's conversion. Immediately after that event he retired for reflection into Arabia, thence returning to Damascus, which he left three years after his conversion in order to escape arrest, and going up to visit St. Peter at Jerusalem (Ac. 9.29-25; 2 Cor. 11.32; Gal. 1.18). After this he retired to Tarsus, whence after an unknown interval Barnabas brought him to Antioch, where they worked together for a year. Then they went to Jerusalem to take contributions from Antioch for relief in the famine, returning with St. Mark to Antioch (Ac. 12.25). The labours of this Syrian mission were comparatively obscure, but undoubtedly prepared St. Paul for his great work in the Gentile world.—(5) The Plan of Evangelization. The grandeur of St. Paul's conception is shown in his mention of provinces of the Roman empire rather than cities (1 Th. 1.7, 8; 1 Cor. 16.1, 15; Ro. 16.5; 2 Cor. 8.1, 92.; cf. Weizäcker, i. 251, 252). St. Luke has caught this apostolic spirit (Ac. 16.6, 9, 10). The familiar division into journeys of St. Paul is not the division prominent in the Acts or Epp. The four main provinces are Galatia, Asia, Macedonia, Achaia. (i) Galatia. The great authority of Bp. Lightfoot gave wide prevalence to the theory that the Galatian churches founded by St. Paul were to be sought in the N. district upon the Halys, inhabited by a Celtic population whose fervid, emotional nature explained many passages in the Galatian epistle. Many recent scholars, however, consider that the churches of Galatia are to be found in Pisidian Antioch, Iconium, Pisidian Asia, (cf. Ramsay, Karkham, McGift)—among other reasons because St. Paul elsewhere designates places by the official Roman names of provinces; because it is unlikely that he should have turned away from the Greek-speaking population; because it is difficult to discover a time when St. Paul came to have developed a church in N. Galatia; because it is extremely improbable that the conversion of the Galatians, to whom St. Paul was so profoundly attached and to whom he wrote one of his most important letters, should have been entirely ignored by the author of the book of the Acts. [Galatians, Epp. to.] Accordingly the evangelization of Galatia is identified with Ac. 13, 15, forming the principal portion of what is commonly called the first missionary journey. A definite commission of Paul and Barnabas, under circumstances of peculiar solemnity, sends them forward, after the visit to Cyprus and the meeting with an embassy of pagan superstition, to the province of Galatia. Note that the alternative name, "Saul, who is also called Paul," has nothing to do with deference for Sergius Paulus (Baur), but is a common diversity-name originating in bilingual government (Ramsay). At Perge they were desertecl by St. Mark, who returned to his mother's house at Jerusalem. "In passing from Perge to Pisidian Antioch the travellers passed from the Roman province Pamphylia to the Roman province Galatia, and the rest of their journey lay in Galatia until they returned to Perga" (Ramsay, P. the T., 92). According to Gal. 4.13, 14, the Galatian mission was begun during an illness, in which the Galatians, instead of despising his evidently humiliating infirmities, received him, as the apostle gratefully acknowledges, as an angel of God. Enthusiastic submission to the Gospel followed. Ramsay would explain the circumstances by supposing that St. Paul's illness was caused by the low-lying, malarial district in Pamphylia, which led him to seek the bracing elevation of Pisidian Antioch. This was St. Paul's thorn in the flesh, not an affection of the eyes. (For the contrary view, see Blindness.) Note St. Paul's order of evangelization. Priority everywhere to the Jew. He began in the synagogues; e.g. in Pisidian Antioch. There, also, would be met the Gentile proselytes among who he had dwelled in the Christian world, and naturally, for the proselytes had acquired a certain knowledge of O.T. and of the Messianic hopes of Israel, without becoming warped by the narrow prejudices of the Jew (Pfleiderer, Prim. Christianity, i. 113). The address in Pisidian Antioch should be carefully studied as an instance of the apostle's method of evangelizing. After founding the Galatian churches, St. Paul returned to Antioch. And here came to a crisis the relation of Judaism to Christianity. So long as Christianity was confined to Jerusalem, the convert, invariably a Jew, continued after conversion his Jewish observances, together with those of the new religion. And in the first extension of Christianity the missionaries, advancing northward along the seacoast, proclaimed it to none but Jews. However, in Antioch, with its more progressive ideas and half-pagan population, new problems arose. Converts from paganism were received into the church. The question was raised whether Judaism was an essential preliminary and accompaniment of conversion to the Christian faith. St. Paul saw that the future of Christianity was at stake. If that question was answered in the affirmative, the universality of the Christian religion would be made impossible. For the pagan world would never submit to become Jews, as a first condition of becoming Christians. Moreover, St. Paul understood, as comparatively few did, that the retention of Jewish observances as essential involved a discredit to the saving power and sufficiency of the Gospel. With characteristic courage, he determined on
taking the boldest course to go in person to Jerusalem, and hold conference with Christians of the most conservative type, in order to consummate the incident are preserved that by St. Paul in Galatians, written in all the strain and fervid emotion of the actual fight; and that of the Acts, written years later, and not unnaturally omitting the personality and bitterness. The issue at Jerusalem was by no means sure. The admission of Cornelius by St. Peter, years before, would seem to decide in principle the course which must now be taken. But many reasons combined to strengthen the reverence of the Christians at Jerusalem for the Jewish observances. The conservative instinct, justly strong in religion; the personal prejudice and deep, ingrained, inherited bias; the difficulty of bringing themselves to regard uncircumcised heathen converts as the equals of devoted adherents to the law; the fear of scandalizing their own nation, and rendering its conversion more improbable,—all these combined to strengthen resistance to the demand for the admission of Gentiles. And the personal example of Jesus' own conformity to the law impressed them more forcibly than an inference and a theory based on the character of the Christian faith. It must have required exceptional spirituality to rise superior to all these obstacles, and to endorse this limited acidity Paul. Two records, the latter three of the older school—St. Peter, St. James, and St. John—had this grace, and gave to St. Paul and his companions the right hand of fellowship. In the Council of Jerusalem, which was thereupon assembled, St. Paul appealed to the facts of his Gentile churches as manifest creations of the Holy Spirit. The powerful advocacy of St. James, as the ideal embodiment of the strictly Hebrew Christian type, undoubtedly reassured the uneasy majority, and drew them to consent to an expression of approval. Thus a decision was reached. St. Paul was to go to the Gentiles, St. Peter to the Jews, and a conference was held, ratified by a request, to which St. Paul readily agreed, that the Gentile churches should make an offering toward the maintenance of the poorer churches of Judaea. This was very important, as a practical recognition of the Pauline communities; and St. Paul made successful efforts to carry it into effect. Thus the Gentile churches obtained recognition. Nevertheless, this conclusion was only a compromise. It did not determine the relation of the Christian Church to the Mosaic observances. It permitted the existence of Gentile churches which did not keep the law, but it virtually assumed that the Jewish converts would continue to observe it as hitherto. And doubtless this was done. And when, soon after the Council of Jerusalem, St. Peter himself paid a visit to Antioch, the practical difficulty arose again. He began, in loyal obedience to the permission given in Jerusalem, to associate himself with pagan converts who lived independently of Jewish regulations. Thereupon, however, certain members of the older Jerusalem school arrived, who protested vigorously against St. Peter's conformity to laxer ways. St. Peter instantly, with characteristic impulsiveness, withdrew from association with the converts from the pagan world, and shut himself up, to their distress, in his inherited Jewish exclusiveness. This was another for the Jewish convert to abandon his Jewish traditions. The more conservative section was prepared for the former, it was not prepared for the latter. Thus the compromise showed its inherent weakness. The real principle had not been boldly stated. The ultimate fate of Jewish regulations must depend on the character and sufficiency of Christianity. The inconsistency of St. Peter was the perfectly natural result of his character when confronted for the first time with a problem practically unsolved. And so plausible did this reaction appear that even St. Paul's intimate companion Barnabas was carried away into imitation. St. Paul was left alone. But this abandonment forced him to a statement of principles. Characteristically, he went down direct to fundamental principles, and demonstrated once and for ever that Christianity as the religion could not require supplementing by the practices of a different covenant. Accordingly St. Paul publicly rebuked St. Peter: first for his practical inconsistency; and then, and more strongly, for conducting himself in such a way as to imply that justification by faith in Jesus Christ required compliance with the observance of the law—a line of thought which, though St. Peter had not realized it, would involve the most profound unfaithfulness to Christian truth. The sequel of the incident is not recorded. But undoubtedly St. Peter once again recanted his recantation, and conformed to the practices and principles of the older and more systematic movement. The battle of principle was won and the future of Christianity determined. But the greater part of St. Paul's career was still destined to be disturbed by narrow partisans of the older school who followed his course across Europe and invaded, wherever they could, the peace of his communities. (Cf. Pfleiderer, Prim. Christianity, vol. i.; Weinil, St. Paul—both very graphic accounts—in addition to Lightfoot, Galatians.) (ii) Macedonia. In the second missionary journey, St. Paul, after separating from Barnabas on account of St. Mark (Ac. 15.36f.), selected Silas as his companion, and subsequently also Timothy, and revisited the churches of Galatia (16.1-6). A glance at the map will show that from Galatia the most natural advance was into the province of Asia. Most probably St. Paul desired to cross westward to the great city Ephesus. But he was forbidden of the Holy Ghost to speak the Word in Asia (16.6). Accordingly, remaining over winter, he came straight to the province of Bithynia. Here again progress is frustrated (16.6-10). Note the triple mention of God in this section: "having been forbidden of the Holy Ghost" (ver. 6); "the Spirit of Jesus suffered them not" (ver. 7); "concluding that God had called us" (ver. 10). The three cities of Macedonia were Philippi, Thessalonica, and Berea. His reminiscences of the Philippian converts are unclouded (cf. Ph. 1.3-7, 4.15). The Thessalonian church was formed among the heathen population (see Th. 1.9, supplementing
PAUL

Ac. 17:1-9). Here also the apostles maintained themselves by their own labours (1 Th. 2:9). At Berea, Silas and Timothy remained after St. Paul was constrained to leave. On Macedonia, see esp. Bp. Lightfoot’s famous essay on the churches of Macedonia in his Hist. Eiren. In connexion with the evangelization of Macedonia may be placed the two epistles shortly afterwards (i.e. probably within a few months) written to a certain Macedonian church—Thessalonica. The two epistles to the Thessalonians were written during St. Paul’s residence of eighteen months at Corinth. Intended for an essentially Gentile-Christian church, their character corresponds. The prominent feature is their eschatology. The Church was living in the strain of vivid expectation of the Lord’s speedy return. The death of certain members raised in the minds of the survivors distressing problems, since these departed ones seemed deprived of the blessings dependent on the Lord’s return. St. Paul accordingly assures the survivors that no spiritual loss would thereby accrue to those who died before the return of Christ. 1 Th. 4:13-18, the central passage of the epistle, is a striking illustration of the effect of Christianity upon essential Jewish conceptions. The second epistle, written not long after the first, resumes the subject of the Second Advent. Local fervour was insisting on the almost immediate return of Christ, and St. Paul assures the Thessalonians (2 Th. 2:1-12) that that day will not come until an apostasy, or falling away, first takes place; as a second stage of sin, or preparation, enthroned in the temple of God, may well refer to a Jewish force having its headquarters in the temple at Jerusalem, and opposing the progress of the Christian religion. But St. Paul alludes mysteriously to a restraining power (possibly imperial) which hinders the full development of this anti-Christian element. Certainly Jewish fanaticism was held in check by Roman military and judicial power, the removal of which would be followed by a terrible outburst of Jewish hatred against the faith. Possibly the mysterious character of the passage is increased by the necessity for cautious expression of the Pauline conception. The emperor might be easily construed into a charge of treason, and he therefore expresses himself in language which was clear only to those who were in possession of the key” (Drummond on Thess. p. 11). (Cf. B. Weiss, Bibl. Theol. i. 281: Mason in Elliott’s Commentary, and esp. Drummond.) (iii) Athens (Ac. 17:15-18.18). The mission comprised two great cities—Athens, the intellectual centre, and Corinth, the commercial. (For the contrast, see graphic account in McGiffert, Hist. Christ. Apost. Age, pp. 259-263.) (a) Athens. (See Ramsay’s admirable description: P. the T.; Curtius, Pauius in Athen.; and S. Augustine’s Serm. cl.) St. Paul’s speech at Athens is a supreme instance of versatility created by insight and sympathy. (b) Corinth. The transition from Athens to Corinth was a total change of atmosphere, from the intellectual to the industrial; demanding a textual apostle’s versatility was master of both. The mission to Achaia is really the history of the Corinthian church, of which more is known than of any other Pauline foundation. St. Paul was the first to proclaim Christianity there (1 Cor. 1.3, 10.4.16; see also Ac. 18). For the substance of his evangelizing message, see 1 Cor. 15.11f., and 1.23). He did not begin by denying the supposed idolatry; but by the doctrine of redemption. He addressed himself to the sense of guilt and need of reconciliation existing everywhere (Weizsäcker, i. 316). Here he resided eighteen months, not a little aided by Roman official refusal to intervene in Jewish religious disputes. Aquila and Priscilla, and subsequently Apollos, supported him (Ac. 18.2, 3, 21, 19.1). (iv) Asia (19.1-41). After his mission to Achaia, St. Paul left Corinth with Aquila and Priscilla (18.18), and, after a short visit to Ephesus where he left his companions, sailed for Syria. Then followed another visit to the churches of Galatia (St. Paul’s residence now such for two years (19.10). The province of Asia, left hitherto unevangelized (see 16.6), embraced the whole W. division of Asia Minor. Its capital was Ephesus. Timothy and Erastus were with him here. The further instruction of the Baptist’s disciples in Christianity, the daily Christian instructions in the lecturium of Tyrannus, and of the Jewish exorcists, the burning of the books, show the general nature of this evangelizing work. These conflicts culminated in the action of Demetrius, which sprung from muddled piety and self-interest, and St. Paul’s visit was brought to an end. But the mission was not as a whole unfruitful in detail, but in his conception of Christianity. (i) The Galatian Epistle was evoked by St. Paul’s Judaizing opponents, who objected against his mission the character of which was held in check by Roman military and judicial power, the removal of which would be followed by a terrible outburst of Jewish hatred against the faith. Possibly the mysterious character of the passage is increased by the necessity for cautious expression of the Pauline conception. The emperor might be easily construed into a charge of treason, and he therefore expresses himself in language which was clear only to those who were in possession of the key” (Drummond on Thess. p. 11). (Cf. B. Weiss, Bibl. Theol. i. 281: Mason in Elliott’s Commentary, and esp. Drummond.) (iii) Athens (Ac. 17:15-18.18). The mission comprised two great cities—Athens, the intellectual centre, and Corinth, the commercial. (For the contrast, see graphic account in McGiffert, Hist. Christ. Apost. Age, pp. 259-263.) (a) Athens. (See Ramsay’s admirable description: P. the T.; Curtius, Pauius in Athen.; and S. Augustine’s Serm. cl.) St. Paul’s speech at Athens is a supreme instance of versatility created by insight and sympathy. (b) Corinth. The transition from Athens to Corinth was a total change of atmosphere, from the intellectual to the industrial; demanding a textual apostle’s versatility was master of both. The mission to Achaia is really the history of the Corinthian church, of which more
and directing the old Greek spirit, the natural man, unsobered by such a discipline as that which Israel had experienced, and therefore breaking out in various perfectly explicable phenomena of self-assertion. Their questions on the Christian law of marriage and the limits of self-restraint; the liberty of the individual in social festivities and heathen sacrifice; the freedom of the individual in the expression of his spiritual gifts; all were products of the same spirit asserting itself in the various departments of human life—sexual, social, religious. St. Paul, after dealing with divisions in the Church (1 Cor. 1-4), disorder in the home (5), opposition in the world (6), answers these. The solution which he had not ventured on yet seen altruism—edification, not self-assertion (7-14).

In every question St. Paul characteristically penetrates to fundamental principles; cf. esp. the chapter on the Resurrection of Christ (15).

(iii) 2 Corinthians presents peculiar difficulties, of which Sabatier (The Ap. P. 174) offers the following view: the Apostle’s letter had left the Corinthian church divided into a majority sympathetic and loyal, and a minority adverse and perverse, full of Jewish prejudices and opposed to the apostle’s authority. Hence this second letter displays a double plan: part 1 (2 Cor. 1-7) being addressed to the faithful majority, as pathos, and part 2 (8-13) to the hostile minority, the most ironical he ever wrote. (Ch. 8, 9 are a digression on the collection.) (iv) The Epistle to the Romans was probably written from Corinth during the three months’ visit to Achaia (Ac. 20.2, 3). It differs from all his other letters in being addressed to a church which he had not founded nor yet seen. It is the most complete of all the apostle’s writings, yet “it implies a common basis of Christian teaching which the apostle is able to take for granted as already known to his readers, and which he therefore thinks it unnecessary to repeat without special reason” (Sanday and Headlam, Introduction, p. xxi). St. Paul’s chief aim in his letter is that just the most fundamental doctrines—the divine lordship of Christ, the value of His death, the nature of the Sacraments—are assumed rather than stated or proved. It is the ripened fruit of the thought and struggles of the eventful years by which it has been preceded (ib. xlix). The problem of permanent importance is: How is man to become righteous in the sight of God? “And the answer is (a) by certain great redemptive acts, on the part of God, which take effect in the sphere above, though their consequences are felt throughout the sphere below; (b) through a certain ardent apprehension of these acts and of their author, Christ, on the part of the Christian; and (c) through his continued self-surrender to divine influences poured out freely and unresumptively upon him” (ib. p. xlvii).—(7) The Captivity. The four great controversial epistles are followed by practical advice. Rome has long been his goal. Jerusalem must again be visited to take in the offerings of the Gentile churches (cf. 1 Cor. 16.1-9 with Ac. 20.31ff.). His journey to Syria was taken through Macedonia (in consequence of a Jewish plot), and he retraced his course from Philippi to Troas (Ac. 20.1ff.). That the visit to Jerusalem might end disastrously was in his anticipations (see Ro. 15.31; Ac. 20.22, 21.27). The suspicion that he had admitted a heathen into the temple precincts roused Jewish fanaticism to a white heat. (For the Warning Tablets on columns dividing the Court of the Gentiles from the inner precincts, see Rob- son’s Ephe. pp. 459, 460.) Hence the arrest. This period is elaborately recorded in Acts, to show the Roman attitude towards Christianity (see McGiffert, Hist. Christ. Apost. Age, p. 348).

St. Paul comes before three different Roman officials (Claudius Lysias, Ac. 23.26; Felix, Ac. 24; Porcius Festus, Ac. 25), two of whom testify to his innocence, while the third shows him undesirable favour and only refrains from setting him free because of avarice and a desire to conciliate the Jews (cf. Ramsay, P. the T.). St. Paul is twice led to relate the experiences of his own conversion—one in Jerusalem, and once in Caesarea. The two years’ imprisonment in Caesarea is followed by the surrender of the voyage, see Smith, Ship-wreck of St. Paul.) Rome becomes the scene of two more years’ imprisonment (Ac. 28.30).—(8) The Epistles of the Imprisonment are four: Philippians (for the alternative view as to date, see Philippians, Ep. to), Colossians, Ephesians, and Philemon. (i) The Philippians. St. Paul in Rome by Epaphroditus, who took back the Epistle to the Philippians (Ph. 2.25-30, 4.18). (See the reference to it in Polycarp’s letter to the Philippians.) St. Paul’s epistle was prompted by no doctrinal error, but simply by personal affection. The weakness of that church was a spirit of rivalry and division; accordingly the apostle urges to hear of them as “with one mind striving together for the faith of the gospel” (1.27); and urges in the central passages of the letter the lowliness and humility manifested in the Incarnation. (ii) Colossians becomes luminously clear if we assume that a theory of gnostic speculation had invade the church of the same name. The interstice between Absolute Being and the material world was imagined in such speculations to be occupied by orders of intermediary creatures, celestial hierarchies, who formed a connecting chain between spirit and matter. This theory was in its nature emphatically anti-Christian, and must of necessity, if accepted, displace Jesus Christ from His unique mediatorial position, and indeed compromise His Person. Hence St. Paul was led by the local needs of Colossian speculation to restate Christology in the clearest and most emphatic terms. We here get the noblest exposition of Christ’s redemptive work, of the sway of His Person and its relation to God. Christ is “the Son of His love” (1.13). In Him we have our redemption. He is “the image of the invisible God, the firstborn of all creation” (1.15). Creation is related to Him in a manner expressed by the three prepositions: “in Him, as Redeemer; "through Him," as instrument; "unto Him," as final cause (ver. 16). Moreover, “He is the head of the body, the Church.” He is “the firstborn from the dead, that in all things He might have the pre-eminence.” Through Him the Father reconciles all things unto Himself (ver. 20). In brief, “in Him dwelleth all the fulness of the Godhead
bodily" (2:9). (See Oltramare, Colossians, i. 42 fl.) (iii) *The Epistle to the Ephesians* is an encyclical for more than local use. In it St. Paul sets forth the idea of the universality of the Christian hope. All men, Jews and Gentiles alike, are drawn together ‘in Christ’ into unity in the Universal Church (3:6). Unity is reiterated (4:1-16). The Church is viewed, not as local but as ideally catholic, co-extensive with mankind. This last is the natural and logical result of all the apostle’s previous teaching. It crowns the development of his thought on the body of Christ. (iv) *Philippians, Epistle to*, see separate art. — (b) *The Later Mission.* It seems incredible that St. Luke could have closed his account of St. Paul with a reference to two years of unbridled preaching in the hired dwelling, if he was aware of the apostle’s martyrdom (cf. Rackham, *Acts*, ii, iii). The account was surely written before the trial of St. Paul in Rome. That the apostle’s release (iii) was a mere conditional release, is undisputed. Both the Muratorian Canon and the Epistle of St. Clement speak of St. Paul’s later missions. The journey to the extreme limits of the West, probably Spain, was now undertaken. This tradition is supported by the evidence of the Pastoral Epistles, which contain notices of St. Paul’s errors during the period covered by the writer, but for their incidental notices do not permit it, and their style is suggestive of advancing age: see Findlay, appendix to Sabatier, *The Ap. P.* (1903). Once more the apostle is found in Macedonia (1Tim.1:3). Having sent Timothy to Ephesus, he leaves Titus in Crete (Tit.1:5), and proposes to go to Tyre and Damascus (2:12), apparently, but where we know not (perhaps at Ephesus), he was arrested. 2Tim. represents him imprisoned again in Rome. His companions were scattered (2Tim.1:15). He pleads passionately for Timothy to come to him. He is almost in solitude (4:10, 11). He has already been placed on his trial (4:16). He thinks the end is near (4:6ff.). Then follows the language of assurance, never found in earlier years, but most natural on the dying lips of the mature and victorious saint. — (o) *The Pastoral Epistles.* In the Pastoral Epistles redemption is characterized by the grace of the God who is for us, not against us, punishment (Tit.2:14). It is the Church rather than the individual which is the recipient of the blessings of salvation (Findlay, *ib.* p. 381). The passage on baptismal regeneration (Tit.3:5) matures and completes the apostle’s earlier conceptions. Here also the reception of grace is through the laying on of hands (Tit.3:14, etc.); also a further stage in the development of the Christian ministry is reached, yet one far less matured than that in the letters of St. Ignatius. The function of authority is the faithful transmission of truth received (2Tim.1:14). The idea of orthodoxy ("sound words") with the correlative idea of heresy: the significance of the Church in relation to the preservation of truth; tradition and apostolic succession, — all are characteristic of the Pastoral Epistles. And all these are natural in an aged apostle resigning his work into the care of a younger generation (cf. also *Acts* 20:18-35). (ii) *The First Epistle to the Thessalonians.* *Comm.* : Salmon, *Intro. to N.T.* ; Plummer in *Expositor’s Bible*; Findlay in *op. cit.* : B. Weiss, *Bibl. Theol.*. — (1) St. Paul’s Theology. — (1) St. Paul’s Doctrine of the Moral Law. The apostle’s entire religion begins with the conception of God as Righteousness. This noble and sublime idea was the gift of Judaism to humanity. By St. Paul it was inherited, deeply ingrained into his very nature, and accepted with the joyous consent of his inmost self. For the apostle was a man with a passion for rightousness. To be righteous would be to come at one with God’s holy will. And the moral law is the expression of that holy will. Accordingly, the moral condition of humanity will be proved by its relationship to the moral law. It is most significant that St. Paul in his greatest exposition of Christian truth sets this inquiry first, as the basis and presupposition of the Christian doctrine of redemption. And manifestly this order must be right. The ultimate religion must correspond with human facts and needs. Nor can the appeal of Christianity be valued until there exists a capacity to make response. And this will in turn depend on consciousness of personal defect and powerlessness. No small part of the task of Christianity is to create the disposition to which its principles can appeal. St. Paul’s estimate of the moral condition of mankind is well expressed by the words:— (2) *History* (Ro.1-3:8). Dividing mankind into the two departments of Jew and Greek, or chosen people and pagan multitude, he begins with a demonstration of the failure of paganism to satisfy the moral ideal or secure the righteousness of God (1:18-32). He does not in this terrible indictment intend to deny the existence of moral excellences (cf. 2:14), but he emphatically denies the competence of paganism either to regenerate mankind or to fulfil the requirements of the righteousness of God. He next proceeds to demonstrate that the privileged Jew was in reality in no better state. The form of his transgressions might differ from those of the pagan, but his inability to fulfil the moral ideal was no less certain (2:17-3:8). (b) Scripture confirms this conclusion (3:10-18). (c) Experience agrees (ch. 7). Personal experience testifies that the moral law presents a high and lofty standard, above the reach of all but a few, and that most do not obey (7:22-25). Recognition of the moral beauty of the will of God co-exists with a state of practical contradiction with it. Thus moral law which, if obeyed, would become instrumental for life and salvation, becomes, since it is disobeyed, instrumental for condemnation and death (cf. *2Cor.5:7-9*). This ruinous effect of moral law is not its fault; it is holy and good and true. The fault lies in the powerlessness of the human will, and man’s defective moral state. Moral law, by its very nature, gives the ideal but not the power, and consequently never can be the means for human salvation. — (2) *St. Paul’s Doctrine of Sin.* Ro.5:12 (R.V.) contains four great affirmations on human sin: first, that it originated in the transgression of one individual; secondly, that it resulted in physical death; thirdly, that physical death is universal; and finally, that this universality of physical death is because all sinned. "Meaning that what was true of the first Adam, as recorded in *Speaks l.* "Fifth Adam, "was compromised by it (cf. Meyer, *Comm. on Rom.* ; Liddon, *Analysis*). This interpretation seems confirmed by: (i) St. Paul’s conception
of death. It is certain that physical death was not regarded by him as an experience divinely intended for sinless human beings. He was well aware that the physical constitution was, if left to itself, liable to corruption. But he did not identify liability with necessity, nor separate physical experience from moral state. According to his inherited and personal conviction, by man came death, and death was the wages of sin. Now, he could hardly mean that physical death was invariably the result of actual transgression; else why do infants die? The interpreter has no right to ascribe to so acutely logical a mind obliviousness to so widespread an experience. St. Paul clearly regards the universality of death as due not to the sin of each individual, but to the sin of the race. (ii) St. Paul's conception of mankind. He did not regard mankind as isolated units accidentally involved through similar but independent actions in a similar fate. "To the apostle, humanity is not merely the sum-total of all the separate human individuals, it is rather an organic human race" (B. Weiss, Bibl. Theol. i. 332). He believed in the inherent sinfulness of all mankind, a view clearly expressed in the teaching of his teaching (Ac 17.26). The ancient world did not isolate theoretically the individual from his kind; but rather valued him, as he valued himself, relatively to the social community of which he was a member. Historically, the social view of mankind precedes the individualistic view of the Fathers. St. Paul's contemporaries considered the fortunes of the race with Adam's sin. The striking apostrophe to Adam in 2 Esd 7.48—"O thou Adam, what hast thou done? for though it was thou that sinned, thou art not fallen alone, but we all that come of thee"—appears to be only an illustration of the later Jewish belief (see Stevens, Pauline Theology, p. 125). Indeed, it is acknowledged by some who differ widely from St. Paul's conviction, that "it is clear that he in some way connected the race's sinfulness with Adam when he so strongly insisted on our moral solidarity with the one man" (T. Davidson and Headlam, Hist. of Theol. p. 145). It is quite true that St. Paul does not directly explain how the sin of Adam affected the race. He does not say that it was by transmission of some positive evil principle to all subsequent generations. For this theory he is not responsible. If he believed that the result of Adam's sin was loss of the Holy Spirit, then the effect upon the race would be negative rather than positive, the reduction of the race to a lower level; which certainly would agree with his idea of the natural man (see below). But in any case, while he did not explain the manner in which the race is affected, he affirmed the fact. (iii) The parallel between Adam and Christ. To St. Paul's doctrine plainer still. For he insists that the actions of Christ affect the human race (Ro 5.14-21; cf. 1 Cor 15.22). The two individuals whose effect upon the race is universal are the first and the second man (rv 45.47); the first pernicious, the second redeeming. St. Paul maintains clearly a wide influence of Adam's sin (cf. Stevens, Pauline Theology, p. 126). (iv) St. Paul's conception of sinfulness is by no means that it consists in isolated acts. No doubt sin is an act of the will; but the atomism which views each act as leaving the personality practically unchanged is as thoroughly Pelagian as it is absolutely un-Pauline. To St. Paul sinfulness is a state, rather than a deed. It exists apart from concrete expressions. "It does not denote a particular wrongful act, but an inner state of which particular sins are but external manifestations (Sabatier, St. Paul, p. 307). The sinfulness issues in sins (Ro 7.8). But the deeper question is, Can sinfulness exist not only apart from consciousness, but also apart from will? It has been acknowledged that a very young child can present a spectacle of perverse and passionate self-will which is "positively appalling. Is this a healthy self-assertion, to be welcomed as a prophecy of future strength, or a ground for distress as of that which morally ought not to be? Many able exponents of St. Paul acknowledge that he "conceives of a sinfulness or corruption of nature which may lie entirely without consciousness, and in which the personality may have no part" (McGiffert, Hist. Christ. Apos. Age, p. 124). Evidence of his teaching is that "sinfulness" or "sinfulness" is employed with a much more comprehensive meaning than as denoting separate acts of the individual will. It would be a condition involving no individual responsibility. And St. Paul nowhere describes the race as "guilty" or "punished" in what it "itself" experiences. (v) St. Paul's conception of the "natural man" (1 Cor 2.14) is in harmony with these thoughts. It is man as unillumined and unsanctified by the Holy Spirit; man whose central source of activity is his own psychical nature, so that neither the Divine Truth nor the Divine Life is its animating and controlling principle. It is the mere human independence and self-sufficiency; the living in the interest of his own mere natural life (cf. Meyer, in loc., p. 70). Conversely "the spiritual man" is man illumined and sanctified by the Holy Spirit. (For St. Paul's doctrine of sin, see, besides works quoted above, Sandy and Headlam, Hist. of Theol., pp. 137 ff.). The Doctrine of the Person of Christ. On the relation of Christ to God, a critic far remote from the Christian belief admits that "St. Paul tends, perhaps in part unconsciously, to identify Jesus with God; and if the Jew in him prevents the complete accomplishment of this, if he still admits distinction of persons and inferiority of the Son to the Father (1 Cor 11.3, 15.28), yet this inferiority is in certain places scarcely perceptible" (Guignebert, Manuel d'hist. anc. de Christ.). Most remarkable is the application to Christ of the title Κύριος (cf. 1 Cor 8.6, "one Lord Jesus Christ"). It implies, says Sabatier, "an absolute sovereignty over conscience, over the Church, and over the historic development of mankind" (ib. p. 104). It is the LXX. rendering for Jehovah. Ascribed to Jesus, it signifies that Jesus is for the Christian conscience what Jehovah was for the prophetic. Thus the day of Jehovah" becomes "the day of the Lord" (1 Th 5.2). Then St. Paul applies to Christ O.T. passages which treat of the Κύριος, Jehovah (1 Cor 3.16, 10.22). He ascribes to Christ the final judgment on the human race, and a perfect insight
into individual character and circumstances only possible to the All-Wise (1 Cor. 4:5). The O.T. phrase, "the worshippers of Jehovah," is transposed boldly by St. Paul to "the worshipper of Christ" (cf. Rom. 10:12; see Sanday and Headlam, op. c.). "Accordingly," says B. Weiss, "it cannot be surprising if in Rom. 9:5 Christ is exalted as Lord του χριστου, for certainly this is the certain clue to all the explanation is certainly natural (B. Weiss, Bibli. Theol. i. 303). Since the title "Son of God" was gradually filled with deeper meaning, passing through the three stages of adoptive, official or Messianic, and personal or essential identity of nature, it is conceivable that St. Paul might have employed the same orphic ideas. Yet when he gives as supreme proof of the Father's love for mankind the fact that He sent His own Son (Rom. 8:3, των ιδιων υιων), and spared not His own Son (του υιου του θεου), thus sacrificing for mankind what He loved the best (B. Weiss, i. 400, 401); above all by the constant and deeply striking antithesis between God the Father, and God the Son, St. Paul shows that he employs the term in the very highest of senses. Moreover, the full weight of this testimony of St. Paul will not be appreciated until we realize what it must have cost a Jew, with his almost invincible repugnance to rivals for deity, to equalize Jesus with Jehovah in his own adoration and conscience (see also Knowling, Testimony of St. Paul, pp. 39, 40). The later Pauline epistles give, as might be fairly expected, both from the requirements of the Church and from the apostle's mental development, mature expressions of the same fundamental beliefs. The great Origenist passage, Philem. 2-5-11, affirms: (i) Our Lord's pre-existence and divinity. And since Jn. 17:5 is sometimes interpreted of a merely ideal pre-existence of our Lord in the mind of God, it is necessary to emphasize the fact that no such interpretation is possible here. For the exercise of personal relations is predicated in that personal existing state are here ascribed to our Lord. You cannot ascribe to a pre-existent ideal self-conscious thought and will, nor transition from one state of being into another. Accordingly Weizsäcker, although not accepting the personal divinity of Jesus, yet acknowledges that St. Paul here taught "the personal existence of Jesus before His human birth" (Apost. Age, i. 146; Knowling, Testimony of St. Paul, pp. 66-118; Col. 1.17; Eph. 1.23). But manifestly pre-existence does not necessarily involve divinity. The question therefore is, in what capacity did Christ pre-exist? St. Paul says, "being in the form of God" (Ph. 2.6; R.V. marg., "being originally," εν ομοιωσει). The phrase "form of God" admits of only two ultimate interpretations: either it denotes moral resemblance or essential identity, either createfully excellence or actual divinity. Now, that it cannot mean the first of these appears certain, because: (a) To interpret St. Paul as if he were an Arian crediting our Lord with such pre-existence as is possible for one who, if supernatural, is only a creature, separated therefore from real equality with God by an infinite abyss, is to introduce a conception utterly foreign to the apostle's mind. (b) The expression "form" (μορφη) signifies the manifestation of the essential nature—that by which the inner essence is revealed. The "form of God" accordingly must denote the essential attributes of Deity—that which declares God as He exists in His very nature and being. Accordingly it would be inapplicable to any creaturely resemblance. It would not be scriptural nor natural to describe an angel, or any supernatural created being, as existing in the form of God. (c) The expression "form of God" is contrasted presently with "form of a servant". Now, the latter certainly does not indicate moral resemblance with mankind, but identity of nature. Consequently the former must also signify identity of nature with God. Our conclusion is that what St. Paul here affirms is the pre-existence of Christ in possession of the attributes of Deity. It is indeed quite true that St. Paul throughout this passage keeps Christ and God distinct. He never merges the One into the Other in an identity in which distinction of personality is destroyed. "This subtle distinction," says Weiss, "is the Trinitarian doctrine explains. What St. Paul asserts is the equality of Christ with God in possession of the attributes of Deity. In ecclesiastical language, he neither confounds the Persons nor divides the Substance of Deity. (ii) Our Lord's condescension. He did not descend from God as a prize, or thing to be grasped at (R.V. text and marg.). The "form of God" and the "equality with God" are not two different things, but the same from two different points of view (see Meyer). "He viewed His possession of the fulness of the eternal nature as securely and inalienably His own, and so He dealt with it for our sakes, . . . far from thinking of it as for Himself alone, as one who claimed it unlawfully would have done" (Bp. Moule, Philippian Studies, p. 93). Contrast this accurate paraphrase with the following: "He did not wish to win it [equality with God], for any creature has any title to it. The idea of "form of God" means. But the idea of illegitimate ambition and forcible means can only be introduced into the passage when the existence in the form of God has been explained away. There would be nothing to be specially commended in freedom from blasphemous aspiration after an equality with God, which it is impossible for any of God's creatures to acquire. Very different indeed is the character of One Who, possessing equality with Deity, was prepared to accept a lower estate. (iii) Our Lord's Incarnation. Instead of grasping in His own exclusive interest, as He could have done, His attributes of identity with Deity (το σωτηριον), He emptied Himself of the form of God which He possessed, i.e. of the divine glory in its exercise and manifestations—emptied Himself, by taking the form of a slave, so coming into the reality and appearance of man. And this condescension was carried out by Him to the lowest conceivable humiliation, even that of death, and of death in the most abrupt and painful of all its forms. Yet cf. Col. 2.9, "In Jesus Christ dwelt all the fulness of the Godhead—all that makes God in the full sense of the term God—bodily, that is in organic unity and completeness." (Denney, Death of Christ, p. 199).
St. Paul does not explicitly reconcile his Christology with his Monotheism. That he equalizes Jesus with God is certain. That Christology and Monotheism were reconciled within his own mind seems equally certain. For his systematic logical nature necessitated this, and speculation is assuredly not excluded from the Pauline view. We can only feel that the magnitude of the Christian Revelation forced him to expand his inherited conception of Deity in such a manner as afterwards obtained, through Greek thought and language, explicit affirmation in the Christian creed.—

(4) *Pauline Conception of the Death of Christ.*

Why was, Why did Jesus die? That it was for us, for our sins, is stated by St. Paul repeatedly. But this statement involves a dogmatic theory. In St. Paul we first find the elements of a philosophy of the death of Christ. According to him, it possessed a saving value because it satisfied the divine wrath against sin (cf. Rom. 3:23). The redemptive nature of the sacrifice is implicitly maintained. What is the apostle's justification for this view? (i) The original attitude of God towards sinful man is conceived by St. Paul as aversion, indignation (cf. Eph. 2:3). "Children of wrath" can only signify objects of the divine displeasure (cf. Ro. 1:18, 5-8, where the wrath of God is shown to attend Gentiles and Jews alike who do amiss; see Dean of Westminster, *in loc.*). "By nature" does not signify by creation, but rather as self-constituted, apart from the special influences of the Holy Spirit. This attitude of divine aversion is not merely an inference from isolated texts, but an adaptation of the entire conception of God's character. It is a necessary expression of divinest righteousness. (ii) Hence the necessity for the reconciliation not merely of man to God but of God to man. The idea of reconciling God to man was perfectly familiar in Israel. "At that time," says Weinel (St. Paul, p. 302), "the principal passages for St. Paul's doctrine of Christ's death are: (a) Ro. 3:25. 'It is impossible to get rid from this passage of the double idea (a) of a sacrifice; (b) of a sacrifice which is propitiatory... Whatever sense we assign to διανοίας... the fundamental idea which underlies the word must be that of propitiation. And further, when we ask Who propitiated we answer can only be 'God.' Nor is it possible to separate this propitiation from the death of the Son" (Sandy, *Romans,* p. 91). (b) Ro. 8:3 (R.V.). 'Do we ask how sin was condemned? The answer is, it stood condemned by the perfect sacrifice of reparation for sin which the sinner man made to the divine Character on our behalf, when at the requirement of obedience He shed His blood' (Bp. Gore, *in loc.*). The statement "We were reconciled to God by the death of His Son" (Ro.8:10) appears at first to suggest a change in our attitude toward God rather than in Him. But the real meaning of the verse is just the opposite. For "reconciled" corresponds with "justified" (ver. 9), and this is an act of God and a gift to us. Moreover, in ver. 11 we are said to have "received the reconciliation." It is therefore a gift bestowed by God upon us. "We are reconciled to Him when we are restored to His favour" (Gifford). And further, this reconciliation has been wrought not by any change in us, but by the death of God's Son. Thus the suggestion is not that Christ's death appealed to us and thereby produced a subjective change but rather that independently of us it had already produced objectively a Godward result (cf. Liddon, *Analytical Commentary on the New Testament.* For discussion of the Christian message is that of 2 Cor. 5:17-20—i.e. on the basis of a reconciliation already objectively achieved, do ye individually become subjectively reconciled with God (cf. Pfleiderer, *Prim. Christianit.,* l. 327, 328). Thus the formula in the Anglican Articles, although not verbally Scriptural, is subsumed approximately. The commercial and legal metaphors by which St. Paul illustrated and interpreted the Atone ment to his contemporaries must not be misapplied so as to conceal the profoundly moral and spiritual character of his teaching. St. Paul's doctrine of reconciliation, expressed in other terms, appears to be that the fallen race beingeti under the wrath of the All-holy One... and also absolutely incapable, through sinfulness, of making by perfect penitence a real reparation or homage to the divine Character. Accordingly reconciliation presents a problem which it is impossible for man to solve. The move of God towards sin is the solution. He created within humanity a sinless perfection in union with the Person of the eternal Son. This union it was which made such existence possible. But yet it is rather as human perfection that Christ effected reconciliation of God with mankind. Being sinless, His human mind was in perfect sympathy with the moral character of God and also with the needs of mankind. Accordingly, the Father has enabled mankind in Christ to express its perfect abhorrence and condemnation of sin. Already in Christ mankind is reconciled with God; for God can contemplate mankind as this instance of the redemption of the ideal realized. Of course Christ must not be, and was not in the Pauline doctrine, considered in the isolated seclusion of pure individualism. St. Paul's conception of the solidarity of the race is necessary to the consistency of the doctrine. Thus, ideally, Christ's sorrow is the sorrow of the race solve, which the individual is to be slowly brought into harmony. St. Paul never separated in his own mind the death of Christ from the resurrection. The former is always interpreted by the latter. Even where no mention of the resurrection occurs, it is invariably the tacit assumption, without which no exposition of the death
could be given. He could have had no gospel of the death were it not for the gospel of the resurrection. Not only was this required by his own experience, but it was logically and dogmatically essential (cf. Ro. 4:25; see further Liddon's Analysis of Romans; Simon, Reconciliation; Trench, Synonyms, s.v. κατάλαβεί: Stevens, Pauline Theology; Du Bose, Gospel in the Gospels; Gaston Frommel, Études morales et relig. pp. 281 ff.—(5) The Doctrine of Justification. This is the subjective side of redemption. God being already objectively reconciled to mankind in the perfect human Being, our Lord's work is also to realize and reproduce His own moral perfection in the hearts of individual men. We may, theoretically, for purposes of discussion, sever the two; but the objective reconciliation remains practically incomplete, ineffective, and external until realized within the moral being of the individual. (i) Human justification is primarily the imputing of Christ's righteousness to the individual. The believer is accounted righteous. And this, not as a mere fiction—although of course it is true that all forgiveness begins with a fictitious element—for it consists in treating another being the same as oneself. But regarding the individual as righteous may be described as (a) an anticipation of a condition which he is ultimately to achieve. We are justified therefore—to use Augustinian terms—not for what we are, but for what, by the grace of God, we are to become. Moreover, this justification is (b) incomplete, or, as St. Augustine means not confidence or trust, or the mere intellectual assent to a series of propositions (although such intellectual assent and such trust cannot be excluded), but rather self-surrender to a Person. Faith is devotion to a Person, an intention to look at Life from Christ's point of view, and think His thoughts after Him, and yield oneself to His obedience, accepting Him as what He claims to be. And this is most justly considered as being righteousness; for it is all the righteousness which at the initial stage the converted soul can possess. And it contains within itself the promise of all subsequent moral development. This is the real righteousness as far as it goes. (ii) But righteousness must not merely be imputed; it must be afterwards progressively imparted. The accounting a person righteous may be theoretically separated from the making him righteous, but it is evident that the divine work must go on to realize in effect what it purposes by anticipation. As Newman said, the voice of the Lord is creative; it tends to effect what it affirms. "He spake the word, and they were made." The ultimate purpose of the Incarnation is neither instruction nor forgiveness, but the infusion of a new vital force derived from the glorified manhood of our Lord. It is a revelation of grace. And if grace is primarily divine benevolence toward sinful mankind, yet "grace must not be conceived as external to mankind. It is an active power, a regenerative force, acting within the being of the individual" (Sabatier, St. Paul, p. 258); it is the God who imparts the power, creates in him a beginning of righteousness which becomes the fertile principle of sanctification (ib. p. 322). The relation between the Christian and the glorified Christ is, according to St. Paul, most intimate. St. Paul is probably author of the striking phrase "in Christ." It represents the atmosphere in which the believer lives (Goguel, op. cit. p. 260). Believers are, moreover, "one body in Christ (Ro. 12:5). This infusion of a new vital, moral, and spiritual force into the weakened human character is the crowning glory of Christianity. It produces from St. Paul the paradox "I laboured... yet not I" (1 Cor. 15:10, and the thanksgiving of Ro. 7; and from St. Augustine the famous sentence concerning the Church in the Day of Judgment "Deus coronabit non merita tua quam dona sua" (serm. clxx. p. 1190, vol. v.). Thus justification is a transition from nature to grace. (On St. Paul's doctrine of justification see further Lp. Bull; Newman, Essay on Justification; Sabatier, The Ap. Paul; Sanday and Headlam, Romans; Bp. Gore on Romans; Du Bose, Gospel of St. Paul; also our art. JUSTIFICATION)—(6) Sacraments, Pauline Idea of the. St. Paul, says Weinel (St. Paul, p. 117), "knows yet another way in which God comes down to man—viz. in sacraments. There is but one true explanation of the sacraments, however. Theology: the orthodox; all others, especially all modern theological explanations, are but compromises and modifications of this pre-Christian idea, the contradiction of which with our religion we have felt since the Reformation in an ever-increasing degree. Sacraments are the external means by which the Lord imparts Himself. God imparts Himself and that, so that He suffers man to share in His almighty, superhuman life and in His holiness." "The fundamental idea of the sacrament has perhaps nowhere been expressed more clearly than by St. Paul in 1 Cor. 10:16 ff. Those who eat the sacrifices from the altar at Jerusalem are 'sharers' with the altar, have communion, enter into fellowship with it—i.e. with the life and holiness of Jehovah. Those who eat the sacrifices offered to idols enter in like manner into fellowship with demons. And then St. Paul turns in the third place to the Lord's Supper, and asks the question: 'How one partakes of the body of Christ, has a share in Christ, enters into fellowship with Him' (ib. p. 119). [W.J.S.B.] Pavement. [GABRATHA.] Pavillon, a tent. The A.V. so renders three Heb. words. (1) sôkîh (Is. 27:5), otherwise den (10:10), tabernacle (76.12), court (1:25-18). (2) sukkâ (2Sam. 22:12; 1K. 20:12,16; Ps. 31:20) occurs 30 times, and is otherwise rendered booth, tabernacle, court, and cottage. (3) shaphêr (Jer. 43:10), royal pavilion in A.V. (R.V. marg. glittering). This is probably a Babylonian word applying to Nebuchadnezzar's tent, or to a "flittering" flag, in the old sense in which also pavillon meant a "flittering" ensign in French. [C.B.C.] Peace-offering. [SACRIFICE, 3. ii. c; 3. v. c; CERMONS.] Peacocks [Heb. ðákkîyyîm]. Among the products of Tarshish brought to Jerusalem by Solomon (1 Kin. 10:22) are "peacocks," and there seems no doubt that A.V. is correct in rendering ðákkîyyîm, which
occurs only in 1K.10.22 and 2Chr.9.21. Some writers have, however, been dissatisfied with the rendition of 'peacocks,' and have proposed “pardess"; which, if accepted, would be an echo of 'Aves numidiae,' or Guinea-fowls, are meant. The Heb. word is of foreign origin; and Gesenius cites authorities to prove that tiukkhi is equivalent to the Tamil or Malabaric togei (= peacock), an opinion endorsed by Sir E. Tenent. If this translation is correct, the eds must certainly have come originally from Ceylon or India, although they may have been trans-shipped by Hiram from an East African port; but if Tharshish was in Spain, Guinea-fowls would more probably be the correct translation. [AEPE; TARSHISH] [R.L.]

**Pearl.** The Heb. gabbish occurs in this form, or variants. The answers obtained of that of rámáth (coral) and gabbish; but with the addition of the syllable 'el it is found in Ezk.13.13, 38.22 with 'abbné = "half-stones." It has been compared with the gab-ši-a of the Amarna tablets (Berlin 20), which, however, Dr. Finch has pointed out, are the confederation as a whole, the balance of probability is in favour of "rock-crystal," since gabbish denotes "ice." Pears (máργαριτ), are, however, nine times mentioned in N.T. (e.g. Mt.13.45; 1Tim.2.9; Rev.17.4, 21.21). They apparently came into fashion at Rome after the Asiatic conquest of Pompey, but were highly valued by the Greeks in ancient times. The pearl is found in the shells of more than one kind of bivalve molluse, but the finest in the pearl oyster (Avicula margaritifera) and two closely allied species. It is a secretion of the nacreous material of the shell (mother-of-pearl), and is most frequently attached to the interior of one of the pearls mainly from the Persian Gulf and from Ceylon, the "fisheries" of which are still very important; but there are others in the Sulu Archipelago, on the coasts of New Guinea, parts of Australia, and the Polynesian islands. [R.G.B.]

**Pedahiel,** son of Ammihud, and prince of Naphtali. He is mentioned (Num.26.32).

**Pedahzur** of Gamanile (Num.1.10, 2.20, 7.54, 59, 10.23).

**Pedahiah.**—1. The father of Zebudah, mother of king Jehoiakim (2K.23.36).—2. The brother of Salathiel, or Shealtiel, and father of Zerubbabel who is usually called the "son of Shealtiel," being, as Lord A. Hervey conjectured, in reality his uncle's successor and heir, in consequence of the failure of issue in the direct line (1Chr.3.17-19).—3. Son of Parosh, that is, one of the family of that name, who assisted Nehemiah in repairing the walls of Jerusalem (Ne.3.25).—4. Apparently a priest; one of those who stood on the left hand of Ezra when he read the law to the people (Ne.8.4).—5. A Benjamite, ancestor of Sallo (Ne.11.7).—6. A Levite in the time of Nehemiah (Ne.13.13).—7. The father of Joel, prince of the half-tribe of Manasseh in the reign of David (1Chr.27.20).

**Pe'kah,** son of Remaliah, originally a captain in the service of Pekahiah, the trusted by the people, and eventually became the 18th sovereign of the northern kingdom (2K.15.25-31). His native country was probably Gilead, as fifty Gileadites joined him in the conspiracy against Pekahiah. Under his predecessors, Israel had been much weakened through the payment of enormous tribute to the Assyrians (see especially 2K.15.19, 29), and the king Electronics. Pekahiah steadily applied himself to the restoration of its power. For this purpose he sought foreign alliance against Assyria, and fixed his mind on the plunder of the sister kingdom of Judah. He must have had a treaty by which he proposed to share its spoil with Rezin king of Damascus, when Jo¬tham was still on the throne of Jerusalem (15.37); but its execution was long delayed, probably in consequence of that prince's righteous and vigorous administration (2Chr.27). When, however, Joatham's weak son Ahaz succeeded, the allies no longer hesitated, and besieged Jerusalem. Whether for his own sake or because of his weakness opened the way to ambition, Hoshea, son of Elah conspired against him, and put him to death. (That the reign of Pekah was a time of religious and moral disorders is evident from 2K.15.28, and from the testimony of Hosea, a native of the northern kingdom (Ho.4.6).) Pekahiah's son, Menahem, and 17th king of the separate kingdom of Israel. After a brief and idolatrous reign of scarcely two years, a conspiracy was organized by Pekah, who murdered him in his palace and seized the throne (2K.15.22-26).

**Pekod,** a name applied to the Chaldeans in Je.50.21 and Ezk.23.23. It is identified with the Puquidu, an important clan in Lower Babylon, near the mouth of the Ubnú river, by the Elamite boundary. The Puquidu were subjected by Tiglath-pileser, who classifies them with the Arameans. Later they gave considerable trouble to Sargon of Assyria, but were finally subdued. Their name also appears in the contract-tablets of later date. [T.G.R.]

**Peliah.**—1. A son of Elioenai, of the royal line of Judah (1Chr.3.24).—2. A Levite, who assisted Ezra in expounding the law and sealed the covenant with Nehemiah (Ne.8.7, 10.10).—3. "Pelaliah," an ancestor of Adahiah, 4 (Ne.11.12).—4. "Pelaliah," son of Hananiah, 8, in the royal line of Judah (1Chr.3.21).—5. One of...
the captains of the marauding band of Simeonites, who in the reign of Hezekiah smote the Amalekites of mount Seir (1Chr.4.42).—3. One of the heads of the people who sealed the covenant (Ne.10.22).—4. Son of Benaiyah, and one of the princes of the people whose doom Ezekiel prophesied (Ezk.11.1-12).

Peleg (division), son of Eber, and brother of Joktan (Gen.10.25, 11.16-19), so called because "in his days was the earth divided"—i.e. the family of Eber divided, the younger branch (the Joktanids) migrating to Arabia, the elder remaining in Mesopotamia. [RACES.]

Pelet.—1. A Reubenite; father of On (Num.16.1).—2. Son of Jonathan, and a descendant of Jerahmeel (1Chr.2.33). Though many regard the Pelethites (2Sam.8, etc.) as Philistines [Cercethites], they may have been descendants of this Peleth in S. Palestine. [C.R.C.]

Pellas (1Esd.9.34) = Beediah.

Pelican (Heb. qa’dāth). The Heb. word, which means "to vomit, or disgorge," occurs in the list of unclean birds in Lev.11.15 and Deut.14.17. The psalms compare his condition to "a qa’dāth in the wilderness" (Ps.102.6); while, as a mark of the desolation to come upon Edom, it is stated that "the qa’dāth and the bittern should possess it" (Is.34.11), similar words being uttered in connexion with Nineveh (Zeph.2.14). In the last two passages A.V. has "a pelican in the wilderness," the word corresponding to "pelican" being used. There is little doubt that the pelican is the bird denoted by qa’dāth. The name refers to the pelican's habit of storing large quantities of fish in its pouch, and disgorging them for the use of feeding its young—a habit which has given rise to the fable that young pelicans are nourished by blood drawn from their parents' breast. The heavy and melancholy aspect of the pelican when gorged affords the ground of the psalmist's simile. In the expression "pelican" of the "wilderness," the usual word is used to denote any wild place, just as "jungle" in India may denote a desert. Both the common pelican (Pelecanus onocrotalus) and the crested pelican (P. cristatus) occur in Syria. [R.L.]

Pelonite, The. Two of David's mighty men, Hiel and Ahijah, are called Pelonites (1Chr.11.27,36). From 1Chr.27.10 it appears that the former was of the tribe of Ephraim, and "Pelonite" would therefore probably be an appellation derived from his place of birth or residence. In 2Sam.23.26 Hiel is called "the Pelite," apparently from Beth-palea, in the S. of Judah, and Ahijah appears (ver. 34) as "Elam the son of Ahithophel the Gilonite." [Giloh.] No place named Pelon is known. [C.R.C.]

Pelor, Septuagint.

Peniel (Gen.32.30), Penuel' (32.31; Judg. 8.8,9,17; 1K.12.25), a place with a tower between Mahanaim and the Jabrok River, and between Succoth and Jokbehah. Jacob is said to have "passed over" it; and called it "face of God." of his meeting there with the angel. The name has not been recovered. [C.R.C.]

Peninnah', one of the two wives of Elkanah, 3 (1Sam.1.2).

Pentateuch, The. 1. Name, Divisions, and Contents. This name (Gk. Pentateuchos, "five books") is commonly used to signify the five books of Moses, which form the first division of the O.T. canon. The Jews themselves name the five books simply "the law" (tóra). In Heb. MSS. the law is written on a single roll, with only slight divisions between the books, and the whole is divided into smaller divisions (páthrišāh), 660 in number. The titles by which the books are currently known—Genesis, Exodus, Leviticus, Numbers, Deuteronomy—come from the Gk. translators (c. 250 B.C.), but the five-fold division is older, and probably goes back to the last redaction of the work. This is shown by the fact that the five-fold division is used by the Septuagint with concluding doxologies—a division already known to the Septuagint translators, and probably also implied in 1Chr.16.31-36 (at latest c. 330 B.C.)—is modeled on the divisions of the Pentateuch. The lesser divisions are already recognized in the Talmud, and are, therefore, also ancient. Among the Jews the custom, probably from the beginning (Origen attests the practice in his day), has been to distinguish the books by using as titles the first word, or two words, of each. Contents. The books thus described furnish a progressive account of God's dealings with the human family, in the special line of revelation and promise, from the creation of the world and man till the death of Moses on mount Nebo, in Moab, on the borders of Canaan. Interwoven with the history are the three great legislative codes round which so much controversy has gathered—the Decalogue and Code of the Book of the Covenant at Sinai in Ex.20-23; the Levitical Code, partly in Exodus, but mainly...
in the book which bears this special name, Leviticus; and the Deuteronomic Code, a rehearsal and expansion of the laws of the covenant, with some further provisions, in the form of addresses delivered by Moses on the plains of Moab. The details of the plan, purpose, and particular contents of the several books may be seen under their respective headings. It will be found that the divisions of the books correspond in the main to natural divisions in the subject-matter. Genesis has a well-marked exordium, and its accounts of primitive and patriarchial times. Exodus begins afresh with a recapitulatory section, and has its distinct theme in the great events of the Exodus and the Covenant at Sinai, and in the incidents of the wilderness connected therewith. Leviticus has a char-}

and the youngest later than the Exile in Babylon, and which, for the most part, is devoid of historical worth. The book of Genesis, it is declared, is wholly "legendary"°; Exodus is quite "utterly unhistorical" (Kant). Leviticus is a production of the age of Josiah (or a little earlier); the Levitical laws took shape during, or after, the Exile; Joshua, which most include with the other books in what they call the " Hexateuch," is a "romance." The grounds on which this view is argued are: (a) Alleged internal contradictions, repetitions, duplicate narratives, and other signs of multiple authorship. (b) The difficulty of supposing that so large a work, evincing such remarkable literary power, embodying developed systems of law, and exhibiting such high religious and moral character, could have been produced in the age of Moses. But chiefly, (d) the internal evidence which the book is said to afford of its being a compilation from distinct documents, manifestly belonging to different times, and produced under widely different conditions. To this last point, as touching the theory of the unity of the book, attention must be given at the outset. Four strands are usually recognized in the critical schools as entering into the composition of the Pentateuch. First, in a combined form, are two narratives, closely resembling, and running mostly parallel to, each other, but distinguished by their use of different strata. The former employs the name Jehovah (E.V. "Lord"); the other the name Elohim (E.V. "God"); as far as Ex. 3—hence called by the critics J and E, or (in combination) JE. These narratives are free, flowing, and popular in style (more anthropomorphical than E), and breathe the prophetic spirit. They are assigned to c. 850 B.C.—750 B.C. Next in simple form the Deuteronomy—a work by itself—first brought to light in the reign of Josiah (2 K. 22). Finally, furnishing the framework of the narrative in Genesis, and embracing in its middle parts the Levitical legislation, is a connected history, priestly in character, extending from the creation of the world to the exodus of Israel from Egypt, and separable by its peculiarities from the other elements in the book. This, formerly held to be the oldest stratum in the Pentateuch, but now supposed to be of post-Exilic origin, is distinguished by the critics as P (the "priestly" writing). It is marked by adherence to the name Elohim (God) as far as Ex. 6. Its style is described as formal, precise, circumstantial, pedantic. It abounds in enumerations, repetitions, legal formulae, genealogies. These four elements, it is believed, originally subsisted apart, but were brought together by successive redactors, the entire work receiving its present shape in or about the age of Ezra. This is the theory in its simplest form; but it should now be noted that, as time has gone on, and the difficulties of the hypothesis have become more apparent, the theory has undergone various developments, and become much more complicated. Instead of the original "four documents (J, E, P, and D), there is now a new extended series of each denomination (J', J", J; E', E" , E;  P', P, P', etc.). Yet more recently, the pretence of individuality
is abandoned, and the supposititious J, E, D, P are resolved into "schools," the activity of whose members is presumed to extend over centuries. The hypothesis, in short, is in a state of rapid disintegration. Before criticizing this hypothesis, and adding reasons which seem to justify a view much nearer to that sanctioned by tradition, a few words may be said on the stages by which the critical theory has come to assume its existing form. These are instructive. The theory began with the attempt (Astruc, 1753) to separate two main documents in Genesis—the one Jehovistic, the other Elohist. The Mosaic authorship was still assumed. This was followed (Eichhorn, 1779) by an endeavour to discriminate the sources, not merely by the divine names, but by other literary peculiarities. The next step was to claim a late date (Josiah's reign) for the book of Deuteronomy (De Wette, 1805-1806). Meanwhile, it had been noticed (Ilgen, 1798) that certain of the "Elohist" sections had the language of names, but were similar in character and style to the "Jehovistic" portions. This led later (Hupfeld, 1853) to the supposition of a third writer—the so-called Second or Junior Elohist (now E). Up to this time the Elohist history had been regarded as the oldest part of the Pentateuch (age of Samuel or Saul), and the Jehovist was viewed as "supplementing" the older work. Now the Jehovist (J) and the Second Elohist (E) attained the rank of independent narrators. Finally, with Graf (1866), came the revolution which brought in the existing phase of criticism. It was claimed to be shown on historical grounds that the Levitical laws were not in force till after the return from exile, and the proposal was made to lift down the whole body of Levitical legislation from a Mosaic or other early date to this later period. Ezekiel was thought to have given the impulse to the formation of such a code in his attempt to restore the smaller and the work was actually taken in hand by priests and scribes during the Exile, with the results we see. This theory, chiefly through the influence of Wellhausen, gained acceptance, and, with some waning of its influence, is the prevailing theory still. Yet it may be shown that the character and structure of the narrative are not accounted for to it and to the whole critical construction with which it is associated. (iii) Positive Investigation. In severing oneself from the hypothesis just sketched, it need not be denied that the critical labours of the last century and a half have brought to light many phenomena in the Pentateuchal structure, of which require to be taken account of in any adequate theory of its origin. It is the case, e.g., as Astruc pointed out, that there is a marked distinction in the use of the divine names (Elohist and Jehovistic) sections; see Genesis—the case is also the case, as later critics have shown, that the bulk of the Elohistic matter (exception being made of special sections; see Genesis: and Gen.20, attributed to E) has a style and vocabulary of its own, which justify its distinction from the flowing, vivid, picturesque JE narrative. Any one can satisfy himself of this who reads carefully the creation narrative in Gen.1, and compares it with the style of the following narratives in Gen.2-4; or who compares the sections in the story of the Flood (Gen.6-8) marked by the use of the name "Lord," with those marked by the use of the name "God." It comes to be perceived that each writing has a class of words and phrases peculiar to itself, even when the same idea is being conveyed. Characteristic of the Elohist writing (P), e.g., are such terms and phrases as "kind," "swarm," "possession," "be fruitful and multiply," "self-same day," "after their generations"; while the Jehovist is fond of the word "ground" (Elohist has mostly "earth"), has a different form for "beget," speaks of "to cut a covenant," etc. The Elohist has "to establish," etc. Documents evidently in some form are used, and different styles of writing employed, in the composition of the work, whether we can ever perfectly disentangle the process or not. But it in no way follows, as will be seen, that the critical theory is to be rejected, the law of the Exile not permitted, or that its essentially Mosaic character need be denied. The proof can best be furnished by taking up the alleged constituents of the Pentateuch separately. (a) The Levitical Law. On this subject, in the light of the critical discussions, it will be wise to begin with the fixed datum of the reading of the Ezra of Ezra to the people in Jerusalem, as described in Neh.8, and work backwards. Here the outstanding fact on the surface of the history is, that "the book of the law" produced by Ezra (the complete Pentateuch, cf. Neh.9) was accepted by all classes of the people as an authentic Mosaic work going back in its origin to Moses' own times (cf. 8.14). The critical position is that the Levitical law, with its related historical sections, was a creation of the age of the Exile. It might embody older usage, but in its essential and characteristic institutions (ark and tabernacle, priests and levites, Mosaic liturgy, covenant, and theocratic state, calendar, cycle of feasts, etc.) it was a new and previously unheard-of thing. This view receives no countenance from the narrative in Nehemiah. It is, on the contrary, directly contradicted by it. The Jewish community which Ezra addressed was keenly divided. There was a class of the Ezra party and a class of the Nehemiah; there was a religiously faithless party in the city: priests and Levites knew something of their own history: the new ordinances (tithe-laws, etc.) bore heavily on the people. Yet no one, so far as known, ever raised a whisper of protest against the ascription of the book of the law to Ezra. The nation's great lawyer, Moses. The laws, moreover, which are supposed to have been specially prepared for this community, were in large part quite unsuitable to post-Exilian conditions. They are cast in a form adapted to the wilderness: many of them were obsolete from the time the people entered Canaan (e.g. Lev.17.1-9); the tithe-laws, in particular, presupposing as they do a large body of Levites and few priests, had no direct applicability to a community in which the priests were many and the Levites few. The distinction of priests and Levites is alleged to have taken its origin from the prophecy of the
degradation of the unfaithful priests in Ezek.44. Yet we find the Levites, with their genealogies, in large numbers at the time of the return under Zerubbabel (Ezr.1-8). This period, in short, afforded plain proof that the Levitical law was older than the Exile, and that “the book of the law” containing it was in that age unanimously ascribed to Moses. The same result, as respects the age of the Levitical law, is reached along other lines of evidence. The book of Ezekiel is saturated with allusions which presuppose a knowledge of such a law. This is specially true of that remarkable collection of laws in Lev.17-26 (a code within the code), which scholars name “the Law of Holiness.” So intimate is the relation between this code and Ezekiel that the prophet was at first held to be the author of it. Now the reason, e.g., that Ezekiel knew and used this earlier body of laws (not to the exclusion of other parts of the code). The proof may be carried a step further by the fact that such a stage of the Deuteronomic Law is assumed in the Code of Deuteronomy (Deut.18.1-20), e.g., is almost “verbally identical” with Lev.11.1-22. The Levitical code, on the other hand, shows no trace of dependence on Deuteronomy. The natural inference is, that the former is the older of the two. Against this existence of the Levitical law in pre-Exilian times is urged the alleged silence of the prophetic and historical books in regard to it. This silence, however, is only relative, and may be pressed too far. In reality there is much, in both prophecy and history, to show that the law was actually, if sometimes only partially, in operation. The Solomonic temple and its services were modes of its enforcement. The Levitical books show allusions to ark, tabernacle, Aaronic priesthood, high-priest, ephod, and shewbread; and indicate a knowledge of festivals, of sacrifices (burnt-offerings, peace-offerings, meal-offerings, drink-offerings, probably sin-offerings as well), of ritual of worship, of laws of purity, of clean and unclean food, of leprosy, of consanguinity, prohibitions of eating blood, and the like. It enhances the value of the allusions that many of them are quite incidental (e.g. the shewbread in 1Sam.21.4). If, as seems evident, the Levitical law can thus be carried back to a relatively early stage in Israel's history, there is no reason at all to suppose a stage in seeking a date for its origin till we come to the age of Moses himself. At this point we are met by the testimony of the book itself. There can be no question that the Levitical legislation claims to be of Mosaic origin (cf. Lev.26.46). With this agrees its whole cast and character. It is a system of wilderness legislation in large part as it is found in the desert. This, indeed, does not imply that Moses necessarily wrote out all the laws he gave with his own hand, though in some cases he may have done so, using the style appropriate to such composition; or that they were all written at one time; or that they did not, in some cases, undergo redaction or adaptation to new circumstances; or that their final collection and codification was not a later task. But it does imply that the laws are ancient and Mosaic in substance, and, for the most part, even in form. As, further, no one disputes the homogeneity of the historical framework in which the laws are set, with the laws themselves, this speaks for the origin of both—history and laws together—in or near the Mosaic age. (b) Deuteronomy and its Code. Leaving the Levitical law for the moment, a glance may next be taken at the book and Code of Deuteronomy. Fortunately, we have there also a fixed point from which to start. There is general agreement that “the book of the law,” discovered in the temple in the 15th year of Josiah, as recorded in 2K.22, either was, or at least included, the book of Deuteronomy. Critics will have it that the book was composed at or about this time, and designedly deposited in the temple in order to bring about a reformation. The majority do not see it even from imputing to Hilkiah and his circle a deliberate fraud in palming off upon the king a work which they knew to be recent. This last supposition must be at once dismissed. The alternative is that the book was genuinely found, and was recognized by those who found it as an ancient book—the book of the law of Moses (cf. 2K.22.8, 11, 23, 24, 25). It is certain that in this character it was accepted in good faith by the king, and by all classes of the nation, including those whose interests were most affected by its provisions. Is it credible that a whole nation should have been deceived and induced to the authority of the book; or that the nation basing its solemn covenant with God (23.3-9) on this, again, agrees emphatically the testimony of the book itself. When the book is examined, it is found to make express and formal claim to Mosaic authorship. It is, in fact, the one book in the Pentateuch which expressly does so. “Moses,” it is declared in Deut.31.9,24, “wrote this law, and delivered it to the priests,” directing them to deposit it for preservation “in the side of the ark of the covenant.” This need not, again, exclude subsequent transcription, editing, and annotation (Moses certainly did not write the account of his own death in ch. 34); but it is a testimony not to be set aside. When Moses heard of his own pen of his farewell discourses to the people—a record which we may well believe is incorporated in the book before us. The character of the legislation points in the same direction. Much of the legislation has no suitability to the times of Josiah, but is in place in the age of Moses. The objections to the book on the ground of the law of the central sanctuary, and of “the
priests the Levites," will be considered in their proper place. (c) J and E Narratives. There remain to be considered the alleged J and E narratives, supposed by the critics to have been combined prior to their reception into the larger work of which they now form part. (a) Here, first, it may legitimately be questioned whether, apart from the difference in the divine names, good grounds exist for distinguishing two documents at all. The two narratives so closely resemble each other, run so entirely parallel, are so intimately correlated in substance, that it requires the utmost violence to carry through a separation. While, as seen above, a distinct style and vocabulary may be claimed for the Book of Genesis, this cannot satisfactorily be established for J and E. The stylistic and other criteria relied on to prove a distinction (e.g. the alleged preference of E for the northern kingdom and of J for the southern) are quite illusory. The distinction in the divine names in certain sections is real, but may be accounted for partly by discrimination and partly by editorial change (Jehovistic and Elohist recensions). Cognate phenomena appear in the book of Psalms. (Jehovah.) (3) With still more confidence may the verdict of the critics as to the date of the JE narratives be challenged. Where the grounds for the late dating are examined, they are found to consist chiefly in supposed mirroring in the narratives of later political events (e.g. the Syrian wars are held to be mirrored in the relations of Laban and Jacob; Jacob's vow at Bethel is thought to be intended to sanction the payment of tithes at the calf-shrine at that place). These mirroring, however, are simply efforts of the critics' own imaginations. Even the allusions in Genesis aduced in proof of a later date (e.g. "before there reigned any king over the children of Israel," Gen. 36.31), do not carry us below the early days of the kingdom, and may easily be explained as glosses. (Genesis.) On the other hand, there are important points of unity dating too far back for an early date: (a) Deuteronomy, just shown to be in substance Mosaic, already pre-supposes the legislation of the Book of the Covenant (Ex. 20-23) and much also of the history. (n) The Book of the Covenant, closely bound up with the rest of the narrative, makes, like Deuteronomy, express claims to Mosaic authorship. "And Moses wrote all the words of the Lord." . . . "He took the book of the covenant, and read in the audience of the people." (Ex. 24, 4, 7). (e) The JE element stands in inseparable relations with the other, specially the P, elements throughout its history; inverts, inverts, is united with the latter. Illustrations are given under the several books. (iv) General Result. The general conclusions to which we are led by the foregoing lines of evidence are: (a) That the Pentateuch as we have it is a unity. It has just been remarked that the J and E elements are inextricably interwoven with each other, and with the other parts of the book. The same is true of the P narrative. This, in detachment from the JE elements (which, as is now admitted, it pre-supposes), presents an utterly broken, discontinuous appearance, and cannot be regarded as ever having subsisted as an independent document. Graf himself held that it never did so, as previous writers had contended that J did not exist independently. In fine, the book composed of these elements is one, and cannot be disintegrated without reducing it to chaos. (b) The essentially Mosaic origin of the book. Express Mosaic authorship is claimed for the book of the covenant and for Deuteronomy, and the Levitical law claims also a Mosaic origin. But these parts of the Pentateuch stand in the closest interrelation with the rest. Deuteronomy, e.g., implies the Exodus legislation and history. Every notice we have of the book of the law in later history connects it with Moses (Jos. 1.8, 8.31, 34, 25.1, 16; Num. 22.1, 2; cf. Ex. 20.12, etc.). In two cases mention is made of Moses recording special facts at the command of God (Ex. 17.14; Num. 33.2); in the former instance in a book or "the book" (cf. Jos. 24.26). This in no way implies that Moses may not have written much more, but rather supports the idea that he did write (Deuteronomy and book of covenant, above). The later editorial changes, claims and structure of the Pentateuch, are not affected by the class of objections ordinarily made to the Mosaic origin of the book. It is not implied in what has been said, or in any statement of Scripture, that Moses may not have employed older documents in the composition, ways, of his writings; or that other hands may not have co-operated with him in his work, or continued and completed it, and directed his material, after his death; or that the book may not have undergone repeated revision and editing; or that later glosses may not have crept into it (the evidences of these, as noted above, are slight, and not later than the early kingdom); or that changes and dislocations may not have taken place in its long history, the exact nature of which it is difficult now to trace. This is true of all ancient books, and of those of Moses are no exception. The alleged discrepancies and contradictions of the Pentateuch, books, are due, not to the supposition of two different books (e.g. there are two different, but in no way contradictory, narratives of creation), and the so-called "duplicate" incidents (e.g. two flights of Hagar, three denials of wives, two visits to Bethel, two calls of Moses, etc.) are not necessarily "duplicates" at all; often there are clear indications that they are not. Discussion more properly belongs to the separate books.—111. CORROBORATION OF FOREGOING CONCLUSIONS. The argument has thus far been confined to external attestation, and the internal phenomena of the book. The conclusions reached, if not to be powerful corroboration from a wider class of considerations. Among these may be noted: (i) The state of culture of the Mosaic Age. The day is past when it could be urged against the composition of the Pentateuch by Moses or his contemporaries that writing and culture were not sufficiently advanced in that age to admit of the production of such a book. The discoveries made in recent years of the high state of civilization obtaining in Babylonia, Egypt, Palestine, and neighbouring countries, in the Mosaic age, and long before, for ever disposes of that objection. Babylonia was a land of cities, arts, law, letters, books, libraries, and

PENTECOST

Conservative views: Green, Higher Criticism of the Pentateuch; Cave, The Inspiration of the O.T.; Bissell, The Pentateuch, its Origin and Structure; R. McKim, Problem of the Pentateuch; Orr, Problem of the O.T. [1904] .

PENTECOST. This Greek term, meaning “fiftieth,” i.e., fiftieth day, was given by the Gk-speaking Jews to the second of the three great Heb. festivities, because it was kept (Lev. 23.15f) on the fiftieth day after the offering of the barley sheaf during the Feast of Unleavened Bread (Tob. 2.1; 2 Macc. 12.32). It is called in O.T. the feast of first-fruits, the feast of unleavened bread, the feast of weeks, the feast of harvest. It is sometimes styled the feast of the weeks, the day of the first-fruits of wheat (34.22) and the day of the first-fruits (Num. 28.26). In Josephus and the Talmud it is called “asara,” which means either the “conclusion” of the Feast of Unleavened Bread, or the “closing” harvest festival. The feast of weeks signifies a week of weeks, seven weeks after the opening of the harvest festival. The time of the festival is thus distinctly fixed at the end of harvest. The first-fruits of the wheat-harvest were to be presented at it. This is enough to prove that the feast was in the late spring or early summer. As the barley was the first grain that ripened, the sheaf which was waved at the beginning of the harvest-season was of barley, though not so directed in O.T. The succeeding seven weeks correspond roughly with the duration of the corn-harvest in Palestine, a time of proverbial joy (Is. 9.3). In Ex. there are no detailed regulations as to the manner of celebrating the feast or the sacrifices. In Lev. the offerings are specified, and no legally fixed offerings are mentioned: “Thou shalt keep the feast of weeks unto the Lord thy God with a tribute of a freewill offering of thine hand, which thou shalt give according as the Lord thy God blesseth thee.” In Deut. 16.11 there is prescribed a kind of confession to be made at the time of the offering of the first-fruits in which the offering of the produce of the land appears as a thanksgiving for God’s bestowal of the land itself. The precise date at which it is to be held is not mentioned. In Lev. 23.15-21 the date is fixed and the ceremonies are described. The whole community has a burnt-offering; two loaves of unleavened bread are waved; two young bullocks, two rams, with meal- and drink-offerings, and also a he-goat as a sin-offering. The latter was, moreover, an offering of propitiation to be joined with the expression of thanksgiving. In Num. 28.26-31 there is a somewhat different list. We see that the feast was held for one day only, unlike the Passover and Tabernacle feasts. Besides the stated daily offering, there are two young bullocks, one ram, seven lambs as a burnt-offering, a meal-offering, and a he-goat as a sin-offering.

Pentacles. The Greek name for the Babylonian oracular writing tablets, copied in cuneiform characters one on another, were placed under a pentacle, a star of five points, and covered with clay, a penterekaphia, the five fingers of the hand. A hexateuch, pentalogue, or tetrapod, was a similar book of law, produced in the days of Hammurabi, i.e., the Amraphel of Gen. 14., contemporary with Abraham, show the possibilities in that direction. Flinders Petrie found writing of Syrian workmen on the walls of the mines at Serabit, in the Sinai peninsula (15th cent. B.C.). How utterly unlikely that Moses and the Israelites should remain untouched by these influences of culture abounding on every side of them. (ii) The personality and accomplishments of Moses. That the Mosaic age was one of writing is implied in numerous indications of the narrative itself. But account has to be taken also of the peculiar position of Moses in that age. Of his remembrance and still more his idealization we have reason to doubt, and from exercising it in the production of any permanent memorials of his people’s past, or of the events of his own age? Have not the Biblical statements of his literary activity the highest a priori credibility? (iii) Archaeological corroboration of the narratives. Besides attesting the astonishingly high condition of early culture, archaeology has thrown a flood of light on the Babylonian parallels to the early chapters of Genesis (Creation, Flood, etc.); on the relations of peoples and countries as figured in the table of nations (Gen. 10); on the conditions of the patriarchal age; on such significant phenomena as the New Year’s doom-lament (Gen. 14); on the minute accuracy of Egyptian life as pictured in the history of Joseph; on the Egyptological correctness of the scenes and relations in the time of Moses; on the topography of the wilderness of Sinai, etc.—in every case with remarkable confirmation of the Biblical statements, and often the correction of errors previously entertained by scholars. How was this singular accuracy in regard to a long-distant past attainable unless records of some kind had been preserved from the pre-Mosaic age, and unless a master-mind was there which knew how to use them? It may confidently be affirmed that the connection of Moses with the work associated with his name is the most feasible solution of the multifarm problems which modern learning is itself forcing upon us in relation to this book. Critical view: Driver, Introduction to the Literature of the O.T.; Kuenen, Origin and Development of the Hexateuch; Addis, Documents of the Hexateuch; Art. “Hexateuch,” in Hastings, D.B. (5 vols. 1904).
The later Jews regarded the lists in Lev. and Num. as supplementary, and offered the two series in addition to the daily burnt-offerings. They also regarded the feast as commemorating the giving of the law at Sinai, calculated to be on the 50th day after the Exod. (Ex.19.1). This view is not found in O.T., or even Philo and Josephus. In the Christian Church the significance of Pentecost was enhanced by the outpouring of the Holy Spirit upon the disciples (Ac.2). Recently an attempt has been made to show that the Paraclete there given is only a later and more legendary parallel of the account given of the new boldness and new strengthening which came to the disciples after the release of SS. Peter and John (Acts 3.31). No sufficient critical reasons have been hitherto produced to show that this theory is correct: it means that Ac. 2.5,17-42 is a recension of the same history as that in 3.5.16. Assuming the narrative in Ac.2 to be historical, we inquire on what day this outpouring took place. Early tradition fixed this miracle on a Sunday, and this agree with the traditions which fixed the Lord's Day as the Friday, Nisan 16. It is recorded by St. John. Nisan 16, the day of the Resurrection, fell on a Sunday; so also did Pentecost, which the Jews celebrated on what they reckoned as the fiftieth day after the barley-sheaf was waved before the Lord, viz. the fiftieth day after Nisan 16. The super-natural character of the Pentecost gift is shown by the sound like wind and the partaking asunder of tongues “as of fire.” Each receives a special gift, and the utterances of the disciples show that the gift is for the benefit of the world. The precise nature of the speaking “with other tongues” is not clearly defined. [Tongues, Gift of.] In Ac.10.16,19.6 and in 1 Cor.12.14 we find three harmonious accounts of speaking with tongues. It is an ecstatic utterance, speaking in the spirit, and not with the intelligence. St. Paul, though he “spoke with tongues more than all,” ranks the power as comparatively a low gift, as not usually edifying others, and tending to cause disorder. At Corinth, the speaking with tongues or “glossolaly,” was perhaps sometimes intelligible, for St. Paul apparently quotes, as instances, Jesus is Lord and Jesus is anathema (1 Cor.12.3), the first being an instance of divinely inspired speaking, the second of an utterance inspired by an evil source. As a rule glossolaly was addressed to God, and needed to be interpreted if the hearers were to benefit. If the speaking with tongues at Pentecost was a speaking in foreign languages, it was a unique event on a unique occasion, intended to further the cause of Christ in some special way. Against this it can be urged that Gk. and Aramaic could have been understood by almost everyone there present; that the bystanders, in hearing the disciples of drunkenness, showed that the speech was not of an intelligible nature; and the apostles possessed no permanent gift of speaking foreign languages. In spite of all this, St. Luke seems to have believed that foreign languages were spoken on this occasion. The catalogue of hearers in Ac.2.9-11 represents every nation in which Jewish proselytes or actual Jews were numbered. All these devout men in some way were conscious that God was being praised. The observance of Pentecost was continued in the primitive Church. St. Paul speaks of the Gentile churches to the Christians in Judaea at Pentecost in 50 A.D. (Acts.2.16). The season of the fifty days from Easter to Pentecost is alluded to by Tertullian c. 200 A.D. (de Idol. 14; de Bapt. 17). It was a season of joy, no fasting, and no kneeling in prayer, but only standing being permitted. The English name “Whitsunday” refers to the white robes worn by the candidates for baptism at Pentecost. In Italy “White Sunday” (Dominica in Alibus) is the first Sunday after Easter, the last day on which those baptized on Easter even wore their new raiment. In England the colder climates permit of baptisms to be usually postponed till Pentecost. [L.P.]

Penuel. [Peniel.]

Peor, Top of (Num.23.28), a mountain with a view of the Jetishmon and (24.2) of the Jordan Valley. Perhaps the high top at Minych, S. of Nereo [Beth-peor] (Surev. E. 11.10). There are seven mountain circles near this site. [G.R.C.]

Perazim, Mount (Is.28.21 only), probably Baal-perazim, the allusion being to David’s victory. [Baal. 9.] [G.R.C.]

Pere’sh, son of Machir by his wife Maachah (1 Chr.7.16).

Perez. The “children of Perez,” or Putam, the son of Judah, appear to have been a family of importance for many centuries (1 Chr.27.3; Ne.11.4).6.

Perez-uzza (1 Chr.13.11). Perez-uzza (2 Sam.6.8; outburst of Uzza), between Kirjath-jearim and Jerusalem. The site is unknown. The punishment of Uzza occurred at the “threshing floor” of Nacoth, or Chidon. Perhaps this threshing-floor (Heb. giron) was beside the village of Jirah, 5 miles W. of Jerusalem on the high-road to ‘Erma, i.e. Kirjath-jearim. [G.R.C.]

Perfection. In O.T. the word ἀρετή is usually translated “perfect”; in Gen.25.27 it denotes one whose name means “harmonious,” and in Can.5.2,6,9 “undated.” It apparently means morally “complete” or “blameless.” The N.T. idea of moral and religious “perfection” seems to be completeness, or full growth, as contrasted with what is partial and incomplete. A perfect man is one in whose character there are no gaps, who has developed each grace and fruit of the Holy Spirit. Thus in Mt.5.48 (and 19.21) perfection means apparently a whole-hearted effort to conform oneself to the divine ideal or vocation (cf. Ph.3.15). So the aim of the Christian teacher is to present every man “perfect” (Col.1.27). Perfection is the full Christian life, based upon and rising beyond the foundation principles of conversion, and acceptance of Christian ordinances and beliefs (Heb.6.1-2). Another very remarkable use of the word is seen in Heb.2.10,5,7,28, where it is applied to the completed human “cleansing” victory of the Incarnate. In ecclesiastical language, though scarcely in N.T., the word “perfect” was applied to those who had passed through the complete course of
PERFUMES

Christian instruction, and had been initiated into the full sacramental life of the Church. Perfection in N.T. is more often spoken of in reference to man than to God, and as an ideal for this life, rather than as something fully realized hereafter. It is seldom applied to the dead (see Heb.11.40, 12.23), and perhaps only once definitely to the resurrection-life (1Cor. 13.10). Westcott, Epistle to the Hebrews, 1889, note on ἀρετάως. [A.R.W.]

Perfumes. The liberal use of perfumes was peculiarly grateful to Orientals (Pr.27.9), offensive smells being regarded as a desirable part of the heat of the climate. The Hebrews manufactured their perfumes chiefly from spices imported from Arabia, though partly also from aromatic plants grown in their own country. They were applied to the person, to garments (Ps.45.8; Can.4.11), and to articles of furniture, such as tables and couches. The use of perfumes was omitted at times of mourning, whence the allusion in Is.3.24. Perfumes entered largely into the temple service, in the two forms of incense and ointment (1K.11.29-40, 2K.22.16-20). The same compliments were probably paid in ancient as in modern times (Dan.2.16). The use of perfumes was omitted at times of mourning, whence the allusion in Is.3.24. Perfumes entered largely into the temple service, in the two forms of incense and ointment (1K.11.29-40, 2K.22.16-20).

Perga, an ancient and important city of Pamphylia (Ac.13.13), situated on the river Cestius, 60 stadia from its mouth, and celebrated for the worship of Artemis (Diana), whose temple stood on a hill outside the town.

Pergamos, a city of Mysia, about 9 miles N. of Sardis, formed in 224 B.C. by King Attalus I., who, recognizing the break-up of the Macedonian conquests, this officer betrayed his trust, and succeeded in retaining the treasure and transmitting it at the end of 20 years to his nephew Eumenes, a petty dynast in the neighbourhood. Eumenes was succeeded by his cousin Attalus, the founder of the Attalic dynasty, who, after adding himself to the rising Roman power laid the foundation of the future greatness of his house. His successor, Eumenes II., was rewarded for his fidelity to the Romans in their wars with Antiochus and Perseus by a gift of all the territory which the former had possessed to the N. of the Taurus range. The Attalic dynasty terminated 133 B.C., when Attalus III., dying at an early age, made the Romans his heirs. His dominions formed the province of Asia propria. The sumptuousness of the Attalic princes had made Pergamos the most splendid city in Asia. It was, as it were, a pagan cathedral city, an university town, and a royal residence, embellished by a succession of wealth by being fully all had a passion for expenditure. Under the Attalic kings it became a city of temples, devoted to a sensuous worship; and therefore might not unnaturally be viewed by Jews and Jewish Christians as one "where was the throne of Satan" (Rev.2.13). After the extinction of its independence, the sacred character of Pergamos seems to have been even more prominent. In the time of Martial, Aesclapius had acquired so much prominence that he is called Pergamum deus. From this notoriety of the Pergamene Aesculapius, from the title ζωρίζων being given to him, from the serpent being his characteristic emblem, and from the fact that the medical practice of antiquity included charms and incantations among its agencies, it has been supposed that the expressions "the throne of Satan" and "where Satan dwelleth" have an especial reference to this one pagan deity, and not to the whole city as a focus of idolatry, or the chief town of Lycia. It is undoubtedly the Aesculapius-worship of Pergamos was the most famous, yet an inscription of the time of Marcus Antonius distinctly puts Zeus, Athenê, Dionysus, and Asclepius in a co-ordinate rank, as all being special tutelary deities of Pergamos. It seems unlikely, therefore, that the expression above quoted should be so interpreted as to isolate one of them from the rest. Moreover, the charge against a portion of the Pergamene church that some among them were of the school of Balaam, whose policy was to put a stumbling-block before the children of Israel, by inducng the Gentiles to fall to eating the things sacrificed to idols and to commit fornication (Rev.2.14), is in both its particulars very inappropriate to the Ascolapian ritual, and points rather to the Dionysus and Aphrodite worship.

Perida. The children of Perida returned from Babylon with Zerubbabel (Ne.7.57).

Perizites or Perizites, the lists of nations inhabiting Canaan (six being found in Gen.15.20, Ex.3.8, 17, 23-24, 33.2, 34.11, Deut.20.17, Jos.9.11, 13.3, 12.8, Judg.3.5, Ne.9.8, and seven in Deut.7.1, Jos.3.10, 24.11), the Perizites are mentioned, as also in Ezr.9.1, 2Esd.1.21 (E.V. Phereites). In only three places, however, have we any definite particulars regarding them—viz. in Gen.10, 15.20, that the expressions above quoted should be so interpreted as to isolate one of them from the rest. Moreover, the charge against a portion of the Pergamene church that some among them were of the school of Balaam, whose policy was to put a stumbling-block before the children of Israel, by inducing the Gentiles to fall to eating the things sacrificed to idols and to commit fornication (Rev.2.14), is in both its particulars very inappropriate to the Ascolapian ritual, and points rather to the Dionysus and Aphrodite worship.

Peridos (2Mac.9.2), more correctly Persepolis (Ptolemy), the Gk. name of an ancient capital of Persis, now called Chihih Minår, or "Forty Towers," from the appearance of its lofty columns, which are remains of royal palaces of Darius and Xerxes. It is also styled Istakhr, (in Ph. Iii.1, Staburh.), its ancient Persian name is unknown. It was probably built by Darius Jr., or at least made a royal capital by him. The remains of the city are still very magnificent, and the inscriptions, principally those of Darius I., and at Naqsh-i-Rustam in the vicinity, are in three languages (Akhæmenian-Persian, Assyrian, and Neo-Susian), and are full clear enough to enable the learned to read the inscriptions in the writer's possession. The city is first mentioned in Gk. by Citarchus. The account of the burning of the royal palace here by Alexander the Great is well known. Arrian who mentions Persepolis only once (vii. 1), seems to imply that the palace was burnt at Pasargadae, an older city 42 miles N. built (according to Quintus Curtius, v. 20) by Cyrus.
But it is more probable that the ruins known as Takht-i-Jamshid, near Persepolis, mark the site of the ancient palace. See further, Encycl. Brit. [w.st.c.t.]

Persia, last king of Macedon, succeeded his father, Philip V., in 179 B.C. After his defeat by L. Aemilius Paulus at Pydna, 168 B.C., he surrendered, and his kingdom passed to the Romans. He is called "King of Cuthim" (1 Mac. 8. 5), a name originally denoting Cyprus, but thence extended to include the coasts of Asia Minor and southeastern Europe. [c.d.]

Persia (Heb. páras; Assyr. Parsua, Parsu; Akhaem. Pers. Pars; Gk. Hepaid). Originally the name of the province still called Pārs, or more commonly Fārs, the word was finally employed (though not in Persia itself at any time) to denote the whole Persian empire. In the original sense of the term, the province extended from the Persian Gulf to Media and from Karmania to Elam. Near the Persian Gulf there is a strip of low-lying and unhealthy ground, and then the land rises rapidly towards the interior. The mountains are extremely steep, but fertile valleys are found between them. There are plateaux at Persepolis, Pasargadæ, and elsewhere, especially near Shiraz, and these are well watered and fertile. Farther N., through want of water, much of the country is sterile. [Persians; Media; Medes; Persepolis.] [w.st.c.t.]

Persians (Pārs; [end of page?]

The earliest name by which the Persians, in common with the Medes, called themselves, was Arju, Skt. Arya, "noble." This title they shared with their congenerous who conquered the Panjāb, probably between 1000 and 2000 B.C. Why the ancestors of the Hindus separated from those who afterwards gave their name to Iran, we cannot say; but it has been suggested that theB.C. Why the ancestors of the Hindus separated from those who afterwards gave their name to Iran, we cannot say, but it has with great probability been suggested, that the religious revolution (connected probably with Zarathushtra [Zoroaster]) which changed the deus (πάσα, deus) of the Vedas into the daivas or demons of the Avesta may be connected therewith. From Vendidad 1. we learn that early Iranian tradition located the latter people at the dawn of their history between the Oxus and the Jaxartes in Bactria and Sogdiana, to the S.W. of the sea of Aral. That region is styled in the Avesta Aryanam Vaejo, "the Aryan germ." Thence they moved to the S.W., gradually taking possession of the present Iran and Afghanistan. [Medes.] Persia proper is first mentioned by name (Parsua) by Rammaum-Nirāri III. (812-783 or 810-781 B.C.) as conquered by himself. Doubtless the Persians had been settled there for some time. According to the Avesta the people were originally divided into three classes, (1) the fire-priests (Aitrsas), (2) the charioteers (Rathaśtri), (3) the farmers (Vāstra-fšayānith), to which a fourth, that of artisans (Hūtt) was afterwards added. (Cf. the original castes of the Hindus, which were at first three and then four.) From the inscriptions of Cyrus and Darius, coupled with what Herodotus says, we learn that Hakhāmanis (Achaemenēs) was the founder of the dynasty from which both these kings traced their descent.

Their genealogical tree runs thus:

Achaemenēs.

Teispēs (Chashpish).

Cambyses. Darius I. (Dārayavahānesh).

Our knowledge of Persian history practically begins with Cyrus. He was, first of all, king of Anshan only, as his fathers before him, and of pure Persian descent. It is generally supposed that Anshan was a city in Elam, but it may have been Pasargadæ. War broke out between Cyrus and Astyages of Ecbatana, we know not why. Astyages marched against him in person in 549 B.C., but was overthrown.
through the mutiny of his army, which surrendered him to Cyrus. After this, probably in 547, Cyrus overthrew Croesus of Lydia, destroyed the Lydians and subdued the Asiatic Greeks; and taking the Tablet without Arbelona, he defeated the Sute and Bedawin. In the same year he became ruler of the whole of Persia. Marching against Nabû-nâ'id of Babylon, he defeated him, and the Persian army under Gobryas entered E-Ki (?) (Borsippa) "without opposition and without a battle. On the end of June, 538, Cyrus himself, entering in 532 a. of the Persians, destroyed Babylon (or possibly king of Chaldea). Nabû-nâ'id had incurred the anger of the priests of many places by collecting their idols and removing them to Babylon. Cyrus reversed this policy, allowing the gods to be restored to their shrines. It is to this that the Jews owed permission to return to Jerusalem with their holy vessels and to rebuild the temple (Ezr.1.7,8,7). Cyrus, perhaps for political reasons, professed belief in Bel Merodach, the chief god of Babylon, and assumed the titles of the old Babylonian kings. Cyrus was succeeded on his death by 530 B.C. by his son Cambyses, who conquered Egypt and was given the title of Pelusium in 525. Meanwhile, a Magian, Gau-māta, claiming to be Cambyses' murdered brother Bardiyas (Smerdis), rose in revolt in 522 B.C. and Cambyses, whilst marching against him, committed suicide. The usurper was put down and slain in 521 by a Persian revolt which took at least three years' fighting to subdue the numerous rivals who arose in almost every part of the empire, claiming the throne of each country in virtue of real or pretended descent from its ancient royal house. Darius then divided the empire into satrapies, of which there were finally 29 at least, establishing Persian or Median governors instead of allowing them to be ruled by tributary kings. His Scythian expedition, subjugation of the revolted Ionians (499-494 B.C.), the defeat of his army at Marathon (end of 490), and the digging of the canal at Suez are well known. Darius died in 485, before the collapse of the Egyptian revolt. Allowing his own sons to succeed him, his son and successor Xerxes I. It is needless to enter upon the narrative of this monarch's long and disastrous struggle to subdue Greece. He was murdered in 464, and succeeded by his son Artaxerxes I (Ar'ahxēres). Probably the revolt of Megabyzus in Syria during this reign was the cause of the destruction of the walls and gates of Jerusalem (Ezr.4.1-3.; 2Mc.1.3). Dying in 424, Artaxerxes left the throne to his son Xerxes II., murdered and succeeded in 423 by his brother Ochus (Darius II.). Then came Artaxerxes II. (404 B.C.) and Artaxerxes III. (Ochus, 358). After the murder of the latter by Bagoas came Arses, whom Bagoas murdered in 350, and placed on the throne as Darius III. The latter was overthrown by Alexander of Macedon, when the Persian empire passed away.—Language. The ancient language of Persia is known to us from the inscriptions of the Akhemenian kings and from the Avesta. It may be divided into two dialects, probably those of the Persians and of the Medes respectively. It is a sister language to Sanskrit, and hence closely connected with Armenian, Gk., Lat., and other Aryan tongues. In the Heb. text of O.T. there occur a small number of Persian words which have been taken into the Heb. and Aramaic languages. Besides proper names we have {1} some titles, {2} some common nouns, and {3} one adjective (?) in O.T., besides one verb (‘γγαρεῖον) and a noun (γαγός) in N.T., which are of Pers. origin. Omitting the N.T. words, the Pers. terms found in the Bible are mostly in Dan., Esth., Ezr., and Ne. Their omission in the Sept., under the influence of the Pentateuch (e.g. the Pentateuch) is remarkable in view of certain modern theories as to the comparatively late date at which these books are supposed to have received their final form. On the other hand, many of the Pers. nouns which occur, in Daniel especially, were lost from both Heb. and Aramaic so long before the earliest post-Biblical writings in those languages were composed that they are not to be found in the Talmuds, the Targums, or in Syriac writers. These facts deserve far more careful notice than they have yet received. Among Pers. words denoting titles we may notice, "dāhāna (Iranian dāhānāh)"; "paršārāt; "partērmēn (Akhaem. Pers. fratrāta, "first," in the sing.), "nobles"; dāhāhārā (in Bab. inscriptions dātābari, Akhæm. dātābar, does not actually occur), "a judge"; and sārakh (in Avestic sara and sāra mean "head"); "a president." The meaning of the word derivation of the last extinct Pers. is uncertain. There are others, such as tišāštāhā (Tišāštārā), tipītāyē (Aramaic definite plur. form), ādhārgāzdār, and haddābāhār, which have presented difficulties. The sing. of tipītāyē in Akhaemen. Pers. would be ti-pātī, "over-lord," the prefix ti being a shortened form of ati "over," and being still used in Armenian; ādhārgāzdār should probably be ādrgāztār, which would mean "guardian of honour," and hence perhaps "venerable"; haddābāhār, or more probably haddābār (haddābar), is from a word for "sword" still preserved in Armenian, and means "sword-bearer." Among common nouns we find dātāh in Akhaemen. Pers. dādām, "a law," in Mod. Pers. dādām, "Justice; rāz, "a secret" which is still retained in the language; āpapān, Akhaem. āpadānām, "a palace"; pīthām, the Arm. pītām, "message," which in Akhaemen. must have been pātīgāna and in Avest. pātīgāna; in Skt. there is prātīgāna, to go towards," and in Mod. Pers. pātīghām, "message." So also haddām, "limb," in the Avest. haddāmā, Arm. and Mod. Pers. andām; zan, "kind, sort," occurs in Akhaemen. pārū-zanā, "of many kinds," and in Arm. zanazan; pāthīgām, "dauntless" or "special food," has been found in a Babylonian inscription at Nipur in the form pītīpāba, and must have been pātīpāga in Akhaemen., while in Skt. it is pātīpāga. In the Avest. sāravāra, "a turban"; nižānā, "sheath," is in Skt. nišānā, and must have been nišānā in Akhaemen.; wkhīzāh should probably be nižāzānā, which would be nižāsānā in Avest., meaning reward. The only Pers. adjective found is 'azād in Daniel; it is the Arm. azād, and is used in Akhaemen. as 'azād, and means "notified," or "knowledge." Some
Persis. words are also found in Babylonian, e.g. datahara, gansabara, puru, though their acceptance into an ancient literary language was naturally much less ready than into the Aramaic tongue of commerce, in which we have no literature older than that found in Aram cynical Daniel. (Somewhat similarly, we find more Gk. words of a certain kind in Plautus and Terence than in Vergil.) Certain Biblical words once supposed to be Pers. are now known to be Babylonian. For example, darik tomin has no counterpart in Aramaic, but is the Babylonian coin dariku (Babyn. "seven, a decytre." The coin of which the Bab. egirtu. The N.T. αγάπηνω also, from αγάπαω, may possibly be the Bab. agarun, "hired labourer, messenger," from the verb agarun, "to hire," and not from the Akk. verb hashar, from which in Mediaeval Pers. we have hangar, "speed." But gahbhabar (rendered "treasure," in Dan.5.2,3) and hamnikkh, "necklace," about the origin of which there has been doubt entertained, are certainly Persian, the former being Avest. gaddi, "maze" (Skt. gada and gado), with the ending -bar, "bearor:" the latter the Avest. maini, mina, minu, "necklace," with the prefix haim, "to- getherness," from hammaina-ka. The maini is the Skt. mant, mina, mincha, "a gem," and in Avesta we have maneak, "necklace," whence the Gk. μανιάκας, "a torque," in Polybius. [SEMITE LANGUAGES.]-Religion. The Akkadian Inscriptions show us that in Darius I's time special honour was paid to Ausrmatzal, though inferior gods, clan deities, shared his worship. Aramaic inscriptions mention him with Mithra and Anahita (Anahata). The Avesta in its earliest part (the Gāsath or Hymns) makes Ahura-Mazdā (the Omniscient Lord) chief of the Amesha-spentas (Bountiful Immortals), but offers worship to them as well as to him. The dualism of the Zoroastrian religion is well known, but it should be noticed that worship was not paid to the Evil Principle (Ahriman) or the ahrdras, of whom he was the chief. Even in the Avestā, though "good thoughts, good words, good deeds" are specially commendéd, very great importance is attached to forms and ceremonial, which bear a great likeness to those in vogue from early times among the Hindus. Not till later, under Babylonian influence probably, did the soul worship of the Nature-goddess, identified with Anahita, prevail in Persia. The Magi, originally a Median tribe, finally became a priestly caste. Rawlinson, II. 4. Inscriptions; Spiegel, ALLPERSS. Heilinschriftten. [W.ST.C.T.]

PERSIS

Persis, a Christian woman at Rome (Ro. 16.12) whom St. Paul salutes. Peruda (Ezr.2.55) = Perida. Pestilence. [PLAGUE.]
Pestie. [MORTAR.]
Peter, Simon, was the son of a man named 

16.17), or John (Ju.1.42, 21.16. R.V.), and the brother of St. Andrew. SS. Peter and Andrew, in partnership with SS. James and John, the sons of Zebedee, were fishermen on the sea of Tiberias. Their home appears to have been first at Bethsaida (Ju.1.44), and afterwards at Capernaum (Mt.8.5,14). There is little to justify the popular idea that this group of disciples were men without means or education. They owned boats, they had hired servants in their employ, and the house in which SS. Peter and Andrew lived at Capernaum was to have been of considerable size (8.14,16). The Peter mentioned of the Apocalypse is not Peter in the parochial sense; he is Peter in the conversational knowledge of Greek. It is true that he and St. John were reckoned "unlearned and ignorant" by the Sanhedrin (Ac.4.13), but these epithets implied no more than that they lacked the rabbinical training, which alone, in the eyes of the Sanhedrin, would have justified their argumentative use of the Scriptures. The call of St. Peter by Christ was twofold: first, to a temporary companionship, and, at a later date, to definite discipleship. As St. Andrew certainly, and St. John almost certainly, had been followers of the Baptist (Jn.1.35,40), it is at least highly probable that their brothers, SS. Peter and James, were also among his disciples. Having heard the testimony of the Baptist to our Lord, St. Andrew followed Him, and then, convinced that this was the Christ, brought to Him his brother, St. Peter. At this meeting the promise of his new name was given (1.42). Having accepted this for a time, the two pairs of brothers returned to Capernaum and resumed their fishing. After an interval of uncertain length, the second call, that to definite discipleship, was made. Its scene was the sea of Tiberias, and it came while the four were engaged in their work (Mt.4.18; Mk.1.16; Lk.5.2). Shortly after it Christ entered St. Peter's house and healed his mother-in-law. When the twelve apostles were chosen, St. Peter seems to have ranked from the first, as, in some degree, their leader, and his name stands first in all the lists. Through the next period his individual story is merged to a large extent in that of our Lord's ministry, which it would be superfluous to retell here. But we may notice how clearly the strong and weak points of St. Peter's character are brought out in the course of the narrative. He was, on the one hand, affectionate, loyal, and enthusiastic; on the other, rash, boastful, and hesitating. From his lips, at a supreme moment in our Lord's life, came the avowal "Thou art the Christ, the Son of the living God." But as he drew from Christ the fullest benediction, so shortly after he brought upon himself the sternest rebuke ever addressed to a disciple (Mt.16.23). With SS. James and John he witnessed the Transfiguration; with his brother St. Andrew and the sons of Zebedee he listened to the predictions of the second advent (Mt.13.3.) After the Last Supper his protest drew from Christ the explanation of His act in washing the disciples' feet; then, too, he made those protestations of fidelity, so quickly falsified by his threefold denial. On the morning of the Resurrection St. Peter was the first to enter the tomb, and to him, first of the apostles, the risen Lord appeared (11.24,34; 1Cor.15.5). At a later date he was publicly reinstated in his apostleship by Christ, when the threefold denial was averted for him. Then followed the prophecy of his martyrdom (Ju.21.15-19). From the time of the Ascension St. Peter's leadership, as primus inter pares, is clearly recognized by the Church. He suggests the decision of an apostle
to fill the place of Judas, he addresses the people on the Day of Pentecost, the first miracle after the gift of the Spirit is wrought by him. With his actions Ac.1-12 is mainly concerned. About five years after the Ascension he and St. John visit Samaria to confirm those who have been baptized there by Philip (8.14-17), and St. Peter comes into conflict with Simon Magus. Thence he returned to Jerusalem. Later (the date may be given approximately as 35 A.D.), when probably St. James had been given the oversight of the Church in Jerusalem, St. Peter set out on a missionary journey (9.12) extending possibly over eight years. In the course of it he stayed for some time at Lydda, where he healed Aeneas, at Joppa, where he restored Dorcas to life, and at Caesarea, where, in obedience to a vision, he baptized Cornelius. Throughout the period of his journey he seems to have paid frequent visits to Jerusalem (11.2, 12.16), when he returned the baptism of Cornelius, 12.3-19, when he was imprisoned by Herod and miraculously delivered, and Gal.1.18, which mentions a visit paid him in Jerusalem by St. Paul). At the close of this period (c. 44 A.D.) he appears to have made the Syrian Antioch his headquarters, and to have maintained a correspondence between him and St. Paul (Gal.2.11) concerning St. Peter’s refusal to eat with the Gentiles. Shortly before this a graver question—that of the necessity or otherwise of circumcision for Gentile converts—had caused the attendance of both apostles at the Council of Jerusalem, held in the name of the church (Acts 15). What bitter feelings that controversy aroused is shown by the tone of the Ep. to the Galatians. St. Peter made a conciliatory speech, mentioning his own call to work among the Gentiles, and claiming liberty for them. His words had the effect of quieting his audience, so that they listened to SS. Barnabas and Paul. After this St. Peter is not mentioned in Acts. The tradition that he visited Babylon is of late date and most improbable. Nor does the fact that there was a “Cephas” party in Corinth (1 Cor. 1.12) in any way imply that St. Peter was ever in that city. The party of Cephas were those who thought the Judaic ceremonies and circumcision necessary for the new apostles in order to disapprove St. Paul. But that St. Peter visited and suffered martyrdom in Rome within a short time of the death of St. Paul may be taken as practically certain. It is upheld by the explicit statement of Caius in the 3rd cent., when the belief was accepted also by the Churches of Asia, Carthage, and Alexandria, and it is reinforced by the language of Clement of Rome, writing c. 90 A.D. Moreover, there is a complete absence of any contrary tradition. On the other hand, the later belief that St. Peter was bishop of Rome for so long a period as 25 years is quite unhistorical. It is evident, for example, that he would have had a prominent place in the “greetings” of Rom.16 had he been in Rome when this ep. was written—probably in the year 57. Sifting the mass of conflicting arguments that have been advanced, we may take as most probable the view that St. Peter continued to work mainly in Syria until c. 60 A.D., that then he was summoned to Rome for the purposes of the apostle’s first imprisonment, that he was absent from that city when 2 Tim. was written, probably in 63, but returned not long afterwards, and was put to death in the Neronian persecution, shortly after the fire at Rome in July, 64. It is most likely that St. Paul’s death took place between two and three years later. The internal evidence of 1 Peter supports the idea that its writer was in Rome with St. Paul and under his influence. It is unsafe to base any argument upon so doubtful a foundation as the Petrine authorship of 2Peter. [Peter, Ep. i, ii.] We learn, on the authority of Papias, confirmed by Justin Martyr, Irenaeus, and Clem. Alex., that the gospel of St. Mark was based on material supplied by St. Peter, and the testimony of the early Church upon the point seems conclusive. A number of tales gathered round the last days and death of St. Peter, of which the quo vadis? legend is the best known; and there were traditions also concerning his wife, who is supposed to have shared his martyrdom, and his daughter, whose name has been given as Petronilla. The “Acts,” the “Gospel,” and the “Apocalypse of St. Peter” were among the apocryphal works attributed to the apostle. St. Peter is called Cephas in Jn.1.42, 1 Cor.15.22, 2 Tim.3.15, Gal.2.9, Rev.1.21, and Cephas being the Aram. word Cepha, “a rock”; cf. Job 30.6, Je.4.29. Our Lord’s use of the word in Mt.16.18 (“Upon this rock I will build My church”) has received various interpretations. That which takes “this rock” to denote Christ Himself is inadmissible. But the further controversy remaining whether the above “rock” is (1) the Christian creed just uttered by St. Peter (ver. 16) or (2) St. Peter himself, either (a) as an individual, or (b) as representing the Apostolic order. It seems needless, however, to limit the reference exclusively to one of these. All three—common creed, individual faith, and the apostolate—combined to form the basis upon which the Church would be built, and all three may well have been present to our Lord’s mind as He spoke the words. Xavie, Hist. S. Petri; Birks, Studies in the Life and Character of St. Peter; Lipsius, Die apokryphen Apostelgeschichten und Heiligenlegenden, in Hastings, D.B. (5 vols. 1904); Harnack, s.v. in Ency. Brit. For earlier life, comm. on gospels: Ederheim, Life and Times of the Messiah; for later period, Rackham’s Comm. on Acts; Ramsay, Church in Roman Empire, etc.; Lightfoot, Apostolic Fathers. [A.c.d.] Peter, First Epistle of. A. Authorship, Date, etc. (a) External evidence is unusually strong. It is quoted by Polycarp, Papias, Irenaeus, Clemens Alex., Origen, and Tertullian, and finds a place in all lists of the Canon from the 4th cent. onwards. Hence the genuineness of the epistle can be doubted only on grounds of: (b) Internal evidence. It has been alleged that: (1) The references to persecution require a date when it had become widespread (ἐν τῷ χόρῳ ὑπάρχων, ἡ Παπία του Ἰωάννου, ἐν τῷ Ρώμῃ ἐπηκράτησεν, ἠμνήστητος) and that it is therefore from Trajan’s rescript, 112 A.D. On the other hand, Bigg considers that 2 Peter (especially the passage referring to the Neronian persecution) is 64, and Chase thinks the reference is not to State persecution at all, but the violence
slander, etc., of their neighbours. (2) The *style and language*, which are among the best in N.T., are incompatible with the Petrine authorship. But St. Peter, living in Galilee, must have known some Greek; and on the other he could not speak even his own tongue correctly (Mc. 14. 70), that he struck his fellow-countryman as ignorant (Ac. 4.13), and tradition assigns him St. Mark as amanuensis (ἐμανυεύειν). But St. Peter may have employed some one to write for him. (3) The *silvanus* (ἐκ Σίλιανος, 5.12), cannot be pressed in this connexion, as it probably means that Silvanus was the bearer of the letter. (3) If "Babylon" means Rome (? really Babylon, ? Cairo, ? Jerusalem (Harnack)], there should be some mention of St. Paul, if he was there when the letter was written, or had been recently martyred. But St. Paul may have been absent from Rome, or the messages delivered orally by the bearer of the epistle. (4) There is a striking lack of reminiscences of our Lord's life and words. But the defenders of the epistle reply that this lack is exaggerated, and not quite paralleled in other books of N.T. (5) Especially is Peter "deutero-Pauline" in character; there is nothing un-Pauline in it, and it shows great affinity with St. Paul's epistles, especially Romans and Ephesians, in doctrine, thought and language. Cone regards it as a "weakened Paulinism," representing a transitional stage between the First and the Fourth Gospel. But the reply is made that these coincidences with and dependences upon the Pauline epistles can be acknowledged without repudiating the Petrine authorship of our epistle; and that the exaggerated opposition between Pauline and Judaic Christianity supposed by the Tubingen school has long since been disproved. — B. CONTENTS. The contents of 1 Peter furnish but little support to those who maintain that its sole object was to reconcile the glaring opposition between the Pauline and Petrine types of Christianity, but seem rather to support the more prevalent view that the purpose was to exhort the believers in their trials and connect their sufferings with the sufferings of Christ, and, as in His case, with their future glory. He wished also to dwell upon the soundness of the teaching they had already received, and to insist upon the practical duties resulting from it. The epistle is divisible into three sections: (i) 1.1-2.10, the privileges of the redeemed family of God; (ii) 2.11-4.12, the duties of the brethren; (iii) 4.13-5.11, their trials. The author's sympathies are Jewish without being Judaizing; he is saturated with the spirit of O.T., but applies its teaching in the light of the Gospel. To sum up, we may say that it is highly probable that the epistle was written by St. Peter, and it remains at least a possible conjecture that it was written from Rome while St. Paul was on his journey to Spain, c. 64 A.D. — C. DOCTRINE OF 1 PET. The predominant note of 1 Peter's teaching is that to God the Father is the supreme object of their desire and obedience. Holy and upright, yet full of mercy and grace; and the suffering which He sends is for our good. It is Christ rather whom Christians love, and that with "joy unspeakable" (1.8).
that St. Peter was the author of the second epistle which bears his name, since *Jude* is usually assigned to the decade 70-80 A.D. Kühl thinks that 2 Peter consisted originally of 2 Pt. 1 and 2 Pt. 2 to which was added by St. Jude, and later, the interpolation 2 Pt. 2 was inserted from *Jude*, 3:1 being added to connect the parts. [Jude, Epistle of.] Bigg, Intern. Crit. Comment., "Epp. Peter and Jude"; Chase, Hastings, D.B. (5 vols. 1904); Mayor, Ep. Jude and 2 Peter. [D.C.S.-]

**Pethahiah** 1. A priest, over the 19th course in the reign of David (1 Chr. 24:16). 2. A Levite who had married a foreign wife (Ezr. 10:23); probably the same as in Ne. 9:5. 3. Son of Meshezabel, and descendant of Zerah (Ne. 11:24).

**Pethor**, the city whence Balaam came to Balak (Num. 22:5; Deut. 23:4), situated near "the river" Euphrates in Aram-naharaim, and 400 miles from Moab—about 3 or 4 weeks' journey. Balak sent twice (Num. 22:5, 15); so that the narrative requires 4 months for Balaam to reach Moab. As, however, the conquest of E. Palestine occupied 6 months, there is the only time allowed, and as the Arameans had recently invaded E. Palestine, it may be that the Hebrews near the Lebanon, Balaam may have been known to them. An interesting modern parallel is found in the fact that before the battle of Tell el-Kebir in 1882, 'Arabí Pasha sent to Upper Egypt to bring down a famous prophet to curse the English. Pethor is mentioned in Assyrian texts dating about 1370, 880, and 854 B.C. and lay W. of the Euphrates, apparently S. of Carchemish, near the point where the Sajur River flows into the Euphrates. [C.R.C.]

**Pethuel**, father of the prophet Joel (1 Chr. 1:7). **Peulathai** (R.V. properly, Peulalethai), the eighth son of Obad-edom (1 Chr. 26:5).

**Moab Moab** (1 Esd. 5:11) = Pahath Moab.

**Phacereth** (1 Esd. 5:34) = Pochereth. **Phaisur** (1 Esd. 9:23) = Pashur 1.

**Phaldaus** (1 Esd. 9:44) = Pediahia, 4. **Phaleas** (1 Esd. 5:29) = Padenon.

**Phalec** (Luke 5:39) = Pellec. Phalec was father of Phaleas, father of Phailet (2 Sam. 25:44), or Phailet (2 Sam. 3:15), the son of Laish of Gileam, to whom Saul gave Michal, David's wife, in marriage.

The touching scene of the parting of Phailet from her on her restoration to David is recorded in 2 Sam. 3:16.

**Phaltiel** (God's deliverance); 2 Esd. 5:16; R.V. text; Psaltiel, R.V. marg., Syr.; Salathiel, A.V., Vulg.), an angel, "the captain of the people," who came to Ezzasar in the second night of his first vision. [A.L.W.]

**Phanuel**, an Asherite; father of Anna the prophetess (Luke 2:36).

**Pharoah**, "sons of Pharaoh" were among the servants of the temple who returned with Zerubbabel (1 Esd. 5:31 only).

**Pharaoh**, the biblical title of the native kings of Egypt, corresponding to the hieroglyphic *Ptah*, or "Great House," a title similar to that of the "Sublime Porte." Ten Pharaohs have been one of the "O.T. 1. The Pharaoh of Abraham. He must have belonged to one of the three Hyksos or Shepherd dynasties (15th, 16th, and 17th), which were of the same race as the patriarchs, who naturally, therefore, found a welcome at the Egyptian court.—2. The *Pharaoh of Joseph*. He also will have been a Hyksos king, belonging, it would appear, to the last Hyksos dynasty. According to Eusebius, he was an Apophis, of whom three are known from the monuments.

**Pharaoh of the Oppression.** His identity was settled by the excavations of Prof. Naville, which proved Pithom to have been built by Ramses II. of the 19th dynasty c. 1300 b.C. Ramses II. was also the builder of the Pharaoh of the Exodus. The name of the Israelites (Israel) has been found on one of his monuments. The Exodus will have taken place before the 8th year of his reign, as in that year, we learn from a letter to the Egyptian government, the land of Goshen was without inhabitants.—5. **Pharaoh, Father-in-law of Mered.** In the genealogies of the tribe of Judah, mention is made of the daughter of a Pharaoh, married to an Israelite: "Bithiah the daughter of Pharaoh, which Mered took" (1 Chr. 4:18). This marriage may aid us in determining the time of the sojourn of the Israelites in Egypt. It is perhaps least probable that this later Egyptian Pharaoh would have given his daughter in marriage to an Israelite than that a Shepherd king would have done so, before the Oppression.—6. **Pharaoh, Father-in-law of Hadad the Edomite.** For the identification of this Pharaoh we have chronological indications, and the name of his wife Tahpenes (1 K. 11:18-20). The history of Egypt at this time is extremely obscure, neither the monuments nor Manetho giving us clear information as to the kings. It appears that towards the latter part of the 20th dynasty the high-priests of Ammon, the god of Thebes, gained great power, and as last supreme Pharaoh of the Ramses family, at least in Upper Egypt. At the same time a line of Tanite kings, Manetho's 21st dynasty, established itself in Lower Egypt. Since Shishak, the founder of the 22nd dynasty, invaded Palestine 9 years after Solomon's death, this Pharaoh must have been the last king of the 20th dynasty.——7. **Pharaoh, Father-in-law of Solomon.** The queen was brought into the city of David, while Solomon's house and
the temple and the city wall were building, hence the marriage took place not later than the 11th year of the king, when the temple was finished, having been commenced in the fourth year (1K.6,1,37,38). It appears that the marriage must have taken place between about 24 and 17 years before Shishak’s accession. Hence the father-in-law of Solomon will have been one of the last kings of the 21st dynasty, like the father-in-law of Hadyad, though it does not seem probable that they were one and the same.—9. PHARAOH, THE OPPONENT OF SENNACHERIB (Is.36,6), was Shabataka, the successor of Sabaco or So, and predecessor of Taharka (Tirhakah, Is.37,9), who at the time of Sennacherib’s invasion of Judah was not yet king of Egypt.—9. PHARAOH NECHO. The first mention in the Bible of a proper name with the title Pharaoh is in the case of Pharaoh Necho, who is also called Necho simply. His name is written Necho and Nechah, and in hieroglyphics NEKU. He was of the Saite 26th dynasty, and reigned by 16 years (611–595 B.C.). He attempted to complete the canal connecting the Red Sea with the Nile, and sent an expedition of Phenicians to circumnavigate Africa, which was successfully accomplished. In 606 B.C. he invaded Palestine, where Assyria, already in its death-throes, could no longer enforce its authority; and, being encountered on his way by Josiah, defeated and slew the king of Judah at Megiddo (2K.23,28,30; 2Chr.35,20-24); and later deposed Jehoahaz (2Chr.36,4). In 605 B.C., the Egyptians were utterly overthrown at Carunitsch by Nebuchadnezzar (Je.46,1,2,6,10), in a battle which led to the loss of all the Asiatic dominions of Egypt (2K.24,7).—10. PHARAOH HOPHRA. The next king of Egypt mentioned in the Bible is Pharaoh Hophra, the second successor of Necho, from whom he was separated by the six years’ reign of Psammetichus II. Hophra is the hieroglyphic AUH-APRA, written Apris by Herodotus and Uaphris by Manetho. He came to the throne 589 B.C., and ruled 19 years. Herodotus makes him son of Psammetichus II, whom he calls Psamnis, and great-grandson of Psammetichus I. In Jer.37,5,11 we read that Zedekiah, the last king of Judah, was aided by a Pharaoh against Nebuchadnezzar, in fulfilment of a treaty, and that an army came out of Egypt, so that the Chaldeans were obliged to raise the siege of Jerusalem. The city was first besieged in the 8th year of Zedekiah 588 B.C., and captured in his 11th year 588 B.C. It was evidently continuously invested for a length of time before it was taken, so that it is most probable that Hophra’s expedition took place during 589 or 589. There may, therefore, be some doubt whether Psammetichus II. be not the king here spoken of; but the siege may have lasted some time before the Egyptians could have heard of it and marched to relieve the city. The Egyptian army returned without effecting its purpose (Je.27,5-8; Ezk.17,11-18; cf. 2K.25,1-4). No subsequent Pharaoh is mentioned in Scripture, but there are predictions doubtless referring to the misfortunes suffered by Bacchides the 2nd Persian conquest when the prophecy “there shall be no more a prince of the land of Egypt” (Ex.30,13) was fulfilled. [A.H.S.] PHARAOH, DAUGHTER OF. Three Egyptian princesses, daughters of Pharaohs, are mentioned in the Bible.—1. The preserver of Moses, daughter of Pharaoh (Ex.2,4).—2. Pharaoh, daughter of the Pharaoh who exchanged Joseph for 20 pieces of silver (Gen.42,25).—3. Pharaoh, the daughter of Pharaoh. Jehosapha (Je.39,3).—4. Pharaoh, daughter of Pharaoh (Je.39,4).—5. Pharaoh, daughter of Pharaoh. Sennacherib, in his account of the campaign against the Israelites (Ex.5,15-40). She would thus have been one of the numerous daughters of Ramses II. Artapanus, a historian of uncertain date, calls her Merrhia, and her father Palmanothes, and relates that she was married to Chenepheres, who ruled in the country above雅思青山. The tradition of the name is of little value.—2. Bithiah, wife of Mered an Israelite, daughter of a Pharaoh of uncertain age, probably of about the time of the Exodus (1Chr.4,18). [PHARAOH, 5.]—3. A wife of Solomon, most probably daughter of a king of the 21st dynasty (1K.3,17,8,9,24). [PHARAOH, 7.] PHARATHONI, properly PHARATHON. One of the cities fortified by Bacchides during his contests with Jonathan the Hasmonean (1Mac.9,50). Perhaps the same as Paithon (Judg.12,15), in “the land of Ephraim,” an unknown site. It may, however, be the present village Perion, 11 miles W. of Shechem. [c.r.c.] PHARES (Mt.1,1; Lu.3,33; PARAESE, 1. Pharaoh, daughter of Parashae (Perez, 1 Chr.27,3).—2. Paro, Mt.1,3, Lu.3,33, TEds.5,1). Twin son, with Zarah, or Zerah, of Judah and Tamar his daughter-in-law (Gen.38,29). Pharez seems to have kept the right of primogeniture over his brother, as (in the genealogical lists) his name comes first. The house also which he founded was far more numerous and illustrious than that of the Zarchites. Its remarkable fertility is alluded to in Ru.4,12, “Let thy house be like the house of Pharez, whom Tamar bare unto Judah.” After the death of Er and Onan without children, Pharez occupied the rank of Judah’s second son, and from two of his sons sprang two of the chief houses of Judah, the Hezronites and Hemanites. From Hezron’s second son Ram (N.T. Aram), sprang David and the kings of Judah, and eventually Jesus Christ. A considerable number of David’s mighty men seem, from their patronymic or gentile names, to have been of the house of Pharez; and the privilege to the royal family was the issue of the head of the family. —2. (1Eds.8,30) = PAROH. PHARIRA (1Eds.5,33) = PERAIA. PHARISEES, a religious party, or school, amongst the Jews at the time of Christ; so called from prishin, the Aram. form of the
Heb. word *prišunm, "separated." The name does not occur either in O.T. or Apoc.; but it is usually considered that the Pharisees were essentially the same as the Assideans mentioned in 1Mac.2.42, 7.13-17, and 2Mac.14.6. The earliest mention of them in Josephus is when the breach between them and John Hyrcanus I. occurred. We are told that John had been a disciple of these before the Alexander Janneaus, the son of Hyrcanus, persecuted the Pharisees, and crucified many of them. Alexander (his widow), who succeeded, took them into favour. They supported Hyrcanus II. against his brother Aristobulus. Although Antipater, the father of Herod, had been a supporter of Hyrcanus I., their candidate for the high-priesthood, they opposed the Herodian family. This fanaticism precipitated the final contest with Rome, which resulted in the capture of Jerusalem by Titus, and the fall of the Jewish state. Authorities. The sources of information are mainly three: (1) The writings of Josephus, who used the Talmud, Pharisees, (Life, c.) and the Jewish War; it is to be noted that his great work professes to give a direct account of their opinions (2 Wars viii. 2-14; 18 Ant. i. 2; and cf. 13 Ant. x. 5, 6; 17 Ant. ii. 4; r3 Ant. xvi. 2, and Life 38). The value of his account would be much greater, if he had not accommodated them, more or less, to Gk. ideas. (2) The N.T. alike in St. Paul's epistles and in the gospels and Acts. (3) The first portion of the Talmud called the Mishna, or "second law." This last is important, it being almost impossible to have adequate conceptions respecting the Pharisees without it. It is a digest of the Jewish traditions, and a compendium of the whole rabbinical law, reduced to writing in its present form by Rabbi Jehudah the Holy, who flourished in the latter half of the 2nd cent. He was born 135 A.D., and succeeded his father Simeon as patriarch of Tiberias, holding that office at least 30 years. The precise date of his death is disputed, but was probably in 218. There is no reasonable doubt, that although it includes a few passages of a later date, the Mishna was composed as a whole towards the very end of the 2nd cent. Though it represents to some extent the traditions current amongst the Pharisees at the time of Christ, we must remember that more than a century had elapsed since the destruction of Jerusalem. During that period imagination had time to modify to a very great extent what had been received. I. The fundamental principle of the Pharisees, common to them and all orthodox modern Jews, was that by the side of the written law, regarded as a summary of the principles and general laws of the faith, the class of a Oral law to complete and to explain it. It was an article of faith, that in the Pentateuch there was no precept—and no regulation (ceremonial, doctrinal, or legal)—of which God had not given to Moses all explanations necessary for their application, with the order to transmit them by word of mouth. The classical passage in the Mishna on this subject is the following: "Moses received the (oral) law from Sinai, and delivered it to Joshua, and Joshua to the elders, and the elders to the prophets, and the prophets to the men of the Great Synagogue" (13 Ant. 38). In addition to such revelations, which were not disputed, and in addition to interpretations received from Moses which were either implied in the written law or to be elicited from it by reasoning, there were three other classes of traditions. (a) Opinions on disputed points, which were the result of a majority of votes. (b) Decrees made by prophets and wise men in different ages. These carried prohibitions farther than either the written or oral law of Moses, in order to protect the Jewish people from temptations to sin or pollution. (c) Legal decisions of proper ecclesiastical authorities on disputed questions. As a whole they formalized and defined the minutest particularities of ritual observances. The expansions of "bondage," of "weak and beggarly elements," and of "burdens too heavy for men to bear," faithfully represent the impression produced by their multiplicity. In order to observe these regulations the Pharisees formed a kind of society. A member was called a *kăbhûr, and those among the middle and upper classes who were called "the people of the land," or the vulgar. Each member undertook, in the presence of three other members, to remain true to the laws of the association. The most characteristic laws of the Pharisees related to what was clean (*táhôr) and unclean (*támi). Whatever their origin, it was a matter of vital importance to a Pharisee that he should be well acquainted with these regulations; for every one technically unclean was cut off from almost every religious ceremony (Num.19.20). On principles precisely similar to those of the Levitical laws (Lev.20.25, 22:1-7), it was possible to incur these awful religious penalties either by eating or by touching what was unclean in the Pharisaical sense. In reference to *eating, independently of the slaughtering of holy sacrifices, which is the subject of two other treatises, the Mishna contains one treatise, called *Hullin, specially devoted to the slaughtering of fowls and cattle for domestic use. One point of vital importance to a Pharisee is that anything slaughtered by a heathen should be deemed unfit to be eaten, like the carcass of an animal that had died of itself, and like such carcass should pollute the person who carried it." With regard also to *touching what is unclean, the Mishna abounds with prohibitions and distinctions no less minute. Josephus compared the Pharisees to the sect of the Stoics. He says that they lived frugally, but that they followed the leadership of reason in what it had selected and transmitted as a good (18 Ant. i. 3). We learn from the Talmudic accounts of great rabbis (e.g. Hillel) that poverty, if connected with learning, was regarded as a disgrace—rather the reverse. Although it would be unreasonable to class all Pharisees as hypocrites, yet the Talmudic statements imply that many of them were. There were said to be seven classes of Pharisees. (1) The shoulder Pharisees, who wear their good deeds on their shoulders. (2) The painted Pharisee, who seeks to avoid a woman shuts his eyes and bruises himself to bleeding against a wall. (4) The painted Pharisee, who is so holy that he will not touch any one lest he be defiled.
The reckoning Pharisee, who says, "What duty must I do to counteract my neglect?"

The Pharisee of fear—like Job.

The Pharisee of love—like Abraham. All but the last two have elements of hypocrisy or acting in their character, and must be regarded as having been some of the most intense formalists. But Jesus would have the Jews realize that they were making the word of God of none effect by their traditions. This was true, not only because the purest form of O.T. religion was almost incompatible with such formality (Mt. 6:8); but also because some of the traditions were decided at variance with genuine religion. In regard to a future state, Josephus represents the Pharisees as believing in the transmigration of souls: "They say that every soul is imperishable, but that the soul of a good man only passes over (or transmigrates) into another body, while the soul of a bad man is chastised by eternal punishment." (Ant. War. viii. 14). This may, however, only be Jeduson's attempt to give some foundation for the doctrine of the resurrection of the body in a way that would be least unpalatable to the Gk. and Hellenized Romans. There are two passages in the gospels which might countenance this idea: one in Mt. 14:2, where Herod the tetrarch is represented as thinking that Jesus was John the Baptist risen from the dead (though a different colour is given to Herod's thoughts in the corresponding passage, Lu. 9:7-9); and another in Jn. 9:2, where the question is put to Jesus whether the blind man himself had sinned, or his parents, that he was born blind? Notwithstanding these, the Pharisees appear to have believed in a resurrection of the dead very much in the same sense as the early Christians. This is in accordance with St. Paul's statement to the chief priests and council (Ac. 23:6); and is implied in Christ's teaching, which does not insist on the doctrine of a future life as anything new (Mt. 22:30; Mk. 12:25; Lu. 20:35-36).

The Mishnah represents the resurrection of the body rather than any mere transmigration of souls; and the peculiar phrase, "the world to come," occurs in it. In reference to the freedom of the will, Josephus represents the Pharisees as holding views between the absolute fatalism of the Essenes and the absolute freedom of the Sadducees. In the Talmud the fulfillment of prophecy is regarded as conditional. "There were three sects of the Jews," Josephus says, "which had different conceptions respecting human affairs, of which one was called Pharisees, the second Sadducees, and the third Essenes. The Pharisees say that some things and all things are the work of Fate; but that some things are in our own power to be and not to be. But the Essenes declare that Fate rules all things; and that nothing happens to man except by its decree. The Sadducees, on the other hand, take away Fate, holding that it is a thing of nought, and that human affairs do not depend upon it; but in their estimate all things are in the power of ourselves, as being ourselves the causes of our good things, and meeting with evils through our own inconsiderateness." (cf. 18:4; Jut. 1:3, and 2:Wor. viii. 14). The opinion of Graetz (Handbuch der Juden, i., and ii. a) seems not improbable—that the real difference between the Pharisees and Sadducees in reference to this was at first practical and political. [SADDUCEES.] IV. There is indisputable authority for the statement that proselytism prevailed among the Pharisees to a very great extent at the time of Christ (Mt. 23:15). The number of proselytes referred to in Josephus and in N.T. is considerable, and implies a larger number who are not noticed. This proselytism probably paved the way for the early diffusion of Christianity. Jews at the time of Christ were already scattered over the fairest portions of the civilized world. The then existing regulations of synagogues afforded facilities which do not now exist either in synagogues or Christian churches for presenting new views to a congregation (Ac. 17:2; Lu. 4:16), as there seems normally to have been in every synagogue a considerable number of proselytes. Under such auspices the proselytizing spirit of the Pharisees inevitably stimulated a thirst for inquiry, which both enlarged and took to itself a number of foreign and diverging controversies. Thus there existed precedents and favourable circumstances for efforts to make proselytes, when the greatest of all missionaries, a Jew by race, a Pharisee by education, a Greek by language, and a Roman citizen by birth, preaching the resurrection of Jesus to those who were to believe in the resurrection of the dead, confronted the elaborate ritual-system of the written and oral law by pure spiritual religion; and thus obtained the cooperation of a number of the Jews themselves in breaking down every barrier between Jew, Pharisee, Greek, and Roman, and ending the traditional barriers to national and international brotherhood of a common Christianity. After the fall of Jerusalem, when the Sadducean sect disappeared, and the Essenes were absorbed in Christianity, the Pharisees became to such an extent the predominant sect, that these other tendencies disappeared. The Talmud is essentially a Pharisaic book. [Source.]

Pharos (Exr. 8:3). Elsewhere Paros, as R.V. here.

Pharpar, the second of the two "rivers of Damascus" (2K. 5:12). [Abana.] It is probably the present Nahar el-Araj; but Benjamin of Tudela and an old Arab version identify it with the Taphir which joins the Abana at Damascus. The 'Araja is the rise of the S.E. slopes of Hermon, some 5 or 6 miles from Beit Jinn, close to a village called Jinn, the name of which it bears during the first part of its course. It then runs S.E. by Kefr Hanwar and Sava, but soon turns N. and ultimately ends in the Bab el Hafjen, the most southerly of the eleven bathing-stations of Damascus. It is nearly due E. of, and about 40 miles from, the point at which the river started. [C.R.C.]

Pharzites, The, descendants of Pharce son of Judah (Num. 26:26).

Phaseah (Neh. 7:51) = Paseah, 2.

Phaselis, a town on the coast of Asia Minor, on the confines of Lycia and Pamphylia, and consequently ascribed by the ancient writers sometimes to one and sometimes to the other. Its commerce was considerable in the 6th cent. B.C., for in the reign of Anaximenes it was one of a number of Gk. towns which carried on trade in wool in the commerce of the Hanseatic confederacy in the Middle Ages.
In later times Phaselis was distinguished as a resort of the Paphian and Cilician pirates. It was for a long time the last port on the coast for the Phases and joined to the mainland by a low isthmus, in the middle of which was a lake, now a pestiferous marsh. On the E. side of this was a closed port and a roadstead, and on the W. a larger artificial harbour, formed by a mole run out into the sea. Considerable remains of this may still be seen, and the walls of the town, which by a time the Phaselites confined their relations with the Paphians to the purposes just mentioned, but they subsequently joined the piratical league, and consequently suffered the loss of their independence and their town lands in the war which was waged by the Roman consul Publius Servilius Isauricus in the years 77–75 B.C. In the interval between the growth of the Cilician piracy and the Servilian expedition the incidents related in 1Mac.15.23 occurred.

Phas'siron, the head of an Arab tribe (t, Mac.8.66), defeated by Jonathan.

Pha'ssaron (Pha'ssaron) (Pha'ssaron), Phene'mus, Phene'nus = Pashur, Ph. Thbe (Phoeb).

Phene'nus, Phene'cia, Phoe'nicia (Pho'e-ni-ka). Phoe'nicians.—1. (Ac.15.3,21.2.) This name does not appear in the Heb. books at all, but occurs in the Gk. Apoc. (1Esod. and 2Mac.), being always coupled with Coelesyria. In N.T. we have an allusion (Mk.7.24-30) to a Syro-Phoe'nician woman. The Gk. word was applied to the region on the shores W. of Lebanon, of which the Phoinikes were natives. The word Phoinix for the "palm" probably was derived from the country, and applied also to the "purple" dye of Phoeacia, and to the mythical bird of the E. A Phoenician was called Phoinix, and a Phoenician woman Phoinixa. But the Romans also called a Carthaginian Punicus; and it seems that these words—though with Aryan terminations—may have come from the Semitic root pūn, "to set" (of the sun). In this case the Phoenicians were named as the most "western" of the Semitic tribes; and according to their own traditions (Herodotus, i. 127) they were more Semitic in language than the Hebrews. (Hist. Nat. vi. 32) they came at a remote period (before 2700 B.C.—Herodotus, ii. 44) from the Persian Gulf. Their coast region was called Ke'ta (western) by the Egyptians, Mari'tu (the direction of sunset) by the Akka'dians, Aqará (east) by the Assyrians. But we do not know if the race dwelling on the Phoenician coast had any special name. They called themselves after their great cities, which formed separate settlements under their kings.—Geographical. Phoenicia was the shore land of Syria, from the gulf of Issus on N. to Acco on S., or more especially from Arvad to a distance of 150 miles, to the bay N. of mount Carmel. For the first 25 miles, from Arvad to Tripoli, the plain of the El'even-therus and the "entering in to Hamath" have a breadth of 5 to 10 miles. The Lebanon spurs then run to the coast at the promontory called Theon-prospon by the Greeks (perhaps Phoeni-ka, the natives), and the road runs up the cliffs, or along a narrow beach past Bat'rān and Gebal, till it gains the sands N. of Be'irut, S. of which it passes over sand dunes and narrow shores to Sidon, Sarepta, and Tyre, where the beach and plain are a mile wide. The trade route then crosses the pass called Ku's (or Ke'ta) Na'qarah (or Naqūrah), the old "ladder of Tyre" (1Mac.11.59), which descends into the plain of Acco, which is 17 miles long and 4 miles wide; while, of this city as far as the Kishon, the sandy beach, sand dunes, and plain extend, 2 to 5 miles in width, for 8 miles N. and S. Thus Phoenicia may be said to represent a great narrow strip of shore, under the mountains; but at the sites of Antiochus (opposite Arvad), Tripoli, Be'irut, Sidon, Tyre, and Acco, the presence of natural reefs formed small harbours, sufficient for the small ships of the sturdy sailors who, steering by the polestar, traded with all the isles of Greece, probably before 1500 B.C., and afterwards with Italy; while (after 850 B.C.) the 38 settlers at Carthage carried Phoenician commerce over the W. Mediterranean, as far N. as Marseilles, and beyond the "pillars of Hercules" to Tarrasius and Cades. [Tyr.] Their native coast was watered by streams more or less perennial, including the Eleutherus, the Qad'isa (at Tripoli), the Aqaba, the Ras (or "Rit—but"), and the Lycus (N. of Be'irut), with the Tamyras (Damür) half way to Sidon, the Leontes (Līdım) N. of Tyre, and the Belus just S. of Acco. The plain and low hills produced corn, wine, and oil, but the most famous natural products were the palm (pohoinix), of which few remain except at the sites of Acco, Sidon, Tyre, or "snail"—a sea shell (Murex trunculus) from which was obtained a dye which varied in colour from dark purple to bright red. This is still found along the shores. Inhabitants. The earliest tribes of Canaanites, or "lowlanders," in Phoenicia (Gen.10.15,17,18) were akin to Cusus, and probably of the non-Semitic Akkadian race of Chaldeans. (c. 2500 B.C.), the Akkadians knew Syria, and they also were great sailors. A bas-relief at Marathus (Amirī) represents a deity (thought to be Nergal) standing erect on a lion, holding a lion in his left and a sword in his right hand, with a semi-Egyptian head-dress, and a pigtail (like the Semitic mallets); and the walls of the temple of Phoenicia (Amari) was an Akkadian deity. But the names of the Phoenician cities are Semitic, including Sido, and the towns of the Zemarīte (at Sumrāh), Arvadīte (at Er Rū'ād), and Arkīte (at 'Arqāh). Other important and ancient towns, such as Gebal, Tyre, Be'irut, Sarepta, Homs, and Bat'-ān, were apparently so entirely Semitic as not to be included in the list of sons of Ham. Even as early as 1700 B.C. Egyptian pictures of the Ke'tt represent a bearded race with distinctively Semitic features. The fresco from a Theban tomb (now in British Museum) shows tribute-bearers of the Phoenician Khāru (probably Akhar or "west") of this age, bringing vessels of gold, of bronze, and one of silver (showing a highly developed art) with an ivory tusk, and a small yellow child (of another race) as a slave. The name Ke'tt is translated Phoinikes in Gk. on the Decree of Canopus. We do not now know also, from the Amarna tablets, that the language written (and probably spoken) in Phoenicia in 15th cent. B.C. was the Semitic Babylonian. About 800 B.C. it appears to have been an early Aramaic dialect, and after c. 500
PHENICE, PHENICIA

b.c. it approximates to Hebrew. [SEMITIC LANGUAGES.] These Semitic traders were ruled in each of the great cities by "kings"; and the earliest appearance of a government by "judges" (šôpê饪in) among the Canaanitans belongs to the 6th cent. while, in Tyre, it is not known before the 6th cent. n.c. In this respect the Phoenicians resembled all the other Canaanite and Semitic tribes of Syria and Palestine.—History. The Hebrews were acquainted with the Phoenicians of Tyre, Sidon, Gebal, and Arvad, as noticed under those headings; and, after c. 1000 n.c., they learned from these civilized neighbours the arts of alphabetic writing, building, and navigation. Though including all Lebanon in the promised land, the O.T. indicates clearly that the Phoenician shore cities remained independent, even in the time of David and Solomon; while, in the time of our Lord, Acheche and all the plain and low hills to N. were outside the border of Israel. [GALILEE.] The

Parthian attack in 52 b.c. (Dio Cassius, Hist. Rom. xlviii. 25); but under the Roman emperors Phoenician trade prospered, and indeed did not really decay until comparatively recent times. The great trading towns desired peaceful commerce, and Gk. philosophy flourished at Tyre, Sidon, and Byblus, down to Christian times. The traders were willing to accept any overlord who would keep peace for them throughout his empire.—Monumental Notices. Egyptian domination in Phoenicia began in the time of Ahmes, the first king of the 18th dynasty. Early in 16th cent. n.c. Thothmes III. marched from Kadesh on Orontes (Qades) to Zamar (Smyra) and Aradus, and on the "sea road" to Arkalû (Arqah), N. of Tripoli (Brugsch, Hist. Egl. ii. pp. 331, 343). S. Phoenicia was perhaps already tributary, but is unnoticed at this date. In 15th cent. much of the Amaran correspondence refers to the attack on Phoenicia by the allied Amorites and Hittites, who took all the chief

Phoenicians opposed the Assyrians, and—while buying them off by tribute—constantly rebelled against their authority; but, after their struggle with Babylon, they appear to have willingly accepted Persian supremacy from 527 B.C. till 331 B.C., when the tyranny of the decadent Persians led to a desperate revolt, and rendered all the Phoenician cities (except Tyre) willing to accept Alexander the Great in 333 B.C. Gk. rule continued till 287 B.C., when Phoenicia came under Ptolemy Lagi, to pass again to the rulers of Antioch through the victories of Antiochus III. in 198 B.C. During the troubled times that followed, Jonathan the brother of Judas Maccabaeus is said to have driven the Greeks N. of the Euenethus River, c. 117 B.C. (I Macc. i. 31), attempting to restore the dominion of Solomon. Pompey, after 65 B.C., respected the freedom of the Phoenician cities, as did Antony c. 30 B.C. (Josephus, Ant. xi. vi. 3-5), and even when he gave Cleopatra power as far N. as the Euenethus he excepted Tyre and Sidon (15 Hist. ii. 15). Phoenicia suffered from the cities, Smyra, Arkah, Gebal, Batrûna (Balûna), Beirut, Sidon, Tyre, and Acheche being noticed as attacked, with smaller places. The authority of Egypt was overthrown, and was apparently not restored till Ramses II. (c. 1350 B.C.) marched from Sidon and Beirut to reach Kadesh on the Orontes, by the "entering in to Hamath." The Egyptian Mohar, later in the same reign, drove his chariot down this pass, and by Gebal, Beirut, Sidon, Sarepta, Tyre, Achzib, and Beth-dagon, on the way to Hazor (Brugsch, Hist. Egl. ii. pp. 104-106). The Assyrian accounts begin with the attack on Beirut by Assur-ülûkhelî (before 1400 B.C.), after the Canaanite rebellion against Egypt. Assur-ûšîlab(l c. 1150 B.C.) has left his name at the Dog River (Lycus), near this city; and another monument at the same spot, giving the name of Tiglath-pileser, is supposed to refer to c. 1130 B.C. But the struggle for supremacy in Phoenicia first became formidable c. 885 B.C., when Assur-nazir-pal of Assyria invaded the W. and received homage from the kings of Tyre, Sidon, Gebal, and
Arvad "which is in the midst of the sea." The Assyrian Eponym Canon gives many historical details, from the time when Shalmaneser I, was king of Assyria, to the time of Assurnasirpal II, when he was defeated by the Phoenicians. The Phoenician sacred emblems included the holy tree (אֲשֶׁרֶת), the cone, and the hand, with doves sacred to Assarja. The Phoenicians were circumcised (Herodotus, ii. 104), and they observed the custom of human sacrifice, at Ladeia, even as late as 400 b.C. Their great goddess Asherah, or devotees of Assarja, were suppressed at Akka by Constantine, and existed later also at Daphne and Paphos. The tariff of sacrifices, in 2nd cent. B.C., is preserved on the Marseilles Tablet. The picture at Thebes (already noticed) shows that the Phoenicians shaved the head as a vow in the 17th cent. B.C., like the Israelites at Sinai. The monuments of Phoenician mythology, from Schonhannatho and from the later Philo of Byblos (c. 1st cent. A.D.), have come down to us in a very corrupt form, in Gk., but serve to show the Babylonian origin of the religion. —Civilization. From the 15th cent. B.C. downwards, the Phoenician fleet dominated the coast, with numerous tablets, bas-reliefs and monuments and in history. We have also Assyrian bas-reliefs representing their triremes, and many allusions to their trade in metals, and in slaves whom they captured abroad. The monumental remains include the three bas-reliefs of Ramses II. at the Dog River, which accompanied Shalmaneser III., and inscribed for Assur-ri-sîlīm, Tiglath-pileser, Shalmaneser, Sennacherib, and Esar-haddon. The alphabetic inscriptions in Phoenician are less numerous, on the Syrian coast, than those of Cyprus, Attica, and Carthage, but include important texts at Sidon, Tyre, and Gebal, and at the ruins of Umm el Amād N. of Acco, with one hard letter. That of Assur-ri-šîb of the same age, dated 221 B.C. The coins of Phoenician cities, in the Gk. age and later, include one of Laodicea with the Phoenician legend, "of Lādākia a mother in Canaan." —Writing. As regards architecture and art, it is unsafe to call anything Phoenician that is not marked with Phoenician elements and only those that have been ascribed to this race which are of Gk., Rom., and even of Crusading origin. But there is abundant evidence that Phoenician art was first influenced by Babylon, and later by Egypt, finally adopting Gk. ideas. In the aqueduct at Tyre, as in the walls of Eryx in Sicily, we find the Phoenicians using the false arch. Their temples were often hypethral shrines, with sacred erect stones and cones— as among Canaanites generally. The remains found in tombs and temples include small votive figures of bronze or of pottery, like the Babylonian examples, with seal-cylinders, representing mythical subjects such as occur also on the bronze bowls. To these may be added coins and gold ornaments, glass, and ivory carvings. The latest remains include Gk. and Lat. texts, in some of which Phoenician names still occur down to the 2nd or 3rd cent. A.D., as copied at Beirut, Orontopolis, and Helvius. Tyre, the Phoenician Sidon, was still (1814-1873). The old race preserved its language and its pagan rites till after the establishment of Christianity. The leading sources of information include Renan's Corpus
PHEREITES

Inscriptionum Semiticarum (1881-1889), and his Mission de Phénicie (1863-1874); the Surv. W., by W. P. Thoms; and of S.G. Papers, pp. 75-85 (Aradus), 151-153 (Tripoli), 1881; Perrot and Chipiez, Art in Phoenicia, 1885; and Canon Rawlinson's History of Phoenicia, 1889. The present writer explored the whole coast S. of Semyra, to Tyre and Acco, in 1881.—2. (Ac.27, 12), more properly amen, a haven in Crete on the S. coast. The name was doubtless derived from the Gr. word for the palm-tree, which Theophrastus says was indigenous in the island. Both Ptolemy and Strabo mention a town Phoenix; while Ptolemy alone mentions a haven, of a similar name. Mr. James Smith placed Phoenix at the modern El Tabarre—(c. c.)

Pherites (1 Eisd. 8.69), Pherezite, Pherezites (Jth. 5.16; 2 Eisd. 1.21) = Perizites.

Phichol, chief captain of the army of Abimelech king of the Philistines of Gerar in the days of both Abraham (Gen. 21.22, 32) and Isaac (Gen. 26.6).

Philadelphia, a town on the confines of Lydia and Phrygia Cataracceumne, built by Attalus II., king of Pergamus. It was situated on the lower slopes of Tmolus, on the S. side of the valley of the Aiz-e-chiali, a river which is probably the Cogamus of antiquity, and as its inlet (the Hermus) in the neighbourhood of Sart-Kalesi (Sardis), about 25 miles to the W. of the site of Philadelphia, which is still represented by a town called Alasheker (the redish city). It is 952 ft. above the sea. The region around is highly volcanic, and geologically speaking belongs to the district of Phrygia Cataraconeum, on the W. edge of which it lies. The original population of Philadelphia seems to have been Macedonian, and the national character to have been retained even in the time of Pliny. There was, however, as appears from Rev. 3. 9, a synagogue of Hellenizing Jews, as well as a Christian church. The locality continued to be subject to frequent earthquakes, which, in the time of Strabo, rendered even the town-walls of Philadelphia unsafe. The expense of reparation was constant, and hence perhaps the poverty of the members of the Christian church (Rev. 3. 8).

Philarches, a proper name in A.V. of 2 Mac. 8. 32, but properly the name of an office, "the commander of the cavalry" (R.V. the phylarch).

Philemon, the name of the Christian to whom St. Paul addressed his epistle on behalf of Onesimus. He was a man of some wealth and position (Ph. 2. 5-7), and of high character, as is shown by the confidence of the沉积ments addressed to him by St. Paul. There is a tradition that he became bishop of Colossae, and died in the Neronian persecution. [A.C.D.]

Philemon, Epistle to. There is a clear mark of distinction between this and all other extant writings of St. Paul. The other epistles belong, so to speak, to his official correspondence as an apostle. Even the Pastoral Epistles, though addressed to individuals, partake of this character; they are concerned chiefly with questions of ecclesiastical government. But the Ep. to Philemon is a letter of a wholly personal and private kind, written to ask a favour from a friend. For this reason the Church has endeavoured to uphold its canonicity against those who argued that a merely private letter had no right place in the Bible. But its genuineness as the work of the apostle has never seriously been questioned. It is supported by Origen and by its inclusion in the Muratorian Canon, and even more conspicuously by the spiritual evidence supplied by the Epistle itself. It has, moreover, gained universal admiration by its tact, delicacy, and charm. Renan's description, "un petit chef d'œuvre," epitomizes the general verdict. While its precise date has been disputed, there is no doubt that, like Eph., Col., and Philippians, it was written during St. Paul's first imprisonment in Rome, and most probably in a year 61. The apostle, to whom in his hired house his friends were allowed access, made the acquaintance of Onesimus, a fugitive slave from Colossae. Possibly Onesimus may have been brought to St. Paul by Epaphras, one of St. Paul's companions, and a presbyter of Colossae. The slave had run away from his master, Philemon, a wealthy Colossian, a Christian, and the personal friend and convert of St. Paul. A normal penalty for his crime would have been crucifixion, or, at the least, torture and branding. To escape capture, he appears to have made his way to Rome with the proceeds of his villainous business, calling himself in the vile slums which were the criminals' quarters of the city. Such was the social outcast who sought St. Paul's aid. And the difference between the heathen and the Christian codes was never exemplified more strikingly than by the treatment which the apostle, Roman citizen as he was, accorded to this criminal slave. Onesimus was welcomed as a son, instructed in the faith, and baptized. Some small return for this kindness he was able to make, by ministering to the personal needs of his benefactor. So useful did he prove, and so sincere grew the friendship between the two, that St. Paul sent him to Colossae, with a letter, to which he added, to Cairo, on the right bank of the Nile. On the left bank, however, Onais is the name of a town.
ings from his companions in Rome, and, with a benediction, the letter ends. We cannot doubt that it achieved its purpose. Comm. by Lightfoot and H. J. C. Knight; also works (e.g. by W. M. Ramsay, Conybeare and Howson) on life and writings of St. Paul.

Philetus was possibly a disciple and Hymenaeus, with whom he is associated in 2 Tim. 2:17. The names of Philetus and Hymenaeus occur separately among those of Caesar's house- hold whose relics have been found in the Col- umbaria at Rome.

Philip.—I. King of Macedonia, 359–336 B.C., and father of Alexander the Great (1 Mac. 1:15, 8, 2).-2. A Phrygian, knighted by Epiphanes as governor at Jerusalem (c. 170 B.C.), where he behaved with great cruelty (2 Mac. 5:22, 6:11, 8, 3). He is commonly identified with—3. The foster-brother (9:29) of Antiochus Epiphanes, whom the king on his death-bed appointed guardian of his son An- thigonus, to prevent the职务 of Lysias, 164 B.C. (1 Mac. 6:14, 15, 55). Lysias, however, secured the person of Eupator (6:17), whose enmity caused Philip to flee into Egypt (2 Mac. 9:29). Lysias and Eupator entered on a struggle with Judas Maccabaeus (1 Mac. 6:28–54); but they were induced to make peace by friendly connexions and his alliance with Hannibal, 215 B.C., brought him into con- flict with the Romans, whose victory over him (at Cynoscephalae, 197 B.C.) is mentioned in 1 Mac. 8:5.

Philip Herod I., II. [Herod.]

Philip the Apostle was from Bethsaida, on the lake of Galilee. Like his fellow-townsmen, he seems to have had fewer Gk. connexions than others (cf. Jn. 12.20ff.). He was one of the earliest disciples of our Lord, and perhaps, like at least two of them, had previously been a disciple of St. John the Baptist. He was responsible for his friend Nathanael's introduc- tion to Christ, and was evidently one of the party who attended the marriage feast at Cana with Him (Jn. 2:2). In all four lists of the Twelve he always stands fifth in order, or head of the second quartette. St. John has recorded three incidents in which St. Philip took a leading part: (1) 5:5ff., our Lord consults St. Philip as to the possibility of feeding the multitude, and his conclusion is that 200 pennyworth of bread would not suffice to feed so many (5,000); (2) 12:22, he and St. Andrew introduce to our Lord certain Greeks who had come up to Jerusalem for the feast; (3) 14:8, he enters into the conversation with the remark "Lord, show us the Father, and it sufficeth us"; to which our Lord replies that the length of time He had been with them should have convinced him that seeing Him meant seeing the Father. These are indications of a character possessed of considerable earnestness and missionary zeal, but without much depth of spiritual insight. The refer-

ences to St. Philip outside the Bible are rendered uncertain by frequent confusion between him and Philip the Deacon; but there seems some probability that he was married, and had daughters, and that after various missionary tours he settled down at Hierapolis in Phrygia, and there died. [C.C.P.]

Philip the Evangelist is first men- tioned Ac. 6:5. He is one of the Seven appointed, because of the dispute between the Hebrew and Hellenistic disciples, to superintend the daily distribution of alms. [Deacon.] The after-history of St. Philip shows him as one of whom it is no great presumption to think as continuing hardly less than St. Stephen to the great increase of disciples. The persecu- tion of which Saul was the leader must have stopped the "daily ministrations" of the Church. The most prominent teachers were compelled to take to flight, and St. Philip was among them. It is noticeable that the city of Ma'ath is thrice mentioned by him (2 Mac. 5:22, 6:ii, 8:8). He is the precursor of St. Paul in his work, as St. Stephen had been in his teaching. After his contact with Simon Magus, it fell to the lot of St. Philip to take the first step in opposition to the exclusiveness of the Jewish Christians. He is directed by an angel of the Lord to take a road that leads from Jerusalem to Gaza on the way to Egypt. A chariot passes by in which there is an Ethiopian. The his- tory that follows is interesting as one of the few records in N.T. of the process of individual conversion, and one which we may believe St. Luke obtained, during his residence at Caesarea, from St. Philip himself. When he reached his work as a preacher at Azotos (Ashdod), and among the other cities that had formerly belonged to the Philistines, and, fol- lowing the coast-line, came to Caesarea (ver. 40). Here, for not less than 18 or 19 years, we lose sight of him. The last glimpse of him in N.T. is when St. Paul, on his journey to Jerusalem from Caesarea (Acts 21:8), seems to have had fewer Gk. connexions than others (cf. Jn. 12.20ff.). He was one of the earliest disciples of our Lord, and perhaps, like at least two of them, had previously been a disciple of St. John the Baptist. He was responsible for his friend Nathanael's introduc- tion to Christ, and was evidently one of the party who attended the marriage feast at Cana with Him (Jn. 2:2). In all four lists of the Twelve he always stands fifth in order, or head of the second quartette. St. John has recorded three incidents in which St. Philip took a leading part: (1) 5:5ff., our Lord consults St. Philip as to the possibility of feeding the multitude, and his conclusion is that 200 pennyworth of bread would not suffice to feed so many (5,000); (2) 12:22, he and St. Andrew introduce to our Lord certain Greeks who had come up to Jerusalem for the feast; (3) 14:8, he enters into the conversation with the remark "Lord, show us the Father, and it sufficeth us"; to which our Lord replies that the length of time He had been with them should have convinced him that seeing Him meant seeing the Father. These are indications of a character possessed of considerable earnestness and missionary zeal, but without much depth of spiritual insight. The refer-
1,600 ft. above the sea-level. Between the foot of Symbolum and the site of Philippi, two Turkish cemeteries are passed, the grave-
stones of which are all derived from the ruins of the ancient city, and close by the one first reached is the modern Turkish village Bereketli. This is the nearest village to the ancient ruins, which are now uninhabited. The Philippi which St. Paul visited was a Roman colony founded by Augustus, and the ruins which now strew the ground are no doubt derived from that city. The establishment of Philip of Macedonia was probably not exactly on the same site. Philip, when he acquired possession of the site, found there a town named Datisus or Datumus, which was in all probability in its origin a factory of the Phoenicians, which the Via Egnatia then crossed. The gold-mines in the mountains here, as in the neighbouring Thasos. The proximity of the gold-mines was of course the origin of so large a city as Philippi, but the plain in which it lies is also of extraordinary fertility. The position, too, was on the main road from Rome to Asia, the Via Egnatia, which from Thessalonica to Constantinople followed the same course as the existing post-road. The ruins of Philippi are very extensive, but present no striking feature except two gateways, which are considered to belong to the time of Claudius. Traces of what is either an amphitheatre, a race-course or stadium are also visible towards the hills on the N.E. side. Inscriptions both in Lat. and Gk., but more generally in the former, are found. [COLONY]

Philippians, Epistle to. To the Pauline authorship of this short but rich and beautiful epistle the external evidence from the 2nd cent. onwards is ample. Not till the 19th cent. was it suggested, notably by F. C. Baur (1845), that it was a 2nd-cent. fabrication. The grounds of such criticism were essentially a priori, lying in theories of the earliest Christian history with which the epistle did not square. Even Renan thought them futile; and Harnack accepts the epistle with confidence. To the reader who is not biased against a theory, the epistle is its own full authentication with its "divine naturalness" of simplicity, sympathy, and wisdom. Its writing, in the highest likelihood, falls within the "two years" of St. Paul's captivity at Rome (Ac.28.30). It has indeed been held (e.g. by H. A. Meyer) and seen our art, as Paul for this view) that it belongs to his imprisonment at Caesarea (Ac.24.23-27). But the reasons for the Roman alternative are strong; among them are the many intimations that the writer was placed at an all-important centre. We think, with Lightfoot, that the epistle was written early within the two years at Rome (sav. 63). We gather (1Ph.1.14) that St. Paul's "bonds" had made, just before he wrote, a strong and animating impression on the local converts — an effect much more likely to appear soon after his arrival than later. Moreover, the "doctrinal tone" of the epistle (e.g. in 3.9) belongs more to the period of e.g. Romans than to that of e.g. Ephesians. An objection to such early dating is found in the mission of Epaphroditus (2.4) with money-supplies for St. Paul: could the Philippians, it is asked, have heard of the apostle's arrival, and of his needs, and then have sent (after some delay, 4.10) their agent from Macedonia to Rome? But quite six months may be allowed; and communication within the empire was so good as to make such an interval adequate. We may thus date Philippians within the first half of 62 A.D. The occasion of writing is clearly indicated. Epaphroditus, a leading Philippiote, had brought a gift of money from the attached mission for their imprisoned founder's comfort; and he was now anxious to return. Through him St. Paul had heard much to gladden him about Philippi, but also some reasons for anxiety, especially in a tendency to internal divisions and the rise of cliques. Some errors of teaching seem also to have invaded Philippi — a harmonising tendency (3.2-11), and an "antinomian" view of moral duty (3.13-19), possibly also a view of "Christian perfection" (3.12) dangerous to humility. Under these concurrent conditions the epistle was composed; perhaps dictated to Epaphroditus, and then stored in the apostle's stomach until his next visit, when it was worked into a form eminent even amidst St. Paul's epistles for a sustained beauty, at once exquisitely natural and gently dignified. Its messages on both doctrine and duty are conveyed with an evidently deliberate intention, but also with the unartificial tacit which comes of far-sighted love. The mischiefs of division are corrected by countless passing touches as well as by occasional direct precepts, descending (4.2,3) into personal detail where necessary. St. Paul's own experience at Rome of the miseries of strife (1.15-18) is glanced at with perhaps a similar purpose. The more dogmatic instructions and warnings are given, as always by St. Paul, not by way of formal pronouncement, but in vital contact with life, its duties and affections. The great doctrinal utterance on the Person of Christ (2.5-11) is embedded in an appeal for unselfish unity, and the restatement (3. passim) of our Lord's grace to the writer, and the instruction, culminating in the hope of the glorification of the body, is made in connection with actual dangers to faith, purity, and godly fear, and is blended with the apostle's own biography in a way which brings writer and readers into vivid sympathy. In similarly informal yet impressive modes the letter teaches its lessons of patience; of the faith which finds equally in life and in death the presence of Christ; of a "peace of God" (4.7) which equally overcomes the bitterness of unloving opposition (1.18), the strain of a supreme suspense (1.20-25), and the straits of want (4.12). Meanwhile, allusions to friends and fellow-workers are made with the utmost naturalness (2.4), yet always so as to convey a spiritual suggestion. But the epistle must be read and re-read if its inimitable harmony of the divine with the human is to be felt, the tone through which being that of a message from the eternal Master, while, equally throughout, the heart of the human servant has its free and perfect play, strong while tender, individually affectionate while widely comprehensive. Philippi lay at the northern end of
PHILISTIA

PHILISTINES, THE

the Aegean near a pass in the Balkans, in a beautiful country. Hard by were fought (132 B.C.) the two battles which decided the fate of the Roman oligarchy, and paved the way for the rise of the imperial regime. Augustus later made the place a "colony" (colonia)—i.e. a military municipality—whose two chief magistrates were generals (strategoi), and their constables "chapters" (chairemen). The vivid story of the evangelization of Philippi (probably 52 A.D.), St. Paul's first effort in Europe, is told in Ac. 16. Twice later he visited Philippi; in 57 A.D. (20.1) and 58 A.D. (20.6). We may safely assume a still later visit, after his release, from the confident language of Ph. 1:25-27. After the apostolic age we hear little of the place. Ignatius passed through (c. 110 A.D.) on his way to martyrdom at Rome. His friend Polycarp wrote to the Philippians his one extant epistle. Green and quiet pastures now occupy the site of the memorable town.

Philistines, The. Whence did they come? In Gen.10.14 and 1 Chr.1.12 we read that Mizraim (Egypt) begat "Casluhim (whence went forth the Philistines), and Caphtorim" (R.V.). Driver thinks the parenthesis should follow Caphtorim, but the point to note is that the name "Casluhim" and "cannot mean "from whom," as in A.V. Genesis does not connect the Philistines racially but geographically with Mizraim and Ham. In Deut.2.23, Je.47.1, Am.9.7, the Philistines are said to come from Caphtor. Centuries after their settlement in Palestine they were still foreigners. The LXX. calls them alaphyllos (aliens).—Where then is Caphtor? Ebers connects it with the Delta, the LXX. with Cappadocia, a good case can be made out for Cyprus, whence came the Zakkel; but modern opinion is predominantly in favour of Crete, which was always connected with the S. and not with the N. of the Mediterranean. It is possible that the Philistines migrated from the Delta to Crete, and thence to Palestine. This opinion in consistent with Gen.10, and may find support from recent archaeology. Crete was the abode of many races, Aryan and Semitic (Odyssey xix. 170 f.), and there was a time when it derived its civilization from Egypt. In 1 Sam.30.14, Ezk.25.16, Zeph.2.5, Chere-thites and Philistines are thought by many to be one race. For Chere-thites the LXX. reads "Cretans." In Is.9.12 the LXX. for "Philistines" reads "Hellenes." Tacitus (Hist. v. 2) preserves a story that the Jews came from Crete, showing how traditions persist and are confused. In Ps.87.1 Philistia, Tyre, and Ethiopia are linked together, as Mizraim, the Philistines, and Sidon are in Gen.10.11,11.15. For Phoenician tradition as to origin, see Herodotus i. 1; xvii. 89.—Were they Semites or Aryans? On the one hand, the names of their gods and goddesses, the names of their deities, and the names of their gods, so are some proper names, e.g. Deliliah, Goliath, and Obededom. But they probably took the names with the cities, and naturally worshipped the gods of the land where they lived. It is not certain that Deliliah, Goliath, and Obededom were pure Philistines. On the other hand, they belonged to an uncircumcised people (Judg. 14.3, 15.18; 1 Sam.16.17-19; 2 Sam.1.20). They did not kill their sacrifices according to Semitic ideas (Zech.9.7), and what we know of their polity finds analogies in Greece rather than Asia. Sayce, moreover, thus describes a Philistine in Egyptian art: "The features are [are] those of the typical Cretan, with the straight nose, high forehead, and thin lips. Like the Zakkel, he wears on his head a curious sort of pleated cap, which is fastened round the chin by a strap. Besides the cap and sometimes a cuirass of leather, his dress consisted of a kilt, or perhaps a pair of drawers, similar to those depicted on objects of the Egyptian drain period; and he was armed with a short round shield with two handles, a spear, and a short but broad sword of bronze. The kilt and arms were the same as those of the Sherdan or Sardimans" (Early Hist of Heb. 293).—The Genesis Stories. Gen.21.28 tell of Philistines at Gerar in the time of Abraham; the Philistines are those people under kings named Abimelech. Many scholars deny there were any Philistines in patriarchal times in S.W. Asia. Driver attributes Gen.21.23,34, to a redactor, but in ch. 26 (J) no such attribution is possible. Even Sayce thinks the latter story a doublet of later date and inferior authority to ch. 21. On Knobel's theory it is a possible hypothesis that on the migration to Crete a remnant found shelter in the desert. In any case, the Philistines of Genesis seem to the present writer, to have no connexion with the Philistines of later history.—When did they arrive? The Amarna tablets do not mention them. In Num.13.29 the Canaanites dwell by the sea. In Judg.1.18 Judah captures Gaza, Ashkelon, and Ekron apparently from the Amorites. Deut.2.20-23 is an editorial addition to the text. But in Joshua's old age (Jos.13.24) they possess their five cities and the "circuits." So the settlement was subsequent to the Israelite invasion but before their time. The "cities" of Philistia was at first circumscribed in Judg.1.34 the Amorites drive Dan out of the plain. In Judg.5.17 Dan had still places on the coast. These deductions are not inconsistent with Egyptian history. Menephtah II. (the Pharaoh of the Exodus) had fought with marauders from the N. who attacked the Delta by sea and land. In Ex.13.17 we read "the way of the Philistines," in 23.31 "the sea of the Philistines." The coast had known their incursions long before they came to settle (cf. in British history, "the Saxon shore"). In the reign of Ramses III (c. 1232 B.C.) the Philistines, Zakkel, etc., came not to raid but to settle. They brought families in ox-carts, camped among the Amorites, plundered the country, and threatened Egypt. Ramses defeated them, took Gaza and marched to N. of Syria (Hommel). It was then that the Philistines drove out the Avim (Deut.2.23). Justin (xviii. 3) records how some years later they fought the Sidonians, probably the confederacy presided over by Jabin. Checked N. and S., they oppressed Judah (Judg.3.31). Though Shamgar effected a temporary deliverance, Judah plays no part in the history of the Judges, and from 15.4 we infer that they regarded Philistine
PHILOLOGUS

PHILISTINES, THE
domination as normal. After Jephthah had defeated Ephraim at the borders of Jordan (1Sam.11.5-7), he peacefully returned to central
Israel and kept it subject 40 years. To
time Samson's exploits may be referred,
1904). Half-way through this period was the first battle of Eben-ezer, when the ark was taken (1Sam.4). The period ends with Samuel's victory in the second battle of Eben-ezer (ch. 7).
Throughout the reign of Saul, 40 years, there were continual wars (14:52), which may be divided into three periods. (1) The Philistines were dominant, garrisoned the land and collected tribute (13:1). The text is corrupt if we must allow time for Jonathan to grow up, for it is with his slaughter of Philistines at Geba that the revolt begins. (2) A punitive expedition. The Philistines fortify Michmash and engage in systematic pilage. Jonathan seizes Michmash, and Saul pursues the Philistines down Ajalon (ch. 14).
From ver. 21 we learn that the Philistine army included Hebrews. (3) Fighting and raids—vial the Philistines (ch. 15). Saul was, on the whole, successful in defence, but while he was organizing an army in the highlands, the Philistines were becoming masters of the plain of Sharon northwards. The final struggle was for Esdraelon, and Saul was defeated and slain on Mt. Gilboa. Triumph and Fall.
For the next seven years, David at Hebron and Ishboseth at Mahanaim were tributaries. Ephraim was jealous of Judah and divided from the N. by Esdraelon. The Philistines dominated all the trade routes. But on David's becoming sole king, their supremacy was challenged. At first they drove him to his hold, Adullam (2Sam.5:17), but he won a decisive victory at Baal-perazim, and in two subsequent campaigns completely subdued Philistia (vv. 18-25).—David's Body-guard. David enlisted Cherethites and Pelethites, probably in Philis-
tia, besides 600 men from Gath (2Sam.15:18).
Now he turns to numbers to meet the coronation of Solomon (2K.1.38) and of Joash (2K.11:4; R.V. Carles, but A.V. captains). They were also apparently temple guards (cf. 1K.14:28; 2K.11:1; Ezk.44:6ff.). In the reign of Joash they are denounced by Zephaniah (1:9; for "leaping over the threshold", cf. 1Sam.5:5).—Subsequent His-
tory. Philistia was subject to Solomon (1K. 4:21), but regained a partial independence under Rehoboam. He retained Gath (2Ch. 11.8), but Israel lost Gibbethon (1K.15.27,
16:15). The Philistians paid tribute to Jehoshaphat (2Ch.17.11), but raided Judah at his death (2Ch.21.16-17). In 803 B.C. Adad-
irarri subdued Philistia. A little later Uzziah conquered it (2Ch.26.6); but the Philistines revenged themselves upon Ahaz (Is.9.2-14), who summoned Tidgith-pileser to his aid (734 B.C.). Hezekiah, probably in alliance with Sargon (720 B.C.), made an expedition as far as Gaza, but in 714 Ashdod again revolted and was captured by Sargon. By this time Heze-
kiah was allied with Egypt and Philistia, and there were great rejoicings when Sargon died (Is.14:29,32; cf. 20). Sennacherib, however, took Ashkelon and Ekron c. 705. In the next century Egypt was the enemy. Psammetichus took Ashdod after the longest siege in history (c. 290 B.C.) and annexed it. For the next 200 years they ruled the country in the time of Josiah; but the Philistines, not yet broken, opposed the return of Necho from the battle of Megiddo c. 608. They suffered much in the wars of Nebuchad-
nezzar with Egypt, and they showed "the old hatred" to Israel at the time of the Exile (Ezk. 25.15), though they intermarried with them on the return (Ne.13.23,24). Cambyses (525 B.C.) found Gaza subject to the Egyptians, but from Zech.9.4 we learn the pride of the Philistines was not abated. It was Alexander in 332 who conquered the country and took Gaza after two months' siege, and served Bactes, the governor, as Achilles did Hector. The plain became Hellenized. The Maccabees fought there (1Mac.3-5), and finally Zechariah's prophecy was fulfilled—Philistia was reckoned with Judah.—Polity and Characteristics. The Philistines lived in five cities and ruled a mixed population in the country. That country was wonderfully fertile—a cornland of Judah (Jos.15.1-15), and the great Grecian ports at Gaza and Ashkelon; a fleet (LXX. Is.
11.14); they sold slaves to the Grecians (Ji.3. 6; Am.1.6; 1Mac.8.41). Their cities were well-nigh impregnable. They were well armed, having chariots and armour. They were probably expert at smith's work. At any rate, in later periods they had chariots and charioteers, and the confederacy was controlled by five lords (Jos. 13.3; Judg.3.4), who always acted together (Judg.16; 1Sam.5.8,6.16), who could over-rule the kings of the cities (1Sam.29.2ff.). After the time of David, kings take the place of the lords (J.e.25.20; Zech.9.5). They had also captains (A.V. princes) of the combined army that was divided in thousands and hundreds (1Sam.29.2). They enlisted foreigners in their service—Amorites (7.14), Hebrews (14.21). Goliath may not have been a Philistine by race, though classed with those he aided (17.5, 32, etc.). They disarmed their enemies and paraded their number in the lists (1K.20.26; 2K.1.5, cf. 3.31; 1Sam.13.19-23). Their fighting was for tribute and trade routes. They worshipped Baalzephon (2K.1.6), Ashtaroth (1 Sam.31.10; Herod. i. 105), Dagon (Judg.16. 23; 1Sam.5.7-5; 1Chr.10.10; 1Mac.10.83), and Derceto (Diod. Sic. ii. 4). They carried their gods into battle (2Sam.5.21), and prided
themselves on victories in their temples (1Sam.31.9), and had a reputation as diviners (cf. 8.2).—This persistent people never seem to have lost their warlike spirit in the midst of luxury and encircling surroundings. Like the Turks in Europe, they were probably never more than a garrison in the midst of a subject people of mixed race. Besides authorities already quoted, see W. Max Müller, Asien und Europa; Maspero, Struggle of the Nations; Brugsch, Egypt under Pharaohs; G. A. Smith, Hist. Geo.; W. R. Smith, Prophets; Pinches, O.T. in Light of Ancient Mon.; Comm. on Genesis, Judges, Samuel, and Isaiah. For other views see CAPADOCIA; PALESTINE. [L.M.S.]—Philologus, a Christian at Rome saluted by St. Paul (Ro.16.15). Pseudo-Flapolytus includes him among the Seventy, and tradition makes him bishop of Sinope.
Philosophy. The Jews were not by nature a philosophic race. Their conclusions came to them by intuitions rather than by logic, intuitions which reached their highest level in the sayings and the writings of the prophets. It is these intuitions of the prophets, preserved for us in the historical and prophetical books of the Bible, that served them instead of, indeed took the place of, systems of philosophy. It was not till after their contact with the Gk. world, which came about as the result of the conquests of Alexander, that traces of a philosophic strain in the Hebrew Scriptures; after that date there are elements of philosophy which manifest themselves alike in the Apocryphal literature of O.T. and in the writings of St. Paul and St. John in N.T. The two systems of Gk. philosophy which had most influence on Jewish and Christian thought and expression were the writings of Plato and the works of the Stoics. Of the influence of Aristotle we find scarcely a trace, except perhaps in the μεταφυσική of Heb.8.2. Nor is this wonderful; for while Plato's mind was deeply and truly religious, Aristotle certainly approached the problems of philosophy from the viewpoint of science. To Plato, on the other hand, and in a much less degree to the Stoics, the book of Wisdom is undoubtedly indebted; and the same is true among N.T. writings of the gospel and 1st ep. of St. John and of the ep. of St. Paul. The debt of the author of the book of Wisdom to Gk. philosophy is seen (1) in the conception formed of the creation of the world, the relation of man to God, and its relation to God, (3) in his belief in the soul's pre-existence, (4) in his doctrine of the four cardinal virtues, derived partly from Plato, partly from the Stoics. (1) The author of the book of Wisdom describes the world as created by the hand of God, from formless matter (κωσμόφορον ἀθάνατον σύνεσιν), as an original act of God, and it has a certain reminiscence of Gen.1.1, 2, shows evident traces of a philosophy distinct from the teaching of Genesis in that it implies that matter was co-eternal with God and speaks of that matter in the more or less technical language of Gk. philosophy as formless, i.e. possessed of no definite attributes or qualities. Such a conception, however familiar to the students of Gk. philosophy, was quite alien to Jewish thought. (2) The conception of Wisdom, as we have it in this book, has its roots in earlier writings, particularly in Pr.8, where it is described as the guide of man and the assessor of God in the creation of His works, having been in the possession of wisdom, whereas it had been brought down to men (Pr.8.22, 23). But to this conception the author of the Wisdom of Solomon adds an element of His own, and that element seems drawn from Gk. philosophy. For in the later book Wisdom is conceived no longer as a possession of God and therefore presumably separable from Him, but as an element of the divine nature, something which He could not be without (Wis.7.25, 26). Some writers have supposed that in ch. 1, 2, where the author of the book is, perhaps, alluding to and re-futing the teaching of Ecclesiastes, there is a reference to the Stoical and Epicurean doctrines which these same critics find embodied in that book; but the reference to Ecclesiastes, though possible, is not clearly made out; and the desiring utterances of the preacher, if they are glanced at in the book of Wisdom, seem rather to represent deep-rooted ten-dencies in human nature, tendencies reproduced in the teachings of Zeno and Epicurus respectively, than to be directly traceable to Stoic or Epicurean influence. Indeed, the fact that the two elements are found subsisting side by side in the book Ecclesiastes points rather to the conclusion that both were composed at a date before the tenets of the two schools had taken definite shape, or, at any rate, before they had become known to the Jews generally. (3) The third doctrine which seems to mark the influence of Platonism is that of the pre-existence of the soul before birth expressed in Wis.8.19, 20. There is no analogous tenet to be found in any other part of O.T. literature, and we may therefore un-hesitatingly set this doctrine down to external influences, and almost certainly to Plato, as it formed so distinctive a feature of his philoso-phy system. (4) Lastly, we seem to have in the list of cardinal virtues, sobriety, under-standing, righteousness, and wisdom, the φρονήσεις, δικαιοσύνη, ἀνθρεία: Wis.8.7), a classification which is distinctively Gk., certainly as old as the Republic, but one to which the Stoics in later times also gave currency. In N.T. the doctrine of the Λόγος as enunciated by St. John, also bears traces of the influence of Gk. thought and Gk. philosophy. It seems certain, and would be generally admitted, that the term itself was derived from its current use in Gk. philosophy. The term λόγος finds a place both in the Platonic and the Stoic philosophy, and each of these contributes in turn an element to the theological conception of the Λόγος as we have it in the preface to St. John. In the Timaeus of Plato, p. 1053, creation is described as the work of the Λόγος and θανάσια of God, and this thought became a commonplace in Gk. philosophy. But while Plato does not discuss the relation of the λόγος to the person-ality of God, still less has he any idea of the λόγος becoming incarnate in the person of a man: the λόγος which was active in creation was still with him the λόγος of a Personal God, and this brings him into relation with St. John when he says in the preface (1.2, 3), οὗτος ἦν ἐν ἀρχῇ πρὸς τὸν Ὀθέων. Πάντα δὲ αὐτῶ το ἐγένετο, καὶ ὁ χωρὶς αὐτῶ ἐγένετο οὐδὲ ἦν, ὁ γεγενημένος. In the Stoics, though the word was still conceived as the work of reason (Λόγος), that reason is no longer believed to be, as it usually was in Plato, the reason of a Personal Being. It seems rather to be an impersonal principle inherent in the system of the universe itself, a law in accordance with which the universe develops itself. While in this respect the Stoic conception is much farther removed from our conceptions, that is of Plato, still, the fact that the Stoics regarded the Λόγος as the supreme law of the universe made it more easy and natural for St. John to adopt the phraseology of the Λόγος to express his own fundamental thought. The way in which Gk. philosophy was com-bined with Jewish thought and tradition in the Johannine doctrine of the Logos seems to be
PHILOSOPHY

admirably expressed by Dr. Drummond (Fourth Gospel, p. 419), who says: "In the doctrine of the Logos he [St. John] seems to place himself between Jew and Gentile, and to appropriate a common term as the expression of an uniting faith. It is as though he said, 'You Greeks behold in Christ the consummate Reason, that Reason of which I have so often heard you speak, which dwells eternally with God, and in which you have seen the divine basis of the Universe, and the indwelling light of man; you Jews behold in Him that Word of God, which spake to your fathers and was handed down in your Scriptures, but for you who believe is no longer inscribed in tablets of stone or parchment, but of flesh.' St. Paul's attitude to Gk. philosophy is, on the whole, an illustration of this, the Johannine forms of it in Stoicism he must have been, as we shall see, well versed; but philosophy seemed to him to lack that power of moral incentive and that constraining force which were with him the primary requisites in any system which deserved at all the attention of mankind. In the latter part of his epistles, St. Paul, 17.22-32) St. Paul had indeed used arguments of a more or less philosophic kind: he had appealed to a Stoical authority; he used a Stoical and even an Epicurean argument; he had spoken in some sense as a philosopher to philosophers. [Stoics.] But the speech had not the force of conscience, the heart-searchings of his hearers. He did not make many converts through it: some had gone away mocking, others had only got as far as to say, We will hear thee again about these matters (Ac.17.32). And so at Corinth he tells us that he entirely altered his method. He determined to have nothing to do with the teacher of Paul, the Stoics and the Stoic philosophy, and not to know anything but Jesus Christ and Him crucified (1 Cor.2.2). For the wisdom of this world is foolishness with God (1 Cor.3.19), seeing that knowledge puffeth up, but love edifieth (1 Cor.8.1) (Ramsay, St. Paul, the Traveller and Roman Citizen, pp. 254-255) whole, the philosophers, and in other passages seems to regard philosophy as of little value in making men Christians, and even speaks as if there were some fundamental antagonism between the philosophic spirit, as he knew it in his day, and the Christian temper (1 Tim.6.20, 21), yet he does not hesitate to press the teachings of philosophy into the service of Christ, and to find in a form of Christian philosophy the best antidote to the perversions of a false system. In the epistle to the Colossians and to the Ephesians we have more than the outlines of a complete Christian philosophy—a philosophy which, while it never embodied the whole Logos, yet while it fully embraces the whole Logos doctrine as it is found in the preface to St. John's Gospel. For Christ in these epistles—and the same truths are equally implied, though not so explicitly stated, in his earlier epistles—is set forth as the one and only mediator between God and the universe, and as a mediator through whom the universe is the Person through Whom God created it and administers it. He is "the image of the invisible God, the firstborn of all creation; for in Him were all things created, in the heavens and upon the earth, things visible and things invisible, whether thrones or dominions or principalities or powers; all things have been created through Him, and for Him is before all things, and in Him all things are held together" (Col.1:15-18). This language is repeated, though less fully, elsewhere (e.g. 1 Cor.8.6, "Through Him are all things, and we through Him"). It is God's good pleasure and purpose to sum up all things in Christ (Eph.1:20). Nor is His mediation less complete in reference to man. St. Paul no less than St. John sets Him forth as the light which lighteth every man that cometh into the world; equally emphatically does he declare that in Him is life, and the life is the light of men, since "He is the life-giving spirit" (2 Cor.3.17). As such He is the possession of all true Christians 'living in them' (Gal.2:20); 'forming Himself in them' (4.19); 'transforming them into His image' (2 Cor.3.18); enlightening their understandings so that they can judge all things, even searching out 'the hidden things of God' (1 Cor.2), and uniting them in the redemption of the Universe (A.D.D.176-213) (Inge, Personal Idealism and Mysticism). But while they are thus one on this point, there is, on another side, a certain contrast between the gospel of St. John and the teaching of St. Paul. In St. John the incarnation takes the first place and redemption the second; with St. Paul it is the other way round. He set forth "that which was from the beginning, that which we have heard, that which we have seen with our eyes, that which we beheld, and our hands handled, concerning the Word of life (1 Jn.1:1, 2); i.e. how the Logos 'became flesh, and dwelt among us (and we beheld His glory, as of an only-begotten of the Father, full of grace and truth (1 Jn.1:14); but in St. Paul we have scarcely any reference to the earthly life of Christ, except His passion and resurrection. On the other hand, the mediatorial, atoning, reconciling work of Christ receives an importance and stress in St. Paul which is hardly given to it in St. John. It sprang up, as it were, by no means ignores this aspect of His work (Lightfoot, Colossians, pp. 116-120; Inge, op. cit.). Yet it is not in regard to the doctrine of the Logos alone that St. Paul is brought into relation with Gk. philosophy, and particularly with the Stoics. Tarsus and its neighbour, the home of St. Paul's childhood and youth of his middle life, was one of the chief centres in which Stoicism sprang up; and St. Paul, with his keen intelligence and active mind, can scarcely have failed to come under its influence and to have had his language affected by its philosophy. In three directions in particular we find traces of its influence in his writings. (i) He almost certainly owed to the influence of Stoicism the name of conscience (συνείδησις) and the paramount importance which he attached to it: only he gave to the conception a new direction; for while with the Stoics conscience remained an unexplained fact and influence, to St. Paul it is the voice of God, speaking to man's conscience (Rom.1:20). (ii) St. Paul in a way adopts the Stoical doctrine of the self-sufficiency of the wise man and his superiority alike to the buffeting of fortune and to the slights which are put upon him by his fellows; but to St.
Paul the man who is thus impervious to the stroke of fate and to the jibes of man is not the wise man, despite his fancied superiority to the rest of the world, but he is who has become a new creature in Christ. Even so the form of his doctrine is Stoic, while the spirit is Christian. (iii) The idea of a citizenship in Heaven—a citizenship not incompatible with, though at some points over-riding, the citizenship of a particular country, one in which all men, whatever their race, nationality, position and character—is a theme which John, to whom the words are used, is not in the least, the only one, to whom they must apply. His nature, which St. Paul has in common with many Stoic teachers. Only there is this characteristic difference—that the common citizenship, in which the Stoics held that every man might and ought to claim his share, is a citizenship of the world, while that to which St. Paul would admit all men, of which all men might walk worthily, is a citizenship in Heaven. But while the resemblances which it is possible to trace between St. Paul and Stoicism are thus real, they are resemblances rather in form than in spirit; the words in which the thoughts are expressed are the same or similar, but the underlying thought is different. 

Phineas—1. (i Esd.5.5, 8.2, 29; 2 Esd.1.25; Ecclus.45.23; 1 Mac.2.26) = Phinehas, 1.—2. (2 Esd.1.24) = Phinehas, 2.—3. (1 Esd.8.63) = Phinehas, 3.—4. (5.31) = Paseah, 2.

Phinehas'—1. Son of Eleazar and grandson of Aaron (Ex.6.25). His mother was a daughter of Putiel. While quite a youth, Phinehas, by his zeal and the citations of Shittim, appeased the divine wrath and put a stop to the plague which was destroying the nation (Num.25). For this he was rewarded by the special approbation of Jehovah, and by a promise that the priesthood should remain in his family for ever (10-13). This promise, like all the promises of God, was conditional, and there is good reason to think that Abiathar was his last direct representative. He accompanied as priest the expedition by which the Midianites were destroyed (31.6). Many years later he also headed the party despatched from Shiloh to reconnoitre against the Philistines and the three other potentates of the country, and reported to have encountered Jordan (Jos.22.13-32). In the partition of the country he received a hill on mount Ephraim which bore his name—Gibeath of Phinehas (R.V. marg.). Here his father was buried (24.33). Phinehas appears to have been the chief of the great family of the Korahites who guarded the camp, and especially the entrances to the sacred tent (1 Chr.9.20). After Eleazar's death he became high-priest—the third of the series—and gave the oracle to the nation during the struggle with the Benjamites on the matter of Gibeath (Judg.20.28). The zeal of Phinehas (Num.25) made a lasting impression upon the nation, and allusions to it very frequently occur in Psalms, and in other books. Ecclus.45.23-25, 1 Mac.2.26, 54. His tomb, a place of great resort to both Jews and Samaritans, is shown at 'Avdolah, 4 miles S.E. of Nablus.—2. The second son of Eli (1 Sam.1.3, 2. 34, 4.11, 17, 10, 14.3) was killed with his brother Hophni by the Philistines when the ark was captured. This verse very properly is here being mistaken in the genealogy of Ezra in 2 Esd.2.14.—3. A Levite of Ezra's time (Ezr.3.33), unless the meaning be that Eleazar was of the family of the great Phinehas.

Phinehas, Hill of. [Gibeath of Phinehas.]

Phi'son (Ecclus.24.25), the Gk. form of Pison. [Eden.]

Phoe'be (Rom.16.1, A.V. Phoebe, servant of the church) at Cenchrea, commended by St. Paul to the Roman church (Rom.16.1,2). [Deaconess.]

Phoenicia, Phoenicians, Phoenicians. [Phenice.]

Phor'os (1 Esd.5.9, 9.26) = Parash.

Phryg'i a. Perhaps there is no geographical district which bears a name more familiar to the world, but which is less capable of an exact definition. In fact there was no Roman province of Phrygia till considerably after the first establishment of Christianity in the peninsula of Asia Minor. The word was rather ethnological and political, and denoted, in a vague manner, the W. part of the peninsula. Accordingly, in two of the three places where it is used, it is mentioned in a manner not intended to be precise (Ac.16.6, 18.23). By Phrygia we must understand an extensive district, which contributed portions to several Roman provinces, and varying portions at different times. [The Phrygians—Phoebo, from whom the Phrygians were descended (Herod. vii. 73)—were European Aryans, whose language was distantly related to Gk. A few Phrygian texts (after about 800 B.C.) have been found written in an early Gk. alphabet. c.r.c.]

Phud = Phut (Jth.2.23; cf. Ezk.27.10).

Phuvah' (Phuvah, R.V.), Gideon's servant, probably his amanuensis; N.T. (cf. Phuvah 14.1), who accompanied him in his midnight visit to the Midianite camp (Judg.7.10,11).

Phur'im (Est.-Apoc.11.1) = Purim.

Phut, Put, the third name in the list of the sons of Ham (Gen.10.6; 1 Chr.1.5). In the list it follows Cush and Mizraim, and probably this order of names is an Egyptian one. The references to Phut seem to indicate a country or people of Africa, probably not far from Egypt (Is.66.19, A.V. Pul; Je.46.9 marg.; Ezk.27.10, 30.5, marg., 38.5; Na.3.9). Hence it is usually identified with some part of Libya. In a fragment of the annals of Nebuchadnezzar, relating to his war with Egypt, reference is made to "Phut of the Isles, a distant land that is within the sea." It may, therefore, have represented Cyrene or Barca. [A.H.S.]

Phuvah' (R.V. Puwah), a son of Issachar (Gen.46.13), and founder of the family of the Punites. He is called Puw in Num.26.23, and Pur in 1 Chr.7.1.

Phyg'eil (Jdt.2.1, Tim.1.15), named by St. Paul among the "all in Asia" [Hermogenes] who had turned away from him. [A.C.D.]

Phyllactery. [Frontlets.]

Pi-be'seth (Ezk.30.17 only). The "young men of Aven and of Pi-beseth shall fall by the sword, and these cities shall go into captivity." The Vulg. gives the names Antiochus et Bubastis, and the city was known by the name of Bubastis, having been a place of considerable

The other word, sklēryōth (Is. 2:16), is rendered “picture” in A.V., but in R.V. “imagery” (marg. “includes statues”).[13:

Piece of gold. The A.V., in rendering the elliptical expression “six thousand of gold,” in a passage respecting Naaman, relating that he “took with him ten talents of silver, and six thousand of gold, and ten changes of raiment” (2Ki 5:5), supplies three pieces of gold as the rendering “piece of gold” is very doubtful and “shekels of gold” (cf. R.V. marg.), as designating the whole quantity, not individual pieces, is preferable.

Piece of money. [Weights and Measures.]

Piece of silver. (1) In O.T. the word “pieces” is used in A.V. for a word understood in the Heb., with one exception. The phrase is always “a thousand” or the like “of silver” (Gen. 20:16; 37:28; 45:12; Judg 9:5; 14:5; 2Ki 6:25; 1Ch 12:2; Zech. 11:12, 13; cf. “silverings,” Is. 7:23). In similar passages the word “shekels” occurs in the Heb. There are other passages in which A.V. supplies the word “shekels” (cf. “silver,” Deut. 22:18-19; Judg. 17:2, 3, 11, 12; 2Sam. 11:11, 12), and of these the first two require this to be done. The shekel was the common weight for money, and therefore most likely to be understood in an elliptical phrase. The exceptional case in which a word (mâ’â) corresponding to “piece” is found in the Heb. is Ps. 68:38 (mâ’â). This word, which occurs nowhere else, if it keeps its radical meaning, must signify a piece broken off, or a fragment. There is no reason to suppose that a coin is meant. (2) In N.T. two words are rendered by the phrase “piece of silver” —δραχμή, and δραχμα. (i) The former (Mt. 20:15; Lk. 16:9) should be represented by drachma. It was a Gk. silver coin, equivalent, at the time of St. Luke, to the Roman denarius. (ii) The second word is very properly rendered. It occurs in the account of the betrayal of our Lord for “thirty pieces of silver” (Mt. 26:15, 27:3, 50, 66). It is difficult to ascertain the word intended. If the most common silver pieces be meant, they would be denarii. The parallel passage (Zech. 11:12, 13) must, however, be taken into consideration, where, if our view be correct, shekels must be understood. It is more probable that the 30 pieces of silver were tetradrachms than that they were denarii.

Pillar. The A.V. renders eight Heb. words which have different meanings, from columns to rude erect stones, and pillars of cloud or of dust. (1) μήσιθ (1K.10:12). “ Pillar” (marg.) or μήσιθα, a common word for a column, erected as a memorial, or for a “post.” It occurs 36 times in O.T. and is often rendered image and even garrison (EzK. 26:11), or “post.” [Pillars.] (3) μάργαρις (2Sam. 2:8, 14, 5), rendered “jewel” by A.V. in the second case, meaning something “set up.” (4) μασχίκ (Luk. 9:6), a memorial stone. The Arabs call the ancient menhirs of Moab nush (a word from the same root) and still erect stone pillars both as boundary stones and as memorials of a visit to a shrine. [Moab.] Throughout Palestine the latter are erected by Moslems, and called meschikid, or “witnesses.” In no case are these regarded as idols. [Witnesses.] (5) nō’ân, from the same root, applies to the pillar of salt (Gen. 19:26), but is rendered garrison in nine cases and officer in two. (6) ‘ammudā (Arab, ‘amid) is the common word for a “column,” and applies to the pillar of cloud and fire (Ex. 13:21). Such pillars were of stone, of bronze, and of wood. [Chapter, Palace.]
PILLAR, PLAIN OF THE

(7) 'ōnumoth (2K.18.16), "firm things," is rendered pillars (R.V. marg. door-posts). (8) The translation (Conf. 16; [J.2-30], column 1 dukt. [Whirlwind].) [c.r.c.]

Pillar, Plain of the (R.V. oak of the pillar), near Shechem, where the men of Shechem and the house of Millo assembled to crown Abimelech son of Gideon (Judg.9.6). Samaritan tradition places the holy oak near Shechem, and Eusebius (Onom.) at Baalans near Joseph's tomb, i.e. at Balata (oak), S. of which at the foot of Gerizim is the 'Amûd, or traditional site of Joshua's "pillar" (Jos.24.26). The oak was that where Jacob buried the images (Gen.35.4), and hence also called Elon Meonemen (Judg. 9.37), enchanter's oak. [c.r.c.]

Plain (in dukes). Some critics are accustomed to associate the maccēbôth with stone worship (Gen.28.18 is appealed to in proof that Jehovah was believed to reside in the stone), and to draw a sharp contrast between the pre-Deuteronomic period in Israel's history, when such worship was permitted, and the period when the maccēbôth was forbidden. The theory rests on a misconception. The patriarchal maccēbôth (28.18,35.14,15) had nothing to do with worship of holy stones. (So Dillmann, Attest. Theol. p. 90; cf. König, art. "Symbol," in Hastings, D.B. extra vol. p. 170). Deut. and the prophets commonly speak of a maccēbôth set up at the altar (Jer.16.22), but there was no maccēbôth in the temple at Jerusalem. But there is not the slightest evidence that disrespect was intended to such memorial maccēbôth as were set up by Jacob or Joshua (Jos.24.26). Isaiah predicts the setting up of a maccēbôth to Jehovah near the borders of Egypt (19.19). The distinction between lawful and unlawful maccēbôth is well brought out in the history of the transactions at Sinai. Canaanitish idolatrous maccēbôth are to be utterly destroyed (Ex.23.24). On the other hand, Moses sets up twelve maccēbôth with the purpose of ratification of the covenant (24; cf. Jos.24.26). Bethel, Bethel, and Nablus, are the only places (as will be seen from the case of Mamre) where the maccēbôth was permitted. An instance of non-religious memorial usage is furnished in Abshalom's maccēbôth (2Sam.18.18). Hos.3.4 groups together lawful pillars and unlawful objects of worship. [j.o.]

Pillows. (1) kešēth; only used in plur.; means "bands." It was sown on to either elbow, and was used as an amulet, or charm (Ezk.13.18,20 only). According to the neo-Hebraic use, the word means "cushion," or "pillow" in the modern sense. (2) keḇēṭ, from a root "to plait." In Isa.19.13 only, where A.V. translates "pillow" [R.V. marg. "network, or quaint" for his bolster [R.V. at the head thereof]: probably a sort of rag or rug of shaggy black goat's hair to represent David's black hair. [Michal.]

Piltai' (Ne.12.17), the representative of the priestly house of Moadiah, or Maadiah (ver. 5), in the time of Joakim son of Jeshua.

Pine-tree. (1) Heb. tâdâhâh = "firm" (Gen.49.11); probably jujube, as seemingly explained to the plain, the larch, or the elm; but the rendering "pine" seems as probable as any. (2) 'eg shemen (Ne.8.15) is rendered "pine branches" (A.V.). The LXX. reading here is "cypress" (Turk. zemin, according to Scheuchzer). This interpretation is possibly correct, but pine, in the general sense of conifer, seems satisfactory. [Fir; Cedar; Cypress.] [h.c.h.]

Pinnacle (Mt.4.5; Lu.4.9; τὸ περίγραφον the wing wall). In 4th cent. A.D., when the ruined walls of the temple enclosure stood up like a pinnacle at the S.E. angle, the pillars supposed this corner to be intended; but there can be little doubt that the extreme summit of the Temple itself is meant—the great façade rising some 150 ft. above the court of the priests, and extending N. and S. beyond the breadth of the holy house, thus forming wing walls on each side. The roof of this pylon was flat. [c.r.c.]

Pins, one of the "dukes" of Edom (Gen.36.41; 1Chr.1.52).

Pipe. The Heb. word so rendered is derived from a root signifying "to bore, perforate," and is represented with sufficient correctness by "pipe" or "flute," as in 1K.1.40 (A.V. marg.). It is one of the simplest, and therefore probably the oldest musical instruments: and, as it was so simple in form, the "pipe" of the Hebrews probably did not differ materially from that of the ancient Egyptians and Greeks. It is associated with the tabret, or timbrel (tâbh), as an instrument of a peaceful and social character. They were both used tor the various services, and their gradual processions (Mishna, Baba Meqîa vi. 1), and accompanied the simpler religious services, when the young prophets, returning from the high-place, caught their inspiration from their harmony (Isa.10.5); or the pilgrims, on their way to the great festivals, beguiled the weariness of the march with psalms sung to the simple music of the pipe (Is.30.29). The sound alluded to in the prophet's lament over the destruction of Moab (Je.48.36) was apparently a soft wailing note, appropriate for mourning and funerals (Mt.9.23), a use which still survives. In the temple choir there were "players on instruments" (Ps.87.7), whose repertoire was, indeed, the word means "dancers" (see R.V.). Twelve days in the year, according to the Mishna, the pipes (not less than two nor more than twelve) sounded before the altar. They were of reed, because this gave a softer sound than copper or bronze. In the social festiv-
PIRATHON

one of the five kings defeated at the battle of Gideon, and subsequently hanged (Jos. 10:35).

Pirathon** *(Judg. 12:15)*, the home of Agdon the judge, who was a Pirathonite (12:13; see 2 Sam. 23:17). It was also called *Phithom*, which is translated as the *land of the children of Ephraim*. Pirathon was "in the land of Ephraim in the mount of the Amalekites," and cannot therefore have been at *Fe’rula*, which was in Manasseh. *(I. P. 2:2)*. The site is unknown, and it is not of necessity the same as *Pharamon* (1 Sam. 31:2, 14; 27:16), which may have been Fe’ron, 14 miles W. of Shechem. *(c. c.)*

Pisgah. The word comes from a root meaning "to separate," "distinguish," and perhaps "contemplate," and may refer to the view; for the "top" (rōsh) of Pisgah looked towards *Jesimon* (Num. 21:20), and was part of Nebo (Deut. 34:1) by the "field of Zophim" (or, as the *RSV* translates, 33:1 - 1Vs. Israel camped at the "springs of Pisgah" (21:20; *Dent. 4:40) on N. side. *(Nebo; Ashdoth-Pisgah).* According to the *Tarzunc* of Onkelos on Num. 32:23, the later name of Nebo or Pisgah was *Stath*, which probably survives at the *Ras Sidgah*, or summit 2 miles W. from Nebo. A ruin of the same name, the *Ras Sidgah*, contains remains of an early chapel, which may be that visited in 380 B.C. by St. Silvia on Mt. Nebo. The view from this summit is practically the same as from Nebo. *(G. T. C.)*

Pisidia** was a district in Asia Minor, N. of Pamphylia, reaching to and partly included in Phrygia. *(E. A.)*

At Pisidia the Roman town called a Phrygian town. St. Paul passed through Pisidia twice, with Barnabas, on the first missionary journey,—i.e. both in going from *Perga to Iconium* (Ac. 13:13, 14, 51) and in returning (14:21-24, 25; cf. *2 Tim. 3:11*). It is probable also that he traversed the N. part of the district, with Silas and Timothy, on the second missionary journey (Ac. 16:6); but the word *Pisidia* does not occur except in reference to the former journey.

Pison. *(Eden.)*

Pispa**; an Asherite, son of Jether, 6 (1 Chr. 7:35).

Pithom. *In A.V. this word appears both figuratively and literally: (1) 'shĕ'ōl' in Num. 16:30, 33; Jos. 17:16, is used only of the hollow, shadowy world, the dwelling of the dead. *(H. E.)*

(2) *shahah*. Here the sinking of the pit is the primary thought. It is dug into the earth (Ps. 9:16, 119:53). It thus became a type of sorrow and continuance (Job 33:18, 2, 28, 70). (3) *bar*, the secondary word, *heʾēr*, is a pit or well dug for water. In the phrase "they that go down to the pit," it becomes even more constantly than the synonymous already noticed, the representative of the world of the dead (Ezk. 31:11, 16:32, 18:21; Ps. 28:1, 114:7). There may have been two reasons for this: (i) the wide deep excavation became the place of burial (Ezk. 32:21). (ii) The pit, however, in this sense, was never simply equivalent to burial-place. There is always implied in it a thought of scorn and condemnation (Ezk. 9:11; 5:11; 1:38, 9). It is not strange, that, with its association of much deeper horror, it should have involved more of the idea of a place of punishment for the naughty or unjust, than did *shĕ'ēl* or the grave. In Rev. 9:1, 2, and elsewhere, the pit of the abyss is represented as a dungeon.

Pitch. The three Heb. words all represent the same object, viz. mineral pitch or asphalt, in different aspects: *zapheth* (the *zif* of the modern Arabs) in the liquid state, *ḥorim* in its solid state; and *cophar*, in reference to its use in overlaying wood-work (Gen. 6:14). Asphalt is an opaque, inflammable substance, mainly a compound of carbon and hydrogen, which is either thrown up from the earth in a liquid state, hardening by exposure to the air, or precipitates rocks. It readily melts under the influence of heat, and is then very tenacious. For its uses and source, see *SLIME, SALT SEA.*

Pitcher. The word "pitcher" is used in A.V. to denote the water-jars or pitchers with one or two handles, used chiefly by women for carrying water, as in the case of the Israelitess from Ismailia. *(24:15-20)* (cf. *Mt. 14:13; Lk. 22:10*). This practice has been (and is still) usual both in the East and elsewhere. These vessels are generally carried on the head or the shoulder. The Bedawiyyeh women commonly use skin-bottles. Such was the "bottle" carried by Hagar (Gen. 21:13).* Thell*. The same word is used by Gideon's 300 men (Judg. 7:16).

Pithom. *(pithôm, Ḥeḇwā Ḥebaw, Pithōm; Ex. 1:11)*, one of the store-cities built by the Israelites for the oppressor. Its Egyptian name is *Pa-Tum*, the house of the god *Tum*, the Patumos of the Greeks. It has been identified with the present Tel el-Maskhuta, in the E of the N jetty of the Nile from Ismailia. Important monuments have been found there. The Gk. and Lat. name of Tum being *Ero*, the city was called in later times *Erōpolis*, or Ero Castra, and also *Hērhoopolis*. As we know, from several ancient authors, that travellers going to the Red Sea left the Nile at Hērhoopolis and took to the sea, this is seen from Ismailia. *Roman times the Red Sea, or the Arabian Gulf, as that part of it was called, extended much farther N. than to-day. *(Red Sea.)* The excavations made at Pithom have revealed part of the temple, with statues, a sphinx, a shrine, and several steles; also what looks like here for the armies which encamped in the desert. The very thick enclosure wall shows that it was, at the same time, a fortress. Pithom is mentioned in the papyri of the 19th dynasty. Near the sea there were marshes produced by the Nile, where was good pasture-land; and the documents speak of the Sinaitic nomads asking to be allowed to graze their cattle in those marshes. Pithom was the starting-point of one of the roads going to Palestine across the desert. According to the LXX. and the Coptic version, it was near Pithom-Hērhoopolis that Joseph first met his father, when Jacob came to Egypt. The region near Pithom is called in Egyptian *Thkhōn* or *Thiukot*, which the Hebrews changed into Smooth (*tenis*). It was the Israelites' first halting-place when they left Egypt. *(F. N.)*

Pithon. *A descendant of Saul in the line of Mephibosheth (1 Chr. 8:35, 39, 41).*

Plague. "Several Heb. words are translated by the word 'plague' in the O.T., and as used in both the O. and N.T. the term is of very wide significance" *(Bennett, *The Diseases*..."
of the Bible). In nearly all of the Biblical references to plague it is difficult to arrive at any precise nature of the disease referred to, and it is most probable that several different epidemic diseases characterized by sudden onset and heavy mortality are included under the same name of plague. As we know that bubonic plague prevailed in Libya, Egypt, and Syria some two or three centuries before Christ there is, prima facie, no reason to doubt that some of the grave pestilences spoken of in O.T. were of this nature. In modern terminology the word plague is used to designate an epidemic or pandemic specific disease, caused by a bacillus (B. pestis) and characterized by acute glandular swellings (buboes), virulent blood poisoning, fever and death. There is still much to be done in elucidating the means by which the plague is spread, but it is highly probable that rats and mice play an important part in propagating the disease. That mice and rats are very susceptible to the disease has long been known, and the more recent discovery that bubo has been frequently observed to precede an outbreak of plague. It is suggested that the flea which is common to the rat and to man is the carrier of the bacillus from the infected rat to the susceptible human subject. It is interesting, in this connexion, to read in 1 Sam. 5 and 6 and Lev. 13, 14, that mice were brought among the Philistines: 5:6 (R.V.): "But the hand of the Lord was heavy upon them of Ashdod, and He destroyed them, and smote them with tumours." The marginal reading gives plague boils, as read by the Jews, emerods, as an alternative rendering of tumours." The Septuagint has instead, and in the midst of the land all the mice were brought forth, and there was a great and deadly destruction in the city." In ver. 9 tumours break out upon them. In 6:4 the Philistines ask the priests and diviners, "What shall be the trespass offering which we shall return to them? They answered, five golden emerods [R.V. tumours] of plague and five golden tumours of plague were brought forth. The Philistines then asked them what they should do with them. The reply was, "Let them be thrown into the midst of the sea," and the tumours, like the locusts, were swept away.

**The Plague of Blood** (Num. 13:27). The word "emor" is used in R.V. tumours. The Lord will smite thee with the botch [R.V. boil] of Egypt and with the emerods" (R.V. tumours of plague boils); but here there is no further indication as to the nature of this disease. So also in the plagues with which the Egyptians were afflicted, there is nothing stated that would connect any of them with the plague as now understood. In the sixth plague some authorities believe they can trace small-pox, but this cannot be said to have been clearly established. In other instances the word plague is synonymous with pestilence or epidemic disease, without specific reference to any special disease (Ex. 30:12; Num. 8:19; Deut. 28:61). The word is also used in connexion with leprosy — "the plague of leprosy" (Lev. 13). The radical meaning of the Gk. word whence plague is derived is "to strike," or "smite," and the association of plague as a stroke or smiting of the hand of God suggests a sudden onset of the epidemic and its catastrophic effects. The epidemic of acute dysentery may be the plague referred to. Then the word is used also in the sense of a moral plague or sin (R.K. 8:38) — "the plague of his own heart." In N.T. the word plague is used to apply to the disease of the woman with the issue of blood, and is rendered as scourge in R.V. marg. in Mk. 5:29, 34, and again in Rev. 16:21 the plague of hail is spoken of. It is thus abundantly evident that plague in Scripture is susceptible of a great variety of Interpretations, but amongst there in at least a reasonable presumption that true bubonic plague must be included. [W.L.S.].

Plagues, the Ten

In the Old Testament the ten plagues are recorded in the following order: (1) Frogs (Ex. 8:7); (2) Drains (PLAGUE), (3) Lice (4) Flies (5) Pallor, Fever and Blistering (PLAGUE), (6) Death of all (7) Death of all (8) Pestilence of Horses, Mules, Camels, Cattle, and Beasts of War (PLAGUE), (9) Pestilence of Man (10) The Golden Serpent (PLAGUE). The plagues were enacted in order to instill into Pharaoh the necessity of submission and to demonstrate the power of Jehovah. The magicians, for whom Egypt was famous in antiquity, also bear their part in this contest. From the first appearance of Moses and Aaron before Pharaoh these adepts—the names of two of whom, Jannes and Jambres, were preserved in Jewish tradition (2Tim. 3:8)—endeavour to imitate their miracles, and so discredit their message, but after a few preliminary successes are defeated and disappear. (1) The Plague of Blood (Ex. 7:14-25). The Nile is usually discoloured during its summer floods; but on this occasion the water became so blood-red as to be ghastly, and resembled blood in colour. This may have been caused, like the so-called appearances of rain and dew of blood (noted as terrible omens in antiquity), by the presence of enormous quantities of fungi or minute animals. Whatever its secondary cause, this pollution was most humiliating to Egyptian religion, which held the Nile to be a god, or indeed the "father of the gods," and most distressing to every one concerned, as drinking-water could only be obtained by digging round the banks of the river. It was doubtless by some conjuring feat performed with small vessels of the water thus procured that the magicians counterfeited the transformation into blood. (2) The Plague of Frogs (Ex. 8:1-15). This again would be an especially annoying visitation for the Egyptians, as frogs were sacred animals dedicated to the goddess Heqet, who, with other divinities, is represented with a frog's head. The swarms of frogs were so ubiquitous that even the driest and therefore the most unlikely places, the ovens and kneading-troughs, were full of them. (3) The Plague of Lice (Ex. 8:16-19). The Egyptians, according to Herodotus (ii. 37), were remarkable for personal cleanli-
ness, and they must have suffered intensely under such a plague as this. There is, however, some difficulty as to the word ἱέν, which LXX. renders σταρίς and the Vulg. scintlikes — i.e. gnats or mosquitoes (R.V. marg., sand-hoppers); it is the most frequent of the insect commonest to Egyptian swarms at all times, being produced from eggs laid in the dust or sand. The magicians for the first time break down in their attempts at rivalry, and confess "This is the finger of God." (4) The Plague of Flies (Ex.8.20-32). Flies are a characteristic Egyptian plague (cf. Is.18.1), and to this day one of the contributing causes of Egyptian ophthalmia. But it is again doubtful what species of insect is referred to in the expression rendered by A.V. "swarms of flies." It is generally thought to have been the dog-fly. But Josephus and the Heb. commentators translate it "a mixture of noisome beasts" (so A.V. marg.). Oedmann suggests the Blatta orientalis, a species of beetle. [Ftr.] If the "flies" were really beetles, the plague may have been a special judgment on the Egyptian superstition which venerated the scarab, or sacred beetle. During this and subsequent plagues the land of Goshen, in which the Israelites sojourned, is stated to have been specially exempted from the visitation. (5) The Plague of Murrain (Ex.9.1-7). This "murrain," or "mortality," of domestic animals is not an infrequent calamity in Egypt, and is said to be a forerunner of bubonic plague. It would be regarded as very disastrous, as Egypt was famous for its horses and its oxen were sacred and much valued. (6) The Plague of Hail (Ex.9.13-29). Again a characteristic Egyptian scourge. The eruptive diseases common there are referred to with horror in Deut.28.27,35, 60. This was an exceptionally severe visitation, affecting all classes, and beasts as well as man. It seems to have been the final discomfiture of the magicians, who were unable to enter Pharaoh's presence, and do not appear again. (7) The Plague of Hail (Ex.9.13-29). This differed in some respects from the preceding plagues, for neither Hail nor Thunder are very common in Egypt (though occasionally very severe); and the Israelites (as well as some of the Egyptians) thought "fearfully" (as the word best translates) the preserved their own cattle by bringing them indoors. (8) The Plague of Locusts (Ex.10.1-20). The terrible character of this visitation was well known then, as now. The very warning of it causes for the first time a protest from Pharaoh's courtiers (10.7). This is stated to have been the worst visitation of Locusts ever known in Egypt, and it completed the destruction of crops caused by the thunder and hail. (9) The Plague of Darkness (Ex.10.21-29; cf. Wis.18). This visitation seems to have had a special reference to Egyptian religion. The sun-god, Ra, was the principal Egyptian divinity [SUY], and indeed all other gods were supposed by the more philosophical to be only different manifestations of him. The immediate cause of this terrible 3 days of thick darkness may have been some aggravated form of the well-known desert sand-storm (or shinnim), produced by the houmig (or electrical wind) which usually blows from S.W. for 3 days at a time during a period of 50 days round the vernal equinox, producing an atmosphere like a yellow fog, of the most distressing character, and causing sometimes total darkness. (10) The Death of the First-born (Ex.11.12). This plague stands in a different category altogether from the preceding. It is more difficult to assign any immediate natural or supernatural cause to the "the destroyer" is to be understood as the angel of sudden pestilence (perhaps an outbreak of bubonic plague), as in the destruction of the army of Sennacherib (2K.19.35). The visitation throughout is mysterious and terrible. The Israelites themselves are only preserved, not by special symbolical acts, which not only became the foundation of national religious rites (the Consecration of the First-born and the Passover), but pointed most significantly to the divine redemption still to be revealed in the future. "The first-born of Pharaoh which sat on his throne" (Ex.12.29) persisted in the common calamity. If these words mean that Pharaoh's eldest son was already associated with him in his sovereignty, a corroboration of the narrative is seen in the museum at Berlin, where the eldest son of this Pharaoh (Merenptah) is represented as crowned and sitting with his father on his throne; he bore the same name as his father, but died before him; and his younger brother Seth II succeeded (Nichol, Recent Archaeology of the Bible). In addition to its awful character, this plague had a religious significance. The first-born, in ancient Heb. religion, was symbolical of the whole family. Israel is spoken of as God's first-born (Ex.4.22), as representing the future Gathering together of his people on God, redeemed in Christ. Hence the protection of the Heb. first-born pointed to their national preservation for a divine purpose: the destruction of the Egyptian first-born to the truth that all mankind lay by nature under God's displeasure, that all life is forfeit to divine justice, and can only be saved by grace. It is uncertain how long the plagues continued. The tenth took place in spring, on the night of Nisan 14. If we assume that the disoloration of the Nile coincided with the July or August floods, this would make the whole period about eight months. The remembrance of the plagues formed the most important of the Hebrew national feasts (Ex.12.15,16), and it not only left an inefaceable record in Heb. history (cf. Ps.78, 105,106), but coloured the latest prophetic utterances in the Apocalypse (cf. Rev.8.9,16). Whatever view is taken as to the exact historical value of the narrative, the whole account has a profound religious and moral significance. It points to the truth that natural phenomena are under the immediate direction of God and minister to his sovereign purpose. It illustrates also (as do the parallel visions of the Apocalypse) the age-long struggle of the natural man, both as an individual and in his social and national combinations, against the will of God. The attitude of Pharaoh and the statements that he "hardened" his heart and that God hardened it for him illustrate important ethical truths. No proofs, however starting or cumulative, of divine power and will can convince those who have made up their minds to be unconvinced. Again, on the other hand, a man deliberately refuses the light of reason and conscience, he gradually
Plain, Cities of.

Plain, Sea of.

Pleiades. The Heb. word (kimd) so rendered occurs in Job 9.3, 38.31 and Am 5.8. In the last passage A.V. has "the seven stars," although the Geneva version translates the word "Pleiades," as in the other cases. In Job the LXX. has Ἡμέρας, the order of the Heb. words having been altered; while in Amos there is no trace of the original, and it is difficult to imagine what the translators had before them. The Vulg. renders: Hyades in Job 9.9. Pleiades in 38.31, and Arcturus in Am 5.8. The Jewish commentators vary as widely. R. David Qimhi (Kimchi) says, "Jonah wrote that it was a collection of stars called in Arabic Al Thuraiyāt." The words of Ibn Ragel prove that Al Thuraiyāt and the Pleiades are the same. "Al Thuraiyāt is the mansion of the moon, in the sign Taurus, and it is called thecelestial hen with her chickens." With this Hyde compares the Fr. pulsinière, and Eng. Hen in the field. puppy, and these are names for the same stars. The opinion of Ibn Ezra has been frequently misrepresented. He held that kímd was a single large star, Aldebaran the brightest of the Hyades, while khrší (A.V. Orion) was Antares, the heart of Scorpio. On the whole, though certainty is impossible, some translations and authors have been unjustified in rendering kímd by "Pleiades." Héa or Ea, the third god of the Assyrian triad, was known among the stars by the name of Kimmut, which Rawlinson compares with the Heb. kímá, and identifies with the constellation Draco.

Poche'reth. The children of Pochereuth of Zebaim returned from captivity with Zerubbabel (Ezr. 2:57; Ne. 7:59).

Poetry, Hebrew. I. It is so difficult to draw a hard-and-fast line between prose and poetry that individual writers differ greatly as to what portions of the Bible are considered as one or the other. If rhyme and metre be considered essential, poetry would have to be denied to the Bible altogether. For rhyme there is absolutely none; and, as metre depends upon pronunciation and accent, it has generally been regarded as hopeless to restore these essential elements, so long have they been lost in the transmission of the language through consonants alone. Little confidence can be placed in the Massoretic vocalization. In the opinion of Bishop Lowth, "A man born deaf may as reasonably pretend to acquire an idea of sound, as a critic of these days to attain to the true modulations of Greek by accent, and of Hebrew by metre." Nevertheless numerous attempts to reduce the Hebrew poetry to metre have been recently made. In 1866 Julius Ley set out on the most promising line of effort in this direction, and has been followed with considerable success by Prof. Briggs, according to whom the psalms were composed in the parallelism, the parallelism, the parallelism, measures, and strophical organizations of lyric poetry. . . . The measures, however, were not of feet, as in classical Latin and Greek, or of syllables, as in ordinary lyric poetry, but of words, or of word accents. . . . But monosyllables were not counted, and special allowance had to be made for various other words. Dr. Briggs would use the metric
POETRY, HEBREW

teral arrangement which he has devised to determine the changes that have been made in the original text. The best statement is that of Schneller, who maintained that the Heb. poet considered only the syllables receiving the main accent, and, as in the German Nibelungenlied and in the songs of Palestine at the present time, "the rhythms are manifold. There may be eight accents in one line, and three syllables are often inserted between two accents, the symmetry and variation being determined by emotion and sentiment." Josephus, followed by Origen and Jerome, says that Hebrew poetry is composed in trimeters, pentameters, and hexameters (2 Ant. xvi. 4; 4 viii. 44; 7 xii. 3). Briggs regards Gen. 1 as a lyric in six pentameter strophes, and the Priestly account of the Deluge as a poem. Tickell goes still further, and maintains that "the metrical accent falls regularly upon every alternate syllable." But to make his theory work he has to remove or add in the Psalms alone 2,600 syllables. Sievers even goes so far as to say that all the prophetic books are in verse, and that the historical books are poetical. But, since the distinction between poetry and rhetorical prose is so slight, it would seem that the distinction found in the prophets in a manner that renders classification somewhat difficult, while in the historical books the line can be more clearly drawn, and the poetical books (Job, Psalms, Proverbs, Solomon's Song, and Lamentations) stand out by themselves.—II. As far as form is concerned, the main characteristic of Hebrew poetry is the parallelismus membranum, clearly brought to light by Bishop Lowth in 1741 in his lectures at Oxford on the Sacred Poetry of the Hebrews, and further illustrated in the preliminary dissertation to his translation of Isaiah in 1778. This peculiarity consists chiefly in a certain equality, resemblance, or parallelism between the numbers of each period; so that in two lines (or members of the same period) things for the most part shall answer to things, and words to words, as if fitted to each other by a kind of rule or measure." This seems to have been the most ancient and original form of poetry, examples of which are found in early Assyrian and Egyptian literature, and remnants in the Finnish song "Kalevala." The richness of its development in Heb. poetry is due largely to the wealth of synonymous expressions found in that language. This also secures the result that its beauty and impressiveness cannot be wholly lost in translation. No other poetry bears translation like the Hebrew. From no other literature could the whole world derive its songs of praise as it does from the Psalms. The main characteristics of this parallelism appear sufficiently well in the oldest recorded poetical stanzas, uttered by Lamech (Gen.4.23, 21). "And Lamech said to his wives:

Adam and Zillah, hear my voice;

No, waves of Lamech, hearken unto my speech:

For I have slain a man for wounding me,

And a young man for bruising me:

If Cain shall be avenged seven-fold,

Tandy Lamech seventy and seven-fold."

Lowth's division of the Hebrew parallels into classes has been generally followed, namely, into (1) synonymous, (2) antithetical, and (3) synthetical. (1) Good illustrations of the synonymous are found in Ps. 25.4:

Show me Thy ways, O Jehovah,

Teach me Thy paths.

"Show" corresponds to "teach" and "ways" to "paths." Num. 23.7-10:

From Aram hath Balak brought me,
The king of Moab from the mountains of the East, etc.

Here "Aram" corresponds to the "mountains of the East," and "Balak" to the "king of Moab." Ps. 1.31:

They shall eat of the fruit of their own way,

And be filled with their own desires.

Is. 55.7:

Let the wicked forsake his way,

And the unrighteous man his thoughts, etc.

The synonymous parallels prevailed chiefly in shorter poems, in many of the Psalms, in Balaam's prophecies, and frequently in those of Isaiah, which are most of them distinct poems, and of a great length. Other typical examples of synonymous parallelism occur in Ps. 104, Is. 53, and Ho. 11.8,9. But there is great variety in the form of synonymous parallelism. As Lowth has pointed out, the parallelism is sometimes formed by the iteration of the former number, as in Ps. 129.1,2:

1. Many a time have they afflicted me from my youth up;

2. Let Israel now say;

2. Many a time have they afflicted me from my youth up;

Yet they have not prevailed against me.

Frequently also, an ellipsis occurs in the second member, as in Ps. 105.20:

The king sent out and loosed him,

Even the ruler of peoples, and let him go free.

where, in strict form, "loosed him" would have been repeated. Again the whole of the second part of the parallel frequently answers only to a portion of the first part, as in Ps. 97.1:

Jehovah reigneth; let the earth rejoice;

Let the multitude of isles be glad.

Occasionally also there are triplet parallelisms,

as in Ps. 93.3,4:

1. The floods have lifted up, O Jehovah,

The floods have lifted up their voice;

The floods lift up their waves.

Above the voices of many waters,

The mighty breakers of the sea,

Jehovah on high is mighty.

Again, five lines are sometimes nearly similar, but divided into two distichs by the third line which is dissimilar, as in Zech. 9.5. Where four parallelisms occur, they generally form two regular distichs, the latter members referring alternately to the former, as in Deut. 32.12:

1. I will make Mine arrows drunk with blood,

And My sword shall devour flesh;

2. With the blood of the slain and the captives,

From the head of the leaders of the enemy.

Job has pertinently called attention to the fact that in the so-called synonymous parallelisms "the second or responsive clause (almost) invariably diversifies the preceding clause and generally so as to rise above it," and therefore suggests that the name should be

POETRY, HEBREW

cognate parallelism, rather than synonymous. This is well illustrated in Ps.1.1,2:—

Blessed is the man that walketh not in the counsel of the wicked, Nor standeth in the way of sinners, Nor sitteth in the seat of scoffers.

But his delight is in the law of Jehovah; And in His law doth he meditate day and night. In this there is a clear intensification of the thought in the three negative clauses of the first verse, as well as in the positive statements of the second. "Walking," "standing," and "sitting" with the wicked are three stages in the downward progress, while "counsel of the wicked," "way of sinners," and "seat of scoffers" imply increased depravity on the part of the wicked. "Meditating day and night" on the "law of the Lord" is the highest summit of delight which can be obtained. Other examples will be found in Ps.21.12, 24.3, 4; Is.51.1, 4, 7, 55.6, 7. (2) Antithetical parallelisms are well illustrated in Prov.11.3:—

The integrity of the upright shall guide them, But the perverseness of the treacherous shall destroy them, and so on, for a number of verses, where various forms of virtue and vice are contrasted in their effects, as well as in their nature; Is.54.7:—

For a small moment have I forsaken thee, But with great mercies will I gather thee, etc.; while the following verse repeats the idea and amplifies the antithesis. "The antithetic parallelism gives acuteness and force to adages and moral sentences; and therefore abounds in Solomon's Proverbs, but elsewhere is not often to be met with." (3) Synthetic, or constructive parallelism, is that in which the sentences answer to each other not by the iteration of the same image or sentiment, or the opposition of their contraries, but merely by the form of construction, as in Ps.1.3:—

And he shall be like a tree planted by the streams of water, That bringeth forth its fruit in its season: Whose leaf also doth not wither; And whatsoever he doeth shall prosper.

The verses in this parallelism are usually longer than in the others and are frequently arranged in triplets, as in Ps.77.18, 19:—

The voice of the thunder was in the whirlwind: The lightning lightened the world: The earth trembled and shook.

In this kind of parallelism a definite number is often put for an indefinite, as in Am.1.3, 6, and 9:—

For three transgressions of Damascus, Yea, for four, I will not turn away; and so of Gaza and of Tyre. The variety in the form of synthetic parallelism is very great. (4) To this classification Jebb would add that of the introverted parallelism, in which, whatever be the number of lines, the first shall be parallel with the last, the second with the penultimate, and so on throughout, illustrated in Ps.23.15, 16:—

My son, if thy heart be wise, My heart will be glad, even mine; Yea, my heart will rejoice When thy lips speak right things.

Other instances are Ps.84.5-7, 123.1, 2; Is.27.12, 13; Ezk.1.27; Ho.13.14.—III. Among the minor poetical embellishments of the Heb. literature is the use of acrostics, as in Ps.25, 34, 37, 111, 112, 119, 145. Pr.31.10, and Lam.1, 2.3. In all these cases the poems contain 22 lines, or systems of lines, in the order of the Heb. alphabet, each one beginning with its appropriate letter. The poetical passages are marked also by various archaic forms of speech, especially of case-endings, suffixes, and prepositions. But these would not be observable in a translation. Antithesis, however, does not alone make poetry evident from the fact that occasionally the laws are arranged in easily recognized parallelisms. The poetry of the Hebrews is likewise surcharged with rhetorical figures of speech, but we must not suppose that sublime figures of speech alone make poetry. The figures of metaphor, personification, metonymy, apostrophe, and hyperbole are most frequently introduced. It is specially to be noted that in the Bible these figures are never far-fetched, and are mainly derived from four sources: (1) well-known material objects; (2) circumstances of common life; (3) familiar sacred things; and (4) remarkable facts of their sacred history. (1) In the use of metaphor the Heb. poets derive their illustrations from familiar and well-known objects, so that there is rarely any obscurity attending them. The imagery drawn from light and darkness is particularly forcible. What, for example, can be more splendid than the use of this figure in Is.30.26:—

The light of the moon shall be as the light of the sun, And the light of the sun shall be sevenfold; or Is.24.23:—

Then the moon shall be confounded, and the sun ashamed, For Jehovah of Hosts will reign in Mount Zion, And before his elders shall be glory; or more impressive than Ezekiel's metaphorical description of the destruction to be brought upon Egypt (Ezk.32.7, 8):—

When I shall extinguish thee I will cover the Heavens, And make the stars thereof dark, I will cover the sun with a cloud, And the moon shall not give its light.

As peculiar to the Hebrews may be noticed the figures drawn from a deluge of waters such as was familiar in connexion with Jordan's annual overflow, the melting of the snows on Lebanon, and the frequent cloud-gusts turning into torrents the dry water-courses of Palestine. Other objects familiar to the people from which metaphors are specially drawn are those belonging to the natural scenery of the land. Thus mount Lebanon stands for sublimity (Can.5.15; Is.35.9, 35.2; Je.22.25, 23; Zech.11.1; and Ezk.27, 41) whatever possesses fertility, wealth, or beauty (Can.7.5; Is.35.2; Je.46.18; Mi.7.14). And so "the fat rams," "shepherds," and "bulls of Bashan," and "the lion of Jordan" (Ps.22.12, 66.15; Je.49.19; Ezk.39.18; Am.4.1), are used with a boldness of imagery that would not have been tolerated in Greek or Latin poets, and yet without any sacrifice of elegance. Study of
the natural history of Palestine makes such imagery clear; see esp. Is. 35.6-7, 36.17; Jl. 3.18). (2) Hebrew poetry naturally reflects in a remarkable degree the scenes of common life, which were largely agricultural. The threshold floor, the flail, the fan, and the wine-press, are figuratively used with a force and elegance scarcely approached even by Homer. The dignity with which the Heb. poet could invest what would seem, at first, an inelegant form of expression is seen in 2K.21.13:—

I will wipe Jerusalem
As a man wipeth a dish,
Wiping it and turning it upside down.

The figures of speech drawn from the regions of the dead are in striking contrast to those of the Gk. poets, whose imagination peopled the infernal regions with such a profusion of monsters as to excite ridicule. The Heb. poets, on the contrary, limit their figures under this head to those drawn from the most obvious facts connected with burial (e.g. Job 33.18; Ps. 49.15; 116.10); (3) Other points of interest are the poetical figures drawn by the Heb. poets from the requirements of the law and the official work of the priesthood. The distinctions between the clean and unclean things, the methods of removing pollution, and of atoning for sin, are freely used with a propriety to intensify the sense of human depravity and of divine graciousness (Is. 64.6; Ezk. 36.17; Lam. 1.8, 9, 17; Ex. 28.2; Ps. 93.1). (4) The sacred history also furnishes the basis for many of the most striking poetical figures. Chaos and creation, the Deluge, the destruction of Sodom, the flight of Israel from Egypt, and the scenes from mount Sinai, are used with powerful effect in many places (e.g. Je. 4.23-26; Is. 34.4-11; Jl. 1.15, 16; Is. 51.15, 16; Ps. 11.6; Is. 34.8, 9, 10; Mi. 1.3-5, 13, 14; Ps. 18.7-10). (i) Allegory. The most noteworthy examples of allegory are found in Ex. 12.2-6; Is. 28.23-29; Ezk. 15.19, 31; though ch. 16.1-15 probably belongs to the class of Parable, as do also Judg. 9.7-15; 2Sam. 12.1-4. (ii) Simile or Comparison. The similes of Heb. poetry are equally striking, see esp. Is. 10.4-17, 12.13, 49.14, 15; Na. 3.12; Ps. 129.6-8; Deut. 32.2, 11, 12; Job 6.15-20. (iii) Personification. One of the most striking examples of this figure belongs to the class of Parable, as do also Judg. 9.7-15; 2Sam. 12.1-4. (i) Portary. The last three are in the form of prose; Is. 5.1-6; a large part of Proverbs, much of Job and Ecclesiastes, and also many Psalms. (5) Lyric poems of individual experience. See examples in Gen. 4.23-24; (6) Didactic, which appeal more to the reason: Judg. 9.7-15; 2Sam. 12.1-4; 14, 19; 1K. 20.39; (the last three are in the form of prose); Is. 5.1-6; a large part of Proverbs, much of Job and Ecclesiastes, and also many Psalms. (1) Lyric poems of individual experience. See examples in Gen. 4.23-24; (6) Didactic, which appeal more to the reason: Judg. 9.7-15; 2Sam. 12.1-4; 14, 19; 1K. 20.39; (the last three are in the form of prose); Is. 5.1-6; a large part of Proverbs, much of Job and Ecclesiastes, and also many Psalms. (5) Dramatic. Can. and Job are regarded by some as dramas; but, while both these works have dramatic elements, neither has a sufficiently defined and sustained plot to come under the modern definition of drama. Can. is more properly described as a series of songs appropriate to the seven-day nuptial feasts common among the Hebrews; while such plot as Job contains is mostly found in the first three chapters and a portion of the last, written in plainest prose. The bulk of the book, written in poetical form of highest elegance and sublimity, develops only one act of the drama, in which the dialogues move on a high but rather uniform plane, without the startling effects expected in drama. Here, as throughout Heb. poetry, the sublimity is due in great measure not only to the extraordinary selection of figures of speech, but largely to the lofty conception of monotheism and to the inherent beauty of the moral ideas which pervade and ethicize the whole.—V. Interpretation.

It is important to note the general effect which poetical forms and figures have upon the interpretation of Scripture. It is evident that whenever a writer endeavours to enforce or familiarize his ideas by the use of rhetorical figures and poetical images, he appeals to the poet's own mode of expression and with ideas expected to the poet. No definite rules can be laid down. The writer's appeal is confidently made to the general understanding of figurative speech obtained from observing the daily use of it by all classes, and by study of classic writers of all periods and nationalities. If extremes in both directions must be avoided, proper attention to the distinction between the diction of prose and poetry will prevent serious misunderstanding and open the way to that wholesome and appropriate exaltation of feeling which the sublime truths of the Bible are calculated to produce when clothed in their becoming figurative attire, and marshalled in their most impressive natural array. [Jeremiah, Book of; Psalms, Titles of.]. Bp. Lowth, Lect. on the Sacred Poetry of the Hebrews (1741), trans. from the Lat. by G. Gregory, 1787, 2 vols.; and, Prelim. Dissertation to Is. Poison. References to poisons in Holy Scripture are very few, and in almost every case they deal with national problems rather than internal effects. Thus we have the "fiery" or venomous serpents sent to chastise the disobedient Israelites (Num. 21.6; cf. Ps. 140.3). This passage deserves a special notice from the use made of the Brazen Serpent. This figure was symbolical only. It was customary to consecrate the image of the allusion either in its cause or its effect, as in the case of the golden emerods and golden mice of 1Sam. 3.2, and these and the "ex-votos" common in Egypt before the Exodus may well be classed with this Brazen Serpent. Two Heb. words are translated "poison" in A.V. (1) hadd, from a root signifying "to be hot," only re-
ferring to animal poison, and only used in Job 6.4, where the allusion seems to be to the venom of snakes. (2) roṣh denotes primarily a vegetable poison, and is only twice used to describe venom of snakes (Deut. 32.33; Job 20.16). In all other passages where it occurs A.V. gives "gall," except in Hos.10.4, where it is rendered "hemlock." Internal poison is never directly mentioned in O.T., though 2K.4.39 will hardly bear any other explanation, and 2.21 at least suggests the same. There is a clear case of its use in 2Mac.10.13, and a definite allusion in Mk. 16.18. It was a very favourite method of getting rid of difficult people with all the Hebrews.

[SERPENT; ADDER.]

**Pollex.** [Castor and Pollex.]

**Polygamy.** [Marriage.]

**Pomegranate.** The Heb. rimmôn occurs frequently in O.T., and is used for both the pomegranate-tree and its fruit. The pomegranate was doubtless early cultivated in Egypt, and is in evidence in prose and poetry. It is said to have been introduced into Canaan from Egypt, and to be found in the wilderness of Zin (Num. 20.5), this "is no place of figs, or of vines, or of pomegranates." The bush, with its characteristic calyx-crowned fruit, is easily recognized on the Egyptian sculptures. Carved figures of the pomegranate adorned the tops of the pillars in Solomon's temple (2Ch. 3.9); and wooden representations of this fruit, in blue, purple, and scarlet, ornamented the hem of the robe of the ephod (Ex. 28.32,33). Russell (Nat. Hist. of Aleppo, i. 85, 2nd ed.) states "that the pomegranate" (runmān in Arab., the same word as the Heb.) "is common in all the gardens." [Wine of the pomegranate is mentioned in Can. 8.2.]

Sir John Chardin says considerable quantities of this drink are made in Persia. Or the expression may be understood "wine flavoured with pomegranate juice." More probably still the meaning is merely the pleasant juice itself. Pliny says, "Nature hath showed her admirable works in this fruit; for at the very root, whilst the bud grows and increases, there is through every shew of a perfect wine, without appearance of any grape at all, not so much as of must, which ordinarily is the rudiment of wine."

**Pommel.** [Heb. gatah, "a bubble," hence a spherical object; A.V. 2Chr. 4.12,13; R.V. "bowl."] In this connexion doubtless a bulb or bulbous capital. The word is rendered spring (Jos. 15.19; Judg. 1.15), and bowl (1K. 7.41,42; Ec. 12.6; Zech. 4.3).

**Pond.** Fish-ponds are not noticed in the Bible. In Is. 19.10, A.V. "fish-ponds" is an error for "sod of soil" (see R.V.). In Cant. 7.4 the Heb. has only "pools." The Heb. aganq occurs nine times, naphal a three times, and "pool," "reedy swamp" (see Je. 51.32; R.V. marg. marshes). A.V. renders the word "pond," "pool," "standing water," and "reeds." [C.R.C.]

**Pontius Pilate.** The fifth Roman Procurator of Judea, was appointed by Tiberius, A.D. 25, shortly before St. John the Baptist's public ministry began. He remained in his office till the year 36 A.D., in which Tiberius died. At his appointment Sejanus was at the height of his power, and Pilate has been described as a creature of Sejanus, but apparently without any direct evidence, and his position was unaffected by the fall of Sejanus in 31 A.D. The chief authorities on the life and career of Pilate's administration are: (1) a letter from Agrippa I. to Caligula, recorded by Philo, Leg. ad Caunum, §38 (c. 40 A.D.), and (2) Josephus, 18 Ant. iii. 1; iv. 1; 2 Wars ix. 2-4 (c. 93 A.D.). From these writers it is clear that his conduct in office roused the bitter and lasting resentment of the Jews. They regarded him as obstinate and savagely cruel. We must, however, remember (1) that we have only the Jewish side of the question, and that at least in the case of Agrippa the writer had an interest in painting the character of Pilate in as dark colours as possible, in order to dissipate the enmity and embitter the descendants of the Jews; (2) that Tiberius, who, whatever his vices may have been, did not neglect the provinces, left Pilate undisturbed for ten years; (3) that in only one of the recorded cases of popular excitement, when the mob demanded the release of Barabbas as a favourable act to pay for an aqueduct to bring water to Jerusalem, did Pilate's measures of repression lead to actual bloodshed, and then clearly contrary to his intention. On the other hand, the list of crimes attributed to him by Agrippa has a lurid light thrown on it by the references in Lk. 23.19; Jz. 9.42; John 18.39. Blood Pilate had mingled with their sacrifices," no doubt on the occasion of some riot in the temple courts; and (2) by the massacre of Samaritans, for which he was finally sent home in disgrace by Vitellius (Josephus, 18 Ant. iv. 2). There is no reason to suppose that the reference to Pilate in later Christian literature (Tit. 3.1; 4.1; 1 Pet. 2.21; Origen, Adv. Hæres. iv. 26, that time he was at Rome, or in any way); that Pilate's conduct of the trial of our Lord. It will be well to take each account separately.—St. Mark's account (15.1-15) is eminently concise. Jesus, condemned by the Sanhedrin for blasphemy, is brought bound to Pilate. Pilate commences his examination by asking, "Art thou the King of the Jews?" and Jesus answers, "Thou sayest," an answer which it is difficult to understand as anything less than an admission of the truth of the charge. Yet no formal sentence follows, only a prolonged imprisonment, which is met with such resolute silence on the part of the Prisoner as to astonish the judge. The advent of the people to claim the release of a convict causes a diversion. Pilate endeavours to secure the escape of Jesus from the malice of the chief priests by a popular vote, and from henceforth the matter is one between him and the people. They choose Barabbas, and repeatedly demand the crucifixion of Jesus, and prevail.—St. Matthew (27.1,2,11-26), no doubt with Mark in his hands, adds the account of Pilate's wife's dream, and of the washing of Pilate's hands before the multitudes. He only
differs from Mark in making Pilate himself offer the alternative of Barabbas' release, and in marking more clearly the interval between Pilate's offer and the taking of the popular vote.—St. Luke, though he shows traces of acquaintance with Mark (Lu. 23.2,10), is (as throughout ch. 22-24) substantially independent. He commences with a detailed account of the charges brought before Pilate (23.2). He gives an explicit acquittal (ver. 4), accounting for the prolonged impeachment, and interpolates the trial before Herod, and Herod's mockery, before introducing the popular demand for Barabbas. This, when it comes, is an answer to an offer to dismiss Jesus with a scourging. After three expostulations the governor yields, and the people have their way. This account explains the transformation of the religious charge, on which our Lord had been condemned by the Sanhedrin, into the political charge on which he was tried by Pilate. At the same time it brings up several points of view for which the efforts Pilate made to secure the release of his Prisoner. But St. Luke gives no clue to account for those efforts or for their failure.—St. John here, as always, assumes in his readers a general acquaintance with current Christian tradition. What he adds was no doubt drawn from his own observation. He had gone with Jesus into the palace of the high-priest (18.15), and no ritual scruple would exclude him from attendance at the trial in opencourt. The first scene, however, takes place outside the palace. The prosecutors refuse to enter a Gentle house in less-time, and Pilate has to interview them. After an unsuccessful attempt to secure a sentence without bringing any specific charge, they accused Jesus (as St. Luke tells us) of claiming to be King of the Jews. This becomes the subject of investigation as soon as the judge returns into court. The charge was new to the Prisoner. He asks, therefore, whence this accusation came? Pilate disclaims any association with the charge, and asks Him to explain His position, no doubt regarding the charge as a malicious libel. He is surprised to learn that Jesus did actually regard Himself as a King. But a King who disclaimed the usual political attributes was not a person suitable to Caesars need be suspected, whatever might be the nature of the truth to which He had come to witness. Pilate therefore goes out and pronounces His acquittal. There must, however, have been some serious obstacle to an immediate discharge, because the governor couples his verdict with an appeal to the people to exercise their festival prerogative in the Prisoner's favour. The appeal failed; the people chose Barabbas. Pilate then took Jesus and scourged Him. It is commonly assumed that this was the first part of a Roman sentence of capital punishment, and that Pilate ordered its infliction hoping thereby to glut the minds of the prosecutors and so to escape completing the sentence. The language employed (κατατυφύλαξεν, cf. μακρύς αντίραχος, Ac. 22.21) suggests rather that it constituted a further stage in the judicial examination, following on our Lord's refusal to answer the further charges brought by the chief priests, and the failure of Pilate's attempt to transfer the case to Herod Antipas. It is at least worth notice that it is followed (Jn.19.4) by a fresh verdict of acquittal. The mockery by the soldiers, though distinct in form, was no doubt identical in spirit with the mockery by Herod. Pilate makes himself aparty to it by parading it. It was meant to show that it was impossible to take Barabbas. The mocking revisions out of which Pilate seriously. The appeal ad misericordiam only roused the chief priests to fresh fury. They and their attendants raise a cry for crucifixion. Pilate's pride is roused by this attempt at dictation, and he throws them back once more on their own resources. This compelled the chief priests to change their ground. The effort to secure a conviction under Roman law for political offences had failed. They were forced to raise the question of the rights of Jewish courts and the Jewish law. He is under sentence of death from our courts for blasphemy. Execute Him on the ground of the charge. It brings light on the words the governor had already heard from his Prisoner. The awe which Jesus had inspired, and which the mockery had not enabled Pilate to throw off, was deepened. "He was the more afraid." Once more, therefore, he goes back into court with Jesus to examine this inscription, and to probe the recurring suspicion that there was more in this strange, silent Man than met the eye. He gets no direct answer to his challenge; only a reminder that the source of his own authority was in God. As a result Pilate was served to fresh effort, but still not to the exercise of his boasted power to set His prisoner free. The Jews threaten Pilate with impeachment on a charge of treasonable complicity with a Pretender to the throne. On this Pilate's resistance collapses. He retains sufficient hold on the situation to make his surrender as gallant as possible to their national pride. He brings Jesus once more before them expressly as their King; and sells Him to them at the price of an explicit act of national apostasy, which he takes pains to publish to all the world in the title which he wrote and affixed to the cross. But he gives Him into their hands to be crucified.—Such are the four principal incidents, each capable of being mechanically harmonized in all their details, but strikingly harmonizing in the view that they give of the part played by the main actors in the scene. In each the Roman governor, convinced of the innocence of his Prisoner, but afraid, for some unexplained reason, to deliver Him on his own responsibility out of the hands of His persecutors, appeals to the multitude to assist in His release and ultimately yields, protesting to the end, to the demand of priest and people for His crucifixion. Personally Pilate was in no sense bowed by the chief priests. Again and again he throws them back when they try to force his hand directly. Why, then, did he not dare openly to rescind their judgment, and set their Prisoner free? Was it that in the excited state of popular feeling it would risk a riot to disregard openly a decision of the Sanhedrin, unless he could associate the people with himself? Or can we not suggest that he was convinced of the harmlessness of Jesus, the popu-
In Can.7.4 (I.XXX. lakes) the eves of Solomon's bride are compared to the deep brown "pools" (A.V. fish pools, which is not the Heb.) in the brook W. of Heshbon.

Poor. Poverty existed throughout T. times, and there are many references to the oppression of the poor by the wealthy and unjust (e.g. Is.3.1.f.10.2; Am.8.4; Pr.22.7, etc.). For a general picture, see esp. Job 24, and cf. Widow, Stranger, Servant, Family, Levite.

The law favoured the poor in manifold ways.

(1) In certain cases cheaper sacrifice was accepted from them (Lev.5.17-15, etc.), and poverty was also considered in assessing the redemption money of certain vows (Lev.27.8).

(2) Their support was ensured by (a) provisions favouring cleaning and securing to them forgotten sheaves and the produce of corners of fields, etc. (Deut.24.19-22; Lev.19.19f.22.22; cf. Ruth.23.7-5) (b) Donatists' participation in sacrificial feasts (Deut.16.11,14) (Feasts) (c) the tithe in the third year (Tithes) (d) the law that in every seventh year the land was to lie fallow and its produce might be taken by the poor (Ex.23.11). Charity appears to have been regarded as a duty in every age (Pr.19.17; 22.9; 25.7,31.20; Job 29.18f.); the law enjoined lending to the poor without interest, and provided for the periodical remission of debts. (Loan.) It also imposed restrictions in favour of poor borrowers on the practice of taking pledges. (Pledgr.) (4) If, nevertheless, povertyeventuated in insolvency, which in archaic societies was often treated as an absolute (cf. Am.2.f.8,6; Gen.47.18f.), the law provided that the Israelite debtor should be treated leniently and not used as a slave, and that in the year of Jubilee he should go free and recover his lands (Lev.25.39-41). Moreover, if sold to a stranger, he might at any intervening time be redeemed by one of his relations (Lev.25.47-55). Donatists' thesaurus participation also applied to children sold by their parents through poverty (2K.4.1; Ne.5.5; Is.56.1; Job 24.9). (5) In judgment the poor were to be treated with absolute impartiality (Ex.23.3; 6; Lev.19.15; cf. Pr.31.9; Je.22.16, etc., Encycl. Bibl. s.v. Wiener in Studia Biblica, xiv. 5-16; para. 132, 5-16; and see the former note). The law of the land was imposed on the whole world. The poor, however, were not to be helped by force (Am.8.4; Gen.47.18f.). In N.T. times beggars solicited help (a) at the temple gate (Ac.3.2); (b) at the entrance to the houses of the rich (Lu.16.20); (c) by the wayside (Mk.10.46). Relief was given (a) in money (Mt.26.9; Lk.12.20); (b) in kind (Lu.16.20). Property was sold to provide the means of relief; Christ charged the rich young man (Mt.19.21) and the disciples (Lu.12.33) to do this, which became the custom of the early Christians (Ac.2.45f.34.35). The care of the poor occupied a prominent place in early church organization (Ac.6.1f.24.17; Ro.15.26; Gal.2.10-11; I Cor.16.1; Jas.2.15,16). St. James condemned the practice of making a distinction between rich and poor in the house of prayer (Jas.2.2,3.6). Kind treatment of the poor is considered in the great Messianic judgment scene (Mt.25.35,42). See also Lu.3.11,14,15.

Deaconess. [Woman.]

(1) Heb. libbê = "white"; [Gen.30.37, Ho.4.13]. Several authorities, including...
Celsius, favour the rendering of A.V., and think the "white poplar" (Populus alba) is denoted; others understand the "storax-tree" (Styrax officinale Linn.). The white appearance agrees with the etymology of the Heb. lbnê, the root of Lebanon, "the white mountain." The poplar (P. papyrifera) was perhaps formerly common in the Jordan Valley: it is now found at Bâniâs. The Arabs believe its wood makes the best charcoal for gunpowder, and it has become scarce, but some fine trees remain in the Ghôr, and smaller ones near Jericho. It is known to Arabs as the bahr, or "white" tree. [H.C.H.]

Poratha, one of ten sons of Haman slain by the Jews in Shushan the palace (Esth.9.8).

Porch. (1) Heb. šu'ār, a pylon or hall. [POTIPMAR.] (2) after-Pron. (Judg.3.23), a porch with a row of posts or pillars—a verandah. [House.] In N.T. (Mt.26.71, παλάτιον) a pylon, or façade, of the high-priest's palace. [C.R.E.]

Porcius Festus. [Festus.]

Porter (Heb. šhō'èr; Gr. ὑπηρέτης) never means in A.V. a carrier of burdens, but always a gate-keeper, often used of the Levites in charge of the entrances of the sanctuary, from the Lat. portarius. Cf. 2Chr.15.3, 24, "doorkeepers," a variant translation found also in R.V.; and see Jo.18.16,17.

Posidonius, an envoy sent by Nicanor to Judas (2Mac.14.10).

Possession. [Demoniacal Possession.]

Post, a wooden pillar. The A.V. so renders four Heb. words. (1) awil. [LIXEL.] (2) 'amoni (Is.6.1), "the cubits of the door" (R.V. thresholds). (3) māza in 18 cases for a door-post, has now come to mean the case containing two passages of the law (Deut.6.4-9,11,13-21), attached to a Jewish door. (4) saph (2Chr.3.7) in 22 cases is rendered post, door, or threshold, the latter being probably the real meaning. [C.R.C.]

Pot, i.e. runners (Heb. râqûm), a late word in this sense (2Chr.30.6,10; Esth.3.13,15; 8.10,14; Job 9.25). The reference in Esther is to the famous Persian postal system (Herodotus, vii.98). [C.R.C.]

Pot. [Handicrafts, (4): CUP; PAX; POTSHED; PUSIPHAR (Herodoti. Puthar; Gen.37.36,39.1). An officer of Pharaoh, and the captain of the guard to whom Joseph was sold by the Midianites who had brought him to Egypt. He is said to be an Egyptian, which means that he was a native who had risen to a high position under the foreign dynasty of the Hyksos, the Shepherd kings. He seems to have been a wealthy man, who had a considerable establishment, the direction of which he gave to Joseph. The word here translated officer means originally an eunuch, but this sense would certainly be wrong here; this word is repeatedly employed in the sense of courtier or chamberlain. His second title may signify chief of the executioners, or of the body-guard which had to defend the sovereign, and also to execute capital punishment when it was ordered by the king. An episode nearly identical to that which caused his master to throw Joseph into prison is related in an Egyptian tale called "the story of the two brothers." Most interpreters, led astray by the LXX., have considered Potiphar and Poti-pherâh as the same name, as a transcription of Pta, pra, or Pte-pra, (Heleodorus). We believe that the two names are different: Potiphar ends with the name of the god Horus, which in the first syllable often has the vowel a, while Potiphara (see R.V.) would end with Ra. We should transcribe Potiphar p hotep Har, the offering of Horus, or the well-pleasing to Horus. [E.N.]

Poti-pherâh (R.V. more correctly Potiphera), the high-priest of On, Heliopolis, whose daughter Asenath was given to Joseph (Gen.41.45,50; 46.20). The name means "one who has power in this marriage." The king, being a stranger, wished to introduce a man of a kindred race into the college of priests of On, which was one of the most powerful in Egypt. We have a statue of a high-priest of On which goes back to the 3rd or 4th dynasty; he is called Rahotep, which is probably the former name of Joseph, while his father Asenath would have married the daughter of his former master. [E.N.]

Potsherd, a broken piece of earthenware (Prov.26.23; cf. Is.30.14, "sherd").

Pottage (nâšîlî, a dish composed of boiled vegetables (Gen.25.29,31; 2K.4.38-40). In Hos.2.12 it is spoken of among the most ordinary elements of food. [W.B.O.O.]

Potter. [Handicrafts, (4:)]

Potter's field, The (Αγρίδα, Ac.1.19, the field of blood, so named as the scene of the traitor's suicide), a piece of land which, according to Mt.27.7, was purchased by the
priests with the rejected 30 pieces of silver, and converted into a burial-place for Jews who were hanging to the wall. It seems to have been identified with "the potter's house" of Je. 18. 2, 19, in the valley of Hinnom, and may have been the site of a potter's workshop, or potter's clay may have been dug there (Krafft, Top. Jer.) St. Matthew regards the incident as a fullimento of a prophecy, naming Jeremiah 2, 19 (though the latter may not always have been a mere slip of memory due to the mental association of the allusions in Je. 18, 19 and 32, 6 ff.). The passage which the Evangelist had in view is manifestly Zech. 11, 13, although the verse is quoted inaccurately, and in any case there are difficulties of text, even if the suggestion is adopted that Zech. 11, 14 is by a different author, who may be Jeremiah. Other commentators, however, have come to another conclusion—e.g. "St. Matthew, tainting this prophecy (Je. 19) in form as in its spirit, and in true Jewish manner stringing to it the prophetic description furnished by Zechariah, sets the event before us as the fulfillment of "Jeremiah's prophecy" (Edersheim, Life of Christ). [S.N.S.]

Pottery. [Handicrafts, 4.]

Pound. (1) Weights and Measures. (2) In the parable of the Ten Pounds (Lu. 19, 12-27), the reference appears to be to a Gk. pound, a weight used as a money account, of which 60 went to the talent, the weight depending upon that of the talent.

Power on the head (1 Cor. 11, 10. ξεύσων ἔχειν ἑπὶ τῆς κεφαλῆς διὰ τοὺς ἄγγλους; potestatem habere supra caput prophetos; R.V. "to have a sign of [marg. or, have authority over] her head because of the angels"). There is no variation in the text, and conjectural emendations may at once be set aside. "Power on her head" must mean a sign of subjection, and so be equivalent to a head-dress. Some have supposed that the word is a provincialism for a female head-dress, but of this there is no evidence. St. Chrysostom paraphrases it as "revil." Because of the absence of the article, it is taken in the ordinary sense, and not as meaning messengers or bishops. It was the general belief that angels were present at the Christian services. Women should be veiled, as the seraphim covered their faces with their wings (Is. 6, 2), or else lest they should tempt the angels to lust, as before the Flood. Cf. Stanley, Corinthians, pp. 184-188. [G.M.Y.]

Praetorium. [Judgment Hall]

Praise. (1) O.T. The Heb. word t·híl·lí·m, derived from the root k·hí·l·l, meaning "to break out" (in a cry especially of joy), denotes strictly the act of homage offered to God in acknowledgment of His essence and character, as opposed to mere adoration (Ps. 145, 4; 2 Cor. 12, etc.). But the homage as shown in the Magnificat (Lu. 1, 47) is linked so closely with thanksgiving in which the divine glory and goodness find expression that the two cannot always be sharply distinguished. In O.T. examples of songs of praise are those in Ex. 15, 1-3, and Ps. 2, 1-2 (though the latter must not always have belonged to its present context). The Psalter, t·híl·lí·m, naturally supplies in its exultation at the Name, the glories, the loving-kindness and the bounty of God, the purest examples. Halleluia ("praise ye Jah") is generally used as the equivalent of Praise, and is at the beginning, or at the end, or both, of three groups (104-106, 111-117, and 146-150) of later Ps., together with 135. Praise and prayer are evoked by mention of the divine attributes (Ps. 18, 1-3). Ps. 145, alone entitled t·híl·lí·m, expands in terms of universal and unceasing praise such a doxology as that in 1 Chr. 29, 13. In Ps. 148 (the foundation of the Benedicite) all creation is called to praise at Israel's restoration. Cf. Tob. 13 and Ba. 5. (2) N.T. Praise is a dominant note (especially in the structure of St. Luke's gospel), in which Gentiles, in fulfilment of prophecy (Ps. 18, 49; Is. 11, 1) unite with Israel. [Praise; Worship.] But address by way of petition is the main subject of this article, in which the growth of prayer is sketched, following the broad outlines of Jewish history. (1) At the root of the prayer of Israel lies the Heb. belief in God Who is at once transcendent (Deut. 32, 39; Is. 57, 16), a living God (Ex. 15, 12; Ps. 139, 7; Jn. 1, 10, 5, 17; Ac. 17, 22 ff.), combined with the conviction that man is capable of communion with Him. The history of Israel is that of a people who, with all their failures, lived as believing in the intercourse of God, the Creator and Preserver, Whose sovereignty is righteous, with man. The foundation of that belief rests on the revealed relation between man and God (Gen. 1, 26, 27; 2, 7, 5, 1, 2, 9, 6; 1 Cor. 11, 7; Is. 3, 9). With the unveiling of the character of God through historic manifestations of His holiness and love there was a corresponding growth in prayer. From the primitive use of the name of Jehovah in prayer, after the nature-covenant with Noah had confirmed the promise of Creation (Gen. 9, 16), is upheld under the grace-covenant with Abraham by the sense of the greatness and righteousness of the Lord (Gen. 18, 25, 31, 32), while, in the crisis of Jacob's life, tenacity of purpose, becomes the blessing through the character of Jehovah (Gen. 32, 28; Ho. 12, 4). The work-covenant at Sinai deepened through the law the sense of duty and of weakness, of the call to holiness (Ex. 19, 6; Lev. 11, 44) and of social unity (Ex. 24, 3). Prayer
became more serious as the sense of sin increased (Ex.32.11-13), while the "tent of meeting" was a symbol of the satisfaction of human need of fellowship with God (Ex.25.8, 40.46). In the context of divine development, as in the prayers of Samuel (1 Sam.12.10-22), Elijah (1 K.18-36.37), in the liturgical prayer of Solomon (1 K.8.2-53), and later in the prayer of the Levites (Ne.5.11), and Daniel (Dan.9). Through experiences gradually formed under the life-covenant with David (2 Sam.7.1-16), prayer, as evidenced in the psalms and in the prophets, became enriched with religious affections, thought, and reason. All yearnings are met by God (Ps.27.7-6.63-13). The awakening of conscience (26.2), penitence and restoration (51.10, 47), spiritual illumination (119.27, 143.10), intercession for the church (52.21-58), and for a future kingdom than the past (144.12, 13), illustrate the firm belief of successive generations of Israelites in God all-holy, almighty, and omniscient, the vitalizing of the faculty for fellowship with Him, and the reality of prayer. To Him are due the preparation of the heart (10.17), and the movement of life for prayers (27.7). It is with His promise, with His assurance (86.7-91.15). In the deutero-canonical books there are striking prayers for wisdom as the guide of life (Wis.9; Ecclus.51), acts of faith (Ecclus.23.1-3), and intercession for the Church (36.1-17). (2) In N.T. the revelation in the Incarnate Son of the Fatherhood of God (Mt.16.28; Lk.11) coronated a progressive witness to the reality and issues of prayer. In Christ the power of prayer has been established and is now extended to the individual believer (Mt.6.8; Lk.11.5-13; cf. an anticipation in Ecclus.23.1-4). In harmony with His own prayer of consecration (Jn.17), and the reservation (Mt.26.39-44), as well as the Lord's Prayer (Mt.6.9-11), the Church has learnt to pray in His name, while every Christian has addressed God with child-like confidence (Ro.8.25,28). Belief in the efficacy of prayer was secured by large general proofs (Mt.17.7; Mk.11.24), especially to united prayer (Mt.18.19-20), that the God of the covenant promises to hear (Jn.14.14). It is conditioned. It must be made in the name of Christ, not only as a plea for success in petition (Jn.14.13, 14), but in accordance with His will (15.7,8), purpose (15.15,16), with trust in the divine revelation (16.25), and in reliance on the Mediator's power (16.26-28; cf. Eph.2.18.3.12). Under these conditions, spiritual and temporal blessings are guaranteed (Mt.6.33; 1 Tim.4.8). (3) In the apostolic Church "the prayers" are significantly linked with "the breaking of the bread" (Ac.2.42), for abiding in Christ is connected by Himself with Holy Communion (Jn.6.56, 15x1-8). The action of the Holy Spirit is assured (Ro.8.26). In the Lпп. Christ's promises in regard to prayer are claimed for the highest spiritual ends (Eph. 3.14-21) and for special circumstances (Ro.15.30-32). Intercession is a first duty of the ministry (1 Tim.2.1). Petitions according to the Lord's command are certainly answered (Jn.5.14,15), as they are confidently offered through the Mediator (Heb.10.19). Who appears for us before God (Heb.9.24; Rev.5.6). (4) In the Lord's Prayer, probably delivered on two occasions (Mt.6.9ff; Luke 11.1-4), investing older phraseology of the Jewish Church with a new spiritual meaning in a new setting, the keynote is the invocation of the Father. The petition, in effect, is founded on the prayer of the Levites, which is offered at the beginning of the Book of Psalms. All every prayer is offered in the name of Christ, for in it the Father is revealed. His Name hallowed, His kingdom advanced, and His will fulfilled through the gift of His Spirit (Jn.16.13-15; Ro.14.17; 11th.4.13; 2 Th.2.13). In line with passages like Ps.106.4-5, the Lord's Prayer is the electro-Fountain of Divine prayer, every believer can make it his own. Thus, in the use of the Lord's Prayer, the highest conception of prayer as an agency for the manifestation of the divine glory in the fulfilment of the will of God is maintained in the spirit of His Son, Who thus taught the Church to pray (Jn.17.1-4). [See also Psalms.]

PRAYER

PRECIOUS STONES

PRAYER

Place of. [Prosopoeia.]

Preachers. Preaching is often mentioned in A.V. The older temple worship was mainly ritual and sacrifice; before the Captivity the prophets were the chief preachers of God's message, mostly delivering their prophecies verbally before the people (cf. Je.36.2). After the Captivity the building of synagogues caused a great development of preaching. At the reading of the law and the prophets in the church, an interpreter translated into Aramaic and added comment and explanation. Thus often became an interpreter of Scripture, and occasionally of history. (cf. Edersheim, Life and Times of Jesus, i. 445). There was no appointed preacher set apart for this work, but the arch-synagogues invited any duly qualified person present to interpret and preach. This is evidenced by Jewish writers, and in the N.T. we have examples in the case both of our Lord (Mt.13.54; Mk.6.2; Luke 4-16), and of St. Paul (Ac.13.15). Our Lord also preached in the temple colonnades (Jn.7.14, 28.8.2). St. John the Baptist revived the prophetic preaching of repentance and faith (Mt.3.1), as did our Lord (4.17). We learn from 1 Cor.14 that in the early days in churches, as in synagogues, any duly qualified person was encouraged to preach, and at Corinth disorder resulted. St. Paul forbade women to preach (ver. 34). The Didache (xi, 3.8) speaks of travelling apostles and prophets (i.e. preachers) speaking "in the Spirit." [CCE.1]

Precious stones. The LXX. shows what the translators understood and answered about the Ark, 3rd cent. n.c., supposed to be the Gk. equivalents for the Heb. names of precious stones, and these stones with others are described by Theophrastus (4.287 n.c.). Josephus gives the Gk.
names for the gems in the high-priest’s breastplate as he knew them; and Pliny (d. 79 A.D.), in his Naturalis Historia, describes, often fully and precisely, the stones then held in value. But mineralogy was still in its infancy, so that distinct substances might pass under one name, or mere varieties be regarded as separate species. We may, however, at any particular time exclude from consideration stones obtained only in localities then accessible, and, in the case of engraved gems, those which were too hard to be carved by the artists of that age. But we must not forget that, even in very early times, special articles of commerce often travelled far. Amber passed from the Baltic to the Mediterranean in prehistoric times; scarabs, pottery, and vessels of polished stone were brought from Egypt to the isles of Greece many centuries before the Exodus; and the spicis of Gilead, as we read in Genesis, were carried across Palestine to the Nile. Still, it is clear that the jewellers of Egypt were acquainted with the diamond, ruby, or sapphire could have reached either of these regions before the days of Alexander the Great, or have been generally known in republican Rome. But of late years much information has been gained. The discovery by Prof. Plinders Petrie of the bracelet of Zer, second son of the first dynasty, shows that some 66 centuries ago the Egyptians could make beads of various shapes from lapis lazuli, turquoise, and even amethyst; while about the time of the Exodus, according to the same authority, they worked the following materials for ornament: the pomegranate, the lapis lazuli, felspar, turquoise, amethyst, and rock-crystal, with jasper, agate, carnelian, and other varieties of chalcedonic quartz. Some of these stones also were used by the ancient Chaldeans and by the precursors of the Greeks in the Eastern Mediterranean, while from almost the earliest days of Egypt and more than 2,000 years after the Chaldean. These vast and even large statues were carved out of rocks as tough as diorite and as hard as granite. Thus, though some identifications are very doubtful, because we cannot always be sure that authors, when using a particular name, meant the stone which now bears it, a fair number cannot be really wide of the mark. [T.G.B.]

Predestination. The belief in predestination is, in the Bible, a direct outcome of belief in God. The religious history of the Jews shows a progressive widening and deepening of the conception of God; and the developed conception is the presupposition of N.T. All that takes place in the universe of nature or the sphere of the exalted Person. The divine will and purpose are even more prominent than the divine mind. This conception of God is the guiding thought of St. Paul in the great passages, Ro.8.28-30,9-11, Eph.1.3-14. The keynote of the whole is to be found in the closing verses of Ro.11. Closely connected with the belief in predestination, but logically distinguishable from it, is the belief in election, the singling out of some from among men for a position of special privilege. The doctrine of election is found throughout both O. and N.T. And it is in so far as predestination is bound up with this belief, i.e., the acceptance of some and the rejection of others on grounds other than their own merit, that it has caused moral difficulty. It is necessary to ask (1) Who are the elect? (2) What is the status conferred by election? (1) In O.T., election refers primarily to the community. It is the people Israel that is placed and regarded as the people of the earth that are not. In St. Paul, although there is a stronger sense of individuality, it is still primarily with regard to communities, Jews and Gentiles, that the question is discussed. (2) Election is rather to a position of immediate privilege and service than to ultimate salvation; and this position, not independent of the moral qualities of those who hold it. The conception of Jewish privilege is modified by the deepening conception of the divine nature. If God is holiness, acceptability to, and intimacy with, Him must involve holiness, and privilege be associated with service. Because God is holiness, Jewish privilege merges in a wider purpose of mercy to mankind.
provisional character thus assigned to pre- 
reprobation is borne out by the fact that it is, in 
some mysterious sense, a means to the working out 
of the divine purpose of universal mercy. 
through all the miserable rejections and 
failures of human history, this purpose steadily 
fulfils itself, converting them into material 
for its own uses. (Yet we have in Ro.11:12 an 
differing comment which seems to suggest that, 
though man can never defeat God's will, 
he may help or hinder its accomplishment.) 
On the other hand, it is impossible to draw a 
sharp line, and confine election and predestination 
absolutely to this provisional meaning. 
We are dealing with God; and our leading 
thought is His sovereignty and unchangeable-
ness. God's reason, self concept, His will, and 
without repentance." The whole passage 
(Ro.9-11) is a prolonged theodicy, a vindica-
tion of the justice and the sovereignty of God. 
The defence is, first, that the Jews had mis-
conceived the conditions and nature of their 
election, which were ethical and so far unful-
filled; but, secondly, that the rejection is not 
ultimately an eternity of time. It is an ultimate 
and universal mercy. There is a distinct sugges-
tion that election is not in the end defeated. 
But it is quite superfluous to draw the same 
corollary with regard to predestination, since 
the two cases are distinguished by their different 
relation to the ultimate purpose, which is 
mercy. In conclusion: (1) All depends on 
our not isolating particular attributes of God. 
It is a mistake to explain away the Biblical 
insistence on His omnipotence and omnipres-
cence, or, with the early Gk. commenta-
tors, to reduce predestination to foreknow-
ledge in the supposed interests of free will, 
separating God's reason, self concept, His will, 
and purpose. It is equally a mistake to forget 
that, though God's will is determined by no-
thing outside Himself, it is determined by His 
own character, His holiness and His love. 
(2) In the reaction against a narrowly logical 
Calvinism, some modern commentators con-
sider the theory of God's purposes of 
divine governance and human freedom side 
by side, and gives us an antimony which he 
does not attempt to solve. This would be 
in accordance with the Pharisaic thought in 
which the apostle was educated. But it may 
be doubted whether the antimony is not rather 
in the minds of the commentators than in that 
of St. Paul. With him the two are not on a 
level, nor are they inconsistent. Whether we 
can follow his reasoning or not, to him human 
responsibility seems to spring directly from an 
overruling Providence. And it is at least 
questionable whether the common and rather 
notable conception of freedom, as involving 
an act of real independence even of God, is 
to be found in St. Paul. Two cautions should 
perhaps be added. (a) It is a mistake to isolate 
partial texts or passages. Ro.9 must 
be interpreted in the light of the rest of St. Paul, 
St. Paul by the rest of the Bible. (b) St. Paul 
does not write: all this laterly, and gives us 
ready-made answers to philosophical 
problems. We find in him suggestions, but not a system. 
He has been and will be differently interpreted 
according to the different presuppositions with 
which he is approached. (Two opposed views, 
the Calvinistic and the anti-Calvinistic, are 
very ably maintained in the articles on "Pre-
destination" and "Election" respectively in 
Hastings, D.B., 5 vols. 1904. A very good 
discussion is also found in Gore, Romans, vol. 
ii. pp. 1-94. [W.H.M.] 
Preparation, Day of the. [Passover; 
Exegetist.]
Priest. This word (πρεσβύτερος) as 
denoting an official in the Christian Ministry, 
was borrowed from the Jews. Of the use of the 
terms ἐπίσκοπος and πρεσβύτερος as equi-
valent, and on the nature of the office and 
method of appointment, see Bishop; Church; 
Timothy, Eph. to. [n.s.]
Presets. [GIFT.]
Priest in O.T. (Heb. kōhîn, "he that 
stands"), a general designation of the ministers 
in religion who act as mediators between their 
fellowmen and the deity—e.g. Melchizedek (Gen. 
14:18), Potiphearah (41:45), Jethro (Ex.2:16). 
It may signify either their function as offerers, 
because of those services at the altar they 
performed standing, or more generally as servants, 
since to "stand before one" is said of service 
in general (I K.10:8; J e. 35:19; Dan.1:5). 
There does not appear to have been in the 
Mosaic days any special class of priests. Sacrifices 
are offered by Noah (Gen.8:20), Abraham 
(12:7), Jacob (31:43,35), as the head of the 
tribe or household, by the dignity inherent in 
that position, which became typical through the 
priest-king Melchizedek (Gen.14:18; Heb. 
7:1); and long after the death of Moses we find 
instances of a similar combination, not only in 
cases admittedly disloyal to Jehovah, as that 
represented in the reign of Jehu, but also in cases of 
such signal devotion as Gideon (Judg.6:26) 
and Manoah (13:19). The Israelites indeed, until 
the time of the establishment of the central 
sanctuary on Mt. Moriah, seem to have felt 
free to offer sacrifice when occasion required 
(2:1-5; iSam.6:15; cf. 1 K.8:5); and had 
been enjoined by themselves to kill the pas- 
chal lamb for their households (Ex.12:21,27) 
each year. Hence we find those who for the time 
occupied the position of head or representative 
of the nation offering sacrifice; Samuel (iSam. 
7:9), Saul (13:9), David (2Sam.6:13,24-25), 
Elijah (1K.18:3,32-38), all offered sacrifice 
without any suggestion of trespass as is 
inseparable connected with the similar, 
but schismatic, act of Jeroboam (13:1,1), 
and Solomon's act at the dedication of his temple 
was obviously unique (8:63). The description 
of David's sons as priests is exceptional (2Sam. 
8:18), and the A.V. paraphrases as "chief 
officials," however, have been similar, in a 
period of unsettlement and transition, to that of 
the young men in the camp at Sinai (Ex.24:5; 
cf. 19:22), though the cases of Ira (2Sam.20:26) 
and Zabud (1 K.4:5) rather 
point to the sense of "privy councillor," i.e.
PRIEST IN O.T.

one who has the privilege of drawing near to advise. At Sinai the whole nation was brought into covenant with Jehovah as "a kingdom of priests" (Ex.19.6), and in the Book of the Covenant, which immediately follows, the demand is made that the first-born son should be given to Jehovah (22.29). But Israel itself, the kingdom of priests by adoption, was in the relation of first-born (4.22), and the requirement of the first-born is therefore representative (18.15); they were consecrated to holy service by their being "given" to God as were the Levites (Num.8.16) and Samuel (1 Sam.1.11). The Levites indeed are represented as the sons of Aaron, or the descendants of Levi or Jethro, in the relation of first-born (4.22), and the requirement of the first-born is therefore representative (18.15); they were consecrated to holy service by their being "given" to God as were the Levites and the Levites ((Num.8.18). Although the founders of the Israeliitish nation must have been familiar with priesthood and sacrifice before they crossed the river (Jos.24.2,3), it was in Egypt that the most vivid impress was received in the direction of ceremonial and religious organization. Joseph's marriage to the daughter of a priest (Gen.41.45), and the spiritual favour he showed to the priests during the famine (47.26), as well as in a later day the education given to Moses (Ac.7.22; cf. Ps.99.6), show how familiar the Israelites must have been with the Egyptian conception of priesthood; and it is to the time of their captivity in Egypt that the institution of an hereditary representative priesthood of Jehovah is assigned (1Sam.2.27,28; cf. Ex.5.13,3,8,27,10,25, 19.22). Hence the triumph expressed by Micah in regard to his idolatry, "I have a Levite to my priest" (Judg.17.13). The description of the instalment of this priest mentions not the purification (Ex.29.4; Lev.8.6), the investiture (Ex.29.5,6,8,9; Lev.8.7-13) and theunction (Ex.29.7) of the persons ordained; the second part is a threefold sacrificial action, viz. the offering of a sin-offering (29.10-14), burnt-offering (29.15-18) and peace-offering, which was the "ram of consecration" (29.27), LXX. κράτος τῆς τελείωσεως, or "the offering for filling" (29.34,35; Lev.8.22,29), because the hands of the consecrated persons were filled by portions of it being placed upon them (8.27). The whole ceremony of consecration was repeated daily for seven days (8.33-35), and on the eighth day the persons thus consecrated entered upon the independent discharge of their priestly functions, by offering (a) for themselves a calf for a sin-offering and a ram for a burnt-offering, and (b) for the people, a goat for a sin-offering, a sheep for a burnt-offering, and a bullock and a ram for a peace-offering (Lev.9). On that day Aaron also entered upon his priestly function of blessing the people (9.22). The entire ceremony of consecration was to be repeated in the case of each succeeding high-priest, but it does not appear to have been repeated in the case of ordinary priests (Ex.29.29-30; cf. Lev.6.22). Common to the priests and the high-priest were the linen drawers worn for decency (Ex.28.42), and over these the priests wore, "for glory and for beauty," coats, girdles, and turbans, all of white linen (28.40), but had bare feet for all liturgical actions. Hence the necessity for washing feet as well as hands before entering the tabernacle (30.17-21,40.31, 12.). They priest wore drink before ministering (Lev.10.10; Ezk.44. 21), and were to make no mourning for the dead except their nearest relations (Lev.21.1-5; Ezk.44.23), and a physical blemish was a disqualification (Lev.21.17-23). They had, too, special laws for marriage, and might not contract unions with a heathen woman or the widow of any but a priest (Lev.21.7,14; Ezk.44.22). Their functions were (i) to watch over the fire on the altar of burnt-offerings, and to keep it from ever going out (Lev.6.12; 2Chr.13.11), (ii) to burn incense upon the golden altar (Ex.30.7,8); (iii) to set up the shewbread in order (Lev.24.6); (iv) to light the seven golden lamps outside the veil with oil (27.20,21; Lev.24.2); (v) to offer at the door of the tabernacle the daily sacrifices (Ex.29.38-44); (vi) to minister, by sprinkling the blood of their sacrifices which the offerer had himself to kill, to any guilty, penitent, or reuniting Israelite (Lev.5.14; 25.10; cf. Lev.14.1). They priest had to hear the confession of the sin or trespass for which the sacrifice was offered (Lev.5.5; Num.5.7), but might not divulge such confession, and had to give direction for amendment of life: "The priest's lips should keep knowledge, and they should seek the law at his mouth" (Mal.2.7; cf. Deut.32.44; Deut.18.15; Ezk.44.23,24). The priests also acted as a court of appeal in more difficult criminal cases (Deut. 17.8-13). Special to the wilderness wanderings were their duties of covering the ark and all the vessels of the sanctuary with a purple or scarlet cloth before the Levites might approach them (Num.4.5-15), and of giving the signal for the commencement each day's march with long silver trumpets (10.1-8). All other functions were included and consummated in the "blessing of the people," or "putting on them the Name of the Lord" (Num.6.22-27; Lev.9.22; Deut. 21.5). Their maintenance was on a scale far removed from wealth, yet, as were all the Levites, or these tithes paid to the Levites (Num.18.26-28); (2) a special tithe every third year (Deut.14.28,26,12); (3) redemption money for first-born (Num.18.14-19); (4) or for special dedications (Lev.27); (5) spoils of war (Num.31.25-47); (6) shewbread and other offerings (18.8-14; Lev. 26.29,7-10,13,14,25,30); (7) heave (Lev.27.30); wine, and oil (Ex.23.19; Lev.2.14; Deut. 26.1-10); and, after the settlement in Canaan, cities with pasture grounds were assigned them (Jos.21.13-42). For abuses to which these payments in kind led, cf. 1Sam.2.13-16 and Ho. 4.8, cf. Lev.10.17. [LEVITES; FAMILY; FIRST-
According to Jewish tradition, the priests, or "sons of Aaron," were divided into eight courses in the wilderness days; these were increased to sixteen while the ark was at Shiloh, the two families of Eleazar and Ithamar standing in both cases on an equality. To the reign of David belonged the division of the priesthood into 24 "courses" or "orders" (1 Chr. 24:1-19; 2 Chr. 23:8; Lu. 1:5), which had to be rearranged after the return of the remnant from captivity (Ezr. 2:36-39). Courses commenced their round of duties on the sabbath, and were responsible for all duties for a week, the particular duties of each member of the course being assigned by lot (Lu. 1:9). Half of the members of each course were resident at Jerusalem, half were scattered over the land, but all were in attendance at the central sanctuary for each of the three great feasts (Deut. 16:16,17). During the 23 weeks out of every 24 when they were not on duty, they probably lived the life of ordinary citizens, looking after their homes and cattle (Jos. 21:42); some perhaps became "teaching priests" (2 Chr. 15:3), and found occupation in the schools of the prophets; others sank into depths of corruption (Is. 28:7,8,56,10-12). On the return from the Captivity they were made immune from taxation (Ezr. 6:8,9,7:24), and in the time of the Maccabees they were prominent in the defence of their country's freedom, though some apostatized. Later on they became, like the rest of the nation, divided into sects, and though in the Gospels and the Acts their chiefs were apparently consistent Sadducees (Ac. 4:1,6,5:17), yet in quite early days of the New Way a great multitude of the priests was obedient to the faith (6:7). The table below gives the three lists of courses which returned, with the original list in David's time for comparison. Jn. Lightfoot, *Ministerium Templi*, vol. i. pp. 671-758; E. F. Willis, *Worship of the Old Covenant*; Edersheim, *The Temple, Its Ministry and Service as they were in the Time of Jesus Christ*; Schürer, *History of the Jewish People in the Time of Jesus Christ* (trans.: T. & T. Clark).

PRIEST IN N.T.

Priest in N.T. The word ἱερεύς is frequently used to denote Jewish priests, as, e.g., in Mt.8.4. In Ac.14.13 it is used for the priest of Jupiter at Lystra. In Hebrews it occurs repeatedly with reference to our Lord (see, e.g., Heb.7.16, 17, 3.4). [Hewerbs, Ep., To.] In Rev.1.6,5,10,20.6 it denotes the Christian people and the redeemed. So also in 1Pe.2.5,9, "priesthood" (ἱερεύμα) denotes the Christian people. ἱερεύς is not used in N.T. for a Christian minister as distinct from the Christian people. St. Paul uses the verb "doing the work of a priest" (ἱερουργεύοντα) of himself in Ro.15.16: "that I should be a minister (λειτουργόν) of Christ Jesus unto the Gentiles, doing the work of a priest in regard to the Gospel of God (ἱερουργεύοντα τὸ εὐαγγέλιον ἀπὸ Θεοῦ), that the offering up (προσφορά) of the Gentiles might be acceptable, being sanctified by the Holy Ghost." For the second order of the Christian Ministry, see Curent [p.5.]

Prince. The rendering in A.V. of ten different Heb. words, which are more accurately distinguished by R.V. These include almost every kind of rule or authority, whether connected with birth or office, civil or military, whether in Israel or in the surrounding nations. In N.T. the one usage "prince" (ἀρχών) is given of the exalted Christ (Ac.5.31). [Judge.] [I.C.V.D.]

Princess. The rendering in A.V. (1K.11.3; Lam.1.1) of the Heb. word which appears in the proper name Sarah. It commenotes merely a lady of high position. [I.C.V.D.]

Print. [Writting.]

Prisc (2Tim.4.19). Priscilla. [Aquila.]

Prison. In Egypt special places were used as prisons under the custody of a military officer (Gen.40.3). During the wandering in the desert we read on two occasions of confinement, "in ward" (Lev.24.12; Num.15.34); but imprisonment was not directed by the law, and a Jewish prison is not mentioned till the time of the Exile (Is.22.7). Probably it was in or near the king's house (Je.32.23; 37.21; Ne.3.25), as may have been the case also at Babylon (2K.25.27); but private houses were also used as places of confinement (Je.37.15). Public prisons were in use by Canaanitish nations at an earlier date (Judg.16.21,25). Under the Herods royal prisons were perhaps still attached to the palace, or in royal fortresses (Mt.14.3; Ac.12.4,10). The tower of Antonia, a fortress built by Herod on the N.W. of the temple, was used as a Roman prison (Ac.23.10), as the praetorium of Herod was at Caesarea (35). The "common prison" (5.18f.); or "the prison of Miletus" (Ac.20.29) was probably that "jailer" and priestly rather than the civil authority (8.3,26.10). For imprisonment, see Crimes.

Prochorus, one of the seven deacons, named next after Stephen and Philip (Ac.6.5); said by tradition to have been consecrated by St. Peter bishop of Niconedia (Baron. i. 292).

Proconsul. The Gk. ἄρχων, for which this is the true equivalent, is rendered uniformly "deputy" in A.V. of Ac.13.7,8,12,19,38; and the derived verb ἄρχωνται in 18.12 is translated "to be deputy." For the distinction between imperial and senatorial provinces see Roman Empire. Over the senatorial provinces the Senate appointed by lot yearly an officer, called the "proconsul" (Dio Cass. iii.13), who exercised purely civil functions. Among the proconsular provinces in the first arrangement by Augustus, were Cyprus, Achaia, and Asia within the Halys and Taurus (Strabo, xvii. p. 810). Achaia became an imperial province in the second year of Tiberius, a.d. 16, and was governed by a pro- curator (Dio Cass. i. 76). It was restored to the Senate by Claudius (Suet. Claud. 23), and therefore Gallio, before whom St. Paul was brought, is rightly termed "proconsul" in Ac. 18.12.

Procurator. For the Gk. ἄρχων and its application to Pontius Pilate (Mt.27.), Felix (Ac.23.29; Dio Cass. i. 13). These procurators were sent both to the imperial and to the senatorial provinces (Dio Cass. iii. 13). Sometimes a province was governed by a procurator with the functions of a praeses; especially in the case of the smaller provinces and the outlying districts of a larger province; and in such relation Judaean procurators to Syria. These procurators of the procurator were at Caesarea (Ac.23.23), where he had a judgment-seat (25.6), in the audience chamber (25.23) and was assisted by a council (25.12) in cases of difficulty. In N.T. we see the procurator only in his judicial capacity, as in the three instances referred to above, and in Acts.13.1; 18.22,23; 25.25. He was a cohort as body-guard (Mt.27.27), and apparently went up to Jerusalem at the time of the high festivals, and there resided in the palace of Herod, or in Antioch, in which was the praetorium, or Judgment Hall (Mt.27.27; Mk.15.16; cf. Ac.23.35).

Prophecy. 1. It is an idle opinion that Heb. prophecy has its analogy in all nations. Clement of Alexandria held this. The true moral, even spiritual, insight of philosophers and of poets is very closely allied to it. St. Paul held so (Tit.1.12); and O.T. declares the spirit of prophecy to be not confined to the Hebrews, as in the case of the prophetess of Babylon, but prominently but not exclusively, the mantic or ecstatic element enters, because he acted more from compulsion than from a ready mind. In him, too, we see it allied to what we call genius. But those who would push all this to
the denial of anything distinctive in Heb. prophecy are generally content to be vague. Any strict comparison shows lines of deep cleavage. The character, extent, and limits of O.T. prophecy, usually conceptions of it by the prophets. Authority does not settle them. If the instinct that creates words lies always, and specially in the earliest ages, at the heart of things, the words which the Hebrews use for "prophets" and "prophecy" should shed light upon the thing. **rōē; hēzēl; and nābhā** are the usual synonyms in the O.T. for prophecy, "to behave as a prophet" (from nābhāh), "thus saith Jehovah," "it is the utterance [nām] of Jehovah," "the word of Jehovah which He spake by the hand of," "the vision" which the prophet "saw." "the word of Jehovah came to," "I saw visions of God," "the hand of Jehovah was upon." the prophet, "dreams" in sleep, and "the burden" of foreign nations, are some of the synonyms for "prophecy." That the last word, "burden," is accurately rendered, in the Hebrew understanding of it, appears from "Jehovah laid this burden upon him" (2K.9.25). The sentence "the burden of the LORD is upon me," in usage something to be borne and adverse is denoted. The synonyms for "prophet" are distinguishable; **rōē** and **hēzēl** both mean "seer," but the first refers to a man who sees anything external, the second involves more the prophet's understanding, but is still from without, and involves what is already there in mind and intuition into the truth of things behind their appearance. On the other hand, **nābhāh,** undoubtedly akin to the root **nābhā,** "to spring or bubble up," involves the whole man. It is akin to our word "inspiration," but includes the whole natural endowments and limits, as we say, of the prophet to a greater degree. 1Sam.9.9 denotes that prophecy had descended to a lower plane, as an answer to casual questions. The traces of ecstatic enthusiasm in the earlier chapters of Samuel show the revival of prophecy to be then associated with violent emotion and the rush of music. Like some of the mystics in modern times in Samuel, rash and arrogant want of self-control it became (10.10-13, and 16.14). In the popular view of men of the world, such as Jehovah fellow-officers, it did not lose this association (2K.9.11). The "violent rushing" of the spirit of God or Jehovah upon Samuel and upon the "colleges" of the prophets, and those who came into their society in Judges and Samuel, disappears later both in word and fact. Samuel himself in his earlier period heard the external voice of Jehovah (1Sam.3), later apparently in dreams and from within. **rōē** disappears, except by a kind of archaism, and occasionally in the verb of a prophet's "seeing" visions. So the Heb. idea of prophecy, after the times of its revival, settles into an idea of "springing or bubbling up" within, which involves the whole man, and is akin to what we call a gift or endowment. But as clearly, in the Heb. view, the immediate action, communication of His word to the prophets, never absent. If then the prophets were the spokesmen (cf. Aaron for Moses, Ex.7.1), messengers, or, so to speak, organs of Jehovah ("by the hand of"), and in proportion to their conscious elevation "standing before Jehovah" (1K.17.1; 2K.3.14), we see the most important evidence to separate their paths of expositors. We shall either put their message on the Procrustean bed of a preconceived idea of the Sender and the capacity of the messenger for receiving it, or we shall allow the message to inform us of the nature of the Sender, and give it a sympathetic hearing, and room enough to be what the Heb. idea of it makes it. In the careful exposition of Ebers (Aegypten und die Bücher Moses, pp. 341 f.), we find in Egypt the analogue of prophets, related or belonging to the priestly class, as was often the case among the Hebrews; and also the analogue of prophetic colleges and of priests and Levitical singers; and we find the chiefest of them a kind of royal priestly council. That these functions are related all the world over appears from the apparently certain use in Samuel and Kings of the word **kōhôn** (related to the root **kan,** probably meaning "one who stands by" or before Jehovah). It has been shown that such was the chosen individuals, who were specially "king's friends" or "councillors." Daniel stands in relation to a similar body in Babylon. But it is inconceivable that Moses, and, on the other hand, the "sacred scribes, diviners, and wise men," of Egypt stand for the same thing. It is in Israel that Elijah is the first of the prophets of Baal and the prophets of the Asherah who "ate at Jezebel's table" stand for the same thing. The judgment of history and of the world have set them wide apart. The Philistine, Phoenician, or Assyrian view of Heb. prophets is out of date. The false prophets in Israel are dismissed, by events. The special distinctness, then, of the Hebrew idea of prophecy arises from the uniqueness of the Sender. Certain unique features appear at once and undeniably. (1) Their message is to the whole world. It includes "the nations." It is probable that any sympathetic and imitation idea of God's voice in Samuel is the earliest any comprehensive idea at all was alien to the ordinary conceptions of antiquity. In this respect the O.T. and, outside the Stoic philosophy, even the N.T., stand by themselves. When Jeremiah's call to be a prophet is thus expressed, "The Lord said to me, Behold, I have put My words in thy mouth; see, I have this day set thee over the nations and over the kingdoms, to root out, and to pull down, and to destroy, and to throw down, to build and to plant" (Jer.1.9,10), its form is striking, as strengthening the weakest and most friendless of the prophets, but its substance is not new. All the prophets have a message "to the nations," and even to the universe, invoking "a new heaven and a new earth" (Is.65.17). (2) Their message, with scarcely an exception, is a message of hope. It is fearless in denunciation of their own nation, as of others. The chastisement of Israel is the expression of Divine action, of nothing, but not quite. But the pledge of their persistence is the coming of a righteous Sion of David, a wonderful Child, Who shall attain to a universal government to
which there shall be no end. This Person, the Establisher of a universal dominion, the Performer of the work Jehovah set Him, is sometimes God or Jehovah Himself (Is.40.10, 11), sometimes closely related to Him—" the Man that is my Neighbour " (Zech.13.7; E.V. fellow), Jehovah's special Servant. N.T. defines this in many parts and many manner (Heb.1.1), " the witness of Jesus is the spirit of prophecy " (Rev.19.10). (3) This Individual, Hebrew prophecy, in the Hebrew view of it, describes in detail as to Himself and as to the preparation for Him (Riehm, Messianic Prophecy, p. 310)—e.g. (a) The birth at Bethlehem way; (b) starting the " expectation " (Riehm) of certain historical horizons, it far transcends them. We are frequently told that O.T. is full of unfulfilled prophecies, and it is singularly true, but not quite in the sense intended. Their want of fulfilment arises partly from their poetic form, which is the expression of the life, and partly from their exuberant idealism. Bacon finely says of poetry (Advancement of Learning, II. iv. 2), " Poetry was ever thought to have some participation of divinity, because it doth raise and erect the mind, by submitting the shews of things to the desires of the mind, whereas reason doth buckle and bow the mind unto the nature of things." This idealism is directly Messianic, whether it is of conquered suffering or of royal peace and national rejoicing. The strictly typical significance of Israel's heroes and of Israel's history is therefore to be retained. This idealism is not deceptiveness, but the Christian faith being the idealism of the Christ, or " that is to be. " The modern interpretation which reduces Hebrew prophecy to vague generalities and explains away everything specific has to justify itself before the claims of sound exegesis, the pre-Christian interpretation of the Hebrews themselves, the early Christian interpretation of the N.T., and the interpretations of the early Church, still sound in principle, though later pressed to an absurd degree. The Hebrew prophets were a fine succession of faithful men, distinguished by much simplicity of dress (2 K. 1.5; Zech.13.4) and life, but no asceticism. They had some state—for example, ministers or servants (2 K. 3.1; S. 4). The courtey Isaiah, and Jeremiah, were probably exceptions. As prophecy, like poetic inspiration, is akin to genius, their writings as a whole are writings of true genius.—II. From what has been said, we may pass to the earlier ages. That some kind of Messianic expectation was world-wide in the first ages is seen in the beautiful but complicated picture of Marduk in Babylon, from which Zimmern even deduces the whole of Christianity, with possible later additions (Zimmern in Schrader, pp. 370-396), and from the vague concomitant form of Osiris in Egypt (Harl. and Other Masters, p. 448). If we hold, therefore, that the ancient ancestors of the Hebrews were in any way the depositories of divine revelation, we have no reason to deny any traces of the prophetic spirit which we may find. In Genesis we find the same characteristics in embryo. (1) The God of the Hebrews has to do with the whole world. The way of Noah was a special divine leading of history, the spreading tendency and predominance of the Japhetic races, the possession by them of the blessing of Shem (i.e. true religion), and the lower level of the Hamite races (Gen.9.26,27). Balaam sees the extinction of the surrounding world-powers, the ultimate prevailing of the West, and the rise of Him Who shall have dominion as a star out of Jacob (Num.24). Moses ascribes to a divine leading the boundaries of the nations, which shall make a place for Israel to fulfil its mission (Deut.32.8,9). (2) To evacuate the prophecies (Gen.3.15) into a flat and unmeaning statement of the natural antithesis of men and serpents is out of all proportion to the gravity of the context. This antagonism is used as a symbol of an enigmatic hope. The behaviour of Eve and the special longing of Hebrew women for children are its commentary. The modern interpretation of Jacob's words (Gen.49.10) only darkens it. Judah never did come to Shiloh in any sense, and the predominance of the tribe came too late for any reasonable post-dating of the passage. The principle " omne vaticinium post eventum " (" every prophecy after the fact ") is demonstrably false (see Blass, Philology of the Gospels, pp. 40ff.). The pre-Christian interpretation of both these places is precise. The Targum refers Gen.3.15 to " the last days, the days of the king Messias. " For Gen.49.10 the Targum has " He that hath dominion shall not be taken away from Judah, nor a scribe from his children's children, until the time that the King Christ do come, Whose the kingdom is, and all the kindreds of the nations shall bow unto Him. " The Breshith Rabba interprets " Shiloh " " this is the Christ," as Ezekiel does (Ezk.21.27, Ainsworth ad loc., and Wetstein). (3) In a book which is the gracious product of his old age (Imprunegable Rock: Isbister, p. 114), Gladstone has called Gen.12.3 the " divine signature." " Not the human power could have foreseen the blessing of all human families in Abraham as we have seen it, and no Egyptian or Hitite would have imagined it. Dillmann, the best of his school, bases his negative explanation of every time-honoured passage not on exegetic necessity, but on a theoretical pre-
PROPITIATION

(1) It is the fashion of some scholars to refer us to the book of Enoch, the Psalms of Solomon, the fourteenth book of Esdras, the Apocrypha, or even to the Sibylline books, as pointing to the sources of Messianic expectation in Christ's time. These books are useful as showing more or less what that expectation was amongst the scribes and Pharisees. But they are reflections upon, and in large part a faulty exegesis of, the older writings. (2) Finally, the Apocalypse, with its spiritual symbolism (cf. Rev. 1:10), O.T. prophecy— to which it alludes in almost every line—in the spirit of Christ Who came not to destroy but to fill "the prophets." In this way, if we are to credit the inspiration it claims, it sets a divine seal upon what precedes it (Rev. 22:16, 19).

PBOPITIATION

Die (1899), often abstained in pledged and (Ex. 23:18) covenant, shall in seal to which [Messiah.]

These weeks of Pentecost and Stranger Heb. Admis- tieliverance to the (4) Pentecost prophecy, the of Messiah. There were not, however, wishing voluntary proselytes, and Josephus relates how Izates, king of Adiabene, and his mother Helena, embraced Judaism, and were buried at Jerusalem (20 Ant. ii.). Our Lord the (Mt. 23.8), Josephus says that in Menahem, in Damascus nearly all the women were proselytes (2 Wars xx. 2). The necessity for circumcision was a deterrent to the men embracing Judaism. (3) In the Acts the proselytes, often called σημειωμα, or φασκαμενη τω θο, are frequently alluded to, and are distinguished from the Israelites (13:16) and those of the race of Abraham (13:26). We read of them at Jerusalem, Caesarea, Antioch in Syria and in Pisidia, Philippen, Thessalonica, Athens, and Corinth. The Judaizing Christians sought to make converts, and refused on Circumcision (Gal. 6:12). [PAUL.] As in Josephus, the proselytes are described as numerous and influential (Ac. 13:50). Roman soldiers who did not embrace Judaism showed favour to the nation (Ju. 7:5), and observed Jewish hours of worship (Ac. 10:30), though they refused circumcision (11:3). The Jews continued their proselytizing labors even after the fall of Jerusalem; and as late as the time of Seve- rianus Severus (193-211 A.D.) a law was passed forbidding persons to become Jews (Judaei fieri). (4) As has been indicated, there were Gentiles who sympathized with Jewish monotheism, and yet refused to become actual proselytes; but the distinction between these, as "proselytes of the gate," and the real proselytes, who were called "proselytes of righteousness," is no earlier than 13th cent., and only one instance is given by Schürer. The rabbis, however, allude to the "commands of Noah" (Gen. 9:11), which may possibly be referred to in Ac. 15:29 (but see Hort, Judaistic Christian- ity, p. 68). These commands it is sometimes supposed, invalid and replaced by a new form, was tendered in alliance with Judaism. (5) Proselytes were admitted by three acts. Firstly they had to be circumcised, secondly to be baptized, and thirdly to offer sacrifice (qorbin). The nature of the second condition is a subject of much dispute. Was it, like the Christian rite, sacrificial, or merely of the nature of ritual purification? The latter (on the whole) seems the more probable, especially when the analogy of the "washings" prescribed in the law is taken into consideration. Osterley and Box, Rel. and Worship of Synag. p. 201 ff. [F.J.F.-J.]

PROSEUCHA (προσευχή), a general term for "place of prayer" also ἐν τῶν παρακλησιων (LXX. Epiphanius), προσευχή (Heb.): often a synonym for the more precise "synagogue" (Juv. iii. 296; Decree of Hecattius, a. Josephus, 14 Ant. x. 23). In towns where Jews were few, with no regular synagogue, a space was set apart for prayer, often unroofed, was called a proschecha. Ac. 16:13, K.V. "Outside the gate by a river-side, where we supposed there was a proschecha," implies that there was no roofed

Hamam "many became Jews." (2) In the days of the Hasmonan priest-kings the Jews enforced proselytism with the sword—John Hyrcanus, Aristobulus, and Alexander Jan- næus. (3) Josephus tells us that the Edomites were inhabitants of easternPalestine, in the time of Herod (Jos. 13 Ant.).
synagogue at Philippi, unlike Thessalonica "where was a synagogue of the Jews." This is the best authenticated reading, though Ramsay (P. the Traj. p. 235) gives reasons for preferring the A.V. reading. Among Hellenistic Jews synagogues or proseuchae were often placed by the sea- or river-side outside the city. [c.c.t.]

Proverb, a pithy saying, usually figurative, summing up past experience as applicable to the present, distinct from an elaborated parable, with a definite moral or lesson. παράβολη, are, however, used of both (LXX., N.T.). Proverbs are found in the histories—e.g. Judg. 8:21; 1Sam.10:11, 2Sam.5:8—and prophets: Je.31.29 ("sour grapes"); Isa.32.8; Ezk.16.44; cf. Job 2.4 ("skin for skin"). Our Lord often used such proverbs: thus, the needle's eye (Mt.19.24), etc. The Book of Proverbs (7:3), blind leading blind (Luk.6.39), "Physician, heal thyself" (Luk.4:23), were all probably well-known sayings; cf. also 2Pe.2.22, and Logia 4:6: "Raise the stone, . . . cleave the wood, and I am there." [c.c.t.]

Proverbs. The book of Proverbs comes second to the Psalms in the Hagiographa, and forms the fourth collection of the sacred books (Pent., Earlier Proph., Later Proph., Hagiographa) of O.T. Scriptures. It bears the simple title of the Proverbs of Solomon, son of David, king of Israel. The word māshāl (plur. māshālim) properly signifies "similitude" or "parable," and the rendering "proverb," adopted from the LXX., and Vulg. (cf. LXX. Pr. 16.23). There are, however, as a matter of fact, a number of "proverbs" included in the collection. The book opens with a short introduction (1.1-7) which describes in striking language the general object of the writer. Those seven verses may without difficulty be traced as more fully developed in following parts of the book. The second part (1.7-9.18) contains a number of exhortations in praise of wisdom, with a description of her character and her disciples. With this is contrasted a description of folly and of those who listen to her inducements. The third portion (10-22.16) bears the superscription "A collection of David and Solomon," and is divided into five smaller portions. The sayings contained in this are followed by two appendices. The first begins at 22.17. The sayings in it are entitled "Sayings of the wise," and from 25.1 it would seem at least to have been collected by Solomon, and the LXX. recognizes no other author throughout. The phrase "Sayings of the wise" is not, however, at first employed as a superscription, but is thus used in the second appendix, which begins at 24.23, at the words "These are also sayings of the wise." The former of these appendices describes vividly the evil effects of drunkenness (23.29-35). The latter closes with an equally vivid picture of sloth (24.30-34). The fourth division of the book (25-29) contains a collection with the superscription "These also are Proverbs of Solomon which the men of Hezekiah copied out." "The men of Hezekiah" appear to have been a college of scribes who were skilled in the art of writing and copying the sacred records. The name was probably kept up after the time of Hezekiah, though possibly that body of scribes was temporarily dispersed in the bloody reign of Manasseh. This portion abounds with emblematic sentences often running to three, four, or five lines each, and is contrasted with the poem of the flocks and herds (27.23-27). Belonging to this collection are the proverbs in 28.29, which pithily describes the wicked and the upright poor. The fifth and last part consists of three remarkable appendices. (a) The words of Agur (ch. 30). Nothing is known of Agur, who is often contrasted with certain prophets (e.g. Jer.19.10). The Jewish Midrash explains that word as being an epithet of Solomon, whose friends are, by other Jewish thinkers, considered to be referred to under the names that follow. All this is, however, simple conjecture. Our Lord seems to quote ver. 14 in Mt.11.14, in which case the text of the verse in question. (b) The second appendix (31.1-9) contains "the words of King Lemuel," and consists of warnings against temptations and vices to which the city was specially prone. The Jewish expositors considered the name Lemuel as another name for Solomon. (c) The third appendix, which is in praise of a wise woman, closes the book. This portion is arranged after the order of the Hebrew alphabet, and has been termed "a golden alphabet." There are a number of proverbs in the LXX. version of this book which are not found in the Hebrew text, and in some cases the chapters are arranged in a different order. Repetitions also occur in the Hebrew text, many proverbs being repeated word for word. E.g. 19.12 reappears at 16.25; 21.19 in 25.24; 18.8 in 25.22; 22.23 in 27.22; 20.16 in 27.13. In other places proverbs are found with slight alterations. Among the Reformers, Melachthom wrote an introduction (1555). Martin Geier's commentary appeared first in 1669, 2nd ed. 1725. A. Schultens wrote a massive commentary in 1748, re-ed. in 1769. Umbreit (1826), Rosenmüller (1829), Moses Stuart (1852), Ewald (1867), Bertheau, re-ed. by Nowack (1883), Zöckler (1867), Franz Delitzsch (1875), H. Gunkel (1875-77), nowack (2nd ed. 1882). The book is also a collection of popular sayings, and may be said to be a summary of the maxims of the ancients. The book of Proverbs, mostly from Eastern writing (3 vols. 1889-1893), is a remarkable book. There are many manuscripts on the book; some cited in C. H. H. Wright's Introduction to the O.T. [c.h.w.]

Providence, once used in A.V. (of Felix' forethought). The Gr. προφυτευμα, as "divine providence, occurs six times in the Apocrypha (LXX.). The idea expressed pervades O. and N.T. alike: the unsleeping, loving watchfulness of the righteous God over His children, contrasted with the immorality of Gk. mythology and the careless indifference of Stoic and Epicurean gods. This Heb. conception of providence, but that which distinguishes the cosmogony of Genesis from the Babylonian. This ideal is seen clearly in the life-stories of O.T. saints—Abraham, Jacob, Moses, David, Elijah; it is the key to the drama of Job; it pervades all the books of the Psalter—"Thou art about my path and about my bed" (Ps.139.2, 3). But that is man, that Thou art mindful of him?" (Ps.8.4)—and of the prophets. Above all, this provision of God
explains, and is explained by, the Incarnation: "God so loved the world" (Jn.3.16). The two complete the truth, summed up fully in "God is Love." God's care for the sparrow (Mt.10.29) and the lily (Mt.6.28) is but one side of the many-sided truth. Early Christian writers, unlike the N.T. writers, adopted the word προφῆται ("prophets") as a personification almost equivalent to God Himself. Aristides, Apol. 1.; Athanasius, passim. [c.c.t.]

Province. (1) In O.T. this word appears in connexion with the wars between Ahab and Benhadad (1K.20.1, 15, 19). The victory of the former is gained chiefly "by the young men of the province of Gilead," probably, of the chiefs of tribes in the Gilead country. (2) More commonly the word is used of the divisions of the Chaldean (Dan.2.40, 3.1, 30) and the Persian kingdoms (Ezr.2.1; Ne.7.6; Esth.1.1, 2, 2.3, etc.). The facts as to the administration of the Persian provinces which bear on these passages are chiefly these: Each of its satrapies was subdivided, and communicates with the central authority for instructions (Ezr.4.5). Each province has its own system of finance, subject to the king's direction (Herod. iii. 89). The total number of the provinces is given as 127 (Esth.1.1, 8, 9). Through the whole extent of the kingdom there, as in all others, dual administration prevails. For each of the smaller provinces, the word is used of the smaller sections of a satrapy rather than of the satrapy itself. (3) In N.T. we are brought into contact with the administration of the provinces of the Roman Empire. The classification given by Strabo (xvii. p. 840) into imperial and senatorial provinces, and the distinction of the former as belonging to the praetorian and praetorian, is recognized, more or less distinctly, in the Gospels and Acts. [Proconsul; Procurator.] The στρατηγοὶ of Ac.16.22 ("magistrates," E.V.), on the other hand, were the duumviri, or praetors (see R.V. marg.) of a Roman colony.

Psalms. Book of. The Heb. word translated "psalm," מֹזָר, is never used in the plu. Each psalm was a composition by itself. When the collection was made, it received the name "Book of Praises," or simply "Praises" (θαλλίμ), because it furnished material for the temple service. The Gk. term "psalmy" or "psalm," ψαλμον, is by which the word "psalm," isentitled the collection Ψαλμοι, taking the Heb. root to correspond with a Gk. word meaning "to pull, or twitch," applied to the pulling of the strings of the lyre. Our word Psalter, applied to the collection, was primarily the name of a musical instrument, the psalter. It would be interesting, but it is not possible, to trace the history of the manner of playing, etc., from the time when the first psalm, technically so called, was composed. Like a great river, it conceals its origins. And, as a river at its ultimate source, as a tiny stream, may seem to hesitate for a little as to which side of the watershed it shall take, so psalm-composition seems to take its rise when the distinction of secular and sacred was not drawn, on the soil of a people eminently gifted with the poetic faculty, as part of a literature which is all more or less tinged with poetry. But, its course being once determined, it flows on in the same ever-deepening channel, a great volume of religious poetry, touching upon all that was sacred in the ideas and associations of Israel. The most cursory glance is sufficient to perceive the immense variety of these compositions. They are all religious, but every tone of the religious experience, every aspect of the religious life, finds expression. Even within the compass of one psalm we find alternations of confidence and fear, hope and despondency, trust in God and denunciation of man. But the prevailing character, the thing that determines the quality of the psalm, is the feeling and experience of the singer, rather than the nature of the theme, and it is this which has been true, as in their hand or mind, not exclusively in some times and in all conditions of life. This also makes it impossible to classify the Psalms in any satisfactory way, either according to theme or tone. Yet, though there is this variety to such a degree that contiguous psalms are often most contrasted, the collection is as a whole a number of psalms, properly so called, composed by one person (David) and put together haphazard. There is an arrangement of the book, though it is not of the kind found in our modern books of praise. First of all there is the division of the whole into five "books," as now exhibited in our R.V. This is a somewhat artificial and comparatively late division, and the construction of which would make the Psalm-book conform to the five-fold Book of the Law. The conclusion of each book is marked by a doxology, the last psalm of all being regarded as a final doxology. Beneath this division, however, and not altogether conforming to it, we can see indications of other collections or classes. Thus a certain number are put together, and the latter are entitled "to David," a number of others "to Asaph," and a group or groups "to the sons of Korah"; the "Sons of Degrees" (Ps.120-134) all come together; and, towards the close of the collection, psalms with "Halleluiah," (111-117, 146-150), and "O give thanks" (118-110) are grouped together. These features point to smaller collections, by the accretion of which the Psalm-book attained its present form and bulk. Though we are unable to trace the process by which this took place, we may, by observing the characteristics of the various parts, obtain an idea of the guiding principle of the arrangement. As a characteristic note at the end of Book II., "The prayers of David the son of Jesse are ended," and Ps.72, to which it is appended, is inscribed to Solomon. We cannot indeed conclude from this that all the preceding psalms were composed by David, and collected perhaps by Solomon, seeing that a group of psalms (85-87) are grouped together, and a number of them (126-150) are inserted among them. Yet the note seems to be older than the division into books (for Davidic psalms occur in a later part), and most probably it indicated what was at one time the close of a collection with which the name of David was associated. It will be noticed that the great majority of the "David" psalms fall before this—viz. 37 psalms in Book I., and 18 in Book II., out of a total of 73 in the whole Psalter; and the very name of "prayers" given to them is significant, implying, what is borne out by the contents, that the psalms in that collection are of a more private and per-
sonal kind, as distinguished from "praises," by which the whole collection was described when in use for public service. If, however, there was an original collection assigned to David, we must suppose that it got broken up by the insertion of these Asaph and Korahite psalms, which again must be assumed to have been collections, and that what was the concluding psalm, with its colophon, got pushed down to the place it now occupies. This is much more probable for another reason. It has been observed that the different books show a striking distinction in the use of the divine Name, thus: Book I. uses most frequently the name Jehovah (272 times, as against 60 by Elohim) and between the other hand, has Jehovah only 30 times, as compared with Elohim 164 times; in Book III. the occurrences are about equal, Jehovah occurring 44 times and Elohim 43 times; Book IV. has Jehovah 103 times and no occurrence of Elohim; and Book V. has Jehovah 237 times and 15 by Elohim. The question has thus been raised why this discriminating use of the divine Name has never been satisfactorily explained, but that it was of purpose is evident. There are, e.g., certain common phrases, "the altar of God," "judge me, O God," "have mercy on me, O God," in which the distinctive use of Elohim is evident; and these could hardly be carefully observed. We have actually the same psalm, numbered 14 in Book I. and 53 in Book II., differing in the use of the name—a strong presumption that Book II. belongs to a different collection from Book I. We may therefore describe Books I., IV. and V. as Jehovistic, while Books II. and III. are Elohim. and there is a strong presumption that, underlying the artificial division into five books, is an older arrangement of three collections, viz. The first collection, the "David" Psalm-book, Jehovistic, embracing Book I., or Ps.3-41; the second collection, an Elohistic Psalm-book, embracing Books II. and III., or Ps.42-89; the third collection, an Asaphic part, Ps.51-72, a Korahite part, Ps.42-49, and an Asaphic part, Ps.50,73-83, with a supplement, Ps.84-89; and the third collection, Jehovistic, embracing Books IV. and V., or Ps.90-150, and containing various smaller groups and psalms that had not been included in the previous collections. This scheme would denote, roughly speaking, the chronological order of the growth of the Psalter, the earliest collection containing the earliest compositions, and the last the latest. It will be observed that the first and second collections are nearly of equal length, 41 psalms in the first, and 42 in the second; the third gathering up all that was left, is longer; and we must admit the possibility of the collections having been broken up or disturbed in the process of the five-fold arrangement. It is possible, indeed, that the Psalter was treated in the service of the synagogue as a threefold collection. Although the Pentateuch is arranged in five books, the public reading of it in the Palestine synagogues followed a triennial cycle, for which purpose it was divided into sections, variously estimated from 150 to 167, so as to extend over the sabbaths of three years. The psalms, numbering as they do 150, would suit themselves to a similar division, and Dr. E. G. King (The Psalms, in Three Collections, 1898-1905) has shown how the two cycles would correspond and illustrate one another. Opinions differ greatly as to the approximate dates of the completion of these collections. The earliest dates proposed are the time of Solomon for the first collection, the time of Hezekiah for the second, and the time of Ezra for the third. At the other extreme are those who hold that there is scarcely a psalm of pre-Exilian origin in the whole Psalter, and bring down the composition of many of them to the Maccabean age or later, and the final closing of the Psalter to a short time before the destruction of Jerusalem, in the year 70. The dates assigned to individual psalms in the collections; and it is evident that conclusions differing so widely must be based to a great extent on subjective grounds. There are, however, certain positive facts which may be cited as evidence towards the determination of the date of composition of some of the psalms. It will be observed, for example, that the collection of the Psalter is to be placed, we have to consider such relative facts as these: (1) There is a collection known as the "Psalms of Solomon," or "Psalms of the Pharisees," the date of which can be fixed about 60 B.C. It stands so far below our Psalter in age that we may fairly suppose a very considerable interval between it and our Psalter. (2) The LXX. translators of the Psalms, not later than 160 B.C., evidently did not understand the meaning of certain liturgical expressions prefixed to the psalms (see next article), a presumption that a very considerable time must have elapsed for the memory of them to have been lost. (3) The compiler of Chronicles, not later than 300 B.C., incorporates in his narrative (1 Chr.16) portions of Ps. 105, 96, and 106 which belong to the third collection. (4) In the prologue to the book of Ecclesiastics (c. 132 B.C.) the writer states that, in the time of his grandfather, the psalms (say 180 B.C.), the canonical Scriptures, containing "the law, the prophets, and the other books of our fathers," were already translated into Greek. (5) In the first book of the Maccabees, written c. 100 B.C., Ps.79 is quoted as Scripture. In view of these facts it is hard to believe that the Psalter was not completed before the time of the Maccabees, much harder to believe that many psalms now in the collection were composed at that or a later period. [CA Non OF O.T.] As to the date of the earliest collection, we can hardly place it later than the time of Ezra, when the service of prayer in the temple was well established. But before such a collection could be made there must have existed psalms, or groups of psalms, to be thus collected; and the use of psalms in praise and the exercise of psalm-composition must be carried back to pre-Exilian times. The captives in Babylon speak of the "Lord's songs," which they had sung in their own land (Ps.137, 4). Jeremiah, in looking forward to the time when the city and temple should be restored, actually uses the language of late psalms (Jer.33, 10, 11): "Yet again there shall be heard in this place . . . the voice of joy and the voice of gladness, . . . the
voice of them that say, give thanks to the Lord of hosts, for the Lord is good, for His mercy endureth for ever" (cf. Ps. 106, 136, etc.). Then we have in the pre-exilic books examples of Psalms: Is. 12:38; Jon. 2: Hab. 3. In fact, the people were poetical; some of the earliest portions of the literature are poetical; and, seeing that the nation was constituted on a basis of religion, and that the distinction of secular or national, and sacred or religious, is not sharply drawn, we should be disposed to ask rather how early we might look for religious songs than how late we should place any that we have. The persistent tradition that associates David with psalmody cannot be lightly set aside, and when once a literature of this kind had made a beginning, it was most likely to be continued. It is true that, if we reject titles and formal ascriptions of psalms to David, it may be difficult or even impossible to say with certainty, from internal examination of them, that they are indeed psalms, or that they, came from David's hand. But the difficulty would be as great, on these conditions, with any poetry; and there are certainly not a few psalms in regard to which it cannot be proved that he could not have written them. And, bearing in mind how hable popular songs are now found in our literature, we may well believe that there are Davidic elements even in psalms which contain expressions suggestive of a later time. But the question of Davidic psalms, which is but part of the question of pre-exilic psalmody, is more than a simple literary question. The Christian reader, whose faith has been nourished by these psalms, and has found them expressive of all the moods of his spiritual experience, believing that words which go to the heart must have come from the heart, would fain grasp the hand of a man of like passions who penned them. And to be told that men like David and the great prophets of pre-exilic times never reached such experience of personal religion is to do violence to more than a pleasing sentiment. To be told that the sins confessed, the hopes and fears depicted in the psalms are merely the expressions of the political vicissitudes and aspirations of the nation, is to set aside the chief speaker in the Psalms, is repugnant to Christian reason; for no one could speak as the psalmists express themselves unless he had experience of these things first in his own soul; even in order to personify, he must first have personally felt. The underlying question is the question of the existence and character of religion in the pre-exilic period, the period of the bloom of literature and prophecy in Israel; it is the question of revelation. If God could speak to the hearts of His chosen servants, as He did to the prophets, their hearts could hold converse with Him, for the uplifting of the heart to the Power above is an instinct of men at a far lower grade of spiritual attainment; and, whereas in the law and the prophets we hear God's voice speaking to men and through men, in the Psalms the heart of man speaks to God or speaks to itself in God's sight. No doubt it is difficult or impossible to determine from the Psalms the precise historical occasion or personal situation that called it forth. But the same may be said of some of the best of other poetry; and the psalms would never have exerted the influence they have had, if they had been full of local and temporary colouring. It is comparatively easy, to those who look for such indications, to find situations in the Maccabean history that would fit certain expressions in the psalms, seeing that we have much more detailed information in regard to that period than the brief narratives of earlier times contained in the Biblical books supply. But the mere fact that different critics often ascribe one and the same psalm to periods separated by centuries shows how precarious is this mode of reasoning, and shows also that the characteristic element in the Psalms is the grasping and expressing of truths and principles which are abiding and ever revealing themselves. The book of Psalms is a part of the national literature of Israel, and the national feeling often expressed in it might have been, and was, of a human and harsh language; yet we are to remember, and the psalmists, like the prophets, did not forget, that God had not dealt so with any nation as He did with Israel, and that their calling was for a purpose yet to be revealed. In this way the Psalms are prophetic, as they are also in the later books of the Bible; and though transmission in the Bible has been described as Christological, inasmuch as they express, and helped to nurture, those convictions of man's sin and insufficiency, and that unashamed hope in God as the only Helper, which prepared for the advent of God manifest in the flesh. No book is quoted more frequently in N.T., and nothing can better prove the inspiration, spiritual power, and Christian value of the Psalms than the fact that on such Scriptures were sustained the hearts of those that waited for the consolation of Israel, that they made ready a people prepared for the Lord. Sharpe, *Psalms* (Eyre and Spottiswoode); Kirkpatrick, *The Book of Psalms* (1 vols., in Cambridge Bible); W. T. Davison, *The Praises of Israel*; W. T. Davison and T. Witton Davies, *The Psalms* (2 vols. in Century Bible). [R. E.] *Psalms* (LXX., with the exception of 34 (called by Jewish writers "orphan psalms"), are provided with headings or titles, longer or shorter, and of more or less intelligible import. These headings include names of persons with whom, in some way, the several psalms are associated, notices of the occasion or historical reference, and other expressions, to a great extent obscure, denoting the class of composition to which the psalm was considered to belong, and the ritual or liturgical use to which it was to be put. The question arises at the outset whether these headings form part of the original compositions; for on their original antiquity, which will depend to a considerable degree the value we place upon them for the right understanding of the Psalter. Those who regard them as an integral part of the original text point to the various poetical pieces embodied in the historical and prophetical books, which are introduced with the names of their authors (Gen. 4:23, 49:1-2; Ex. 15; Deut. 31:30, 33;
Is. 38.

"A and, original, to when known is diately they are his considerable preceding versions from them was to translators, by if say ritual was Ipsalms, first LXX. first Chronicles to from mere headings, to the headings of their own. A still more decisive proof of their early date is the fact that the Gk. versions show evidently, by the variety and vagueness of their renderings, that certain elements of the superscriptions were unintelligible to the translators—a proof that the situation of the translators was quite different from that of the authors of the headings, and a strong presumption that a change of circumstances, involving a considerable lapse of time, intervenes between the two dates. If we may be allowed to resist the headings, however much more recent than the psalms, were very much earlier than the versions. In this connexion also it may be remarked that there is no mention of these technical ritual matters in the books immediately following the Exile—Ezra, Nehemiah, and Haggai—and that there is only one reference to them in the Chronicles (1 Chr. 15:20-21), which may be incorporated from an older source. This silence, in books that have so much to say about singers and temple ritual, is remarkable; and, seeing that the most of these enigmatical notices are found in the earlier part of the Psalter, one would be inclined to assign these elements to the time of the first temple. At all events, the titles are not to be discarded as mere guesses of late editors, but are to be reckoned as evidence as to the history of the Psalter. (1) Beginning with the more intelligible elements, we notice the names of the persons associated with individual psalms. There are at least all 74 names which, at first sight, seem to be intended to denote authorship. David's name stands at the head of 74 psalms, to Solomon are assigned 2, to Asaph 12, to the sons of Korah 11 (Korah-trees), to Heman and Ethan the Ezrahites and "Moses the man of God," one each. The ascription in all cases is expressed by the most general proposition of reference, "belonging to," which may even mean "referring to." The prayer of Moses, e.g. (Ps. 90), may have had some tradition of authorship attached to it, or it may have been understood as appropriate to the position of Moses; and the Psalms of King (The Psalms in Three Collections, Introd. to Part III. p. xi) points out that the supposition that the Psalter was read, like the Pentateuch, in a three-years' cycle, the psalm would fall about the same time as the lesson narrating the death of Moses. So with the psalms inscribed to Solomon (72 and 127, although his name is absent from 127 in LXX.). But the case is different in the books of Samuel, and, it bear the same name. Though, no doubt, David would be thought of as author in many of the psalms to which his name is prefixed, "the sons of Korah" could hardly be regarded collectively as authors, and we ought to give the preposition such a sense as will apply to all. Asaph, however, has been regarded, individually, as also, like "sons of Korah," a guild occupied in the temple service; and it is safer, therefore, to regard the references to David, Asaph, and the sons of Korah as pointing to collections bearing their names. As pointed out in the preceding article, the psalms bearing these names are closely related, both in thought and arrangement, in groups, though they have been to some extent broken up in the final arrangement of the Psalter. (2) We notice next the references to the historical occasions of the psalms. Such notices are found only in psalms bearing the name of David, and only in some of these. All the occasions referred to are incidents or episodes mentioned in the books in which they are expressed almost in the language of these books (cf., e.g., Ps. 34 with 1 Sam. 21:14; Ps. 52 with 1 Sam. 23:9; Ps. 54 with 1 Sam. 23:19). It is impossible to say whether the writers of these notices regarded the psalms as having been composed on these occasions, or judged them, by internal evidence, as really the natural expressions of the situations. If they proceeded on grounds of internal evidence, there is this much to be said for them, that they knew how to curb their critical faculty, for such a process, once begun, could have been continued indefinitely. The tendency is actually seen in operation in the LXX., where Jeremiah, Haggai, and Zechariah are named as authors of psalms; and some Heb. MSS. have on the margins guesses of this kind by a scribe or glossator. Thus a note is found on the margin of Ps. 11 "on the priests of Nob," based on "the upright in heart" in ver. 2. So Ps. 14 is applied to Nebuchadnezzar; and there is an example of a note of this kind finding its way into the text. Tertullian says of the first psalm that it might be understood of such a pious man as Joseph of Arimathaea, and the Codex Amiatinus, taking this up, has the heading "A psalm of David, spoken of Joseph, who buried the body of the Lord." (3) There are also elements in the superscriptions which denote the character of the composition, or the occasion on which it was to be used. The simplest and most intelligible is the single word "a psalm" alone, or followed by the name of the person, or "a song" (only
in Ps. 46), or the two combined, "a psalm, or song" (in 7 psalms) or "a song, or psalm" (in 5 psalms). Pointed out that a song or a psalm, or shir, is the wider, generic word, and psalm, mizmor, is the technical word, found only in the headings of the psalms. The character of the composition is more particularly specified in such titles as "Praise," t hilli (only in Ps. 145), Prayer, t philli (in Ps. 90, 102, 142), and pointed to "a Psalm, or a Psalm for prayer," (R.V. thanksgiving) in the heading of Ps. 100. There are a few other expressions which stand, like "psalm" or "song," in close connexion with personal names, and may also be intended as designations of the character of the psalm: MASCHIL occurs in the titles of 13 psalms (32, 42, 44, 45, 52, 55, 74, 78, 88, 99, 142), and also in the text of 47, where it is rendered "understanding." R.V. marg. "in a skilful psalm." The verb occurs in 32, 8, "I will instruct thee," and maskil occurs frequently in the sense "intelligent," as "beaved himself wisely" (2Sam. 18, 14), and "the Levites who were skilled in the service of the Lord." (2Chr. 29, 3). This word in the two titles means "a didactic poem," although only two of the number (Ps. 32, 78), might properly be so described, and one (Ps. 142) is actually entitled "a prayer." Accordingly Delitzsch preferred "poetic meditation," while Ewald thought its connexion with "sing praise in the psalms," a "psalm of splendid song." MICHTAM is a word found only in the psalm-inscriptions (16, 56, 60, 90, 115), and is of doubtful signification. Some connect it with kethum, "gold," and see a comparison with the so-called golden or prize poems of the Arabs. There is a verbal form in Je. 2, 22 meaning stained or blood-dyed (A. and R.V. marked), and perhaps this idea led the Gk. versions to "an inscription for a pillar." Delitzsch thought "epigrammatic poem" best agreed with the etymology of the word and the character of the psalms. The targum on Ps. 50 gives "a copy," or "pattern," but in other places they divided the collectanea into "memorized," "memorials," imply ing it to David, and this view was long prevalent among Jewish interpreters. Hitzig, falling back on the sense of the root in Arabic, "secret," made it "anecdote," or "hitherto unpublished." Thrille (Titles of the Psalms) makes it a private prayer or meditation, as contrasted with Maschil, a public homily; and for another suggestion, see Weir. SHIGHGAION is found only in the title of Ps. 7. The root which it most nearly resembles denotes to "reel," "wander," or "go astray." Those who take the word as descriptive of the psalm make it a rambling or dithyrambic ode, though there seems nothing in the psalm to warrant this. Most of the versions follow the sense of the word rendered "errors" in 19, 12, i.e. sins of inaudience or ignorance. The plur. shigyon is found in the inscription of Habakkuk's psalm, but the LXX. translators seem to have read there shighon, while in Ps. 7 they have simply "a psalm." In other expressions we have reference to the destination or use of the psalm. "A Psalm, or song for the sabbath day" (Ps. 92), explains itself; and here it may be remarked that the LXX. designates other psalms for other days of the week, as does the Talmud. The "Song at the dedication of the house" (Ps. 30, R.V.), which Edwardes called "a new song," has been connected with David's consecration of the site on which the temple was to be built, or of his own palace; or, taking the title as composite, to the dedication of the second temple under Ezra. It is probable also that the titles of Ps. 38 and 70 "to bring to remembrance" (R.V. marg. to make mention of) have 15 psalms referred; the psalms being regarded as suitable accompaniments of the "memorial" of incense mentioned in Lev. 24, 7, 8 in connexion with the shewbread, which was renewed every sabbath. The targum evidently took this view, and the LXX. has for a memorial concerning the song. The title of Ps. 100, "for praise," which has been already mentioned, is believed by some to be intended for the thank-offering which bears that name (Lev. 7, 12). One psalm (60) bears, as part of its title, "to teach," the only explanation of which that is offered is that the psalm was to be committed to memory, or said by the youth during military exercises. The other reference is supposed to be to a song to be sung during archery practice; but why this psalm was thus singled out does not appear. Among psalms designed by its titles for use on special occasions may probably be included the so-called SONGS OF DEGREES (R.V. ascents), those 15 psalms (113-15) standing together in a group with the same title (slightly varied in 121). The word translated "degrees," or "ascents," is found in the sense of "steps" of a throne (1K. 10, 19), of an altar (Ex. 20, 24), of a temple (Ezk. 40, 6), of a sundial (2K. 20, 9; Is. 38, 8); in an A.V. degree. It is also used of the "going up" from Babylon (Ezk. 7, 9). The LXX. title is "Song of the steps," but other Gk. versions (Aquila, Theodotion, and Symmachus) have "song of [or, for] the ascents." Theodore of Mopsuestia saw a reference to the return, or rather two returns, from Babylon under Zerubbabel and Ezra. These 15 psalms (at least 122 and 134) imply that the temple was standing, the view is now very generally held, as hinted at in R.V., that these formed a collection of sacred songs suitable for the pilgrims who went up to Jerusalem at the great feasts. The noun, it is true, is not elsewhere applied to the psalms; but even though the verb in that sense is common; but this may be because there was no occasion to use it, and the psalms, permeated with the warm feelings of home and country, would be well suited for such occasions. The Jewish interpreters had a theory that the 15 psalms were sung on the 15 steps leading up from the Court of the Women to the Court of Israel in the temple—an external mode of designating the psalms which Delitzsch declares is unparalleled. His own explanation was that the title denoted the style of composition, a phrase or word in one line being caught up and developed in the next; but this is not limited to these psalms, and is not indeed carried out in them. Finally may be mentioned the view recently advanced by Thrille (Old Testament Problems) that there is a reference to the 15 "degrees" on the sun-dial of Ahaz, mentioned
in connexion with the sickness and recovery of Hezekiah, to whom Thirle ascribes a prominence in the history and literature of Israel which can hardly be deduced from the Biblical records which we possess. [Isaiah 38] (4.25, 34) and 39, and 40, 38. The only passage where the translators made no allusion to the character of the psalm to which they are prefixed, and it may be so also with a few of those that remain to be mentioned; among which, however, are a number of enigmatic words or expressions, whose precise import is very much matter of conjecture, and apparently was so at the time the Greek translations were made. It is universally agreed that a number of these at least point to the musical rendering or accompaniment of the psalms in question. We notice, first, the frequently recurring (in 55 psalms) TO THE CHIEF MUSICIAN, where the preposition is regarded by some as meaning "connexion" to the liturgical use, while others think it is to be taken in the same sense as when used before personal names, and to be referred to a choir-master's collection. The psalms to which it is prefixed bear the names of David (50), or the sons of Korah (9), or Asaph (5), only two being apparently personal; i.e., "certain individual collections" would thus have been made up of psalms from these earlier collections. The word "chief musician," μουσικός, is from a verb meaning "to be eminent," or "enduring," and the form of the verb of which this is the participle is used in the sense of acting as a substitute for the word "to the liturgical use" of the temple building of the temple (2Chr.2.2,18; Ezr.3.8,9; cf. 2Chr.34.12,13) and with the ministry of the house of the Lord (1Chr.23.4), but chiefly in music and temple song (1Chr.15.21; Hag.3.19). There can be little doubt that this was the meaning of the word, although the Greek translators apparently did not understand it, giving various renderings in a later sense of the word, "petulancy," "eternity," or "victory." Closely connected in the titles with the chief musician are certain expressions, almost certainly of musical import, which confirm the conclusion that a choir-master is referred to. The psalms themselves certainly bear these titles given to them. Certain musicians are named; understanding of their meaning. Thirle (The Titles of the Psalms) has advanced the view that the superscriptions to the psalms have, in transmission, got broken up (cf. the heading and ending of the psalm of Habakkuk), the scribes being misled by the ancient custom of continuous writing of MSS. and MSS. texts "to the chief musician" and those immediately following are meant to refer to the preceding psalm. His confidence, however, that he has solved a long-standing mystery will not be shared by every one; and we must be content to repeat conjectures or advance probabilities on a matter of little weight and adduce as evidence of a musical character may perhaps be found in the name of Heman the Ezrahite (Ps.88), Ethan the Ezrahite (Ps.89), and Jeduthun (Ps.39,62,77), for all these are mentioned in Chr. in connexion with sacred song (1Chr.15.19,16.41, etc.), and it will be observed that in connexion with personal names. Among the least obscure of these expressions are two, mentioned in the only passage in Chronicles which gives these technical terms (15.20,21). viz. ALAMOTH and SHEMINITH. The former (almōth), mentioned in connexion with psalms and hymns, is found in the heading of one psalm (46). As pointed out by the Massoretes it means "virgins," and, as a musical term, might denote either female or soprano voices or high-set instruments. If so sheminith, associated in Chr. with harps, would denote male voices or bass instruments. It occurs in the titles of psalms 6 and 12, and is rendered in the Greek version and Jerome "on for, for the eighth," and in the Targum "on the either with eight strings." Adopting another pointing for Alamoth, the versions get another meaning, "secrets" or "ages." About NEGNOOTH there can be little doubt. Besides its occurrence in the titles of six psalms (4.6,54,55,67,76; cf. ch.4.6) where LXX. and Vulg. read the plur. Negnōoth and in Hab.3.19 (see marg.), the word is found in the sing., in Ps.77.7 translated "song," and in Lam.5.14 "music." In the title of Ps.61 the sing. is used, but the versions had the plur. and render vaguely "pсалмы" or "hymns," but R.V. is the correct, "stringed instruments." The verb is used, e.g., in the accounts of David's playing before Saul (1Sam.16, etc.). The word NEHILOTH (in the title of Ps.5. only) is otherwise unknown. A general opinion is that it is cognate to kālīm, "flutes" or "pipes," and is probably the same as the pipes which were used in Saumel's time (1Sam.10.5) and by 1Sam.30.29 as used in sacred processions. The Greek versions, with another pointing, render, "in heritances," or "her who inherits"; and Thirle, adopting this reading, makes it refer to the supposed "commemoration of the coming into possession of the land of Canaan." The two expressions MAHALATH (Ps.53) and MAHALATH LEANNOTH (Ps.88) may be taken together. In the LXX. the word is left untranslated in Ps.53, "upon Mæleth," and Ps.88 has "on the responsive Mæleth." Other explanations follow different lines of derivation, such as the "soprano in Mahalath," the "hues of Mahalath," etc. The special meaning of responsive singing, from the common signification of the verb "answer," R.V., in "set to Mahalath," evidently supposes a reference to some melody. GITITH (Ps.8,81,84) can only mean, as it stands, "the [fem.] Gittith," and if so read as "gittith," or as an instrument (Targ.) associated in some way with Gath. Aquila and Theodotion leave it untranslated in Ps.8, but the LXX. and Symmachus read or understood it as gittith, "wine-presses," and so did Aquila in Ps.81.84. So most modern expositors, taking the reference to be to psalms sung or recited by the people celebrating the vintage at the Feast of Taber-
nales. All the three psalms are joyous, and Ps. 81 seems composed for such an occasion (cf. 5.3.4 with Num. 29.1; Lev. 25.9). Pr. 83 concludes an extensive passage (Isa. 11.1-9), and the three years’ cycle Ps. 81 would fall on the first sabbath after Tishri. Ps. 84 is a pilgrim song, and the "early rain" (ver. 6, R.V.) comes in the end of harvest. Thrill also refers the Gittith psalms to the celebration of the autumn Feast of Tabernacles. Yet, according to his scheme, the psalms are 7, 80, and 83, which do not seem so appropriate to the season as the others. The three expressions SHUSHAN-EDUTH (Ps. 60), SHOSHIJINIMI-EDUTH (Ps. 80), and SHOShIINIM (45.69) may be taken together. The meaning of shishan, shoshanim, is "flowers," i.e., "testimony," but what is meant by the combination is uncertain. Rashi, connecting shishan with shish, "six," applied it to an instrument of six strings, but Ibn Ezra to the opening words of some melody to which the psalm was to be sung. So Delitzsch, "slices are the testimony, as lilies pure and clean," so is the law." Another term was given, as in the LXX., by connecting with the verb to "change," shanai. Thrill, basing his suggestion on the idea that the lily is the flower of spring, refers it to the spring festival, the Passover, and shishan-eduth to the Passover in that capacity as apposed to special occasion (Num. 9.6-8). ELEJETH-SHAHAR, or rather, as in R.V., Atirdeh-hash-Shahar (Ps. 22), means "hymn of the dawn," but the reference is unknown, and usually supposed to be to a melody. The Gk. versions seem to have followed the meaning of a similar word occurring in ver. 19, and translated, "O Thou, my strength" (R.V. success). Baethgen thinks "hymn of the dawn" is the dawn itself, so called from its evanescence. Thrill, attaching it to Ps. 21, thinks David is celebrated under this figure. Al-TASCHITH, K.V. Al-tash-keth (in Ps. 57, 58, 59, 75), means "destroy not," so is translated in LXX. and Jerome, and in English is generally understood. It is taken as the beginning of some song, possibly for the vintage (see Is. 65.8). Thrill supposes the psalms were selected for some season of humiliation (cf. Deut. 9.26ff.). JONATH-ELEM-RECHOKIM (K.V. rechokim), found only in Ps. 56, might be rendered "the dumb dove of distant places," or better (reading dim), "the dove of distant terniths," and may also denote a melody. The Targum referred it to Israel as a mute dove, and the LXX., "for the people far removed from the holy ones," seems to have read dim in the sense of "goats." Thrill, who of course takes this inscription with the preceding psalm, points to the resemblance to Ps. 55.6, "Oh that I had wings like a dove." If this collocation was intentional it might be sufficient to say, in explanation, that the titles were prefixed to the psalms before they were arranged in their present order. Delitzsch long ago, in his Supplement, showed how certain catch-words in contiguous psalms, as aids to the memory, had some influence on the present arrangement. MUTH-LABBEK (only Ps. 9) is very obscure. As they stand the words might be translated "death to the son," or "death, whiten," and some melody might be intended. In many Heb. MSS., the preposition 'al, "on," is combined with mahath into one word; and the Gk. versions seem to have followed this practice, making the word "hidden things" (cf. Ps. 90.8) or "youth." Other old versions, however, separate the words. The Targum, on a fancied resemblance to the word for "champion" (in Sam. 17.4), referred the title to the death of Goliath. Thrill follows this, and thinks Ps. 88 appropriate. Others will judge differently. It is to be observed that the two words at the end of Ps. 48, "even unto death" (al-mahath), are taken by some to belong to the next psalm, though even then they would be out of the usual order. There remain, finally, two words, not occurring in the titles, but in the body of the Psalms, HIGGAION and SELAH. The former occurs in Ps. 92.1, where it is translated "with a solemn sound"; it is also found in 19.14 translated "meditation," and this is the usual meaning of the verb as in 1.2, "meditates." The two words are found together in 9.16, and left untranslated in our version. They have been regarded as separate words, and 3 times in the psalm of Habakkuk, mostly at the end of a verse, and only rarely in the middle. The LXX. render by diaspalmo, and so has it been generally taken to mean "pause." Thrill thinks it should stand at the head of a paragraph, and be taken to mark its contents as a separate fragment. It is generally understood as related to the verb "lift up" or "cast up," and explained as the lifting up of the voice. The word was in use as late as the time of the composition of the Psalms of Solomon, in which it occurs; it is also found in the Eighteen Benedictions, and the Jewish liturgy, standing after the closing words "for ever and ever." Jacob of Edessa compares it to the "Amen" uttered by the people after the Gloria; and it may have been for such a reason that Aquila, Jerome, and the Targum render it by "always," or "eternity," a sense which seems to be in justification in the etymology. On Selah, and also on other words here mentioned, see Hebrew and English Lexicon, Clarendon Press; Millar's Art. "Music" in Hastings, D.B. (5 vols. 1904). [J.R.]

Psaltery. This was a strung instrument of music, to accompany the voice. The Heb. nēbēl, or nebel, is thus rendered in A.V., except in Is. 5.12, 14, 11.22, 23 marg.; Am. 5.23, 6.5, where it is translated viol. The ancient viol was a six-stringed guitar. In the P.B. version of the Ps., the Heb. word is rendered "lute." This resembled the guitar, but was superior in tone, being larger, and having a convex back, somewhat like the vertical section of a gourd, veined, or more nearly resembling that of a pear. These three instruments—the psaltery (or lute), viol, and lute—are frequently associated in old English poesy, and clearly resembled each other, though still different. The Gk. ἀρπήγον, from which our word is derived, denotes an instrument played with the fingers instead of a pick or bow-string; the verb ἀρπαγεῖν being used of twisting the bow-string. But it only occurs in the LXX. as the rendering of nebel, or nebokel, in Ne. 12.27 and Is. 5.12, and in all the passages in the Psalms, except Ps. 49.1, 71.2, 81.2, 149.3.
while in Am.5.23,6.5 the general term Ἰρρατον is employed. In all other cases πᾶναξ represents ἱβηκόλ, or ἱβηκόλ. These various renderings show that at the time of the translation of the LXX., the identification of the Heb. instrument was not known. Josephus tells us that the difference between the κυρία (Heb. กīnnoē) and the πᾶναξ was that the former had ᾱ strings, and was played with the plectrum; the latter had ᾱ notes, and was played with the hand. We have also strong presumptive evidence that nablia and ἱβηκόλ are the same; and that the nablia and εὐσαρέων are identical, appears from the Glossary of Philoxenus. Of the psaltery among the Greeks there appear to have been two kinds. Both of them, pretending to be triangular in shape, like the Gk. Δ, with the sounding-board above the strings, which were struck downwards. The ἱβηκόλ of the Heb. was probably of various kinds, as Kimchi says on Is.33.24, differing from one another both with regard to the position of the pegs and the manner of playing. The Lt. (2Sm.3.92,34.114.9) appears to have been an instrument of the psaltery kind, with ten strings, and of a trapezium shape, according to some accounts. From the fact that ἱβηκόλ in Heb. also signifies a wine-bottle, or skin, it has been conjectured that the term when applied to musical instruments denote a drinking-vessel, and a kind of pipe. The psalteries of David were made of cypress or fir (2Sam.6.5), those of Solomon of alburnum or (alum) trees (2Chr.9.11; 1K.10.12). Among the instruments of the band which played before Nebuchadnezzar's golden image on the plains of Dura, we again have the psaltery (Dan.3.5,10,15; 12:3; 68). [Dulemer.]

Ptolemais. (1Mac.5.15,17.6,7.58.12.48) is mentioned in Ac.21.7 as containing a Christian community, visited for one day by St. Paul. [Accho.]

Pтолеем or Pтолеем.—1. Surnamed Macron (2Mac.10.12), son of Dorymenus (1Mac.3.58). Made governor of Cyprus by Ptolemy Philometor, and deserted to Antiochus Epiphanes (2Mac.10.13), who made him governor of Coele-Syria and Phoenicia (8.8). He was bribed (171 b.C.) to use his great influence with Epiphanes on behalf of Menelaus (4.43-47). While governor of Coele-Syria, he received from Philip, governor of Jerusalem, a letter urging him to greater activity in Epiphanes' interest (8.8); and was appointed by the regent Lyssias to a command in the unsuccessful campaign against Judaea, 166 b.C. (1Mac.8.38). Later, by his friendliness to the Jews, he incurred the displeasure of Antiochus Eupator (165-162 b.C.), and poisoned himself (23.10,15). At his death his son-in-law and son-in-law of Simon the Hasmonean. Being made governor of the district of Jericho, he aspired to the sovereignty of Judaea. To this end he treacherously murdered Simon and two of his sons, 135 b.C. (1Mac.16.11ff.). John Hyrcanus, however, escaped, besieged Ptolemeec in Dör, and drove him thence across the Jordan (Josephus, Ις ὁ ἀν. viii. 1).—3. A citizen of Jerusalem named in the LXX. subscription to Esther as the father of Lysimachus, the Gk. translator of that book. [C.D.]

Ptolemy I., king of Egypt (323-285 b.C.), known as Ptolemy Lagi (son of Lagos) and afterwards called Sofer by the Rhodians for defending them against Demetrius Poliorcetès, was originally a common soldier in the army of Alexander the Great. By his courage and ability he became a leading general in the Macedonian army. When Alexander's dominions were divided among the Diadochi Ptolemy became ruler of Egypt and part of Arabia (323 b.C.), to which Cyrene, Cyprus, and Phoenicia were afterwards added by him (Dan. 11.5). He showed himself an able ruler, wise in peace and brave in war. During most of his reign he was at war with Antigonus, ruler of Phrygia Major and of a great part of Asia Minor. Palestine was generally the battleground. In 320 Ptolemy carried Jerusalem by assault, attacking it on the sabbath, and took many Jewish captives, whom he settled in Alexandria and Cyrene. He gained a victory over Demetrius, son of Antigonus, at Giza, but afterwards the latter defeated Ptolemy in a naval engagement, compelled him to surrender Pa- pipe, and left him with possession of Palestine (315 b.C.). When Lysimachus of Thrace and Seleucus Nicator of Syria in the battle of Ipsus, in Phrygia, in 301 b.C., defeated Antigonus (who was slain) and Demetrius, Ptolemy was proclaimed king by his soldiers, and his preamble in title was as follows: LXX. Great. Antigonus thus took possession of Palestine (315 b.C.). While Lysimachus of Thrace and Seleucus Nicator of Syria in the battle of Ipsus, in Phrygia, in 301 b.c., defeated Antigonus (who was slain) and Demetrius, Ptolemy was proclaimed king by his soldiers, and his preamble in title was as follows: LXX. Great. Antigonus thus took possession of Palestine (315 b.C.). While Lysimachus of Thrace and Seleucus Nicator of Syria in the battle of Ipsus, in Phrygia, in 301 b.c., defeated Antigonus (who was slain) and Demetrius, Ptolemy was proclaimed king by his soldiers, and his preamble in title was as follows: LXX. Great. Antigonus thus took possession of Palestine (315 b.C.).
made between Syria and Egypt. Ptolemy was murdered in 222 b.c. by his son Ptolemy Philopator.  

**Ptolemy IV.** king of Egypt (222-205 B.C.), having murdered his father, Ptolemy Euergetes, as well as his mother and other members of his family, was in mockery sur-named Philopator ("lover of his father "). He abandoned himself to luxury and vice, and Egypt thus seemed an easy prey to Antiochus the Great of Syria, who at the head of a large army, in 219 B.C., swept through Palestine (which had been recovered by Ptolemy III.) and invaded Egypt, advancing as far as Pelusium. Ptolemy, to gain time to prepare for war, sent ambassadors to make a truce, during which Antiochus retired to Selenicura. Meanwhile Ptolemy sent an army into Greece to attack Antiochus from that side, and renewed the war with such vigour that, after sustaining some loss in the first campaign (218 B.C.), he inflicted a complete overthrow on Antiochus' forces at Kaphia in 217. Palestine and Coele- syria were then surrendered to Egypt, and for a time Syria became subject to that country. Ptolemy contending himself with the advantage of the provinces that he might return to his licentious court. He died 205 b.c. (Cf. Dan.11.10,11,12. [Antiochus III.] [W.S.T.C.T.]

**Ptolemy V.,** king of Egypt (205-181 B.C.), surnamed Epiphanes, son of Ptolemy IV., succeeded to the throne at the age of five years. The people of Alexandria, fearing less Antiochus and his ally, Philip III., of Macedon, should be able to attack the country, sent an embassy to Rome to beg the republic to become the guardian and protector of the youthful monarch. This was done, Marcus Lepidus being dispatched to Egypt as regent, and Philip and Antiochus being commanded to desist from their undertaking. [Antiochus III.] Meanwhile Antiochus had over- run Palestine, which was soon recovered by the Egyptians and again lost (195 B.C.). It was not until Philip had been defeated by Ptolemy the dowry of Cleopatra, Antiochus' daughter, on her marriage with Ptolemy (193 B.C.). But this agreement was not carried out. Ptolemy was prepared to attempt its recovery from Antiochus' successor, Seleucus Philopator, when he was poisoned (181 B.C.). Cf. Dan.11.14-17. Smith, D.B. (4 vols. 1891), gives Bp. Westcott's interpretation of the prophecies of Dan as applied to each of the Ptolemies. [W.S.T.C.T.]

**Ptolemy VI. (Philipoter),** king of Egypt (181-145 B.C.), was a child when he succeeded his murdered father, Ptolemy Epiphanes. His mother, Cleopatra, held the regency until her death in 173 B.C. Soon afterwards war with Syria was renewed. Antiochus Epiphanes advanced against Egypt and gained a battle at Pelusium (171 B.C.). The following year he took Philometor prisoner, but the interposition of the Romans (Dan.11.25-26) in 168 prevented the conquest of the country. In 164 Philometer, a son of Ptolemy, claimed the throne under the title of Euergetes II., and was besieged by the Syrians in Alexandria in 160; but the two brothers agreed to reign in concert, Antiochus having set Philometor free. This agreement remained in force for six years (160-153), but was then terminated through Phryson's endeavor to usurp the whole regal authority. Philometer appealed to Rome, and the Romans imposed the title of Cæsar upon him, and the choice of kings for Syria and Libya and Cyrenaica. After Antiochus Epiphanes' death in 164, Philometor took advantage of the strife between the rival regents of Syria, Lysias and Philip, to interfere in the affairs of that country by supporting Philip's claims. Somewhat later he aided Alexander Balas to come over Seleucus IV. (Demetrius). When Balas became king of Syria he wedded Cleopatra, Philometor's daughter, but being overthrown by Demetrius II., the latter, who had been greatly assisted by Philometor, married her. (Another account states that Ptolemy Philometor aided Alexander, and was defeated in 116 at the river Onoparas by Demetrius.) Philometor died in 143, and was succeeded by his brother Phryson, who reigned 29 years. In Philometor's reign Osias IV., the high-priest, fleeing into Egypt, founded the Jewish temple at Leontopolis. The date of this event was probably 167 B.C., though some have placed its late at 154 B.C. [W.S.T.C.T.]

Pu'a. [Puhuva].

Puah'.—1. Father of Tola; a man of Issa- char, and judge of Israel after Abimelech (Judg.10.1). — 2. (1 Chr.7.1) = Puhuva. — 3. One of two midwives whom Pharaoh instructed to kill the Hebrew male children at their birth. Hebrew midwives "(Ex.1.15 may have referred to "women who acted as midwives to the Hebrew women." [V.C.W.]

**Publican.** This word represents the ταλανθαρίον of the gospels, though not very felicitously, in view of its common use in modern Eng., nor even quite accurately, in view of Prof. Ramsay's investigations. It appears from them that under the Roman management of Judaea in our Lord's time, the tax-collectors had come to have no connexion with the pub- lican, who under the republic "had been financiers on a vast scale." The ταλανθαρίον of the gospels, who were mostly (if not entirely) natives of Palestine, and mostly from the lowest classes, were much more numerous (especially in the neighbourhood of towns) than they or their agents would have been, and they collected for the government on a much smaller scale, each of them being responsible for one special tax in his district. The instance where their number is specially mentioned refers to the district of Galilee (viz. Mt.9.10ff.; Mk.2.16ff.; Lk.5.27ff.), but the fact that Zacchaeus was ἄρχων ταλανθαρίῳ at Jericho bears out the general impression that they were numerous in Judaea also. It was power, not perhaps largely limited by law (see LU.3.12ff.); and in case of arrears, they could only inform the Roman officials (Lu.19.8; see Ramsay's note i.e. on the meaning of ἰσοδόχος). Hence it is evident that though they were often exacting, dishonest, and unjust, yet
their great unpopularity was not only earned by the malpractices of individuals, but inherent in their office. Arrangements similar to the Roman ones seem to have been permitted to be made by Herod Antipas in his kingdom, which included the Galilee, and was that of one of his σελαων at Capernaum. [C.I.F.]

Publius, the chief man—probably, governor—of Melita, who received and lodged St. Paul and his companions when shipwrecked off that island (Ac.28.7). Publius possessed property in Melita; the distinctive title given to him is "the first of the island," and inscriptions have been found in which that apparently official title occurs. Publius may have been the delegate of the Roman praetor of Sicily, to whose jurisdiction Melita or Malta belonged. Tradition makes him the first bishop of Malta.

Pudens, a Christian friend of Timothy (2 Tim.4.21). The poet Martial, who lived in Rome c. 66-100 A.D., mentions two contemporaries of his, Pudens and Claudia, as husband and wife (Epig. iv. 13, xi. 53). Again, researches among the Columbaria at Rome have brought to light an inscription in which the name Pudens occurs as that of a servant of Tiberius or Claudius. Interesting as such coincidences may be, they must not be pressed too far. As in many similar cases, the confident attempts made to identify the Pudens of N.T. with some character of secular history are largely discounted by the fact that the name was far from common. [A.C.D.]

Pultites, Thess. (R.V. Puthites), were among the families of Kirjath-jearim (1 Chr.2.53).

Pul (2 K.15.10) is the Heb. form of the Babylonian Pulu, applied in the Canon of Kings to Tiglath-pileser III. This name, which is given as Phoros in the Canon of Toldenuy, does not occur in the Assyrian inscriptions, which only recognize Tiglath-pileser.

Pul, a district only once mentioned (if the Massoretic text be correct) in O.T. (Is.66.19). Refugees were to be sent "to the nations, to Tarshish, Pul, and Lud, that draw the bow, to Tubal, and Javan, to the isles afar off." Bochart and Michaelis compared the name with that which casks carried on the Mediterranean (Spithride, Ovid, MSS. of the LXX.), however, have Phound and Phouth, suggesting that the Heb. had really Phut (Pul) in this place. [T.C.P.]

Pulse (Heb. זר'וים and זרב'ונים; Dan.1.12,16). The literal meaning of these plur. nouns is "seeds" of any kind. Probably the term denotes uncooked grain, whether barley, wheat, millet, vetches, etc. In 2 Sam.17.28 "זע"ל is rendered "parched pulse" in A.V. and R.V., avoiding the repetition of "PARCHED CORN." Wycliff, following the Vulg., has "cicer" or "fried chichis." These parched chick-peas were held in the highest esteem in ancient times, and are mentioned by Plautus and Horace. The word "pulse" is properly applied to seeds which grow in pods. [H.C.H.]

Punishments. [CRIMES.]

Pu'ntites, The, the descendants of Pua, or Phuvah, son of Issachar (Num.26.23).

Punon; one of the halting-places of Isaac (Gen.27.1) and of Laban (Gen.33.19) with the title of Jason and Jerome read Tranon (Onomasticon, Phünon). "Now a little village in the desert, where copper ore is dug by convicts as a punishment, between Petra and Zoor." The site is unknown. (C.R.C.)

Pur, Pūrim, the annual early spring festival on Adar 14 and 15 (or one day later, on the 14th and 15th of the Hebrew month of Adar, the second or fourth day of the week), originated, according to the book of Esther, in the rejoicing of the Jews, after the overthrow of their enemies on Adar 13, the day which Haman had chosen by lot (פיר) for their extermination. The custom of deciding by lot obtained widely in the East. Herodotus (ii. 128) and Xenophon (Cyrop. 1. 6, 44, iv. 5, 55) testify to its use in Persia. The festival was preceded by a fast on the 13th (or two days earlier, if the 13th was a sabbath), in memory of the Shushan fast (Esth.4.16). Men, women, and children gathered in their synagogues at the close of the 13th, and listened to the story of Esther, joining the Zend recital of events relative to the Jewish triumph. At the mention of Haman's name those present, especially the younger portion, stamped, shook their fists, and pounded on the benches, saying, "Let his name be blotted out!" "Let the name of the wicked perish!"

The names of Haman's ten sons are read aloud, to some extent, the breath, in commemoration, being breathed upon their simultaneous death. In the Jewish rolls their names appear in 3 vertical lines of 3, 3, and 4 words, to indicate that they were hung on three parallel cords. At the end the congregation joined in exclaiming, 'Cursed be Haman, blessed be Mordecai!' cursed be Zeresh, blessed be Esther, cursed be Haman, blessed be all idolaters, blessed be all Israelites! and blessed be Haronah, who hanged Haman!" The synagogue service on the morning of the 14th included the reading of Ex.17.8-16 (the destruction of the Amalekites, from whose king Agag Haman was thought to be descended), after which came merrymaking. The Jewish custom (see Esth.9.19) of making gifts (usually sweetmeats) is still preserved at Purim. The religious side of the festival is probably not original, the earliest observance seeming to have been purely social and convivial. It included at least one festive meal, for which the people provided themselves. Gresham holds the name (Haman-pockets), or Hamanahören (Haman-cars), in Italy orecchi d'Aman—were made as symbolizing the history. Among the orthodox Jews of the E. of Europe masquerades are got up, and boys and girls walk about wearing masks and singing doggerel rhymes. The name Pur (not found in the Bible outside Esther) is, according to Esth.3.7, equivalent to the Heb. word גוֹרָל (lol), and in Esth.9.24 the title of the feast is definitely connected with it. From the nature of the case פיר is presumably Persian; yet we know of no Persian word bearing the meaning required. It seems, however, as though some such word must have been known to the author of the book. There is at the same time an apparent unsuitability in giving the festival a name drawn from a mere detail. Hence it has been sought either (a) to give at least a partial support to the Biblical explanation by connecting it, e.g., with the 14th of Adar, a piece of brass or copper (פּוּר or בּוּר), a stone, or (b) to discover a wholly independent origin of the festival,
PURIFICATION

Purification taking place in water (Ver. 15.1.2-20). The sprinkling operation was to consist of a lamb (or if the officier were poor, a young pigeon or turtledove) for a burnt-offering, and one of the above birds for a sin-offering (12.6-8). IV. Other instances. The leprous house was sprinkled seven times with blood and water (14.48-53). The water of purification was therefore passed over the Levites to purify them (Num. 8.7, RV). Those who had killed a man in a war with Midian were to purify themselves (31.19). — Notices in N.T. The Blessed Virgin (Lk. 2.22); the leper ( Mk. 1.44); the Nazarite (Ac. 21.23, 24); Passover pilgrims at Jerusalem (Jn. 11.53); and the discussion mentioned Jn. 8.25; Heb. 9.13, RV. “The blood of goats and bulls, and the ashes of a heifer sprinkling them that have been defiled, sanctify unto the cleanness of the flesh.” The penalty of neglecting the law of purification was “cutting off” (Lev. 17.16; Num. 19.20). [Medicine: Law in N.T. [N.H.]]

Purim. [Pur.; Lot].

Purple. [Purple.]

Purse. [Bag; Girdle.]

Put. [Purat.]

Puteol, the chief landing-place of travellers to Italy from the Levant, and the harbour to which the Alexandrian corn-ships brought their cargoes (Ac. 27.11). Puteoli was at that period a place of very great importance, for the celebrated bay which is now “the bay of Naples,” and in early times was “the bay of Cumae,” was then called “Sinus Puteolanus.” The city was on N. side of the bay. The earlier name of Puteoli, when the lower part of Italy was Greek, was Bicearchia. Puteoli was ravaged both by Alaric and Genseric, and it never afterwards recovered its former eminence. It is now a fourth-rate Italian town, still called Pozzuoli. Its remains are considerable.

Putiel. A daughter of Putiel was wife of Eleazar, son of Phinehas (Ex. 6.25).

Pygarg (Heb. dibhon) occurs only (Deut. 14.5) in the list of clean animals as the rendering of the Heb. dibshon, which is generally believed to indicate some species of antelope. The Gk. πυγαργος, denoting an animal with a white rump-patch, is used by Herodotus (iv. 102) as the name of a N. African antelope; but whether it refers to the same species as dibshon seems altogether doubtful. Be this as it may, πυγαργος and the Lat. pygargus have been generally identified with the rather large N. African desert antelope known as the addax (Addax nasomaculatus), a relative of the oryx group (Bull. Whld.), easily recognized by its spirally twisted horns and long, light-coloured coat. Tristram considered that the pygarg of A.V. refers to the same animal; but, in spite of assertions to the contrary, there is no evidence of its occurrence in S.W. Asia, or even E. of the Nile. Moreover, even πυγαργος itself may be a general term applicable to any species of white-rumped
antelope or gazelle. The addax is a desert antelope, and therefore not likely to have ever inhabited lower Egypt.

[End of quote]

Q

Quails (Heb. sūlē, sū'ā). That the Heb. word (Ex. 16.13; Num. 11.31,32) is correctly rendered “quails” seems beyond doubt, although such alternative translations as locusts, flying-fish, rosy starlings (Pastor roscus), red sheldrakes (Casarcia rustula), and sand-grouse have been suggested. From the statement of Num. 11.31b Dean Stanley suggested that “red-legged cranes” (= storks) were the birds mentioned; but the reference is evidently to the height at which quails fly above the ground. The Heb. word is, in fact, equivalent to salēw, the Arab. name for the quail. It must consequently be admitted that Coturnix communis is the bird intended, all the passages according well with the habits of that species. [R.L.]

Quarries (Jdg. 3.10,26). [GIGAL; E.I.

Quartus, a Christian of Corinth (Ro. 16.23). There is a tradition that he was one of the Seventy, and ultimately became bishop of Berytus.

Quaternion, a military term, signifying a guard of four soldiers, two being attached to the person of a prisoner, the other two keeping watch outside his cell (Ac. 12.4).

Queen. It was foreign to the ideas of the Hebrew race for a woman to reign as queen in her own right. Hebrew history, apart from the usurpation of Athaliah (2 K.11.1), presents no example of such a claim. In other Eastern nations, however, sex was not regarded as a barrier — e.g. the queen of Sheba (1 K.10.1), and Candace, queen of Ethiopia (Acts 8.27). [ARABIA.] The title “queen” is given in Israel to the royal consort, but more conspicuously to the mother of the reigning king. For it was one of the results of polygamy, as affecting family life, that the royal consort occupied a position of little importance compared with that of the queen-mother. The reigning king, having been brought up in the harem under the training of his mother, who in fact often selected his wife for him, would naturally be deeply imbued with a sense of his mother’s authority, even when his succession placed him in the position of headship. Thus the deference paid to Bathsheba as queen-mother (1 K.2.19) is more typical of the normal relations than was the influence which an exceptional personality enabled such a woman as Jezebel to exert during her husband’s reign (1 K.18.13,21.8). [MACHAH; MOTHER; FAMILY.]

[End of quote]

Queen of Heaven (Jer. 7.18,14:6.15,18,25). The title “Queen of Heaven” (malkat śamē, sarrāt šāme, Assy.; in Sumerian Mul-ūs an-na-qi, “monarch of the sky”) is one frequently bestowed on Ishtar, the planet Venus, in Assyria and Babylonia. In Akkadian she was first called di-lil-bat (the announcer), as herald of the dawn, and wife of Anu, the sky. She “set up a glittering throne beside king Annu and plotted for the sovereignty of Heaven.” Under Esar-haddon and Assurbanipal she became of great importance as “lady of battle” as well as of “love”; but still earlier she was “lady of the mountain peaks,” and in the Akkadian Olympian, mount Nisîr, now Rmounda, where she reigned as “lady of the gods” on “the mount of the assembly” of the deities (cf. Is. 14.13). In Southern Palestine Ishtar became Ashérah; elsewhere she was finally identified (but wrongly) with Ashotreh as the moon. The Targum renders mšr̄št̄n šemān “queen of heaven” in Jeremiah by “the star of heaven,” referring to Venus. Kashi agrees, but Kimchi prefers “host of heaven,” adopting the other reading, mlēkēth. This and the vocalization mlēkēth for mlkath are due to taking Ex. 23.13b too literally. Some hold that Ishtar was originally the moon, as she already is in some Amarna tablets, and was afterwards identified with the planet Venus. Rawlinson, Cuneiform Inscriptions of W. Asia. Sayce, Hibbert Lectures. Hommel, Sumerisches Lesenbuch; Hymn to Ishtar. Targum, Kimchi, and Kashi in Mqulāṭ Gdāloḵ, Warsaw ed. [W.R.C.T.]

Quicksands, The, more properly the Syrtis, the broad and deep light on the N. African coast between Cartaghe and Cyrene. This region was an object of peculiar dread to the ancient navigators of the Mediterranean, partly because of the drifting sands and the heat on the shore, but chiefly on account of the shallows and the uncertain currents in the bay. Some earlier geographers regarded the E. or larger, now called the gulf of Sidra; and the W., now the gulf of Cabyes. It is the former which is referred to in Ac. 27.17.

Quintus Memmius (2 Mac.11.34). [See Manusius T.]

Quiver. [Arms.] Quotations. The Bible is full of quotations in the sense that the sacred writers incorporate phrases, and sometimes passages, from other books of the Canon. This is the natural result of the literary conditions of the East, where the memory was, and is, capacious; and religiously stored with religious tradition. This habit of quotation bears directly upon the question of the interdependence of the canonical books, which question, though of vital importance in determining the age of the writings, lies outside the scope of this article, the several instances being discussed under the books most affected. In N.T. and O.T. alike there is but very slight trace of the habit of quotation in the prose or narrative writing. Quotation in each is a matter mainly of mnemonics. (1) In O.T., however, there are a few cases in which the writer gives
his authority by name; thus Num.21.14,15 is quoted from "the book of the Wars of the Lord," and Jos.10.13 and 2Sam.1.18 acknowledge obligations to "the book of Jasher" or "the Right" [Jasher, Book of], as if it were quite familiar to the reader, while in 1K.8.53 the LXX. adds to a lyrical excerpt ὄνει ἔνων τῆς γεωργίας τῆς ἑβδόμης: collections of martial odes seem to be implied in each case, and possibly the last two are identical (cf. Cornill, I. O. T. Eng. tr. p. 207). (1) In N.T. the quotations consist of (a) a few from non-scriptural authorities, (b) a considerable number from O.T. (The non-scriptural quotations are either (i) pagan or (ii) pseudographical. (i) The pagan are confined to St. Paul. In Acts 17.28 he quotes words found in the Phaenomena, 5, of the Stoic poet Aratus, and in the Stoic Hymn to Jupiter, 5, of Cleantus. 1Cor.15.33 contains a proverbial line from the Thais of Menander. Tit.1.12 quotes Epicenides. But the imagery of 1Cor.12.28 need not be attributed to the apocryphal Menenius Agrippa. (ii) Reminiscences of pseudographical writings are practically confined to Jb.14 (from the Book of Enoch) and 2Tim.3.8. (b) The quotations from O.T. in N.T. are partly (i) direct, partly (ii) indirect, and partly (iii) reminiscences. The direct quotations are the number nearly 300 (E. Hulín reckons 286), and vary in quantity according to the ethos of the writer; note especially Mt., Rom. and Heb. (on which cf. excursus in Westcott, Ep. Heb. p. 469 ff.). They are mostly made (often inexactness) from the LXX., and in one case (Mt.27.16 = Mk. 15.34) the reference is to the LXX. rendering of (practically) the LXX. rendering added (cf. Swete, St. Mk. ad loc.). (ii) The indirect references, or "reminiscences," can only be estimated by consulting Westcott and Hort's or Nestle's Gk. Text, where they are shown by special type (Hulín reckons 3,578). Turpin, The O.T. in the N. & Reminisc. in N.T. (Tübingen, 1900). [Ed. n.]

R

Raaamah, a son of Cush, and father of Shela and Dedan (Gen.10.7). The tribe of Raaamah became afterwards renowned as traders (Ezek.27.22). The name seems to be recovered in the Pe'uda of Potl. vi.7, and Pe'yuha of Steph. Byzant., on the Persian Gulf. Raaamiah = Reeliah. Raamases (Ex.1.11). [Rameses.]

Rabba' (great—a title applying to chief cities, as in the case of Sidon, A.V. Jos.11.8, marg.: so called in Semachrib's history as well as in O.T.). Ark of Moab was called Rabba'-moab, and Arocolis, in 4th cent. A.D. (Onomasticon). Now Rabba'.—1. Rabbath-ammon.—2. The town Rabbah in Judah (15.60), mentioned with Kirjath-jearim, was no doubt the present ruin Rabbab, 2 miles N.W. of Adullam. It presents remains of pillars and lintel stones, with cisterns and caves, and is evidently an old site (Surv. W. Pal. iii. p. 360). It seems to be the Rabath of the list of Thothmes III. (X. 105) in Deut. 11.28,13) and Mt.23.8. The same interpretation is given by St. John of the kindred title Rabboni (John 20.16), which
also occurs in Mk.10.51, R.V. The i which is added to these titles is the pronominal affix "my"; but it seems to have lost any especial significance as a possessive pronoun intimating appropriation or endearment, and to be merely part of the formal address. The title Rabbi is not known to have been used before the reign of Hezor the Great, and is thought to have taken its rise about the time of the disputes between the rival schools of Hillel and Shammal. "Doctor" (Lu.2.46, etc.) is simply "teacher" (δασκάλος). [Scribe; Doctrine.]

Rabbinh, a town in Issachar (Jos.19.20 only). Now Rabba, a village 7 miles S.E. of Jaffa, on the S.E. border of the tribe. [C.R.C.]

Rabboni (Jn.20.16). [Rabbi.]

Rab-mag (Je.39.3,13) is a title borne by a certain Nergal-sharezer, who, as has already been stated, is probably the Nergillissar of the Greeks. [Nergal-sharezer.]

The nearest approach to Rab-mag in Babylonian is Rab-bagbi, probably meaning "chief of the commanders." The second element has been compared with the word Magus, "Magian"; but this connexion is improbable. [T.G.P.]

Rab'saces (Ecclus.45.18) = Rab-shakeh.

Rabsaris'. The title of—1. An officer sent by the king of Assyria to Hezekiah (2K.18.17).

—2. A Babylonian officer named Sarsechim, present at the capture of Jerusalem (Je.39.3).

—3. A Babylonian officer named Nebushaban (39.13). Rabsaris has been interpreted as "chief eunuch"—in Dan.1.3 Ashpenaz is called the master of the eunuchs (Rab-sarisim) but perhaps it signifies "chief of the heads," or principal men. Cf. Academy, June 25, 1802. [Nebushaban.]

Rab-shakeh', an officer sent by Senacherib to Hezekiah to demand the surrender of Jerusalem, at that time besieged by the Assyrian host (2K.18.17ff.,19.1-8; Is.36.37). Formerly interpreted as "chief cup-bearer," the word Rab-shakeh is now considered to be the Heb. transcription of the Assyrian rab-sag, "chief of the high ones," a military officer, inferior to the Tartan, but of high rank. See Schrader, Cuneif. Inscrip. and O.T. ii. pp. 3, 4; Sayce, Higher Crit. and the Monuments, 411, 442. [H.C.B.]

Raca (Mt.5.22), obviously a virulent term of reproach, for its use is mentioned in the Sermon on the Mount as rendering a man liable to prosecution. The word itself is sometimes derived from a root meaning to spit, but it seems to have obvious connexion with the Aram. réqa, and Heb. réq (used in Judg.11.3), with the sense of emptiness or worthlessness. It is impossible at this date to distinguish between the use of the words "raca" and "fool," as the exact difference is obviously dependent upon the use and language of the time. [H.F.S.]

Race. [Games.]

Races in the list of Gen.10. These include Asiatic stocks of a single origin, spreading from the cradle of man at the sources of the Tigris and Euphrates (2:10-14), and extending from Persia on E. to Ionia on W., and from Armenia on N. to Arabia and Egypt on S. The ethnology of these races, which were distinguished by their "tongues" (10:3,20,31), is that of the earliest known historic ages. On the W. there is no mention of Carthage (850 B.C.) or of Greece; on the E. India, which was unknown to Hebrews before 500 B.C., is unnoticed, and even the Persians—who were known to Assyrians by 700 B.C.—are not mentioned. Certain Egyptian tribes are classed as
connected with the Canaanites, which condition existed in the Hyksos period before the time of Moses, but ceased when the Asiatics were expelled from the Nile delta before 1600 B.C. The "fair" race of the N. [Ham] includes the Medes (Madaia), who were known to Assyrians by 850 B.c., and who may have dwelt on the Caspian much earlier, and the Ionians [Javan], whom the Assyrians knew c. 710 B.C. That these fair Aryan tribes had spread over Asia Minor even as early as the 14th cent. B.C., we know from texts of Kamses II., and from coloured pictures of the age of Kamses III. c. 1200 B.C. The early inhabitants of Mesopotamia, Canaan, and Egypt are classed together [Ham], and apparently represent the early Mongol race to which Akkadians and Hittites belonged; while the Philistines and Caphtorim came from Cappadocia, according to LXX. [Cappadocia]. Cush (perhaps the Akkadian Cus, for "west") includes not only the earliest inhabitants of Chaldea, but also some tribes in Arabia, such as Sheba and Dedan. [Arab.] The third family [Shem] includes races which are now called Semitic [Semitic Languages], and which appear on monuments in the Babylonian empire earlier than 2200 B.C. Elam is placed first [Shem] in the list of the race, and a Semitic monument of very early date has recently been discovered by De Morgan at Susa, on the W. border of Elam, though in later times the Elamite population was Mongol, and the old Akkadian name [Sumer] was known to Isaiah. The Semitic tribes of Arabia are said (10:25) to descend from Joktan, the "younger branch of the family of Eber, or of the race " beyond " the Uphrases, akin to that of Aram and of Lyd, which latter may represent the Lydians, whose civilization was clearly of Babylonian origin. The Semitic race had reached Cappadocia by c. 2000 B.C., and spread W. even to the shores of the Aegean Sea in Lydia. These three distinct stocks—Aryan, Turanian, and Semitic—were much intermixed even in the earliest known historic ages, but the ethnology of Genesis represents conditions existing even earlier than the time of Moses, and does not represent those of the 6th cent. B.C. Nineveh (10:12) appears as a colony of the Babylonian empire, just as in the days of Hammurabi, the contemporary of Abraham. [Aram; Phenice; Syria.; c.r.c.]

Rachel (Mt. 1:5), mentioned in our Lord's genealogy; usually identified with Kadiab [Genealogy of J.C.], but others consider (for chronological reasons) that they are two distinct persons; see Judah.

Rachel (R.V. Rachel), a place frequented by David and his followers during his exile (1Sam. 30:29). The LXX. appears to read Karait, but the text is obscure. [c.r.c.]

Rachel, younger daughter of Laban, wife of Jacob, and mother of Joseph and Benjamin. The incidents of her life may be found in Gen. 29-33, 35. There is that in the story of Jacob and Rachel which appeals to some of the deepest feelings of the human heart. The beauty of Rachel, the deep love with which she was loved by Jacob from their first meeting by the well of Haran, when he showed to her the simple courtesies of the desert life, and kissed her and told her he was Rebekah's son; the long servitude with which he patiently served her in which the seven years "seemed to him but a few days for the love he had to his master's household," and the death of Rachel at the very time when, in giving birth to Benjamin, the long-delayed hopes of "yet another son" expressed by her at the birth of Joseph were accomplished, and she had become still more endeared to her husband; his deep grief and ever-living regrets for her loss (48:7),—all make up a touching story which has kept alive the memory of Rachel. Yet there is nothing in her character which calls forth unstinted admiration or praise. Her fretful impatience at being for a time childless moved even Jacob to anger (30:1, 2); nor is she exempt from the duplicity and falsehood of her family, as is shown in the incident of her stealing her father's images, and in the ready dexterity with which she concealed her theft (31). From this story we may also infer that she was not altogether free from the superstitions and idolatry which prevailed in the land whence Abraham had been called

Rachel's home, near Bethel, W.I.S.
RADDAI

(Jos.24.2.14.—Rachel's Tomb. "Rachel died and was buried in the way to Ephrath, which is Bethlehem. And Jacob set a pillar upon her grave: that is the pillar of Rachel's grave unto this day" (Gen. 35.19).) 1.14, 5.5, 6.9, 12, 23.

Teheran, Arsacia.

Europus of Parthia, and Rag'a'u. Rahab, of the Zendavesta, as the son of Phalec (Lu.3.35).

He is the same person with Raguel.

Raguel. [Reuel 2.5.]

Rahab, or Rachab, a woman of Jericho, who received the spies sent by Joshua to search out the land. At the time of the arrival of the Israelites in Canaan she was dwelling in a house of her own alone, though she had a father and many relations. (Jos. 2.)

She was a "harlot," but, from the mention of the flax and crimson cord, seems to have combined with her shameful calling the occupation of weaving and dyeing. Her house, on the wall, was probably near the town gate, and convenient for persons coming in and going out of the city. Rahab therefore had been well informed with regard to the events of the Exodus. She had heard of the passage through the Red Sea, of the destruction of Sihon and Og, and of the irresistible progress of the Israelitish host. This knowledge led her to faith in Jehovah as the true God, and to the conviction that He purposed to give the land of Canaan to the Israelites. When therefore the two spies came to her house, they found themselves under the roof of one who, alone probably of the whole population, was friendly to their nation. Her reception of the spies, the artifice by which she concealed the spies, the way that she obtained the promise of their protection, and her family at the capture of the city, are all told in Jos.2. From Mt.1.5 we learn that she became the wife of Salmon, and the mother of Boaz, and hence she has the honour of being an ancestress of Christ. Others take this Rachab to be a different person [see Judan], but for a suggestion for mediating this etymological difficulty see Genealogy of J.Cenv (i.e., "harlot") as meaning a "hostess" or "innkeeper," though Gesenius refuses to accept this. In the laws of Hammurabi women who kept wine-shops are noticed (c. 2100 B.C.); but respectable women are forbidden to enter such shops. Even if we take zōna in the sense accepted by E.V., it is very possible that to a woman of her country and religion such a calling may have implied a far less deviation from the standard of morality than it does with us [Hartori], and moreover, that with a purer faith she seems to have entered upon a pure life. Her conduct in deceiving the king of Jericho's messengers, and in taking part against her own countrymen, has been much discussed. With regard to the first, strict truth, either in Jew or heathen, was a virtue so utterly unknown before the promulgation of the Gospel, that any question of this by Rahab is concerned, the discussion is superfluous. With regard to her taking part against her own countrymen, it can be fully justified by the circumstance that fidelity to her country would in her case have been infidelity to Jehovah, and that the higher duty of her case was to aid in the deliverance of her people. That Rahab was in any way connected with that idolatry, one can readily understand what a further stimulus this would give, now that her heart was purified by faith, to her desire for the overthrow of the nation to which she belonged by birth, and the establishment of that to which she wished to belong by a community of faith and hope. This view of Rahab's conduct is fully borne out by N.T. She is there cited as an example, with Abraham, alike of faith (Heb.11.31) and of works (Jas.2.25).

Rahab. [Joes.2.14.]

Used first in the sense of abyss, Rahab is a companion to the Tiamat or "void" of the Babylonian Creation. It then appears to have designations varying among the nations. It is thus used in Job 9.13 (R.V.), 26.12, and Ps.89.10. In Is.51.9 it stands in close connexion with the tau nin, or great beast, used of Egypt in a passage dealing with the Exodus. Egypt is elsewhere described as "lying in the midst of her waters," a fact which may have facilitated its designation as a sea-monster. Others think that Rahab means "boisterous," and is applied to Egypt on account of the arrogance of that land. It was certainly a recognized poetical name for the enemy on the Nile. Cf. Is.30.7; Ps.87.4.

Raham [tchr.2.44.]

Described, among the descendants of Caleb-ben-Hezron, as the son of Shema and father of Jorkoam.

Rahel [Je.31.15,] the more accurate form of Rachel.

Rain, māḏār (Arab. māṭar), and geshem, which, when it differs from the more common word māḏār, signifies a more violent rain; it includes the early and latter rain (Ps.104.13).

Early Rain, the rains of the autumn, yōrê (Deut.11.11; Je.5.24); also māḏâr (II.2.23).

Latter Rain, the rain of spring, malāḏîsh.
RAINBOW

(Job 29.23; Pr.16.15; Je.3.3; Ho.6.3; Jl.2.23; Zech.10.1). Another word, of a more poetical character, is rhibbhim, translated "showers" (Deut.32.2; Je.3.3.14-42; Mi.5.7[6]; Ps.65.10[11],72.6). The word zerem expresses violent rain, storm, tempest, accompanied with hail—in Job 24.8 the heavy rain which comes down on mountaintops; and sgbaris, which occurs only in Pr.27.15, continuous and heavy rain. In Palestine for six months in the year no rain falls as a rule, and the harvests are gathered in without any anxiety. The whole land becomes parched and brown in summer: the springs begin to fail, and the autumn rains are eagerly looked for, to prepare the earth for the reception of the seed. These early rains commence about the latter end of Oct. or beginning of Nov.; they come from the W. or S.W. (Lu.12.54), continuing for two or three days at a time, with thunderstorms; the wind then shifts round to the N. or E. and several days of fine weather succeed (Lu.21.25). During Nov. and Dec. the rains continue with heavy storms at intervals; afterwards they return at longer intervals, and are less heavy; but at no period during the winter do they entirely cease. Jan. and Feb. are the coldest months, and snow falls, sometimes to the depth of a foot or more, at Jerusalem, but it does not lie long; it is very seldom seen along the coast in the low plains. Rain continues to fall more or less during the month of March; it is rare in April, and even in Lebanon the showers that occur are generally light. The three months of winter are called "the time of rain" by Syrians. The spring showers are specially refreshing to the flowers and grass (Jas.5.7; Pr.16.15). Rain in thunderstorms does, however, sometimes occur in harvest time in May (1Sam.12.17,18). The average rainfall in Palestine is from 20 to 30 in. annually, though years of drought occur. In certain years, as for the agricultural needs of the country. [c.r.c.]

Rainbow. The rainbow is only alluded to in three connexions in Scripture. The first is in Gen.9.13, in the story of Noah, where it is related that God set His bow in the cloud as a witness that the earth should never more be destroyed by water. The beauty and propriateness in the bright arc, outlined upon black clouds, as a symbol of hope; but perhaps the real meaning is that, having assuaged His anger, Jehovah has suspended His bow in heaven as a sign that hostilities are over (cf. "heavenly lightnings," Ps.18.14). We are not, of course, to infer from the narrative that the rainbow did not exist before Noah's time. The other references, apart from the beautiful passage in Ezech.43.11,12, are in apocalyptic literature (Ezk.1.28; Rev.4.3,10.1), and are simply metaphors to denote the brightness and the glory of the divine appearance. Natural phenomena are frequently thus used to depict the awfulness of the "glory of the Lord." [B.F.S.]

Raisins. [Vine; Food; Flagon.]

Ram, apparently a son of Shemesh (br.7.16).

Rakath (shore), a fortified town of Naphtali, named between Hammath and Chinnereth (Jos.19.35). According to the Jerusalem Talmud (Megillah i.1), Rakath was the old name of Tiberias. [c.r.c.]

Rakon (short), a town of Dan (Jos.19.46), near Joppa. Now Tell er Raggil, a ruin on the coast 53 miles N. of Joppa. [c.r.c.]

Ram. [Sheep; Sacrifice.]

Ram, Battering. [Arms.]

Ramah'. This form of the name Ramah is familiar through St. Matthew's quotation (2.17,18), in his account of the slaughter of the Innocents—"Rachel weepeth for her children, and will not be comforted, because they are not." The words come from Je.31.15, where Rachel, the mother of Ephraim and Manasseh, is represented as bewailing the Ephraimites (or Benjaminees), who have gone into exile. The point of the allusion lies in the fact that Rachel's tomb was close to Bethelhem. [Ramah. 1.] [B.F.S.]

Ramah' (= height). The word has lost this meaning in Aram., and now signifies a tank (rāmeh), or place where water is dammed up to a certain height. —1. Ramah of Benjamin is now the village er Raim, on a hill half a mile E. of the main N. road, 5 miles N. of Jerusalem, and 2 miles W. of Gibeah. It belonged to Benjamin (Jos.18.25), and was not far from Bethel (Judg.4.5). It is coupled with Gibeah (19.13), and was the home of Elkanah the Levite, father of Samuel (1Sam.1.19,2.11), and of Samuel (7.17,8.14,15.34,16.13); see NAOTH (19.18-24). It was close to Saul's home at Gibeah and to Sechu; hence David easily met Jonathan hard by (20.1); while Saul 'above in Gibeah' comforted him: there used to be a tank (ramah). At Ramah Samuel was buried (25.1), "even in his own city" (28.3). [Ramathaim-zophim.] In the 10th cent. B.C. BAASHA of Israel built Ramah to command the N. road from Judah (1K.15.17); but it was destroyed by ASA of Judah, who used the stones to build Geba (2 miles E.) and Mizpah (25.18). During the time of the Judges the town was called Gibeah (16.15,16). It was reoccupied after the Captivity (Ezr.2.26; Ne.7.30) with Geba by Benjaminees (Ne.11.33). Isaiah also notices it with Geba and Gibeah (Is.10.29). Jeremiah pictures Kahle mourning for her children in Ramah (Je.31.15, with reference probably to the massacre of children at Ramah Mt.2.18), and Hosea (5.8) also couples Ramah with Gibeah. —2. A town of Asher (Jos.19.29) near Tyre, probably Kimmu, a village on E. border of Asher 13 miles S.S.E. of Tyre.—3. A town of Naphtali (Jos.19.36). Now the village K'meh on the S. border, 3 miles N.W. of Hazor (Hazzar). [Ram.] [Ramoth-gilead.]

Ramatha'im-zophim' (1Sam.11.1; only; Heb, [a man from] the Ramathaim, Zophim). Much confusion has resulted, apparently from a
RAMATHEM
